- **Application Fee**
  - An $85.00 non-refundable application fee is paid online upon submission of the application.
- **Statement of Purpose**
  - The statement of purpose is the most important element of your application packet. This letter needs to reflect who you are, your goals and why you would be an asset to the Global Health & Society program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before your submit.
  
  Below is a link to help you get started:

  OWL Statement of Purpose Guidelines
  
  - **Letters of Recommendation**
  - Three letters of recommendation must be provided.
  - **Official Transcripts**
  - You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.
  - **Resume**
  - Please provide a copy of your resume if it is available.
  - **Admissions Interview**
  - The admissions interview may be conducted in person, over the phone, or via video conference.
  - **Grade Point Average (GPA)**
  - A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.
  - **Official TOEFL (or IELTS) Score**
  - All international students are required to take this exam in order to demonstrate sufficient English competency. This exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT or 80 for the IBT.
  - Students may also take the International English Language Testing System (IELTS) exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.
  - Students from countries whose primary language is English are not required to take this exam. Please visit the Graduate School’s International Applicant English Proficiency webpage for more information.

  - International students from countries whose primary language is English are not required to take this exam.

  Please note: Students who do not have sufficient prerequisite knowledge for their program courses, per the admissions committee of the Master of Arts in Global Health and Society, may be conditionally admitted and required to take additional courses prior to being fully admitted to the program.

Curriculum Requirements
There are three tracks in the GHS program. Each track requires 36 graduate credits:

- **Global Health General**
- **Policy, Governance and Advocacy**
- **Community-Based Participatory Research, Monitoring and Evaluation (CBPR)**

Global Health General Track – The Global Health General track provides training in both qualitative and quantitative research methods. It also allows students the ability to design their own program of elective courses according to their needs. This track is designed for professionals who are already in the health field, who those who desire to enter the health professions, but require substantial social science and epidemiological knowledge and methodologies to complete their education. These students may have strong interest in (or are already working in) developing countries or
underserved areas. Substitute courses may be permitted for some coursework that includes tailored research and independent study courses with faculty approval.

</table>

1. EPH 612 is only offered as a winter intersession course, requiring students to attend class from 9am-5pm for one full week.

2. Depending on the student’s choice of Capstone (5 credits) or Thesis (6 credits), the student may be advised to take either 11 or 12 credits of electives, so that their plan of study totals 36 credits.

3. Students may choose either a Capstone or a Thesis to complete their degree. The 5-credit Capstone is offered through the Department of Public Health Sciences at the Miller School of Medicine and requires 150 hours of fieldwork and a final project. The 6-credit Thesis is offered through the Department of Anthropology at the College of Arts & Sciences and includes an internship, usually completed over the summer, as well as a successfully defended thesis.

**Policy, Governance and Advocacy Track** – This track provides graduate students a comprehensive framework of global health that underscores the sociopolitical, economic, and geographic factors that, in addition to biomedical factors, impact health conditions of various countries and populations throughout the world. It focuses on the global health policies and governance models that are aimed at addressing these challenges. This concentration prepares interested graduate students to understand and critically evaluate global policy frameworks. Students in this track will analyze key issues and controversies in global health policy and delivery (e.g. priority setting, design of health systems, primary health care, equity considerations). Substitute courses may be permitted for some coursework that includes tailored research and independent study courses with faculty approval.

1. EPH 612 is only offered as a winter intersession course, requiring students to attend class from 9am-5pm for one full week.
Community-Based Participatory Research, Monitoring and Evaluation (CBPR) Track - This track will provide graduate students skills to build partnership and active participation to address critical health issues in communities throughout the world. It provides unique social science skills to integrate community members, local stakeholders, elected officials, and researchers in the design, implementation, interpretation of community-based participatory studies as well as uses of research and evaluation results to develop integrated policies to improve the well-being of community members. Community-Based Participatory Research is a methodology that has been widely endorsed by major global health players, including the NIH’s Office of Behavioral and Social Sciences Research. Substitute courses may be permitted for some coursework that includes tailored research and independent study courses with faculty approval.

¹ EPH 612 is only offered as a winter intersession course, requiring students to attend class from 9am-5pm for one full week.

Students must satisfy foreign language competency prior to the beginning of their third semester by passing two courses taught in the target language at the 600-level or above, by completing a Directed Independent Language Study (DILS) program, or by passing a language competency exam. Students may petition for a waiver of examination if they have gained target language competency in another manner (i.e., native speaker, upper division coursework in target language, Peace Corps service, IB credits, or Defense Language Proficiency Test).

History
history.as.miami.edu

Dept. Code: HIS

Our Department is committed to pursuing excellence in historical and interdisciplinary scholarship, teaching, and service to the profession, the University, and the wider community.

Our fine faculty of some twenty-four professors does research and teaches in many historical areas, often crossing chronological, geographic, and disciplinary boundaries.

Our courses combine innovative subjects and methods with more traditional subjects and presentations. In their classes, students have the opportunity to experience the latest and best historical research and writing, to explore special topics in depth, and to receive rigorous training in researching, analyzing, and writing history from nationally and internationally recognized scholars.

M.A. Programs in History
- M.A. in History (p. 1738)
- Five-Year Bachelor of Arts/Master of Arts in History (p. 1735)

Doctoral Program in History
- Ph.D. in History (p. 1739)
HIS 602. Studies in African History. 3 Credit Hours.
Selected topics in African history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 611. Studies in Asian History. 3 Credit Hours.
Selected topics in Asian history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 632. Studies in Early Modern European History. 3 Credit Hours.
Selected topics in European history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 633. Seminar in European History. 3 Credit Hours.
Selected topics in European History.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 634. Seminar in Ancient History. 3 Credit Hours.
Selected topics in Ancient History.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 636. Studies in Medieval History. 3 Credit Hours.
Selected topics in Medieval history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 641. Field Preparation: Colonial Latin America. 3 Credit Hours.
An introduction to central historical issues and historiographical debates in the field of Colonial Latin America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 646. Studies in Modern European History. 3 Credit Hours.
Selected topics in European history after the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 652. Studies in Latin American History. 3 Credit Hours.
Selected topics in Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
HIS 654. Studies in Modern Latin American History. 3 Credit Hours.
Selected topics in Latin-American history before and after Independence. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 655. Studies in Colonial Latin American History. 3 Credit Hours.
Selected topics in the colonial period of Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 662. Studies in United States History. 3 Credit Hours.
Selected topics in United States history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 664. Studies in American Intellectual and Cultural History. 3 Credit Hours.
Selected topics in American intellectual and cultural history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

HIS 665. Studies in American Political and Diplomatic History. 3 Credit Hours.
Selected topics in American political and diplomatic history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 669. Studies in African-American History. 3 Credit Hours.
Selected topics in African-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 670. Studies in Public History. 3 Credit Hours.
Selected topics in public history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 697. Studies in Visual History. 3 Credit Hours.
Selected topics in the use of photographs and other visual evidence for historical purposes. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 701. Research Seminar Part 1. 3 Credit Hours.
Selected topics in Comparative History.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 702. Research Seminar Part 2. 3 Credit Hours.
Selected topics in Comparative History.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
HIS 703. Directed Readings in African History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 704. Directed Readings in Asian History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 705. Directed Readings in European History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 706. Directed Readings in Latin-American History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 707. Directed Readings in American History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 708. Directed Readings in Comparative History. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 709. Field Preparation: Colonial and Revolutionary America. 3 Credit Hours.
An introduction to central historical issues and historiographical debates in the field of Colonial and Revolutionary America.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 712. Field Preparation: Modern America. 3 Credit Hours.
An introduction to central historical issues and historiographical debates in the field of Modern America.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 713. Field Preparation: Medieval Europe. 3 Credit Hours.
The central historical issues and historiographical debates in the field of Medieval European History.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

HIS 714. Field Preparation: Early Modern Europe. 3 Credit Hours.
An introduction to central historical issues and historiographical debates in the field of Early Modern Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 715. Modern Europe Field Preparation. 3 Credit Hours.
This course is designed to prepare students for the Modern European Field Comprehensive Exam by introducing them to leading works and diverse approaches in the study, writing, and interpretation of modern European history. The choice of readings will be selective, but in range and significance they will provide students with a foundation for further command of the field.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
HIS 718. Field Preparation: Modern Latin America. 3 Credit Hours.
An introduction to central historical issues and historiographical debates in the field of Modern Latin America.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 721. Historiography. 3 Credit Hours.
The philosophy, theory, and practice of history.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 722. Dissertation Prospectus Seminar. 3 Credit Hours.
Students will develop a strong dissertation prospectus. This class will operate as a writing workshop, for which each student will write and revise several drafts of a prospectus that will be critiqued by the student's advisor, the professor teaching the course, and fellow students. At the end of the semester, students will give oral presentation about their proposed projects to the department.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

HIS 760. Seminar in Latin-American History. 3 Credit Hours.
Selected topics in Latin-American History.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 761. Seminar in United States History. 3 Credit Hours.
Selected topics in United States History.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HIS 762. History as a Profession. 3 Credit Hours.
Practical experience for graduate students in designing courses; preparing lectures, conference papers and scholarly publications; and in applying for jobs and research grants
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

HIS 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in HIS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

HIS 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
HIS 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of HIS 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

HIS 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

Five-Year Bachelor of Arts/Master of Arts in History

Overview
The BA/MA program is a five-year program that combines an undergraduate degree in History with a Masters degree in History. The accelerated nature of the program enables students to take graduate-level courses in their final undergraduate year (once they have completed 90 undergraduate credit hours, per UM regulations) and then complete the Master’s degree in one year of full-time study, rather than the usual two years of full-time graduate study, and at a reduced cost.

Admission Requirements
Applications will be reviewed by the Department of History's graduate committee. To qualify for admission to the Five-year BA/MA Degree in History, applicants must:

- have earned 15 credit hours in History courses, including 3 credit hours at the 500-level
- have earned a 3.5 GPA in History courses
- receive an endorsement from one full-time faculty member in the Department of History who agrees to serve as the student's MA advisor
- submit their application to the program no later than January 5th of their Junior year

To remain in the program, students must:

- complete all requirements for the History BA
- complete all of the requirements for the History MA
- enroll in a minimum of 12 undergraduate credit hours per semester until the BA is awarded
- earn a minimum cumulative GPA of 3.3 in all History graduate coursework

The Department of History's graduate committee, in conjunction with each student’s MA Advisor, will assess the student's progress after each semester.

Total Credit Hours 150

1. HIS 599 does not count toward the 6 hours of required 500 level seminars.

2. A grade of C- or better and a cumulative GPA of at least 2.0 are required for all history courses.

3. All courses for majors will be selected by students in consultation with advisors designated by the department.

4. This course is normally given in the fall semester. All students are required to take the Historiography course in their first year. This course counts for 3 of the 30 credits.

5. Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program. The credit hours from these courses are included in the total required.

6. The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Although the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive exam also will act as a thesis defense. For a list of fields, see below.

7. Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credit hours of HIS 810, which count toward the 30 required credit hours. Students must apply for graduation in their penultimate semester (i.e. fall semester for spring semester graduation).

Committee

Upon admission to the master’s program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student’s secondary field, must be formed no later than the student’s second semester in the program. There are then two options for completing the masters. One requires 30 credit hours of coursework and an exam. The other requires 24 credit hours of coursework, a master’s thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student’s course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

M.A. in History

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

Application Requirements
1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from applicant’s former professors.
4. Recent Graduate Record Examination scores on the General Test.
5. TOEFL scores (for international students).
7. A detailed statement from the student indicating:
   a. the student’s background and education;
   b. the student’s interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami;
   d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student’s understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Deadlines
January 5: Applications for admission and aid for Fall semester.

</tbody>
</table>

1 This course is normally given in the fall semester. All students are required to take the Historiography course in their first year. This course counts for 3 of the 30 credits.
2 Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program. The credit hours from these courses are included in the total required.
3 The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Although the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive exam also will act as a thesis defense. For a list of fields, see below.
Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credit hours of HIS 810, which count toward the 30 required credit hours.

Students must apply for graduation in their penultimate semester (i.e. fall semester for spring semester graduation).

Committee

Upon admission to the master's program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student's secondary field, must be formed no later than the student's second semester in the program. There are then two options for completing the masters. One requires 30 credit hours of coursework and an exam. The other requires 24 credit hours of coursework, a master's thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student's course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

Ph.D. in History

With a program and faculty that are recognized regionally, nationally, and internationally, the history department at the University of Miami is dedicated to producing Ph.D.s of the highest quality. Our selective program offers close, individualized training for the next generation of teachers and researchers who will shape and lead the historical profession. While we have particular strengths in the histories of Latin America and the Caribbean, Europe, and the United States, our faculty shares interests that cut across geographies: gender and sexuality; religion; race and ethnicity; law; and economy, among others. Additionally, we have a strong commitment to interdisciplinarity, as we actively maintain bridges to other departments, programs, and centers at the University of Miami. Our graduate students are encouraged to take advantage of these dynamic scholarly connections as they cultivate their own intellectual pursuits.

Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from the applicant's former professors.
4. Recent Graduate Record Examination scores.
5. For international students, TOEFL scores.
7. A detailed statement from the student indicating:
   a. the student's background and education;
   b. the student's interests (field, topic, etc.);
   c. why the student wants to pursue a graduate degree in history at the University of Miami; and
   d. what the student plans to do with the degree upon completion.
   This statement constitutes a very important part of the application review process and should indicate the student's understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master's level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students' progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years' aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

6. The required credit hours of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student’s background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.

7. This course is normally given in the fall semester. All students are required to take the Historiography course in their first year. The credit hours from this course are included in the total required.

8. Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program. The credit hours from these courses are included in the total required.

9. Typically, students take HIS 762 in their forth semester in the program. The credit hours from this course are included in the total required.

10. Typically, students take HIS 722 in their 5th semester in the program. The credit hours from this course are included in the total required.

11. Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor.

12. The comprehensive examination for Ph.D. candidates consists of written and oral examinations in three fields. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the program.

13. Following the completion of course credit hours, students will need to take sufficient dissertation research credit hours (HIS 830 if before the comprehensive examination has been passed; HIS 840 after passage of the comprehensive examination) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours.

14. Students who enter the Ph.D. program with an M.A. from another university or from another program at the University of Miami receive 30 credit hours towards the 60 credit hour requirement.

15. For requirements relating to the dissertation, see below.

As indicated, the number of required course credit hours varies depending on the student’s previous graduate work, but all students must reach a total of 60 credit hours beyond the B.A.

Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student’s third semester in the program. It is the responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and
oversees the student’s course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

**Incompletes**

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

**Languages Requirement**

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary.

**Comprehensive Examinations**

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of at least three faculty members.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master’s degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

**Dissertation**

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate’s field of specialization. It must meet the highest standards of research, substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a “defense” of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

**Fields**

**Chronological/Geographical fields:**

- Medieval Europe
- Early Modern Europe
- Modern Europe
- Early American History
- Modern U.S. History
- Colonial Latin America
- Modern Latin America
- East Asia
- Russia
Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above:

- African Diaspora
- Race and Ethnicity
- Gender and Sexuality
- History of Religion
- History of Science and Medicine
- History of Crime and Law
- Political History
- Diplomatic History
- Urban and Environmental History
- Economic History
- Business History
- Labor History
- History of Sport
- Military History
- Cultural and Intellectual History
- Public History
- Atlantic World
- Renaissance
- Mediterranean World
- Empires and Nations
- Global 19th Century

Customized Fields:

Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale. To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student's file. With rare exceptions, a customized field may not be the major field of study.

Dissertation 14

Total Credit Hours 15

11 Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. For more information on fulfilling language requirements, see below.

12 The comprehensive examination for Ph.D. candidates consists of written and oral examinations in three fields. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the program.
Following the completion of course credit hours, students will need to take sufficient dissertation research credit hours (HIS 830 if before the comprehensive examination has been passed; HIS 840 after passage of the comprehensive examination) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours. Students who enter the Ph.D. program with an M.A. from another university or from another program at the University of Miami receive 30 credit hours towards the 60 credit hour requirement.

As indicated, the number of required course credit hours varies depending on the student’s previous graduate work, but all students must reach a total of 60 credit hours beyond the B.A.

**Early Modern Studies**

**Graduate Concentration in Early Modern Studies**

The Early Modern Studies Concentration is an interdisciplinary concentration to be earned in conjunction with the individual Ph.D. requirements for the departments of English, History, and Modern Languages and Literatures (Romance Studies, Spanish and French). Graduate students will continue to be housed in any one of the three departments and must fulfill the requirements of their discipline for the Ph.D. To qualify for the Concentration, students must successfully complete a minimum of two courses (6 credit hours) in one or both of the other two departments, substituting for courses within their department; and a minimum of two courses (6 credit hours) in early modern studies within their department.

**Mission**

**Goals**

The major goals of the Ph.D. in History are 1) to ground students in historical knowledge and scholarship at the most sophisticated level; 2) to provide each with the skills necessary to cultivate an area of specialization and an original research agenda; 3) to train students for teaching at the college/university level; and 4) to prepare graduates to obtain appropriate employment.

**Student Learning Outcomes**

- Students will grasp historical knowledge and scholarship at the most sophisticated level.
- Students will cultivate an area of specialization and carry out an original research agenda.
- Students will demonstrate the ability to teach at the college/university level.

**International Administration**

https://maia.as.miami.edu/

The University of Miami’s Master of Arts in International Administration Program is a thirty (30) credit interdisciplinary graduate degree designed to prepare students for careers in the administration of public and private organizations. MAIA students learn how to identify, analyze, and manage the complex global problems that confront modern institutions, particularly in areas of security, human rights, and geopolitics. The program combines academic considerations of politics and culture with those of economics and management to provide participants with the skills necessary to pursue a range of career objectives in both domestic and international careers. MAIA students are change-agents, entrepreneurs, and leaders in both government and non-governmental sectors. Our graduates have pursued careers in the realm of non-profits and non-governmental organizations, in the fields of communication, health, emergency management and national security, as well as in the financial and business sectors. The degree is awarded by the College of Arts and Sciences.

MAIA concentrations are designed to prepare students for global leadership roles in specific fields. The MAIA program offers the following concentrations:

- Certificate in Geospatial Technology - for those who seek credentialing with spatial data, mapping, and geographic information systems (GIS)
- Concentration in Healthy Equity and Human Rights - for those who seek to study community-engagement strategies for health care, social justice, and human rights.
- Concentration in Risk Communication - for those who seek coursework on strategic communication, crisis management and assessment, and communication in high stress scenarios.
- Independent Concentration - for those who wish to propose and develop their own field of elective study

For additional program information, please visit us at maia.miami.edu (https://maia.as.miami.edu/)

**Joint Degree Programs**

MAIA and the Master of Public Health (MPH)

The Master of Arts in International Administration/Master of Public Health (MAIA/MPH) degree is offered jointly by the College of Arts and Sciences and Miller School of Medicine’s Department of Public Health Sciences. The MAIA degree, with a second master’s degree in public health, is designed for
students who seek knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years. The dual degree requires sixty (60) credits.

MAIA and the Master of Public Administration

The Master of Arts in International Administration/Master of Public Administration (MAIA/MPA) degree is designed for students who seek an in-depth knowledge of both domestic and international aspects of policy, administration, and leadership. In addition to the professional advantage of studying public administration as part of UM’s highly regarded MPA program, student will benefit from the global pedagogical perspectives of the MAIA program, including coursework on diplomacy, security, sustainability, and culture. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years. The dual degree requires sixty (60) credits.

Certificate in Security Management

The Certificate in Security Management is designed to prepare administrators of public and private organizations to meet multidimensional security challenges in the post-9/11 world. From threats posed by violent human actions to natural disasters and data security, management in times of acute crisis demands a unique array of insights and skills. The program is be grounded in an academic, theoretical understanding of security problems and emergency management strategies. It also emphasizes the development of the practitioner's arts within the strategic, tactical and operational realms of security administration. The certificate requires fifteen (15) credits. MAIA students may also complete the Certificate in Security Management as a concentration in the M.A. program.

Master of Arts in International Administration

- M.A. in International Administration (p. 1749)
- M.A. in International Administration with a Certificate in Security Management (p. 1750)
- M.A. in International Administration with a Certificate in Geospatial Technology (GIS) (p. 1750)
- M.A. in International Administration with a Concentration in Health Equity and Human Rights (p. 1750)
- M.A. in International Administration with a Concentration in Risk Communication (p. 1750)

Certificate in Security Management

The Certificate in Security Management is designed to prepare administrators of public and private organizations to meet multidimensional security challenges in the post-9/11 world. From threats posed by violent human actions to natural disasters and data security, management in times of acute crisis demands a unique array of insights and skills. The program is be grounded in an academic, theoretical understanding of security problems and emergency management strategies. It also emphasizes the development of the practitioner's arts within the strategic, tactical and operational realms of security administration.

To be admitted to the Certificate in Security Management, students must complete the same admission requirements for the MAIA program.

Certificate in Geospatial Technology (w/MAIA)

The Certificate Program in Geospatial Technology (GT) is designed to benefit students who seek to enhance their skills in geospatial technology, especially Geographic Information Systems (GIS) and satellite remote sensing. MAIA students may complete the Geospatial Technology Certificate as part of the MAIA program. For information about the stand-alone Geospatial Certificate program, click here: Graduate Certificate in Geospatial Technology (p. 1723)

IGS 611. International Organizations. 3 Credit Hours.
Covers the entire spectrum of international organizations and the theoretical and practical issues relating to international organizations including peace and security, human rights, and economic development.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IGS 612. International Administration. 3 Credit Hours.
Presents a broad overview of concepts, theories, processes, and practical global challenges confronting professional public/nonprofit managers; discusses contemporary issues facing multi-national corporations, non-government organizations, and public agencies; and analyzes the similarities and differences between public, non-profit and private management.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IGS 613. Global Cultures: Religion, Communication, and Security. 3 Credit Hours.
An overview of world religions and cultures as a backdrop of effective communication for international professionals. Religious and political conflicts have increasingly become a staple of our complex, globalized world. As a result, it is important for professionals working with international and non-governmental organizations to understand the religions and the cultures of the world to better facilitate their work in different societies in Africa, Asia, Europe, the Caribbean and the Americas. Since religion is an integral part of many cultures, understanding the religious implications of certain activities is important in navigating certain societies and facilitating the work of professionals, especially in regions where religion and political violence dominate foreign relations and foreign policy.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.
IGS 614. World Affairs and Diplomacy. 3 Credit Hours.
This course introduces the conceptual basics of international relations and trains students in analytical and critical thinking skills through familiarity with the broad palette of issues and actors that make up today's world politics. Topics include the origins of the state and its changing role in today's world and an examination of the actors in international relations and the issues before them.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

IGS 615. International Political Economy. 3 Credit Hours.
Reviews the essentials of International Economics. It then provides students with an operational understanding of the theory of comparative advantage and its application to policy issues.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

IGS 616. International Leadership, Strategy, and Decision Making. 3 Credit Hours.
Explores organizations from the strategic perspective of the leader, identifying common elements of thinking, structure, measures, outcomes, issues, and challenges faced by those who seek leadership roles in international administration.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

IGS 617. Capstone in International Administration. 3 Credit Hours.
The capstone experience gives students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students may complete an approved internship in an appropriate organization or compose a research paper under the supervision of a MAIA faculty member or affiliated faculty member. The capstone project must reflect the student's area of concentration, as applicable. The capstone experience is meant to be completed in a single semester.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

IGS 644. Energy Security and Environmental Sustainability. 3 Credit Hours.
The concepts of environmental sustainability and energy security will be explored. The importance of energy and the mitigation of climate change in formulation of country strategies, advancement of national interests and shaping of the international system will be stressed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

IGS 645. Human Security: Prevention & Mitigation. 3 Credit Hours.
Theoretical approaches and the major global threats to human security along with some of the most promising policy solutions will be explored. Some of these human security threats are well known, like genocide, and others, like cybersecurity, are newly emerging. Focus will be placed on key human security topics such as war, terrorism, human trafficking, climate change, famine, violence against women, and infectious and non-infectious diseases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IGS 646. Civil Security Management. 3 Credit Hours.
This course examines the management of civil crisis issuing from violent human actions. In the first section of the course, a framework will be developed that addresses the security of "civil space," emphasizing actions threatening public order and individual safety. Emphasis will be placed on the burdens of "critical incident management" and the elements central to its success. These elements—planning and contingency, leadership and management, intelligence and analysis as well as operations and communication—will be engaged further in the second section. The final section of the course will examine specific threats to civil order and the management of systems designed to mitigate their effects.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

IGS 647. Disasters and Humanitarian Assistance. 3 Credit Hours.
This course examines the management of disasters from natural causes. It is focused primarily on the theory and practice of response. At the center of this investigation is a difficult question: how to help? The answers are not obvious. Through the vocabularies of practitioners and the frameworks offered by academic literature, we will explore the ways in which responders respond, the lessons learned and the best practices that have emerged in the field of disaster response and humanitarian intervention.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
IGS 648. International Business Finance for MAIA. 3 Credit Hours.
International Finance provides a working knowledge of international financial issues, theories, concepts and practice. The first part of the course examines the mechanics of the foreign exchange market, reviewing spot, forwards, futures and options. The second part of the course constructs the four building blocks of international finance: interest rate parity (covered and uncovered interest rate arbitrage), purchasing power parity, the international Fisher (expectations) effect, and asset market equilibrium (money market and exchange market equilibrium). The role of the money supply in exchange rate and price level determination according to interest rate parity is stressed. The case for common currencies is reviewed. In the third part of the course, currency risk management is explored in detail. We then analyze Ponzi schemes and other fraudulent financial practices. We conclude with a review of financial leverage, moral hazard and the financial crisis of 2008-2009.
Components: DIL.
Grading: GRD.
Typically Offered: Summer.

IGS 699. Special Topics. 3 Credit Hours.
Special topics related to international administration. Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

IGS 820. Research in Residence. 1-9 Credit Hours.
For students conducting additional research, practice, field experience or special projects as part of their graduate experience.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Certificate in Security Management

Overview
The Certificate in Security Management is designed to prepare administrators of public and private organizations to meet the various multidimensional security challenges that have faced our planet in the last two decades: from the aftermath of 9/11 to the most recent crisis of COVID-19. From threats posed by violent human actions to natural disasters and data security, management in times of acute crisis demands a unique array of insights and skills. The certificate program is grounded in an academic, theoretical, understanding of security problems and emergency management strategies. It also emphasizes the development of the practitioner’s arts within the strategic, tactical and operational realms of security administration.

At the epistemic center of the program of study is an understanding of the many factors and facets of security requiring mastery of vocabularies across academic disciplines and conjoining insights of a technical and theoretical nature in a fashion that allows security managers to be effective and sensitive to the varied contexts shaping their decisions. Interdisciplinary academic study in the complex field of security administration is essential as a point of both entry and advancement in this growing profession.

Admission Requirements
To be admitted to the Certificate in Security Management program, students must meet the same admissions requirements as the MAIA program.

Mission
The Certificate in Security Management addresses issues related to the management of security for public and private organizations. It concentrates attention on the intellectual and operational challenges associated with the task of protecting people and property within a changing landscape of threat from both human and natural sources.

Goals
Students will learn about multidimensional security challenges that different institutions face and how to address them.
Student Learning Outcomes
Students will be able to demonstrate broad knowledge of the multidimensional security problems that confront modern institutions and the appropriate management strategies to address those challenges.

M.A. in International Administration
Overview
The University of Miami’s Master of Arts in International Administration Program is a thirty (30) credit interdisciplinary graduate degree designed to prepare students for careers in the administration of public and private organizations. MAIA students learn how to identify, analyze, and manage the complex global problems that confront modern institutions, particularly in areas of security, human rights, and geopolitics. The program combines academic considerations of politics and culture with those of economics and management to provide participants with the skills necessary to pursue a range of career objectives in both domestic and international careers. MAIA students are change-agents, entrepreneurs, and leaders in both government and non-governmental sectors. Our graduates have pursued careers in the realm of non-profits and non-governmental organizations, in the fields of communication, health, emergency management and national security, as well as in the financial and business sectors. The degree is awarded by the College of Arts and Sciences.

Admission Requirements
The Master of Arts in International Administration (MAIA) program accepts rolling admissions. Interested students may apply to the program at any time.

• Online Application
  • Please complete the online application by clicking here (https://www.applyweb.com/miamigrd/).

• Application Fee
  • An $85.00 non-refundable application fee is paid online upon submission of the application.

• Statement of Purpose
  • The statement of purpose is the most important element of your application packet. This letter needs to reflect who you are, your goals and why you would be an asset to the MAIA program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before your submit.

    Below is a link to help you get started:

    OWL Statement of Purpose Guidelines (https://owl.purdue.edu/owl/purdue_owl.html).

• Letters of Recommendation
  • Three letters of recommendation must be provided. One letter should be from a faculty member. Two letters should be from an employer, colleague, or other professional source.

• Official Transcripts
  • You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.

• Resume
  • Please provide a copy of your resume if it is available.

• Admissions Interview
  • The admissions interview may be conducted in person, over the phone, or via video conference.

• Grade Point Average (GPA)
  • A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.

• Official TOEFL (or IELTS) Score
  • All international students are required to take this exam in order to demonstrate sufficient English competency. The “Test Of English As A Foreign Language (TOEFL)” exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT; a score of 80 is required for the IBT.

  • Students may also take the “International English Language Testing System (IELTS)” exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.

  • All international students must provide a copy of their results on either exam.

  • International students from countries whose primary language is English are not required to take this exam.

### MAIA - Independent Concentration

The Independent Concentration will allow MAIA students to create their own plan of study by customizing the selection of 9 elective credits required to complete their graduate degree. In order to apply for the Independent concentration, students must enter the MAIA program with a cumulative undergraduate GPA of 3.5 or higher and be in good academic standing.
The current curriculum of the MAIA program already matches this configuration, with 18 core credits, 9 elective credits, and 3 credits for the capstone experience.

Requirements for the Independent Concentration:

- An explanation of why the existing concentrations are insufficient and/or do not apply to the student’s career path.
- The topic of their proposed concentration and a selection of electives to complete the MAIA program that support their topic.
- Approval of the student’s Guidance Committee. Each student’s guidance committee will be comprised of the MAIA program director and another MAIA-affiliated faculty member from a different department representing the main scholarly areas of the courses selected for the independent concentration. (At present, the MAIA program director is a member of the Department of Political Science). A third Guidance Committee member might be appropriate when the proposed course of study encompasses expertise from three departments or disciplines.

### Mission

The Master of Arts in International Administration program (MAIA) seeks to prepare students for careers in the administration of public and private organizations. Students are introduced to academic traditions of scholarship and the insights of professional practice in the identification, analysis and management of the complex problems that confront modern institutions. They engage considerations of politics and culture as well as those of business, finance and management in order to develop the skills necessary to work with people in multiple contexts and environments. These include:

- Local, state and federal governmental agencies
- Regional and international organizations
- National and international public health-care management organizations
- Non-profit public service organizations
- Global relief and charitable groups
- Civil society movements
- Corporate and financial concerns
- Emergency management organizations

### Student Learning Outcomes

- Students will demonstrate knowledge of the subject-matter, the topic, at the center of their Practicum Report. This involves an understanding of the functional and organizational setting in which they served during their internship, the broader political, cultural and economic context within which the internship site exists and the ability to abstract from their experience a specific topic for analysis to which students apply skills in critical analysis, problem-solving and written communications developed during their course of study.
- Students will demonstrate critical thinking skills, a habit of mind characterized by the comprehensive exploration of issues, ideas, artifacts, and events before accepting or formulating an opinion or conclusion.
- Students will demonstrate their skills in written communication, learning to work in many genres and styles. It can involve working with many different writing technologies, and mixing text, data and images.

### M.A./M.P.A Dual Degree in International Administration and Public Administration

#### Overview

The Dual MPA/MAIA degree requires a total of 60 credits. Students are able to count 9 credits of coursework toward both programs, allowing them to complete the dual degree in 2.5 years.

Students in the MAIA/MPA Dual Degree program must be admitted to both the MAIA and MPA programs.
MAIA Admissions

The Master of Arts in International Administration (MAIA) program accepts rolling admissions. Interested students may apply to the program at any time.

- **Online Application**
  - Please complete the online application by clicking here (https://www.applyweb.com/miamigrd/).

- **Application Fee**
  - An $85.00 non-refundable application fee is paid online upon submission of the application.

- **Statement of Purpose**
  - The statement of purpose is the most important element of your application packet. This letter needs to reflect who you are, your goals and why you would be an asset to the MAIA program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before your submit.

  Below is a link to help you get started:

  OWL Statement of Purpose Guidelines (https://owl.purdue.edu/owl/purdue_owl.html).

- **Letters of Recommendation**
  - Three letters of recommendation must be provided. One letter should be from a faculty member. Two letters should be from an employer, colleague, or other professional source.

- **Official Transcripts**
  - You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.

- **Resume**
  - Please provide a copy of your resume if it is available.

- **Admissions Interview**
  - The admissions interview may be conducted in person, over the phone, or via video conference.

- **Grade Point Average (GPA)**
  - A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.

- **Official TOEFL (or IELTS) Score**
  - All international students are required to take this exam in order to demonstrate sufficient English competency. The "Test Of English As A Foreign Language (TOEFL)" exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT; a score of 80 is required for the IBT.

  Students may also take the "International English Language Testing System (IELTS)" exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.

  All international students must provide a copy of their results on either exam.

  International students from countries whose primary language is English are not required to take this exam.

MPA Admission Requirements

- In cooperation with the College of Arts and Science, the Department of Political Science, the Graduate Program will review applicant files and make admissions decisions.

  **Requirements for Admission Include:**

  - Completion of an application
  - A baccalaureate degree from an accredited institution
  - A cumulative undergraduate GPA of 3.0. (In order to limit class size for maximum teacher-student exchange, the MPP program will give preference to students with above average GRE scores, excellent letters of recommendation, and superior writing skills).
  - GRE minimum combined score (verbal and quantitative) set by the Graduate School. The Graduate School has occasionally provided waivers for exceptional cases.
  - Two letters of recommendation

M.A./M.P.H. Dual Degree in International Administration and Public Health

Overview

The Master of Arts in International Administration/Master of Public Health (MAIA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine’s Department of Public Health Sciences. The MPH degree with a second master’s degree in international administration is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development.

M.P.H. Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the joint degree MPH/MAIA must apply to both Department of Public Health Sciences MPH program and to the College of Arts and Sciences MAIA program separately to be accepted to the joint degree program.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

International Studies

international-studies.as.miami.edu

Dept. Code: INS

Degree Programs

The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

- **International Relations**: international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.
- **Comparative Politics**: theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.
- **International and Comparative Political Economy**: the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

Masters Program in International Studies

- M.A. in International Studies (p. 1768)

Doctoral Program in International Studies

- Ph.D. in International Studies (p. 1770)

**INS 601. IR Theory. 3 Credit Hours.**
Introduces students to key historic events, themes, concepts, and theories that have animated the practice and scholarship of international relations.
成份: LEC.
Grading: GRD.
Typically Offered: Spring.

**INS 603. Dissertation Proposal. 3 Credit Hours.**
INS 603 Research Design: A writing course designed to assist Master's students in the preparation of their graduation requirements: publishable papers or MA thesis.
成份: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

**INS 604. Int Rel Topics II. 3 Credit Hours.**
Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
成份: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
INS 605. Int Relations Topics. 3 Credit Hours.
Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 606. Issues in International Studies. 3 Credit Hours.
Analysis of current issues of international importance.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 607. International Economic System Topics II. 3 Credit Hours.
Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 608. Intl Econ Topics. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 609. Globalization and Human Rights. 3 Credit Hours.
The integration of markets has many concerned for the political and economic rights of the common citizen. This course examines The effect of globalization on the human rights standards throughout the world.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 610. Graduate Seminar in INS. 3 Credit Hours.
Seminar topic varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 611. International Relations Methodology II. 3 Credit Hours.
Introduces graduate students to issues of research design and research methods in International Relations. The course will focus on three main methodological approaches in political science: qualitative case study, quantitative research and formal modeling. Apart from examining the principles guiding the choice of methods (and the trade offs involved in that choice), the course will examine how these methods have been applied to the study of three major sub-fields of international relations: international political economy, security studies, and international environmental regimes. It also aims to provide the students with basic knowledge on how to apply these methods to their own research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

INS 612. Graduate Seminar in Qualitative Research Methods. 3 Credit Hours.
The main goal of this seminar is to enable students to become proficient in qualitative research methods. The seminar covers specific research methods and techniques, their relevance and limitations, their relationships with philosophical perspectives, epistemological and methodological debates, and ethical and practical considerations involved in qualitative research. Ethnographic methods, the use of social network analysis in qualitative research, the logics of inquiry in case study methods, grounded theory, and types of discourse and contents analysis, are amongst the topics covered. This is a hands-on graduate seminar in which the students are encouraged to think creatively on which method(s) could make their research of complex political, social, and cultural phenomena more rigorous and sophisticated by applying methods and techniques learned in class.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 613. Transnational Social Movemen. 3 Credit Hours.
Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
INS 614. Comparative Political Regimes. 3 Credit Hours.
Literature concerned with the transition from authoritarianism to democracy in various parts of the world.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 616. National Security. 3 Credit Hours.
The central issues concerning European security since World War II, with emphasis on the period since the end of the cold war.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 617. National Security and Foreign Policy. 3 Credit Hours.
Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

INS 618. Regional Topics II. 3 Credit Hours.
Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 619. Internship. 1-3 Credit Hours.
A research paper is required for this course. The student works with a selected faculty member who determines the length and scope of the project. The Student is responsible for finding the internship position.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

INS 620. International Migration and the Health Care System. 3 Credit Hours.
Critical aspects of development globally; the migration-development nexus. The centrality this issue has in current debates on development. Research and policy-making approaches to different aspects of this nexus. Several countries and regions are covered throughout the semester. Development of research skills through systematic participation in specific projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 621. International Development Theory I. 3 Credit Hours.
A synthesis of major theories of international development, institutional architecture, and practice of international development. Focus on key international development policies such as trade, macroeconomic finance, and equity. Considers narrow conceptions of modernity, growth, progress, wellbeing, and culture toward broader conceptions of freedom and/or sustainable development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

INS 622. Advanced Seminar in International Economics. 3 Credit Hours.
This is a seminar in International Economics at the graduate level. The first part consists of a rigorous but nontechnical presentation of international trade theory, followed by a discussion of the main arguments for protection and their validity. The third part of the course analyzes the process of globalization; its meaning, measurement and effects. A final brief section is devoted to the determination of exchange rates and the international monetary system.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 627. Negotiation and Bargaining. 3 Credit Hours.
Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
INS 628. International Peace and Conflict Resolution. 3 Credit Hours.
The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its sub-field IPCR.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 629. International Cooperation. 3 Credit Hours.
INS 629 International Cooperation: The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like cooperation, peace and security, human rights, and economic development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 630. Advanced Seminar in Comparative Studies. 3 Credit Hours.
Seminar topic varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

INS 637. Comparative Political Economy. 3 Credit Hours.
Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post communist transitions and market restructuring in Latin America and Africa.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

INS 638. U.S.-Latin American Relations. 3 Credit Hours.
Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

INS 639. Globalization and Health. 3 Credit Hours.
Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

INS 641. Advanced ISC Seminar. 3 Credit Hours.
Seminar topic varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

INS 642. Drug-Trafficking in the Americas. 3 Credit Hours.
The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

INS 644. Global Health and International Development. 3 Credit Hours.
Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 645. Disasters, Terrorism and Global Public Health. 3 Credit Hours.
The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
INS 646. Politics and Ideology in Latin America. 3 Credit Hours.
The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

INS 647. Latin American Thought. 3 Credit Hours.
The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

INS 648. Brazil in Transition. 3 Credit Hours.
The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.
**Components:** SEM.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

INS 649. European-Latin American Relations. 3 Credit Hours.
This course deals primarily with five main themes: shared history between Europe and Latin America; mutual transfer of ideas (ideologies and political thought), perceptions (images and stereotypes), people (voluntary and slavery), and goods (trade and investment); foreign policies of main European states and the European Community toward Latin America; an analysis of some specific country cases (Spain, especially) and issues (regional integration, among them); and how the above have affected inter-American relations and the hegemonic role of the United States.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

INS 650. Advanced Regional Seminar. 3 Credit Hours.
Seminar topic varies by semester and is indicated in parentheses following course number and title in Class Schedule.
**Components:** SEM.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

INS 653. The European Union. 3 Credit Hours.
The European Union's history, institutions, policies and contemporary issues.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

INS 654. European Union and the World. 3 Credit Hours.
The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

INS 655. Special Topics. 3 Credit Hours.
Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the course number and title.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

INS 656. Special Topics. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

INS 657. U.S. Foreign Policy. 3 Credit Hours.
The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.
INS 658. Culture, Civilization and Religion in International Relations. 3 Credit Hours.

International Relations (IR) theories have traditionally neglected ideational factors such as identity, religion, and culture: unlike states, they were "non-territorial"

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 659. IR in a Constructed World. 3 Credit Hours.

The collapse of the Soviet Union, the end of the Cold war and the end of world bipolarity left wanting the main International Relations (IR) perspectives. The course will examine these epochal changes to show that unlike traditional assumptions IR are not inevitable consequences of human nature or other essential, material characteristics such as structure as the primary independent variable. Responding to these changes constructivism, the newest IR approach regards states as actors and agents, existing within a world of their "own making" IR are social rather than material, not given by nature and material factors and hence, capable of being transformed by human practice. There are many forms of constructivism, some compatible with positivism and rationalism of the mainstream IR approaches, others more radical in their critique of IR discipline. Forms of constructivism differ in how they see the relationship between actors and structures, the mechanism of how the world is "constructed" (e.g., ideas, norms, language).

Constructivism opens new research avenues.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 664. International Law. 3 Credit Hours.

How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

INS 665. The World Before European Domination. 3 Credit Hours.

The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.

Components: SEM.
Grading: GRD.
Typically Offered: Spring.

INS 669. Global Issues and Filmmaking: A Transdisciplinary Approach. 3 Credit Hours.

Global issues and filmmaking studied via a transdisciplinary approach. Topical focus varies among health, foreign aid, human security, international development, and global urbanization.

Components: RSC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 672. Global Health Policy and Ethics. 3 Credit Hours.

National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

INS 675. MA Capstone Research Paper (CRP). 3 Credit Hours.

A capstone is to synthesize and apply the knowledge that students have acquired through the International Studies MA curriculum-the disciplinary perspectives, theories, and methods learned-to those particular student's interests developed throughout the concentration. Students will be directed in the sequence and stages of research, data presentation and visualization, writing, oral and presentation skills. The major goal is to produce a capstone research paper (CRP) of 25-30 pages (i.e., 6,000-8,000 words) plus tables, figures, maps and other appendices that aims to be a peer reviewed article for an International Studies publication.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

INS 693. European Security. 3 Credit Hours.

Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
M.A. in International Studies

The Master of Arts Degree in International Studies

The MA in International Studies is a 30-credit degree program that is designed for students who seek practical training in social science perspectives and methods that address emerging problems of globalization, international conflicts and humanitarian crises, global environmental change, and international development. The program emphasizes professional preparation through the acquisition of qualitative and quantitative research skills that will enhance students’ career opportunities and/or prepare them for advanced study in doctoral programs. The program faculty consists of experts in international relations, comparative politics and political economy, geographical sciences, ethnographic inquiry, public health, and social inquiry and change. The program can typically be completed within two years, although students may receive credit toward the degree if they have completed equivalent courses elsewhere. Students seeking the degree on a part-time basis are welcome.

Students must complete three core courses and are free to design their program of study on any topic within the broad sphere of international studies under the guidance of a faculty mentor. Major themes covered in International Studies elective courses range from international conflicts, refugee
movements and migration, international trade and investment, climate change mitigation and adaptation, poverty alleviation, humanitarian crises, and emerging public health threats.

1 Students may substitute any graduate-level mixed-methods course such as INS 611 (International Relations Methodology II), any qualitative methods courses (e.g., survey methods, ethnographic methods) such as INS 612 (Qualitative Methods), or information technology course such as GEG 691 (Introduction to Geographic Information Systems for Graduate Students) and APY 611 for POL 695T. In addition, a variety of other statistics courses are available in other social science departments that may be used as substitutes for POL 695T.

## Other Requirements

**Foreign Language Requirement:** All students must demonstrate competency (reading and basic comprehension) in at least one foreign language. Students are expected to pass a foreign language examination by the end of their first year to determine if they meet this essential requirement or may require additional foreign language training. A variety of options is available for practical language training including courses offered by the Department of Modern Languages and Literatures (insert link) and the Directed Independent Language Study (DILS, insert link).

**Comprehensive Exam, Thesis and Non-thesis Options:** As a final requirement to graduate, students must select one of the following 3 options:

- Pass a written qualifying (comprehensive) examination in one of the three fields of specialization. The MA qualifying examination probes student knowledge of one of the Department's three fields of study and the ability to think and express ideas clearly. Masters level students are required to answer three questions within four hours.

- Thesis and Non-Thesis options: Both thesis and non-thesis options are available and students are expected to identify a specific topical interest and research focus by the end of their first semester in residence. The non-thesis option consists of two short papers and an oral examination; the thesis option involves production of a MA thesis that will be examined by a committee of three faculty members, one of whom is the faculty mentor. Students opting for an MA Thesis must have a GPA of 3.5 or higher.

## Mission

The Department of International Studies provides a comprehensive curriculum that allows students at both the undergraduate and graduate levels to study contemporary international issues. INS courses include globalization, democratization, transnationalism, international political economy, global trade, conflicts and national security threats, human rights, new forms of civil society mobilization, cultural diversity in world politics, global environmental challenges, global public health, and world poverty. The curriculum revolves around the study of the accelerating processes of globalization and their far-reaching impacts on individual states, societies, economies and cultures. The INS Program promotes, through its interdisciplinary reach, the exploration of various theoretical and analytical approaches and methodological techniques intended to offer students a broad program of study focused on the interaction between the local and the global, from the historical to the contemporary, while tracking possible alternative future scenarios and developments in the international system.

### Student Learning Outcomes

- Students will select and use theories and methods to measure and assess, the interrelationships between foreign relations and governments, social movements and/or organizations.
• Students will demonstrate the capacity to integrate and apply concepts and theories to ask coherent and original questions about international studies.
• Students will demonstrate effective written, presentation and to integrate data with sound analysis and meaningful interpretation.

Ph.D. in International Studies
The Department’s Ph.D. program’s primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research.

Curriculum Requirements
The requirements include:

• Complete a total of 66 degree credit hours (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credit hours at the doctoral level beyond the MA degree).
• Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
• Complete a sequence of two core seminars in two of the Program’s three major fields of study:
  • International Relations;
  • Comparative Politics; and
  • International and Comparative Political Economy.
• Pass
  a. written MA exam in one of the Program’s three fields of study and
  b. written and oral examinations in two of the Program’s three fields of study.
• Complete at least one of the basic core seminars in the third (non-examination) field.
• Complete the Doctoral Workshop.
• Successfully defend a dissertation proposal/prospectus.
• Pass a foreign language examination.
• Complete 12 dissertation credit hours.
• Research, write and orally defend a dissertation that makes an original contribution to knowledge.

See the INS Graduate Student Handbook for a complete description of the requirements for the Ph.D. degree.

Mission
The Department of International Studies provides a comprehensive curriculum that allows students at both the undergraduate and graduate levels to study contemporary international issues. INS courses include globalization, democratization, transnationalism, international political economy, global trade, conflicts and national security threats, human rights, new forms of civil society mobilization, cultural diversity in world politics, global environmental challenges, global public health, and world poverty. The curriculum revolves around the study of the accelerating processes of globalization and their far-reaching impacts on individual states, societies, economies and cultures.

Goals
The INS Program promotes, through its interdisciplinary reach, the exploration of various theoretical and analytical approaches and methodological techniques intended to offer students a broad program of study focused on the interaction between the local and the global, from the historical to the contemporary, while tracking possible alternative future scenarios and developments in the international system.

Student Learning Outcomes
• Students will select and use theories and methods to measure and assess, the interrelationships between foreign relations and governments, social movements and/or organizations.
• Students will demonstrate the capacity to integrate and apply concepts and theories to ask coherent and original questions about international studies.
• Students will demonstrate effective written, presentation and to integrate data with sound analysis and meaningful interpretation.

Latin American Studies
las.as.miami.edu
Dept. Code: LAS
The Latin American Studies Program at the University of Miami takes an interdisciplinary approach to the study of the politics, economics, cultures, and societies of Latin America and the Caribbean. Courses in the program are offered in departments from every school and college at the University
of Miami, and the program's faculty research topics ranging from development economics to immigrant health care, from indigenous music to Caribbean colonial literature, from the archaeology of the region's earliest peoples to present-day questions of resource conservation and management. Our students become true experts who can speak to a wide range of issues confronting Latin America and the Caribbean; experts who can contribute proactively to development and cooperation, business, political analysis, arts, and culture in ways that their peers with a more traditional disciplinary focus simply cannot.

Requests for Information
Dr. William J. Pestle
Academic Director, Latin American Studies Program
Merrick Hall 102-E
University of Miami
Coral Gables, FL 33124-2005
las@miami.edu (lasgrad@miami.edu)

The interdisciplinary graduate programs in LAS offer excellent preparation for careers in international business, law, banking, work in philanthropy, economic development, the environment, government service, education, health care, or journalism.

Master of Arts in Latin American Studies
• M.A. in Latin American Studies (p. 1778)

LAS 601. Interdisciplinary in Latin American and Caribbean. 3 Credit Hours.
Interdisciplinary methods and politics of Latin American and Caribbean area studies.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

LAS 602. Research Design in Latin American Studies. 3 Credit Hours.
Interdisciplinary research methods and skills in Latin American and Caribbean studies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

LAS 603. Program Seminar in Latin American Studies and Caribbean Studies. 3 Credit Hours.
Content of course will vary by semester.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 604. Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course.. 3 Credit Hours.
Topics vary. Interdisciplinary focus is thematic and regional (e.g.: tourism in Yucatan; civil society in Chile, Haiti-Dominican Republic relations, cultural policy in the Caribbean, environmental policy in Panama.) Course involves travel during Spring Break and it has a program fee.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

LAS 605. Internship in Latin American and Caribbean Studies. 1-3 Credit Hours.
On-site experience in business, governmental organization, or non-profit organization dealing with Latin America and/or the Caribbean.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

LAS 606. Civic Engagement in Latin America. 1-3 Credit Hours.
On site experience in a civic engagement project in Latin America or the Caribbean.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

LAS 620. Interdisciplinary Topics in Latin American and Caribbean Environments. 3 Credit Hours.
Topics vary. Interdisciplinary focus on policies and impact of globalization on the environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
LAS 630. Special Topics in Latin American and Caribbean Religions. 3 Credit Hours.
Topics vary. Interdisciplinary focus may be thematic or religion (e.g., Liberation Theology, Latin American and Latino Religions, Caribbean Religions), but will address Latin American and Caribbean religion.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 640. Special Topics in Latin American and Caribbean Media and Communication. 3 Credit Hours.
Topics vary. Interdisciplinary focus may be thematic or religion (e.g., Global media, Spanish- or Portuguese-language television or radio, social media), but will address Latin American and Caribbean Media and Communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 650. Special Topics in Latin American and Caribbean Art and Culture. 3 Credit Hours.
Topics vary. Interdisciplinary focus may be thematic or religion, but will address Latin American and Caribbean art and culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 660. Special Topics in Latin American and Caribbean Politics. 3 Credit Hours.
Topics vary. Interdisciplinary focus may be thematic or religion (e.g., democracy, new social movements, globalization, politics and society), but will address Latin American and Caribbean politics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 680. Special Topics in Latin American and Caribbean History. 3 Credit Hours.
Topics vary. Interdisciplinary focus may be thematic or religion, but will address the history of political, social and economic development in Latin America and the Caribbean.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

LAS 681. Graduate Seminar on Public Health: Latin America and the Caribbean. 3 Credit Hours.
A variety of contemporary global public health issues and policy challenges confronting Latin America and the Caribbean, considering large and small states. We will explore the broader relationship of global public health topics to the political, economic, social, cultural, ethical, ecological, environmental, and technological factors.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

LAS 684. Global Public Health: Harnessing Theoretical Prep with Health Diplomacy and Practical Exper. 3 Credit Hours.
For students with a genuine interest in global public health and a regional focus in Latin America or the Caribbean. Students will have the opportunity to examine global health issues, programs, projects, policies and ethical dilemmas considering different methods used to study the challenges and successes in global public health work. This course will expose students to the integration of western and health care, as well as the economic, political, social, cultural, environmental, ecological and technological components of their lives that directly or indirectly influence public health outcomes at the community level. Furthermore, students will have a unique opportunity to interact with families and community organizations and programs in the remote villages as well as families residing in urban communities. This will provide greater insights into the epidemiologic, nutrition, lifestyle and socio-economic transitions which bring both positive and negative impacts on health and wellbeing. Students will also learn about importance of health diplomacy and health security within a globalized world through interactions with local policy makers and community members while in the country.
Components: FLD.
Grading: GRD.
Typically Offered: Spring & Summer.

LAS 691. Debates on Current Issues in Latin American and Caribbean Studies. 3 Credit Hours.
Content may vary from semester to semester. This is a graduate course to allow debate and discussion on current issues and events affecting Latin America, the Caribbean, and Latino communities in the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
**LAS 694. Directed Readings in Latin America and Caribbean. 1-6 Credit Hours.**
Independent Study leading to an original piece of research, or creative project on a Latin American or Caribbean interdisciplinary topic.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**LAS 697. Readings for the Comprehensive Exam. 1-6 Credit Hours.**
Readings for M.A. students who are preparing for comprehensive examinations.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**LAS 810. Pre-candidacy thesis credits. 1-6 Credit Hours.**
The student working on his/her master's thesis enrolls for credit, not to exceed three, before student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

**LAS 815. Post-candidacy thesis credits. 1-6 Credit Hours.**
The student working on his/her master's thesis enrolls for credit, not to exceed six, after student has been admitted to candidacy. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**LAS 820. Research in residence. 1 Credit Hour.**
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in LAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

---

**B.A./M.A. in Latin American Studies**

**FILAS (Fellows in Latin American Studies)**
In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete two degrees (B.A./M.A.) in Latin American and Caribbean Studies in five years, less time than would be required to obtain the degrees separately. The program provides exciting collaborative research, travel, and work opportunities. While students typically apply to the FILAS program upon their initial application to UM, we also welcome applicants in their first year of study at the University.

**FILAS Admission Requirements**

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in FILAS, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

**Curriculum Requirements**
Working with UM’s world-class faculty in various academic disciplines, FILAS participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, FILAS students choose one focus track for their most advanced courses: Social Sciences, Law and Policy, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean. At least ten of these courses must be taken at the graduate level.

Mathematics, Computing & Statistics  
Second Language  
Writing Across the Curriculum  
Cognates  
Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole  
Select one of the following:

- FRE 203: Advanced French
- HAI 201: Intermediate Haitian Creole I
- POR 202: Intermediate Portuguese II
- SPA 203: Advanced Spanish

Secondary Language Competence in another Latin American or Caribbean Language  
Select one of the following:

- FRE 105: Accelerated Elementary French
- HAI 102: Elementary Haitian Creole II (or equivalent)
- POR 105: Beginning Portuguese for Spanish Speakers
- SPA 105: Accelerated Elementary Spanish

FILAS Specific Requirements  
Select one gateway seminar in Latin American Studies  
Select two History courses  
Select two International Studies courses  
Select two Economics courses  
Select two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)  
Select seven courses in Study Abroad  
Select one course as Internship in Latin America  
Select five courses above the 300-level (third-year) in a range of disciplines  
Select ten courses in one focus track

MA Phase Requirements  
GRE Exam in Semester 7 or 8  
LAS 601: Interdisciplinary in Latin American and Caribbean  
LAS 602: Research Design in Latin American Studies  
Select two Regional Fundamentals courses  
Select four electives from approved LAS or combined courses  
LAS 810: Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.)

Total Credit Hours 150

---

1. Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).

2. MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.

3. Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. **FILAS students already fulfill this requirement when completing the language requirements cited below.**

4. Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline.

5. Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. **However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement.** According to the Collage of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."
FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

J.D./M.A. in Latin American Studies

Overview
The University of Miami School of Law in partnership with the Latin American Studies (LAS) Program, College of Arts and Sciences, offers a joint J.D./M.A. in Latin American Studies. This curriculum prepares Law School students for business, government, political, and nonprofit legal positions in organizations or institutions with a Latin American/Caribbean focus or presence. The program provides a solid theoretical framework and grounding in policy analysis, administration, and management.

This joint program allows students to obtain both J.D. and M.A. degrees in 3 or 3 1/2 years, less time than obtaining the degrees separately. The first year is spent in the Law School and years two, three and four (if needed) are spent taking both Law and M.A. courses.

Admissions
To be admitted to this program, students must apply separately to both programs. Students may apply to the MA in Latin American Studies program prior to beginning Law School or anytime during the first or second year of Law School. Students may begin the MA program in the fall or spring semesters.

For admission to the M.A. program students must complete an MA application. If they apply before the end of their first year in Law School, they will not need to take the GRE exam. Their LSAT score will be used instead of the GRE. For more details on the M.A. program, visit the M.A. in Latin American Studies website.

Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program.

Tuition and Fees
Tuition for J.D. courses will be paid to the Law School. Tuition for the M.A courses will be paid to the College of Arts and Sciences. Law School scholarships may only be used towards tuition for Law School courses.

Courses and Credits
Students must complete 82 credits in the Law School and 6 credits will be double-counted from the M.A. courses to complete the total of 88 JD credits. In the College of Arts and Sciences, students must complete 21 credits in Latin American Studies courses, and 9 credits will be double-counted from the J.D. coursework to complete the total of 30 credits. Students will be required to complete a total of 103 credits for both degrees.

Juris Doctor (J.D.) Course Requirements
• During their first year of the joint program, students will be required to attend the J.D. program full-time.
• Students who begin in the JD program will be able to take courses in the Latin American Studies Master’s program beginning the fall of their 2L year.
• Students must complete all J.D. requirements and all M.A. requirements as defined by their programs.
• Students may take summer law courses which may reduce the length of the joint degree program by up to a semester.
• Students may not take more than 16 credits/semester. Seventeen credits/semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Master of Latin American Studies Requirements
• Required courses in LAS are: LAS601, LAS602, and a discipline-appropriate research methods course (to be approved by the degree director.)
• Two regional fundamentals courses in Latin American/Caribbean studies are also required.
• Students will be required to write a master’s thesis, create an equivalent capstone project, or pass a comprehensive exam (each of which requires 6 credits of thesis/readings courses). These options all require a committee consisting of at least three faculty members.
• Language Requirement: Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 600-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, 18 credits or Defense Language Proficiency Test).

M.A. Dual Degree in Latin American Studies and Public Health
http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/medicine-and-public-health/
Overview

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. The MPH/LAS joint degree program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2.5 years, (5 semesters)

Number of required credits: 54 (+6 for non-native speakers)

Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MPH/LAS joint degree must apply to both, the Department of Public Health Sciences MPH program and the College of Arts and Sciences Master of Arts in Latin America Studies program separately.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

  - or EPH 647 Community Based Participatory Research

**Required Public Health Electives**

- EPH 600, 700 level courses not already listed
- BST 600, 700 level courses

**Joint Culminating Experience**

Students complete EPH 680 in fulfillment of both degrees.

- EPH 680 Practical Field Experience
  - or LAS 810 Pre-candidacy thesis credits

**Total Credit Hours**

- 60

---

1 Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing one course taught in the target language at the 600-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits, or Defense Language Proficiency Test).

2 Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG, among others. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida), or a cross-cutting thematic focus (e.g. Caribbean religions, Latin American Social Movements) rather than a specific country focus. The LAS Academic Director may approve courses from other departments.

---

### Sample Plan of Study

The MPH/LAS joint degree program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

**Average Program Duration:** 2 years, 5 semesters

**M.A. in Latin American Studies**

**Overview**

The Master of Arts in Latin American Studies is a 30 credit hour interdisciplinary degree characterized by a high degree of flexibility in allowing students to create a course of study focused on Latin American and the Caribbean that serves their interests. Combining core courses offered by the program with a large variety of courses combined with departments, programs, and units throughout the University of Miami, the program offers tremendous diversity in courses available for credit hour towards this degree. This encourages students to combine course offerings from around the university into a cohesive course of study that enables specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

**Admission Requirements**

**General application information**

The Latin American Studies program employs a rolling admissions deadline. Students may apply for Fall, Spring, or Summer admission (with program permission). Interested students may apply to the program at any time, and are encouraged to contact the Program Director with any questions. Funding is available to students interested in applying for the Fall semester. Students who submit their application by March 1st will be given full consideration for the limited funding that is available. Applications must complete an application cover form which is generated through the application web portal (https://www.applyweb.com/miamigrd/). An $85.00 non-refundable application fee is paid online upon submission of the application.
Requirements

• Statement of purpose: This is the most important element of your application packet. This letter needs to reflect who you are, your goals for the program and your career after, and why you would be an asset to the program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before you submit.

• CV or Resumé.

• Official transcripts: Applicants must provided official transcripts from each post-secondary institution attended. Electronic transcripts are highly preferred, and may be emailed to las@miami.edu or submitted using the ETS code 5815. Official transcripts in languages other than English must also be submitted with a certified English translation.

• Three letters of recommendation must be provided. At least one letter should be from an academic reference.

• Undergraduate GPA: A minimum overall undergraduate grade point average (GPA) of 3.0 (on a 4.0 scale) is required.

• Applicants are not required to submit a GRE score, but may do so if they wish. If students choose to submit a GRE score, the University of Miami school code is 5815.

International Applicants

In addition to the criteria mentioned in the Admissions Requirements section, international applicants are required to submit:

• A copy of their passport.

• Diplomas and certificates. International students are required to submit a copy of all the diplomas or certificates earned. Each copy must be submitted in their original language with a certified English translation.

• Bank statement. Please provide a copy of your bank statement for the last six months. You may also provide a sponsorship letter indicating your method of funding.

• TOEFL/IELTS: All international students are required to take this exam in order to demonstrate sufficient English competency. The "Test Of English As A Foreign Language (TOEFL)" exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT; a score of 80 is required for the IBT. Students may also take the "International English Language Testing System (IELTS)" exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.

Curriculum Requirements

The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students writing a thesis also will be required to take one research methods course at the 600-level.

¹ Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus.

² Electives may be taken from any pre-approved combined or core LAS courses at the 600-level or above, or from other courses approved by the academic director. With approval from the academic director, students may also take their elective credit hours with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.

³ A Research Methods course may be chosen from any available and accessible Research Methods courses available at the University of Miami, but must be appropriate to the course of study chosen by the student and requires approval of the academic director. Under special circumstances, the research methods requirement may be waived with the prior approval of the academic director.

⁴ Students are required to write a master's thesis, create an equivalent capstone project, or pass a comprehensive exam. For each of these options, a committee consisting of at least three members is required. Students who opt for the comprehensive exam will take one more elective in the place of the Research Methods course and enroll in 6 credit hours of LAS 697, rather than LAS 810.

⁵ Students must demonstrate advanced language competence in Spanish, Portuguese, Haitian Creole, or French by passing a course taught in the target language at the 600-level or above, or by passing a language competency exam.
Students who are simultaneously enrolled in a certificate program (other than GIS) at the University of Miami may double-count courses between the certificate program and the Master of Arts in Latin American Studies, with approval of the academic director. In select cases (such as methods courses), seminars and courses at the 600-level that do not specifically target Latin America or the Caribbean, but for which the final project or paper produced by the student is focused on Latin America may be counted towards the Master of Arts in Latin American Studies, subject to the approval of the academic director.

### Mission

The mission of the Master of Arts in Latin American and Caribbean Studies is to offer students the tools and resources that enable them to advance and disseminate knowledge of the history, literature, culture, politics, and economics of the region using various theoretical and analytical approaches.

### Goals

This graduate program furthers the skills and knowledge gained in undergraduate study and expects graduates to conduct scholarly research, formulate an academically rigorous and unique Master’s thesis, and eloquently defend a thesis reflective of the student’s enhanced expertise in the region. Graduates are prepared to either pursue further graduate study or find employment as experts with mastery of a particular region or peoples in Latin America or the Caribbean.

### Student Learning Outcomes

- Students will demonstrate a deep understanding of the region, its peoples and societies, and its history and cultures.
- Students will demonstrate an ability to conduct independent and original research.
- Students will demonstrate their skills in written communication.
- Students will demonstrate critical thinking skills.

### M.A. in Latin American Studies with GIS Certificate

http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/gis/

The Master of Arts in Latin American Studies with GIS certificate is a 30 credit hours interdisciplinary degree characterized by a high degree of flexibility in allowing students to create course of study focused on Latin American and the Caribbean, while allowing students to focus on obtaining specific skills in geographic Information Systems (GIS). The GIS option allows students to work towards a graduate certificate in GIS through the department of Geographic and Regional Studies while working towards their Master of Arts in Latin American Studies.

Total Credit Hours 30

1 The 6 credit hours in LAS 810 will consist of a GIS capstone project with a focus on Latin America, the Caribbean, or South Florida. Students will require a three-member committee to oversee the capstone project. A group project may be allowed with approval of the academic director.

Liberal Studies

mals.miami.edu

Dept. Code: MLS

The MALS Program

The Master of Arts in Liberal Studies (MALS) program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

For further information regarding this program, please contact:

Master of Arts in Liberal Studies Program

Master of Arts in Liberal Studies Program

• M.A. in Liberal Studies (p. 1783)

The Master of Arts in Liberal Studies program (MALS) is designed for the student who seeks to develop the critical thinking that marks a truly educated person—for the student who brings a heightened awareness of the unanswered questions that confront an inquiring mind—for the self-motivated person who never stops asking the first question: why?

MALS students come from various backgrounds. They are artists, business professionals, entrepreneurs, engineers, homemakers, lawyers, recent graduates, journalists and teachers. The program gives them the opportunity for intellectual and personal growth and for sharing their experiences with others in a community of learning.

Post-Baccalaureate Certificate in Liberal Studies

• Certificate in Liberal Studies

http://www.as.miami.edu/mals/

The Post-Baccalaureate Certificate Program in Liberal Studies requires 15 credit hours of coursework. The curriculum can be designed to fit each student’s academic goals. Students may select from MALS courses or other graduate level courses with the approval of the director.

MLS 601. Aspects of Creative and Reflective Thought. 3 Credit Hours.
Selected aspects of creative and reflective thought, based on materials from the arts, the humanities, the sciences, the social sciences and history. The focus will be on themes and issues represented in a variety of cultural traditions.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
MLS 602. Perspectives on Human Nature. 3 Credit Hours.
Basic theories of human nature proposed by the humanities, the sciences, and the social sciences. The course deals with fundamental issues regarding the concept of human nature, such as the nature of the self and its relation to society, the impact of culture on self perception and the relation of thought to human action.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 603. Theories of the Physical Universe. 3 Credit Hours.
Various understandings of the nature of the universe and their impact on human culture. The course will deal with critical issues addressed in the various attempts to understand the physical world, such as fundamental structures and processes, the limitation of human perception, and the interaction between the human species and its environment.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 611. Studies in the Humanities. 3 Credit Hours.
Interdisciplinary study of selected topics in the Humanities.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 612. Studies in the Social Sciences. 3 Credit Hours.
Interdisciplinary study of selected topics in the Social Sciences.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 621. Studies in the Humanities. 3 Credit Hours.
Interdisciplinary study of selected topics in the Humanities.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLS 625. Special Topics. 3 Credit Hours.
Interdisciplinary study of special topics central to history and the human culture.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 626. Special Topics. 3 Credit Hours.
Interdisciplinary study of special topics central to history and human culture.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLS 627. Special Topics. 3 Credit Hours.
Interdisciplinary study of special topics central to history and the human culture.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLS 631. Studies in the Humanities. 3 Credit Hours.
Interdisciplinary study of selected topics in the Humanities.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MLS 696. Directed Readings. 1-3 Credit Hours.
A directed readings course allows you to work independently with a MALS professor, researching a topic of your choice.
Requisite: Plan of Master of Arts Liberal Studies.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 697. Directed Readings. 1-3 Credit Hours.
A directed readings course allows you to work independently with a MALS professor, researching a topic of your choice.
Requisite: Plan of Master of Arts Liberal Studies.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 798. Seminar in Liberal Studies. 3 Credit Hours.
Interdisciplinary seminar designed to expand the knowledge of students in the areas of critical theory, esthetics, media theory, psychology and politics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLS 799. Seminar in Liberal Studies. 3 Credit Hours.
Interdisciplinary seminar designed to expand the knowledge of students in the areas of critical theory, esthetics, media theory, psychology and politics.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Requisite: Plan of Master of Arts Liberal Studies.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MLS 815. MALS Project. 1-6 Credit Hours.
The student working on his/her MALS project enrolls for credit, not to exceed 6, as determined by his/her advisor. Credit is not awarded until the project has been accepted.
Requisite: Plan of Master of Arts Liberal Studies.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MLS 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MLS 810 (usually six credits). Credit not granted. May be regarded as full time residence.
Requisite: Plan of Master of Arts Liberal Studies.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MLS 825. Continuous Registration-Master's Study. 1 Credit Hour.
To establish residence for non-thesis students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Requisite: Plan of Master of Arts Liberal Studies.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

M.A. in Liberal Studies

http://www.as.miami.edu/mals/

The Master of Arts in Liberal Studies degree requires 24 credit hours, plus a 6 credit hour thesis OR an additional 6 credit hours of coursework and a representative portfolio. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director. In addition, all students are required to participate in the MALS Writing Seminar.
**Admission Requirements**

The Master of Arts in Liberal Studies program accepts rolling admissions. Interested students may apply to the program at any time.

- **Online Application**
  - Please complete the online application by clicking here ([https://www.applyweb.com/miamigrd/](https://www.applyweb.com/miamigrd/)).

- **Application Fee**
  - An $85.00 non-refundable application fee is paid online upon submission of the application.

- **Statement of Purpose**
  - The statement of purpose is the most important element of your application packet. This letter should explain why you are interested in pursuing a Master of Arts in Liberal Studies (MALS) degree. It should describe what academic and professional qualities you possess which could help you excel in this program. The personal statement should also describe the goals you hope to achieve and any qualities you feel would make you an ideal candidate. The personal statement should be approximately 1-2 typed pages in length. The document should be double spaced and size 12 Times New Roman font. This essay should maintain 1-inch margins and should be proofed for errors prior to submission. Below is a link to help you get started: [OWL Statement of Purpose Guidelines](https://owl.purdue.edu/owl/purdue_owl.html).

- **Personal Admissions Essay**
  - The personal admissions essay requires candidates to choose a book, play or movie and explain why the piece is interesting to them. The essay should be approximately 2-3 pages in length. It should be typed, double spaced, and size 12 Times New Roman font. This essay should maintain 1-inch margins and should be proofed for errors prior to submission.

- **Letters of Recommendation**
  - Three letters of recommendation must be provided. These letters should be from an employer, colleague, or other professional source. *If you are currently taking classes, or if you are a recent graduate (within two years), you must submit at least one letter of recommendation from a faculty member.

- **Official Transcripts**
  - You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.

- **Grade Point Average (GPA)**
  - A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.

**Curriculum Requirements**

  - Thesis or Project Requirement (6 credits)

- **Non-Thesis Option:**
  - Approved Graduate Credit Hours (21 credits) 2
  - A portfolio representative of works completed

**Total Credit Hours** 30

1. Students learn to analyze and read texts critically and demonstrate their ability to express that knowledge in their oral and written work with accuracy and insight. This 3 hour, non-credit workshop is required and should be taken during the first regular semester of study.

2. Students may select from other graduate level courses with the approval of the director.

Mission

The Master of Arts in Liberal Studies Program opens the door to new ways of thinking. Increasingly, one of the central problems in the business and professional world is how to handle new information, what to do with it, how to use it, how to understand its rhythms and patterns, how to make it make sense.

Goals

Our program is dedicated to providing students with an interdisciplinary education at the graduate level that prepares them through a rigorous course of inquiry and thought, to winnow information, evaluate it, array it in meaningful ways, discern its patterns and symmetries, and apply it in whatever field they chose.
Student Learning Outcomes

- Students will have the ability to analyze and read texts critically.
- Students will demonstrate the ability to express critical thinking skills in their written work with accuracy and insight.
- The student demonstrates new ways of thinking through the study of various disciplines.

Mathematics

http://www.math.miami.edu

Dept. Code: MTH

Degree Programs

The Mathematics Department offers graduate degree programs leading to the:

- Five-Year BS Math/MS Math Finance (p. 1792)
- Master of Arts (p. 1795)
- Master of Science (p. 1786)
- Master of Science in Mathematical Finance (p. 1786)
- Doctor of Philosophy (p. 1786)

Prerequisites and requirements for these degrees are described on the program pages:

Masters Programs in Mathematics

- M.A. in Mathematics (p. 1795)
- M.S. in Mathematics (p. 1798)
- M.S. in Mathematical Finance (p. 1796)

Doctoral Program in Mathematics

- Ph.D. in Mathematics (p. 1799)

Dual BS/MS Degree

- Five-Year BS Math/MS Math Finance (p. 467)

MTH 602. History of Mathematics. 3 Credit Hours.
The development of mathematics from its earliest beginnings through the first half of the twentieth century. Numeral systems, geometry, algebra, analysis and set theory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 604. Foundations of Geometry. 3 Credit Hours.
Axiom systems and models of Euclidean and Non-Euclidean geometry
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 605. Theory of Numbers. 3 Credit Hours.
Divisibility, primes; congruences, quadratic residues and reciprocity; Diophantine equations. Applications to cryptography.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 606. Mathematical Logic. 3 Credit Hours.
Logics, truth, proof, logical consequence, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Godel's incompleteness theorems. Related results by Church, Turing, and Tarski. Discussion of their philosophical significance.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MTH 610. Linear Algebra. 3 Credit Hours.
Abstract vector spaces, bases and dimensions, linear maps, eigenvalues and eigenvectors, inner product spaces, operators, spectral theorems, canonical forms.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 612. Elementary Complex Analysis. 3 Credit Hours.
Complex variables; conformal mapping, contour integration.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 613. Partial Differential Equations I. 3 Credit Hours.
Derivation, well posedness, and qualitative properties of initial value and boundary value problems for the heat, wave and Laplace equations. Energy methods, causality, maximum principles, heat kernels, Fourier series, and potential theory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 614. Partial Differential Equations II. 3 Credit Hours.
Prerequisite: MTH 613.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 615. Ordinary Differential Equations. 3 Credit Hours.
Linear systems, equilibrium and periodic solutions, stability analysis, bifurcation, phase plane analysis, boundary value problems, applications to engineering and physics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 616. Dynamics and Bifurcations. 3 Credit Hours.
Bifurcation of equilibrium and periodic solutions, global theory of planar systems, planar maps, nonlinear vibrations, forced oscillations, chaotic solutions, Hamiltonian systems, applications to engineering and physics.
Prerequisite: MTH 615.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 620. Numerical Linear Algebra. 3 Credit Hours.
Topics from numerical linear algebra including solving systems of equations, LU, QR, and SVD factorizations, eigenvalues and eigenvectors, interactive methods, and applications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 621. Numerical Methods in Differential Equations. 3 Credit Hours.
Numerical solution of ordinary and partial differential equations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 624. Introduction to Probability Theory. 3 Credit Hours.
Probability spaces, random variables, expectation, limit theorems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MTH 625. Introduction to Mathematical Statistics. 3 Credit Hours.
Probability distributions, theory of sampling and hypothesis testing.
Prerequisite: MTH 624.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 627. Theory of Computing. 0 Credit Hours.
Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 631. Topology I. 3 Credit Hours.
Set theory, topological spaces, compactness, connectedness, separation properties, quotient spaces, Tychonoff Theorem, compactification, Urysohn Lemma and Tietze Extension Theorem, function spaces.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 632. Topology II. 3 Credit Hours.
Differential and topological manifolds, classical groups and associated manifolds, tangent and tensor bundles, vector fields, differential forms, transversality, Sard's theorem, Stokes' Theorem.
Prerequisite: MTH 631.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 633. Introduction to Real Analysis I. 3 Credit Hours.
Sequences and series in Euclidean space; sequences and series of functions; Fourier series; continuity, differentiation, and integration of functions between Euclidean spaces; implicit and inverse function theorems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 634. Introduction to Real Analysis II. 3 Credit Hours.
Continuation of MTH 533.
Prerequisite: MTH 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 642. Statistical Analysis. 3 Credit Hours.
Statistical inference about one or two populations from interval, ordinal and categorical data; analysis of variance; simple and multiple linear regression; designing research studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 643. Statistical Analysis II with Financial Applications. 3 Credit Hours.
Exploratory data analysis. Designing parametric models and assessing their uncertainty. Techniques for resampling. Using multivariate distributions to model financial data; families of copulas. Analyzing time series, including ARIMA and GARCH models.
Prerequisite: MTH 642 or MTH 542.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 645. Optimization Methods. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MTH 646. Quantitative Risk Analysis. 3 Credit Hours.
The modeling, measuring, and managing of financial risk using statistical and stochastic methods. Following "Basil Committee on Banking Supervision" risk analysis is now a major issue for the banking Sector. Concepts and methods covered in this course can be applied to managing risk in various areas, but will proceed in the context related to risk analysis and management in finance and insurance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 647. Introduction to Mathematical Finance. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 648. Stochastic Calculus with Application to Finance. 3 Credit Hours.
Stochastic calculus developing the basic probabilistic techniques necessary to study analytic models of financial markets. Brownian motion and the stochastic integral, stochastic differential equations, the Black-Scholes formula, Girsanov’s theorem and applications to option pricing.
Prerequisite: MTH 647.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 649. Computational Methods of Finance. 3 Credit Hours.
Solutions of nonlinear equations, interpolation, Monte Carlo methods, survey of matrix factorizations, numerical integration and differentiation, and introduction to finite different and finite element methods for PDEs with applications to finance.
Prerequisite: CSC 220 and MTH 643 and MTH 648.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 650. Machine Learning in Quantitative Finance. 3 Credit Hours.
Machine learning techniques for financial applications. Best practices for model selection and construction of big financial data, including regression and classification techniques, and deep learning with application to forecasting financial time series.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 651. Introduction to Differential Geometry. 3 Credit Hours.
Geometry of curves and surfaces in Euclidean space. Local space curve theory, intrinsic and extrinsic curvature of surfaces, geodesics, parallelism, and differential forms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 661. Abstract Algebra I. 3 Credit Hours.
Groups; rings; linear algebra; modules.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTH 662. Abstract Algebra II. 3 Credit Hours.
Continuation of MTH 561.
Prerequisite: MTH 661.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTH 691. Topics in Mathematics. 1-3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MTH 692. Topics in Mathematics. 1-3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 693. Topics in Mathematics. 1-3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 709. Data Security and Cryptography. 3 Credit Hours.
Encryption algorithms; cryptographic techniques; access, information flow and inference controls.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 721. Mathematical Probability. 3 Credit Hours.
Development of the measure-theoretic approach to probability. Random variables, central limit theory, laws of large numbers, martingales.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 722. Stochastic Processes. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 733. Real Variables. 3 Credit Hours.
First semester of a two semester sequence: General measure theory, Lebesgue measure and integration, Lp spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 734. Real Variables. 3 Credit Hours.
Second semester of a two semester sequence: General measure theory, Lebesgue measure and integration, Lp spaces, Fourier series in one and many variables, Fourier transforms, distributions, Sobolev spaces, applications to partial differential equations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 735. Complex Variables. 3 Credit Hours.
First semester of a two semester sequence: Analytic functions, conformality, Cauchy’s Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 736. Complex Variables. 3 Credit Hours.
Second semester of a two semester sequence: Analytic functions, conformality, Cauchy’s Theorem, representation theorems, harmonic functions, calculus of residues, Riemann Mapping Theorem, entire and meromorphic functions, analytic continuation, normal families.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 741. Algebraic Topology. 3 Credit Hours.
First semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunneth formula, duality theorems for manifolds, computations and applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MTH 742. Algebraic Topology. 3 Credit Hours.
Second semester of a two semester sequence: Homotopy and homotopy type, fundamental group, covering spaces, higher homotopy groups, simplicial singular and cellular homology, Eilenberg-Steenrod axioms, cohomology, universal coefficient theorem, products, Kunneth formula, duality theorems for manifolds, computations and applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 751. Differential Geometry. 3 Credit Hours.
First semester of a two semester sequence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 752. Differential Geometry. 3 Credit Hours.
Second semester of a two semester sequence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 757. Lie Groups. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 761. Abstract Algebra I. 3 Credit Hours.
First semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 762. Abstract Algebra II. 3 Credit Hours.
Second semester of a two semester sequence: Group theory, ring theory, module theory, linear algebra.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 770. Directed Readings or Research. 2-4 Credit Hours.
Topics will vary at the discretion on faculty. Offering will be by arrangement.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 780. Topics in Analysis. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 781. Topics in Analysis. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 782. Topics in Topology. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 783. Topics in Topology. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MTH 785. Topics in Algebra. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 786. Topics in Mathematics. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 787. Topics in Mathematics. 3 Credit Hours.
Topics will vary by semester and will be announced in the schedule of course offerings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTH 820. Research in Residence. 1 Credit Hour.
To establish a residence for non-thesis master’s students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTH 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Credits earned in this course apply towards the 12 credit hour dissertation research requirement of the graduate school. The student will enroll for credit as determined by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MTH 835. Research Project. 1-6 Credit Hours.
Directed Research Project as approved by faculty.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTH 840. Post-Candidacy Doctoral Dissertation. 1-6 Credit Hours.
Credits earned in this course apply towards the 12 credit hour dissertation research requirement of the graduate school. The student will enroll for credit as determined by his/her dissertation advisor. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MTH 845. Research in Residence. 1 Credit Hour.
Research in Residence - establishing full-time status as a student.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MTH 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Five-Year BS Math/MS Math Finance

Overview
https://www.msmf.miami.edu/academics/bs-msmf-program-5-year/index.html

The BS/MSMF program is a five-year program combining the Probability/Statistics track of the Mathematics undergraduate major with the graduate coursework required for the MS in Mathematical Finance degree. For undergraduates seeking careers in the fields of economics, finance and
data science, the BS/MSMF degree offers the appropriate training sought by companies worldwide. Students can achieve the required academic credentials in five years due to the integrated and focused nature of the BS/MSMF degree.

**Admission Requirements**
You must be an undergraduate student in the College of Arts and Sciences majoring in Mathematics (Probability and Statistics Track), and should have a cumulative GPA of at least 3.0 at the time of application. Students should discuss the program and the possibility of entering with their assigned academic advisor. Applications must be submitted during your junior year. You must be admitted to the program prior to academic advising for your senior year.

Mission

The primary objective of the Master of Science degree in mathematics is to prepare students for careers in teaching. This program also provides the necessary foundation for entry into careers in science, business, government, or other fields which make use of mathematics.

Student Learning Outcomes

- Students will achieve a solid understanding of the material in at least one of the following six advanced mathematics content areas: partial differential equations, ordinary differential equations, probability and statistics, topology, real analysis, and abstract algebra.
- Students will exhibit a broad synthesis of the theory and application of one of the subjects listed in the above outcome.

M.S. in Mathematical Finance

Overview

https://www.msmf.miami.edu/

The Master of Science in Mathematical Finance program is dedicated to producing technically trained professionals with an understanding of how to analyze and value complex investments, and assess the associated risks. Over the course of three semesters of study, the students receive rigorous training in mathematics, especially in the area of probability and stochastic calculus, in statistical analysis, and in computation, together with an overview of the common financial instruments and the institutional operation of markets and exchanges.

The financial landscape is constantly changing, and we design the MSMF curriculum to equip students with skills and knowledge that will provide the foundation for their future success. Our program seeks the proper balance between the mathematical and statistical theory, programming practice and financial applications.

Admission Requirements

Here is a list of the course based admissions requirements. For more information about admission, please visit our website (http://www.msmf.miami.edu/admissions/admission-requirements/).

- 1 semester of Linear Algebra
- 1 semester of Differential Equations
- 1 semester of calculus-based Probability and Statistics

Mission

The Master of Science in Mathematical Finance program is dedicated to producing technically trained professionals with an understanding of how to analyze and value complex investments, and assess the associated risks. Over the course of three semesters of study, the students receive a rigorous training in mathematics, especially in the area of probability and stochastic calculus, in statistical analysis, and in computation, together with an overview of the common financial instruments and the institutional operation of markets and exchanges.

The financial landscape is constantly changing, and we design the MSMF curriculum to equip students with skills and knowledge that will provide the foundation for their future success. Our program seeks the proper balance between the mathematical and statistical theory, programming practice and financial applications.

Goals

- Provide future finance professionals with the advanced quantitative skills required to understand, evaluate and price modern financial instruments. Such skills include both analytic techniques of mathematical finance, and computer-based simulation techniques.
- Expose participants to the key statistical methods, and specifics of applying these methods to working with financial data.
- Impart the necessary hands-on software and programming skills to solve various optimization and simulation problems arising in financial setting.

Student Learning Outcomes

- Students will demonstrate advanced knowledge of risk-neutral approach to pricing financial instruments, discrete and continuous-time frameworks of modern mathematical finance, and common financial derivatives.
- Students will master the tools of statistical analysis and statistical software packages and be able to apply them to various financial datasets.
- Students will demonstrate working knowledge of software and programming tools to use optimization and simulation techniques in financial setting master the common models of portfolio analysis, as well as the quantitative approach to risk models.

**Admission Requirement**

A minimum of 15 credit hours in mathematics courses numbered 200 and above is required. For more information about admission, please visit our website (http://www.math.miami.edu/graduate/application-procedure/).

**Mission**

The primary objective of the Master of Science degree in mathematics is to prepare students for careers in teaching. This program also provides the necessary foundation for entry into careers in science, business, government, or other fields which make use of mathematics.

**Student Learning Outcomes**

- Students will achieve a solid understanding of the material in at least one of the following six advanced mathematics content areas: partial differential equations, ordinary differential equations, probability and statistics, topology, real analysis, and abstract algebra.
- Students will exhibit a broad synthesis of the theory and application of one of the subjects listed in outcome above.
- Upon completion of the degree, students will be interviewed and asked to rate how successful the program was in enabling them to pursue their career goals. The department will document the students’ initial employment.

**Ph.D. in Mathematics**

http://www.math.miami.edu/

**Overview**

The Department of Mathematics offers a program leading to the Doctor of Philosophy (Ph.D.) degree. The Ph. D. program requires advanced coursework, three qualifying exams (one of which can be a special topic of the student’s choice), a language exam, and a dissertation.

The dissertation can be in any area within the broad expertise of the faculty, including:

- Algebraic Combinatorics
- Algebraic Geometry and the Mathematics of String Theory
- Differential Equations and Dynamical Systems
- Differential Geometry and General Relativity
- Mathematical Biology
- Stochastic Processes and Mathematical Finance
- Topology and Gauge Theory

https://www.math.miami.edu/graduate/phd-program-timeline/
Curriculum Requirements

The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

Preliminary and three written qualifying exams must be passed. Of these written exams, two must be from the above basic sequences; the other may be another from the basic sequences or in the candidate’s area of specialty.

A proficiency in one of the languages French, German, or Russian must be demonstrated.

Additional Courses: 24 Credit Hours

Total Credit Hours: 60

Mission

The Doctor of Philosophy degree is the highest degree attainable in mathematics. The objective of this degree program is to prepare students for careers in mathematical research. Each student in the program must successfully complete a substantial number of advanced mathematics courses and attain expertise in a specific area of specialization. Under the guidance of a faculty advisor, the student must produce significant original research and present it in the form of a dissertation that is approved by a supervisory committee.

Student Learning Outcomes

- Students will demonstrate proficiency in the fundamentals of at least two of the following broad subdivisions of mathematics: algebra, topology and analysis.
- Students will demonstrate a deep understanding of the following four core areas of mathematics: abstract algebra, algebraic topology, real analysis, and complex analysis.
- Students will demonstrate readiness for conducting original research.
- Students will produce and defend a dissertation based on his/her research, and the student will have the skills to effectively communicate mathematical ideas pertaining to that research both orally and in writing.

Modern Languages and Literatures

mll.as.miami.edu

Dept. Codes: ARB, CHI, FRE, GER, HAI, HEB, ITA, JPN, MLL, POR, SPA

Degree Programs

The Ph.D. in Literary, Cultural, and Linguistic Studies offers major concentrations in Literary and Cultural Studies and Critical Studies of Language/Linguistics. The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

Students develop superior language skills and professional competency in their major research field(s) through an intensive study of canonical works while engaging in comparative, interdisciplinary fields such as Africana Studies, Arabic Studies, Caribbean Studies, French and Francophone Studies, Iberian Studies, Italian Studies, Latin American Studies, Luso-Brazilian Studies, and combinations thereof.

The program’s strong theoretical component grounds student research in a range of areas, including: aesthetics, bilingualism, digital humanities, early modern studies, film studies, gender and sexuality studies, (im)migration studies, indigenous studies, performance studies, postcolonial studies, queer studies, subaltern studies, sociolinguistics, theatre studies, and women's studies.

Students are required to develop competency in a cognate field related to their intellectual pursuits, leading to the dissertation topic. Recent examples of cognate specialization include anthropology, communication studies, film studies, history, law, philosophy, musicology, classics, and sociology.
The department offers these graduate certificates and concentrations to prepare students beyond their specialization, which may be fulfilled with course electives:

- Graduate Certificate in Second Language Acquisition and Teaching (http://www.as.miami.edu/mll/graduate/slat-certificate/)
- Early Modern Studies Concentration (http://humanities.miami.edu/humanities/academic/early-modern-studies-concentration/), an interdisciplinary certificate offered in conjunction with English and History
- Caribbean Studies Concentration (http://www.as.miami.edu/mll/), interdisciplinary doctoral concentration in Caribbean Studies in conjunction with English and History

Admission Requirements
The Department of Modern Languages and Literatures accepts applications to the Ph.D. program for Fall admission only from students holding (or completing during the time of application) B.A. or M.A. degrees in a related discipline (e.g. Spanish, French, Luso-Brazilian Studies, History, Anthropology, Communication Studies, Comparative Literature, Philosophy, Journalism). The Department does not admit students who seek terminal M.A. degrees.

The deadline to apply for the 2020-21 academic year is December 30, 2019. The Graduate Committee will begin reviewing complete applications January 15, 2020. All applicants will automatically be considered for Departmental TAships and University-wide fellowships.

Applications must include the following materials:

1. A completed application form, including a detailed statement of purpose. (Applications are only accepted through this link (https://www.applyweb.com/miamigrd/)).
2. A Graduate Assistantship application.
3. Three letters of recommendation (typically, 1-2 pages). Applicants should use the CollegeNet interface to have recommenders submit their letters online.
4. GRE scores mailed directly from ETS testing agency to the Department of Modern Languages and Literatures. Domestic and international students can send GRE and TOEFL scores to our Department with the University of Miami code (5815).
5. International students without BA or MA degrees from a U.S. institution should have TOEFL scores mailed directly from the testing agency to the Department of Modern Languages and Literatures.
6. Graduate applicants who have attended college or university outside the United States must submit official translations of transcripts and diplomas directly to the Department of Modern Languages and Literatures.
7. A research paper of 15-20 pages in English.
8. Research paper(s) of 15-20 pages in the primary language(s) of proposed study.

Application fee of $85.00

Printed materials should be sent to:

Graduate Program Admissions
Department of Modern Languages & Literatures
University of Miami
P. O. Box 248093
Coral Gables, Florida 33124-4650
FAX: 305-284-2068

For questions, consult the Graduate Program website (http://www.as.miami.edu/mll/graduate/) or contact the Department (mllgraduate@miami.edu?subject=Graduate%20Applications) (305-284-5585). The Graduate Committee will begin reviewing complete applications January 15th of each year.

MLL encourages African American and Hispanic applicants to pursue McKnight Doctoral Fellowships, which are supplemented by the UM College of Arts and Sciences to match the Departmental stipend amount. (Applicants must be U.S. citizens).

The application platform for McKnight Fellowship is available online (http://www.fefonline.org/). In case of any difficulty submitting the online application, applicants should contact FEF (webmaster@fefonline.org) or call 813-943-7578. For additional information, please contact the Florida Education Fund at 813-272-2772.

Doctoral Program in Modern Languages and Literatures
- Ph.D. in Literary, Cultural, and Linguistic Studies (p. 1812)

Certificates in Modern Languages and Literatures
- Certificate in Digital Humanities (p. 1811)
French

FRE 625. Elementary French for Graduate Research. 0 Credit Hours.
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 641. Elementary FRE I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students' communicative abilities speaking, reading, writing, and comprehending French and to provide an introduction to the Francophone world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 642. Elementary FRE II for Graduate Students. 0 Credit Hours.
Continuation of FRE 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending French, and continued engagement with the French-speaking world.
Prerequisite: FRE 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 645. Accelerated Elementary FRE for Graduate Students. 0 Credit Hours.
For graduate students with previous study of French desiring to review material covered in FRE641 and FRE642 in preparation for study of French at the intermediate level. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending French and continued engagement with the Francophone world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 651. Intermediate FRE I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level French. Designed to develop graduate students' communication skills in both written and spoken French at the intermediate level. Intended primarily for students who will carry out research in the French-speaking world.
Prerequisite: FRE 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 652. Intermediate FRE II for Graduate Research. 0 Credit Hours.
For graduate students with previous study of French at the intermediate level. Designed to enhance graduate students' communication skills in both written and spoken French at the high-intermediate level. Intended primarily for students who will carry out research in the Francophone world.
Prerequisite: FRE 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 653. Advanced FRE I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of French at the high-intermediate level. Designed to enhance graduate students' communication skills in French at the advanced-low level. Intended primarily for students who will carry out research in the Francophone world.
Prerequisite: FRE 652.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 711. Topics in French Medieval Literature. 3 Credit Hours.
Recent topics: exile, the epic, orientalism, imperialism, monsters.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 712. Topics in French Renaissance Literature. 3 Credit Hours.
Specific genres, works, authors, and movements. Possible topics: Melancholy and Madness; Montaigne; Rabelais; Marguerite de Navarre; lyric poetry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FRE 713. Topics in 17th Century French Literature. 3 Credit Hours.
Recent topics: Racine, Moliere, Corneille: Pascal and the Moralist tradition, the birth of the psychological novel, love and war.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 714. Topics in 18th Century French Literature. 3 Credit Hours.
Recent topics: Diderot, Rousseau, Sade; exoticism as related to political theory; the epistolary novel; the Enlightenment and post-colonial theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 715. Topics in 19th Century French Literature. 3 Credit Hours.
Recent topics: Balzac, Stendhal, Flaubert; Dandysm and Decadence; the Symbolist movement.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 716. Topics in 20th-21st Century French Literature. 3 Credit Hours.
Recent topics: Paris 1913; Surrealism; Artaud, Beckett, Ionesco, Genet; the Noveau Roman.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 721. Special Topics in French Studies. 3 Credit Hours.
Special Topics in French Studies.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 775. Topics in Francophone Studies. 3 Credit Hours.
Recent topics: travel narratives, literary historiography, discourses of race, colonialism, multilingualism and literacy, nationalism and culture.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 791. Writing Practicum. 1 Credit Hour.
The writing of a publishable research paper under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 792. Directed Readings. 1-3 Credit Hours.
Directed Readings at the grad level.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in FRE 730.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

FRE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in FRE 740. Where a student has passed his/her qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
FRE 850. Research in Residence. 1 Credit Hour.
Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

German

GER 625. German for Graduate Research. 0 Credit Hours.
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor.)
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GER 641. Elementary GER I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending German and provide an introduction to the German-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GER 642. Elementary GER II for Graduate Students. 0 Credit Hours.
Continuation of GER 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending German, as well as knowledge of the German-speaking world. Prerequisite: GER 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GER 651. Intermediate GER I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level German. Designed to enhance graduate students' communication skills in the German language at the intermediate level. Intended principally for students who will carry out research in the German-speaking world. Prerequisite: GER 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GER 652. Intermediate GER II for Graduate Research. 0 Credit Hours.
For students with previous study of German at the intermediate level. Designed to enhance graduate students' communication skills in the German language at the high-intermediate level. Intended principally for students who will carry out research in the German-speaking world. Prerequisite: GER 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GER 691. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GER 692. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
Italian

ITA 625. Italian for Graduate Research. 0 Credit Hours.
Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ITA 641. Elementary ITA I for Graduate Students. 1 Credit Hour.
Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Italian, and to provide an introduction to the Italian-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ITA 642. Elementary ITA II for Graduate Research. 1 Credit Hour.
Continuation of ITA 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Italian, and the continued study of the Italian-speaking world.
Prerequisite: ITA 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ITA 651. Intermediate ITA I for Graduate Research. 1 Credit Hour.
For graduate students with previous study of elementary-level Italian. Designed to enhance graduate students' communication skills in the Italian language at the intermediate level. Intended principally for students who will carry out research in areas related to the Italian-speaking world.
Prerequisite: ITA 642.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

ITA 652. Intermediate ITA II for Graduate Research. 1 Credit Hour.
For students with previous study of intermediate-level Italian. Designed to enhance graduate student's communication skills in the Italian language at the high-intermediate level. Intended principally for students who will carry out research in areas related to the Italian-speaking world.
Prerequisite: ITA 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ITA 691. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ITA 692. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

Modern Language and Literature

MLL 701. Intro to Second Language Teaching: Theory and Practice. 3 Credit Hours.
Introduction to the teaching of second languages in university settings. Overview of major theoretical approaches: sociocultural, communicative, and task-based. Practice with teaching techniques: Lesson planning, task design, use of the target language, grammar teaching, use of authentic oral and written materials in the classroom
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
MLL 702. Bilingualism. 3 Credit Hours.
Social, psychological, linguistic, and pedagogical dimensions of language contact situations. Emphasis on Spanish and French.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 703. Topics in Critical Studies of Language. 3 Credit Hours.
Special topics in the critical analysis of language.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 704. Sociocultural Theory and Second Language Development. 3 Credit Hours.
Key principles of sociocultural theory of mind applied to second language acquisition and pedagogy. The seminar will explore the theoretical, methodological, and pedagogical implications of the theory, emphasizing concept-based teaching and dynamic assessment.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 711. Introduction to Critical Theory. 3 Credit Hours.
An introduction to the major concepts, issues, and debates that inform contemporary literary criticism.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MLL 712. Topics in Early Modern Comparative Literature. 3 Credit Hours.
Specific genres, works, authors and movements in comparative perspective in the early modern period (1300-1750). Topics may include: Trans-Atlantic Baroque; Grotesque Literature; Petrarchan Poetry in Italy, France, and England The Emergence of Professional Theater in Western Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 714. Readings in Critical Theory. 3 Credit Hours.
Representative works of critical theory as related to philosophy, sociology of culture, psychoanalysis, hermeneutics, deconstruction, etc. May be repeated for credit if topics are different.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MLL 721. Special Topics in Literature. 3 Credit Hours.
May be repeated for credit, if topics are different.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 726. Topics in Comparative Literature. 3 Credit Hours.
May be repeated for credit, if topics are different.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 771. Introduction to Digital Humanities. 3 Credit Hours.
An introduction to the theory and practice of the digital humanities from a literary and cultural studies perspective. It introduces major types of digital humanities work and central debates and concerns in the field. The course is taught in English and is open to graduate students from all humanities departments. No experience in the digital humanities or with digital tools or methods is required.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MLL 772. Topics in Digital Humanities and Media Studies. 3 Credit Hours.
A survey of Media Studies. Students will approach a broad range of texts in the field, and outline both its historical development and present state, with a particular focus on emerging theories and practices within Media Studies and Digital Humanities in the academy. The course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MLL 773. Digital Medieval Studies. 3 Credit Hours.
An overview on the history and theoretical trends regarding digital resources and tools applied to medieval disciplines. This course is taught in English and is open to graduate students from all humanities departments, especially those interested in historical studies and digital methods.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MLL 774. Practicum in Digital Humanities. 3 Credit Hours.
Offers students the possibility to apply their learning in the field of Digital Humanities and move forward on their personal Digital Humanities research project. Students will carry out many practical exercises with programming languages and digital tools, and work towards a final digital project. This course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MLL 792. Directed Readings. 1-3 Credit Hours.
Direct readings.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MLL 793. Teaching Practicum. 3 Credit Hours.
Teaching Practicum.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 797. Readings for the Ph.D. Examinations. 3 Credit Hours.
For Ph.D. students who are preparing for exams.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 798. Internship. 1 Credit Hour.
Students work in a community or business setting on issues related to language, culture, and/or teaching.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MLL 799. Dissertation and Professional Writing Seminar. 1-3 Credit Hours.
This course will be taken during the seventh semester of graduate study, concurrently with the final preparation/defense of dissertation prospectus during the first month of the semester. The course provides a structure and a time frame for completing the first chapter of the dissertation over the course of that semester so that students have their projects well underway at the beginning of their eighth semester of graduate study. Students will present their thesis work-in-progress to the course instructor and each other while receiving broader counsel on dissertation completion strategies and various areas of professional writing, including conceptualizing arguments for various audiences, submitting grant proposals, and publishing across a variety of venues. Course is required in the fourth year of graduate study and may be repeated optionally in subsequent years by students in advanced stages of dissertation writing.
Prerequisite: SPA 830 or FRE 830.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
Portuguese

POR 641. Elementary POR I for Graduate Students. 0 Credit Hours. 0 Credit Hours.
Designed to develop graduate students’ communicative abilities in speaking, reading, writing, and comprehending Portuguese, and to provide an introduction to the Lusophone world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POR 642. Elementary Portuguese II for Grad Students. 0 Credit Hours.
Continuation of POR 641. Designed to develop graduate students communicative abilities in speaking, reading, writing, and comprehending, Portuguese, and continued engagement with the Portuguese-speaking world. 0 Credit Hours.
Pre-Requisite: POR 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POR 645. Beginning Portuguese for Graduate Research (0 Credits). 0 Credit Hours.
The equivalent of one year of beginning-level college Portuguese, in preparation for study of Portuguese at the intermediate level. Designed to develop graduate students’ communicative abilities in speaking, reading, writing, and comprehending Portuguese, and continued engagement with the Portuguese speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POR 651. Intermediate POR I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level Portuguese who will carry out research related to the Portuguese-speaking world. Designed to enhance graduate students’ communication skills at the intermediate level of proficiency.
Pre-Requisite: POR 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POR 652. Intermediate Portuguese II for Graduate Research (0 Credit). 0 Credit Hours.
For students with previous study of Portuguese at the intermediate level who will carry out research related to the Portuguese-speaking world. Designed to enhance graduate students’ communication skills at the intermediate-high level of proficiency.
Pre-Requisite: POR 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POR 691. Topics in Luso-Brazilian Studies. 3 Credit Hours.
Graduate equivalent of POR courses listed at the 300-level.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POR 692. Directed Readings in Portuguese. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POR 721. Special Topics in Luso-Brazilian Studies. 3 Credit Hours.
Special Topics in Luso-Afro-Brazilian Studies.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

Spanish

SPA 641. Elementary SPA I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students’ communicative abilities in speaking, reading, writing and comprehending Spanish and to provide an introduction to the Spanish-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
SPA 642. Elementary SPA II for Graduate Students. 0 Credit Hours.
Continuation of SPA 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Spanish, and continued engagement with the Spanish-speaking world.
Prerequisite: SPA 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 645. Accelerated Elementary SPA for Graduate Students. 0 Credit Hours.
For graduate students with prior study of Spanish who desire to review material covered in SPA641 and SPA642 in preparation for study of Spanish at the intermediate level. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Spanish, and continued engagement with the Spanish-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 647. Basic SPA for Graduate Heritage Learners. 0 Credit Hours.
For graduate students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language but do not speak the language regularly. Focus on developing formal speaking, reading, and writing abilities, and knowledge of the Spanish-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 651. Intermediate SPA I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level Spanish. Designed to develop graduate students' communication skills in both written and spoken Spanish at the intermediate level. Intended primarily for students who will carry out research in the Spanish-speaking world.
Prerequisite: SPA 642 or SPA 645.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 652. Intermediate SPA II for Graduate Research. 0 Credit Hours.
For graduate students with previous study of Spanish at the intermediate level. Designed to enhance graduate students' communication skills in both written and spoken Spanish at the high-intermediate level. Intended primarily for students who will carry out research in the Spanish-speaking world.
Prerequisite: SPA 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 653. Advanced SPA I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of Spanish at the high-intermediate level. Designed to enhance graduate students' communication skills in both written and spoken Spanish at the advanced-low level. Intended primarily for students who will carry out research in the Spanish-speaking world.
Prerequisite: SPA 652.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 657. Intermediate SPA for Graduate Heritage Learners. 0 Credit Hours.
For graduate students with previous study of Spanish at the elementary level who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language but do not speak the language regularly. Designed to enhance graduate students' communication skills in both written and spoken Spanish at the intermediate-high level. Intended principally for heritage learners who will carry out research in the Spanish-speaking world.
Prerequisite: SPA 647.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
SPA 658. Advanced SPA for Graduate Heritage Learners. 0 Credit Hours.
For graduate students with previous study of Spanish at the intermediate-high level who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language but do not speak the language regularly. Designed to enhance graduate students' communication skills in both written and spoken Spanish at the advanced-low level. Intended principally for heritage learners who will carry out research in the Spanish-speaking world.
Prerequisite: SPA 657.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 693. Teaching Practicum. 3 Credit Hours.
Supervised pedagogical and professional training in collaboration with UM faculty.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 711. Topics in Spanish Medieval Literature. 3 Credit Hours.
Recent topics: Libro de Buen amor, the epic, Berceo, cancionero poetry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 713. Topics in the Golden Age. 3 Credit Hours.
Recent topics: culteranismo and conceptismo, La Celestina, Cervantes, the picaresque, sixteenth-century theatre.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 715. Topics in 18th–19th Century Spanish Literature. 3 Credit Hours.
Recent topics: neoclassicism, romantic theatre, Spain and the European Enlightenment, Galdos, realism, postromantic poetry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 716. Topics in 20th Century Spanish Literature. 3 Credit Hours.
Recent topics: the generation of 1898, Garcia Lorca, the post-war novel, contemporary theater.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 721. Special Topics in Hispanic Studies. 3 Credit Hours.
Special Topics in Hispanic Studies
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 733. Topics in Colonial Literature. 3 Credit Hours.
Recent topics: the chroniclers, Sor Juana Ines de la Cruz, Baroque of the Indies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 735. Topics in 19th Century Latin American Literature. 3 Credit Hours.
Recent topics include: romanticism, modernist poetry, anti-slavery novel.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 736. Topics in 20th Century Latin American Literature. 3 Credit Hours.
Recent topics: modernism, magic realism, the short story, the novel of the Mexican Revolution, the Boom and post-Boom.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SPA 791. Writing Practicum. 1 Credit Hour.
The writing of a publishable research paper under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SPA 792. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SPA 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of SPA 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in SPA 730.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

SPA 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of SPA 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in SPA 740. Where a student has passed his/her qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

SPA 850. Research in Residence. 1 Credit Hour.
Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Certificate in Digital Humanities

Program Overview
The Certificate in Digital Humanities is an interdisciplinary graduate certificate drawing on courses from the English, History, and Modern Languages and Literatures departments. Students pursuing the graduate certificate will take a minimum of three digital humanities-focused and/or digital methods courses (9 credit hours). All students pursuing the certificate will be required to take the DH practicum course (MLL 774). Students may fulfill the additional 6 credits required for the certificate by choosing two other digital humanities or digital methods courses from a list of approved courses offerings. Students may also petition to use courses outside of the approved course list to fulfill program requirements on an ad-hoc basis. The final requirement is the creation and approval of an online portfolio showcasing projects and research utilizing digital humanist methodologies.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Certificate in Second Language Acquisition & Teaching (SLAT)

Overview
The SLAT Graduate Certificate is an integrated group of courses designed to acquire expertise and experience in the field of critical studies of language, centering on theories of second language acquisition and bilingualism, empirical research in these areas, and their applications to the teaching of second and heritage languages at the postsecondary level.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements
Any graduate student, lecturer or senior lecturer teaching languages may earn the Graduate Certificate in SLAT, granted by the Department of Modern Languages and Literatures at the University of Miami.

Curriculum Requirements
To earn the SLAT Graduate Certificate, a minimum of nine (9) credit hours of graduate level coursework within the SLAT curriculum must be completed. Any course taken in fulfillment of the required credits toward the Certificate must already be designated as SLAT-related or must receive prior approval of the SLAT faculty. For incoming graduate student Teaching Assistants, MLL 701 (Introduction to Second Language Teaching: Theory and Practice) will fulfill three (3) credit hours of the requirement. For those graduate students and lecturers who join the Department having already taken the equivalent of MLL 701 at another institution, the nine (9) required credit hours must be fulfilled through other SLAT courses.

Goals
- Develop the expertise of participants in the fields of applied language studies, research on second language acquisition and bilingualism, modern language teaching methodology and pedagogy.
- Integrate meaningful use of technology into the participants’ teaching practices.
- Become more marketable professionally through the development and completion of a professional teaching portfolio.

Student Learning Outcomes
- Demonstrate advance knowledge of innovative pedagogical approaches and new technologies.
- Demonstrate practical expertise of innovative pedagogical approaches and new technologies.

Ph.D. in Literary, Cultural, and Linguistic Studies

Overview
The Ph.D. in Literary, Cultural, and Linguistic Studies offers two major concentrations: 1) Literary and Cultural Studies and 2) Critical Studies of Language/Linguistics. Students in each concentration may opt to develop a secondary field of expertise in the other.

The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.
Admission Requirements

1. Your completed application must include the following (incomplete applications will not be considered): A completed application, including a detailed statement of purpose explaining your research interests and why the Department of Modern Languages at the University of Miami is a good place to pursue your graduate training. We only accept on-line applications. Apply on-line here (https://www.applyweb.com/miamigrd/).

2. Three substantial letters of recommendation.

3. Official transcripts from all colleges and universities attended.

4. A substantial writing sample in English.

5. Writing samples in the primary language(s) of study (French, Portuguese, and/or Spanish).

6. For International students only: TOEFL (http://www.toefl.org/) scores (please use Institution code 5815 and Department code 2699).

7. Application fee of $85.00.

8. GRE scores are encouraged but *not* required for admission (please use Institution code 5815 and Department Code 2699). However, they are required only in order to be nominated for University-wide fellowships.

Basic Curriculum Requirements

The requirements set out below for the Ph.D. in Literary, Cultural, and Linguistic Studies are minimum requirements. The Graduate Studies Committee, Director of Graduate Studies, and individual advisors may set additional requirements.

1. The requirements:
   a. for students entering on the “five-year plan” (with a B.A. or M.A., see below), passing satisfactorily a minimum of 60 graded credit hours in approved courses, 30 of which must be open to graduate students only;
   b. for students entering on the “four-year plan” (with an M.A. in a closely related field, see below), passing satisfactorily a minimum of 48 graded credit hours in approved courses, 24 of which must be open to graduate students only;

2. Passing MLL 701, MLL 711, and MLL 799, and a minimum of 18 graded credit hours in the area(s) of research emphasis to be determined on an individualized basis in collaboration with the graduate advisors. 15 out of the 18 graded credit hours should be in MLL. However, students may petition the GSC to take 3 more credit hours in an outside department only if the class directly relates to the student's research project.

3. For students in the Literary and Cultural Studies concentration, three credits of Critical Studies of Language/Linguistics and three credits in any Arts and Sciences discipline focusing on Colonial or Early Modern Studies (18th century or earlier).

4. At least six credits in an approved cognate discipline to be determined in consultation with graduate advisors.

5. Nine credits in Literary/Cultural Studies or Critical Studies of Language/Linguistics, for students pursuing an optional minor concentration.

6. In addition to proficiency in English and the major language of study, demonstrating the following:
   a. reading knowledge of two other languages; or
   b. holistic knowledge of one other language (for example, by passing the equivalent of a course at the 300-level). Note: Appropriate languages of study will be determined in collaboration with the student’s advisors (e.g. students of Latin America may be encouraged to study Portuguese or an indigenous language; students focusing on early modern Spanish or French studies may be encouraged to study Italian; students working in the French-speaking Caribbean may need to take Haitian Kreyòl, etc.);
   c. if areas of specialization include Medieval, Early Modern, or Colonial Latin American Studies, students must demonstrate reading knowledge of Latin.

7. Passing a Breadth Exam. Depending on the student’s interests, the exam shall consist of three parts, according to one of the following configurations:
   a. one geographic region over three time periods;
   b. two geographic regions over two or three time periods;
   c. two geographic regions over one or two time periods and one area of critical sociolinguistics;
   d. two areas of critical sociolinguistics and one geographic region over one-time period. Note: Students entering the doctoral program with an MA in a relevant field may petition to waive the Breadth Exam (normally taken in the spring semester of the second year) after the first semester of study. The Graduate Studies Committee will consider petitions on an individualized basis.

8. Passing a Qualifying Exam on an approved topic. The exam typically includes three general approaches focusing on:
   a. literature, cultural studies, or sociolinguistics;
   b. critical theory;
   c. a cognate discipline (e.g. history, sociology, philosophy, law, art, film, etc.).

11. Satisfying the requirements of the Graduate School as stated in the Graduate Bulletin.

12. Students can also opt to complete two doctoral concentrations and/or one doctoral certificate while choosing courses to fulfill the requirements for the degree.
Concentrations

Graduate Concentration in Early Modern Studies

The Early Modern Studies Concentration is an interdisciplinary concentration to be earned in conjunction with the individual Ph.D. requirements for the departments of English, History, and Modern Languages and Literatures (Literary, Cultural and Linguistic Studies). Graduate students will continue to be housed in any one of the three departments and must fulfill the requirements of their discipline for the Ph.D. To qualify for the Concentration, students must successfully complete a minimum of two courses (6 credit hours) in one or both of the other two departments, substituting for courses within their department; and a minimum of two courses (6 credit hours) in early modern studies within their department.

https://mll.as.miami.edu/graduate/early-modern-studies-concentration/index.html

Graduate Concentration in Caribbean Studies

This is an interdisciplinary concentration to be earned in conjunction with the individual Ph.D. requirements for the departments of English, History, and Modern Languages and Literatures. Ph.D. students pursuing the doctoral concentration take a minimum of two Caribbean-focused courses (6 credit hours) within their home department, and a minimum of two Caribbean-focused courses (6 credit hours) outside of their department.

Curriculum

Students pursuing the doctoral concentration in Caribbean Studies must take as part of their required course credit hours a minimum of four Caribbean-focused courses (12 credit hours) as shown below.

https://mll.as.miami.edu/graduate/caribbean-studies-concentration/index.html

A minimum of two courses (6 credits) selected from the following:

- ENG 658: Studies in Transatlantic Literature
- ENG 665: Studies in African American Literature
- ENG 666: Caribbean Literature
- ENG 667: Caribbean Popular Culture
- ENG 668: Studies in Race and Diasporic Literatures
- ENG 686: Theories of Gender and Sexuality
- ENG 687: Studies in Literature and Culture since 1950
- ENG 688: Studies in Latino/a Literatures and Cultures
- ENG 689: Comparative Americas Studies

A minimum of two courses (6 credits) selected from the following:

- HIS 602: Africa and the African Diaspora
- HIS 602: Africa in Cuba / Cuba in Africa
- HIS 652: Race in Latin America
- HIS 652: Travels through Latin America
- HIS 654: Afro-Caribbean Religion: Healing and Power
- HIS 654: Haiti in History
- HIS 654: Caribbean Intellectual History and Social Movements
- HIS 662: Slavery and Capitalism
- HIS 669: Black Protest Thought
- HIS 669: Rethinking African-American Culture
- HIS 669: History of Global Slavery
- HIS 708: Slavery in the Atlantic World
- HIS 708: Atlantic Histories
- HIS 716: Caribbean Field Prep
- FRE 775: Topics in Francophone Studies
- MLL 702: Bilingualism
- MLL 703: Topics in Critical Studies of Language
- MLL 721: Atlantic Crossings: Literature and Immigration in the Age of Globalization
- MLL 727: Topics in Caribbean Studies
• SPA 733: Topics in Colonial Literature
• SPA 735: Topics in 19th Century Latin American and Caribbean Literature
• SPA 736: Topics in 20th Century Latin American and Caribbean Literature

**Or other courses with advisor's approval.**

**Certificates**

**Graduate Certificate in Digital Humanities in the Departments of English, History, and Modern Languages and Literatures**

The Graduate Certificate in the Digital Humanities is an interdisciplinary concentration in Digital Humanities to be earned *in conjunction* with the individual Ph.D. requirements for the Departments of English, History, and Modern Languages and Literatures. The certificate offers students a depth and breadth of knowledge about computational approaches to humanities scholarship; the ability to clearly articulate their own methodological approaches to digital projects they complete; the ability to intervene in and discuss the larger theoretical debates that have shaped and continue to shape digital humanities scholarship; knowledge in multiple digital methods, digital tools, and project management skills that students may employ to answer research questions; and experience working in cross-disciplinary collaborative research teams.

**Curriculum**

Ph.D. students pursuing the certificate will take a minimum of three DH-focused and/or digital methods courses (9 credit hours). All students pursuing the certificate will be required to take the DH practicum course (MLL 774). Students may fulfill the additional 6 credits required for the certificate by taking two other DH or digital methods courses of their selection, either selected from the current MLL and ENG DH offerings or from those courses outside of the department listed below. The final requirement is the creation and approval of an online portfolio showcasing projects and research utilizing digital humanist methodologies.

http://bulletin.miami.edu/graduate-academic-programs/arts-sciences/modern-languages-literatures/digital-humanities-certificate

**Graduate Certificate in Second Language Acquisition & Teaching Certificate (SLAT)**

The SLAT Graduate Certificate is an integrated group of courses designed to acquire expertise and experience in the field of critical studies of language, centering on theories of second language acquisition and bilingualism, empirical research in these areas, and their applications to the teaching of second and heritage languages at the postsecondary level.

**Curriculum**

Ph.D. students pursuing the certificate will take a minimum of three SLAT-related courses for a total of 9 graded credits. It is required to take MLL 701, "Intro to Second Language Teaching: Theory and Practice," in addition to two other SLAT-related courses (for example, MLL 702, MLL 703, MLL 704). Students pursuing this certificate should consult with the SLAT faculty to determine which courses to take.

https://mll.as.miami.edu/graduate/slat-certificate/index.html

Mission
The Ph.D. in LCLS moves beyond the traditional Spanish/French binary of Romance Studies to bridge those two critical areas of emphasis with one another, as well as with additional areas of expertise offered by our tenured and tenure-track faculty in Arabic, Chinese, Italian, and Luso-Brazilian Studies. Graduate training in MLL prepares students to work as teachers and researchers of literary, linguistic, and cultural studies at universities and four-year colleges, as well as to serve in administrative, advocacy, and leadership positions in a range of educational and cultural institutions.

Goals
The Department seeks:

1) to train innovative and productive intellectuals whose work can contribute to the creation of more knowledgeable and just societies;

2) to help students prepare for fruitful and fulfilling careers in scholarship, research, teaching, community service, and related professions; and

3) to guide and support graduating students in the successful pursuit of academic or non-academic employment.
Student Learning Outcomes

- Graduate students should demonstrate a broad, critical understanding of literary and cultural forms, traditions, products, and processes from the geographies and time periods specific to their fields of study.
- Students working as Teaching Assistants will demonstrate the ability to teach innovative, well-crafted, well-received courses in language, literature, and cultural studies at various levels.
- MLL will equip its students as innovative and productive intellectuals, preparing them for fruitful careers in scholarship and research within and/or beyond the academy.

Philosophy

philosophy.as.miami.edu

We offer an M.A. and a Ph.D. in philosophy.

The M.A. program is designed for those who want to pursue philosophy at a deeper level than in their B.A. degree, or who wish to transition into philosophy from other academic disciplines. Students may choose this program to improve their chances of acceptance into a highly-ranked Ph.D. program, or for other reasons. There are no distribution requirements: students may tailor their coursework to their own interests. Students must also write and defend a thesis, which can be used as a writing sample for Ph.D. program applications. (Note that acceptance into the M.A. program does not guarantee acceptance into our own Ph.D. program later on; the application procedures are separate.)

The Ph.D. program is specifically designed to prepare students for careers as professional teachers and researchers in philosophy, not only by way of coursework and research supervision, but also through professional mentoring and opportunities for philosophical development both inside and outside the classroom. Students normally enter with either a B.A. or an M.A. degree in philosophy. Students who enter without an M.A. and who fulfill the relevant requirements are awarded the M.A. degree as they work towards the Ph.D.

Each entering student is assigned a mentor from among the faculty, and faculty members lead professional development seminars on such topics as teaching, preparing work for publication, and preparing for the job market. A dedicated placement director work with each student to maximize their success at securing good post-graduation employment.

The Department prides itself on providing an inclusive, friendly and congenial atmosphere for doing philosophy, with many opportunities for informal interaction among students and faculty including workshops, conferences, colloquia and post-colloquium dinners.

Masters Degree in Philosophy

- M.A. in Philosophy (p. 1822)

Doctoral Program in Philosophy

- Ph.D. in Philosophy (p. 1823)

PHI 606. Mathematical Logic. 3 Credit Hours.
Logics, truth, proof, logical consequences, model theory, formalization, and computation. Meta-theory of first-order logic, computability theory, and Goedel’s Incompleteness theorems. Related results by church, Turing, and Tarski. Discussion of their philosophical significance.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 611. Formal Logic. 3 Credit Hours.
First and second-order quantification theory; metalogic.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHI 631. Ethical Theory. 3 Credit Hours.
G. E. Moore to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHI 632. Legal Philosophy. 3 Credit Hours.
The philosophical foundations of legal theory and litigation in U.S. law. Topics include the philosophical underpinnings of contemporary criminal law and tort law, the problems of legal causation and intent, the concept of a reasonable person, the nature of corrective justice, the Kantian basis for human rights, and the free speech dilemma.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 634. Political Philosophy. 3 Credit Hours.
A survey of some central issues and developments in political philosophy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 642. Epistemology. 3 Credit Hours.
A survey of the basic topics and questions in epistemology: knowledge acquisition and justification, perception, fallibilism, and skepticism.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 644. The Philosophy of Language. 3 Credit Hours.
A central feature of human language is that it is meaningful; this is what allows us to use language to record and share information about the world, and to communicate the ideas, thoughts and emotions that make up our private mental lives. But what is linguistic meaning? One historically influential idea is that linguistic meaning is to be analyzed in terms of truth. This course will examine this idea, and consider several philosophical debates that have arisen from it, or in which it has played an important role. Along the way students will gain an understanding of some of the most central concepts and issues in contemporary philosophy of language.
Prerequisite: PHI 357 (249) or at least one of PHI 341 - 346.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 646. Evidence and Knowledge in Medicine. 3 Credit Hours.
Basic methodologies in medicine in the context of philosophical theories of evidence.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHI 647. Mind and Language. 3 Credit Hours.
Philosophical problems about signs, linguistic and mental representations, intentionality, action, and consciousness.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 648. Induction, Probability, and Scientific Method. 3 Credit Hours.
Foundations of inductive reasoning and role of experiment in science.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 649. Metaphysics. 3 Credit Hours.
A selection of topics dealing with the main problems of metaphysics: existence, modality, universals, identity and persistence through time, causation, the self and physicalism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 653. Philosophy and Film. 3 Credit Hours.
Combining readings in philosophy and film theory and criticism with close analysis of selected films, this course is premised on a conviction in the potential fruitfulness, both for film studies and philosophy, of thinking philosophically about the ontology of the medium, the history and the art of film, the ways we experience movies, and their impact on our lives. A main focus will be on the writings of Stanley Cavell—the most important author in the Anglo/American philosophical tradition to make writing about film a substantial part of his philosophical project—and philosophical responses by to his work.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHI 655. Philosophy of Education. 3 Credit Hours.
Problems concerning the nature and aims of education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PHI 660. History of Logic. 3 Credit Hours.
Aristotle, the Stoics, the Scholastics, Leibniz, Boole, DeMorgan, Peirce, Frege, and Russell and Whitehead.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

PHI 662. History of Ethics. 3 Credit Hours.
A selection of ethical theories from Aristotle to Rawls.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 670. Presocratics and Plato. 3 Credit Hours.
Fragments from the Presocratics and the dialogues of Plato.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 672. Aristotle and Hellenistic Philosophy. 3 Credit Hours.
A survey of central philosophical topics in Aristotle and Hellenistic Philosophers (Epicureans, Stoics, and Skeptics).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 673. Medieval Philosophy. 3 Credit Hours.
The patristic period through the scholasticism of the late middle ages.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 674. Early Modern Philosophy. 3 Credit Hours.
An examination of early modern philosophy from Hobbes and Descartes to Hume.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 677. Kant. 3 Credit Hours.
An examination of selected issues in Kant’s theoretical or practical philosophy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 681. Pragmatism. 3 Credit Hours.
Peirce, James, Dewey, and others.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 683. The Phenomenological Tradition. 3 Credit Hours.
An examination of the phenomenological movement (Edmund Husserl, Martin Heidegger, Maurice Merleau-Ponty, and others) and of its impact on contemporary thought.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 684. History of Analytic Philosophy. 3 Credit Hours.
The development of analytic philosophy from its beginnings in the work of Frege and Russell through logical positivism to contemporary philosophy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHI 695. Special Topics. 3 Credit Hours.
A selected philosopher or philosophical problem. May be repeated for credit.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 696. Special Topics. 3 Credit Hours.
A selected philosopher or philosophical problem. May be repeated for credit.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 697. Special Topics. 3 Credit Hours.
A selected philosopher or philosophical problem. May be repeated for credit. Prerequisite: Six credits in Philosophy and junior standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 698. Independent Study in Philosophy. 1-3 Credit Hours.
Directed reading on a topic or philosopher. May be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 701. Proseminar (First Semester). 3 Credit Hours.
Covers the core texts from the history of analytic philosophy. First semester of the year-long pro-seminar for first-year graduate students in Philosophy.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 702. Proseminar (Second Semester). 3 Credit Hours.
Covers the core texts and issues of analytic philosophy in the second half of the twentieth century. Second semester of the year-long pro-seminar for first-year graduate students in Philosophy.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 703. Seminar on Philosophical Writing & Methodology. 3 Credit Hours.
Students will work on improving their philosophical writing by preparing a polished version of an original philosophical research paper. They will also develop their philosophical research skills, and will learn how to present and discuss their research in a conference setting. The goal is to have, by the end of the semester, a very good abstract to submit to a conference; a polished and practiced presentation of a paper; and most importantly a written version of a paper that is ready (or close to ready) for submission to a journal.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 711. Topics in Logic. 3 Credit Hours.
Problems in philosophical logic; non-standard logic.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 731. Seminar in Ethics. 3 Credit Hours.
Problems in normative ethics, meta-ethics, and value theory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHI 736. Values, Norms, and Actions. 3 Credit Hours.
The role of values and norms in practical reasoning and decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHI 742. Seminar in Epistemology. 3 Credit Hours.
Problems concerning knowledge: skepticism, belief, certainty, truth, and justification.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 744. Seminar in Philosophy of Mind. 3 Credit Hours.
Problems concerning mental phenomena: theories of perception, action, consciousness.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 747. Seminar in Philosophy of Language. 3 Credit Hours.
Nature and uses of language; concepts of reference, truth, and meaning.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 748. Philosophy of Science. 3 Credit Hours.
Selected topics in the philosophy of science, such as realism, explanation, and conceptual and methodological issues in the special sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 749. Seminar in Metaphysics. 3 Credit Hours.
Problems related to the nature and kinds of being.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 751. Seminar in Philosophy of Art. 3 Credit Hours.
Problems related to beauty and the philosophy of art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 772. Seminar in Ancient Philosophy. 3 Credit Hours.
A discussion of selected topics in ancient philosophy.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 778. Idealism. 3 Credit Hours.
An examination of Idealism, both contemporary and historical.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 795. Seminar in Special Topics. 3 Credit Hours.
A selected philosopher or philosophical problem. May be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 796. Seminar in Special Topics. 3 Credit Hours.
A selected philosopher or philosophical problem. May be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHI 798. Independent Study in Philosophy. 1-3 Credit Hours.
Directed reading on a topic or philosopher. May be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHI 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
 Typically Offered: Fall & Spring.

PHI 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.
Grading: SUS.
 Typically Offered: Fall & Spring.

PHI 840. Post-candidacy doctoral dissertation. 1-6 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHI 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.
Grading: SUS.
 Typically Offered: Fall & Spring.

PHI 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.
Grading: SUS.
 Typically Offered: Fall & Spring.

M.A. in Philosophy

Policies & Important Details

1. The M.A. in Philosophy is intended to deepen a student’s background in philosophy, and to improve a student’s preparation for Ph.D. programs in philosophy. It is possible to use the M.A. as a bridge program from another discipline into philosophy.

2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.

3. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.

4. Upon completing the course requirements and presenting and defending a satisfactory thesis, the student has completed the requirements for an M.A. in Philosophy.

5. The student in consultation with his/her selected M.A. thesis committee chair will decide on the thesis committee members. The thesis committee will consist of not less than three members, two from the Department’s graduate faculty, and one from outside the Department. The chair has to be a member of the graduate faculty. The duties of the thesis committee are:
   a. To consult with and to advise students on their research.
   b. To meet, at intervals, to review progress and expected results.
   c. To read and comment upon the draft thesis.
   d. To meet, when the thesis is completed, to conduct the final oral examination and to satisfy itself that the thesis is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final acceptable typescript of the thesis in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

Presentation and oral defense of an acceptable thesis.

* Students must accumulate 30 credits in philosophy with satisfactory grades, 24 credits of coursework and 6 credits of thesis research. At least 18 of these credits must be earned while in residence.

**Mission**

**Goals**

Our students will be well prepared to attend Ph.D. programs in philosophy. They will have broad knowledge of the most important areas of philosophy and its history, and mastery of philosophical methods of argumentation. They will also have detailed knowledge in a particular sub-discipline of philosophy and (where relevant) its relations to other areas of inquiry, preparing them to conduct original research in this area. They will also be prepared to become contributors to philosophical knowledge by presenting their work at workshops and conferences.

**Student Learning Outcomes**

- Students will demonstrate a deep and broad knowledge of the main areas of philosophy and their history, and mastery of philosophical methods.
- Students will demonstrate the ability to contribute to philosophical knowledge by writing and presenting original philosophical research.

**Ph.D. in Philosophy**

**Policies and Important Details**

1. The Ph.D. in Philosophy is for students with a background in philosophy. Normally at least a B.A. in Philosophy is required.
2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
3. Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
4. Upon completing the course requirements and passing the qualifying exams with a grade of 1 or 2, the student has completed the requirements for an M.A. in Philosophy.
5. Upon completing the course requirements, passing the qualifying exams with a grade of 2, and successfully defending the Ph.D. proposal, the student is eligible for admission to Ph.D. candidacy.
6. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. dissertation committee chair will decide on the dissertation committee members. The dissertation committee will consist of not less than four members, three from the department's graduate faculty, and one from outside the Department. The chair has to be a member of the graduate faculty. The duties of the dissertation committee are:
   a. To consult with and to advise students on their research.
   b. To meet, at intervals, to review progress and expected results.
   c. To read and comment upon the draft dissertation.
   d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.

**Curriculum Requirements**

Students must accumulate a 60 credits in philosophy with satisfactory grades, 45 credits of coursework and 15 credits of dissertation research. At least 21 of the 45 credits must be for courses at the 700 level. At least 27 of these credits must be earned while in residence.

**Qualifying Exam**

1 A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A student must receive a grade of 2 in order to proceed to the dissertation stage. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of around 8,000 words on a topic central to this material, writes a dissertation proposal of around 2,000 words, and participates in an oral defense of the paper and proposal as they relate to the reading list.

**Language Requirement**

2 A student must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

**PHD Dissertation**

3 Presentation and oral defense of an acceptable dissertation.

**Mission**

Our students will be well prepared to work as professional academic philosophers. They will have broad knowledge of the most important areas of philosophy and its history, and mastery of philosophical methods of argumentation. They will also have detailed knowledge in a particular sub-discipline of philosophy and (where relevant) its relations to other areas of inquiry, preparing them to conduct original research in this area. They will be able to disseminate philosophical knowledge by teaching a wide range of courses at the undergraduate level and specialist courses at the graduate level. They will also be prepared to become contributors to philosophical knowledge by presenting their work at conferences and publishing original research in the form of articles, monographs, and/or books.

**Goals**

**Student Learning Outcomes**

- Students will demonstrate a deep and broad knowledge of the main areas of philosophy and their history, and mastery of philosophical methods.
- Students will demonstrate the ability to teach a wide range of philosophy courses at the undergraduate level, and courses in the area of specialization at the graduate level.
- Students will demonstrate the ability to contribute to philosophical knowledge by writing original philosophical research.

**Physics**

http://www.physics.miami.edu

Dept. Code: PHY
Degree Programs

All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric, ocean and quantum optics, biological physics, complexity, condensed matter/energy materials physics, elementary particle theory.

Masters Program in Physics

- M.S. in Physics (p. 1828)

Doctoral Program in Physics

- Ph.D. in Physics (p. 1828)

PHY 606. Advanced Laboratory. 1-2 Credit Hours.
Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

PHY 613. Mathematical Techniques in Physics. 3 Credit Hours.
Complex variables and applications. Infinite series and their uses, particularly in differential equations. Multiple integrals and Fourier series.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 616. Special Topics in Physics. 1-3 Credit Hours.
Special topics in Physics. Topics vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 617. Special Topics in Physics. 1-3 Credit Hours.
Special topics in Physics. Topics vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 618. Special Topics in AstroPhysics. 1-3 Credit Hours.
Special topics in Physics. Topics vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 622. Solid State Physics. 3 Credit Hours.
Crystal structure, quantum theory of the electronic structure of solids, mechanical, electric, magnetic and optical properties of solids.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 630. Plasma Physics I. 3 Credit Hours.
Kinetic theory of plasmas, adiabatic motion of charged particles magneto fluid dynamics, transport properties of plasmas in electromagnetic fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 640. Classical Mechanics II. 3 Credit Hours.
Lagrangian formulation, rigid body dynamics. Topics selected from fluid dynamics, non-linear oscillations, normal modes, phase plane analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
PHY 645. Introduction to Astrophysics. 3 Credit Hours.
Celestial mechanics, solar models, galaxies, distance scales, instruments.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 652. Optical Physics. 3 Credit Hours.
Geometric optics, interference and diffraction, polarized light, optical pumping, coherence phenomena, applications to modern physical research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 660. Quantum Mechanics and Modern Physics I. 3 Credit Hours.
Introductory theory with applications to simple systems. Perturbation theory and atomic structure.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PHY 661. Quantum Mechanics and Modern Physics II. 3 Credit Hours.
Applications of quantum mechanics to atomic and molecular spectroscopy, quantum statistical mechanics, and nuclear physics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHY 701. Condensed Matter Physics Seminar. 1 Credit Hour.
Seminars on hot topics in Condensed Matter Physics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

PHY 713. Methods of Mathematical Physics I. 3 Credit Hours.
A continuation of PHY 515.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 717. Special Topics in Physics. 1-3 Credit Hours.
Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 718. Special Topics in Physics. 1-3 Credit Hours.
Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 722. Advanced Solid State Physics. 3 Credit Hours.
Electronic structure, electron-electron interactions, phonons, many-body problems, transport properties, magnetism, superconductivity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 723. Statistical Mechanics I. 3 Credit Hours.
Equilibrium state, irreversibility, statistical description of an ensemble, entropy, partition functions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 724. Statistical Mechanics II. 3 Credit Hours.
Statistical description of many body problems, specific heats, Brownian motion in liquids and fields, non-equilibrium states, superconductivity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PHY 752. Electromagnetic Theory I. 3 Credit Hours.
Electrostatics, magnetostatics, Maxwell's equations, continuous media, waves, antennas, resonant cavities, wave guides.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 753. Electromagnetic Theory II. 3 Credit Hours.
Relativistic effects, interaction of radiation with matter, multiple radiation, radiation reaction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 766. Elementary Particles. 3 Credit Hours.
The Standard Model of elementary particles. Classical theory of fields for spin 0, 1/2, 1; Feynman rules. The Standard Model Lagrangian is postulated, and some of its basic consequences are explored.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 770. Quantum Theory I. 3 Credit Hours.
Transformation theory, linear operators and vector spaces. Schrödinger's equation, rotation group and angular momentum, statistics (Bose-Einstein and Fermi-Dirac), isotopic spin, multiple structure of levels, approximation methods.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 771. Quantum Theory II. 3 Credit Hours.
One particle relativistic theory; Lorentz group; symmetries of particles; elementary scattering theory; many body problems; Green's function techniques; S-matrix.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 780. Directed Readings or Research. 1-4 Credit Hours.
Research in Physics.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

PHY 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

PHY 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PHY 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PHY 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more to than 12 hours of PHY 730 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
PHY 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHY 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

PHY 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

M.S. in Physics

Curriculum Requirements
In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the general Graduate Record Examination (GRE).
2. A minimum of 30 physics course credit hours at the 600-700 level are required for the Master Degree.
3. The following specific courses, or their equivalent, are required for the M.S. degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 640</td>
<td>Classical Mechanics II</td>
<td>3</td>

</tr>
</tbody>
</table>

4. For the M.S. degree no more than 3 credit hours for reading courses may be counted, and no more than 2 credit hours of seminars. Up to 6 credit hours may be earned in thesis work for this degree.

5. The physics department offers a comprehensive graduate examination each year. All students are required to take the exam when it is offered.

6. Courses taken outside the department should be relevant to the students’ program and approved by the graduate advisor.

Ph.D. in Physics

Program Overview
All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric, ocean and quantum optics, biological physics, complexity, condensed matter/energy materials physics, elementary particle theory.

Admission Requirements
Consideration is given to applicants who have a B.S. degree in physics (or related field) with a minimum undergraduate GPA of B. Submission of Graduate Record Examination (general and subject GRE) scores is recommended, but not required, with the application for admission. Applicants from non-English-speaking countries must demonstrate proficiency in English via the TOEFL or IELTS test, even if they have previously taken courses in the US. The minimum TOEFL score for admission is 80 in the internet-based test, or equivalent (550 in the paper-based test and 213 in the computer-based one). The minimum IELTS score is 6.5.

Application deadline for the Fall Semester is February 1st. Application for financial aid is automatic and does not require any additional document on the part of the applicant. The only accepted form of application is online through the Graduate School web page (https://www.grad.miami.edu/apply/
on-campus-graduate-programs/). In addition to excellence in the academic background, consideration for admission is also based on diversity and interest in one of the research fields of the Department. While not bound to it, please indicate in your application your field of interest and whether you are interested in experimental or theoretical work.

We usually do not offer Spring admission and all applications will be considered for fall admission, regardless of the time of submission. In rare circumstances, an exception can be made, and the applicant should contact us at the address reported below to request it before applying.

Curriculum Requirements

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the general Graduate Record Examination (GRE).
2. A minimum of 24 physics course credit hours at the 600-700 level are required for the PhD.
3. The following specific courses, or their equivalent, are required for the PhD degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 640</td>

</tr>
</tbody>
</table>

Total Credit Hours 60

4. Courses taken outside the department should be relevant to the students’ program and approved by the graduate advisor.
5. Students are required to participate in research at the earliest opportunity. Mechanisms for doing so include enrolling during the regular semester in a research course (phy 780) and engaging in research during the summer months; both require the consent of a faculty member supervisor.
6. The comprehensive exams for Ph.D students in physics consist of the Written Qualifying Exam, an Oral Presentation and an accompanying Expository Paper. The Written Exam, offered each year in January, consists of sections on Classical Mechanics, Quantum Mechanics, Electromagnetism and Statistical/Thermal physics, at the advanced undergraduate level. Students have two opportunities to pass the Written Exam at the Ph.D level. Copies of prior exams are available in the department office.

The Oral Presentation and accompanying Expository Paper must be completed by the end of a student’s 5th semester. In order to complete these parts of the comprehensive examinations, a student must be engaged in research with a faculty member. The purpose of the oral presentation and paper are to demonstrate preliminary research on a problem of the relevant discipline. The presentation/paper need not constitute a proposal for Ph.D dissertation research or include preliminary work toward the dissertation. Students are expected to consult with and receive approval from their research mentor as to a suitable topic.

Expository Paper: 5-10pp, 11pt or 12pt typeface

The paper should include a substantive literature survey (with referencing in standard publication format) that places the topic in context, provides relevant equations, and outlines calculations or experimental design/results as appropriate. Figures (if any) should be incorporated into the text using, e.g., LaTex or MS Word. Students (and mentors) should be wary to allow sufficient time to research, write, and edit their papers to meet the standards of a scientific publication.

Oral Presentation: 30-40 min. (not including questions)

This is typically a PowerPoint-type presentation summarizing the topic of the paper. The presentation should include technical detail as necessary to outline the topic and should be at the level of a departmental colloquium, accessible to a general audience of advanced undergraduate and graduate students.

Deadlines and Procedures:

It is the student’s responsibility, in consultation with their research mentor and the graduate program advisor, to establish a Comprehensive Exam Committee consisting of the mentor and at least two other physics faculty, and the date for the Oral Presentation. The committee should
receive the Expository Paper for review a minimum of 10 days in advance of the date established for the Oral Presentation. With the addition of a committee member from outside the physics department, the Comprehensive Exam Committee may constitute the student’s Ph.D Dissertation Committee.

7. Should a student need to select a new thesis advisor, this selection must be made without delay.
8. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.

**Total Credit Hours** 60

## Mission

The mission of the Physics Ph.D program is to develop productive and creative research scientists and educators by providing students with a rigorous grounding in classical and modern theory, practice in advanced experimental techniques, training in a specialized field of research, and teaching experience.

## Goals

It is expected that graduates will be capable of conducting independent research, solving complex problems, communicating scientific results in both written and spoken form, and critically assessing the scientific literature.

## Student Learning Outcomes

- Students will demonstrate a rigorous grounding in classical and modern physics theory, the associated mathematical methods and their applications.
• Students will demonstrate their ability to conduct independent research, incorporating the ability to critically analyze and address a fundamental problem in their chosen field.
• Students will demonstrate the ability to communicate research findings effectively

Political Science
politicalscience.as.miami.edu

The MPA program is designed to prepare students for a career of public service. Students will be exposed to the essential components of public service professionalism—excellence in technique, ethics and leadership—to help meet the challenges in the years ahead. Our award-winning, student-oriented faculty is dedicated to helping you achieve this “professional edge” in small, stimulating seminars, convenient evening courses, super-modern facilities and we have an excellent record in placing graduates.

Masters Program in Political Science
• M.P.A. Masters in Public Administration (p. 1846)
• M.P.P. Masters in Public Policy (p. 1851)

Certificates
• Certificate in Public Administration (p. 1841)
• Certificate in Public Policy (p. 1841)

POL 601. Budget and Financial Management and Administration. 3 Credit Hours.
Role of the budget in shaping public policy; managing public revenues; budgetary theory, politics, and fiscal management. Examples from state, municipal and federal governments.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

POL 602. Congressional Representation. 3 Credit Hours.
Examination of how and when citizens influence legislators’ behavior. How legislators’ floor behavior reflects citizens’ preferences and how these preferences influence the formation of electoral coalitions.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 603. Special Topics in Comparative Politics. 3 Credit Hours.
A seminar in comparative politics, designed to give students a greater degree of knowledge of a particular subject, and to develop ability in the techniques of individual research and group discussion.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 604. The World Before European Domination. 3 Credit Hours.
Examines the historical roots of the contemporary international system, and questions the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 605. Sex, Babies, and the State. 3 Credit Hours.
Examines policies on reproduction, work, and the family in a variety of national, with specific emphasis on Latin America.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 606. Organizational Dynamics and Management. 3 Credit Hours.
A seminar on organizational dynamics and management in public and non-profit organizations. Focus on organizational theories, leadership, behavior, goals, effectiveness, and change, with an emphasis on the distinctiveness of public organizations, public-private partnerships, new public management, and digital governance.
Prerequisite: POL 201 or POL 202 or POL 203 or INS 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 607. Politics, Sociology, and Economy in Contemporary Brazil. 3 Credit Hours.
Examines the social, economic, and cultural transformations shaping contemporary Brazilian politics.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 608. Equity and Diversity in Public Administration. 3 Credit Hours.
Examines federal and state policies, laws, and court decisions as means for helping public administrators develop policies and procedures that meet legal requirements and recognize the values of equity and diversity in the treatment of its citizenry and public employees.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 609. Issues in Judicial Politics. 3 Credit Hours.
Examines the Supreme Court of the United States (SCOTUS) through the lens of upcoming cases on the SCOTUS's docket and through recently decided cases that were of important legal precedent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 610. Statistics for Politics and Public Administration. 3 Credit Hours.
This course focuses on the use of statistics to conduct quantitative research (i.e., statistics) in political science and public administration. The course emphasizes hands-on data work. Students will learn how to perform political analyses — and present findings in an appropriate manner — using SPSS statistical software.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 611. Security in the Arabian Peninsula. 3 Credit Hours.
Examines the security environment of the Arabian Peninsula.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 614. Art and Politics. 3 Credit Hours.
Explores the relationship between narratives, aesthetics, and the political/social world.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 615. Media Content Analysis. 3 Credit Hours.
There are few facets of our lives which are not directly affected by media content. From cell phones to televisions, the media is with us all the time. But what messages are contained in the mass media? What methods can we employ to study media content scientifically? This course will explore methods of analyzing media sources including movies, newspapers, magazines, and television Course topics will include political bias, campaign coverage, and news content. Students will design their own projects and implement their own coding strategies.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

POL 616. Experiments in Political Science. 3 Credit Hours.
Examines experimental method of hypothesis testing, with specific examples in the study of politics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 617. Introductory Statistical Methods in Political Science. 3 Credit Hours.
The tools needed to manipulate and analyze quantitative data rigorously so you may answer questions of political interest. First in a two-course sequence (followed by POL 618).
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 618. Advanced Statistical Methods in Political Science. 3 Credit Hours.
The maximum likelihood framework for statistical inference in the study of politics. Second in a two-course sequence (preceded by POL 617).
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 619. Introduction to Game Theory for Political Science. 3 Credit Hours.
The rudiments of non-cooperative game theory. Mainly intended for political science students, but presents applications from other academic disciplines such as economics, business administration, sociology, and psychology.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 620. Internship. 3 Credit Hours.
Provides advanced political science majors with an opportunity to participate in a structured, supervised internship. 25-35 page research paper required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 621. Public Affairs Internship. 3 Credit Hours.
Opportunity for the advanced student specializing in public administration to participate in an administrative capacity in an agency of state or local government. Periodic conferences with adviser and paper required.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 622. Introduction to Graduate Public Administration. 3 Credit Hours.
Introduction to concepts, issues, problems, theories and process in the field of public administration and/or public management.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 624. Non-Profit Organizations: Law, Policy, and Management. 3 Credit Hours.
This course teaches students the essential requirements for creation and operation of tax-exempt nonprofit organization in accordance with state and federal law. The course covers a wide range of relevant topics including guidelines for charitable giving and charitable solicitation, pitfalls that can result in personal liability for officers and directors, and statutory constraints on legislative lobbying and political activities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 625. Comparative Public Policy and Administration. 3 Credit Hours.
Comparison and analysis of the organizational and managerial policy problems of developed and developing nations. The administrative process will be considered within the institutional and cultural framework of each nation. Case studies will be used to focus on transition from traditional to modern techniques of public management.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 626. Administrative Law. 3 Credit Hours.
Administrative law is the study of the legal relationship of government agencies to legislatures, courts, and private parties. The course examines the legal dimensions of bureaucratic power and procedures as well as constitutional and statutory constraints on regulators and administrators. Topics include rule making, adjudication, investigation and enforcement, political controls on agencies, judicial review of agency decisions, governmental liability and immunity, public records and open meetings laws. Both federal law and Florida law are covered. The course assumes a basic knowledge of the American legal system, constitutional law and bureaucracy.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 627. Comparative Political Institutions. 3 Credit Hours.
The concept of institutionalism by studying three major sets of democratic institutions: electoral systems, legislatures, and political regimes.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 629. Conducting U.S. Elections. 3 Credit Hours.
Fair and free democratic elections are the heart of U.S. democracy. This course will examine who gets to vote, whether election laws and rules are fair (and fairly implemented), and proposals to reform the way elections are run.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 630. Intelligence and National Security. 3 Credit Hours.
This course will study the US national security community structure and decision making process. The course will look at the National Security Council, the principal national security agencies (such as the CIA, Defense Department, and State Department), how they interact, and their roles in dividing and executing policy. We will also examine the role and function of senior policy decision makers such as the President. We will study recent policy challenges such as Iraq and Afghanistan as examples of National Security policy.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 631. Global Environment Politics. 3 Credit Hours.
Examination of the environment within the context of economic globalization. Contrasts the international trading regime and those regimes designed to protect the environment, with specific attention to the issues of global warming and biodiversity.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 634. Applied Policy Analysis. 3 Credit Hours.
Examines a variety of policy problems through the framework of problem definition, formulation of alternatives, assessment of alternatives, and policy impact evaluation. Students will also be introduced to cost-benefit analysis and evaluation methods.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 635. Comparative Legal Systems. 3 Credit Hours.
Considers the institutional and political roles of Courts from a comparative perspective. With a focus on judicial independence and judicial review, will consider the juridical systems of a variety of countries and regions including the US, the EU, Germany, France, Great Britain, Chile, Argentina, Russia, The Asian-Pacific Rim, South Africa, Israel, Central America and the Middle East.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 636. U.S. Health Care Crisis: Politics and Policies. 3 Credit Hours.
This seminar will explore the politics and policies of healthcare in the United States. Our examination of the current crisis in cost and coverage will draw on experience from the debates on comprehensive and incremental reform over the past decade. In addition, we will explore the politics and policies of other health and science issues. Students will be expected to attend every class and be actively involved in class discussions. There will be two examinations, one at mid-term and a final based on readings and course discussions.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 637. Microeconomics for Public Policy. 3 Credit Hours.
Describes and explains principles and theories of microeconomics in the context of public policy applications.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 641. Philosophy of Law. 3 Credit Hours.
Case-based study of jurisprudence designed to illuminate and explain philosophies of law. Examination of theories of free expression; bio-ethical matters; theories of punishment and legal responsibility; and the placement of religious discourses in liberal systems of law. Special attention to cases involving fundamental rights and liberties; the role of the individual and the state in civil society; and the capacities of individuals to be legally competent in contemporary systems of law.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 644. Chinese Foreign Policy. 3 Credit Hours.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 645. Environmental Policy Making. 3 Credit Hours.
Examination of different ethical approaches to the environment; the federal government's management of natural resources; selected environmental policies; international environmental policy issues. Topics include federal management of national grazing lands, national forests, and minerals in the public domain. Analyzes environmental policies such as air, water, toxic wastes, energy, and environmentally-related issues in international trade and national security.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

POL 646. Public Policy Process and Implementation. 3 Credit Hours.
Examination of public policy issue areas including education, health, welfare, urban mass transit. Limits to effectiveness of federal, state and local governments in providing services. Techniques for analyzing the effectiveness of public policies; research techniques for the assessment of future policy alternatives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 647. Human Resource Management in Public Service. 3 Credit Hours.
Topics include human resource management in public service: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, manpower planning and job anti-discrimination legislation are considered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 648. Civic Participation and Democracy. 3 Credit Hours.
Citizens participate in the governing process by communicating their preferences and pressuring the government to respond. In this course we examine these various mechanisms of "civic participation", and discuss the meaning and consequences of participatory democracy. The course focuses on the contemporary United States, but we will devote some time to discuss civic participation in other countries as well.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 649. Energy Policy: Technology, Politics, and Society. 3 Credit Hours.
An interdisciplinary introduction to energy policy, focusing on studying three major and interrelated themes from a comparative perspective: technology, politics, and society. Covers energy policy examples from the United States, the European Union, China, India, and other countries.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 650. Advanced Seminar On American Politics. 3 Credit Hours.
This seminar provides students with a survey of significant research on major topics in American Politics. We will read influential works of the past, as well as recent cutting-edge research. Particular attention will be paid to discussing the methods and theories used in the research we will read. The purpose of the course is to acquaint students with the literature on American Politics, while also providing an opportunity for students to develop skills in critically assessing and skillfully conducting social science research.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 651. Productivity in the Public and Non-Profit Sectors. 3 Credit Hours.
Definitions and measures of productivity. Evaluation of government programs, and methods of productivity improvement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 652. Total Quality Public Service Management: Achieving High Performance Government. 3 Credit Hours.
Examination of the theory and practice of Total Quality Management (TQM) in the government and non-profit sector. Focuses on budgetary, customer service, employee and process improvements that facilitate increased public and non-profit performance. Special emphasis to TQM’s contribution to improved service delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 653. The Environmental Movement: Groups, Beliefs and Values. 3 Credit Hours.
Exploration of the origins and political impact of environmentalism in the United States and, to a lesser extent, in the global context. Impact of democratic participation on environmental politics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 654. Politics and Ethics. 3 Credit Hours.
Personal, professional, organizational, and societal levels of ethical analysis. Ethical theories will be reviewed and applied to actual cases that focus on public policy and/or the officials who create and implement it. Profiles of moral exemplars in public life will be examined.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 655. Public Policy and Health. 3 Credit Hours.
Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

POL 656. Public Service Internship. 3-6 Credit Hours.
Individual on-the-job work experience; arranged and monitored by a faculty member.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 657. Ethical and Managerial Issues in Government, Business and Non-Profit Organization.. 3 Credit Hours.
Governments at all levels in this country—national (Larry Craig, David Vitter, Mark Foley, Bill Clinton, Randy Cunningham, Tom DeLay, William Jefferson, James Traficant, Robert Torricelli, Jack Abramoff), state (former Illinois, Louisiana, New York, Ohio, and Arizona governors), and local (Miami, Providence city officials; Miami-Dade, Broward, and Palm Beach counties)—have encountered scandals involving ethical wrongdoing. Businesses (Enron, Worldcom) and nonprofit organizations (Boy Scouts, United Way) have faced similar problems. Countless less visible examples of unethical and ethical behavior occur in organizations daily. This course examines the causes and consequences of such actions and the managerial strategies and competencies needed to effectively cope with the ethical issues confronting individuals and organizations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
POL 658. From Electronic Government to Digital Governance. 3 Credit Hours.
Graduate and advanced undergraduate seminar explores the transition from electronic government (e-gov) to digital or d-governance, emphasizing political participation, citizen-centric public administration and the proliferation of global information technologies and social media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

POL 659. International Organizations. 3 Credit Hours.
Examines international organizations which, in addition to contributing to the solution of international problems, also help to provide rules and structures to manage state-to-state relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 661. Ending Wars and Building Peace. 3 Credit Hours.
Examines how local and international actors build sustainable peace strategically through peace-keeping, peace accords, reconciliation, education, human rights, international law, and state-building.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 669. LGBTI Politics. 3 Credit Hours.
Describes and explains global variance in government policies of interest to lesbian, gay, bisexual, transgender and intersex citizens including sodomy laws, anti-discrimination ordinances, same-sex marriage and adoption, military service, and the right to change one's sex or identify as neither male nor female.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 670. Uniting States in International Perspective. 3 Credit Hours.
How states form and fragment; the main actors in nation formation; the elements of continuity and change; the impact outsiders can have on the process.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 671. Government and Business. 3 Credit Hours.
Examines government-business-society relations with emphasis on the social, economic, political, technological, ethical, and ecological environment.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 672. Program Planning, Research and Evaluation in Criminal Justice and Corrections, I. 3 Credit Hours.
Identification of long-term goals and intermediate objectives in the criminal justice process. Formulation of operations, evaluation techniques and the relationships among research, evaluation and management decisions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 673. Program Planning, Research and Evaluation in Criminal Justice and Corrections, II. 3 Credit Hours.
Continuation of POL 672. Topics include types of evaluation and the design of evaluative studies. POL 672 and POL 673 are designed to facilitate the formulation and execution of a thesis.
Prerequisite: POL 672.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 675. The Politics of Civil- Military Relations. 3 Credit Hours.
Course examines the relationship between states and their soldiers across various historical periods and regional contexts, and how this relationship has been altered in an era where the viability of old structures of state authority are no longer self-evident.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 676. On Violence: The Politics of Extremes. 3 Credit Hours.
Literary and theoretical treatments are considered for what they can tell us about the causes, characteristics and consequences of violence. These insights are enlisted to help us understand violence enacted by states against their societies, societies against states, and within society itself.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 677. Security in South Asia. 3 Credit Hours.
The security system of South Asia's northern reaches and the current conflict involving Afghanistan, Pakistan, and India: considerations of sovereignty and the role of frontiers in world politics.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 678. Energy and Security in Eurasia. 3 Credit Hours.
Engages intersection of energy and security within the contested space of Eurasia.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 680. Ethnicity, Nationalism, and Secession. 3 Credit Hours.
Examination of the creation, breakdown, and aftermath of communist governments in Eastern Europe and the Soviet Union. Using empirical evidence from four case studies, develops a theoretical framework for understanding cross-national patterns of post-communist development in the context of country specific experiences.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 681. Comparative Political Economy of Post-Industrial Democracies. 3 Credit Hours.
This seminar examines four key turning points in the development of capitalism: the industrial revolution, the aftermath of the depression and world wars, the oil crisis of the 1970's, and today's "globalization". We will compare the relationships between government and the economy in Western Europe, Canada, the U.S., Australia, New Zealand, and Japan in each period, and attempt to evaluate why these countries react similarly or differently to identical changes in world economy.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 682. Political Economy of Development. 3 Credit Hours.
Overview of the principal theoretical paradigms of the development process Comparative analysis of issues such as the role of the state, strategies of industrialization, changes in social structure, basic needs and the trade-offs between growth and equity.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 683. Seminar: Topics in the Comparative Study of the Foreign Policy of China. 3 Credit Hours.
Upon completion of this course students should be able to describe the theories that have been used to analyze Chinese politics, their strengths and weaknesses, be familiar with the tension between communist ideology and modernization, outline the PRC's party and government structure and the informal deviations thereof, assess economic progress and the difficulties ahead, be aware of the roles on interest groups such as the military, labor, ethnic minorities, and non-governmental organizations in influencing policy formation, describe the social welfare system, and evaluate the ability of the system as a whole to withstand external and internal pressures.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
POL 684. Contemporary Latin American Politics. 3 Credit Hours.
This course assumes a basic knowledge of Latin American politics, and is designed to foster deeper understanding of political processes in the region and to provide an overview of key debates among political scientists specializing in Latin America. We discuss issues related to democratic consolidation, political participation, representation and governance.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 685. Seminar in the Dynamics of Soviet Society. 3 Credit Hours.
Forces and factors that shape and continue to influence the development of social, political and economic institutions in the Former Soviet Union and their evolving role in decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 686. Conflict in the Middle East and Africa. 3 Credit Hours.
Introduction to major paradigms for the explanation of war and conflict in two of the most unstable regions of the world. Reading and class discussions on select cases of current and past conflicts in each region in order to discern patterns of conflict within and across regions, gain a clearer understanding of what drives violent conflict, and assess strategies of resolution.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 687. Illicit Trade in the Global Economy. 3 Credit Hours.
Examines the rise of illicit trade, the actors and groups involved, and international and national attempts to stop it.
Components: DIS.
Grading: GRD.

POL 688. Politics in China. 3 Credit Hours.
Development and nature of Chinese domestic politics in theory and practice; problems of political stability and conflict; the role of historical and cultural traditions, institutions, social, economic and personality factors in Chinese politics; process of change and problems of leadership succession; the significance of changes in the character and style of Chinese leadership.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 689. Directed Research. 1-3 Credit Hours.
An opportunity for graduate students to assist faculty members with research for course credit. A student may only sign up if s/he has found a professor who has agreed to work with him/her.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 690. Directed Readings. 3 Credit Hours.
Provides an opportunity for students to organize an independent study with a particular tenure-line faculty member. A student may only sign up if s/he has found a professor who has agreed to work with him/her.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 691. International Security. 3 Credit Hours.
Analysis and evaluation of approaches to international conflict, resolution, reduction and stabilization such as international organization, law, collective security, balance of power, functionalism, world government, morality, and conscience. Special emphasis on recent problems and efforts at institutionalizing social control.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
POL 692. International Political Economy. 3 Credit Hours.
This course introduces students to the study of International Political Economy (IPE). It combines a focus on the main theoretical and methodological approaches used in the study of IPE with the analysis of historical and contemporary issues.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 693. International Relations of the Middle East. 3 Credit Hours.
Regional and inter-regional analysis of the foreign relations of Middle Eastern nations, domestic and geopolitical factors.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 694. European Security. 3 Credit Hours.
Examines regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy and related issues.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 695. Special Topics in Political Theory and Methods. 1-3 Credit Hours.
A seminar in Political Theory and Methods; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

POL 696. Special Topics in Public Administration, Policy, and Law. 1-3 Credit Hours.
A seminar in public policy, administration and law; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

POL 697. Special Topics in International Relations. 3 Credit Hours.
A seminar in international relations; designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion and analysis. The senior seminars may be taken in any sequence.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 698. Special Topic in American Politics. 3 Credit Hours.
A graduate seminar in American Politics designed to give the student a greater degree of insight and knowledge of a particular subject and to develop ability in the techniques of individual research, group discussion, and analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 699. Directed Readings. 1-3 Credit Hours.
Substantive topics vary by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

POL 810. Master's Thesis. 3-6 Credit Hours.
Designed for student working on masters’ theses. Not to exceed six credit hours, as determined by student’s advisor. Credit is not awarded until the thesis has been accepted.
POL 810 MPA Program.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
POL 820. Research in Residence. 1 Credit Hour.
Research in residence for thesis or master's degree after the student has enrolled for the permissible cumulative total in POL 710 (usually six credits). Credit not granted; regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

Certificate in Public Administration
Overview
The Certificate in Public Administration is available in both the traditional and online platform. The program is available to a student wishing to earn just a certificate or to a student who wants to earn a spot in the master's of Public Administration program but does not meet the admission criteria. The Certificate requires the completion of any six of the core MPA courses with a grade of B or higher in all six courses (see MPA course listing (p. 1846)). Students who successfully earn a B or higher in all six core courses are then eligible to enroll in the Masters in Public Administration program.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

J.D./M.P.A. Joint Degree Program

The joint degree program allows students to obtain both JD and MPA degrees in four years. The program is designed to prepare law school students for government, political and nonprofit legal positions. The first year is spent in the Law School and years two through four are spent taking both Law and MPA courses.

To be admitted to this program, students must apply separately to both programs. Students may apply to the MPA program prior to beginning law school or anytime during the first or second year of law school. Students may begin the MPA program in the fall, spring or summer semesters. For further information contact the Department of Political Science at 305-284-2401 or the Law School at 305-284-5535.

M.A.I.A/M.P.A. Joint Degree Program

Overview

The Dual MPA/MAIA degree requires a total of 60 credits. Students are able to count 9 credits of coursework toward both programs, allowing them to complete the dual degree in 2.5 years.

Students in the MAIA/MPA Dual Degree program must be admitted to both the MAIA and MPA programs.

MAIA Admissions

The Master of Arts in International Administration (MAIA) program accepts rolling admissions. Interested students may apply to the program at any time.

- Online Application
  - Please complete the online application by clicking here (https://www.applyweb.com/miamigrd/).

- Application Fee
  - An $85.00 non-refundable application fee is paid online upon submission of the application.

- Statement of Purpose
  - The statement of purpose is the most important element of your application packet. This letter needs to reflect who you are, your goals and why you would be an asset to the MAIA program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before you submit.

  Below is a link to help you get started:

  OWL Statement of Purpose Guidelines (https://owl.purdue.edu/owl/purdue_owl.html).

- Letters of Recommendation
• Three letters of recommendation must be provided. One letter should be from a faculty member. Two letters should be from an employer, colleague, or other professional source.

• Official Transcripts
  • You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.

• Resume
  • Please provide a copy of your resume if it is available.

• Admissions Interview
  • The admissions interview may be conducted in person, over the phone, or via video conference.

• Grade Point Average (GPA)
  • A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.

• Official TOEFL (or IELTS) Score
  • All international students are required to take this exam in order to demonstrate sufficient English competency. The "Test Of English As A Foreign Language (TOEFL)" exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT; a score of 80 is required for the IBT.
  • Students may also take the "International English Language Testing System (IELTS)" exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.
  • All international students must provide a copy of their results on either exam.
  • International students from countries whose primary language is English are not required to take this exam.

**MPA Admission Requirements**

• In cooperation with the College of Arts and Science, the Department of Political Science, the Graduate Program will review applicant files and make admissions decisions.

  Requirements for Admission Include:

  • Completion of an application
  
  • A baccalaureate degree from an accredited institution
  
  • A cumulative undergraduate GPA of 3.0. (In order to limit class size for maximum teacher-student exchange, the MPP program will give preference to students with above average GRE scores, excellent letters of recommendation, and superior writing skills).
  
  • GRE minimum combined score (verbal and quantitative) set by the Graduate School. The Graduate School has occasionally provided waivers for exceptional cases.
  
  • Two letters of recommendation

MPA REQUIREMENTS

MPA Core Courses

POL 601 Budget and Financial Management and Administration 3
POL 606 Organizational Dynamics and Management 3
POL 610 Statistics for Politics and Public Administration 3
POL 622 Introduction to Graduate Public Administration 3
POL 646 Public Policy Process and Implementation 3
POL 647 Human Resource Management in Public Service 3
POL 651 Productivity in the Public and Non-Profit Sectors 3
POL 671 Government and Business 3

MPA Specialized Courses (9 of these credits are in fulfillment of both degrees) 12

Students select an additional four courses from those listed below, with at least one course from each of the subfields:

Organizational Management and Leadership:

POL 619 Introduction to Game Theory for Political Science
POL 624 Non-Profit Organizations: Law, Policy, and Management
POL 652 Total Quality Public Service Management: Achieving High Performance Government

POL 654 Politics and Ethics
POL 696 Special Topics in Public Administration, Policy, and Law

Topic: Organizational Security Management
Topic: Ending War and Building Peace

Equity, Ethics, and Legal Issues in Public Administration

POL 626 Administrative Law
POL 657 Ethical and Managerial Issues in Government, Business and Non-Profit Organization.

POL 696 Special Topics in Public Administration, Policy, and Law

Topic: Equity and Diversity in Public Administration
Topic: Issues in Judicial Politics

Issues in Public Policy and Administration

POL 625 Comparative Public Policy and Administration
POL 634 Applied Policy Analysis

POL 658 From Electronic Government to Digital Governance
POL 696 Special Topics in Public Administration, Policy, and Law

Topic: Bureaucratic Politics
Topic: Money, Power, and Politics in American Cities

MPA Internship

POL 656 Public Service Internship 3

Total Credit Hours 60

Sample Plan of Study

Students may complete the requirements for the MAIA and MPA degrees consecutively or in succession.

Applicants must be admitted into the MAIA and MPA programs on a separate basis, based on the admissions requirements and procedure of each individual program. Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program.

Average Program Duration: 2.5 years

All other requirements as stated in sections Requirements for the Master of Arts Degree and General Information.

Mission
The Masters of Public Administration program seeks to provide the highest quality graduate education for current and prospective public service officials in government and nonprofit organizations. The program strives to achieve local, state and national prominence through a contemporary curriculum, innovative instruction, scholarly and applied research, and service to key stakeholders. Program activities are designed to develop and enhance management skills essential to public and nonprofit organizations oriented towards a diverse metropolitan environment.

Goals
Student Learning Outcomes
- Students should be able to demonstrate critical analytical and writing skills related to public policy and administration by the time they graduate.
- Students will demonstrate oral communication skills.
- Students will demonstrate analytical competencies acquired through internships.

M.P.A. Online
The MPA program is designed to provide students with a comprehensive and holistic understanding of what you will need to be an effective public service leader. Students will explore the most critical areas of public administration, planning and financial budgeting, political analysis and personnel administration as well as contemporary issues in Ethics, Digital Governance, NGOs and Global Governance. Assignment examples include practice in management consulting, policy making and democratic input.

Influence the future of your community. A Master's degree in Public Administration from the University Miami gives you access to a rewarding career in Public Service. According to the Bureau of Labor Statistics, this is a growing field with the number of new government jobs predicted to increase by 1.4 million over the next ten years. Visit our website for more information. (http://miami.edu/online/programs/masters-in-public-administration/)

Total Credit Hours 36

1 POL 696 may be taken multiple times for credit. Students may also take an appropriate elective in lieu of retaking POL 696.

Mission
The Masters of Public Administration program seeks to provide the highest quality graduate education for current and prospective public service officials in government and nonprofit organizations. The program strives to achieve local, state and national prominence through a contemporary curriculum, innovative instruction, scholarly and applied research, and service to key stakeholders. Program activities are designed to develop and enhance management skills essential to public and nonprofit organizations oriented towards a diverse metropolitan environment.
Goals
Student Learning Outcomes
• Students should be able to demonstrate critical analytical and writing skills related to public policy and administration by the time they graduate.
• Students will demonstrate oral communication skills.
• Students will demonstrate analytical competencies acquired through internships.

M.P.A./M.P.H. Second Master's Degree in Public Health

Master of Public Administration Joint Degree (MPA/MPH)
The Master of Public Administration/ Master in Public Health (MPA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. The joint degree is designed for students who seek an in-depth knowledge of public health with training in management and public policy administration. Students may complete the requirements for the MPA and MPH degrees consecutively or in succession.

Applicants must be admitted into the MPH and MPA programs on a separate basis, based on the admissions requirements and procedure of each individual program. Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program.

Average Program Duration: 2.5 years
Number of required credits: 66

Admission Requirements
- Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MPH/MPA joint degree must apply to both, the Department of Public Health Sciences MPH program and to the College of Arts & Sciences MPA program separately.

- Transcripts – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- Standardized Test Scores - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- English Proficiency Exam - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- Resume/Curriculum Vitae – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- Statement of Purpose/Personal Statement – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- Letters of Recommendation – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatetstudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

### M.P.P. Master of Public Policy

#### Overview

The Master of Public Policy (MPP) is a graduate professional degree proposed by the Department of Political Science in the College of Arts & Sciences. In contrast to the existing Master of Public Administration (MPA) degree, the MPP degree has a deeper focus on the development and effects of public policy, the use of quantitative analysis, the role of economic factors in public decision making, resource allocation, and decision modeling. Building on the successful curriculum of the online and on campus MPA program, adding the MPP degree to the Department of Political Science's catalog continues to propel us into the ranks of preeminence among peer institutions that also offer both MPA and MPP degrees. Success of the MPP program requires collaboration between the Department of Political Science, other disciplines with a stake in public policy, and the College of Arts and Sciences to ensure
that current resources are used effectively, existing strengths of the university and its faculty are built upon, and faculty are strategically added to develop a MPP program fitting for a hemispheric university.

**Admission Requirements**

In cooperation with the College of Arts and Science, the Department of Political Science, the Graduate Program will review applicant files and make admissions decisions.

**Requirements for Admission Include:**

- Completion of an application
- A baccalaureate degree from an accredited institution
- A cumulative undergraduate GPA of 3.0. (In order to limit class size for maximum teacher-student exchange, the MPP program will give preference to students with above average GRE scores, excellent letters of recommendation, and superior writing skills).
- GRE minimum combined score (verbal and quantitative) set by the Graduate School. The Graduate School has occasionally provided waivers for exceptional cases.
- Two letters of recommendation

Students must complete one of the tracks below.

**Public Management and Leadership Track**

Complete 15 credits from these options:

- COS 630 Conflict Management
- POL 606 Organizational Dynamics and Management
- POL 624 Non-Profit Organizations: Law, Policy, and Management
- POL 647 Human Resource Management in Public Service
- POL 651 Productivity in the Public and Non-Profit Sectors
- POL 657 Ethical and Managerial Issues in Government, Business and Non-Profit Organization.
- POL 658 From Electronic Government to Digital Governance
- POL 659 International Organizations
- STC 623 Crisis Communication and Management
- STC 620 Public Relations Fundamentals

**Analytics Track**

Complete 15 credits from these options:

- GEG 691 Geographic Information Systems I
- GEG 693 Geographic Information Systems II
- POL 616 Experiments in Political Science
- POL 617 Introductory Statistical Methods in Political Science
- POL 618 Advanced Statistical Methods in Political Science
- POL 619 Introduction to Game Theory for Political Science (Cost Benefit Analysis and Public Policy)
SOC 613  Qualitative Research Methods

Cost-Benefit Analysis and Public Policy (New Course TBD)

**Foreign Policy and Security Track**

Complete 15 credits from these options:

- POL 611  Security in the Arabian Peninsula
- POL 630  Intelligence and National Security
- POL 644  Chinese Foreign Policy
- POL 677  Security in South Asia
- POL 691  International Security
- POL 693  International Relations of the Middle East
- POL 694  European Security
- IGS 645  Human Security: Prevention Mitigation
- IGS 646  Civil Security Management

Global Trade (New Course TBD)

**Health and Social Policy Track**

Complete 15 credits from these options:

- ACC 670  Financial Reporting and Analysis
- HMP 601  Essentials of Health Care Administration
- HMP 655  Public Policy and Health
- HMP 684  Analysis of Health Care Delivery and Policy
- INS 672  Global Health Policy and Ethics
- POL 605  Sex, Babies, and the State
- POL 655  Public Policy and Health
- POL 669  LGBTI Politics
- POL 682  Political Economy of Development

**Environmental and Sustainability Track**

Complete 15 credits from these options:

- IGS 644  Energy Security and Environmental Sustainability
- MES 616  Ocean Policy and Development and Analysis
- MES 620  Environmental Law and Policy
- MES 720  Coastal Law and Policy
- POL 631  Global Environment Politics
- POL 645  Environmental Policy Making
- POL 653  The Environmental Movement: Groups, Beliefs and Values
- RSM 620  Climate and Society

**Individualized Track**

Complete 15 credit hours with approval of faculty advisor.

**Approved Electives**

- POL 656  Public Service Internship (or Applied Project)

Additional electives with approval of faculty advisor

**Total Credit Hours**

- 36 to 48 hours at the graduate level, depending on public policy experience and academic preparation

**Completion of core and specialization track course requirements as specified by the POL Department in consultation with student's career goals and interests**

***All other requirements as stated in sections Requirements for the Master of Arts degree and General Information."

• 36 to 48 hours at the graduate level, depending on public policy experience and academic preparation

** Completion of core and specialization track course requirements as specified by the POL Department in consultation with student's career goals and interests

*** All other requirements as stated in sections Requirements for the Master of Arts degree and General Information.

### Mission

The Masters of Public Policy (MPP) is a professional degree that provides students with core skills in economics, policy analysis and ethics. The program seeks to build professional competencies in research, analysis and evaluation of various public issues (e.g., social, global, economic, health) to enable formulation of effective policy solutions. The focus is on the development and use of quantitative analysis skills to assess public policy alternatives, while also developing and enhancing proficiency in management and the implementation process.

### Goals

The MPP degree stresses the research, analysis and evaluation of various public issues (e.g., social, global, economic, health) to develop effective policy solutions. In general, MPP programs give great attention to policy formulation, analysis and evaluation.

### Student Learning Outcomes

- Students should be able to demonstrate critical thinking and writing skills related to public policy, politics, ethics and economic analysis by the time they graduate
- Students will demonstrate quantitative analysis and oral communication skills
- Students will demonstrate analytical competencies through an internship or applied capstone project

Dept. Code: PSY

Complete details about the Psychology Graduate Program, including description of our three graduate divisions (Adult, Child, and Health), faculty research interests, and admission requirements, can be found at our website listed above.

Master of Science in Applied Behavior Analysis

- MS in Psychology- Applied Behavior Analysis (p. 1865)

Doctoral Program in Psychology

- Ph.D. in Psychology (p. 1866)

PSY 601. Issues in Professional Development and Research. 1 Credit Hour.
Seminar addressing issues such as structure of academic systems and progress through them, time management, library search systems, professional journals, how to structure curriculum vitae, procedures and rules in human subject research, professional meetings and presentations, extramural funding opportunities, professional writing style, ethical issues.
Requisite: Plan of Graduate Psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 602. Scientific writing and grantsmanship. 3 Credit Hours.
Writing and organizational skills for professional development in social and behavioral sciences. Mechanism of extramural funding and grant review, including grantsmanship.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 603. Neuroanatomy. 3 Credit Hours.
Functional neuroanatomy for individuals engaged in basic neuroscience and psychological research. Gross anatomy, identification of pathways and circuits, and physiological functions of neuroanatomical systems. Clinical examples and case histories of neuroanatomical disorders. Laboratory exercises including brain dissections, examination of brain models and atlases, and internet neuroanatomy websites.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 604. Cognition and Emotion. 3 Credit Hours.
Study of basic cognitive processes of attention and memory, the function of emotions, and the role of cognitive mechanisms in the processing of affective information.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 605. Cognitive Neuroscience. 3 Credit Hours.
Brain mechanisms in cognition and behavior, including sensory encoding and perception, attention, motivation, emotion, learning/memory, language, executive functions, and mental disorders.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 606. Biobehavioral Processes and Disease in Health Psychology. 3 Credit Hours.
Discussion of basic processes of central nervous system, cardiovascular, endocrine, immune and other biological systems in the context of behavioral medicine, psychoneuroimmunology, and health psychology research.
Prerequisite: PSY 610.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PSY 609. Psychopharmacology. 3 Credit Hours.
Basic methods and current issues in psychopharmacology.
Prerequisite: PSY 605.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 610. Behavioral Medicine: Overview of Basic Science, Public Health, and Clinical Trial Approaches. 3 Credit Hours.
Overview of biobehavioral, psychosocial and sociocultural factors in pathogenesis, prevention and treatment of physical disorders.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 613. Psychoneuroimmunology. 3 Credit Hours.
Structural and functional aspects of the immune system that are sensitive to neural and psychological processes. Interactions between the nervous and immune systems are examined in relation to empirical associations between psychological factors (i.e., stress) and immune-mediated processes in diseases such as cancer and AIDS.
Prerequisite: PSY 605.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 614. Diversity issues in psychology. 3 Credit Hours.
Overview of diversity issues including race, religion, gender, age, sexual orientation, physical disability and socioeconomic status as they relate to psychological research and clinical practice.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 615. Foundations of neuropsychology. 3 Credit Hours.
Mechanisms of neurological and psychiatric disorders, including developmental disorders, dementia, aphasia, amnesia, stroke, traumatic brain injury, and loss of general intelligence. Clinical tools for neuropsychological assessment, forensics, and genetic screening.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 616. Biobehavioral Processes and Clinical Research Applications in Health Psychology. 3 Credit Hours.
Conduct of clinical research and examination of biobehavioral processes in health psychology. Lectures, readings and assignments deal with clinical research involving pathology, assessment and intervention-based functions with applications focused on health and disease conceptualized at multiple levels of prevention.
Prerequisite: PSY 606 and PSY 610.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 620. Advanced Developmental Psychology. 3 Credit Hours.
Mechanisms underlying continuity and change over the lifespan. Topics include developmental theories and methods; specific domains of development (perceptual, cognitive, social/emotional); socialization processes; and emerging adulthood, parenting, and aging.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 621. Theories of Development. 3 Credit Hours.
Theoretical aspects of psychological development throughout the life span.
Prerequisite: PSY 620.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 622. Cognitive Development. 3 Credit Hours.
Theories of cognitive development across infancy, childhood, and adolescence. Topics include measurement approaches, normative development, individual differences, etiological factors and contextual influences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PSY 623. Language Development. 3 Credit Hours.
The study of language acquisition, primarily focusing on infancy through 5 years. Topics covered include biological bases of language, sound discrimination abilities, babbling and speech production, word learning, acquisition of grammar, bilingualism, and development in atypical populations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 624. Social Development. 3 Credit Hours.
The theoretical and empirical literature on typical and atypical social development—including emotional development and social cognition—in infants, children, and adolescents. Topics include measurement approaches, individuals differences and contextual influences.
Prerequisite: PSY 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 625. Social Psychology. 3 Credit Hours.
The major substantive areas and theories of social psychology. Emphasis on applications to students’ own research field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 631. Psychological Statistics, Research Methods, and Design. 3 Credit Hours.
Statistics for experimental design with uncorrelated independent variables. Review of t-tests; designs and applications of analysis of variance; including one-way, factorial, repeated-measures, and mixed designs; post hoc comparisons among means.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 632. Multiple Regression. 3 Credit Hours.
Analysis of the general linear model. Computer application of these techniques to the behavioral sciences. Design and measurement considerations.
Prerequisite: PSY 631.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 633. Structural Equation Modeling. 3 Credit Hours.
Structural models, path analysis, measurement models, and confirmatory factor analysis, particularly related to hypotheses about causal relations, change over time, and comparisons across diverse populations.
Prerequisite: PSY 632.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 634. Multilevel Modeling. 3 Credit Hours.
Multi-level modeling of nested and non-independent data. Application of multilevel modeling to social science and behavioral data, including computer laboratory exercises.
Prerequisite: PSY 632.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 636. Research Methods with Children and Adolescents. 3 Credit Hours.
Concepts and research design approaches for the measurement and analysis of data across developmental stages from infancy through adolescence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 638. Psychology of Infant Development. 3 Credit Hours.
Theory, research, and methodology pertaining to psychological development in the first three years of life. Emphasis on both general developmental processes, and individual differences in cognitive, social, and emotional development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PSY 639. Autism and Developmental Disabilities. 3 Credit Hours.
Developmental disabilities with an emphasis on autism. Biological, social, cognitive and emotional concomitants. History, etiology, assessment, and individual differences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 640. Adult Psychopathology. 3 Credit Hours.
Theories, models, history, and research relevant to various patterns of problematic behavior, with a focus on adults. The influences of family systems as well as cultural and other diversity factors (e.g., ethnicity, sexual orientation) are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 641. Child and Adolescent Psychopathology. 3 Credit Hours.
Theories, models, and research relevant to the development and the course of behavioral disorders and other problems (e.g., maltreatment, exposure to violence and poverty) that emerge in childhood and adolescence. The influences of family and peer systems as well as cultural and other diversity factors (e.g., ethnicity, sexual orientation) are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 642. Advanced Adult Psychopathology. 3 Credit Hours.
Theory and research on risk factors and etiological models of mental disorders. Socioenvironmental (cultural, social support, life events), psychological (temperament, cognitive biases), and biological (genes, neurotransmitters) models of risk, research methodology, and design are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 643. Behavioral Medicine and Developmental Disabilities. 3 Credit Hours.
Processes influencing diagnosis and management of developmental disabilities: genetics, embryology/fetology, physical growth and development, nutrition, hearing and speech pathology, family dynamics, cognition and psycho-educational assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 645. Introduction to Psychological Evaluation. 3 Credit Hours.
Measurement theory; introduction to the administration and interpretation of widely-used intelligence and personality tests, with attention to issues of ethics and diversity.
Requisite: Plan of Graduate Psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 646. Psychological Evaluation of Adults. 3 Credit Hours.
Administration, interpretation, and psychometric evaluation of psychological tools and procedures used in the evaluation of adult psychopathology. Attention to issues of ethics and diversity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 647. Psychological Evaluation of Children and Families. 3 Credit Hours.
Administration, interpretation, and psychometric evaluation of psychological tools and procedures used in the evaluation of children, adolescents, and families. Attention to issues of ethics and diversity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 648. Psychological Evaluation in Physical Disorders. 3 Credit Hours.
Administration, interpretation, and psychometric evaluation of psychological tools and procedures used in the evaluation of physical disorders. Attention to issues of ethics and diversity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PSY 650. Laboratory in Clinical Psychology. 0 Credit Hours.
Practical training in clinical skills such as assessment, interviewing, and case conceptualization. Laboratory to be used in conjunction with courses such as PSY 640 and PSY 645
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 655. Evolution and Sex. 3 Credit Hours.
A biological/evolutionary approach to the study of human sexuality and cognition. The evolution of sexual reproduction and the evolution of the two sexes. Initial discussions will introduce the theory of evolution by natural selection and address the different levels at which selection operates. Building on this foundation, the class will focus on why sex evolved and the myriad physiological and psychological adaptations that evolved as a consequence. Topics to be covered include sexual selection, mate selection, pregnancy, and parent-offspring conflict.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 656. Introduction to Evidence-Based Psychological Treatments. 3 Credit Hours.
Theories, history, and techniques of psychological and behavioral therapies, with emphasis on evidence-based approaches.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 657. Introduction to Psychotherapy, Ethics, and Professional Issues. 3 Credit Hours.
Introductory experience in clinical interviewing, therapeutic communication, ethics, and case conceptualization. Consideration of client-and-therapist culture, gender, and diversity are also emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 660. Evidence-Based Psychological Intervention with Children and Families. 3 Credit Hours.
Theories, history, and techniques of psychological and behavioral therapies, with emphasis on evidence-based approaches with children, adolescents, and families. Understanding normative and deviant development, with attention to issues of diversity, ethics, and domestic violence.
Prerequisite: PSY 656.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 661. Interventions in Pediatric Psychology. 3 Credit Hours.
Pediatric psychology and basic learning theory. Medical and behavioral aspects of child and adolescent health disorders, psychological assessment, and evidence-based treatment approaches.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 662. Health Psychology Interventions. 3 Credit Hours.
Clinical interventions and research relevant to health problems and lifestyle, with emphasis on critical evaluations of past research and the design and implementation of intervention protocols. The origins of health psychology and the role of the health psychologist in medical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 663. Measurement in Applied Behavior Analysis. 3 Credit Hours.
A graduate-level 45-hour course that covers aspects of behavior analysis related to strategies and tactics of behavioral assessment, measurement, data display, and investigational design. In addition to covering task-list items related to measurement and single-case design in behavior analysis practice; we will read select articles from the Journal of Applied Behavior Analysis covering a variety of applications of behavioral principles. We will read from a selection of seminal articles in behavior analysis and current, contemporary research. We will evaluate the measurement and design strategies employed in the articles.
Prerequisite: PSY 666. And must pass with a GPA 3.2.
Components: DIS.
Grading: GRD.
Typically Offered: Spring.
PSY 664. Ethics and Professional Conduct in Behavior Analysis. 3 Credit Hours.
This course provides an overview of ethics and professional conduct in the field of behavior analysis. The course will provide in-depth information on the BACB Professional and Ethical Compliance Code for Behavior Analysts. The course will cover professional issues related to responsible conduct of behavior analysts, behavior analysts' ethical responsibility to clients and colleagues, including issues related to assessment of behavior, development and implementation of behavior change programs, clinical supervision and mentoring, the profession of behavior analysis and the BACB, and the conducting and reporting of research. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 30 instructional hours in the area of Ethical and Professional Conduct, 5 hours in the area of Intervention and Behavior Change Consideration, 5 hours in the area of Measurement, 15 hours in the area of Experimental Design and 15 hours in the area of discretionary.
Requisite: PSY 666. And must pass with a GPA 3.2.
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

PSY 665. Advanced Topics in Applied Behavior Analysis. 3 Credit Hours.
This course covers a number of advanced research and clinical issues relevant to the field of applied behavior analysis, including, particularly as they relate to the field of developmental disabilities. The course will provide in-depth information related to the selection of appropriate interventions, including staying abreast of current research, critically interpreting research, considering individual client needs and developing treatment programs that are consistent with the science of applied behavior analysis. The course will additionally cover issues related to the implementation and management of clinical service provisions, including ensuring appropriate and accurate data collection, maintaining procedural fidelity and providing supervision and training. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 15 instructional hours in the area of Measurement, 15 hours in the area of Experimental Design and 15 hours in the area of discretion.
Requisite: PSY 666. And must pass with a GPA 3.2.
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

PSY 666. Concepts and Principles of Applied Behavior Analysis. 3 Credit Hours.
This course provides an introduction to Applied Behavior Analysis (ABA), which is the clinical application of behavioral science and learning theory towards the treatment of problematic behavioral and behavioral deficits. In this course, students will become familiar with the scientific foundations of behavioral science and the basic concepts and principles of behavior analysis. The course will emphasize terminology and definitions of behavioral concepts, as well as introduce the application of those concepts across a range of clinical scenarios. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 45 instructional hours in the area of Concepts and Principals of Behavior Analysis.
Requisite: PSY 666 OR PSY 676 OR PSY 677 AND Bachelor's degree AND GPS>=3.2.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 667. Assessment and Treatment of Language Learning. 3 Credit Hours.
This course focuses on the application of behavior analysis towards the treatment of individuals exhibiting behavioral deficits or developmental delays. Throughout this course, students will acquire in-depth knowledge of behavioral analytic approaches for promoting the development of new skills and for supporting and maintaining those skills over time. Students will learn to prioritize target behaviors for clinical intervention as well as how to use applied behavior analytic techniques and procedures to develop effective treatment plans. Clinical and professional issues (e.g., fidelity of implementation, monitoring effectiveness) will also be discussed. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 10 instructional hours in the area of Identification of the Problem and Assessment, 30 instructional hours in the area of Fundamental Elements of Behavior Change and Specific Behavior Change Procedures, and 5 instructional hours in the area of Behavior Change Systems.
Requisite: PSY 666 OR PSY 676 OR PSY 677 AND Bachelor's degree AND GPS>=3.2.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 668. Functional Assessment and Function-Based Treatment. 3 Credit Hours.
This course will focus on the application of behavior analysis toward the treatment of aberrant behavior. Throughout this course, students will acquire in-depth knowledge of behavior analytic approaches toward the assessment of aberrant behavior (e.g., functional behavioral assessment (FBA) and functional analysis). In addition, the course will focus on how behavior analysis use the results of a behavioral assessment to develop effective and ethical behavioral interventions to reduce aberrant behavior. Clinical and professional issues (e.g., fidelity of implementation, monitoring effectiveness) will also be discussed. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 25 instructional hours in the area of Identification of the Problem & Assessment, 15 instructional hours in the area of Fundamental Elements of Behavior Changes and Specific Behavior Change Procedures and 5 instructional hours in the area of Intervention of Behavior Change Considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
**PSY 669. Professional Issues in Designing and Monitoring Interventions. 3 Credit Hours.**
This course covers a number of professional issues related to the competent and ethical delivery of applied behavior analysis services. The course will provide in-depth information related to the selection of appropriate interventions, including staying abreast of current research, critically interpreting research, considering individual client needs and developing treatment programs that are consistent with the science of applied behavior analysis. The course will additionally cover issues related to the implementation and management of clinical service provisions, including ensuring appropriate and accurate data collection, maintaining procedural fidelity and providing supervision and training. Finally, the course will provide information about the professional and ethical compliance code for behavior analysis, as outlined by the Behavior Analysis Certification Board (BACB). In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 15 instructional hours in the area of Ethical and Professional Conduct, 10 hours in the area of Measurement, 10 hours in the area of Experimental Design and 10 hours in the area of Implementation, Management and Supervision.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**PSY 670. Practicum in Clinical Psychology. 1-3 Credit Hours.**
Supervised experience in evaluating and treating psychological problems of children, adolescents, families, and/or adults behavior. For students placed at the U.M. Psychological Services Clinic there is a weekly case conference that focuses on ethics case conceptualization. Course may be repeated for credit.

**Components:** PRA.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

**PSY 671. Practicum in Clinical Psychology II. 0 Credit Hours.**
Continuation of PSY 670.
**Corequisite:** PSY 645.

**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Fall.

**PSY 672. Advanced Practicum in Clinical Psychology. 1-3 Credit Hours.**
Advanced experience in special clinical techniques and clinical supervision. Primarily for post-internship clinical students. The advisor may direct that PSY 672 be repeated, but no more than six credits may be applied toward a degree.

**Components:** PRA.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**PSY 673. Advanced Applications of Applied Behavior Analysis III. 3 Credit Hours.**
The purpose of this course is to provide students with supervised clinical experience in selecting, developing and implementing applied behavior analytic procedures and techniques. During this course, students will provide direct ABA services aimed at improving the behavioral functioning of individuals participating in ABA therapy. Experiential activities provided during this practicum course additionally focus on advanced professional issues in the design and implementation of ABA programs, so as to facilitate appropriate treatment selection, fidelity of implementation and systematic monitoring of treatment efficacy and providing training and feedback on performance. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
**Prerequisite:** PSY 666.

**Components:** PRA.
**Grading:** GRD.
**Typically Offered:** Spring.

**PSY 674. Applications of ABA in Development Disabilities. 3 Credit Hours.**
The purpose of this course is to provide students with supervised clinical experience in the application of behavior analysis toward the treatment of individuals with autism and developmental disabilities who exhibit problematic behavior, behavioral deficits or developmental delays participating in ABA therapy. During this course, students will provide direct ABA services aimed at reducing problematic behavior and promoting the development and maintenance of new skills. Experiential activities provided during this practicum course focus on functional assessment, the identification of meaningful treatment goals, identification of reinforcers via systematic assessment, and the implementation of ABA intervention techniques and programs to treat problematic behavior and behavioral and language deficits. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
**Prerequisite:** PSY 666. And must pass with a GPA 3.2.

**Components:** PRA.
**Grading:** GRD.
**Typically Offered:** Summer.
PSY 675. Advanced Applications of Applied Behavior Analysis II. 3 Credit Hours.
The purpose of this course is to provide students with supervised clinical experience in selecting, and developing applied behavior analytic procedures and techniques for individuals with autism and developmental delay and providing clinical supervision to those implementing behavioral procedures. During this course, students will assist instructors in providing supervision to individuals who provide direct ABA services for individuals participating in ABA therapy. Experiential activities provided during this practicum course additionally focus on advanced professional issues in the design and implementation of ABA programs, so as to facilitate appropriate treatment selection, collection of data related to fidelity of implementation and systematic monitoring of treatment efficacy. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
Prerequisite: PSY 666. And must pass with a GPA 3.2.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

PSY 676. Application of ABA: Principles and Concepts. 3 Credit Hours.
The purpose of this course is to provide students with supervised clinical experience in selecting, developing and implementing applied behavior analysis procedures and techniques. During this course, students will provide direct ABA services aimed at improving the behavioral functioning of individuals participating in ABA therapy. Experiential activities provided during this practicum course focus on the application of basic principles and concepts in ABA, including the identification of behavioral targets, measuring behavioral, monitoring changes in behavior over time, and implementing reinforcement-based interventions. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 677. Application of the Assessment and Treatment of Language and Learning. 3 Credit Hours.
The purpose of this course is to provide students with supervised clinical experience in the application of behavior analysis toward the treatment of individuals who exhibit behavioral deficits or developmental delays. During this course, students will provide direct ABA services aimed at promoting the development and maintenance of new skills. Experiential activities provided during this practicum course focus on the identification of meaningful treatment goals, identification of reinforcers via systematic assessment, and the implementation of ABA intervention techniques and programs to treat behavioral and language deficits. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 678. Capstone in Applied Behavior Analysis. 3 Credit Hours.
This advanced practicum course is a culmination of all past coursework and practicum experience in the ABA Master’s program. The course is designed to provide ABA graduate students with hands-on experience conducting and disseminating applied research to address a socially significant topic. Completion of the course requires a synthesis of a number of previously taught skills including consuming research, considering the ethics of the project, implementing behavior analytic change procedures, selecting an appropriate experimental design, measurement, graphing, and professional writing.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

PSY 679. Advanced Application of ABA. 3 Credit Hours.
The purpose of this course is to provide students with supervised clinical experience in selecting, development and implementing applied behavior procedure and techniques. During this course, student will provide direct ABA services aimed at improving the behavioral functioning of individuals participation in ABA therapy. Experiential activities provided during this practicum course additionally focus on advanced professional issues in the design and implementation of ABA programs, so as to facilitate appropriate treatment selection, fidelity of implementation and systematic monitoring of treatment efficacy. In accordance with the Behavior Analysis Certification Board (BACB), this course meets criteria for 168 hours of practicum experience.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

PSY 680. Research. 1-4 Credit Hours.
Investigation of an original problem.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
PSY 681. Research. 1-4 Credit Hours.
Investigation of an original problem.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 683. Special Topics. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 684. Readings in Psychology. 3 Credit Hours.
Supervised readings in selected topics.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 685. Seminar in Clinical Psychology. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 687. Seminar in Clinical Psychology. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 688. Seminar in Developmental Psychology. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 690. Seminar in Developmental Psychology. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 692. Seminar in Personality. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 693. Seminar in Behavioral Medicine. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PSY 694. Seminar in Behavioral Medicine. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
PSY 696. Cognitive and Behavioral Neuroscience Journal Club. 1 Credit Hour.
This 1-credit course will provide an opportunity for graduate students in the Cognitive and Behavioral Neuroscience Graduate Program within the psychology department to discuss recently published literature in the field. The course will consist of in-depth discussions held every week, led by graduate students and other trainees, on research articles and topics of their choice. Typically, discussion will alternate between an empirical article and a more advanced methods article every other week. A faculty member from the CBN program will organize the journal club, facilitate and guide discussion, provide clarification of key concepts, and evaluate student performance.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 697. Seminar in Biological Psychology, Neuroimaging in the Psychological Sciences I: Methods. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PSY 698. Seminar in Quantitative Psychology. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PSY 803. Internship in Clinical Psychology. 1 Credit Hour.
Supervised internship in clinical psychology. May not be counted as part of the 90 hours required for the Ph.D. degree.
Components: CLN.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 804. APA Accredited Internship in Clinical Psychology. 1 Credit Hour.
Supervised internship in clinical psychology. May not be counted as part of the 90 hours required for the Ph.D. degree.
Components: CLN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PSY 805. Postdoctoral Practicum. 1-3 Credit Hours.
Advanced clinical psychology training for individuals who have completed a clinical psychology Ph.D. or PsyD. from an APA-accredited doctoral program. Supervision of clinical activity by licensed faculty members.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

PSY 806. Summer Research Practicum. 1 Credit Hour.
Faculty-supervised research during the summer for students in the Psychology Ph.D. Program.
Components: THI.
Grading: GRD.
Typically Offered: Summer.

PSY 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

PSY 820. Research in Residence. 1 Credit Hour.
Research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PSY 810 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

PSY 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
PSY 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

PSY 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PSY 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

PSY 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MS in Psychology- Applied Behavior Analysis
http://www.psy.miami.edu/aba/

The Master's program specializing in Applied Behavior Analysis is a full-time graduate program for students who have earned a bachelor's degree in Psychology or a related field and are seeking further training and/or professional certification in Applied Behavior Analysis. The 42-credit program begins each Fall and is designed to be completed in five consecutive semesters [Fall/Spring/Summer/Fall/Spring]. Students who complete the program will meet at the University instructional coursework and experiential [practicum] requirements necessary to take the exam to become a Board Certified Behavior Analyst [BCBA].

Total Credit Hours 42

1 Classroom-based courses are offered in a face-to-face didactic format.
2 Practicum course experiences are provided within University of Miami-based ABA training clinics. Each practicum course requires students complete 15 hours per/week of supervised clinical work.
Mission

Goals
Students completing the master’s degree ABA program will meet the instructional/practicum requirements necessary to obtain certification as a Board Certified Behavior Analyst (BCBA), a master’s level certification offered by the Behavior Analyst Certification Board (BACB).

Student Learning Outcomes
- Students will acquire knowledge of foundational principles and concepts in applied behavior analysis.
- Students will acquire clinical competency in the implementation of applied behavior analytic treatments and procedures.
- Students will demonstrate ethical and responsible behavior analytic practices, in a manner that is consistent with the BACB Professional and Ethical Compliance Code for Behavior Analysts.

Ph.D. in Psychology

Overview
The Department of Psychology Graduate Program combines the Master of Science [M.S.] and Ph.D. degrees. The program is organized into four divisions: Adult, Child, Health, and Cognitive and Behavioral Neuroscience. Within the divisions, there are options for Clinical and Psychological Sciences programs. The Clinical Program trains its graduates to be scientists and practitioners, with a strong emphasis on clinical science while the Psychological Sciences Program puts emphasis on the scientific aspect. Students are accepted into a program within one of the divisions and requirements for each area of study varies according to the student’s program.

There are many steps on the path to the Ph.D. These include (1) successfully completing the Department’s core statistics and foundation courses, (2) demonstrating continued research activity, (3) completing a Master’s thesis, (4) completing advanced coursework required within the student’s program area, (5) successfully completing qualifying procedures, including satisfactorily completing a qualifying research paper, (6) completing and defending a Ph.D. dissertation, and (7) meeting all program area Competency requirements.

The minimum number of credits required for the Ph.D. in Psychology varies according to the student’s program area but in no case falls below 72 for Clinical and 60 for Psychological Sciences, which include 6 thesis credits and 12 dissertation credits. Clinical tracks require additional practicum credits and a yearlong internship.

Admission Requirements
1) Completion of an official application (online) and must include:
   - Personal statement
   - Prospective Mentor
   - Research interests
   - Desired Track

2) Baccalaureate degree from a regionally accredited institution.

3) Graduate Record Examination (GRE within 5 years).

4) 3 Letters of recommendation.

5) International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL).

6) An interview will be required for admission.

To receive full consideration for entry into the Ph.D. Program for the Fall of the next school year, ALL application materials [application, transcripts from all universities/colleges attended, GRE scores, and letters of recommendation] must be received no later than December 1. The Department of Psychology uses an online application for admission to our graduate program.

Curriculum Requirements
1. The principal goal of the graduate program in Psychology is to prepare the student for a career contributing to the growth of scientific knowledge in psychology.

2. Applicants for admission to graduate status in psychology shall have
a. a minimum average of B.
b. at least 18 credit hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
c. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.

3. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.

4. The Ph.D. program in Psychology has four clinical areas of study [Adult Clinical, Child Clinical, Health Clinical, and Pediatric Health] and four Psychological Sciences areas [Behavioral Medicine, Cognitive-Behavioral Neuroscience, Developmental, and Evolution and Behavior]. All clinical Ph.D. programs in Psychology require a minimum of 72 credit hours, including 6 thesis credits (PSY 810) and 12 dissertation credits (PSY 830). Psychological Sciences programs require a minimum of 60 credit hours including 6 thesis credits (PSY 810) and 12 dissertation credits (PSY 830).

5. PSY 680 and PSY 681 will not be counted toward the 72 credit hour minimum.

6. A Master of Science in Psychology based upon 24 credit hours of course work and 6 credit hours of Master’s thesis research is a component of all programs.

7. In cases in which a student has a prior graduate degree, the number of credit hours required for the Ph.D. may be reduced at the discretion of the Department.

8. All programs in Clinical Psychology require an internship.

9. Course requirements vary according to the specific track. Below is a listing of available courses. See Graduate Student Handbook for specific track requirements.

**Mission**

The mission of the graduate program in the Department of Psychology is to train students to acquire, advance, and disseminate knowledge within the Psychological and Biobehavioral Sciences.

**Goals**

In order to achieve these goals the graduate program: 1. Develops advanced understanding of behavioral, psychological, and biological processes; 2. provides rigorous training in research design and analysis, develops advanced research skills; 3. provides detailed scientific knowledge about psychology as well as clinical psychology training and practical experience for those students seeking applied training in a career as a clinician scientist, in accordance with the American Psychological Association guidelines for accreditation in Clinical Psychology; and 4. fosters independent learning, enabling the graduate to contribute to the scientific field of Psychology, including Clinical Psychology.
Student Learning Outcomes

- Students will demonstrate an understanding of behavioral, psychological, and biological processes and knowledge of the core curriculum, clinical curriculum, and specialty area.
- Students will demonstrate knowledge and skills in research methods and analysis.
- Students will demonstrate appropriate professional conduct, excellent clinical assessment and/or clinical intervention skills.

**Sociology**
sociology.as.miami.edu

**Dept. Code:** SOC

**Graduate Program Overview**

The Graduate Program in Sociology at the University of Miami is intended to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology is designed for students seeking the Doctor of Philosophy (Ph.D.) in Sociology. The Master of Arts (M.A.) degree is earned during the first portion of the program. At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas:

1. Criminology,
2. Race & Ethnic Relations, and Immigration
3. Medical Sociology.

Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantship and fellowships are awarded each academic year to cover tuition and living expenses.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (http://www.as.miami.edu/sociology/).

**Masters Program in Sociology**

- M.A. in Sociology (p. 1875)

**Doctoral Program in Sociology**

- Ph.D. in Sociology (p. 1876)

**GRADUATE COURSES IN SOCIOLOGY**

**SOC 601. Classical Sociological Theory. 3 Credit Hours.**
The focus of this course is the work of Comte, Durkheim, Marx, Weber, and Parsons, along with more recent perspectives such as symbolic interactionism, phenomenology, ethnomethodology, and critical theory.

Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**SOC 602. Contemporary Sociological Theory. 3 Credit Hours.**
Recent developments in social theory, such as, for example, the work of Giddens, Habermas, Derrida, Bourdieu, Baudrillard, and Lyotard, along with important themes such as feminism, integration, the linguistic turn, habitus, (anti)foundationalism, and symbolic violence.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**SOC 603. Special Topic: Sociology of Knowledge-Science and Technology. 3 Credit Hours.**
To address the debates over the nature of social science and technology. In addition to the theoretical disputes, the applications, critiques, and politics of scientific inquiry and technology use will be the focus of attention.

Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

**SOC 604. Proseminar in Sociology. 1 Credit Hour.**
Introduction to Sociology: the research process, departmental resources, and the graduate program.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
SOC 609. Social Statistics. 3 Credit Hours.
Probability theory, descriptive statistics and tests of independence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 610. Advanced Research Methods. 3 Credit Hours.
Quantitative techniques for the measurement of theoretical constructs, the consequences of technique selection, and the relationships between method and underlying theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 611. Advanced Sociological Statistical Analysis I. 3 Credit Hours.
Multiple linear regression and regression diagnostics using Stata, analysis of categorical dependent variables, count dependent variables, simultaneous equations, and panel data models. Some topics may not be covered and others may be added at the discretion of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

SOC 612. Sociological Statistics II. 3 Credit Hours.
Advanced statistical analysis techniques covering topics such as hierarchical linear models (HLM), structural equation models (SEM), instrumental variables (IV), factor analysis, propensity score matching (PSM), and nonparametric methods. Some topics may not be covered and others may be added at the discretion of the instructor.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 613. Qualitative Research Methods. 3 Credit Hours.
In-depth introduction to qualitative, inductive methods, with emphases on grounded theory and action research. Focus on qualitative interviewing (including focus groups) and participant observation for the collection of data in naturalistic social settings, with simultaneous data analysis; qualitative methods in mixed-methods research introduced. Covers ties between methods and theory, additional basic methods used in qualitative research, and typical analytic approaches; touch on more esoteric methods; study current issues and debates relevant to this set of approaches to generating knowledge.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 614. Evaluation Research. 3 Credit Hours.
Conceptualizing, designing, conducting, and interpreting the results of evaluation research programs in health and human service agencies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 615. Class Structure and Social Stratification. 3 Credit Hours.
Theoretical and research approaches to class structure and social stratification, with a focus on the U.S. Examines the conflict perspective(s) and major alternative views including economic class, status and power, gender and race.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 616. Social Psychology: Sociological Perspectives. 3 Credit Hours.
Theories and research addressing the mutual influence between social groups and structures, on the one hand, and individual selves and behaviors, on the other. Balance emphasis between symbolic interactionist and structural approaches, with attention to additional related, yet distinct theoretical perspectives.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 617. Social Organization. 3 Credit Hours.
Examines theories of organization and work, discrimination, technology and job design, bureaucracy, productivity and organizational culture, responsible organizations, and alienation.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 620. Social Epidemiology. 3 Credit Hours.
Theories, issues and methods of study pertinent to health and illness in society. Social factors implicated in patterns of disease occurrence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 622. Teaching Seminar in Sociology. 3 Credit Hours.
Pedagogical techniques for teaching sociology at the college/university level.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

SOC 632. Social Psychology of Health and Illness. 3 Credit Hours.
Social and psychological factors affecting susceptibility to illness, health related beliefs and behaviors, the doctor-patient relationship, and health care systems and patient compliance.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 635. Medical Sociology: Issues in Research and Theory. 3 Credit Hours.
Examination of health, illness, and health care from sociological perspectives. Includes social-structural, interpretive, and critical approaches, as various authors have used these to address specific issues. Phenomena to be examined range from macro (e.g. population patterns of mortality and morbidity, health care policy) to micro (e.g. the subjective experience of illness). Related theories and methodologies discussed. Focus varies somewhat by instructor and as issues emerge in the discipline.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 636. Health Diversity Across the Life Course. 3 Credit Hours.
Diversity in health across the life course from broad sociological and cross-disciplinary theoretical traditions. Key questions in medical sociology will be addressed to discover the impact of the life course processes on the health or vitality of diverse individuals and diverse populations, with a focus on inequality and the elements of time and history.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 650. Social Analysis of Race Relations. 3 Credit Hours.
The impact of race relations research on the discipline of sociology.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 651. Race Relations: Social Psychological Perspectives. 3 Credit Hours.
Social psychological perspectives on the nature, causes, and consequences of racial inequality in American society.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 652. Theories of Race and Ethnic Relations. 3 Credit Hours.
Micro- and macro-level theories of race and ethnic relations.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 653. Race, Ideology, and Framing Inequality. 3 Credit Hours.
Examines the various ideologies that have emerged on the limited states to describe and, at times, resist racial inequality.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

SOC 670. Theories in Criminology and Criminal Justice. 3 Credit Hours.
Review and critique of central criminological theories. Evaluation of these theories in view of recent criminological research.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 671. Seminar on Criminology. 3 Credit Hours.
Selected issues, topics, theories, and recent research in criminology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 672. Research in Crime and Delinquency. 3 Credit Hours.
Measurement issues; effects of race, gender, age, and socio-economic status on criminality; extra-legal factors affecting criminal justice decision making.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 673. The Criminal Justice System. 3 Credit Hours.
Introduction to the U.S. criminal justice system. Topics include historical and current concepts of criminal justice, the interrelationships among the different components of the system, and the roles and functions of the system in American society. The four major areas covered include philosophies of punishment, policing, courts, and corrections.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

SOC 674. Seminar on Policing. 3 Credit Hours.
The role of the police in American society. The focus is on the sociological study of policing: the analysis and evaluation of research. Topics include the history of the police, their role in American society and in the American system of criminal justice. In addition, drawing upon current research studies, discussion and critique of important issues and trends in modern policing.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

SOC 675. Courts, Corrections and Punishment. 3 Credit Hours.
A broad overview of criminal court systems, sentencing, and corrections. Sociological, criminological, and sociolegal perspectives are drawn upon to blend both theoretical and policy perspectives in order to examine these systems critically. Particular attention will be given to the topics of racial, gender, and class disparities in criminal justice punishment. The course is organized around these themes: 1) theories of punishment and social control; 2) court organizations, actors, and sentencing 3) incarceration, and 4) other correctional populations, including probation and parole
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

SOC 676. Seminar on Juvenile Delinquency. 3 Credit Hours.
The overall objective is to provide students with an understanding of the current research and knowledge on juvenile delinquency. Topics include the nature and extent of delinquency, the social causes of juvenile delinquency, and assess research concerning social factors leading to delinquency. In addition, students will study current thinking and research concerning the control and prevention of delinquency.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

SOC 677. Criminology and Public Policy. 3 Credit Hours.
Various issues in crime and criminal justice policy and the role of criminological theory and research in addressing them are discussed. Topics will include trends in crime rates, guns and violence, gangs, drugs and crime, policing, courts and sentencing, community corrections and offender re-entry, capital punishment, and environmental criminology. Emphasis is on understanding implications of theoretical criminology for criminal justice practice and on examining the role of scientific research and empirical evidence in addressing the issues in crime and justice. Various crime control strategies and crime prevention programs and their effectiveness and challenges to their implementation are covered. Special topics will vary by instructor.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.
SOC 679. Communities and Crime. 3 Credit Hours.
Examination of various aspects of the relationships between communities, crime, and crime control. Major theoretical traditions - such as social disorganization theory, routine activities theory, and broken windows - are addressed. The roles of neighborhood structure and process, and their relationships with various forms of crime and policing, are covered.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

SOC 680. Race/Ethnicity, Crime and Criminal Justice. 3 Credit Hours.
An in-depth examination of the relationships involving race, ethnicity, immigration; crime; and the criminal justice system. Topics include why these are important issues to study, how and what we know about these relationships, and how we might explain them. Attention is directed to research on defining race and ethnicity, racial and ethnic variations in criminal victimization and offending, population distributions, policing, the court system and sentencing, corrections, and the death penalty. The approach will primarily be sociological, although where appropriate other disciplines (e.g., political science, history) will be drawn on as well.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

SOC 681. Sociology of Violence. 3 Credit Hours.
Seminar on issues relevant to the sociology of violence, with a focus on violence in the United States. While the emphasis throughout will be on street violence (i.e., homicide, robbery, rape, and aggravated assault), other forms of violence (e.g., corporate violence, family violence) will also be covered. In particular, we will examine violence in historical, international, and situational contexts, the major explanations of it, the factors associated with it, and efforts to control and prevent violence.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

SOC 682. Alcohol, Drugs, and Crime. 3 Credit Hours.
Exploration of different categories of illegal drugs and review their basic psychopharmacology, the sociological constructions of the dangers of drug use, the racialization of drug use and connections with "dangerous classes" of people, and the social consequences of America's particular brand of social control. The goals are to present these issues in all their complexity and explore some of the repercussions of addressing them in the ways that the US has chosen.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

SOC 683. Comparative Criminal Justice Systems. 3 Credit Hours.
Focus is on understanding crime and justice issues from a comparative, cross-national standpoint. Extant definitions of crime and deviance are placed in cultural contexts, existing methods of studying crime on a global scale, and various types of criminal behavior that occur in isolated group contexts as well as those crimes that transcend country boundaries are discussed. Topics will include genocide, transnational organized crime, human trafficking, and international terrorism. Criminal justice systems from select countries around the world and their responses to both localized and transnational crime are reviewed. Critical comparative analysis of crime and justice issues is emphasized. The final research paper will require integrating theory, methods, and scholarly writing using a global perspective.
Requisite: Graduate Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

SOC 690. Directed Studies. 1-3 Credit Hours.
Individually supervised readings or research on special topics. Offered by arrangement with the instructor.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 691. Special Topics and Current Issues in Medical Sociology. 1-3 Credit Hours.
Seminar topics will be announced in schedule of classes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
SOC 692. Special Topics and Current Issues in Criminology. 1-3 Credit Hours.
Seminar topics will be announced in schedule of classes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 693. Special Topics and Current Issues in Race/Ethnic Relations. 1-3 Credit Hours.
Seminar topics will be announced in schedule of classes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

SOC 791. Graduate Internship and Paper. 6 Credit Hours.
Internships are intended to provide students with meaningful work experiences related to their professional interests. This is especially the case for students who are not yet employed in positions related to criminology and/or criminal justice. The internship period should provide the student with the opportunity to examine a criminal justice-related agency or organization, its various roles and functions, and to participate in work experiences related to that agency’s goals and purposes. The academic goal is to provide integration of theoretical concepts in criminology and criminal justice with the demands and constraints imposed within a professional work role. For students the internship represents an opportunity to achieve this integration and to acquire experience in the area in which they have been academically trained. Students who elect to take the internship and required paper will complete approximately 300 hours of work with an agency and will complete an approximately 30 page paper.
SOC 791 18 hr requirement.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

SOC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

SOC 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in SOC 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

SOC 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for more than 6 hours. Up to 6 hours may be taken in a regular semester or in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

SOC 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

SOC 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

**Additional Requirements**

Students must submit and successfully defend a thesis in accordance with graduate school policy.

Total Credit Hours: 31

---

1. These should include beginning PhD. courses.

* An M.A. in sociology is offered as the first step in the PhD.

** A minimum of 31 credit hours at the graduate level 600 of which 6 must be taken in thesis work. Funded full time students will complete 36 credits as a result of funding requirements.

*** A maximum of 6 credit hours can be transferred from acceptable graduate institutions.

**** 3 credit hours of course work may be earned in a related discipline. Such course selections must have prior departmental approval.

***** The completion of all other requirements stated in sections of the Bulletin devoted to requirements for the Master's Degree and General Information.

---

**Ph.D. in Sociology**

www.as.miami.edu/sociology/

The Graduate Program in Sociology at the University of Miami is intended to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology is designed for students seeking the Doctor of Philosophy (Ph.D.) in Sociology. The Master of Arts (M.A.) degree is earned during the first portion of the program. At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas:

1. Criminology,
2. Race & Ethnic Relations, and Immigration
3. Medical Sociology.

Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantship and fellowships are awarded each academic year to cover tuition and living expenses.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (http://www.as.miami.edu/sociology/).

---

**Admission Requirements**

All incoming graduate students are admitted to the Ph.D. program and must be committed to pursuing the Ph.D. degree. The Graduate Program in Sociology at the University of Miami does not accept students who aspire to earn a terminal M.A. degree.

All applicants to the Ph.D. program are evaluated across several indicators of academic potential, including Graduate Record Examination (GRE) scores, grade point averages (GPA), letters of recommendation, and statements of purpose. All applicants should score a minimum of 1,000 (at least 450 in each of the verbal and math sections) on the GRE (under the old scoring system; under the new GRE scoring system the approximate equivalents are a minimum of 297 total, with scores of at least 141 on the quantitative section and 150 on the verbal section). Applicants without graduate experience are expected to have a minimum overall GPA of 3.20 in undergraduate coursework. Applicants with graduate experience are expected to have a minimum overall GPA of 3.50 in graduate coursework. All applicants should provide three (3) letters of recommendation from persons who are familiar with their academic work and scholarly potential. At least two of these letters should come from professors currently or previously employed in a college or university. All applicants should provide a brief (no more than three pages), yet compelling, statement of purpose. This statement should clearly describe the applicant’s academic background, research interests, and professional goals. It should also clearly indicate how the student’s research interests are consistent with the research strengths of the department. Non-native English speakers should be prepared to
demonstrate English language proficiency, as indicated by minimum scores of 80 (internet based), 213 (computer based), or 550 (paper based) on the Test of English as a Foreign Language (TOEFL) examination.

### Additional Requirements

- Students must pass two written substantive area examinations
- Students must complete a paper of publishable quality
- Students must be admitted to candidacy
- Students must complete a written presentation and oral defense of an acceptable dissertation

Total Credit Hours: 45

---

1. An M.A. or and M.S. degree is required for admission to this program. The courses taken for the Ph.D. must be different from the courses taken for the M.A. degree.

2. A maximum of 6 Pre-Candidacy Doctoral Dissertation credit hours may be taken.

3. With reference of the 45 total credits hours, it is anticipated that three credit hours will have been taken as electives at the M.A. level.

4. The satisfactory completion of the requirements of the Graduate School as stated in this Bulletin

### Additional Requirements

- Students must pass two written substantive area examinations
Students must complete a paper of publishable quality
Students must be admitted to candidacy
Students must complete a written presentation and oral defense of an acceptable dissertation

Total Credit Hours

61

1 Students coming in without a course equivalent to SOC 609 will take 61 credits.
2 12 hours are needed to graduate. These hours should be a combination of SOC 830/SOC 840, but no more than 6 in SOC 830. SOC 830 is used during pre-candidacy – e.g., writing a publishable paper – while SOC 840 is used when writing a dissertation (post-candidacy).

Mission
The Graduate Program in Sociology at the University of Miami is designed to equip students with the theoretical, methodological, and analytical tools required for teaching and conducting research in academic and non-academic (e.g., government and private industry) settings. This goal is accomplished through a combination of classroom learning, comprehensive exams, independent research (particularly the thesis and dissertation), and teaching undergraduate students.

Goals
Student Learning Outcomes

• Students will develop a knowledge of, and the ability to use, classic and contemporary sociological theory.
• Students will develop knowledge of, and the ability to use, quantitative and qualitative research methods and analyses.
• Students will develop knowledge of two sub-fields in the discipline of sociology and demonstrate the ability to work in these areas.
• Students will develop knowledge fundamental to teaching sociology.

Research Institutes
Deloitte Institute for Research and Practice in Analytics
The Deloitte Institute for Research and Practice in Analytics (DIRPA) is an initiative funded by Deloitte and designed to bring together students and faculty from the University of Miami in a cross-disciplinary effort to better understand the business and analytic needs, challenges, and opportunities of industry and community organizations across the globe.

Role
The Institute serves as a focal point and home for students and faculty from the University of Miami and select partner institutions throughout the globe, facilitating curricular, co-curricular, and industry-oriented activities related to business education, business analytics, and digital innovation.

Impact
From developing business and analytics knowledge and skills, to inspiring the analytics-driven digital innovation, to delivering pro-bono business and analytics consulting, the Institute focuses on developing university graduates and knowledge for a world in which analytics and digital innovation are at a premium across all sectors and geographies.

Institute for the Study of Quality in Manufacturing and Service
The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition,
dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

**Objectives**

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To provide a vehicle for Lean Six Sigma certifications.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

**Intelligent Computer Systems Research Institute**

The Intelligent Computer Systems Research Institute is a center for research and information dissemination within the field of information business technology. The institute focuses on multi-disciplinary topics such as Big Data, Analytics, Cloud Computing, Artificial Intelligence, Machine Learning, Agent technology, 'The Internet of Things', Health and Legal Informatics, Business Intelligence, and embedded systems.

**Objectives**

1. To encourage partnerships between academia and industry. Corporate partners can provide data, field studies, test environments, and other resources through which leading theoretical work can be developed tested in an applied environment.
2. To conduct research for publication in leading academic and industry related journals, as well as working papers.
3. To encourage industry partners to work with students through the creation of internship positions. These internships provide students the opportunity to act as a link between the teaching and research of the institute’s members and the field based applied environment.

**Graduate Business Student Association**

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business master’s or doctoral program and are encouraged to attend meetings and events. The GBSA organizes activities and events aimed at strengthening networking within the graduate business student body and the business community while enriching the academic and social experiences of its members. The GBSA is governed by a committee that consists of a president, vice president, treasurer, secretary, marketing director, community service director, networking director, wellness and athletics director, and a Graduate School Association senator. In addition, cohort representatives are elected per program to serve as a liaison between their respective cohort and the committee.

**Financial Assistance**

**Graduate Business Scholarships and Fellowships**

There are a limited number of merit-based graduate business scholarships which are awarded at the time of admission to qualified full-time MBA and specialized Master’s students. A graduate business scholarship covers a portion of tuition for the MBA and specialized Master’s degree. Graduate business scholarships are not automatically renewed.

In addition to graduate business scholarships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate business scholarship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

There may be a limited number of merit/need-based scholarships which are awarded following admission to Professional and Executive programs. Details on how to apply for these scholarships are provided at the time of admission.

**Donor Scholarships**

Several endowed scholarships are made available to incoming graduate business students through the generosity of alumni and friends of the University of Miami Business School. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student may be ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.

BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS
Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT
Criteria: Outstanding candidate for a master's level business degree.

RYDER/PATRICK J. CESARANO – ENDOWED SCHOLARSHIP
Criteria: MBA student with a concentration in finance or management science/operations research. Based on academic excellence and financial need.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT
Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMERY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS
Criteria: Outstanding candidates for Graduate Business Programs.

DEAN M. FOGEL BUSINESS ENDOWED SCHOLARSHIP
Criteria: Graduate business student with financial need and priority is for a United States veteran.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP
Criteria: Graduate business student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP
Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS
Criteria: To recruit and retain outstanding graduate business students.

E. BRUCE MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING
Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U. S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE
Criteria: Graduate business student preparing for a career in International Finance.

CHARLES & ROSE NATIELLO AND THOMAS A. NATIELLO, JR. BUSINESS SCHOLARSHIP
Criteria: Full-time Graduate Business student who has completed one year and is enrolled in a two-year program with a 3.5 GPA or higher.

PIECHOSKI FAMILY GRADUATE BUSINESS FELLOWSHIP
Criteria: Outstanding graduate business student.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS
Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.

SOUVIRON FAMILY SCHOLARSHIP - Annual MBA Scholarship
Criteria: The annual scholarship is for a MBA student with financial need with a preference for an Eagle Scout, if someone meets that criteria. If not, a qualified MBA student with need.

1 Essay Required: In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

Ziff Graduate Career Development Center

The Ziff Graduate Career Development Center’s mission is to help all Miami Business School graduate students launch and develop successful, rewarding careers. Through career exploration, recruiting preparation, and career readiness training students can excel in any career path they choose. The Center provides students with a full menu of resources and services including career assessments, personal branding, resume review, job search coaching, mock interviews, salary negotiation, and all types of professional development.

The Ziff Graduate Career Development Center’s staff is comprised of career coaches and employer relations professionals who are dedicated to positioning students for the best career opportunities possible. Through individual coaching sessions, career development programming, and a variety of employer events the staff ensures students are set up for success. Examples of employer events are guest speakers, panels, information sessions, and career fairs. The Center also develops relationships with companies from local to global scale to offer internship and full-time employment opportunities.
options. Even after accepting a job offer, students can partner with the staff on a professional development plan to close any remaining skill gaps for their new role.

A graduate business career search can be challenging in the dynamic and complex job market of today's global economy. The Ziff Graduate Career Development Center exists to help students navigate and stand out in this challenging yet exciting environment. Students who leverage the full array of resources and services offered by the Center will undoubtedly reap the rewards in their career search and development.

The Mentor Program
1. The Miami Business School Mentor Program is designed to enhance the classroom experience by matching students with professionals who have experience and expertise in the students’ area of career interest, or are versed in areas of professional development.
2. Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regularly scheduled round tables, hosted by the School.
3. Graduate business students are encouraged to participate.
4. Applications are available on our website. (https://miamimentoring.chronus.com/about/)

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.
The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirement needed to sit for the CPA exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.
Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.
An exploration of complex financial reporting issues using the case method.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.
Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.
Prerequisite: ACC 301. Or ACC 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 606. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 607. Financial Accounting and Reporting. 3 Credit Hours.
Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ACC 608. Managerial Accounting. 3 Credit Hours.
Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Prerequisite: ACC 607.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 610. Financial Reporting Research. 2 Credit Hours.
The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 611. Auditing Seminar. 2 Credit Hours.
Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.
Prerequisite: ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 616. CPA Review I. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida’s educational requirements for taking the CPA exam.
Prerequisite: ACC 411.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 617. CPA Review II. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida’s educational requirements for taking the CPA exam.
Prerequisite: ACC 411.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 620. Accounting Controls in Information Technology. 2 Credit Hours.
Course develops students’ understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
Prerequisite: ACC 406. Or ACC 636.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ACC 622. Advanced Issues in Auditing. 3 Credit Hours.
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.
Prerequisite: ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 623. International Accounting and Taxation. 2 Credit Hours.
Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.
Prerequisite: ACC 211. Or ACC 600. Or ACC 607. Or ACC 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 626. Litigation and Advisory Services. 2 Credit Hours.
This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. Students will learn about different investigative techniques for quantifying fraud, and how fraud can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 627. Accounting Regulations and Compliance. 2 Credit Hours.
This course is designed to expose and educate students in a number of rules and regulations faced by the accounting profession, with an emphasis on the financial industry. This course will cover in moderate depth, regulatory agencies and the compliance of the regulations the agencies are charged with upholding. Students will also be exposed to regulatory and compliance programs, bribery and corruption acts such as the Foreign Corrupt Practices Act and the UK Bribery Act, and various anti-money laundering provisions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 628. Introduction to Accounting Analytics. 2 Credit Hours.
This course introduces students to applications of data analytics techniques in accounting which includes: financial reporting, managerial accounting, taxation, and auditing.
Prerequisite: ACC 301. And ACC 402. And ACC 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.
Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 632. Intermediate Accounting I. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Prerequisite: ACC 211. And ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Prerequisite: ACC 311. Or ACC 632.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 635. Auditing. 2 Credit Hours.
The course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 311. Or ACC 632. And ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 211. And ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 639. Income Taxation and Business Entities. 2 Credit Hours.
This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.
Prerequisite: ACC 403. Or ACC 673.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 640. Corporate Taxation I. 2 Credit Hours.
The course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 641. Corporate Taxation II. 2 Credit Hours.
An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.
Prerequisite: ACC 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.
Investigation of current topical areas in taxation.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.
Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 645. Partnership Taxation. 2 Credit Hours.
Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 647. Estates and Gift Taxes. 2 Credit Hours.
Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent’s gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 648. Financial Reporting Implications of Income Taxes. 2 Credit Hours.
This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)
Prerequisite: ACC 312. Or ACC 633. And ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 649. Issues in Tax Policy. 2 Credit Hours.
This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.
Prerequisite: ACC 403. Or ACC 673.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 650. Accounting Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.
Prerequisite: ACC 312. Or ACC 633.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.
This course covers Managerial Accounting concepts applied to healthcare organizations. Topics include cost allocation and management control systems.
Prerequisite: ACC 212. Or ACC 608. Or ACC 671.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.
This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.
Prerequisite: ACC 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.
This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 665. Health Care Financial and Managerial Accounting. 2-3 Credit Hours.
This course covers managerial and financial accounting concepts applied to health care organizations. Topics include cost allocation and management control systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 666. Accounting for Sustainability. 2 Credit Hours.
Most large firms now report metrics of progress towards the firm’s goals with respect to environmental, social, and governance (ESG) aspects of sustainability, often integrating sustainability reporting with financial reporting. The course examines the value of sustainability reporting in terms of indicating efficiency, risk, and brand capital. The course analyzes emerging metrics for sustainability and emerging reporting systems. The course also examines SEC and other regulations for reporting sustainability, and how such reporting is viewed by stakeholders.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 670. Financial Reporting and Analysis. 2 Credit Hours.
The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student’s ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student’s ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ACC 672. Advanced Financial Analysis. 2 Credit Hours.
Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business, We discuss each financial reporting issue in terms of its effect on assessments of a firm’s profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Prerequisite: ACC 211. Or ACC 607. Or ACC 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.
This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, inclusions, statutory deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students’ appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.
Internal control is the process by which owners influence manager’s of organization to implement the organization’s strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.
Prerequisite: ACC 301. Or ACC 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 677. Forensic Accounting. 2 Credit Hours.
This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants’ role in litigation, such as acting as expert witness.
Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.
The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.
The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 681.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 683. Taxation. 4 Credit Hours.
The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.
The course covers the nature, design, and implementation of accounting information systems. The objective of the course is to develop students’ understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.
The course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 686. Auditing. 4 Credit Hours.
The course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 688. Advanced Accounting and Financial Reporting. 4 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 689. Current Issues in Accounting. 4 Credit Hours.
Current issues in accounting focuses on international financial reporting standards and accounting for governmental and not-for-profit organizations. This course introduces core concepts and tools of accounting and financial reporting for managers of global, governmental, and not-for-profit organizations.
Prerequisite: ACC 682.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 690. Fraud and Forensic Accounting: Ethics and Legal Environment. 4 Credit Hours.
This course focuses on conducting fraud examinations and includes discussion of procedures used in forensic accounting examinations and the rationale supporting such procedures.
Prerequisite: ACC 682 And ACC 685.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 698. Selected Topics. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 701. Empirical Accounting Research I. 3 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 0-3 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. Prerequisite: ACC 701 or permission from the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, an empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.
ACC 825. Comprehensive Test Preparation. 1-3 Credit Hours.
Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ACC 826. Introduction to Textual Analysis in Accounting Research. 3 Credit Hours.
This course will provide students with essential practical skills to apply popular textual analysis methods and help develop understanding of the key concepts and challenges associated with textual analysis and data analysis.

Components: SEM.
Grading: GRD.
Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their qualifying examinations they may take the maximum allowable credit stated above.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BSL 612. Legal Aspects of International Business. 3 Credit Hours.
International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 624. Negotiation: Theory and Practice. 2-3 Credit Hours.
This experiential course is designed to introduce graduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 675. Advanced Business Law. 2 Credit Hours.
Advanced Business Law focuses on the following substantive subject areas commonly encountered by Certified Public Accountants and tested on the Uniform Certified Public Accountancy Examination: business ethics, contracts (including formation, performance, breach, and remedies), commercial transactions under UCC Article 2, commercial paper, agency principles, and secured transactions. Special attention is given to the areas tested on Regulation section of the Uniform CPA Exam.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 685. Legal Aspects of Health Administration. 2-3 Credit Hours.
Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 690. Responsible Business. 2 Credit Hours.
BSL 690 explores the law's role in regulating responsible business and the impact of law on managerial decision-making. Students will evaluate whether the law engineers responsible, sustainable business, focusing on tort, compliance, and criminal law as examples of the law as regulator. Critical to this analysis is the degree to which ethics and corporate social responsibility are vital gap fillers. Students will achieve a firm grasp on and will practice using ethical decision-making models. Other topics include, for example, contract law as a means to achieve mutually agreed-upon responsible conduct in business.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BSL 691. The Public Corporation: Legal Perspectives. 2 Credit Hours.
The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation
with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of
others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the
development of and investment in a private enterprise.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 692. Legal Implications of International Business Transactions. 2 Credit Hours.
International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international
legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive
rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and
examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 694. Real Estate Law. 2 Credit Hours.
Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text
material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property,
contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides
a problem-solving experience, which is intended to develop graduate students’ critical thinking process as well as their skills in oral and written
communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 695. Legal Implications in Executive Decision Making. 3 Credit Hours.
Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the
executive decision-making process.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 696. Legal and Ethical Implications in Executive Decision Making. 3 Credit Hours.
Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight
such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 698. Selected Topics. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 600. Critical Thinking and Persuasion for Business/Non-native English Speakers. 2 Credit Hours.
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats,
students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling
written arguments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 601. MBA Math Module. 0-3 Credit Hours.
This course provides the student with the necessary mathematical skills to progress toward an MBA degree. The course begins with a review of
algebra and continues with the fundamentals of differential and integral calculus. The focus is on applying these concepts in solving business
problems.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
BUS 602. Critical Thinking and Effective Writing. 1 Credit Hour.
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 603. Critical Thinking and Effective Speaking. 1 Credit Hour.
Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one’s view before adversarial audiences, display of data, and effective use of visual aids.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 604. Career Development and Enrichment. 0-1 Credit Hours.
This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 605. Residential Session Abroad. 1-6 Credit Hours.
One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BUS 610. Communicating for Career Success. 2 Credit Hours.
The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally. The critical thinking and communication elements of the course are supplemented with additional practical applications relating to career readiness, job search and job procurement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 622. Global Business Consulting. 1-6 Credit Hours.
The Global Business Consulting (GBC) project is a collaborative course offered by participating CIBER schools to their Graduate Students. Students in related disciplines work in teams both virtually and in person on real business issues with multinational and local businesses and not-for-profits. Project supervision and final grade provided by Faculty Advisor.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

BUS 624. Asian/Pacific Business Environment- International Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 625. Latin America Business Environment - International Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BUS 628. Multidisciplinary Action Projects. 1-4 Credit Hours.
The Multidisciplinary Action Projects core course (MAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors. For students, MAP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. MAP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges. For sponsoring organizations, MAP offers access to a high-caliber team of 4-6 students, the latest business concepts and tools, an external viewpoint, and rapid turnaround. The ultimate deliverable to the sponsor from a MAP project is a set of actionable, data-driven recommendations. MAP projects are based on sponsor needs and address a wide range of business issues – from identifying new processes and improving existing operations to launching new products and targeting new growth opportunities. Sponsors come from many different industries – from alternative energy to business process outsourcing to consumer products to financial services to healthcare to real estate to telecom. Sponsoring organizations may be large corporations, small entrepreneurial start-ups, or non-profit organizations. While each MAP project is different in context, all have essential features in common. All confront students with a real business challenge of significant importance and no existing solution. All require applying concepts and tools from multiple disciplines to successfully complete. All require dynamic sense-making, fact-based decisions, and high-performance teamwork. All unfold in unpredictable ways. All conclude with teams presenting actionable recommendations to project sponsors and faculty advisors.
Components: EXP.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 629. Graduate Business Exchange Program. 1-16 Credit Hours.
Course content may vary from semester to semester at selected universities.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 630. Fundamentals of Economics, Accounting, and Finance. 4 Credit Hours.
This course provides an overview of business economics, accounting, and finance. Economic themes primarily focus on microeconomic topics such as demand, supply, elasticity, and forms of competition. Accounting concepts include corporate financial statements, cost-volume-profit analysis, and traditional and activity-based cost accounting. Finance topics include time value of money, capital budgeting basics, foreign exchange, risk and return, modern portfolio theory, and financial markets. The course includes an integration of many of these concepts through an exposure to business plan development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 631. Business Analytics and Operational Excellence. 4 Credit Hours.
This course combines three disciplines that form the basis of a modern analytical approach to business management: statistics, optimization, and operations management. Many of the concepts covered are cross-disciplinary and can be applied to a variety of business functions and situations. Although specific examples will be used during the course to illustrate each concept, instruction will focus on the general applicability of the material. Topics to be covered include: numerical and categorical data, population/sample, parameter/statistic, introduction to excel, frequency distributions, histograms, pie charts, measures of variability, pivot tables, measures of association, random variables and distributions, sampling, types of hypothesis and of statistical errors, linear programming, network models, sensitivity analysis, integer and goal programming, forecasting, inventory management and location analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 632. Introduction to Strategy, Market, and Management. 4 Credit Hours.
This integrated course focuses on the external environment in which business firms operate and on the management techniques through which managers organize and motivate human resources to support strategic initiatives. It emphasizes in particular three critical sets of actors: customers, competitors, and employees. The purpose of the course is to introduce the student to basic conceptual frameworks and analytic models that managers use to a) identify and understand the customer segments that make up a marketplace, b) formulate strategies that achieve a competitive advantage within that marketplace, and c) lead and motivate employees in the execution of competitive strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BUS 633. Business Plan Fundamentals and Communications. 4 Credit Hours.
This course provides students with the fundamentals in the development and preparation of a business plan, as well as of oral and written business communications. Students, after exploring new venture opportunities, will develop a comprehensive business plan, including its functional components (marketing, finance, operational, human and intellectual capital plans), the support with which to secure the needed financial and human resources, and the organization to manage the new venture. Students will also enhance their communication skills with which to identify critical issues, develop reasoned positions, display data, use visual aids effectively, state persuasive and compelling arguments for written documents as well as prepared and impromptu speeches, and deal with the media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 634. Research Project. 1-6 Credit Hours.
Individually supervised research project in selected field. Scope of work must be approved by supervision instructor prior to registration. Total enrollment may not exceed six credits.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 635. Research Project. 1-6 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement. The study will be supervised and graded by a faculty member.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 636. United States Business Environment - Domestic Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 642. Global Residency - South America. 2-4 Credit Hours.
This global residency in South America is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of South America – and their impact on business activity. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in South America.
Components: LEC.
Grading: SUS.
Typically Offered: Spring.

BUS 643. Global Residency-North America. 2-4 Credit Hours.
This global residency in North America is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. In this global residency students take a closeup comparative look at Mexico and the United States and their place in the global business community from the perspective of Miami and Mexico City. In Miami, students begin by examining the role of the United States in global business, guided by world-class faculty and thought leaders in the field. They engage with executives from leading multinational companies on topics such as sustainable business, corporate innovation, and principled leadership. Students then move on to explore, firsthand, the burgeoning business environment in Mexico. In Mexico’s capital city, they dive into topics as diverse and important as mega trends in business development, high performance management, and transformational leadership.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 644. Global Residency-Asia. 2-4 Credit Hours.
This global residency in Asia is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of Asia – through the perspective of visits to China and India. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in Asia.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 645. Global Residency-Europe. 2-4 Credit Hours.
This global residency in Europe is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of Europe – through the vantage point of visits to The Netherlands and Poland. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in Europe.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 650. Introduction to the Miami EMBA for the Americas. 1 Credit Hour.
This course provides incoming Executive MBA students an orientation to program tools and resources central to program success. Students will receive training in Blackboard, learn to access e-materials and navigate the business fundamental virtual modules, and increase their knowledge of business networking and influence. Students will also be introduced to business information resources and research strategies that they will use throughout the program. They will partake in Case Study preparation and receive an overview of the Integrated Project from Global Management, Global Enterprise, and Global Strategic Marketing perspectives. Students will also receive guidance on operating in teams both virtually and during the residency components of the program. Students will also participate in a corporate visit. This orientation also helps build a sense of affiliation among students and with the University.

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BUS 651. Global Strategic Marketing. 4 Credit Hours.
The purpose of this course is to acquaint the student with the theories and practice of strategic marketing management in the Americas. This course will enable the student to understand markets, develop strategies to capture value, and develop marketing plans based on the nature of national as well as international markets. Specifically, the issues of strategic marketing in the context of firm level strategy will be addressed, as well as issues of value capture and delivery, customer life-time value, pricing, distribution, branding and communication in markets.

Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 652. Global Strategy. 2-4 Credit Hours.
The purpose of this course is to change how the strategic environment is viewed, how students think about their own organizations and other others, and how strategy and its execution is viewed. This course will help the student: understand organizations as complex systems embedded in a set of evolving cooperative and competitive economic relationships; identify the distinct resources and capabilities that form the foundation of an organization’s competitive advantage; formulate business strategies that anticipate imitation and competitor response; evaluate the relationship between a firm’s competitive advantage and its growth opportunities; understand the role of the corporate center in supporting and enhancing the competitive success of operating divisions; and see the interplay of organizational structures, systems, networks, and influence centers that form the basis of effective strategy implementation.

Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
BUS 653. Global Institutions and Economy. 2-4 Credit Hours.
This course considers how a country's legal and economic institutional arrangements influence managerial strategy involving goods, services and financial flows across nations. The course addresses how economic problems are dealt with by institutional arrangements in different ways around the world. Discussions will emphasize the influence that these institutional arrangements have on managerial project strategy when firms operate across borders. Specific emphasis will be placed on legal, economic and financial institutions in the Americas.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 654. Corporate Financing and Investing. 4 Credit Hours.
This course considers financing and investing within the corporation. As such, it will consider the theoretical structure of the problem, the boundaries that management faces and how these decisions are made by management. The inter-residency portion will focus on the theoretical development and computational aspects of solving the problems. The residency portion will emphasize case discussion and simulation to demonstrate the practical implementation as well as integrating these concepts into the overall management picture. The objective of the course is to develop your understanding of the principles that define financial decision making in the firm. These topics are an important component of the strategic planning and top-level management of the firm. The course will guide you through the theory and computational aspects applying the theory, then through application to situations that will enhance and cement your understanding. Finance theory is universal and therefore does not apply to any given country or system. All of the applications will be international, multinational, or global in context. A central theme of the course is decision making. Specifically we will focus on the financial aspects of major strategic decisions. We will build on previous courses to understand how institutions, accounting, legal structures and more, affect these decisions.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 655. Public Policy and Health. 3 Credit Hours.
Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

BUS 656. Integrated Business Project. 1-6 Credit Hours.
The Integrated Project course (IP) requires students to formulate, develop and implement three business projects that address pressing organizational challenge, over the 17-month duration of the EMBA for the Americas. Students may work in teams or individually to develop actionable and valuable recommendations for their chosen organization and present project outcomes to faculty advisors during the February, June and October residencies. For students, IP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. IP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 657. Optimizing Human Capital. 2-4 Credit Hours.
The 21st century workplace has often been characterized as the “Age of Intellectual Capital,” a time in which competitive advantage is linked intricately to optimizing human resources in distinctive ways. In this dynamic, global marketplace, Darwin rules. To survive, organizations must provide the best products, the best services with the best labor or risk extinction. Contextual factors including changing demographics; global social, economic, and regulatory issues; and technological innovations have created major challenges for organizational sustainability. In a recent publication based on survey results from 94 countries, talent acquisition, retention, management, and engagement were viewed as “urgent” global trends for the 21st century. Utilizing a variety of pedagogical approaches, this course will focus on the ways in which human capital can be leveraged to create sustainability as well as work environments that engage the minds and hearts of participants to achieve strategic initiatives.
Components: LEC.
Grading: SUS.
Typically Offered: Spring.

BUS 658. Business Analytics. 2-4 Credit Hours.
One of the strengths of Business Analytics is its broad applicability. The skills learned in this module can be used in virtually any context of business, including but not limited to: finance, marketing, strategy, operations, logistics, transportation, health care, real estate, sports, manufacturing, etc. For that reason, rather than focusing on a single central theme, as do other modules in the MEMBAA program, the Business Analytics module touches on a variety of themes that illustrate its potential.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 660. High Performance Leadership. 4 Credit Hours.
The High Performance Leadership course was developed to help executives build a high-performance work environment and effectively operate in the multicultural environment of the Americas and the World. The course is divided into two parts. The first part, the inter-residency will concentrate on the facets of high-performance leadership. It will explore the fundamentals of leadership; investigate the major leadership theoretical concepts; explore a wide-range of leadership research; convey practical leadership implications; and share lessons in conquering self-leadership. This section will be taught online through readings, discussion boards, and case and leader analyses. The emphasis will be on building a sound grasp of good practice, and on developing the ability to apply such knowledge to actual business problems. The theories will be applied to specific situations. The second part of the course, the residency concentrates on the cross-cultural environment of the Americas (and global markets) and addresses four main topics. The first session focuses on Cross-Cultural Communication in Business and allows executives to understand culturally-specific communication patterns, negotiation styles, expectations, cues, and norms. The second session addresses Leadership Issues in Organizational Control and participants will explore ethical and moral dilemmas, and external communications by senior executives. The third session focuses on Cross Cultural Issues in Leadership and examines effective leadership across cultures. The final session addresses Guanxi and Doing Business in China. China is currently or will soon become the world’s largest economy (PPP basis) and is increasingly becoming important to the Americas. This session addresses critical thinking, cultural understanding, solutions to problems, and evaluating different options when doing business with China.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 661. Enhancing Global Operations. 4 Credit Hours.
This course focuses on how to manage more complicated global networks; how to optimize service and quality levels of performance; and, how to minimize risks yet maintain required capacities. Operational transformation requires commitment and expertise in strategy and execution to achieve lasting improvements. This course draws on research and real world issues confronting manufacturing and service companies today, providing strategic frameworks to enable executives to make smart choices so that their firms can deliver the products and services they are committed to providing their customers.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 662. Decision Making in Global Environment. 4 Credit Hours.
This course provides students with a systematic way to carefully think about decisions to arrive at more informed choices while doing business globally and specifically in the Americas. The course covers structuring decisions, creating alternatives, making tradeoffs among conflicting objectives, accounting for uncertainties and risk tolerance, and analyzing and evaluating alternatives. The course is intended to make participants aware of decision making issues surrounding global business, the dynamic issues surrounding their context, and how these affect managerial strategy. An objective of the course is to increase participants’ competence in managerial decision making related to globalization, institutions, incentives, corporate governance, regulation, business law, international finance and accounting, organizations and management (including culture), and international trade.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 663. Entrepreneurship and Innovation. 2-4 Credit Hours.
This course considers entrepreneurship and innovation within the Americas, together with a special emphasis on the Latin American context. The course covers the building blocks of the entrepreneurial process and pays special attention to the family business model where ownership is closely held. The objective of the course is to develop an understanding of the venture formulation process within the Americas and the processes that surround this. The topics of innovation; venture capital; venture formulation; human capital; market dynamics; technological readiness; role of government, regulation, and culture will be assessed. An objective of the course is to consider new models for venture design such as the agile model of development and the creation of the business canvases, a lean version of the traditional business plan.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 698. Selected Topics. 1-6 Credit Hours.
Topics in selected areas of business.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BUS 801. Introduction to Commercial Real Estate: Analysis and Field Experience. 3 Credit Hours.
Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a one-week, four module, on-campus class followed by a full-time internship at a local Commercial Real Estate Institution during the first summer of the program. Module I: Students are introduced to the complexities of commercial construction techniques used in South Florida and the important links between architectural plans and economic value to owners and tenants. Module II: Students are introduced to the terminology and financial analysis of commercial real estate. Module III: Students are introduced to the application of real estate finance and valuation principles using ARGUS Valuation – DCF. Module IV: Students participate in a required internship at a local Commercial Real Estate Institution. Regarded as a full-time student.

Components: THI.
Grading: GRD.
Typically Offered: Summer.

BUS 802. Commercial Real Estate Field Experience. 3 Credit Hours.
Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a full-time internship at a local Commercial Real Estate Institution during the first fall semester of the program. This internship is subsequent to their previous summer internship (BUS 700). Regarded as a full-time student.

Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ECO 600. Econometrics. 3 Credit Hours.
Statistical methods for estimating and testing mathematical models of economic relationships.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 601. Graduate Macroeconomic Theory. 3 Credit Hours.
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 602. Advanced Microeconomic Theory. 3 Credit Hours.
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 603. Monetary Theory and Policy. 3 Credit Hours.
Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 604. Topics in Applied Macroeconomics. 3 Credit Hours.
Course acquaints students with current substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 610. Mathematical Economics and Applications. 3 Credit Hours.
The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECO 611. Labor Economics (III). 3 Credit Hours.
The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 612. Economic Strategies for Firms and the Industry. 3 Credit Hours.
This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world applications are examined.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 613. Microeconomics of Sustainability. 2 Credit Hours.
The course examines production and costs from a sustainability perspective, emphasizing the tradeoffs associated with reducing energy and other natural resources in production processes. Conditions under which reducing natural resources while using more of other inputs reduces total costs without sacrificing production are derived. Extensions are studied in which the same conditions are derived under a more general definition of costs which includes the costs of natural resource use to society and to brand reputation. The course then examines consumer demand for energy efficient products, emphasizing financing arrangements which allow the household to avoid the up-front fixed costs of energy efficient durable goods. Finally, the course examines externalities: actions by the firm which impose costs or benefits to society in a way which is not accounted for by prices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 614. Valuing Public Goods. 2 Credit Hours.
While the costs of becoming more sustainable are relatively straightforward for the firm to quantify, the benefits to society (social benefits) are more difficult to determine. Nonetheless, assessing how clientele and other external stakeholders value sustainable practices is important if firms are to prioritize their efforts. This course will introduce students to the world of non-market valuation: the valuation of goods and services for which no true market exists with prices to reveal how much consumers are willing to pay. This class will provide a solid foundation for any manager to begin to understand how to appropriately value sustainable practices, enabling the firm to choose projects that provide the most social benefit net of implementation costs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 615. Managing Regulation Compliance. 2 Credit Hours.
Sustainability initiatives must be integrated with a complex set of government regulations. Regulation systems such as standards, tradable permits, and taxes are analyzed from the firm's point of view. Regulation systems are also studied when compliance costs are uncertain or changing over time. Many modern regulation systems allow firms to earn credits by over-complying, which can be sold or banked for future use. The course will study compliance/credit management, including over the business cycle and when regulation changes over time. The value of compliance/over-compliance to the firm's brand and to society/external stakeholders is integrated into the optimal compliance decision.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 616. Sustainability and Market Dynamics. 2 Credit Hours.
The course studies the impact of sustainability initiatives on the organization of firms in the market. The course derives conditions under which sustainability initiatives favor market entrants over incumbent firms and the reverse. The course studies the use of sustainability initiatives by firms to segment the market. The value of sustainability initiatives in oligopolistic versus competitive markets are also studied. Finally, the value of sustainability initiatives to external stakeholders and to the firm's brand is integrated with the benefits and costs of changes in the competitiveness of the market resulting from the sustainability initiatives.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 617. Enterprise Risk Management. 2 Credit Hours.
Tools for the measurement and mitigation of risk are developed. Measurement tools include value at risk measures, expert opinion, and the use of market prices. Mitigation tools include catastrophe bonds, derivatives such as weather derivatives, and adaptations (building resilience). Risks that are relevant to sustainability, such as fat tailed risk and environmental catastrophes, are emphasized. The value of environmental risk reduction to the firm and society are derived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECO 620. Advanced Econometrics. 3 Credit Hours.
Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 621. Advanced Macro Analysis. 3 Credit Hours.
Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 625. Applied Econometrics. 3 Credit Hours.
Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable modes, pooling cross section and time series data, model selection, and rational expectations models.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 633. Advanced Micro Analysis. 3 Credit Hours.
Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 634. Advanced Micro Analysis II. 3 Credit Hours.
Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 645. Regulations Economics. 3 Credit Hours.
This course examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 675. Latin America and the Global Economy. 3 Credit Hours.
Analysis of the economic, political, and social forces at work in the changing economies in Latin America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 680. Essentials of Economics. 2 Credit Hours.
This course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure. Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECO 685. Managerial Decisions in a Global Economy. 2 Credit Hours.
Modern techniques of economic analysis and decision science are applied to the management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 690. Essentials of Economic Theory. 3 Credit Hours.
An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 691. Managerial Economics. 3 Credit Hours.
Application of economic analysis to the formulation and solving of management problems and the determination of business policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 692. Applied Economics. 3 Credit Hours.
This course is to provide practice in applying economic principles for graduate students with a basic understanding of economic theory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 693. Applied Managerial Economics. 1 Credit Hour.
Managerial Economics is the application of economic theory to decisions made by firms and managers. This course approaches managerial economics from the point of view of a data driven manager or firm, seeking to apply economic theory to make business decisions. The course starts by teaching students how to use data on costs, sales, and pricing available at any firm to compute key metrics that needed to apply economic theory to business decision making. Students will learn data-driven methods to make key business decisions, such as how much to produce, what price to charge, and advanced pricing strategies such as up-charging and price discrimination. Students will learn how to make these decisions in both competitive and imperfectly competitive industries. Given the explosion of data being collected in many industries, companies are increasingly focused on combining economic theory and data to make better decisions. Indeed, many firms such as Google and Microsoft are now have in-house economics departments (as well as economists who work at investment banks and consulting firms) to advise on such decisions. Because in general these very fundamental decisions are made by higher level executives, economics becomes critically important for CEOs and other senior executives. This is one reason why economics is the most common major among Fortune 500 CEOs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 694. Game Theory and Economic Strategy. 1 Credit Hour.
Game theory is a powerful tool for making strategic decisions. This course teaches students how to use game theory to make better strategic decisions. The setting is a small group of firms (e.g. Apple and Samsung) or managers (e.g. a small team). In such settings, managers must anticipate decisions by others and react accordingly, and anticipate how others will react to their decisions. Game theory teaches students how to anticipate decisions by others, which allows for better strategy. The course will teach game theory tools for cases when managers make decisions simultaneously, when managers make decisions sequentially, and cases where managers have incentives to make their decisions hard to predict. Strategic decisions analyzed include price competition, market segmentation, market entry/exit, flash sales, cartels and collusive behavior, strategic inventory decisions, entry deterrence, and many others.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 695. Global Economics. 2 Credit Hours.
This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ECO 698. Selected Topics. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 699. Directed Study. 1-3 Credit Hours.
Graduate-level supervised readings, individual research project or independent investigation of selected economics problems. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECO 750. Applied Economics: IO. 3 Credit Hours.
The first part of the course will focus on static analysis of market outcomes. The emphasis will be on empirical work, and there will be a number of places where we take digressions into econometric and computational issues. The second part will focus on related fields (bargaining, auctions and market design), and then move on to dynamic analysis in I.O. (both single and multiple agent dynamic models).
PRE-REQUISITE: ECO 602 AND ECO 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECO 860. The Theory of International Trade. 3 Credit Hours.
This course presents rudiments in trade theory and open macroeconomics. International arbitrage as well as determination of the values of currencies and stocks.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 602. Fundamentals of Finance. 3 Credit Hours.
This is an integrated business course that focuses on the fundamental principles needed for better financial decision-making. First, the course will expose students to the fundamental concepts of investment theory and financial markets. The second part of the course provides students with the tools necessary to answer a key question facing corporate managers: What are good investments? Beyond these traditional topics in finance, the course exposes students to the emerging field of behavioral finance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 603. Advanced Corporate Finance. 3 Credit Hours.
Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 613. Intermediate Corporate Finance and Investments. 4 Credit Hours.
This course builds on the fundamentals of financial accounting and finance and provides an in-depth exploration of investments and corporate finance. Topics such as capital structure, the cost of capital, advanced capital budgeting, security valuation, and portfolio theory are covered.
Prerequisite: BUS 640.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 614. International Finance, Valuation, and Financial Statement Analysis. 4 Credit Hours.
This course uses an interdisciplinary approach combining international and corporate finance to build knowledge of international investment and valuation. This course teaches global financial decision making through student collaboration and real-world applications.
Prerequisite: FIN 613.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 615. Financial Decision Making. 4 Credit Hours.
This course explores decision-making theory to better understand why investors, money managers, and corporate managers make suboptimal economic and financial decisions. Specifically, the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. A variety of behavioral "biases" are examined as well as the impact of those biases on security prices, corporate policies, and aggregate economic outcomes. In addition, the course investigates whether the mistakes generate market inefficiencies that can potentially be exploited.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 616. Advanced Corporate Finance. 4 Credit Hours.
This course introduces students to advanced corporate finance topics, and builds directly on established concepts from prerequisite finance courses. The course integrates conceptual and applied case methodologies to develop practical solutions to real-world problems. Topics typically covered include working capital management, financial planning, optionality in decision making and hedging, agency theory, long-term debt management, leasing, and leveraged buy outs.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 617. Derivatives and Financial Modeling. 4 Credit Hours.
This course explores modelling applications for corporate finance and investments topics. Modelling financial problems in Excel is the standard way to approach in-depth analysis and understanding of complex problems. This course will look at several different types of models and financial applications. In addition, the class will explore financial options, futures, swaps, and financial engineering. It includes descriptive information, theory and applications. The goal of the descriptive information is for students to gain familiarity with the instruments and the markets where they trade. Theory is covered to understand the instruments, their pricing and behavior under different market conditions. Finally, applications of the use of derivative securities will be investigated in equity, fixed income, foreign currency, commodity, and credit markets.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 618. Quantitative Finance and Microstructure. 4 Credit Hours.
This course provides a cross-disciplinary coverage of statistics and market microstructure. Students will learn how to use Excel to organize and present data sets to visualize the general characteristics, and how to identify and understand the use of specific measures of location and dispersion. We will cover the most important discrete and continuous probability distributions, and apply and understand the Central Limit Theorem. Furthermore, we will calculate, use and interpret confidence intervals and hypothesis testing about the population mean and population variance. On the microstructure part, we will learn about the market structures used to trade securities, analyze the basic types of orders available to investors, and evaluate the risks and benefits of high-frequency trading and dark pools in financial settings.
Prerequisite: BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 619. Advanced Portfolio Management and Alternative Investments. 4 Credit Hours.
The objective of this course is to provide an advanced theoretical and practical understanding of various investment choices. The first half focuses on stock portfolios. It covers the five key dimensions of the quantitative portfolio management process: using signals ("factors") to forecast returns; measuring risk; portfolio optimization; controlling costs; and performance evaluation. The second half focuses on fixed income and alternative instruments, such as currencies, commodities, credit derivatives, and asset-backed securities. While covering each instrument, the course also addresses how macroeconomic, technological, labor market, taxation, and regulatory issues affect specific investment decisions.
Prerequisite: FIN 613.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 620. Investment Analysis. 3 Credit Hours.
This course deals with theory and application of investment analysis. Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 621. Portfolio Construction and Management. 3 Credit Hours.
The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 622. Financial Options and Futures. 3 Credit Hours.
Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 630. International Finance. 3 Credit Hours.
The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms is discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 631. International Financial Management. 3 Credit Hours.
Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 635. Quantitative and Analytical Fundamentals for Finance. 1-4 Credit Hours.
This four-credit course provides graduate students with an intensive review of the fundamentals of financial accounting and finance, and as well as microeconomic concepts and quantitative skills, needed as appropriate foundation to pursue the Master of Science in Finance degree or other master degrees that entail an elective course in finance. Topics include: Math concept review (functions, exponents, notation, weighted average, derivatives as applied to maximization/minimization); Measures of central location, variability, and association; Supply and demand curves, elasticity; Profit maximization; Markets: perfect competition, monopoly, oligopoly; Economic role of Government (monetary and fiscal policy, regulation, taxation); Basic financial statements (income statement, balance sheet, statement of cash flow, statement of changes in shareholders’ equity); Working capital, noncurrent liabilities and owners’ equity, investments and long-lived assets; Common size and ratio analysis; Principles in finance; Time value of money; Valuation (including bonds and stocks); Fixed income securities; Term structure of interest rates; Interest rate risk and duration; Capital markets, how securities trade, intermediaries; Capital market efficiency, arbitrage; Risk and return, portfolio math; Diversifiable vs. non-diversifiable risk; Asset Pricing Models (CAPM, beta, Fama-French); Capital structure; Capital budgeting; Cost of capital; Foreign exchange and global investing; Introduction to derivatives. The course will be taught over taught over a two-week period, primarily in lecture, homework, and test format.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 640. Nobel Prize Winning Ideas in Financial Economics & Current Topics. 1-3 Credit Hours.
The objective of this course is to introduce Nobel Prize Winning Ideas in Financial Economics. These ideas are key in defining "the language of Finance" and should be part of the intellectual toolkit of any financial professional. Research of more than ten Nobel Prize winners will be covered (Akerlof, Engle, Fama, Hart, Heckman, Holmstrom, Markowitz, Merton, Miller, Mirrlees, Modigliani, Scholes, Spence, Sharpe, Shiller, Thaler). The course also includes discussions of current topics in Finance. These discussions show how the Nobel Prize Winning Ideas in Financial Economics help frame the debate on current industry topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 641. Valuation and Financial Decision Making. 2 Credit Hours.
Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 642. The Financial Environment. 2 Credit Hours.
A continuation of FIN641, with an emphasis on important issues faced by corporate financial managers responsible for financing and investment decisions. Core topics include capital structure, payout policy, advanced capital budgeting, basic derivative and real option valuation, leasing, and investment banking. Specialized topics, such as behavioral finance, international finance, mergers and acquisitions, and risk management may also be introduced as the course progresses.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 643. Quantitative Finance and Market Microstructure. 2 Credit Hours.
This course aims to give simple yet useful quantitative finance tools, and a broad overview of the functioning of modern financial markets, to students wishing to broaden their knowledge of finance. The first part of the course exposes students to the microstructure of financial markets. We will learn about different trading mechanisms encountered in financial markets today, how information affects prices and liquidity, what algorithms practitioners use to implement their trading strategies, and some basic models of how dealers react to information. The second part of the course introduces students to statistical models commonly encountered in quantitative finance. We’ll have a hands-on approach, and learn how to estimate the models with real financial data using Excel and the statistical software R.
Prerequisite: FIN 642 or FIN 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 644. Real Estate Investment and Appraisal. 2 Credit Hours.
This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the ARGUS software that is a standard resource in the commercial real estate market.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 645. Real Estate Finance. 2-3 Credit Hours.
This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project. Students will complete projects that require them to evaluate the financing and investment potential of a small commercial site of their choice and to evaluate a lease vs. buy decision using a plot of land in Miami-Dade County from the perspective of a publicly-traded corporation.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 646. Real Estate Market Analysis. 2 Credit Hours.
The course aims to provide students with an understanding of the functioning of markets for urban space, and their role in real estate investment decisions. The course first treats urban-economic processes involved in the determination of prices for space, in a theoretical and empirical context. This economic understanding is then put to use on several case studies of market- and site- analysis for various land uses.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
FIN 647. Introduction to ARGUS. 1 Credit Hour.
ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment. 
Requisite: Limited to Accelerated Real Estate MBA Students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 648. Advanced ARGUS. 1 Credit Hour.
At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property. 
Prerequisite: FIN 647.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 649. Non-Profit Consulting Project. 1-4 Credit Hours.
This course is designed for students completing the Accelerated MBA in Real Estate. The course allows graduate students in real estate to synthesize and apply the concepts learned in real estate coursework to a real-life problem where the results will benefit a local organization in the non-profit sector. The supervising professor guides the students' efforts but the course topics and resources are driven by client needs and students skills. 
Requisite: Limited to Accelerated Real Estate MBA Students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 650. Financial Investment. 2 Credit Hours.
This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly important statistical concepts for investments, portfolio construction, asset pricing, and behavioral biases affecting financial decisions. The course is quantitative and introduces students to Excel as a tool to form and rebalance portfolios. 
Prerequisite: FIN 642 or FIN 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 651. Advanced Topics in Investments. 2 Credit Hours.
The course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion of market (in)efficiency, then covers the five key dimensions of the quantitative portfolio management process: using signals (“factors”) to forecast returns; measuring risk; portfolio optimization; controlling costs; and performance evaluation. 
Prerequisite: FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 652. Fixed Income Securities. 2 Credit Hours.
This course builds on FIN641/642 (or BUS640) and FIN650 and covers trading and valuation of a wide variety of fixed income securities including corporate, municipal, and Treasury pure discount bonds, coupon bonds, floating rate notes, bond embedded options, mortgages, interest rate swaps, currency swaps, equity swaps, and interest rate options. The course focuses on analytic tools used in bond portfolio management and interest rate risk management. These tools include spot rates, forward rates, credit spreads, duration and convexity, yield curve construction, and term structure models. 
Prerequisite: FIN 642 or FIN 602 or FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 653. Alternative Investments. 2 Credit Hours.
The course provides an advanced theoretical and practical understanding of various alternative investment strategies, with a specific focus on currency markets, derivatives (e.g., interest rate and credit derivatives), venture capital and private equity investments, and real estate investments. The course also examines how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions. In addition, the students learn about valuation, investment and risk management strategies of sophisticated investors and recent chronology of events that affect market participants. 
Prerequisites: FIN 641 and FIN 642 and FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
FIN 654. Impact Investing. 2 Credit Hours.
The course provides an introduction to the emerging field of impact investing, where traditional investment objectives are modified to include social and environmental considerations. The first part of the course exposes students to portfolio theory, asset pricing, and the analytics tools of portfolio management. Subsequently, using these traditional tools of financial investments, students learn to identify and evaluate the impact of social factors on portfolio decisions, financial risk, asset prices, and performance evaluation. Students also learn about the psychology of impact investing that influences the tradeoffs between financial and social returns.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 655. Smif Fund Analyst I. 1 Credit Hour.
This is the entry level class for the Category 5 Student Managed Investment Fund (Cat 5 SMIF) track. The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 656. Smif Fund Analyst II. 1 Credit Hour.
This is the second course in the Cat 5 SMIF track. In this course students will continue to learn about security analysis and improve their skills. These students will have some responsibility for overseeing students in the Analyst I class.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 657. Smif Fund Portfolio Manager I. 1 Credit Hour.
This is the third course in the Cat 5 SMIF track. This course broadens the focus of the students to the overall portfolio. Students will learn more about strategy, asset allocation, portfolio optimization, and related topics to managing an investment portfolio.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 658. Smif Fund Manager II. 1 Credit Hour.
This is the fourth course in the Cat 5 SMIF track. Members of this course will function as the senior officers of the fund. They will oversee students in the Portfolio Manager I class. They will be responsible for all administrative functions, performance measurement, and all reporting to the Academic Advisors, Advisory Board, and the University Treasurer. They may also be responsible to presentations to groups inside and outside the University for the purpose of publicizing the Cat 5 SMIF.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 660. International Finance. 2 Credit Hours.
This course builds on FIN 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and influence international trade and cross-border investment; the foreign exchange market structure and instruments; and the international debt and equity markets.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 661. Advanced Topics in International Finance. 2 Credit Hours.
This course builds directly on FIN 660 using a variety of techniques, including group projects and class discussion. A number of special topics are covered such as financing the multinational firm, currency swaps, international portfolio investment, international asset pricing, multinational capital budgeting and cross-border investment, and measuring and managing the many additional risk exposures faced by a multinational enterprise.
Prerequisite: FIN 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 662. Chinese Financial Markets. 2 Credit Hours.
Chinese financial markets has been one of the world’s largest and most vital economies. This course examines market history, structure, regulations, practices, conventions, and current issues in major financial markets in China. Like other emerging financial markets, Chinese financial markets are less researched and not well understood. Due to cultural and economic differences between Chinese financial markets and developed financial markets, Chinese markets have their own unique ways of operation and evaluation that may not be obviously intuitive to foreign investors. Additionally, China and Chinese markets are in continuous transformation at a high speed, which creates strong challenges and valuable opportunities for investors, both individual and instructional, to explore and extend their investment universe in terms of geopolitical location, currency, and asset classes. Learning Objectives: This course introduces students to China’s financial markets, explores current issues related to the future development of those markets, provides students specific and useful knowledge about investments in China and helps prepare them for careers related to these dynamic markets. It includes the following topics in Chinese financial system: 1. Money and foreign exchange markets 2. Bond markets 3. Equity markets 4. Futures and derivatives markets 5. Real estate markets 6. Mortgage, insurance, and the funds industry 7. Private equity markets 8. Private banking and wealth management 9. Qualified Foreign Institutional Investors (QFII) 10. Development of RMB as an international currency
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 663. Latin American Financial Markets. 2 Credit Hours.
This course analyzes the main financial markets in Latin America across asset classes and countries. In the first part of the course we present the stylized facts of financial markets and the main securities traded by financial intermediaries and firms in Latin America, including those traded in global markets (corporate and sovereign bonds, CDS, FX and interest rate products, CDS, FX and rate swaps, and OTC and exchange-traded derivatives). We describe the main products, exchanges, institutional and regulatory practices for the largest and most liquid local markets (Argentina, Brazil, Chile, Colombia, and Mexico). We discuss the main type of trades in LatAm markets, such as long only, long and short, arbitrage, relative value trades, FX and carry trades, rates trades (payer, receiver, curve trades), hedged trades, swaps and vol trades. The second part of the course will be based on case studies, which will teach how to blend Global Economics, Corporate Finance, and Investment Management to trade in Latin American markets. The student will be able anticipate the effects of changes in key macroeconomic policies and political events on asset prices, including FX, interest rates, sovereign bonds, CDS, and equities. The third part of the course teaches how to apply this knowledge into investment decisions ahead of actual data releases and policy decisions by the Fed and the main central banks in Latin America. Grading will be based on a midterm and a final exam; and brief reports in which the students defend their trade and portfolio recommendations before the aforementioned policy events that will occur during the course. This course will make intensive use of Bloomberg inside and outside the classroom.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 668. Wealth Management and Financial Planning. 1-4 Credit Hours.
This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.
Prerequisite: FIN 641 and FIN 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 669. Household Finance and Investment. 2 Credit Hours.
This is a course focusing on Household Finance with two main objectives. First, the course covers what we know about household investment decision making. This discussion includes the decision of U.S. households to participate in the financial markets, their asset allocation decisions and their overall portfolio construction. What households do is contrasted with what canonical financial models prescribe. The course covers what the reasons might be for any deviation of observed decisions from theoretical predictions. Second, the course introduces students to portfolio optimization algorithms that take into account real life risks. Specifically, we discuss portfolio optimization with labor, real-estate, and climate risk. Collectively, the aim of the course is to provide students with the necessary tools that would improve financial decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 670. Corporate Finance. 2 Credit Hours.
The course serves as a complement and supplement to 641 and 642 and builds up to more advanced topics in corporate finance. The course will quickly review some basic concepts like net present value and build up to special topics like real options, valuation, mergers and acquisitions and corporate governance. The main objective of the class is that students understand basic corporate finance concepts as well as develop a good understanding of how complicated firm level decisions are made.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 671. Advanced Topics in Corporate Finance. 2 Credit Hours.
This course builds directly on FIN 670 and on the MBA core classes, FIN 641 and FIN 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short- and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, IPOs, environmental considerations, and other current issues in corporate finance.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 672. Sustainable Finance. 2 Credit Hours.
Businesses of today are increasingly dealing with the risks and opportunities of environmental, social, and governance (ESG) issues due to the scarcity of resources, labor relations, and climate change. This course couples established and emerging corporate theory to study these sustainability challenges. It covers diverse aspects of sustainable finance, including ESG measurement, socially responsible and impact investing.
After establishing the benchmarks in understanding the core corporate finance principles, the course quickly moves on to understanding responsible investing from the shareholder perspective and how that affects firm performance and how that can be then used as a tool to establish a comparative advantage in the product market. The course also explores the meaning and importance of sustainable business practices that respect and adhere to ethical social responsibility standards through several case studies and simple econometric analyses.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 674. Financial Analysis of Mergers and Acquisitions. 2 Credit Hours.
This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 679. Private Equity and Venture Capital. 2 Credit Hours.
This course will cover the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The course will provide students with an understanding of corporate finance by applying central concepts and tools to a new and increasingly important industry. The course will also introduce students to the institutions of the PE industry and the valuation process used by PE investors.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 680. FinTech. 2-3 Credit Hours.
This course introduces students to Fintech, the emerging world of applications, concepts, developments, business models, and companies at the interface of Finance and Technology. The course format is a mixture of lecture and seminar-style student presentations. It covers the main Fintech areas like Peer-to-Peer-Lending, Crowdfunding, Mobile Payment Systems, Cryptocurrencies and ICOs, Robo Advising, Insurtech (insurance technology), and RegTech (regulatory technology). A special emphasis is given to how and by whom these emerging technologies are currently used, and how they may potentially change the landscape of finance and financial services in the future.
Prerequisite: BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 681. Financial Institutions. 2 Credit Hours.
This course focuses on the management of financial institutions, such as mutual funds, banks, hedge funds, and finance office of large corporations. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 683. Financial Modeling. 2 Credit Hours.
This course takes a variety of finance topics and implements them using practical spreadsheet models. Students are presumed to have a working knowledge of Windows and Excel, as well as a good understanding the material taught in the core finance classes. Topics include Time Value of Money, Capital Budgeting, Pro-Forma Financial Statements, Bond Analysis, and Portfolio Construction and Optimization. This course will meet in a "computer lab" (a classroom) for hands-on instruction. The course is structured as a "flipped" classroom, so lectures and learning materials are online and practice an application are done in the classroom. It is therefore extremely important that students are prepared for class each meeting day. Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 684. Advanced Financial Modeling. 2 Credit Hours.
The objective of this course is to introduce the new tools from artificial intelligence (AI) and machine learning (ML) to finance. The course will explain what the AI and ML tools are and then explain whether they are useful for common financial decisions (e.g., portfolio choice, managerial decisions, bankruptcy prediction, etc.). Prerequisite: FIN 683.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 685. Mathematics of Financial Derivatives. 2 Credit Hours.
This course builds on Finance 650 and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments. Prerequisite: FIN 650. and FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

The goal of this course is to use decision-making theory to better understand why investors, money managers, and corporate managers often make suboptimal economic and financial decisions. The first part of the course focuses on the basic techniques and models that a manager or an investor can use to make effective financial decisions. The second part of the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. In addition, the course examines the impact of those mistakes for financial markets (e.g., price bubbles) and the overall economy. The course should be useful to individuals who work in a corporate setting or at a money management firm (mutual funds, hedge funds, pension funds, etc.). Prerequisite: FIN 602 or FIN 642 or BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 687. Advance Mathematical Finance. 2 Credit Hours.
This course is the financial mathematics course of the Master of Science in Finance program. The purpose of this course is to equip students with the mathematical tools and techniques essential for being a successful portfolio or wealth manager. This course is also designed to provide a foundation for concurrent/subsequent coursework in investments and derivatives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 689. Applied Numerical Methods in Finance. 2 Credit Hours.
This course aims to give a rigorous overview of the numerical methods and techniques used in modern finance. The course will cover topics such as linear and nonlinear equations, interpolation, optimization, binomial and trinomial methods, finite difference methods, Monte-Carlo simulation, random number generators, option pricing and hedging. We will take a "hands-on" approach and implement all methods either using Python and/or Microsoft Excel.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 690. Risk Management & Insurance. 2 Credit Hours.
This course explores the field or risk management and insurance. Students learn about the fundamental nature and measurement of risk, the principal techniques used to manage risk for both corporations and individuals, and the major aspects of various insurance areas such as life, and property and casualty. The course includes foundational concepts important to the risk management industry, an exposure to risk modeling, and a broad overview of various types of insurance and their major concepts and terminology
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 695. Finance Internship. 1-3 Credit Hours.
Students are individually assigned to an operating business firm or other organization to gain insight into applied financial decision making and quantitative analysis in their area of career interest. Periodic reports and in-person meetings are required. Permission of program faculty directors is required prior to registration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 696. Finance Capstone Project. 1-3 Credit Hours.
The purpose of this course is to provide students the opportunity to apply financial models and quantitative skills to a client’s, real-life business challenge or opportunity. In the process of helping the client solve its problem or address an opportunity, students will simultaneously deepen their understanding of financial concepts, develop consulting skills, and practice teamwork and communication skills. The course is structured around the principles of experiential learning, and as such, will include iterative, explicit opportunities for students to think, do, and reflect on the lessons learned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 698. Selected Topics in Finance. 1-4 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 705. Financial Economics I. 3 Credit Hours.
This course is an introductory Ph.D. level course on the fundamental theories of asset pricing. Specifically, it consists of three parts. The first part focuses on individual choice under uncertainty. The second part develops equilibrium asset pricing theories, which include mean variance efficiency and the Capital Asset Pricing Model (CAPM), as well as the Arbitrage Pricing Theory (APT). The third part reviews recent development in asset pricing by introducing some stylized facts and new theories.
Requisite: Limited to Business PhD Students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FIN 707. Empirical Methods in Finance. 3 Credit Hours.
The objective of this course is to give you an introduction to empirical research in finance. This class is not designed like an econometrics class where the emphasis is the statistical specification of tests and the derivation of underlying asymptotics. The focus in this class is the understanding of the technique and the actual implementation in finance. The goal is to provide you with a toolbox of techniques that you can use to answer empirical questions in corporate finance and asset pricing.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 708. Financial Economics II. 3 Credit Hours.
This is a second course on asset pricing. The class is divided in two independent modules. The first module covers discrete time asset pricing models with frictions. These frictions include, among others, asymmetric information, slow-moving capital, delegated portfolio management, and short-sale constraints. The second module is an introduction to continuous time finance. Topics include introduction to stochastic calculus, derivative pricing and hedging, optimal portfolio choice, and equilibrium asset pricing.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 709. Behavioral Finance. 3 Credit Hours.
This course will cover selected topics from the field of behavioral finance. Issues related to both asset pricing and corporate finance will be discussed. The main objective of the course is to help students identify a few interesting research ideas and execute one of these ideas into a completed paper, which could be part of the student’s dissertation.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 715. Pe-Seminar Doctoral Students Workshop in Finance. 1 Credit Hour.
This course provides Finance PhD students an opportunity to i) discuss influential and well-cited research papers in financial economics, ii) incorporate contemporary finance research into their knowledge base, and iii) improve their research presentation skills.
Prerequisite: FIN 705.
Components: RSC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 825. Comprehensive Test Preparation. 1-3 Credit Hours.
Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

FIN 830. Pre-Dissertation Research. 1-6 Credit Hours.
For Finance PhD students currently writing their dissertation.
Requisite: Finance PhD Student.
Components: RSC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MAS 601. Applied Regression Analysis. 3 Credit Hours.
Theory and practical application of regression modeling and analysis. Understanding the role and responsibility of a statistician is also included.
Prerequisite: MAS 631.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 610. Statistical Analysis for Managerial Decision Making. 3 Credit Hours.
Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MAS 611. Principles of Quality Management. 3 Credit Hours.
The definition of quality management, its history, and comparison of various schools of thought. An introduction to the theories of systems, variation, knowledge, and psychology as they relate to quality management. Deming’s fourteen points for management are studied through examples and cases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 612. Advanced Quantitative Analysis. 3 Credit Hours.
The application of probability theory to the formulation and analysis of mathematical models for decision making. Applications are taken from inventory control, forecasting, waiting lines, quality control, production, and operations management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 617. Statistics and Data Analysis. 2 Credit Hours.
This course deals with introductory business statistics, as well as data acquisition, preparation, and visualization. It will introduce computer software to extract data and present information to stakeholders. Students will learn SQL for querying databases, as well as Tableau for creating quick visuals and interactive dashboards. We will also cover basic visualization capabilities in Excel and essential data-related concepts such as looking at data in a critical way to identify curious behaviors, and understanding basic data requirements and what to do when you do not have the exact data you need.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 628. Introduction to Accounting Analytics. 3 Credit Hours.
This course introduces students to applications of data analytics techniques in accounting which includes: financial reporting, managerial accounting, taxation, and auditing.
Prerequisite: ACC 301. And ACC 402. And ACC 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 629. SAS Programming for Business Analytics. 2 Credit Hours.
SAS (Statistical Analysis System) is considered a world leader in business analytics software. This course provides the student with the tools necessary to program in SAS at an intermediate level necessary for data scientists in many Fortune 500 companies in the pharmaceutical, financial, manufacturing and health care industries. The course begins with an introduction to Base SAS software, including the reading, manipulation and transformation of data. Techniques for restructuring data files, merging and concatenating data sets, creating summary reports as well as the utilization of basic statistical procedures will comprise the first half of the course. The middle of the course will focus on intermediate SAS skills for Data Management. The topics include error checking, report generation, date and time processing, PROC SQL, SAS Graph, SAS Macros, and the ODS (Output Delivery System) for production quality output. The last third of the course will include SAS statistical procedures most often utilized by data analysts and covered in the SAS Certified Statistical Business Analyst Credential.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 630. Quality Management in Practice. 3 Credit Hours.
This course presents administrative systems necessary for an organization or an individual to pursue quality management. The course presents a functional model for quality management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 631. Statistics for Managerial Decision Making. 2 Credit Hours.
This course aims to familiarize the student with statistical theory, tools, and methods required for business systems analysis and improvement. Topics include descriptive methods, elementary probability, random variables and the distributions, hypothesis testing, confidence intervals, statistical modeling, and regression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAS 632. Management Science Models for Decision Making. 2 Credit Hours.
This course aims to familiarize the student with Management Science tools for business systems analysis and improvement. The coverage includes linear and integer programming models, project management, simulation, queuing, and decision analysis. Some widely used software are illustrated through examples and case studies derived from business applications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAS 633. Introduction to Quality Management. 2 Credit Hours.
Introduction to the major elements of Dr. Deming's theory of management, including Dr. Deming's System of Profound Knowledge and Fourteen Points for Management. Additionally, participants are introduced to "Six Sigma" tools and methods. These tools and methods have been adopted with great success by many of the largest organizations in the world, for example, General Electric, Allied Signal, Dupont, American Express, and J.P. Morgan. Additionally, the course is a prerequisite for the "Six Sigma" Green Belt certification examination.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 634. Administrative Systems for Quality Management. 2 Credit Hours.
This course presents a model to pursue quality management (QM). It features administrative systems and structures necessary for Quality Management. The administrative systems and structures presented in this course are required to sit for the Six Sigma Management "Green Belt" certification examination.
Prerequisite: MAS 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 635. Design of Experiments. 2 Credit Hours.
This course presents tools and methodology useful in conducting experiments that provide valid answers to questions of interest to the experimenter. The course discusses an overall approach to obtaining and analyzing experimental data, the advantages of using structured multi factor experiments to screen for important factors, ways of minimizing the amount of data points needed to obtain desired information, and how to identify values of experimental factors that optimize the value of measured responses. Factorial designs, fractional factorial designs, screening designs, and response surface designs are presented. Emphasis is placed on the knowledge required for proper application of these methods through many examples in business and quality management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 636. Dashboard Tools for Visual Analytics. 2 Credit Hours.
This course teaches modern analytic tools for visual analytics and dashboarding to monitor and improve business processes. Students will learn to identify and communicate key performance measures visually and in an interactive manner accessible to everyday business stakeholders.
Prerequisite: MAS 631.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 637. Applied Regression Analysis I. 2 Credit Hours.
This course aims to familiarize the student with statistical prediction. It covers simple and multiple regression methods as well as time series and forecasting models in business. Instead of theoretical development, the course emphasizes the application of these methods in business systems analysis and improvement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAS 638. Business Analytics Consulting. 2 Credit Hours.
The purpose of this course is to enhance students' consulting skills in management science. In addition to skills of modeling and choosing appropriate tools for analysis, these include the communication skills of presenting quantitative and analytical material in business settings. The course is structured around a set of case studies that are based on real applications of management science models and methods discussed in MAS 631 and MAS 632.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MAS 639. Data Acquisition, Preparation, and Visualization. 2 Credit Hours.
This course teaches using statistical computing software to get a better understanding of what problems can occur (and what solutions exist) when dealing with a variety of data types and sources. It will also discuss how to address data visualization and how to leverage current methods and software to best communicate with results and decision with stakeholders.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 640. Applied Time Series Analysis and Forecasting. 2 Credit Hours.
Time series data occur when a single experimental unit or process is observed repeatedly over time. Data of this type are common in finance and economics. Statistical methods that assume independence are inappropriate for time series data. This course will provide the students with the basic theory and tools for the statistical analysis and interpretation of time series data. Broadly, the methods may be categorized into time-domain and frequency-domain methods. Time-domain methods develop explicit models for the evolution of a process over time. Frequency-domain methods equivalently model the correlation structure of the time series. Other topics include methods for model-based estimation, model selection, diagnostics, forecasting, and computing as they relate to time series analysis.
Prerequisites: MAS 637 or MAS 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 641. Operations Research Models in Management. 3 Credit Hours.
The application of Operations Research techniques in Management. Topics include linear programming, PERT/CPM, queuing theory, forecasting, inventory models, statistical quality control, decision theory, and Simulation.
Prerequisites: MAS 631 and MAS 632, and MAS 637, and MAS 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 642. Supply Chain Analytics. 2-3 Credit Hours.
This course studies key decision areas in supply chain design and operation. Students will learn what data are needed and how to use data to measure supply chain performance. They will also learn to apply various tools and methods to analyze trends, extract knowledge and business intelligence, and make decisions. Through the analysis and discussion of case studies, they will get useful insights on how to optimize the value of supply chain processes and operations, to streamline the goals and to design flexible supply chains.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAS 646. Applied Regression Analysis II. 2 Credit Hours.
This is a second course in regression modeling, extending the concept of linear regression for use with non-normal data such as binary, count, or time-to-event data. We will discuss estimation, inference, and model diagnostics with an emphasis on using statistical software to fit models and interpret the results. Topics covered include logistic regression for binary data, various extensions of logistic regression to multinomial data, Poisson regression for count data, and proportional hazards regression for time-to-event or survival data.
Prerequisite: MAS 601. Or MAS 637. With a Grade B or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 647. Computer Simulation Systems. 3 Credit Hours.
Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and output analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAS 648. Machine Learning for Data Analytics I. 2 Credit Hours.
Data Mining encompasses finding meaningful and useful trends in data. The meaningful part depends on the application and even the specific data set you are using. Another definition that can be used is that data mining is the application of statistical machine learning techniques to find these trends. Our focus in this course will be on the development and use of traditional and cutting edge data mining/machine learning techniques and their applications across a spectrum of data sets. The topics we will cover are in supervised learning (regression, classification), unsupervised learning (clustering, principal components analysis, factor analysis, etc), and if time permits semi-supervised learning and recommendation systems. Prerequisite: MAS 601. Or MAS 637. With a Grade B or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 649. Big Data Analytics. 2 Credit Hours.
As firms have the ability to access and store large amounts of customer and business data, they are faced with the complexities associated with Big Data. Big Data refers to very large data sets that can be analyzed to reveal important patterns, trends, and associations, especially relating to customer behaviors and business processes. This class will discuss the changes that are needed when handling, visualizing, and/or analyzing Big Data to solve business critical questions.
Prerequisite: MAS 601. Or MAS 637. And MAS 639. with a Grade B or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 650. Business Analytics Internship. 1-4 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 651. Machine Learning for Data Analytics II. 2 Credit Hours.
This course aims to introduce recent advanced analytical techniques developed from the Statistical, Data Mining and Machine Learning communities. These techniques have become widely used by Business Analysts and Data Scientists to address complex decision-making problems in numerous industries. This course is designed to provide students with a practical understanding of some of the most powerful Machine Learning methods used by today’s Data Analysts. Specifically, students will become familiar with supervised and unsupervised learning and apply these techniques to the numerous data-driven applications in predictive analytics. Prerequisite: MAS 648. with a Grade B or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 652. Business Analytics Capstone Project. 2-4 Credit Hours.
including data collection and analysis. The description of the problem in question, the approach used to address it, and the findings obtained by the group are to be described in formal written reports. The reports will be evaluated both on their quantitative value and on the quality of the writing.
Prerequisites: MAS 631 and MAS 632, and MAS 637, and MAS 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 653. Project Management and Modeling. 2 Credit Hours.
This course considers the various methods, techniques, and software tools of project management and modeling with special emphasis on real estate projects and development. Topics include: project selection and strategy, risk assessment, conflict and negotiation, budgets, costs, and resource allocation, monitoring and information systems, project control and auditing, and project closure. The course is designed to show the integration of the various roles of owners, developers, builders, architects, and engineers in the project management process.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAS 663. Spatial Statistics. 3 Credit Hours.
Spatial data commonly arise from many fields including business, ecological and health studies. Such data are often spatially correlated which poses challenges to both estimation and statistical inference. We will discuss advanced techniques to tackle the spatial correlation. Topics including variogram estimation, spatial prediction, spatial point pattern analysis, estimating function based methods, and others. Real data examples will be used to motivate and illustrate the use of these methods.
Prerequisite: ECO 520.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAS 681. Statistical Machine Learning. 3 Credit Hours.
This course introduces statistical aspects of machine learning algorithms. The focus is on characterizing the generalization ability of machine learning algorithms in order to quantify their performance on new data. It covers fundamental techniques in statistical theoretical analysis, their applications in supervised and unsupervised learning algorithms, and their applications in statistical and computational tradeoffs in non-convex optimizations.
Prerequisite: ECO 520. And ECO 620. Or MAS 601. with a Grade B or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAS 691. Topics in Business Analytics. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 692. Topics in Management Science. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAS 693. Directed Study in Business Analytics. 1-3 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 695. Directed Study in Operations Research. 1-3 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 696. Directed Study in Statistics. 1-3 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 699. Directed Study. 1-3 Credit Hours.
Offered by special arrangement.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 720. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in MAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 725. Continuous Registration--Master's Study. 0 Credit Hours.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.
MAS 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MAS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MAS 850. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MGT 600. Managing for Employee Engagement. 3 Credit Hours.
For Executive MBA students only. Course covers organizational behavior and utilizes cases and lectures to explore topics such as personality, motivation, leadership, group processes, organizational structure/design, and social responsibility.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGT 602. Human Resource Management. 3 Credit Hours.
Modern human resource/capital management: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, compensation and benefits, labor relations, employee engagement programs, human resource legislation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 603. Leading Teams. 3 Credit Hours.
The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and/or exercise leadership in teams. Topics include team development, decision making, and diagnosing team process issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 604. Design Thinking. 1 Credit Hour.
The purpose of this course is to impart students the principles of design thinking. Design thinking is an essential tool for understanding the customer, not just from a functional perspective but from an emotional one. Students will learn how to create an empathy map and a prototype. This is a hands-on learning experience that will challenge students to get out into the real world to talk to people and test their ideas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGT 605. Digital Global Strategy. 1 Credit Hour.
This course will explore various digital global strategy issues faced by international companies and new ventures, aiming at improving MBA students’ ability to think and act digitally and internationally. By focusing on the complex issues caused by digital globalization we seek to help our graduate students develop novel digital global strategies that would redefine how their companies pursue international expansion and manage geographically dispersed businesses in the digital age. This course will also offer insights into new ways of organizing and managing global business through digital connectivity so as to sharpen speed, flexibility, orchestration, and efficiency for both interfirm and intrafirm activities in various countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 606. Executing Growth Strategies. 2 Credit Hours.
This course has three key objectives. First, to help students understand key challenges in executing growth strategies in a digital age and how to develop analysis frameworks to identify such challenges. Second, to familiarize students with different modes of increasing or decreasing corporate scope and provide them with a toolkit to evaluate and compare such different modes. Third, to help students understand how behavioral biases, internal stakeholders, and external stakeholders influence growth strategy decisions and how to avoid potential pitfalls associated with such decisions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MGT 607. Improving Business Processes. 1 Credit Hour.
Operations Management involves planning and coordination of all the activities – from acquisition of resources (outputs), through their transformation into products (outputs), and to their ultimate delivery to customers – in manufacturing, service, and non-profit organizations. To plan and coordinate these complex inter-connected activities, businesses employ operations managers at every level from first-level supervisors to Chief Operations Officers. Such managers face a wide variety of challenges in planning and executing operations strategies, and aligning them with the organization’s business goals. Adopting a process-based view of the business organization, this course will present some of the decision problems facing operations managers – such as process planning and capacity planning – as they pursue this strategic fit. Students will develop structured approaches to address these decision problems and then learn to apply these approaches in practical contexts through problem solving exercises, case studies, and simulations that emphasize experiential learning.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 608. Leading with Insight. 2 Credit Hours.
This course consists of several topical areas that students should master in order to understand more about their personal abilities to effectively manage, lead, and motivate others. Class sessions focus on helping students develop critical thinking, a hands-on skill they will need to be effective as they maneuver interpersonal dynamics. Topics include employee/team personality assessments; perceptual biases and their impact on performance judgements; understanding motivational dynamics; controlling one’s own emotions, as well as understanding the effects of emotions on performance; learning about interpersonal conflict and how to manage the dynamics associated with the process; and developing an inclusive workplace and team.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 609. Leading with Introspection. 2 Credit Hours.
Leading with introspection is about understanding your leadership style and how you influence others. Effective leadership requires understanding of personality traits and behaviors. In this course, students will learn the skills necessary for leading followers, teams, and organizations. The development of trust is an essential aspect of leadership and will be emphasized. Understanding of negotiation in dependency situations and negotiation styles is featured. The course will also cover recent developments in leadership theory and research, including authenticity, ethical, and servant leadership. Applications of course concepts are encouraged through self-assessments and case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 610. Leading with Foresight. 2 Credit Hours.
Leading with foresight is needed in today’s organizational environment that is volatile, uncertain, complex, and ambiguous (VUCA). Teams are one of the most important ways to respond to this environment. Effective teamwork requires breakthrough thinking, empowerment, and innovation. But, all too often, team leaders fail to support teams in ways that create the conditions for high performance. In this course, you will learn the skills necessary to lead high performance teams. The course will cover team basics, including team formation, team norms, and team development. The course will feature essentials of team leadership highlighting the importance of team creativity, team decision making, and virtual teams.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 611. Negotiating your Salary and Job Package. 1 Credit Hour.
Negotiating your salary and job package can be one of the most stressful times in your career. After all, it is your future on the line, and emotions run high. This course will focus on reflection on the negotiation skills you already have and building on them through readings, negotiation assessments, and two negotiation simulations in a salary negotiation context. Negotiation fundamentals will be reviewed and issues of gender, emotions, and subjective value are featured.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 612. Optimizing Operations under Uncertainty. 1 Credit Hour.
This course will focus on two important operational levers that managers have in matching supply with demand – inventory and capacity – as they pursue this strategic fit. Specifically, structured approaches to address decision problems that arise in the contexts of waiting lines and inventories will be developed, and then students will learn to apply these approaches in practical contexts through problem solving exercises, case studies, and simulations that emphasize experiential learning.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MGT 613. Strategy for Dynamic Environments. 2 Credit Hours.
This course helps students understand and analyze dynamic environments to facilitate formulation and implementation of adaptive strategy. Readings and cases are the foundation for robust discussion and debate that will help improve students’ ability to think and act critically. Course material selection and sequence help illustrate business and corporate level strategy, and provide an understanding of how to create synergies by integrating actions across these levels. Experiential exercises illustrate cognitive challenges to developing innovative strategies, leveraging network relationships, and designing creative organizational structures to generate competitive advantage. Students will utilize frameworks and problem-solving techniques to develop critical thinking, vigorous analysis, and evaluation of alternatives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGT 616. Foundations in Management Consulting. 2 Credit Hours.
This course is designed to provide graduate students with an in depth exploration of the management consulting industry, being a professional consultant both internal and external to an organization, client relationship management and the consulting lifecycle used by top global consulting firms – on how to identify, diagnose, plan, solve problems, sell consulting work, use organizational management consulting methodologies, lead, project manage and close out consulting engagements.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 617. Leading Across Cultures. 2 Credit Hours.
This course examines what constitutes "effective" leadership across cultures. Skills and behaviors that are perceived as effective leadership in one culture are not necessarily those that will be effective in a different culture. By exploring the ways in which specific cultural values and leadership prototypes are seen across different cultures, students will be prepared for cross-cultural adjustment and effective leadership. These skills may be applied to work assignments in a culture that is not their own or to leading diverse followers in their home country. The goal of the course is to help prepare students for leadership in multicultural environments.
Prerequisites: MGT 600 or MGT 620 or MGT 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 618. Leading Change in Organizations. 2 Credit Hours.
Charles Darwin aptly noted, "It is not the strongest species that survive, not the most intelligent, but the ones who are most responsive to change." The primary goal of this course is to help you learn how to lead and manage the challenges associated with organizational change processes. Together we will identify the opportunities that require change programs; discuss ways to overcome the inevitable obstacles to change; learn how to build successful coalitions to support change efforts; analyze strategies for implementing change; and examine ways to consolidate the results of such efforts to ensure that changes are sustainable over time.
Prerequisites: MGT 600 or MGT 620 or MGT 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 619. Leading with Power and Influence. 2 Credit Hours.
One of the realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational activities aimed at enhancing one’s own or one’s group’s personal agendas. This course focuses on preparing graduates for the challenges and "realities" they will ultimately face as leaders. Given that most students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and, within ethical bounds, exercise influence.
Prerequisites: MGT 600 or MGT 620 or MGT 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 620. Managing Through People. 2 Credit Hours.
This core course in the MBA program introduces students to some of the key behavioral topics necessary to manage oneself and others in organizations. Specifically, the topics covered include individual attributes (personality, perception, motivation, relationship building), group processes (norms, roles, and team basics), leadership views, and organizational culture/change. An understanding of the relationship between each of these areas and organizational outcomes is enhanced through lecture, cases, and interactive exercises.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MGT 621. High Performance Leadership. 2 Credit Hours.
Leadership skills are critical for high performing organizations. Course utilizes lecture, cases, exercises, self-assessments, and contemporary reading materials to present leadership approaches that both motivate and enable employees to perform beyond normal or ordinary expectations. Topics include followership and organizational culture, power, influence, rewards and punishments, path-goal and exchange theories, participation and empowerment, charismatic and transformational leadership, and contingency and cognitive resources theory.
Requisite: Master of Science in Management Studies Students Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 622. High Performance Teams. 2 Credit Hours.
This elective course highlights how to manage and construct effective teams to achieve strategic goals. Team-based organizations have been created to enhance organizational performance. The benefits of effective team leadership are performance beyond expectations and enhancement of learning for employees. Topics covered include team decision-making, team leadership, diversity in teams, conflict resolution, and team creativity.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 623. Human Resource Systems. 2 Credit Hours.
Leaders must manage their human resource assets effectively to achieve high performance organizations. Course topics include recruitment and selection of high performance employees, designing performance appraisal systems, implementing policies to satisfy legal issues impacting human resources, and instituting training/development systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 624. Negotiation Strategies. 2-3 Credit Hours.
This course is a skills-based approach to learning the art and science of negotiation. Negotiation is a core management competency; these skills are increasingly necessary for leaders in business, non-profits, small businesses and other organizations. This course will cover preparation, and negotiation skills such as establishing trust and relationship-building. Topics covered include power, persuasion, creativity and problem-solving, ethics and cross-cultural negotiation. Skills and self-insight will be acquired through self-assessment, role-play negotiation exercises and case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 625. Entrepreneurship: Creating New Ventures. 2 Credit Hours.
This is a two-credit course for MBA students (only). The course is designed to help students understand the basic essentials for creating a new venture. Among some of the topics covered will be: preparation of a business plan, securing sources of capital, choosing and creating appropriate distribution channels, and understanding the complexities of selecting a management team. Students will be required to critique and develop business plans as a key evaluation component for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 628. Global Entrepreneurship. 4 Credit Hours.
This seminar-type course is an advanced elective specially designed for graduate students either interested in starting their own firms or developing the skills with which to submit business plans within the corporate world (i.e., corporate entrepreneurship) in today's global, interdependent economy. Students will learn to assess the new venture opportunities that he/she may have considered and choose the one that seems most attractive and viable and develop a unique business model which enhances the plan's viability in the short term, and ensures the development of sustainable advantages in the long term. Each student will draft a comprehensive business plan after working on its functional components (e.g., marketing, finance, human and intellectual capital plans) to be developed throughout nine classes and several individual meetings along the program's academic calendar. At the end, students will present their business plans to a panel of new venture investors who will assess all projects, give individual feedback, and choose the best project(s).
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

MGT 630. Designing Organizations, Jobs, and Lives. 2 Credit Hours.
Organizations, like machines, are complex systems comprised of interconnected parts and like machines they need care and maintenance in order to function well. In this course we will think about various aspects of organizations and jobs within those organizations that need to be consciously designed (and re-designed intermittently) and consider the trade-offs for both the organization and its employees inherent in these design choices.
Prerequisite: MGT 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MGT 631. Leading With Emotional Intelligence. 2 Credit Hours.
Emotional Intelligence is one
Prerequisite: MGT 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 642. Supply Chain Analytics. 2-3 Credit Hours.
This course studies key decision areas in supply chain design and operation. Students will learn what data are needed and how to use data to measure supply chain performance. They will also learn to apply various tools and methods to analyze trends, extract knowledge and business intelligence, and make decisions. Through the analysis and discussion of case studies, they will get useful insights on how to optimize the value of supply chain processes and operations, to streamline the goals and to design flexible supply chains.
Prerequisite: MAS 632 or MAS 641.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 643. Principles of Operations Management. 2 Credit Hours.
Introduction to operations management, forecasting, process analysis, aggregate planning, capacity management, waiting line management, system design, quality management, and inventory management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 645. Principles of Supply Chain Management. 2 Credit Hours.
Course introduces students to the business discipline of Supply Chain Management (SCM) which centers on concepts and techniques that enables firms to better coordinate material and information flows, and non-material activities associated with logistical and marketing processes that occur within and across organizations. Course also discusses concepts and recent influential innovations in SCM (e.g., Cross-Docking, Vendor Managed Inventory (VMI), Third-Party Logistics (3PL), Efficient Consumer Response (ECR), and Quick Response (QR)).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 646. Sustainable Supply Chains. 2-3 Credit Hours.
This course analyzes problems and solutions associated with building sustainable supply chains. Students will study how to design a supply chain so as to maximize the cost of monitoring suppliers for compliance with sustainability initiatives. The course will develop optimal formal/informal incentive contracts for promoting investment by suppliers in sustainable capital and equipment, including product testing equipment. Supply chain problems such as the hold-up problem, delegation vs. control of suppliers’ sustainability practices, and supplier auditing are considered in the context of developing sustainable supply chains. Sustainability issues associated with suppliers in developing countries are also considered, including private versus state owned suppliers and the degree of enforcement of local regulations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 651. Behavioral and Organizational Systems. 3 Credit Hours.
Exploration of relevant concepts, research findings, and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 653. Deriving Competitive Advantage through Operations. 3 Credit Hours.
Introduction to major managerial decision problems and processes of operations management. Topics include the design of operations, planning, quality control, resource allocation, and integration of operations management with the other functional areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 655. Research Methods. 3 Credit Hours.
Course addresses the fundamentals of research in business including exploratory designs, correlational and multivariate designs, experimental and non-experimental studies, measurement theory, internal and external validity considerations, and ethical requirements in conducting organizational research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MGT 656. **Seminar: Organizational Behavior. 3 Credit Hours.**
Seminar addresses the current research and theoretical foundations in organizational behavior. Topics include individual attributes, job attitudes, leadership, motivation, and group processes.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

MGT 658. **Innovative Business Strategies for Future Leaders. 3 Credit Hours.**
This course will explore critical strategic management and business policy issues faced by executives and managers in dynamic environments, aiming to improve their ability to think, plan and act strategically. Emphasis will be placed on critically evaluating internal resources and external environments, formulating viable business-level and corporate-level strategies, mapping optimal business models and solutions, and pursuing entrepreneurial opportunities and innovation so that their firms, established or nascent, can achieve sustainable competitive advantages and desirable performance in an increasingly interconnected yet complex business world.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MGT 659. **Management of Multinational Enterprise. 3 Credit Hours.**
Analysis of the management tasks confronting managers operating in the international arena presented from both an environmental and an operational perspective. Alternatives for overall corporate policy and strategy that accommodate global operations is also included.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MGT 660. **Leadership and Motivation in Organizations. 3 Credit Hours.**
Selected topics pertaining to leadership, motivation, and individual processes are surveyed through selected readings, class discussions, and a guided research project. Students' ability to conceptualize, integrate, and apply diverse approaches to the leadership and motivation of people in organizations is emphasized.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

MGT 661. **Influence, Power and Politics in Organizations. 3 Credit Hours.**
One of the basic realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational politics aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduate business students for the challenges and "realities" they will ultimately face as managers. Given that most business students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and exercise power within ethical bounds.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

MGT 667. **Leadership for Sustainable Organizations. 2-3 Credit Hours.**
This course covers the essentials of front-line leadership in sustainability, from integrating sustainability into an organization, executing organizational strategy, and committing to it for a lifetime. It is an exploration of the most prominent issues in the field of leading for sustainability; for example, leader traits required to promote and support change, how to deal with real world constraints, and ethical considerations.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MGT 675. **Business Policy and Strategy. 2 Credit Hours.**
The objectives of the course are to improve the student's ability to think strategically and to provide an intellectual framework that enhances understanding of the MBA program. The course focuses on relationships among the firm, its strategy, and its environment; why firms choose certain businesses; which business strategies are successful; and how firms can change in response to a dynamic environment. Models for strategic formulation, implementation, and control are developed that facilitate an integrated understanding of the courses that comprise the MBA curriculum. Readings and lectures illustrate strategic management theories and frameworks while case discussions, experiential exercises, and team projects provide opportunities for application.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.
MGT 677. Corporate Strategy and Organization. 2 Credit Hours.
This capstone course focuses on the perspective and skills of the general manager. Its purpose is to provide practice in diagnosing and identifying realistic solutions to complex strategic and organizational problems. Course builds on previous coursework by providing an opportunity to integrate various functional areas by providing a total business perspective. Since the course focus is on pragmatic, action-oriented general management skills, the course is taught primarily through the case method and requires both written analyses and case presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 679. Entrepreneurial Mergers & Acquisitions. 0-2 Credit Hours.
This course explores the evolving world of mergers & acquisitions (M&A) from the perspective of both buyers and sellers. We will examine the process itself – including the role of advisors, due diligence, and post-closing steps – as well as develop a framework for assessing value and risk. Our primary focus will be on the strategic rationale, or thesis, behind any M&A deal. By the end of the course, students should be comfortable with M&A terminology, analytical tools, valuation methodologies, and the business logic employed by successful buyers and sellers. Our approach will rely heavily on microeconomic analysis and a sophisticated understanding of incentives (and their unintended consequences). As the class progresses, you will learn how to effectively negotiate a deal, craft a strategic plan for either acquisition or sale, and formulate an effective due diligence outline as a buyer.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

MGT 680. Doing Business in China. 2 Credit Hours.
This course explores various business and management issues faced by international executives who are interested or active in various industries and markets in China, aiming to improve their understanding of this largest emerging market in the world. Several case studies of business organizations and industries are used throughout the course. Emphasis on the course material and class discussions on critical thinking, solutions to problems, and evaluating different options.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 681. Essentials of Health Care Management and Policy. 3 Credit Hours.
This course develops an understanding of the basic elements of the health care industry in the United States. A systems approach will be used utilizing a historical perspective as a basis and moving on to current and potential future system dynamics. The various components of the health care system will be examined, including physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Various elements associated with the financing of health services will be examined as well as indemnity insurance, capitation, and the role of managed care and consumer driven health care in theory and practice. The role of government and its impact on our health care system will be explored as well.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 682. Issues in Health Care Administration. 3 Credit Hours.
A seminar on current problems and issues in health care administration.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 684. Analysis of Health Care Delivery and Policy. 3 Credit Hours.
This course examines theoretical and operational incentive structures which guide health care consumers, providers and health care organizations toward decisions both efficient and inefficient.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MGT 685. Economic Models in Operations and Supply Chain Management. 3 Credit Hours.
In this course we will study the academic literature that is based on analytical models of supply chain and channel management. In particular we will be concerned with models that capture the economics that govern the interaction among the firms in a supply chain/distribution channel. Since this topic is of interest to both the marketing and operations management communities, we will draw upon readings from both areas. One of our objectives will be to identify opportunities for building bridges between these two bodies of knowledge.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
MGT 686. Optimization Models for Operations and Supply Chain Management. 3 Credit Hours.
This course is designed primarily for advanced graduate students who are interested in research on supply chain and operations management, focusing on the study of (deterministic) optimization models to support system design, planning, and operational decisions. The course complements other related doctoral courses such as those on economic models for supply chain and operations management.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 687. Health Care Organization, Economics, and Ethics. 3 Credit Hours.
Course provides the student insight into organizational and behavioral aspects of the various sectors and agents within the health care industry and understanding of how such aspects in turn affect performance measured in terms of both economic and ethical criteria.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 688. Individual and Interpersonal Processes. 3 Credit Hours.
Basic Overview of many topics relevant to studying individuals and dyads in organizations. Course will introduce students to a variety of topics related to individual and interpersonal differences, processes, and behaviors in organizations. Students will begin to see how to link research designs with a theoretical framework for empirical testing.

Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 689. Doctoral Seminar in Leadership and Group Processes. 3 Credit Hours.
This seminar examines the theory and research that focuses individual leadership and examines implications for individual and group behaviors as well as bridging the micro-macro divide. You will perform a critical in-depth examination of the primary research literature, focusing on appropriateness of design, analysis, interpretation, contribution and future research directions.

Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 690. Sustainable Business Operations: Value Creation and Environmental Considerations. 3 Credit Hours.
This doctoral level course is intended to familiarize students who are not environmental specialists with relevant facts and analyses on sustainable evolution: What are the key concepts? What is at stake? Who are the key stakeholders? Who is leading the way in reshaping operations strategies as well as public policy? What are some key lessons learned from successes and failures to integrate the environmental component? Specifically, the course will draw extensively from the rich literature in supply chain operations, international business and marketing on how firms interact with one another to create and offer sustainable products and services to consumers.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 691. International Management. 2 Credit Hours.
Course is designed to provide an overview of management problems and issues for organizations and executives operating internationally. Students learn how multinational enterprises are different, why they behave as they do, and how to apply management principles to problem-solving in such contexts.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 692. Theories in Management and Organization. 3 Credit Hours.
This course provides an in-depth review of major theories in the broad field of management and organization. It covers a multitude of management and organization theories that are derived not only from general management but from economics, sociology, ecology, and the like. The course will use several techniques, including lectures, article presentations and discussions, theory development, research project, and manuscript preparation. By the end of the term, students are expected to understand the central notions of each theory being discussed, comment on various arguments in these theories, improve the skills in applying these theories to their specific research questions, and sharpen their ability to develop theoretical models.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.
MGT 693. Theories and Research in Global Strategic Management. 3 Credit Hours.
This course is designed to provide doctoral students an in-depth review of major theories, paradigms, and perspectives in global strategy and international business. We'll also explore how to apply existing theories and perspectives to new contextual settings, such as emerging markets and outsourcing. Furthermore, we'll do all this while reading and critiquing the major branches and works within the strategic management and international business literature. The course is intended for doctoral students in business or related fields. There are no formal prerequisites for the course although some basic knowledge of global business is expected.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 694. Ph.D. Seminar in Strategic Management. 3 Credit Hours.
This course is designed to provide doctoral students an in-depth review of major theories, perspectives, and methods in strategic management. The course is intended for doctoral students in business or related fields.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGT 695. Ph.D. Seminar in Emerging Market Research. 3 Credit Hours.
This course is designed to provide doctoral students an in-depth review and study of major theories, perspectives, methods, findings, and future research issues in business and management involving emerging economies. It encompasses both macro- (e.g., strategic management, international business, entrepreneurship) and micro- (e.g., culture, human resources management, leadership, and organizational behavior) levels.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MGT 698. Selected Topics. 1-6 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGT 699. Directed Study. 0-6 Credit Hours.
Individually supervised research project in selected field of management. Approval of supervising professor of the topic/scope of work/evaluation is required prior to registration.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MGT 825. Comprehensive Test Preparation. 1-3 Credit Hours.
Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MGT 830. Doctoral Dissertation. 1-12 Credit Hours.
Course is required of all candidates for the Ph.D. The student enrolls for credit as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MKT 620. Addressing Customer Markets. 2 Credit Hours.
In this course, we will learn how a firm can create value for the customers and capture some of that value back in the form of profits. We will learn key principals (from psychology and innovation) that a firm can use to shape consumers’ perceptions of value. In addition, the course will cover the tools necessary to attract and retain profitable customers. Given the fast pace of change in the current marketscape, the course will pay close attention to how the challenges of creating and capturing value shift as the consumers, competition, and the markets evolve. Students will use empirical data and critical thinking tools to first arrive at the correct diagnoses of the marketing problem and then devise sustainable and creative solutions. The course will take a broad approach. The goal is to develop classical and contemporary marketing know-how and analytical skills that an executive in the company needs to have regardless of his or her functional role.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
**MKT 622. Behavioral Pricing. 1 Credit Hour.**
Price is the only component of the marketing mix that generates revenue for the firm. The remaining P's (product, place, and promotion) are costly activities undertaken to create value for the consumer. Price, in its ideal form, recaptures this value. Yet, most companies adopt very simple heuristics, or rules of thumb, for setting prices, often divorced from firm strategy and economic reality. This course will introduce the student to frameworks relevant to making pricing decisions. While pricing strategies are taught under the rubric of many diverse disciplines, we will take an integrative approach, combining strategic, economic, marketing, and psychological considerations in building a behavioral approach.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**MKT 639. Marketing Honors Research Project. 3 Credit Hours.**
Research project to fulfill requirements for Departmental Honors in Marketing.

**Components:** THI.

**Grading:** GRD.

**Typically Offered:** Offered by Announcement Only.

**MKT 640. Foundations of Marketing Management. 2 Credit Hours.**
Course introduces students to the analytical concepts and tools of marketing management. Special emphasis is placed on the relationships between marketing and overall company strategy, the development of a customer orientation, the integration of marketing throughout the organization, and the implementation of systems for planning and controlling the marketing effort. Students consider problems of consumer analysis, product planning, integrated communication, distribution, and pricing. Data and analysis required to make effective marketing decisions are also examined. The discovery and application of marketing management skills are developed through the use of readings, case exercises, and class discussions.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MKT 641. Marketing Research and Decision Making. 2 Credit Hours.**
The objective of the course is to allow students to understand functional analysis of consumer and market behaviors utilizing statistical tools. The course will cover topics of secondary sources of data, sampling, questionnaire design, and analysis and interpretation of data. Project and case analysis methods will be used for instruction.

**Prerequisite:** MKT 640 or MKT 660.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**MKT 642. Pricing and Value Management. 2 Credit Hours.**
Pricing decisions require a synthesis of economic and marketing principles, an appreciation of legal and ethical constraints, and the ability to use accounting, financial, and market research data. This course is designed to teach students how to price goods and services by providing a framework for understanding pricing strategies and tactics. While pricing strategies are taught under the rubric of many diverse disciplines, we will take an integrative approach, combining strategic, economic, marketing, and psychological considerations. Topics covered include economic value and breakeven analysis, price elasticity, markup and profit margin, price bundling, among others.

**Prerequisite:** MKT 640 or MKT 660.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Offered by Announcement Only.

**MKT 643. Health Care Marketing. 2-3 Credit Hours.**
This course is devoted to the study of health care marketing and the health care system involved with the task of marketing products and services. As health care reform continues to evolve current market conditions and transform existing organization into new practices, this course is focused on how managed care providers, hospitals, physicians, federal government, device and pharmaceutical companies will embrace the new patient centered market in their marketing strategies.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**MKT 644. Services Marketing. 2 Credit Hours.**
Course develops skills necessary to manage companies in an increasingly service-oriented and technology-driven economy and to gain sustainable competitive advantage through delivering superior quality services. Course covers the special marketing challenges posed by the unique characteristics of services and discusses their managerial implications. The need and strategies for synergistic management of operations, systems, and people to satisfy customers in order to achieve marketing excellence and superior financial performance are also included.

**Prerequisite:** MKT 640 or MKT 660.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.
**MKT 645. International Marketing. 2 Credit Hours.**
Course analyzes the theories and practice of international marketing management. Course allows students to understand markets and aid in the development of marketing plans based on the nature of national as well as international markets. Issues of globalization, standardization, intermarket segments, trading blocks, global marketing strategies, local branding, global branding in the context of customer movements, product development, pricing, distribution, communication, and segmentation in global markets are also discussed.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**MKT 646. Consumer Behavior. 2 Credit Hours.**
This course provides an overview of psychological and normative principles of consumer decision-making and judgment by focusing on underlying behavioral research and theory. How people process information, make decisions involving risk and uncertainty, conflicting objectives, and imperfect information are some of the main topics discussed. The implications of consumer behavior on a marketing strategy are highlighted.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**MKT 647. Advertising and Communications Management. 2 Credit Hours.**
Billions of dollars are wasted every year on ineffective advertising and communication campaigns. This problem is due to an absence of a compelling strategy to serve as a foundation for developing creative executions and media plans. The course provides a balanced analysis of strategy and execution of integrated marketing communication campaigns. The effectiveness of existing and emerging communication vehicles to attain strategic marketing goals is assessed. Special emphasis is placed on advertising, sales promotions, and social media. Current and historical campaigns are also reviewed. Course requirements include case reports, projects, and class participation.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**MKT 648. New Product Development. 2 Credit Hours.**
Innovation is one of the key drivers of firm value and new product development is perhaps the most important aspect of firm innovation. Yet few firms are able to develop and sustain their new product development process without mis-steps. Starting with how new products fit into the strategic landscape of a firm this course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are included through two assignments and one class project.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MKT 649. Strategic Brand Marketing. 2 Credit Hours.**
More and more firms have come to realize that their brands are among their most valuable assets. The goal of this course is to teach students the strategic significance of brands in creating shareholder value. Students should develop fluency with the core principles associated with branding including: an understanding of how to develop a brand's positioning; managing total brand experience; how to manage the brand relevancy over time; familiarity with the various qualitative and quantitative methodologies that are used to evaluate brand equity; how to achieve growth through brand extension; brand design and brand messaging. The basic philosophy for this course is to blend theory and practice of brand management. Branding is both an art and a science. Few branding situations have a definitive, unqualified "right" answer as to what is the best approach. However, when armed with relevant and comprehensive theories, appropriate frameworks and models, familiarity with past successful and unsuccessful branding strategies, managers can make better and more informed decisions that are more likely to yield successful implementation.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MKT 650. Strategic Marketing. 2 Credit Hours.**
Course develops the skills necessary to strategically manage business-unit level marketing activities in a multi-brand firm. This necessitates examining all marketing mix elements, R&D, financial and production considerations simultaneously in the context of the many markets, products, and services that may concern a typical firm. The emphasis is placed on understanding internal capabilities, market competitors, and customers. Market simulation exercise, cases, and readings are utilized.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MKT 651. Customer Relationship Management. 1 Credit Hour.
Customer relationship marketing (CRM) is an approach to marketing which treats customers as a financial asset. This approach contrasts with the traditional product-focused approach to marketing. As such modern CRM techniques rely heavily on data especially customer purchase data. Thus, CRM is a comprehensive set of processes and technologies for managing the relationships with potential and current customers. Through the use of data sets, cases and simulations students will learn how to use marketing tools to acquire customers, identify high value customers, retain as many as possible and thereby maximize firm value. This course is especially relevant in B-to-B settings.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKT 653. Sustainable Marketing of Goods and Services. 2 Credit Hours.
The course considers the creation, pricing, promotion, and consumer targeting for sustainable products. Starting with a broad view considering prosocial marketing and corporate social responsibility, the course then goes into specifics around sustainability. Topics include identifying and segmenting the sustainably-minded consumer, nudging consumers towards sustainable consumption, and sustainability as a signal. Students also consider issues of pricing sustainable products and sustainability as an externality. Materials include published cases as well as analyses of current sustainability-focuses businesses. This course also includes a group project wherein students will tackle a real-world issue of sustainability.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKT 657. Digital Marketing. 2 Credit Hours.
This course will provide a theoretical and practical understanding of the digital marketplace necessary to adapt to its many changes, while also equipping you with the skills you’ll need to perform vital daily functions. By the end of the course, you will be able to walk into any company with an online presence and improve their use of internet and digital marketing tools.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 660. Foundations of Marketing Management. 3 Credit Hours.
Marketing problems experienced by top executives are examined and fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 665. International Marketing. 3 Credit Hours.
Analysis of major U.S. foreign markets, marketing policies, and techniques are discussed.

Components: LEC.
Grading: GRD.

Typically Offered: Fall & Spring.

MKT 672. Services Marketing. 3 Credit Hours.
Course develops the skills necessary to manage services marketing and compete through delivering quality service. The unique characteristics of services and their managerial implications are examined. Importance of the synergistic management of operations, environment, systems and people to satisfy the customer is highlighted.

Components: LEC.
Grading: GRD.

Typically Offered: Fall & Spring.
MKT 675. Marketing Analytics. 2 Credit Hours.
Big data, fast computing and clever algorithms have converged to allow managers to convert data into one of their key strategic assets. In response, managers are collecting large volumes of data from diverse sources such as point-of-sale, online and social media. However, this data deluge does not automatically result in smart actions. To convert data to insights managers must develop the capability to transform data into knowledge through analytics. This has made analytics an important subject for business majors. One area where firms find analytics useful is marketing. Today firms use analytics to identify profitable customers, continuously track brands, and calculate optimal price promotions, test commercials, optimize media budgets across online and offline channels, design sales force allocation and decide the intensity of distribution channels. The goals of this course are to give you hands-on experience with data and analytics, teach you how to draw strategic marketing insights from data and show you how to make marketing decisions with greater precision without merely relying on “gut” decisions. This is not to say that intuition and creativity do not play a role in marketing. It means that analytical approaches combined with intuition makes for better marketing decisions.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 677. Strategic Digital Media Management. 2 Credit Hours.
Digital and social media have dramatically changed the ways in which managers analyze consumer data and make accurate media marketing decisions. This course will teach students how to correctly capture, measure and apply the fundamentals of digital marketing analytics and then how to manage a successful media marketing campaign over time. We will use available direct and indirect digital listening tools for both traditional and digital media sources using Nielsen, live social media data, digital dashboards, search engine optimization tools, and data presentation strategies. Current case studies and readings will assist in this highly interactive management course. Social and traditional media executives will also be invited into class to review current trends, opportunities, and strategies for the future.
Prerequisite: MKT 640 or MKT 660.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKT 686. Behavioral Decision Theory in Consumer Research. 3 Credit Hours.
The purpose of this seminar is to provide students with a review of the psychological literature as applied to the study of judgment and decision making with a focus on consumer research. The course will be based on behavioral decision theory and social psychology with an emphasis in generating high quality consumer research ideas. The course complements MKT 688 and MKT 689, which emphasizes information processing aspects of consumer behavior. Each week there will be discussions of a topic of consumer behavior research, drawing primarily upon readings from marketing and psychology. Students will learn how to identify important research problems, ask interesting research questions, develop theories and hypotheses, and design experiments.
Requisite: Must be registered Doctoral Student.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MKT 687. Marketing Strategy. 3 Credit Hours.
Marketing Strategy is a vast, exciting and exploding literature that almost defies classification. However, despite this difficulty one common theme unifies and distinguishes this stream of research: it is marketing as seen through the eyes of a manager. Is it worth fighting for market share? How do we analyze competitors? Is it more profitable to introduce a new product or enter a new market? Should we build on existing relationships or seek new customers? Does loyalty management pay? Do consumers understand product quality? Can we quantify the effects of advertising and promotions? What metrics should we use to evaluate the effectiveness of marketing effort? Can we run policy simulations before committing to marketing action? These are some of the questions that marketing managers need to address. Often the questions are very broad and complex, reflecting the bewildering range of techniques that have been used to address those questions. The seminar will try to impart an appreciation of how to define and solve research problems in a marketing strategy.
Requisite: Must be registered Doctoral Student.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MKT 688. Ph.D. Seminar in Consumer Behavior and Decision Making. 3 Credit Hours.
This course is designed to provide students with a background regarding a wide set of topics in consumer behavior focusing on theoretical models. In addition to developing a knowledge base in several extant consumer behavior literatures, this course has several additional goals. Students will: 1) become familiar with the content and style of consumer behavior research published within the marketing field, 2) develop an understanding of many methodologies and paradigms that can be used to investigate theoretical issues, 3) have several opportunities to explicate research ideas that they will hopefully be able to pursue in the remainder of the program or early in their careers, and 4) learn to critically evaluate the research of others to aid in strengthening their thinking and ultimately their own research activities.
Requisite: Must be registered Doctoral Student.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
MKT 689. Information Processing for Consumer Behavior. 1-3 Credit Hours.
Broadly the study of consumer behavior is divided into two areas - behavioral decision theory and information processing. This course will focus on information-processing aspects of consumer behavior with an emphasis in generating high quality consumer research ideas. We will cover both classic papers that provide the gist of the area covered in each session as well as research that attracted more interest from scholars in the recent years. The course complements MKT688 and MKT686, which provide students with an introduction to topics in consumer behavior and behavioral decision theory, respectively (there three Consumer Behavior PhD seminars can be taken in any sequence). Each week we will discuss a topic of consumer behavior research, drawing primarily upon readings from marketing and psychology. Students are responsible for all primary readings, which will be discussed in a seminar-format in class. Each week, we will discuss 4-5 papers. Students will also be assigned to be the "discussion leader" for individual sessions. Professor will assign these sessions to the students in the first class.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MKT 695. Topics in Marketing. 0-3 Credit Hours.
Topics in selected areas of Marketing.
Requisite: Must be registered Doctoral Student.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MKT 696. Topics in Marketing. 1-3 Credit Hours.
Topics in selected areas of Marketing.
Requisite: Must be registered Doctoral Student.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 697. Topics in Marketing. 1-3 Credit Hours.
Topics in selected areas of Marketing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 699. Directed Study. 1-6 Credit Hours.
Individually supervised readings or research projects. Restricted to students with superior academic records. Approval of supervising professor as to topic and evaluation of project required at time of registration.
Requisite: Must be a registered Doctoral student.
Components: THE.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MKT 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MKT 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Requisite: Must be a registered Doctoral student.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Accounting
Business
Business Law
Business Technology
Economics
The doctoral program at the University of Miami Business School links world-class faculty with accomplished PhD candidates to prepare them for careers in academic research and teaching. The PhD in Business and PhD in Economics programs combine interdisciplinary study and research with one-on-one mentoring from faculty experts in your area of interest.

- Doctorate of Philosophy in Business (p. 1933)
- Doctorate of Philosophy in Economics (p. 1935)

Doctorate of Philosophy in Business

The PhD in Business program combines interdisciplinary study and research. It is designed to prepare students for careers in academic research and teaching. Students follow specialized programs of study under the guidance of faculty experts. In addition, they have the opportunity to participate in cross-disciplinary training. The curriculum will also equip students with the skills and experience necessary for academic placement in the world’s top research universities.

A minimum of 60 credit hours are required to earn the PhD in Business degree. The program requires year-round, full-time study in order to maximize interaction between faculty and students. Students are expected to interact and begin research projects with the faculty upon entering the program.

The requirements for the PhD in Business degree are the same as those listed in the general section.

Students may choose to concentrate their study in:

- Accounting
- Finance
- Management Science
- Marketing
- Operations Management
- Organizational Behavior
- Strategy/International Business

Required “Core” Courses

*These courses can be waived by consent of the appropriate department; waiver is granted by issuing transfer credit hours for similar courses taken at the advanced graduate level at accredited institutions.

There are two streams of “core” courses for students, each comprising of five courses.

Stream I
(Accounting, Finance, Management Science, Marketing-Quantitative, and Operations Management)

o ECO 602  Advanced Microeconomic Theory
Total Credit Hours  15

Area of Concentration Courses
*These are to be decided by the student and faculty.

*Students in the Management Science concentration are required to complete at least 30 graduate credits in STEM courses.

In total, a minimum of 33 credit hours in concentration courses are to be taken, up to 15 of which may be satisfied by transfer-credit hours. Some Departments may require students to complete a minor field. If so, their major field must consist of a minimum of 24 credit hours (with at least 15 credit hours completed in doctoral program residence at the University of Miami). The minor field would then consist of 9-12 credit hours in an area outside of the major concentration (with a minimum of 9 credit hours taken in doctoral program residency at the University of Miami).

Dissertation Research
12 credit hours are to be taken at a minimum—two semesters of 6-9 credit hours each. No transfer credit is given for dissertation or prior research.

Total Credit Hour Requirements
In total, a minimum of 60 credit hours are required for receiving the Ph.D. degree in Business:

<table>
<thead>
<tr>

<tr>
<td>Dissertation research</td>
<td></td>
<td>12</td>
</tr>
</tbody>
</table>
Total Credit Hours  60

To this total must be added any prerequisite courses (as outlined above), with transfer-credit hours being subtracted.

Mission
The mission of the PhD in Business program is to attract the best and brightest students and train them to become serious research scholars who are capable of being placed in faculty positions in leading business schools after they graduate.

Goals
- Understand the latest theories in their chosen field of study to create new knowledge.
- Demonstrate research methodology skills to conduct rigorous academic research.
- Demonstrate effective written and oral communication skills to disseminate the knowledge.

Student Learning Outcomes
- Students will demonstrate their understanding of the extant literature, theories, and concepts in their chosen field of study.
- Students will demonstrate their understanding of appropriate research methods to conduct appropriate empirical and/or theoretical research.
- Students will develop good communication skills to be able to present their research effectively to academic audiences, and write research articles that can be published in referred academic journals.
Doctorate of Philosophy in Economics

Overview
The Ph.D. program in Economics prepares the recipient for a variety of research-oriented career opportunities, including university research/teaching, government employment, and a host of employment opportunities in the private sector.

Admission Requirements
The Doctoral Admissions Committee welcomes applications from individuals whose undergraduate or graduate degrees are from accredited colleges or universities. Acceptance is based upon an evaluation of all credentials presented by the applicant. Graduate degrees are not a requirement.

Applicants should read the instructions carefully before filling out the forms and should keep copies of all materials submitted during the application process. By submitting the online application, the applicant certifies the information provided in the application is complete and accurate.

Requirements for Admission

• Completed application for admission submitted through BusinessCAS
• A baccalaureate degree from an accredited institution
  • Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  • Academic transcripts from institutions outside of the United States must be verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
• Write a brief essay (2-3 pages long, double spaced) on the following topics concerning you and your intended field of study: i) Your past work on relevant issues, ii) What excites you most about your chosen field of study, iii) Possible areas of research you might pursue, iv) Any research projects you have completed with faculty, and v) Any other information you would like to provide to the admissions committee. We are particularly interested in any projects that you pursued with a faculty member who is writing a letter of reference for you.
• A current resume
• Three letters of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• Official GRE Scores
  • Official GRE scores (less than 5 years old) are required for the PhD in Economics program. The minimum required GRE score is 1250. To report GRE scores, use institution code R5815. For information about Graduate Record Examination (GRE), visit www.gre.org.
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

We encourage candidates to upload unofficial transcripts and test scores with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

**Total Credit Hours**
60

* Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

** Counts towards Master of Arts in Economics. Student's may earn the MA in Economics while pursuing the PhD in Economics.

---

### Mission
The mission of the Ph.D. Program in Economics is to give students the skills, knowledge, and research training necessary to produce high-quality research needed for successful careers in the academic, government, and private sectors and enabling them to be leaders in their respective institutions.

### Student Learning Outcomes
- Students will be knowledgeable in the core economic fields of microeconomic and macroeconomic theory.
- Students will be able to generate original research questions, complete original empirical and/or theoretical research, and write original research papers.
- Students will be able to present and explain their research findings to a general and an academic audience. They should also be able to effectively present economic principles to undergraduate students as well as in their research in academic conferences.

### MBA Programs

#### MBA Programs
The MBA (Master of Business Administration) at the University of Miami Herbert Business School prepare students for leadership in today’s rapidly changing global economy. In order to compete and succeed in the 21st century, business leaders must not only be able to adapt to change, they must drive change. At the Miami Herbert Business School, we not only prepare students for careers in management and leadership positions, we produce creative thinkers, strong communicators, and the best negotiators.

MBA programs are offered in different formats to serve the diverse academic and business needs of our constitutes including full time, part time, hybrid, and online.

### Executive and Professional MBA Programs

#### Executive MBA and Professional MBA Programs
The University of Miami Business School offers Executive and Professional MBA programs that are designed for accomplished professionals who are ready to take their career to the next level without interrupting their career. Participants gain insight and understanding into the business environment...
by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- Professional MBA
- Global Executive MBA
- **Global OneMBA®**
- Executive MBA in Health Management and Policy

### Executive MBA in Health Management and Policy

#### Overview
The University of Miami Herbert Business School Executive MBA in Health Management and Policy Program prepares graduates for positions of leadership in health care and health-related organizations. The program focuses on the post-graduate educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. Combining its strengths in graduate business education and its close relationships with the South Florida health care community, the program teaches practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the health care industry.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our [website](http://www.bus.miami.edu/graduate-programs/executive-mba/health-management/).

#### Admission Requirements
Candidacy for the Miami Herbert Business School Executive MBA for Health Management and Policy program is based on an evaluation of academic and professional preparation as well as significant accomplishments and experiences. Professionally, the applicant should demonstrate an aptitude for career advancement and leadership. Regardless of the stage an applicant may be in, we measure career potential through increased workplace responsibility, demonstrated managerial skills, recommendations and assessment of the nomination. Motivation, intellectual curiosity, high ethical standards and perseverance are essential characteristics for success in the Executive MBA for Health Management and Policy program.

The Admissions Committee considers the "total" individual - men and women who show a pattern of achievement and high-level performance at every stage. The Admissions Index assesses each candidate on the following factors:

- Years of business-related work experience
- Years of management experience
- Level of current position
- Maturity
- Undergraduate grade point average
- GMAT score (if requested)
- Letter(s) of Recommendation
- Undergraduate School
- Undergraduate Major
- International experience
- Intercultural experience

Admission to the Professional MBA Program does not guarantee that a seat is available. Once admitted, an applicant must submit a non-refundable $2,200 Enrollment Fee required by the Graduate Business Programs Office in order to reserve their seat within a cohort. Once a given cohort reaches capacity, the Admissions Committee compiles a waitlist of qualified candidates. Candidates are notified when their status changes.

#### Application Requirements
- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

Mission

• To develop innovative ideas and principled leaders that transform global business and society.

Student Learning Outcomes

• The MBA students will demonstrate the ability to integrate business information and knowledge within the strategies and perspectives of an organization.
• The MBA students will demonstrate the ability to understand and utilize the process of critical and analytical thinking in diverse business settings to solve problems and make decisions.
• The MBA students will demonstrate the ability to gain an awareness of and a sensitivity to issues in business decision-making from an ethical and social perspective (principled leaders).
• The MBA students will demonstrate an understanding of business operations and decision-making in a global environment.

Global Executive MBA

Overview

The Global Executive MBA program is aimed at senior executives who want to further their business acumen and enhance their understanding of conducting business globally. The format flexibility and length of the program will permit students to earn their MBA. The 17-month program blends face-to-face on-campus modules, which include executive presentations, case studies and group projects, with distance learning. It covers four focus areas (Global Strategy and Execution; Managing Global Operations and Decision Making; Global Multi-Cultural Leadership; and Entrepreneurship, Innovation and Technology) through eleven courses or modules, as well as an Integrated Project carried out in nine on-campus residencies and eight Inter-Residencies (distance-learning). The Global EMBA is lock-step in nature. Students will progress together through a sequential pattern of courses. The students will obtain their MBA after the successful completion of 45 credit hours over an 17 month period.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://www.bus.miami.edu/graduate-programs/executive-mba/emba-americas/).

Global OneMBA

Overview

The University of Miami Business School’s Global OneMBA® program empowers students with the knowledge, insight, leadership skills, global understanding, and the support network to drive their career forward. The program delivers a truly global curriculum built and simultaneously delivered by all five partner schools. Students also benefit from global residencies on four continents. The five partner schools that make up the OneMBA® consortium are:

- USA: Miami Business School, University of Miami
- Brazil: FGV São Paulo School of Business Administration (FGV)
- China: School of Management, Xiamen University (SMXMU)
- Mexico: EGADE Business School of Tecnológico de Monterrey
- The Netherlands: Rotterdam School of Management, Erasmus University (RSM)

### Professional MBA

**Professional MBA**

The University of Miami Herbert Business School’s Professional MBA Program is designed to help busy professionals gain that competitive edge to meet the new demands of today’s organizations. Created specifically with the hard-working professional in mind, the Professional MBA prepared students to join the ranks of those leading the business world of tomorrow without having to compromise their existing work schedule. Classes meet twice a week, on Monday evenings and Saturday mornings.
To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (https://www.bus.miami.edu/academic-programs/mba-masters/professional-mba/).

  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
- An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  - TOEFL - 94 or above (iBT only)
  - IELTS - 7.0 or above

If you do not yet have a TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.
Student Learning Outcomes

- The MBA students will demonstrate the ability to integrate business information and knowledge within the strategies and perspectives of an organization.
- The MBA students will demonstrate the ability to understand and utilize the process of critical and analytical thinking in diverse business settings to solve problems and make decisions.
- The MBA students will demonstrate the ability to gain an awareness of and a sensitivity to issues in business decision-making from an ethical and social perspective (principled leaders).
- The MBA students will demonstrate an understanding of business operations and decision-making in a global environment.

Full Time MBA Programs

The University of Miami delivers full-time MBA programs that are innovative, flexible and career focused. They are designed for those who either have an undergraduate background in business, or are from other industry areas interested in a career in business. The curriculum not only prepares students for leadership in business, it adds a valuable dimension to other professions. Students become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- The Miami MBA (Two-Year MBA)
- Accelerated MBA
- Accelerated MBA in Real Estate
- BArch/MBA (Joint Degree)
- MD/MBA (Joint Degree)
- JD/LLM/MBA
- JD/MBA (Joint Degree)
- MS in Accountancy and Accelerated MBA Dual Degree
- MS in Biochemistry & Molecular Biology / MBA (Miller School Only)
- MS in Taxation and Accelerated MBA Dual Degree
- PhD / MBA (Miller School Biomed PhD Students Only)

Accelerated MBA

The Accelerated MBA program at the University of Miami Herbert Business School allows students to fast-track their career through hands-on opportunities in the city that is shaping the future of business. The Accelerated MBA gives eligible students the unique opportunity to earn an MBA in less than a year. Candidates with an undergraduate degree in business or a graduate degree in business or related discipline are encouraged to apply. The program begins in May and runs through December, for a duration of 7 months.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (https://www.bus.miami.edu/academic-programs/mba-masters/accelerated-mba/).

Accelerated MBA in Real Estate

Overview

The Miami Herbert Business School offers an accelerated MBA program with a concentration in real estate highlighted by two internship opportunities. Bringing together the School's strengths in management education with the strengths of the UM School of Architecture in new urbanism, the program prepares students to succeed in commercial real estate market careers. This program is designed to meet the needs of the student with an undergraduate degree in business. Applicants must demonstrate successful completion of the core business courses: Financial and Managerial Accounting, Microeconomics, Macroeconomics, Statistics, Calculus, Organizational Behavior, Operations Management, Marketing, and Finance.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/real-estate/?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

Admission Requirements

• Completed application for admission submitted through BusinessCAS

• A $48 non-refundable application fee

• A baccalaureate degree from an accredited institution
  • Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  • International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.

• Successful completion of business prerequisite courses in areas of accounting, economics, statistics, finance, marketing, organizational behavior, and operations management. Please contact Miami Herbert Business School for a complete prerequisite course list.

• Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS

• A current resume

• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.

• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-87
  • GRE institution Code is 5815

• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above
If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

### BArch/MBA Overview

The Bachelor of Architecture/Master of Business Administration is an exciting joint venture with the Miami Business School and School of Architecture, which will allow students to earn a Bachelor of Architecture as well as a Master of Business Administration. The joint degree offers students the unique opportunity to complete the two degrees in six years, saving an entire year by combining the programs.

Students will begin taking Saturday graduate level business courses during the fourth year of their architecture program. Both degrees are fully accredited by their respective accrediting bodies — the NCARB and AACSB International.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://www.arc.miami.edu/academics/undergraduate/bachelor-of-architecture-mba/).

### Admissions Requirements

To qualify for admission to the BArch / MBA program, a student must:

- Be an undergraduate University of Miami architecture major

### Requirements for Admission

- Completed application for admission submitted through BusinessCAS
- Academic transcript(s)
• An unofficial copy of your current transcript must be uploaded with your online application.
• Request official evaluations of transcripts from all previously attended non-U.S. institutions to be sent to BusinessCAS.
• Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
• A current resume
• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-99
  • GRE institution Code is 5815

If you have not yet taken the GMAT exam, you may complete and submit your application by indicating your approximate date within the Standardized Test tab in the Academic History section of the BusinessCAS application. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

**Additional Required Courses**

| Electives* | 24 |

Total Credits

| 44 |

* 24 credits of electives (approximately 12 courses) are required. Elective offerings are based on class demand.

**Prerequisite coursework: The following courses must be successfully completed during the fourth year of the BArch program: ACC 670, FIN 641, MAS 201, MGT 620, MKT 640

**JD/LLM/MBA**

JD/LLM/MBA

Triple Degree Program: A Specialized Option for Business Majors

The University of Miami School of Law and the Miami Business School have created a triple degree program - a JD, an LLM in Taxation, Estate Planning, or Real Property Development, and an MBA - which can be completed in just four years and two summers.

This program offers a combination of legal and business degrees to students who were undergraduate business majors. These credentials are ideal for anyone with a long-term goal of servicing top corporate clients or becoming a senior executive at a bank, real estate company, or financial institution. They also serve as significant assets in today’s competitive marketplace to any attorney starting out in tax or real estate law.

Students are able to complete both the LLM and JD degrees in seven semesters and can complete an MBA degree with an additional two semesters or fewer, if summer school courses are taken.
To obtain detailed program admission, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/jd-llm-mba/).

Admission Requirements

- The program is open only to individuals who were undergraduate business majors.
- The program enables students to obtain three degrees in four years—a JD, an MBA and an LLM
- Once JD students begin their second year of law school, they can apply to the specific LLM program in either Tax (http://www.law.miami.edu/about_us/jd_tax.php?op=1) or Real Property Development (http://www.law.miami.edu/about_us/jd_rpd.php?op=1) by the end of spring semester after having completed specific pre-requisites.
- During the second year, students should also apply to the one-year MBA program by the Early Decision deadline of June 1 to be considered for One-Year MBA program. (Note that there are additional deadline date options for the MBA program, allowing students to apply up until December 1 for a January [spring semester] start.)
- Students must have the results of their GMAT exam when they apply as only complete applications will be reviewed by the Admissions Committee.

## JD/MBA
### Juris Doctor /Master of Business Administration

The University of Miami School of Law and the Miami Herbert Business School offer a joint degree program in law and business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Business Administration degree from the Miami Herbert Business School.

Independently, the JD degree requires the completion of 88 credits, while the MBA degree requires 56 credits. Students enrolled in the JD/MBA dual-degree program benefit from a total of 16 shared credit hours, reducing the overall required course load to 128 credits for both degrees.

### Requirements for Admission

Students who apply for the joint J.D./M.B.A. program must apply to both the School of Law and the Miami Herbert Business School. The applicant must achieve a qualifying score on the Law School Admissions Test (LSAT) and the Graduate Management Admissions Test (GMAT) for admission to
the respective schools. The applicant must notify both schools that he or she is applying for the joint J.D./M.B.A. program, and in order to remain in the joint program, the student must meet minimum standards of both the School of Law and the Miami Herbert Business School.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/jd-mba/?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_term=undefined&utm_content=undefined).

Master of Science in Accountancy & Accelerated MBA Dual Degree

Overview
The Master of Science in Accountancy and Accelerated MBA Dual Degree (MSA/MBA) program allows students to earn both a specialized Master’s and MBA. Students complete the two degrees in sequence - Master of Science in Accountancy first, Accelerated MBA second. The dual degree is designed for students with an interest in broadening their business education beyond the scope of their first Master’s program. The MSA offers two separate tracks in assurance and corporate accounting. This dual degree program will provide a robust framework for acquiring both depth and breadth in business education.

Scholarships
University of Miami Herbert School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

Accounting Summer Intensive Program
The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors
Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Science in Accountancy (MSA) and Summer Intensive Program. Applicants to the MSA program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer intensive students entering the MSA program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. MSA students may complete the course in the summer or in term one of the spring semester.

Foreign Students
The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MSA program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MSA program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule
The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses
Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings
The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>

</tr>
</tbody>
</table>

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.
Entering the MSA or MST Program

Upon successful completion of the intensive program, students immediately enter the MSA or MST program in the fall semester. To graduate with their MSA or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. Please find the licensure requirements for the State of Florida, here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/licensure/).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam: To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.

Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exceptions) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements...
for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

**Duplicate Courses**

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

**Admission Requirements**

For admission to MSA, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses
- Rigor of the undergraduate program
- Other factors such as work experience.

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami’s Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami’s Accounting Summer Intensive Program to fulfill this requirement.

**Dual Degree Admission Process**

Students can apply for the dual degree upon initializing their application. Students may also consider applying for the Accelerated MBA while they are enrolled in the Master of Science in Accountancy.

**Master of Science in Accountancy + Accelerated MBA Dual Degree (MSA/MBA)**

**Master of Science in Accountancy**

The MSA program offers two tracks: Assurance (MSA-Assurance) for students planning to go into public accounting and Corporate Accounting (MSA-Corporate) for students planning careers as controllers, CFOs or financial analysts. The MSA is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MSA in a year or less provided they enroll as full time students.

**Undergraduate Course Requirements**

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes including ACC 648 (Financial Reporting Implications of Income Taxes,) the equivalent of ACC 404 (Advanced Taxation(Corporate and Partnership Income Taxation) is also required. Students can satisfy this prerequisite by taking ACC 639 (Income Taxation and Business Entities which is offered in a 9-day intersession format in August before the start of the fall semester. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Master of Science in Accountancy—Assurance Track (MSA-Assurance)
The program requires 30 semester hours consisting of nine required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MSA degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Master of Science in Accountancy—Corporate Accounting Track (MSA-Corporate)
The program requires 30 semester hours consisting of eight required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the eight required courses, students must select five courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MSA degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Accelerated MBA Program
The Accelerated MBA program at the University of Miami Herbert Business School allows students to fast-track their career through hands-on opportunities in the city that is shaping the future of business. The Accelerated MBA gives eligible students the unique opportunity to earn an MBA in less than a year. Candidates with an undergraduate degree in business or a graduate degree in business or related discipline are encouraged to apply. The program begins in May and runs through December, for a duration of 7 months.

Master of Science in Taxation & Accelerated MBA Dual Degree

Overview

The Master of Science in Taxation and Accelerated MBA Dual Degree (MST/MBA) program allows students to earn both a specialized Master's and MBA. Students complete the two degrees in sequence - Master of Science in Taxation first, Accelerated MBA second. The MST is designed for students interested in careers in taxation. The dual degree is designed for students with an interest in broadening their business education beyond the scope of their first Master's program. This dual degree program will provide a robust framework for acquiring both depth and breadth in business education.

Scholarships

University of Miami Herbert Business School - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

Accounting Summer Intensive Program

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Science in Accounting (MSA) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MSA or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MSA or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MSA students may complete the course in the summer or in term one of the spring semester.

Foreign Students

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MSA or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MSA program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 632</td>
<td>Intermediate Accounting I</td>

<tr>
<td>ACC 636</td>
<td>Accounting Systems</td>
<td>2</td>
</tr>
<tr>
<td>ACC 673</td>
<td>Taxation for Business and Investment Decisions</td>
<td>2</td>
</tr>
</tbody>
</table>

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.
Enter the MSA or MST Program

Upon successful completion of the intensive program, students immediately enter the MSA or MST program in the fall semester. To graduate with their MSA or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/licensure/).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam

To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.

Requirements for Licensure

In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia.

This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State

If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester
hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

**Duplicate Courses**

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

**Admission Requirements**

For admission to the MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant's:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses,
- Rigor of the undergraduate program
- Other factors such as work experience

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami's Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami's Accounting Summer Intensive Program to fulfill this requirement.

**Dual Degree Admission Process**

Students can apply for the dual degree upon initializing their application. Students may also consider applying for the Accelerated MBA while they are enrolled in the Master of Science in Accountancy.

**Master of Science in Taxation + Accelerated MBA (MST/MBA)**

**Master of Science in Taxation**

This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC 403 Fundamentals of Taxation and ACC 404 Advanced Taxation, or their equivalents. Students who have taken only one tax course should plan to take an advanced taxation course (such as ACC 639 Income Taxation and Business Entities which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester). In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MST degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

**Accelerated MBA**

The Accelerated MBA program at the University of Miami Herbert Business School allows students to fast-track their career through hands-on opportunities in the city that is shaping the future of business. The Accelerated MBA gives eligible students the unique opportunity to earn an MBA in less than a year. Candidates with an undergraduate degree in business or a graduate degree in business or related discipline are encouraged to apply. The program begins in May and runs through December, for a duration of 7 months.

MD/MBA

Overview

The University of Miami Herbert Business School (http://bus.miami.edu) offers a joint M.D./M.B.A. degree program in partnership with the Miller School of Medicine. The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, as well as prepare medical students for careers in health sector management, leadership and policy.

The M.D./M.B.A. program adds an additional year to the four-year medical school curriculum. The M.B.A. coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD/MBA candidates have the option of choosing a Research Track (project based which provides practical hands on experience) or an Elective Track (provides business electives). Please refer to the curriculum for details.

Questions about the M.D. portion of the program should be directed to Senior Associate Dean Alex Mechaber, M.D., at the Miller School of Medicine, AMechabe@med.miami.edu (MOConnell@med.miami.edu), while questions about the MBA portion should be directed to Admission Advisors at the Miami Herbert Business School, 305-284-2510 or mba@miami.edu.

M.D. students are required to submit a Full-Time (https://www.applyweb.com/apply/miamibus/) MBA online application to be considered for the M.D./M.B.A. Program.

The application deadline for this program is April 1st of each year.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/md-mba/).

Admission Requirements

• Completed application for admission submitted through BusinessCAS
• A baccalaureate degree from an accredited institution
  • Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  • International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
• Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
• A current resume
• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-92
  • GRE institution Code is 5815
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

QUESTIONS?

Connect with Miami Herbert Business School's graduate enrollment advisors at (305) 284-2510 or by email at mba@miami.edu.

**Two Year MBA (The Miami MBA)**

**Two Year MBA Program (The Miami MBA)**

The full-time two-year MBA Program (The Miami MBA) is innovative, flexible, and career-focused. Candidates with an undergraduate degree in any field with work experience who seek advanced business expertise as a springboard to their career are encouraged to apply. The curriculum not only prepares students for leadership in business, but it adds a valuable dimension to other professions.

The Miami Business School's full-time MBA program is 56 credit hours and is completed in less than two calendar years. The curriculum provides a framework that accelerates growth. Students gain new perspectives and have the opportunity to prove and polish their leadership skills. They learn to think critically across subjects, linking their knowledge of management, economics, and marketing with finance, business law, and technology.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website ([https://www.bus.miami.edu/academic-programs/mba-masters/two-year-mba/](https://www.bus.miami.edu/academic-programs/mba-masters/two-year-mba/)).

**Admission Requirements**

- A bachelor's degree (or the equivalent of a U.S. bachelor's degree) from an accredited school. Official transcripts and a foreign credential evaluation (if applicable) must be submitted.
- Professional, post-undergraduate work experience outlined in a formal resume. At least two years of full-time experience prior to enrollment is recommended. For dual-degree applicants, experience gained through internships, projects, and leadership roles may be considered.
- A competitive GMAT score (GRE considered on a case-by-case basis) and a qualifying score on the TOEFL or IELTS for non-native English speakers.
- At least one professional and/or academic letter of recommendation.
- A personal statement.

Admission interviews are a requirement of the Miami MBA application process for those candidates who meet the program requirements and will be conducted by invitation only after a complete application has been reviewed. Most interviews are conducted with candidates by online platform or in-person.

**Mission**

- To develop innovative ideas and principled leaders that transform global business and society.

**Student Learning Outcomes**

- The MBA students will demonstrate the ability to integrate business information and knowledge within the strategies and perspectives of an organization.
- The MBA students will demonstrate the ability to understand and utilize the process of critical and analytical thinking in diverse business settings to solve problems and make decisions.
- The MBA students will demonstrate the ability to gain an awareness of and a sensitivity to issues in business decision-making from an ethical and social perspective (principled leaders).
- The MBA students will demonstrate an understanding of business operations and decision-making in a global environment.
Specialized Master Degrees

The Miami Herbert Business School offers a premier catalog of master’s degree programs geared toward specific career paths. Each of these full-time programs can be completed in less than one year. Students will focus on in-depth business analysis as well as enhancing their proficiency in topics like accounting, finance, and organizational leadership. A new skill-set in a specialized area will make students more valuable to their organizations and more competitive in the marketplace.

- M.H.A. in Health Sector Management and Policy
- Master in International Business
- Master of Accounting
- Master of Professional Accounting (online)
- Master of Science in Business Analytics
- Master of Science in Finance
- Master of Science in Finance (online)
- Master of Science in Leadership
- Master or Science in Sustainable Business
- Master of Science in Taxation

B.B.A./M.S. in Business Analytics Dual Degree

Bachelor of Business Administration in Business Analytics and Master of Science in Business Analytics

The dual BBA and Master of Science in Analytics program is designed in such a way that students can expect to complete both their Bachelor’s and Master’s degree within four and a half years. This accelerated program is designed to assist highly-motivated undergraduate students seeking an efficient path and an expedient start to their professional careers without sacrificing quality of education.

Students enroll in up to twelve credits of graduate work in their senior year*. Then, at least twenty credits of graduate work is completed in the fall semester after the senior year.

* Students in this program will only be permitted to take graduate classes if they are within 30 credits of completing the baccalaureate degree and have a minimum 3.0 GPA.

Admission Requirements

To qualify for admission to the BBA/BSBA-MSBA programs, a student must:

- Be within 30 credits of completing the baccalaureate degree with a cumulative grade point average of 3.0 or higher.

Requirements for Admission

- Completed application for admission submitted through BusinessCAS
- Academic transcript(s)
  - An unofficial copy of your current transcript must be uploaded with your online application.
  - Request official evaluations of transcripts from all previously attended non-U.S. institutions to be sent to BusinessCAS.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.

---

1. **NOTE:** ENG 105 and ENG 106, or their equivalents, must be completed prior to attaining junior year classification, per the University General Education Requirements. Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.

2. At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

3. Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

4. In order to declare the Business Analytics major, a BBA student needs to have earned a minimum A- (3.7) average for MTH 161, MAS 201, and MAS 202.

5. All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

6. No course may double count in any other major, minor, or cognate.

7. Students may take MAS 652 Capstone Project as a replacement of MAS 650 Management Science Internship if an internship cannot be obtained.

8. Electives are based on class demand.

9. MAS 627 is replaced with MAS 691 or BTE 601 for students who received an A- or better in MAS 332.

10. MAS 631 is replaced with an approved elective for students who received an A- or better in MAS 311.

11. MAS 632 is replaced with an approved elective for students who received an A- or better in MAS 342.

12. MAS 637 is replaced with MAS 681 for students who received an A- or better in MAS 432.

13. MAS 648 is replaced with an approved elective if students take MAS 681.

Additionally, all 100 and 200-level Business Core courses must be completed by the end of the fifth semester of college work or during the semester in which the student is completing 75 credit hours.
At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Students who do not earn at least a C- in ENG 106 must either repeat ENG 106 and earn at least a C- or complete ENG 230 with at least a C- before enrolling in BUS 300.

All specific coursework for the major area of specialization in Business Analytics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.5 is required for all specific coursework taken in the major area of specialization.

Students may take MAS 652 Capstone Project as a replacement of MAS 650 Management Science Internship if an internship cannot be obtained.

Electives are based on class demand.

MAS 627 is replaced with MAS 691 or BTE 601 for students who received an A- or better in MAS 332.

MAS 631 is replaced with an approved elective for students who received an A- or better in MAS 311.

MAS 632 is replaced with an approved elective for students who received an A- or better in MAS 342.

MAS 637 is replaced with MAS 681 for students who received an A- or better in MAS 432.

MAS 648 is replaced with an approved elective if students take MAS 681.

Sample Plan of Study

For students who earn an A- or better in MAS 311, 332, and 342

BBA/BSBA - MSF Dual Degree Programs

Overview
The dual degree programs allow Miami Herbert Business School students to efficiently complete both a bachelor's degree (either B.B.A. or B.S.B.A) and the M.S. in Finance degree in as short as 4 ½ years. The following combinations are possible under this dual degree program:

1. BBA in Accounting/MSF
2. BBA in Business Analytics/MSF
3. BBA in Business Technology/MSF
4. BBA in Economics/MSF
5. BBA in Entrepreneurship/MSF
6. BBA in Finance/MSF
7. BBA in General Business/MSF
8. BBA in Health Management and Policy/MSF
9. BBA in Human Resource Management/MSF
10. BBA in Legal Studies/MSF
11. BBA in Management/MSF
12. BBA in Marketing/MSF
13. BBA in Organizational Leadership/MSF
14. BBA in Real Estate/MSF
15. BSBA in Accounting/MSF
16. BSBA in Business Analytics/MSF
17. BSBA in Business Technology/MSF
18. BSBA in Economics/MSF
19. BSBA in Entrepreneurship/MSF
20. BSBA in Finance/MSF
21. BSBA in General Business/MSF
22. BSBA in Health Management and Policy/MSF
23. BSBA in Human Resource Management/MSF
24. BSBA in Legal Studies/MSF
25. BSBA in Management/MSF
26. BSBA in Marketing/MSF
The BBA and BSBA programs require successful completion of 120 credit hours. The MSF program will require successful completion of 30 credit hours in the dual degree program because BUS 640 Quantitative and Analytical Fundamentals for Finance (4 credit hours) is not required. Students graduating from UM’s BBA and BSBA programs and matriculating directly into the MSF dual degree program will not require this course because the material is covered in their undergraduate programs.

Requirements:
To qualify for admission to the BBA/BSBA-MSF programs, a student must:

1. Complete FIN 302 and receive a grade of B or higher (a B- in FIN302 does not fulfill this requirement).
2. Complete at least 96 credit hours of undergraduate courses with a cumulative grade point average of 3.3 or higher.
3. Apply to the program by the end of the semester in which the student completes 96 undergraduate credit hours. (Typically, application submission will be required by the end of the spring semester of a student’s junior year.)

In the dual degree programs, a student must:

1. Comply with all undergraduate degree requirements for a BBA major (undergraduate degree need not be in finance) for the BBA-MSF program or a BSBA major (undergraduate degree need not be in finance) for the BSBA-MSF program.
2. Comply with all MSF degree requirements in the newly revised MSF curriculum effective Fall 2019 except for the BUS 640 (commonly known as the boot camp) waiver as described below.
3. Enroll in a minimum of 12 undergraduate credit hours of courses per semester until the requirements of the student’s selected undergraduate degree (BBA or BSBA degree) have been met.
4. Enroll in a maximum of 6 graduate credit hours of courses per semester during the last two semesters of the student’s selected undergraduate degree (BBA or BSBA degree) program. (Typically, a student would enroll in 4 credit hours of graduate coursework per semester for a total of 8 graduate credit hours in the last two semesters (senior year)).
5. Maintain a cumulative grade point average of 3.0 or higher in all undergraduate course work after enrolling in the BBA/BSBA-MSF program.
6. Maintain a cumulative grade point average of 3.0 or higher on all graduate course work after enrolling in the BBA/BSBA-MSF program.

Undergraduate Curriculum
The individual BBA or BSBA degree requirements must be fulfilled as described in the University Bulletin.

In addition, during the last two semesters of the student’s selected undergraduate degree (BBA or BSBA degree) program, a student may enroll in up to 6 graduate credit hours per semester selected from courses in the MSF curriculum with prior approval of the MSF Faculty Director. A student will typically enroll in four graduate courses worth a total 8 credit hours in their last two semesters (senior year).

Graduate Curriculum
The MSF degree requirements must be fulfilled as described in the newly revised curriculum effective Fall 2019 in the University Bulletin with the exception that the BUS 640, Quantitative and Analytical Fundamentals for Finance, (4 credits; commonly known as the "boot camp" 4) requirement for the MSF degree will be waived for dual degree program students, thereby reducing the MSF degree required credit hours from 34 to 30.

Conferral of Undergraduate Degree and Withdrawal from Dual Degree Programs
Students will be awarded their undergraduate degree (BBA or BSBA) as usual upon completion of all standard undergraduate degree requirements. In addition, withdrawal from the dual degree program will not affect the award of the bachelor’s degree.

M.H.A. in Health Management and Policy
Overview
The MHA program helps students understand business principles and their application to the health care sector. Students enrolled in the Master in Health Administration (MHA) program hone skills in business fundamentals such as finance, accounting, human resources, and process improvement, and gain knowledge in health care specific areas including the structure, organization, policy, and delivery of health care; health economics; and information technology; among others. Students also gain a comprehensive lens through which they can approach solutions in their careers through first-hand experience of daily operations and opportunities to improve processes. Students have access to C-suite leaders in the classroom and other venues. Each student will also have the opportunity to participate in an off-site internship experience. Graduates of the program are prepared to be leaders in the management and administration of health care systems, physician groups, insurance companies, medical device companies and health care facilities.
Admission Requirements

- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
- Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  - GMAT Institution Code is 7NV-S1-86
  - GRE institution Code is 5815
- An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  - TOEFL - 94 or above (iBT only)
  - IELTS - 7.0 or above

If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

Additional Required Courses

The remaining courses will be selected from the following electives or other courses approved by the program director:

- BSL 685 Legal Aspects of Health Administration 2
Mission

The Master in Health Administration (MHA) is designed to prepare future leaders to develop knowledge and mastery of skills to meet the critical challenges facing the health care industry.

Goals

The program objectives are to:

• Understand basic principles and their application to the health care sector.
• Expose participants to key health care industry concepts associated with the dynamic, continuously changing, and complex management and policy aspects of the health care sector.
• Prepare future leaders to develop knowledge and mastery of skills to meet the critical challenges facing the health care industry.

Student Learning Outcomes

• Students will be able to predict impacts and unintended consequences of health care policies, differentiating between associated and causal factors, using aggregate data to inform their predictions. This maps directly from the course objectives and analytic competency in the syllabus: using the most valid and reliable sources of information to assess the dimensions of health system issues and their solutions, and present such solutions in an organized, convincing framework.
• Students will demonstrate the ability to integrate key economics concepts of supply, demand, scarcity, and opportunity cost in the health care setting.
• Students will demonstrate the ability to integrate key MHA competencies with business principles and health care fundamentals to complete a capstone project working directly with a health care organization.

M.S. in Sustainable Business

Master of Science in Sustainable Business

The University of Miami Business School’s Master of Science in Sustainable Business provides students the opportunity to be a force for good inside a company by making positive impacts on the environment and society in a way that increases the long-term value of the firm and is consistent with the firm’s strategy and vision. The unique disciplinary team of the program unites business, science, theory, and practice to provide forward-thinking expertise for those focused on where the world is headed. Beyond the business core courses, students receive training in scientific basics through interdisciplinary electives from the University of Miami’s Rosenstiel School of Marine and Atmospheric Science and the Department of Civil Architecture and Environmental Engineering.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (https://www.bus.miami.edu/academic-programs/mba-masters/masters/sustainable-business/).

Admission Requirements

• Completed application for admission submitted through BusinessCAS
• A $48 non-refundable application fee
• A baccalaureate degree from an accredited institution
  • Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  • International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.

Mission
The M.S. in Sustainable Business aims to address the growing need for a master’s level program to prepare students for careers in corporate sustainability.

Goals
• To provide rigorous, business focused graduate education to those pursuing a degree in sustainable business.
• To educate students in the scientific basis of sustainability programs.
• To provide students with experiential training in the development of a business sustainability project.

Student Learning Outcomes
• Students will be able to apply rigorous, data driven methods to measure, report, and analyze sustainability programs.
• Students will be able to evaluate the economic value of sustainability programs.
• Students will demonstrate written and oral communication skills needed to succeed in sustainability-related professions.

Master in International Business

The Master in International Business (MIB) program seeks to develop global leaders. To this end, it offers to a select group of globally-minded students from throughout the world with rich experiential learning opportunities in Miami and other locations worldwide. The program incorporates a rigorous academic curriculum focusing on best practices by both global startups and leading multinationals in addressing their emerging opportunities and challenges. Students are exposed to South Florida’s rich multicultural business community and the hundreds of international conferences that it hosts every year. Students may focus their professional development efforts on developing both regional competencies and functional expertise of their choice. MIB program activities in and out of classrooms are designed to help its students bond, as well as expand their professional network with participants of other graduate business programs.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/international/).

Admission Requirements
• Completed application for admission submitted through BusinessCAS
• A $48 non-refundable application fee
• A baccalaureate degree from an accredited institution
  • Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  • International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
• Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
• A current resume
• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-79
  • GRE institution Code is 5815
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.
We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

### Mission
To help students develop the competencies, expertise, and mindset with which to advance their goal of becoming principled leaders of global businesses and societies.

### Goals
Students completing the MIBS program will be able to understand and integrate basic international business concepts and to apply analytic models and techniques for international business decision making, planning and execution. They’ll acquire international functional skills to formulate and implement international business strategies, as well as gain an understanding of a particular region of the world and successfully apply the acquired international business frameworks and expertise to profit from international business opportunities and/or to cope with international business challenges.

### Student Learning Outcomes
- To develop the Business Core Foundations.
- To integrate all acquired knowledge/expertise through an internationally-focused practical project.
- To acquire a global perspective and gain the basic International Business expertise.

### Master of Professional Accounting (online)
**Master of Professional Accounting (online)**
The Master of Professional Accounting provides focused, accounting education meant to prepare students for a career in public accounting, private industry, as well as government/non-profit sector. The program consists of 32 credits that will be taken over a 16-month period with start dates in September, January, and May. The coursework will consist of 16 credits in basic accounting, taxation and information systems, followed by 16 credits in advanced topics including auditing and financial statement analysis and firm valuation. The courses offered in the MPrA are taught at both the undergraduate and graduate level in accounting at the Miami Herbert Business School. All of these courses have been taught as two-credit or three-credit courses, but have been modified, combined and packaged into four credit modules. Most students in the program will earn a Certificate in Accounting Practice along the way to earning their degree.

To obtain detailed program admission and curricula information please visit the website. (http://www.miami.edu/online/online-degrees/masters-professional-accounting/)

Total Credit Hours: 40

1. Should your state of residence require additional coursework in order to sit for the CPA certification exam, you may enroll in two additional (optional) advanced courses which will enable you to earn additional Accounting credits that may be required.

**Mission**

The MPRA program strives to conform to strategic priorities of the Miami Herbert Business School in the following ways:

- Integrate knowledge from the latest field-based research into classroom discussion so that students better understand financial and managerial decision making in practice and can take a professional leadership role in assessing the standard quantitative tools used in accounting.
- Recognize the context and implications of the conflicts of interest inherent in the accounting industry in both classroom discussion and extracurricular interaction with local leaders, in order to create principled leaders in the field of accounting.
- Expose students to the global aspect of the field of accounting through both coursework and interaction with masters-level students in one of the most culturally diverse graduate business schools in the United States.

**Goals**

**Student Learning Outcomes**

- Understand and apply appropriate accounting techniques to a variety of transactions in business.
- Understand fundamental principles in taxation and basic rules of taxation as set out in Internal Revenue Service Code.
- Understand the basic principles guiding the design and implementation of accounting information systems with an emphasis on internal controls.

**Master of Science in Accountancy**

**Overview**

The Master of Science in Accountancy (MSA) and Master of Science in Taxation (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MSA offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor's level, the MSA and the MST programs are offered as accelerated programs for University of Miami undergraduates.

**Scholarships**

University of Miami Herbert School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

**Accounting Summer Intensive Program**

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

**Non-Accounting Majors**

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Science in Accountancy (MSA) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MSA or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MSA or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MSA students may complete the course in the summer or in term one of the spring semester.

**Foreign Students**

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AASCB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MSA or MST program must also take an advanced taxation course.
(ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MSA program will automatically also be considered applicants to the Accounting Summer Intensive Program.

**Program Schedule**

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½-week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

**Program Prerequisite Accounting Courses**

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

**Summer Intensive Program Course Offerings**

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 632</td>
<td>Intermediate Accounting I</td>
<td>2</td>
</tr>
<tr>
<td>ACC 633</td>
<td>Intermediate Accounting II</td>
<td>2</td>
</tr>
<tr>
<td>ACC 634</td>
<td>Cost Accounting</td>
<td>2</td>
</tr>
<tr>
<td>ACC 635</td>
<td>Auditing</td>
<td>2</td>
</tr>
<tr>
<td>ACC 636</td>
<td>Accounting Systems</td>
<td>2</td>
</tr>
<tr>
<td>ACC 673</td>
<td>Taxation for Business and Investment Decisions</td>
<td>2</td>
</tr>
</tbody>
</table>

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

**Entering the MSA or MST Program**

Upon successful completion of the intensive program, students immediately enter the MSA or MST program in the fall semester. To graduate with their MSA or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

**CPA Licensure Requirements**

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. Please find the licensure requirements for the State of Florida, here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/licensure/).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

**Requirements to Sit for the CPA Exam:** To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.
Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements
The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)
Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses
No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

Admission Requirements
- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
- Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  - GMAT Institution Code is 7NV-S1-02
  - GRE institution Code is 5815
- An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  - TOEFL · 94 or above (iBT only)
  - IELTS · 7.0 or above
If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select “Add Test Score” by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

QUESTIONS?

Connect with Miami Herbert Business School’s graduate enrollment advisors at (305) 284-2510 or by email at mba@miami.edu.

Curriculum Requirements

Master of Science in Accountancy (MSA)

The MSA program offers two tracks: Assurance (MSA-Assurance) for students planning to go into public accounting and Corporate Accounting (MSA-Corporate) for students planning careers as controllers, CFOs or financial analysts. The MSA is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MSA in a year or less provided they enroll as full time students.

Undergraduate Course Requirements

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes including ACC 648 (http://bulletin.miami.edu/search/?P=ACC%20648) Financial Reporting Implications of Income Taxes, the equivalent of ACC 404 (http://bulletin.miami.edu/search/?P=ACC%20404) Advanced Taxation (Corporate and Partnership Income Taxation) is also required. Students can satisfy this prerequisite by taking ACC 639 (http://bulletin.miami.edu/search/?P=ACC%20639) Income Taxation and Business Entities which is offered in a 9-day intersession format in August before the start of the fall semester. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

Master of Science in Accountancy—Assurance Track (MSA-Assurance)

The program requires 30 semester hours consisting of nine required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MSA degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

1 Any other electives must be selected in consultation with the Program Director.

**Master of Science in Accountancy—Corporate Accounting Track (MSA-Corporate)**

The program requires 30 semester hours consisting of eight required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the eight required courses, students must select five courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MSA degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

### Accelerated Masters Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor’s level, the MAcc and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor’s and Master’s degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 15 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and ACC 404.

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not
guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).

**Senior Year Spring Semester Curriculum**
In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550 (http://bulletin.miami.edu/search/?P=ACC%20550)). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).

**Summer, Fall, and Spring after Senior Year**
In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

**Admission to the Five-Year Accounting Program with Senior-Year Internship**
- Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

**Mission**
The mission of the Accounting Department is to provide an environment recognized for educational excellence through our academic programs, intellectual contributions, and service to the academic and professional communities.

**Student Learning Outcomes**
- Students should demonstrate an understanding of International Financial Reporting Standards (IFRS) including its basic history, its standard setting structure, and significant accounting concepts and principles and how they compare to U.S. Generally Accepted Accounting Principles (U.S. GAAP).
- Students should understand the financial reporting related to the income tax provision in accordance with the requirements under ASC 740 (accounting for income taxes).
- Students should demonstrate good understanding of the importance of the footnotes to financial statements while evaluating reported financial numbers and be able to recast financial statements for comparability across years.

**Master of Science in Business Analytics**

**Overview**
The Master of Science in Business Analytics program is an intensive experience that develops well-trained business analysts armed with the skills necessary to understand, manage and make use of big data in a business context. Over the course of 10 months, students learn how to turn abstract data into meaningful information with which to predict consumer behavior and forecast revenue and expenses for virtually any business model and any industry sector.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/analytics/).

**Admission Requirements**
- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
• A current resume

• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.

• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-61
  • GRE institution Code is 5815

• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

*Students must take at least two courses must be taken between MAS 640, MAS 646, MAS 649 & MAS 651.*

*8 credits of electives (approximately 4 courses) are required. Elective offerings are based on class demand.*
Mission

• To develop individuals that are prepared to use the methods and technology of analytics and data science to impact global business and society.

Student Learning Outcomes

• Students will develop skills in acquiring, preparing and visualizing data.
• Students will develop and use data mining methods and software tools.
• Students will learn to use decision models.
• Student will develop and use predictive models.

Master of Science in Finance

The Master of Science in Finance develops quantitative and analytical skills demanded in today’s competitive marketplace. The STEM-oriented curriculum integrates modeling, analytics, information technology, and quantitative methods into all of the finance courses. Students are able to personalize the curriculum by choosing course “clusters” that match their learning needs and areas of interest. Sample course clusters include:

• Corporate Finance
• Fintech
• Investment & Portfolio Management
• Wealth Management
• International Finance
• Financial Analytics
• Psychology of Financial Markets
• Sustainable Finance
• Real Estate Investments

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (https://www.bus.miami.edu/academic-programs/mba-masters/masters/finance-program/).

Requirements for Admission

QUESTIONS?

Connect with Miami Herbert Business School's graduate enrollment advisors at (305) 284-2510 or by email at mba@miami.edu.

Curriculum Requirements

The curriculum defines a common core of required courses (14 credits) and allows the selection of elective courses (20 credits). A minimum of 12 elective credits out of the 20 total elective credits must be Finance (FIN) courses. A minimum of 24 STEM credits (12 required and 12 elective) out of the 34 total program credits is required for graduation.

One semester of part-time (10-20 hours per week) practical training and concurrent enrollment in FIN 695 is mandatory for the Master of Science in Finance degree. Practical training is defined as "alternative work/study, internship, cooperative education, or any other type of required internship or practicum that is offered by sponsoring employers through cooperative agreements with the school." The practical training and concurrent enrollment in FIN 695 must be approved in advance by the faculty director. International students in F-1 status are required to obtain authorization for Curricular Practical Training (CPT) from the Department of International Student and Scholar Services (ISSS) prior to engaging in off-campus employment.

**Total Credit Hours**: 34

1 Students may take FIN 696 [here](https://miami-curr.courseleaf.com/search/?P=FIN%20696) as a replacement for FIN 695 [here](https://miami-curr.courseleaf.com/search/?P=FIN%20695) only if an internship cannot be obtained.

**The Professional MSF Track**

The Professional MSF Track does not require the one semester internship, FIN 695. In lieu of FIN 695, the Professional track requires FIN 696: Finance Capstone Project or an approved professional practice or research-based course. Students may opt into the Professional MSF track should
they have extensive professional work experience within the finance field, or an interest in a research-intensive course with doctoral degree aspirations or students who require a culminating academic experience that facilitates students to think critically to solve a finance-related issue.

Student Learning Outcomes
• Students will acquire the ability to apply appropriate analytical and quantitative models to a wide assortment of decisions encountered by finance professionals.

• Students will acquire the ability to write effectively in order to excel as a professional in the field of finance.

• Students will apply the financial concepts and quantitative and analytical techniques important to their chosen field of specialty, as defined by their Finance Internship (FIN 695) or Finance Capstone Project (FIN 696), in the solution of real-world problems.

Master of Science in Finance (online)

The Master of Science in Finance provides focused, graduate level education meant to prepare students for a professional career in finance. The program consists of 32 credits taken over a sixteen-month period beginning in August, January, or May. The program includes 4 credits of fundamental coursework in finance and quantitative methods plus 28 credits in more advanced finance topics. Students in the program will earn both the Certificate in Financial Decision Making and the Certificate in Corporate Finance along the way to earning their degree.

To obtain detailed program admission and curricula information, please visit the website (http://www.miami.edu/online/programs/masters-in-finance/).

Certificate in Financial Decision Making

For students who want to advance in corporate finance functions without committing to a full degree program. This certificate is 16 credits taken over an eight-month period beginning in August, January or May. Students would typically be working in such functions as the controller’s office, treasury management, capital budgeting, or investor relations. After completion, it is possible to apply for admission to the online Master of Science in Finance which would then take another 16 credits and 8 months to complete.

Certificate in Corporate Finance

For students who work in a financial setting and wish to further their understanding of finance but do not wish to commit to a full degree program. This certificate is 16 credits taken over an eight-month period beginning in August, January or May. Students would typically be working at a wealth management firm, a mutual fund, hedge fund, or pension fund. After completion, it is possible to apply for admission to the online Master of Science in Finance which would then take another 16 credits and 8 months to complete.

Mission

The Master of Science in Finance online program is designed to prepare students for finance-focused careers, such as a personal financial adviser, financial manager, financial analyst, financial services sales agent, or insurance underwriter.

Goals

The 16-month program gives students the necessary knowledge in corporate finance and investments as well as the basic communication, teamwork, and organizational skills necessary to forge a successful career in corporate finance or financial decision making. Additionally, each student is expected to develop an analytical problem solving ability and to be able to apply current problem solving technologies in their financial decision making.

Student Learning Outcomes

- Use teamwork, business communication, and organizational skills to effectively analyze information and present results in group projects.
- Apply analytical and theoretical approaches to financial topics.
- Use technology for financial problem solving.

Master of Science in Leadership

The Master of Science in Leadership shapes students into competent, versatile and dynamic leaders ready to navigate the complex workplace of the 21st century. The program helps participants develop the interpersonal skills they need to influence others and lead effectively in today’s challenging work environment. Not only does the program include coursework to provide students with a foundation of basic management skills, it includes a set of courses that focus on the skills needed to achieve performance at the highest levels possible.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/specialized-masters/leadership/).

Requirements for Admission

- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
- An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  - TOEFL - 94 or above (iBT only)
  - IELTS - 7.0 or above

If you do not yet have a TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

Work Experience Admissions Requirement: Very few students are admitted to the MS, Leadership program without work experience. Those few students admitted directly from an undergraduate program without such experience must meet with the Academic Director to find an appropriate internship or field training to take part in during at least the second half of the program. Students entering the program with the requisite work experience will be exempt from this requirement.

**Mission**

To develop professionals who successfully demonstrate the principled leadership skills necessary to effect positive change in their various communities and ultimately, in the global economy.

**Student Learning Outcomes**

- The ability to assess their respective leadership strengths and weaknesses, and develop action plans to improve existing skills sets.
- The ability to apply leadership theories and concepts to actual leadership situations.
- The ability to identify the leadership ethical issues in various situations.

**Master of Science in Taxation**

**Overview**

The Master of Science in Accountancy (MSA) and Master of (MST) programs are similar in that they offer an opportunity to concentrate in accounting, but they differ in degree of specialization and career path orientation. The MSA offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor’s level, the MSA and the MST programs are offered as accelerated programs for University of Miami undergraduates.

**Scholarships**

University of Miami Herbert Business School - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

**Accounting Summer Intensive Program**

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

**Non-Accounting Majors**

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Science in Accountancy (MSA) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MSA or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MSA or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester. Although MST students must complete advanced taxation in the summer, MSA students may complete the course in the summer or in term one of the spring semester.

**Foreign Students**

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign students entering the MSA or MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format and in term one of the spring semester. Foreign applicants to the MSA program will automatically also be considered applicants to the Accounting Summer Intensive Program.

**Program Schedule**

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

**Program Prerequisite Accounting Courses**

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

**Summer Intensive Program Course Offerings**

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 632</td>
<td>Intermediate Accounting I</td>
<td>2</td>
</tr>
<tr>
<td>ACC 633</td>
<td>Intermediate Accounting II</td>
<td>2</td>
</tr>
</tbody>
</table>
Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MSA or MST Program

Upon successful completion of the intensive program, students immediately enter the MSA or MST program in the fall semester. To graduate with their MSA or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA Licensure Requirements

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed here (http://www.myfloridalicense.com/DBPR/certified-public-accounting/licensure/).

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam

To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor’s degree in order to sit for the CPA exam.

Requirements for Licensure

In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor’s degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida’s 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State

If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Master of Science in Taxation (MST)

This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC 403 Fundamentals of Taxation and ACC 404 Advanced Taxation, or their equivalents. Students who have taken only one tax course should plan to take an advanced taxation course (such as ACC 639 Income Taxation and Business Entities which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester). In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designated for graduate students. Courses with a 500-level designation are designated for upper-level students.

Applications Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the courses will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

Admission Requirements

For admission to either the MSA or MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant’s:

- Undergraduate grade point average
- GMAT score
- Grades in specific accounting courses,
- Rigor of the undergraduate program
- Other factors such as work experience

Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition, individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami’s Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami’s Accounting Summer Intensive Program to fulfill this requirement.

QUESTIONS?

Connect with Miami Herbert Business School’s graduate enrollment advisors at (305) 284-2510 or by email at mba@miami.edu.
level undergraduate students and do not count toward the MST degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

## Accelerated Masters Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.
The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

</table>

1. Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).

2. Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 Accounting Controls in Information Technology (offered every summer) or ACC 649 Issues in Tax Policy.

3. Students are also REQUIRED to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.

   Students are also expected to pass part, if not all, of the CPA exam during this summer.

4. In the final fall semester students will complete the remaining 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

## Admission to the Accelerated Programs

### Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
• Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
• Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors
• Students should apply to the accelerated program by September 15 of their junior year.
• Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
• After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
• Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and ACC 404.

Five-Year Accounting Program with Senior-Year Internship
The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline
1. Fall semester of Junior Year: Complete an application to the program by September 15 and apply for an internship position to take place in the spring of senior year.
2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate accounting degree in specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites
The program is designed for University of Miami Herbert Business School undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses (ACC 301 and ACC 406) and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).

Senior Year Spring Semester Curriculum
In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550 (http://bulletin.miami.edu/search/?P=ACC%20550)). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include ACC 301, ACC 406 and MGT 401 (http://bulletin.miami.edu/search/?P=MGT%20401).

Summer, Fall, and Spring after Senior Year
In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship
• Students must apply to the program in their junior year and obtain an “approved” internship through the Toppel Career Center.
• The internship must be scheduled to take place during the spring semester of their senior year.
• In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.

The GMAT will be waived for students admitted into the program.

Mission
The mission of the Accounting Department is to provide an environment recognized for educational excellence through our academic programs, intellectual contributions, and service to the academic and professional communities.

Student Learning Outcomes

- Students will demonstrate the ability to analyze complex tax problems and to use technology to locate solutions.
- Students will demonstrate an understanding of the tax professional's obligations when dealing with clients.
- Students will understand the financial reporting related to the income tax provision in accordance with the requirements under ASC 740 (accounting for income taxes).

Non-Degree Programs

Graduate Non Degree Programs
The School offers open enrollment certificate programs in general business as well as accounting and finance (online) which enable professionals to add basic business courses to their portfolios.

To obtain specific program information please visit:

- Certificate in Accounting Practice (online) (p. 2008)
- Certificate in Business (p. 2009)
- Certificate in Corporate Finance (online) (p. 2010)
- Certificate in Financial Decision Making (online) (p. 2011)
- Certificate in Leadership (p. 2011)

Certificate in Accounting Practice (online)

Certificate in Accounting Practice
Intended for candidates with no prior accounting credits, the Certificate of Professional Accounting program will provide the fundamental knowledge of financial and managerial accounting, as well as taxation and accounting information systems sufficient to equip students for entry-level jobs in public or corporate accounting.

The Certificate of Professional Accounting program strives to conform to the strategic priorities of the Miami Herbert Business School in the following ways:

1. Integrate knowledge from the latest field-based research into classroom discussion so that students better understand financial and managerial decision making in practice and can take a professional leadership role in assessing the pros and cons of standard quantitative tools used in accounting.

2. Recognize the context and implications of the conflicts of interest inherent in the accounting industry in both classroom discussion and extracurricular interaction with local leaders, in order to create principled leaders in the field of accounting.

3. Expose students to the global aspect of the field of accounting through both coursework and interaction with masters-level students in one of the most culturally diverse graduate business schools in the United States.

The specific CPrA program objectives are to address the growing demand for a masters-level business certificate focused in accounting by accomplishing the following goals:

- Provide focused, graduate level education to those wishing to pursue a professional career in accounting
- Develop communication skills critical to long-term success in the accounting profession
- Provide participants with an understanding of the day-to-day work environment accounting professionals face, and career guidance, through periodic interaction with other professionals
To obtain detailed program admission and curricula information please visit [website](http://welcome.miami.edu/online/programs/masters-in-professional-accounting/certificate/).

## Mission

The CPrA program strives to conform to strategic priorities of the Miami Herbert Business Schools in the following ways:

- Integrate knowledge from the latest field-based research into classroom discussion so that students better understand financial and managerial decision making in practice and can take a professional leadership role in assessing the standard quantitative tools used in accounting.
- Recognize the context and implications of the conflicts of interest inherent in the accounting industry in both classroom discussion and extracurricular interaction with local leaders, in order to create principled leaders in the field of accounting.
- Expose students to the global aspect of the field of accounting through both coursework and interaction with Certificates-level students in one of the most culturally diverse graduate business schools in the United States.

## Goals

### Student Learning Outcomes

- Understand and apply appropriate accounting techniques to a variety of transactions in business.
- Understand fundamental principles in taxation and basic rules of taxation as set out in Internal Revenue Service Code.
- Understand the basic principles guiding the design and implementation of accounting information systems with an emphasis on internal controls.

## Certificate in Business

The Certificate in Business program provides professional and graduate students an opportunity to obtain valuable, fundamental business education and enhance their analytical skills, as well as soft skills. The program consists of seven courses in business covering all fundamental functions central to any business operation. Students can take one or more courses for credit, but must satisfactorily complete all seven courses to be awarded the certificate. One or more of these courses may also serve as part of the specialized master’s degrees. The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. The GMAT and GRE are not required except from students seeking admission to the specialized master’s programs.

To obtain detailed program admission information, please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our [website](http://www.bus.miami.edu/graduate-programs/business-certificate/).

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment ([https://finaid.miami.edu/](https://finaid.miami.edu/)) for further assistance.*

## Requirements for Admission

- Completed application for admission submitted through BusinessCAS
- A $48 non-refundable application fee
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
- A current resume
- At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

## Certificate in Corporate Finance (online)

### Overview

This certificate is designed for students who are seeking a career change to corporate finance, or students wishing to advance in the corporate Treasurer’s office or similar structure. The certificate begins with a common core of financial tools. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both financial and accounting problems. The certificate finishes with a course in applied corporate finance, which focuses on financial decision making from a corporation's perspective. Issues addressed include management of corporate liabilities, leasing and other asset-based financing techniques, short-term and long-term financing, capital budgeting decisions (CAPEX), corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Students completing the online Master of Science in Finance have the option of earning a certificate in either Corporate Finance or Financial Decision-Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Corporate

Mission
The Certificate in Corporate Finance allows students to advance in corporate finance functions such as the controller's office, treasury management, capital budgeting, or investor relations.

Goals
Student Learning Outcomes

• Use teamwork, business communication, and organizational skills to effectively analyze information and present results in group projects.

Certificate in Financial Decision Making (online)

Overview
This certificate is designed for students who wish to either become financial managers or who wish to advance their financial careers. The certificate begins with a common core of financial tools and finishes with a course in financial decision-making. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both finance and accounting problems. The financial decision making course, and the certificate will help managers use decision-making theory to better understand why investors, money managers, and corporate managers often make sub optimal economic and financial decisions. The course includes basic techniques and models that a manager or an investor should know. The certificate will provide students with a template for thinking through a variety of financial issues.

Students completing the master's in finance have the option of earning a certificate in either Corporate Finance or Financial Decision Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Financial Decision Making requires 16 credits.

Communication

http://www.com.miami.edu

Departments

The School of Communication offers:

- the Master of Arts in the Department of Communication Studies (M.A. in Communication Studies), and
- the Master of Arts in the Department of Journalism and Media Management (M.A. in Journalism), and
- the Master of Arts in the Department of Strategic Communication (M.A. in Public Relations), and
- the Master of Science in the Department of Journalism and Media Management (M.S. in Media Management), and
- the Master of Fine Arts in the Department of Cinematic Arts (M.F.A. in Motion Pictures), and
- the Master of Fine Arts in the Department of Interactive Media (M.F.A. in Interactive Media).

The School also offers a Ph.D. in Communication.

Admission Requirements

Admission to Graduate Studies at the Master’s Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts, Master of Science, or Master of Fine Arts degree in the School of Communication:

- A baccalaureate degree from an accredited institution
- The School’s official application
- An $85.00 non-refundable application fee
- Three letters of recommendation
- 500-word typed statement of academic and professional goals
  - Note: for the Interactive Media M.F.A., please visit this web site (http://com.miami.edu/interactive-media-mfa/) for specific instructions about the statement.
- Official transcripts of all college work, both undergraduate and graduate
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants.
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
  - Note: Required for M.A. applicants in Communication Studies
  - Note: Public Relations M.A. the GRE is not required but encouraged.
  - Note: Journalism M.A. and Interactive Media M.F.A. applicants may send GRE scores or a portfolio.
  - Note: Media Management M.S. applicants may send the official Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores. Those applicants with at least three years of relevant professional media or business work experience (by the time they apply) may be eligible for a waiver. Eligibility for a waiver depends on the quality and type of professional experience and remains at the discretion of the Department of Journalism and Media Management Chairperson.
Admission to Graduate Studies for the Juris Doctor/Master of Arts in Communication Joint Degree

Requirements for admission to graduate studies for the Juris Doctor/Master of Arts in Communication joint degree are:

- Students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student's law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the J.D. program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.
- The LSAT score may be submitted in lieu of the GRE score.

General notes

- Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master's program separately.
- Students in this joint degree program must commence law study first.
- Students who have already commenced work on the SoC M.A. are not eligible for the joint program.

Admission to Graduate Studies at the Doctoral Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Doctor of Philosophy in Communication program:

- A master's degree in communication or another appropriate field. The degree must be in addition to a bachelor's degree. All degrees must be from accredited institutions.
- The School's official application
- An $85.00 non-refundable application fee
- Three letters of recommendation
- Official transcripts of all college work, both undergraduate and graduate
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants.
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
  - Official Graduate Record Examination (GRE) scores
  - Current Curriculum Vitae (CV)
  - 500-word typed statement of your academic and professional goals, research area you want to pursue and why, and how your background has prepared you for this. A copy of the completed master's thesis if it has been completed. If the master's thesis is in progress, submit completed chapters. If a thesis is not required by your master's program, submit comparable scholarly work.

Degree Programs

The School of Communication offers graduate programs leading to the Master of Arts, Master of Science, Master of Fine Arts, and the Doctor of Philosophy degrees.

Communication Studies (M.A.)

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30 credit hour thesis track program emphasizes the student's development of research skills. The 36 credit hour non-thesis track program focuses on a theoretical foundation with emphasis on applied communication. Students have the option to concentrate in Communication Studies, Health Communication, Intercultural Communication, or Organizational Communication.

Journalism (M.A.)

JOURNALISM (M.A.) is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today's media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the
opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Public Relations (M.A.)
PUBLIC RELATIONS (M.A.) offers two tracks. The 30 credit hour thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36 credit hour, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Media Management (M.S.)
MEDIA MANAGEMENT (M.S.) is a 32-credit interdisciplinary graduate program designed for students who seek new or advanced opportunities in the various and expanding areas of the media industry, such as content distribution, news and entertainment programming, research, and analytics. Students complete courses in the Business School to learn or strengthen their knowledge about business fundamentals, including managerial strategy, economics, and marketing. At the same time, students take courses in the Department of Journalism and Media Management to apply business principles to media situations and evaluate critically how technological and regulatory trends, changing business models, emergent content applications, and new audience measurement techniques influence decision-making in media operations. Students can also customize their coursework by selecting electives in the School of Communication that best match their personal or career interests.

Required classes are held on Saturdays and weekday evenings to provide flexibility for working professionals. Students can study full-time or part-time. The program begins every fall and lasts one year for full-time students or two years for part-time students. No prior business or media management experience or education is required.

Joint Degree Juris Doctor (J.D.)/M.A. in Communication
JOINT DEGREE JURIS DOCTOR (J.D.)/M.A. IN COMMUNICATION. A powerful background in law and in communication can be a launching pad for a career in law, business, entertainment or government. For this reason, the University of Miami School of Law and School of Communication have brought together these two dynamic fields to offer a joint degree program. Through this joint program, students can acquire a law degree and a master’s degree in communication in less time (3 to 3½ years). The joint degree program is intended for students with a variety of goals including students who plan to practice professionally in a communication field such as journalism or strategic communication with a law-related emphasis. Graduates of these programs may also work as in-house counsel for new communication technology companies, or serve with government agencies concerned with communication law or with law firms practicing in that field. This program also provides a solid foundation for future journalists who wish to report on legal affairs, and offers ideal preparation for the rapidly growing field of public affairs management, in which practitioners work in business, government and non-profits to communicate with key audiences.

The School of Communication M.A. degree programs participating in the joint J.D. program are:

- Communication Studies (Communication Studies, Health Communication, Intercultural Communication, Organizational Communication)
- Public Relations
- Journalism

Motion Pictures (M.F.A.)
MOTION PICTURES (M.F.A.) M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. During the second year of studies, candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies. This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Graduate students are encouraged to pursue independent and critical thinking, research and creative work as appropriate to the fulfillment of the requirements of their degree. In addition, the graduate program seeks to support innovative approaches and ideas and to aid in the pursuit of relevant scholarly and creative endeavors.

Interactive Media (M.F.A.)
INTERACTIVE MEDIA (M.F.A.) The Interactive Media graduate program aims to prepare a new generation of innovators and leaders in the field of interaction design. Our mission is to explore the use of technology, design, human behavior, and its impact on communication. The multidisciplinary curriculum brings together students from different backgrounds to learn about user experience design, game design, human-computer interaction, data visualization, wearables, immersive computing, and other emerging technologies. The program trains students to research, prototype, design, and build projects in business, social, academic, and cultural contexts.

Communication

COMMUNICATION (Ph.D.) provides students with the theory and research skills required to use communication to make positive change in society, community, and individuals. Possible areas of specialization, within this overarching framework of social and behavioral change, include health
communication (broadly defined), intercultural communication, organizational communication, international communication, advocacy, and journalism studies and accompanying new/digital media foundations and skills.

**Cinematic Arts**

The Cinematic Arts Department prepares a new generation of innovators, storytellers and leaders to succeed in the film, television, and digital emergent technologies. The M.F.A. in Motion Pictures guide students to advance their technical proficiency and critical studies while learning innovative narrative skills. Students concentrate in production, screenwriting, or producing.

The M.F.A. in Motion Pictures offers a comprehensive curriculum in the creative uses of technology, narrative and documentary, positioning students with the business practices needed to bring their work to the expanding marketplace.

Students are required to complete a minimum of 66 credit hours. At least 24 of these credit hours must be at or above the 700-level. At least 12 credit hours must be earned at the 800-level for thesis work. Motion Picture students must maintain an overall minimum GPA of 3.0 or above for all courses. By the end of the second year, students are required to achieve a minimum 3.0 score on the program's film and television literacy test.

Students in the Motion Picture program are strongly encouraged to explore not only a primary but also a secondary area of specialization and develop a minimum of 2 creative projects in consultation with their faculty advisory committee. The 3 year program culminates in a thesis portfolio. Students need to work closely with their primary advisor and committee to ensure they are fulfilling their degree expectations, which typically include a short motion picture project abroad and a summer internship.

**Masters Programs in Cinema and Interactive Media**

- M.F.A. in Motion Pictures (p. 2020)

CCA 601. Principles of Aesthetics and Analysis. 3 Credit Hours.
Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 602. Global Issues and Filmmaking. 3 Credit Hours.
A trans-disciplinary approach to study and analyze a variety of complex global Issues such as climate change, human security, globalization, and rise of nationalism while gaining hands-on experience to develop short analytical documentary films about such topics. Prior film-making experience is NOT required.
Components: HRK.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 603. Film Directors. 3 Credit Hours.
This course will address the conditions of authorship in film through an intensive study of the films of two or more directors, whose careers will serve as case studies. These directors will be historically important and their work will represent significant achievements in the art of film.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 604. Aspects of Contemporary Cinema. 3 Credit Hours.
The study of the ways in which film communicates. Intensive analysis and criticism of cinematic techniques exemplified through particular films.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 606. Genres. 3 Credit Hours.
A study of selected movie genres from a variety of critical perspectives. Issues pertaining to selfhood, sexual difference, and other concerns of present-day film criticism will be examined.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 608. National Cinemas. 3 Credit Hours.
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social/political and cultural contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 609. Legal Aspects of Motion Pictures. 3 Credit Hours.
The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 610. Foundation of Screenwriting. 3 Credit Hours.
This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 611. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 612. Writing for Episodic Television. 3 Credit Hours.
The course will explore the art and craft required to write a "spec" Television episode. The course will explore how TV writing differs from feature writing and how the TV writer/producer business model works. By the end of the course the student will have finished an hour-long "spec" script for an existing TV show or a two-part sitcom teleplay.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 618. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.
The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 619. Seminar in Documentary Production. 3 Credit Hours.
The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 620. Cinematography. 3 Credit Hours.
This hands-on course provides students with the aesthetic and technical aspects of professional concepts and techniques in film and digital media cinematography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 621. Narrative Production. 3 Credit Hours.
An introduction to film and digital production techniques on narrative projects. Emphasis on collaboration, group process and social purpose. Students will be expected to produce a short film abroad as part of this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 623. Advanced 3D Character Design. 3 Credit Hours.
This course covers the 3D game art development pipeline from modeling, texturing, rigging and animation to motion capture, and special effects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 626. Adaptation. 3 Credit Hours.
This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles comic books, and public domain material such as Shakespeare to the screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 629. Nonfiction Film. 3 Credit Hours.
An examination of American and world nonfiction films.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 630. Introduction to Editing. 3 Credit Hours.
Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students’ understanding of aesthetic, and technical considerations in the art of dramatic editing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 651. Motion Graphics and Compositing. 3 Credit Hours.
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 654. Advanced Motion Graphics and Compositing. 3 Credit Hours.
Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.
Prerequisite: CCA 651.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 655. Science Documentary: Autism. 3 Credit Hours.
This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 658. Documentary Production. 3 Credit Hours.
An introduction to the documentary genre including the production of a documentary from start to finish.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 660. Directing the Actor. 3 Credit Hours.
The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal. to train students to articulate their ideas to actors and film crew.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 666. Character and Dialogue. 3 Credit Hours.
An examination of the craft and techniques of creating original characters and dialogue.
Prerequisite: CCA 610.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CCA 670. The Independent Producer. 3 Credit Hours.
Beyond covering the role of the producer, this hands-on class offers students a place to workshop their thesis projects. Students will brand themselves or their company and leave with a packaged project ready to take to market.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 686. Online Screenwriting. 3 Credit Hours.
The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CCA 694. Motion Picture Marketing and Distribution. 3 Credit Hours.
Economic and marketing considerations in the production and distribution of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 695. Advanced Motion Picture Marketing and Distribution. 3 Credit Hours.
Advanced marketing considerations in the distribution of motion pictures.
Prerequisite: CCA 694.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CCA 696. Directing Techniques II. 3 Credit Hours.
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 697. Topics in Film Analysis. 3 Credit Hours.
Content varies by semester. Topics such as Film Directors, National Cinemas, Silent Film, Contemporary Cinema. Course may be repeated for credit if content varies.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CCA 705. Production Management. 3 Credit Hours.
A comprehensive examination of the skills and techniques employed by line producers and production managers in the preproduction, production, and post-production of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 707. Pedagogy and Film. 3 Credit Hours.
This course covers a range of traditions in pedagogy, including history, theory, and practical applications. Intended for those who are currently teaching—or who intend to teach—at the college level, the course provides grounding in foundational approaches as well as a familiarity with recent research advancements in pedagogy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 710. Writing the Feature-Length Screenplay. 3 Credit Hours.
Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character. Classes will generally be conducted as follows: a discussion of screenplay craft, an in-depth analysis of various films from the writer’s POV, and a critique of the various stages of your fellow student screenplays as they evolve throughout the semester.
Prerequisite: CCA 510.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 727. Scriptwriting. 3 Credit Hours.
Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 730. Advanced Editing. 3 Credit Hours.
An examination of the art and techniques of post-production designed for students completing advanced motion picture projects. Lectures, group discussions and screenings. Emphasis on rhythm, dramatic moments, character arcs, symbolic vs. thematic editing, elements of sound editing, sound design, and professional mastering standards. This class is designed to develop editorial skills that will prepare students for professional careers in editing. In-depth examination of effects and sound palettes of the Avid Media Composer, as well as a discussion of how to integrate visual effects from external applications. Finishing and mastering techniques for a variety of mediums as well as a reel building will be covered.
Prerequisite: CCA 630.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 738. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 740. Sound Design. 3 Credit Hours.
Sound Design through seminar and workshop provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course utilizes professional environments to instruct in the basics of sound editing, studio recording and mixing as it is practiced in the film industry. It will also present the aesthetic use of sound and its integral part in the moving image narrative process.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 750. From Script to Screen. 3 Credit Hours.
Advanced production concepts and techniques explored in a variety of media. Students will produce an approved film or script. The class will explore the language of motion picture and how this language is utilized in the story telling process. Knowledge of both the practical and aesthetic aspects of film will be stressed at all times.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 752. Advanced Cinematography. 3 Credit Hours.
Advanced technical and photographic principles begun in CMP 651. Preparation for the filming of the MFA project film.
Prerequisite: CCA 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 756. Motion Picture Post-Production Procedures. 3 Credit Hours.
An examination of the esthetics of editing, recording, re-recording, and laboratory procedures following completion of principal photography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 758. Directing the Camera. 3 Credit Hours.
An introduction to directing actors in low budget, independent films utilizing traditional, modern and evolving directorial techniques used by independent and traditional film makers: analyzing and orchestrating scripted material, developing a directorial concept, creating indelible characterizations, building a visual image, auditioning and casting the talent, blocking and directing the untrained amateur or highly skilled professional actor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 794. Motion Picture Internship. 1-3 Credit Hours.
Prescribed study and supervised work with practitioners in motion pictures.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CCA 795. Special Topics in Motion Pictures. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 799. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 815. MFA Thesis. 1-6 Credit Hours.
The focus is on completing the culminating thesis project, in consultation with the student's selected committee and thesis chair.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

M.F.A. in Motion Pictures

Overview
Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. At least 24 must be at or above the 700-level and at least 12 must be earned for thesis. Motion Picture students must maintain an overall minimum GPA of 3.0 for all courses.

M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. Several courses are required during the second year of studies. Candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies.

All M.F.A. students must demonstrate deeper, critical understanding of motion picture practice in diverse social and cultural contexts. To this end, students are encouraged to take advantage of available study abroad programs. Students are also encouraged to participate in an internship during the summer of the first year or second year of studies.

By the end of the second year, students must complete a film and television literacy test, based on a list of 150 culturally and historically significant titles compiled by the faculty. The list is circulated to each student upon entrance into the program. The test is administered annually in the spring semester. Students are required to earn 85/100% on the test in order to complete the degree.

This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Admission Requirements
The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Fine Arts degree program in Motion Pictures in the School of Communication.

• A baccalaureate degree from an accredited institution
• The School’s official application
• An $85.00 non-refundable application fee
• Three letters of recommendation
• 500-word typed statement of academic and professional goals
• Official transcripts of all college work, both undergraduate and graduate.
  • Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  • Note: All transcripts must be the original document, forwarded directly from the university. Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
  • Official TOEFL or IELTS scores
  • Note: Only for international applicants.
• Copy of current passport
  • Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
• Portfolio
Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

CCA 795 Special Topics in Motion Pictures

Credit Hours 12

Third Year

Fall

Required course work:

CCA 815 MFA Thesis 6

Select one of the following: 3

CIM 613 Mobile Application Development
CIM 658 360° Immersive Filmmaking and Storytelling
CCA 705 Production Management
CCA 750 From Script to Screen
CCA 795 Special Topics in Motion Pictures

Credit Hours 9

Spring

Required course work:

CCA 815 MFA Thesis 6

Select one of the following: 3

CCA 694 Motion Picture Marketing and Distribution
CCA 795 Special Topics in Motion Pictures

Credit Hours 9

Total Credit Hours 66

No more than 9 credit hours will be allowed for graduate internships and advanced projects and directed research. Courses may be taken, with program director approval, from other programs or departments within the University of Miami.
Mission
The M.F.A. in Motion Pictures focuses on media creation with an emphasis on combining advanced technical proficiency and innovative narrative skills. Students gain practical and theoretical mastery of their particular professional concentration in screenwriting, production, and producing. Additionally, all students engage in critical studies of film history and theory in order to develop the analytical skills necessary for creative, cutting edge experimentation.

Goals
The Program's objective is to nurture individual creative voices and encourage independent thinking, as well as to support the unique creative collaborative process of media creation. Graduates are prepared to pursue careers as professional moving image artists, enter the teaching profession, provide service to the community and beyond, and enter moving image related professional fields.

Student Learning Outcomes

- Students will demonstrate advanced production skills in their area of concentration (producing, directing, cinematography or editing) in both analog and digital technologies. Students are also expected to learn and practice the primary activities of both creative and physical production: to follow the producing process from idea through script to preparation and execution of a production plan, as well as finish and exhibit the resultant production.
- Students will demonstrate film literacy with a clear fluency regarding important classic and contemporary international cinema and its cultural and social contexts.
- Screenwriting students will demonstrate advanced skills in screenwriting and television writing, with attention to professional screenwriting standards.

Communication Studies
Two programs are offered in Communication Studies.

- The thesis program emphasizes the student’s development of research skills under faculty supervision (30 credit hours).
- The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credit hours).

Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees.

Thesis students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor or department chair. Non-thesis students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor or department chair. Communication Studies students must maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credit hours. No more than 6 credit hours will be allowed for advanced projects and directed research. Only one intersession course (3 credit hours) can be counted towards the degree. Electives credits must be chosen with prior approval of a Communication Studies advisor.

Masters Programs in Communication Studies

- M.A. in Communication Studies (p. 2027) with tracks in:
  - Communication Studies
  - Health Communications
  - Intercultural Communication
  - Organizational Communication

**COM 601. Theories of Communication. 3 Credit Hours.**
Comparison of theories dealing with the processes and effects of communication is discussed.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**COM 602. Methods of Communication Research. 3 Credit Hours.**
A comprehensive survey of communication research methods. Qualitative and quantitative approaches will be explained and practiced.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.
COM 603. Qualitative Research Methodologies. 3 Credit Hours.
Research methods and theories for participant-observation, phenomenology, symbolic interactionism, ethnomethodology, content analysis, and historical-critical interpretation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COM 604. Advanced Communication Research Methods and Statistics. 3 Credit Hours.
Provides an advanced examination of the problems and methods found in quantitative communication research.
Prerequisites: COM 601, COM 602.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 605. Theories and Methods for Mass Communication Research. 3 Credit Hours.
This course will introduce you to the theoretical concepts and research methodologies that apply to work in, and study of, journalism and mass communication. The curriculum stresses critical thinking skills necessary to evaluate the credibility of research findings offered by various organizations, including government, business and academia.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COM 606. Visual and Narrative Theories. 3 Credit Hours.
This course surveys theories of film, visual communication, design, game and interactive theory, critical analysis, cultural studies.
Prerequisite: COM 601 and Requisite: Doctoral Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

COM 607. Survey of Media Production. 3 Credit Hours.
This course gives students an overview on how to produce compelling media stories. Students will learn key concepts and design principles used in modern media production. Students will develop a website and a short film using learned key concepts in creating and effective multimedia experience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 608. Designing and Producing Messages. 3 Credit Hours.
Drawing on message design theories from areas such as persuasion and discourse studies and using creative and secondary research skills, students design and implement a production such as a public service announcement, short documentary, microsite, game prototype, or data visualization project.
Prerequisite: COM 601 and 602 and 607.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COM 609. Special Topics in Communication. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 610. Doctoral Colloquium. 1-3 Credit Hours.
This course will introduce students to the nature and scope of doctoral study. The topics of this course include different aspects of engaging productively with the doctoral program, such as developing a research program, publication, grant writing, and job search dynamics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

COM 612. Pedagogy. 3 Credit Hours.
This course focuses on the traditions as well as the recent advances in pedagogy, including its historical, theoretical and practical applications with the aim of preparing students to teach at the University level.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
COM 615. Social Effects of Mass Communication. 3 Credit Hours.
Roles, functions, and consequences of mass communication in American society.
Prerequisite: COM 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 620. Structured Research and Practice in SoC Consultancy. 1-3 Credit Hours.
Students engage in programmatic research and applied practice through structured participation at the SoC Consultancy.
Requisite: Graduate and Min Cumulative 3.0 GPA.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

COM 672. Seminar in Persuasive Communication. 3 Credit Hours.
This course is designed to provide students with a basic understanding of the role of communication in the persuasion process. This will be achieved by exploring historical and contemporary theories of persuasion as well as examining research that has focused on persuasion.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 695. Directed Readings. 1-3 Credit Hours.
Students work independently with a professor, researching a topic in a selected area. Repeatable up to 6 credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 698. Independent Research. 3 Credit Hours.
An in-depth, hands-on course in which students conduct a research project using the specified research method. May include experimental design, advanced qualitative methods, content analysis, or survey methods. Repeatable up to 6 credits.
Prerequisites: COM 602, COM 603.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in COM 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
COS 616. Small Group Processes. 3 Credit Hours.
Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.
Components: LEC.
Grading: GRD.

COS 618. Seminar in Nonverbal Communication (NVC). 3 Credit Hours.
Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues and physical appearance is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 620. Gender Issues in Leadership. 3 Credit Hours.
This course utilizes case studies of innovative executives to analyze different leadership and communication styles between men and women.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 630. Conflict Management. 3 Credit Hours.
This course provides an understanding of conflict dynamics and strategies for constructive conflict management.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 645. Intercultural Communication: International Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 646. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 651. Survey of Health Communication. 3 Credit Hours.
This course is intended to provide a graduate-level introduction to the study of health communication. Accordingly, it covers a wide range of topic areas informed by an equally diverse range of theories, research paradigms, and applied foci.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 652. Culture and Organizations. 3 Credit Hours.
This course explores the effects of cultural diversity on communication in organizations. Diffusion of innovations, prejudice, discrimination, and equality are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 653. Organizations, Communication, and Health. 3 Credit Hours.
This class focuses on the organizational, interpersonal and intercultural dimensions of communication in health care settings. It draws on material from the communication discipline as well as work from medical sociology, anthropology, medicine, humanities and discourse studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 654. Risk Communication. 3 Credit Hours.
This course will offer a foundational understanding of the psychological and sociological bases of risk perceptions that are necessary for effective risk communication.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 655. Health Communication Interventions. 3 Credit Hours.
This course will focus on the planning, development, and assessment of health communication intervention messages and materials.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 660. The Executive Communicator. 3 Credit Hours.
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 674. Seminar in Interpersonal Communication. 3 Credit Hours.
This course focuses on theoretical approaches to interpersonal communication. Emphasis is placed on current research including fundamentals of relationships, developmental issues, interaction management, and interpersonal competence.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 680. Organizational Training and Development. 3 Credit Hours.
This course is designed to provide an examination of internal organizational communication in order to understand appropriate strategies for training and development of supervisors and employees.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 682. Seminar in Organizational Communication. 3 Credit Hours.
This course explores theoretical perspectives and the impact of communication in organizations. Critical analysis includes management styles, decision-making, group interaction, conflict resolution, and diffusion of innovations.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 690. Communication Studies Practicum. 1-3 Credit Hours.
Prescribed graduate study and supervised work with practitioners in organizations.
Prerequisites: COM 601 and COM 602 and COM 603.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 691. Advanced Special Topics in Communication Studies. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 699. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

M.A. in Communication Studies

Overview
The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, and interpersonal, intercultural,
organizational, and health communication together with research methods applicable to these areas. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

Students select a track from four options: Communication Studies, Health Communication, Intercultural Communication, and Organizational Communication.

**Communication Studies Track**
The Communication Studies track is a general track that allows students greater flexibility to design their course of study.

**Health Communication Track**
Health Communication is an emerging specialty in the field of communication. This graduate program is designed to provide a broad introduction to human communication in a health-care context. Career opportunities in this area include public health leaders, practitioners, and researchers who design, evaluate, and disseminate health communication messages for private and governmental organizations, advertising, public relations and marketing agencies, and journalists. Students will explore the roles of patients and caregivers, social and cultural issues, communication in health organizations, and the role of mass media.

**Intercultural Communication Track**
The Intercultural Communication Track is designed to provide students with an understanding of the way communication functions in intercultural settings, how culture affects the communication process, and the reciprocal effects of intercultural perceptions on policy in the history of Eastern-Western relations. Career opportunities in this field include corporate diversity trainer, communication director, human resource manager, international service representative, negotiator, and foreign correspondent with government and business organizations.

**Organizational Communication Track**
Organizational Communication is designed to provide students with a comprehensive and advanced understanding of communication in the organizational environment. Courses are designed to extend oral, written, and critical thinking skills through application of concepts using practical challenges in organizations. Students have the opportunity to explore essential areas of organizational communication, presentational skills, leadership styles, interpersonal and small group interaction, decision making, persuasion, conflict management, and diversity training.

**Admission Requirements**
The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts degree program in the School of Communication.

- A baccalaureate degree from an accredited institution
- The School's official application
- An $85.00 non-refundable application fee
- Three letters of recommendation
- 500-word typed statement of academic and professional goals
- Official transcripts of all college work, both undergraduate and graduate.
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university. Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants.
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

Goals

The goals of the Master of Arts Program in Communication Studies are to provide students with a rigorous graduate level academic experience, comprehensive understanding of theoretical communication concepts, and development of advanced oral, written, critical thinking, and research skills.

Student Learning Outcomes

- Graduate students will demonstrate application of appropriate communication and professional skills.
- Graduate students will demonstrate a comprehensive understanding of communication concepts and critical analysis of research.
- Graduate students will demonstrate appropriate writing and presentational skills.

Doctor of Philosophy in Communication

The doctoral program is designed to provide students with the requisite foundation in theory as well as research skills for using communication to make positive change at the societal, community, and individual levels. The program allows learning across content and creative areas, methodological orientations, and platforms of expression for engaged scholarship and immersive experience, globally and locally. You will engage with communication theory, research, and practice using advocacy and storytelling, with particular attention to new and social media for social and behavioral change. This will be your niche: conducting research, engaging in immersive experience, and translating these into evaluation-based practice for the well being of community, society and the world.

The program includes field research experience and the teaching, writing, and media skills necessary for a career in higher education, research institutions, non-profits, government organizations, media, business, and industry. You may choose from health, environmental, international, intercultural and organizational communication as well as from journalism studies and media development to create an appropriate combination for your career goals.

Curriculum Requirements

For the doctoral program, students must complete 57 credit hours of course work beyond the master’s degree; 12 of the 57 credit hours must be dissertation credit hours. Doctoral students cannot take intersession courses.

## Mission

The mission of the Doctor of Philosophy program in Communication is to provide students with a rigorous advanced education and field experience in communication theory, concepts and practice as well as in qualitative and quantitative research methods.

## Goals

The expected outcome from this education and experience is that students and graduates will be able to conduct original research, translate it into practice, and teach effectively.

## Student Learning Outcomes

- Students will demonstrate comprehensive knowledge of communication theory, research methods, and their areas of specialization.
- Students will demonstrate the ability to propose and implement original research and present and defend the research in academic and professional contexts. They will demonstrate effective written communication, oral communication, and critical thinking skills.
- Students will demonstrate the ability to teach undergraduate communication courses independently.

## Interactive Media

The Interactive Media Department offers a complete curricular experience in critical understanding and effective design and development of interactive products.

The M.F.A. in Interactive Media program requires that students complete a minimum of 45 credit hours at the graduate level with an average of "B" and no grade lower than a "C-". Prior written approval is required from the chair of the CIM department for transfer of credit hours, for course substitutions, as well as for taking a course at another university.

Interactive Media students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing of a 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation. Students must complete all degree requirements within 6 years.

M.F.A. in Interactive Media (p. 2037)

**CIM 601. Prototyping Techniques. 3 Credit Hours.**

This course covers accepted prototyping techniques introducing students to a wide variety of approaches for different kinds of user experience design problems and platforms. Students will learn to develop preliminary iteration of a solution to a design problem in order to communicate the essence of their idea without committing to a costly implementation.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.
CIM 602. Designing Innovation. 3 Credit Hours.
In this course you will be introduced to and will apply human centered design techniques and systems thinking to achieve goal-directed design of interactive systems. Students will work in small teams to iteratively generate and refine design concepts and to thoroughly document their design process.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CIM 603. Intro to Creative Coding. 3 Credit Hours.
This course will introduce students to the building blocks of creative coding within the visual and media environment. Students will learn to create dynamic images, type and interfaces, that can translate into web, mobile and print forms. Students will learn programming fundamentals that translate in virtually all programming platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CIM 604. Advanced Systems: Designing Playful Experiences. 3 Credit Hours.
Students will analyze and design games to gain vocabulary and tools to design playful interactive systems. Students will be exposed to a range of popular game prototyping technologies and will create several mini-projects as well as one final game project created using the platform of their choice.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

CIM 605. Technology Trends. 3 Credit Hours.
This is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 611. Human Computer Interaction. 3 Credit Hours.
This course will teach students about the importance human computer interaction (HCI) in the design, implementation, and evaluation of interactive computing systems for human use. The course will provide both practical application and theoretical knowledge of HCI, with practical concerns balanced by discussion of relevant theory from the literature of computer science, human factors, and interaction design.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CIM 612. Mobile Application Development. 3 Credit Hours.
This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing. It covers various approaches to the development of mobile software applications using current development environments, frameworks, and programming paradigms. This course focuses on hands-on learning through which students practice with programming assignments and demonstrate the apps through virtual simulators and physical mobile devices.
Prerequisite: CIM 603.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 615. Interactive Media Business Essentials. 3 Credit Hours.
This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 618. Internet and Media Activism. 3 Credit Hours.
In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CIM 622. Human Centered Design. 3 Credit Hours.
This course takes a comprehensive look at human limitations and abilities and how they are key to interaction design and a great user experience. Students will learn about human behavior and how to apply UX gridlines to the design of digital interfaces. Students will also learn how to produce design deliverables for real world practice.
Prerequisite: CIM 601.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 623. Building Virtual Worlds. 3 Credit Hours.
The purpose of this course is to explore the construction of virtual environments. Students will learn the principles of constructing interactive 3D environments using a game engine. Students will be responsible for creating a world that can be interacted with on various platforms, including virtual and mixed reality.
Prerequisite: CIM 603 Or CSC 120 Or ECE 118.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CIM 631. Collaborative Innovation Laboratory. 3 Credit Hours.
In this collaboration studio course, students will form small teams and undertake real-world projects with a partnering organization. Students will be provided a design brief outlining project objectives identified by the partnering organization. Over the course of the semester, students will research, brainstorm, design, and test innovative interactive solutions for this core objective, including proposing ideas and presenting prototypes to the partnering organization. Projects that satisfy the partner's needs may result in on-going work for full implementation and exposure for students' work.
Prerequisite: CIM 601 and CIM 203 and CIM 602 and CIM 603.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

CIM 633. Augmented Reality. 3 Credit Hours.
This course will provide students the ability to design and develop augmented reality apps. It covers various approaches to designing and programming augmented reality apps using the latest technologies and devices. Students will be given hands-on programming assignments and learn about the key advantages in each of the approaches via in-class discussions.
Prerequisite: CIM 603 Or CSC 120 Or ECE 118.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CIM 643. Front End Fundamentals. 3 Credit Hours.
This course focuses on the job-ready skills and production workflow techniques in highest demand for front end web developers. Students will learn, practice and demonstrate the skills and principles needed to make effective use of these technologies.
Prerequisite: CIM 601.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 644. Designing Games for Impact. 3 Credit Hours.
In this course students will explore the use of games as a communication tool for social good and will study, play, and also begin designing game-based interventions with the goal of promoting positive social change in areas such as environment, health, or social justice. Students will play existing social impact and other relevant games and will analyze them in order to conceptualize and design their own game concepts, either individually or in small teams. Students should come ready to actively participate in this seminar-size class.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

CIM 653. Dynamic Data. 3 Credit Hours.
This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.
Prerequisite: CIM 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CIM 658. 360° Immersive Filmmaking and Storytelling. 3 Credit Hours.
A hands-on course dedicated to design and produce VR/360° immersive video. Through a wide selection of materials, including videos, 360° films, articles, and presentations, students will develop a strong foundation on storytelling techniques, technologies (cameras, microphones, VR headsets, software), and best practices used across immersive media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 663. Design with AI. 3 Credit Hours.
This course will provide students with the ability to understand the purpose, strengths and limitations of artificial intelligence (AI) technologies in order to design smart applications for everyday use. It covers topics including state-of-the-art AI technologies and the design principles for developing applications with such technologies. Issues such as ethics, bias, accountability, and privacy in these applications will also be discussed.
Prerequisite: CIM 603.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 664. Video Game Spectatorship and Esports. 3 Credit Hours.
This course covers the historical and contemporary practices of game spectatorship, journalism, and Esports. It teaches the industry and best practices used in sharing video games through traditional media, streaming services, and Esports.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 669. Internship in Interactive Media. 1-3 Credit Hours.
The internship is designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid.
Requisite: Sophomore Status, Cumulative GPA 2.5.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CIM 674. 2D Character Design. 3 Credit Hours.
This is a comprehensive course devoted to the development of skills in creating characters for 2D animation and games. Students will develop an understanding of how shape language relates to the characters personality through the creation of weekly exercises. The course will be delivered in the form of studio projects, individual and class critiques, lectures, discussions, workshops and readings.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CIM 679. Practicum in Interactive Media. 1-3 Credit Hours.
Students will engage in the applied practice of Interactive Media to enhance classroom learning and provide opportunities to gain practical experience. The practicum course offers supervised activity in which interactive graduate students advance their skills and acquire professional experience by working on research and creative projects for various organizations.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CIM 682. UX Research. 3 Credit Hours.
The course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CIM 683. Physical Computing. 3 Credit Hours.
This course explores how to build a bridge between the physical and digital world. Students will learn to develop software and hardware to sense and respond to physical interaction. Through various projects, students will learn how to program sensors and other electronic components to convert the human senses into creative inputs and outputs, such as lights, sounds, and movement. Students will learn the ideation and design process through challenges presented in their assignments and personal projects. In this course students will also learn how to design for and use various digital fabrication tools, such as 3D printing, laser and paper cutting, and CNC milling. Students will have access to work hands on with these fabrication tools to enhance and build their prototypes.
Prerequisite: CIM 603.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CIM 689. Special Topics in Interactive Media. 3 Credit Hours.
This course is designed to keep up with the fast-changing world of interactive media allowing for contemporary classes to be periodically added to the curriculum. Special topics classes will be added to the Interactive Media curriculum as electives.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 694. Game Development Studio. 3 Credit Hours.
Game Dev Studio is a project-based course devoted to developing a game. In groups, students will start with a concept and create prototypes that will be refined through multiple iterations and playtests. Your final game will either be a well-polished 2D or 3D digital game.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

CIM 699. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study, involving a project, paper or a program of research designed in consultation with a supervising faculty member. No more than six credits may be counted toward the degree.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CIM 701. Capstone. 3 Credit Hours.
The capstone seminar is designed to demonstrate a student’s accumulated training in Interactive Media in a single original project of their choice, subject to the instructor’s approval and under the additional supervision of a faculty mentor.
Prerequisite: CIM 602 and CIM 603 and CIM 601 and CIM 615 and CIM 631.
Components: STU.
Grading: GRD.
Typically Offered: Spring.

M.F.A. in Interactive Media

Overview
The University of Miami Interactive Media Master of Fine Arts prepares students to innovate through understanding and experiencing the business, social, academic, and cultural contexts of emerging technologies.

The program prepares a new generation of innovators and leaders in the field of interaction design. Its mission is to explore the use of technology, design, human behavior, and their impact on communication. The multidisciplinary curriculum brings together students from different backgrounds to learn about game design, web design, mobile, data visualization, interaction design, and other emerging technologies. The program trains students to research, prototype, design, and build projects in business, social, academic, and cultural contexts.

Admission Requirements
The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts degree program in the School of Communication.

• A baccalaureate degree from an accredited institution
• The School’s official application
• An $85.00 non-refundable application fee
• Three letters of recommendation
• 500-word typed statement of academic and professional goals
• Official transcripts of all college work, both undergraduate and graduate.
• Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
• Note: All transcripts must be the original document, forwarded directly from the university. Xerox copies, true copies, notarized copies and other types of copies are not acceptable.

• Official TOEFL or IELTS scores
  • Note: Only for international applicants.

• Copy of current passport
  • Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.

• Official Graduate Record Examination (GRE) scores or portfolio.
  • Note: Students must submit a portfolio. Hard-copy or USB portfolios may also be mailed to the address below. Please note that we do not return portfolios or USB sticks. Students may choose to submit their GRE score if they don’t have a portfolio. Submitting a GRE instead of a portfolio will not affect their chances of getting accepted. Students may also submit both their GRE and portfolio. Our institution code for the GRE is #5815 and the department code is #4599.

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

Electives

Students will be able to take 12 elective credits (four classes) of their choice under guidance of their advisor.

Total Credit Hours

1. Students must complete a minimum of 45 credit hours at the graduate level with an average of B and no grade lower than a C-. Prior written approval is required from both the chair of the interactive media program and the director of graduate studies for transfer credit hours, for course substitutions as well as for taking a course at another university.

2. Students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation.

3. Students must complete all master’s degree requirements within 6 years.

4. Specializations are recommended, but students have the flexibility to design their own specialization.

**Mission**

The MFA in Interactive Media’s mission is to provide high quality graduate education for current and prospective professionals in the fields of interaction design, data visualization, and game design. Program activities are designed to explore the strategic role that interactive technologies play in communication and how they are shaping today’s business, culture, and society.
Goals
The program strives to achieve local, state, and national prominence through a contemporary hands-on curriculum, practical experience with outside organizations, and applied research designed to develop and enhance creative competence and design thinking skills.

Student Learning Outcomes
- Students will demonstrate the ability to design a system, component, or process to meet desired needs within system constraints.
- Students will be able to develop a product following a human-centered design that incorporates user research, innovation, design, and implementation.

J.D./M.A. in School of Communication
This program allows students to earn a J.D. and an M.A. in Communication in 3 to 3½ years. The three School of Communication programs participating in the joint J.D./M.A. program are Communication Studies, Journalism, and Public Relations. This joint degree program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

In the J.D. program, students will complete 82 credit hours in the School of Law. Additionally, 6 credit hours from the School of Communication program will be applied to their Law School transcript, for a total of 88 required J.D. credit hours. In the M.A. program, students will complete 27 credit hours in the School of Communication. Additionally, 9 law school credit hours will be applied toward their master’s degree, for a total of 36 required M.A. credit hours. As defined above, 15 credit hours will be counted toward both degrees: 6 credit hours from the School of Law and 9 credit hours from the School of Communication. During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take courses in the School of Communication beginning in the fall of their 2L year. Students must complete all J.D. requirements and all M.A. requirements as defined by their programs. Participants in the joint J.D./M.A. program are not required to complete the M.A. capstone project.

The thesis-track is not open to students in the J.D./M.A. joint program without specific approval of the School of Communication. Students may take summer law courses, which may reduce the length of the joint degree program by up to one semester. Students may take no more than 16 credit hours each semester, excluding summer sessions. 17 credit hours per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Law School Requirements
9 Law School credit hours should come from the following courses:
- Administrative Law
- Communications law
- Constitutional Law II
- Copyright Law
- First amendment Law
- Intellectual Property Law
- Internet Law
- Mass Media Law

The Law School will accept 6 credit hours from School of Communication courses: (the courses selected will depend on the specific program, e.g., Communication Studies, Journalism, or Public Relations, though following consultation with, and approval by, a faculty advisor, substitutions may be allowed). Examples include:

J.D./M.A. in Communication Studies

Joint J.D./M.A. in Communication Studies

This joint degree program allows students to earn a J.D. and an M.A. in Communication Studies in 3 to 3½ years. Student complete a total of 109 credit hours for the joint degree. This program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

The MA in Communication Studies has four tracks:

1. Communication Studies
2. Health Communication
3. Intercultural Communication
4. Organizational Communication

J.D./M.A. in Journalism

J.D./M.A. in Journalism

This joint degree program allows students to earn a J.D. and an M.A. in Journalism in 3 to 3½ years. Student complete a total of 109 credit hours for the joint degree. The program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

The program in journalism has 15 credits of required courses and 12 credits of elective courses (plus 9 credits that will be transferred from the School of Law). Law students with particular areas of interest may consult with a faculty advisor in Journalism to request course substitutions. As journalism evolves, the core and list of electives will evolve as well.
Admission Requirements

Requirements for admission to the graduate studies for the Juris Doctor/Master of Arts in Communication joint degree are:

- Students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student's law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the J.D. program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.
- LSAT score may be submitted in lieu of the GRE score.

General notes:

- Students will be admitted to the Law School J.D. program and the School of Communication (SoC) master's program separately.
- Students in this joint degree program must commence law study first.
- Students who have already commenced work on the SoC M.A. are not eligible for the joint program.

J.D./M.S. in School of Communication

This joint degree program allow students to earn a J.D. and an M.S. in Media Management in 3 to 31/2 years. It will allow 6 J.D. credit hours to be applied to the M.S. degree and 6 M.S. credit hours to be applied to the J.D. degree, saving the student 12 credit hours between the two programs.

This program is designed for J.D. students who have an interest in the regulatory and business side of the media industry. It includes a set of essential business courses (e.g., financial reporting and analysis, corporate strategy and organization, and foundations of marketing management) as well as an array of industry-specific courses (e.g. content strategy, audience research and analysis, and current issues in media management).

In the J.D. program, students will complete 82 credit hours in the School of Law. Additionally, 6 credit hours from the Media Management program will be applied to their Law School transcript, for a total of 88 required J.D. credit hours. In the M.S. program, students will complete 26 credit hours in the Miami Herbert Business School and the Department of Journalism and Media Management. Additionally, 6 Law School credit hours will be applied toward their master’s degree in Media Management, for a total of 32 required M.S. credit hours. As stated above, 12 credit hours will be counted toward both degree: 6 credit hours from the School of Law and 6 credit hours from the Department of Journalism and Media Management.

During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take course in the Miami Herbert Business School and the Department of Journalism and Media Management beginning in the fall of their second year of Law School. Students must complete all J.D. requirements and all M.S. requirements as defined by their programs. Students may take summer law courses, which may reduce the length of the joint degree program by up to one semester. Students may not take more than 16 credit hours each semester, excluding summer sessions. Seventeen credit hours per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.
• J.D./M.S. in Media Management Joint Degree (p. 2045)

**J.D./M.S. in Media Management**

This program is designed for J.D. students who have an interest in the regulatory and business side of the media industry. The program includes a set of essential business courses (e.g., financial reporting and analysis, corporate strategy and organization, and foundations of marketing management) as well as an array of industry-specific courses (e.g., content strategy, audience research and analysis, and issues in media management).

Required courses in the M.S. program are held on Saturdays and weekday evenings offering flexibility to the program’s students. No prior business or media management experience is required.

**Admissions Process:**

• Students will be admitted to the Law School J.D. program and the Media Management master’s program separately. Typically students will begin in the Law School and then start the master’s program in their second year of Law School. However, it is possible for students in the Media Management program to apply to the Law School, be accepted, and begin the joint degree program/first year of the J.D. program the following year. (M.S. students need to save 6 credits to be completed after they begin their J.D. program.)

• Applications to the M.S. program may be submitted between December 1st and May 15th for a fall start. The GRE or GMAT will not be required; the student’s LSAT scores will be used instead. Once a student applies, the School of Communication will request the student's Law School application from the Law School.

Journalism and Media Management

Journalism (M.A.)

Journalism is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today’s media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts 18 months. No prior training or experience in journalism is required.

Media Management (M.S.)

This 32-credit interdisciplinary graduate program is designed for students who seek new or advanced opportunities in the various and expanding areas of the media industry, such as content distribution, news and entertainment programming, research, and analytics. Students complete courses in the Business School to learn or strengthen their knowledge about business fundamentals, including managerial strategy, economics, accounting, and marketing. At the same time, students take courses in the Department of Journalism and Media Management to apply business principles to media situations and evaluate critically how technological and regulatory trends, changing business models, emergent content applications, and new audience measurement techniques influence decision-making in media operations. Students can also customize their coursework by selecting electives in the School of Communication that best match their personal and career interests.

Students can study full time or part time. The program begins every fall and lasts one year for full-time students or two years for part-time students. No prior business or media management experience or education is required.

Masters Program in Journalism and Media Management

- M.A. in Journalism (p. 2054)
- M.S. in Media Management (p. 2057)

JMM 601. Editorial Interpretation of Contemporary Events. 3 Credit Hours.
Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 605. News Technologies. 3 Credit Hours.
This course emphasizes how television, digital, and multimedia technologies contribute to the storytelling process. Understanding of production theories and news processes will be gained through hands on work with television and multimedia projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 606. Multimedia Design. 3 Credit Hours.
This is a project-based course in multimedia design, with emphasis on visual concepts and graphics development. Students will be learning about the various software packages to design and integrate interaction into their projects. Topics covered include preparing existing content for multimedia journalism, animation, layout for interactive media, typography, photography and usability.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 607. Broadcast Journalism. 3 Credit Hours.
Advanced instruction in techniques of news writing and field reporting, including conducting research for stories, preparing complete field packages for newscasts, filing live remotes, and conducting interviews.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
JMM 608. Long-Form Public Affairs Programming. 3 Credit Hours.
Development and production of longer form news, information magazine, and documentary style programming.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

JMM 609. Internship in Journalism and Media Management. 1-3 Credit Hours.
Prescribed study and supervised work with professional in print, broadcast, online, and other media organizations.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 610. Comparative Media Systems. 3 Credit Hours.
This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 611. Newswriting and Reporting Seminar. 3 Credit Hours.
Development of newswriting and reporting skills for news media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 612. History of Journalism Seminar. 3 Credit Hours.
The development and impact of journalism in America traced through industry leaders and events.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 613. Computer-Assisted Reporting. 3 Credit Hours.
Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 614. Law and Ethics in Journalism and Media Management. 3 Credit Hours.
This course focuses on two critically important areas of the law for both aspiring news media professionals and those seeking management opportunities. Principles of free speech, deeply rooted in the First Amendment to the U.S. Constitution, delve into such topics as defamation, privacy, access to information, obscenity, and intellectual property. The course also introduces students to the fundamentals of business law as it pertains to the media industry with an emphasis on employment, workplace management, and business contracts. Ethical issues are addressed throughout the course.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 615. Writing and Reporting Across Platforms. 3 Credit Hours.
An introduction to professional operating practices in multimedia journalism with emphasis on news writing and news production skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 616. Evolution and Impact of Television Content: The American Sitcom. 3 Credit Hours.
The seminar will examine how social, economic and political factors impacted the development and evolution of the content of sitcoms, as well as the impact such content had on American society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 617. Television News Reporting. 3 Credit Hours.
Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
JMM 618. International Journalism. 3 Credit Hours.
News gathering, transmission, and distribution outside the United States, with emphasis on Latin America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 619. Interactive Storytelling. 3 Credit Hours.
Digitization allows us to merge several forms of media that were not connected in the past. This course is intended as an exploration of how storytelling is re-inventing itself utilizing the new digital communication tools available to us today. This course will cover linear and non-linear storytelling techniques and production processes.
Prerequisites: JMM 628 and JMM 622 and JMM 630 and CIM 690.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 620. Reporting and the Internet. 3 Credit Hours.
Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 621. Global Media. 3 Credit Hours.
An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 622. Introduction to Infographics and Data Visualization. 3 Credit Hours.
This course is an introduction to the visual display of information with a special focus on the encoding of data by means of graphs, charts, maps, and diagrams.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

JMM 623. Sports Reporting. 3 Credit Hours.
A hands-on sports journalism course that will develop students’ skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for print, online, social media and media relations. Students will go off-campus to cover professional and college sporting events live on deadline, hear from guest speakers across the industry, and cover on-campus UM sports beats.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 624. Seminar in Editing and Design for Print and Websites. 3 Credit Hours.
Theory and practice in news media copy editing, layout, and design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 625. Advanced Newsgathering and Writing Seminar. 3 Credit Hours.
Refining news writing and reporting skills for the media.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 626. Specialized Writing and Reporting Seminar. 3 Credit Hours.
Techniques in writing and reporting about specialized and complex subjects for news media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 627. Television News Producing. 3 Credit Hours.
Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.
Components: LAB.
Grading: GRD.
JMM 628. Seminar in Visual Storytelling. 3 Credit Hours.
An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

JMM 629. Advanced Infographics and Data Visualization. 3 Credit Hours.
This course is a seminar designed to introduce interactive data visualization concepts in a web environment. Students will be introduced to code libraries which assist in this task, best practices for interactivity and data visualization. The course will also briefly cover working with data (i.e., how to find sources, cleaning and preparing data for visualizations, etc.).
Prerequisite: JMM 622 and JMM 630.
Components: LAB.
Grading: GRD.

JMM 630. Programming for Interactivity. 3 Credit Hours.
This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 631. Data Journalism. 3 Credit Hours.
This course teaches how to extract meaning from data for more powerful reporting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 632. Current Issues in Media Management. 3 Credit Hours.
This course addresses how recent developments in media technology, regulation, content, and measurement have influenced the structure and economics of the media industry. Given the rapid evolution of the media business across platforms, topics are likely to vary from year to year. Media cases are used to discuss appropriate strategies and decision-making and help students think as media managers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 633. Social Media. 3 Credit Hours.
This course looks at social media from an organizational perspective: best practices for news and media organizations; building digital communities; monitoring/listening to user-generated content; and branding and marketing through social media.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 634. Media Distribution for Film and Television. 3 Credit Hours.
This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 635. The Broadcasting, Cable, and Electronic Media Industry. 3 Credit Hours.
Examination of broadcasting, cable, and related electronic media from a business perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 636. Content Strategy in the Media Industry. 3 Credit Hours.
What distinguishes the media industry from other sectors is the primacy of content. This course examines the practices involved in developing, distributing, scheduling, and monetizing media content, especially in the video space. Programming strategies are discussed across traditional and emergent media platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
JMM 637. The Business of Modern Journalism. 3 Credit Hours.
The course examines the evolving business models for legacy news organizations as well as discusses entrepreneurial opportunities for news content in new media and digital platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 638. Infographics and Data Visualization Studio. 3 Credit Hours.
A studio course in which the student will design a large visualization project that meets the standards of quality for professional publication. The student will be required to learn new technologies and to apply tools learned in previous classes.
Prerequisites: JMM 622 and JMM 629 or JMM 650 or JMM 631.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

JMM 639. Travel Journalism. 3 Credit Hours.
This course is designed to teach travel journalism, which includes travel storytelling through writing, photography and videography.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 640. Web Design. 3 Credit Hours.
This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 641. Advanced Audio Video Narratives. 3 Credit Hours.
This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.
Prerequisite: JMM 628.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 642. Audience Research and Analysis. 3 Credit Hours.
This course covers the primary research methods and metrics used to measure media audiences. Discussion of data collection procedures includes survey research, experimental design, content analysis, focus groups, and the growing use of big data analysis. Media metrics center on broadcast ratings and online exposure measurement. Applications or small-scale projects are conducted for practice.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 643. Media Industry Trends. 3 Credit Hours.
This course examines the organizational and economic issues that influence today's mass media environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 644. Feature Writing. 3 Credit Hours.
Analyzing and writing feature articles for magazines, newspapers, and other new media.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 646. Travel Writing. 3 Credit Hours.
A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
JMM 647. Magazine Planning. 3 Credit Hours.
This course is a magazine planning class where students will create a 32-page print/digital cross-platform niche publication from scratch. It will be based on a business model creating a design and content for a specific audience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 648. Sports and the Media. 3 Credit Hours.
This course examines the relationship between sports and the media, including stakeholders and the financial component of sports and media, sports production and content, and sports media audiences. The course provides an understanding of the social and economic relationships between sports and media and the effects those relationships have on sports consumers.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 649. Team Multimedia Project. 1-3 Credit Hours.
Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

JMM 650. 3D Design and Graphics. 3 Credit Hours.
This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 651. Advanced Programming. 3 Credit Hours.
This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zend and Symfony will also be covered in the class.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

JMM 653. Practicum in Producing News. 1-3 Credit Hours.
The mechanics of planning and executing professional style newscasts and/or long-form television news program.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 654. Writing for Publication. 1-3 Credit Hours.
This course focuses on writing principles and practices of the news media. It is designed to give the student exposure and practical experience in writing for the print media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 655. Media Technology. 3 Credit Hours.
This course examines the deployment, use, and impact of communication technologies in various media contexts from an economic, regulatory, and social perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
M.A. in Journalism

Overview
The Journalism M.A. program is designed to prepare students for professional participation in a number of digital and multimedia news environments, including television, online, mobile, magazine, and newspaper. Coursework stresses journalistic values, critical thinking, and storytelling, combined with the digital and technical skills to create content in the context of today's dynamic and evolving media landscape. In consultation with faculty advisors, students are strongly encouraged to develop areas of special interest, and are required to complete an individually produced, in-depth Qualifying Project.

Journalism M.A. students must complete a minimum of 36 credit hours at the graduate level with the approval of the Chair of the Department of Journalism and Media Management or Director of the Graduate Program in Journalism. Of the 36 credit hours, all must be at or above the 600 level. Students with strong prior experience in a particular area may request a written waiver of a required course from the department chair, upon the demonstration of sufficient expertise in that subject. The program begins in the fall semester with a mandatory bootcamp one week before classes.

JMM 657. Media Entrepreneurship. 3 Credit Hours.
Students generate comprehensive business plans for a proposed media enterprise. Organizational, financial, and marketing aspects of starting a media business are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 659. Web and Media Analytics. 3 Credit Hours.
This course covers the computations, interpretations, and applications of metrics used to measure media audiences across electronic, print, and online platforms.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

JMM 663. Applied Data Analytics for Journalism and Media Management. 3 Credit Hours.
This course introduces students to the procedures used for extracting, processing, and analyzing datasets on web and social media sites.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

JMM 692. Special Topics in Journalism and Media Management. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 695. Special Topics in Journalism. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

JMM 696. Special Topics in Visual Journalism. 1-6 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

JMM 699. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

JMM 815. Multimedia Project. 1-6 Credit Hours.
Students, in consultation with program faculty, will complete a final project that reflects in-depth knowledge and analysis of a subject and professional competence in multimedia storytelling. Course may be repeated to a maximum of six credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
begin and the program typically lasts 18 months, unless the student is attending on a part-time basis. Prior training or experience in journalism is preferred, but not required or necessary. As journalism evolves, the core and list of electives will evolve as well.

**Admission Requirements**

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts degree program in the School of Communication.

- A baccalaureate degree from an accredited institution
- The School's official application
- An $85.00 non-refundable application fee
- Three letters of recommendation
- 500-word typed statement of academic and professional goals
- Official transcripts of all college work, both undergraduate and graduate.
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university. Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants.
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores or a portfolio

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

**Mission**

The MA program in Journalism program at the University of Miami strives to prepare its students to conduct journalistic research and to turn that information into dynamic content—written, audio, video, digital—for presentation to global media audiences.

**Goals**

Upon graduation, students are prepared to work in a variety of news and information settings and are equipped to gather and analyze information, critically evaluate it, and write and produce material for various media formats, all within the guiding ethical and legal principles for journalism.

**Student Learning Outcomes**

- Students will demonstrate the ability to acquire, critically analyze, and present journalistic messages in an appropriate format using sound reasoning and journalistic principles.
- Students will demonstrate proficiency in the use of contemporary equipment, technologies, and workflows, as well as key theoretical concepts of audio/visual/interactive storytelling.
• Students will demonstrate the ability to articulate and practice the values, ethics, laws, social responsibilities, and theoretical and methodological foundations of the profession.

M.S. in Media Management

Overview

Created in partnership with the Miami Business School, the Master of Science in Media Management is designed to prepare students for careers on the business side of the industry, such as content distribution and audience research. Students will acquire a solid background to understand and operate in the different segments of the rapidly changing media industry by being exposed to both business principles and key aspects of media management, technology, economics, programming, distribution, measurement, and law. The program allows students to cultivate their own topical interests in required media management courses and electives.

Admission Requirements

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts, Master of Science, or Master of Fine Arts degree in the School of Communication:

• A baccalaureate degree from an accredited institution
• The School’s official application
• An $85.00 non-refundable application fee
• Three letters of recommendation
• 500-word typed statement of academic and professional goals
  • Note: for the Interactive Media M.F.A., please visit this web site (http://com.miami.edu/interactive-media-mfa/) for specific instructions about the statement.
• Official transcripts of all college work, both undergraduate and graduate
  • Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  • Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
• Official TOEFL or IELTS scores
  • Note: Only for international applicants.
• Copy of current passport
  • Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
• Official Graduate Record Examination (GRE) scores
  • Note: Required for M.A. applicants in Communication Studies and Public Relations.
  • Note: Journalism M.A. and Interactive Media M.F.A. applicants may send GRE scores or a portfolio.
  • Note: Media Management M.S. applicants may send the official Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores. Those applicants with at least three years of relevant professional media or business work experience (by the time they apply) may be eligible for a waiver. Eligibility for a waiver depends on the quality and type of professional experience and remains at the discretion of the Department of Journalism and Media Management Chairperson.
• Portfolio
  • Note: Required for Motion Pictures M.F.A. applicants.

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

### Mission

The M.S. program in Media Management will prepare students for careers on the business side of the media industry, such as operations, marketing, sales, and research. The program will cover both business principles and key aspects of media management, technology, economics, programming, distribution, research, and law as they pertain to the changing media environment. Students will gain strategic and analytical skills through media case studies and applications.

### Goals

Our graduates should be able to:

- Master business fundamentals;
- Understand the dynamics of the media ecosystem from technological, economic, and regulatory perspectives;
- Learn the role of content in the media ecosystem and its relationship to audience measurement;
- Develop problem-solving skills to address media industry issues and challenges through case studies and applications; and
- Acquire expertise in one or more areas that are consistent with their personal interests.

### Student Learning Outcomes

- Students will demonstrate knowledge of how technological change has influenced the economic transformation of the media ecosystem and the content delivery process across various platforms.
- Students will demonstrate the ability to analyze business plans and audiences using a variety of media industry metrics and research techniques.
- Students will demonstrate the ability to address technological, economic, financial, and legal challenges facing media companies and present cogent and effective solutions.

### Strategic Communication

#### Public Relations (M.A.)

The program offers two tracks. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36-credit, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.
Masters Programs in Strategic Communication

- M.A. in Public Relations (p. 2062)

STC 620. Public Relations Fundamentals. 3 Credit Hours.
A seminar to explore the theories and methodologies of public relations encompassing writing, principles, and campaigns. Students will explore public relations history and gain an understanding of how the various types of public relations (e.g., corporate, firm or agency, not-for-profit, governmental) operate within the larger business system.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

STC 621. Writing for Public Relations. 3 Credit Hours.
Principles and techniques for the development of strategic thinking, information-gathering, and writing public relations messages across traditional, digital, social and web-based media.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

STC 622. Design for Strategic Communication. 3 Credit Hours.
An introduction to design principles and tactics used in the creation of public relations messages and campaigns.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

STC 623. Crisis Communication and Management. 3 Credit Hours.
This course introduces the student to crisis communication and management from a strategies, theory-based approach steeped in case research from historical cases and business case studies.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 624. Media Relations. 3 Credit Hours.
Students in this course will get the inside scoop on how to communicate with reporters, will learn why different media outlets cover the same story in different ways, and how fake news is impacting the field of journalism.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 625. Cases in Public Relations Administration. 3 Credit Hours.
Course analyzes organizational principles, internal budgeting, and evaluation of public relations departments and counseling firms.
Prerequisite: STC 620. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 626. Sports, Publicity, and Promotions. 3 Credit Hours.
This course will provide a review, examination and practical application of sports communications, publicity and promotions in strategic communications.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 628. Public Relations Management. 3 Credit Hours.
Principles and practice of public relations management in a variety of contexts including agency, consultancy, corporate, and nonprofit.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
STC 629. Special Topics Seminar in Public Relations. 3 Credit Hours.
A seminar to identify and discuss the role of fundraising in the not-for-profit sector.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 632. Seminar in Public Relations and Political Campaigns. 3 Credit Hours.
A seminar to examine the role of public relations in American political campaigns.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 634. Non-Profit and Public Information Campaigns. 3 Credit Hours.
A public seminar that focuses on non-profit organizations and governmental institutions.
Prerequisites: STC 620, STC 621, STC 622.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 635. Advanced Research Methods for Public Relations. 3 Credit Hours.
This course will delve into the measures, mechanisms, and necessary considerations for measuring public relations effectiveness and evaluating the impact of public relations efforts.
Prerequisites: COM 601, STC 620, COM 602 or COM 603.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 636. Public Relations Campaigns. 3 Credit Hours.
Theory and principles, audience research, strategic planning, and targeted communication are applied in developing a campaign to influence attitudes and behavior on behalf of a real client. A written plan, professional presentation, and teamwork are emphasized. You are expected to meet a substantial challenge by applying and building on knowledge and skills already acquired. Of special concern is how you acquit yourself as a working communication professional that is committed to the goal and who effectively budgets time, plans, exhibits leadership, adheres to ethical and legal practice, and demonstrates a strong work ethic.
Prerequisite: COM 601, STC 620, STC 621 And STC 622.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

STC 644. Seminar in Public Relations Ethics. 3 Credit Hours.
To explore through readings, discussion, and research contemporary ethical issues in public relations.
Prerequisite: STC 620. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 650. Strategic Communication in Health Care. 3 Credit Hours.
This course provides a general introduction to the role of media and strategic communication in healthcare industry. A variety of topics are addressed from handling internal and external communication practice of health-related organizations to applying the principles of strategic communication to areas such as healthcare public relations and social marketing.
Prerequisite: STC 620. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 660. Corporate Communication and Public Relations. 3 Credit Hours.
This course focuses on exploring external and internal environment of organizations. Students will learn how organizations use public relations and other forms of communication to strategically and effectively communicate with external and internal publics in today’s complex business environment.
Prerequisites: COM 601, STC 620. Or Requisite: Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
STC 682. International Public Relations. 3 Credit Hours.
This course provides a general introduction to the study and practice of public relations within a global marketplace. A variety of topics are addressed including the role of culture in global public relations, differences in styles of public relations practices across international groups and the role organizations play in this process.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 690. Public Relations Practicum I. 1-3 Credit Hours.
Professional functions related to public relations requirements in a professional environment acting as an account executive.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

STC 691. Special Topics in Public Relations. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Prerequisite: STC 620.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

STC 699. Advanced Projects and Directed Research in Public Relations. 1-6 Credit Hours.
Individual study. May be repeated to a maximum of six credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

M.A. in Public Relations

Overview
The program offers two tracks. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36-credit, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Admission Requirements
The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts degree program in the School of Communication.

- A baccalaureate degree from an accredited institution
- The School's official application
- An $85.00 non-refundable application fee
- Three letters of recommendation
- 500-word typed statement of academic and professional goals
- Official transcripts of all college work, both undergraduate and graduate.
  - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers their degree, with English translation for all degrees earned.
  - Note: All transcripts must be the original document, forwarded directly from the university. Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
  - Note: Only for international applicants.
- Copy of current passport
  - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores is not required but encouraged.

Contact the Office of Graduate Studies, call 305-284-5236 or email (socgrad@miami.edu), for information.

Mission
The Public Relations Program mission is to prepare professional communicators who understand and can demonstrate the use of theory, research, planning and evaluation in effective public relations practice. We are committed to building students’ ability to apply ethical principles to decision-making and to perceive each communication and its intended audience holistically, based on an understanding of and appreciation for cultural and other differences. We also seek to nurture students’ analytic and creative skills with the goal of graduating insightful, resourceful citizens of a global society.

Student Learning Outcomes
• Students will demonstrate in-depth knowledge of the public relations discipline.
• Students will demonstrate that they can write effectively for public relations.
• Students will demonstrate the ability to communicate orally and present public relations strategies and plans clearly and effectively.

Education and Human Development
http://www.education.miami.edu

Departments
• Educational and Psychological Studies (EPS)
• Kinesiology and Sport Sciences (KIN)
• Teaching and Learning (TAL)

Degree Programs
Doctor of Philosophy (Ph.D.)
The Doctor of Philosophy degree is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences. Concentrations are offered in:
• Community Well-Being (EPS)
• Counseling Psychology (EPS)
• Exercise Physiology (KIN)
• Research, Measurement, and Evaluation (EPS)
• Teaching and Learning (TAL)

Doctor of Education (Ed.D.)
The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations. Concentrations are offered in:
Specialist in Education (Ed.S.)
The Specialist in Education degree is an advanced terminal, practice-oriented degree that is designed to prepare recipients to assume positions of leadership within educational and affiliated settings. Concentrations are offered in:

- Early Childhood Special Education (TAL)

Master of Science in Athletic Training (M.S.A.T.)
The Master of Science in Athletic Training degree is a graduate professional program accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam.

- Athletic Training (KIN)

Master of Science in Education (M.S.Ed.)
The Master of Science in Education degree is a practice-oriented degree that is designed to prepare its recipients to assume professional positions that require advanced course work and post-graduate degrees. Concentrations are offered in:

- Applied Learning Sciences (TAL)
- Applied Learning Sciences (online) (TAL)
- Applied Physiology (KIN)
- Community and Social Changes (EPS)
- Counseling: Marriage and Family Therapy (EPS)
- Counseling: Mental Health (EPS)
- Early Childhood Special Education (TAL)
- Education and Social Change (TAL)
- Higher Education: Enrollment Management (EPS)
- Higher Education: Institutional Research and Policy Analysis (EPS)
- Higher Education: Student Life and Development (EPS)
- Research, Measurement, and Evaluation (EPS)
- Special Education (TAL)
- Sport Administration (KIN)
- Sport Administration (online) (KIN)
- TESOL (TAL)

NOTE: The School of Education and Human Development’s graduate programs are governed by the rules, regulations, and policies of the larger University and Graduate School. In places where what appears in the following is judged to be in conflict with these other policies, the University and/or Graduate School’s policies will take precedence.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration. Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

**Enrollment Deposit**

Once students have received their offer of admission or conditional admission, they will pay a **non-refundable** enrollment deposit in order to accept their offer of admission.

**Doctor of Philosophy (Ph.D.)**

*In addition* to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ph.D. program will include the following:

- letters of recommendation should address the applicant’s **academic** potential;
- available student space in the program;
  - For TAL: availability of faculty advisor willing to mentor the student.
  - For EPS: Counseling: receipt of completed applications by the predetermined cut-off date. Please reference the SEHD web site, as doctoral applications are reviewed once each year.

**Doctor of Education (Ed.D.)**

*In addition* to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ed.D. program will include the following:

- letters of recommendation should address the applicant’s academic potential;
- available student space in the program; and
- admissions interview.

**Specialist in Education (Ed.S.)**

*In addition* to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ed.S. program will include the following:

- completion of a master’s degree with an outstanding record from an accredited institution;
- adequacy of previous study in the field for which the Ed.S. is being requested;
- an appropriate period of successful teaching experience;
- acceptable scores on the Graduate Record Examination (GRE); or approval of a GRE waiver. Applicants who seek a GRE waiver must have taught for a minimum of three years in a full-time capacity, fill out and submit a GRE waiver form, and submit a 3-page essay on an important educational.

**Master of Science in Athletic Training (M.S.A.T.)**

*In addition* to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.A.T. program will include the following:

- B.A. or B.S. in exercise science/kinesiology or a related field,
- A minimum 3.0 cumulative GPA
- A minimum 297 GRE score and 4.0 Analytical Writing score. A waiver of the GRE requirement may be available. Please contact the program director for more information
- A minimum of 100 observation experience hours (volunteer hours or work hours) with an Athletic Trainer is required
- At least one of the recommendation letters above must be written by an Athletic Trainer
- An interview may be required. Applicants will be notified as appropriate; and
- Applicants must complete or be enrolled in the prerequisite coursework listed below prior to acceptance and/or enrollment (Please contact the Program Director for course equivalency information)

**Required prerequisite coursework for admissions**

At the undergraduate or graduate level

- Anatomy & Physiology (Separate or combined a minimum of 6 credits)
- Biology: Introduction with Lab
- Chemistry: Introduction with Lab
- Introduction to Physics
- Introduction to Statistics
- Psychology: Intro to Psychology or Sports Psychology (preferred)
In addition to the above courses, CPR Certification is required (AHA BLS for Healthcare Providers or equivalent as indicated by Board of Certification's ECC list). Students must have proof of current certification before the start of classes and maintain certification throughout the program.

**Recommended foundational coursework for admissions**

The following courses are suggested foundational areas of knowledge that are included in the curriculum of the MSAT program. However, introductory courses in the areas below may provide the student with extra preparation for the rigorous graduate coursework of the MSAT program. Therefore, these courses are suggested but not required for admissions or for completion of the degree program:

- Nutrition: Introduction to Nutrition or Sports Nutrition
- Exercise Physiology
- Kinesiology and/or Biomechanics
- Care & Prevention of Athletic Injuries, Intro to Athletic Training, or Equivalent

**Transfer of courses**

Transfer of graduate credits previously earned from other accredited healthcare degree-granting programs is determined on a case-by-case basis. The Program Director and the appropriate course instructor(s) will review the transfer course syllabus to ensure the content match those of the program’s course and that all competencies can be identified. Credits can be transferred ONLY if they are less than six years old, were taken from a graduate degree program, and taken in an accredited institution. In addition, students must have earned a grade of B or better in the course.

**Master of Science in Education (M.S.Ed.)**

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for a waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.
- For Community and Social Change (EPS): Professionals who have worked full-time for at least three years in a not-for-profit setting may apply for a waiver of the GRE requirement. Please contact the program directly for conditions governing this waiver.
- For Sport Administration (KIN): Applicants with 3-years of professional work experience or military experience may apply for a GRE waiver. Please contact the program directly for specific waiver criteria.

**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the UM Office of International Admissions. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study (all doctoral degrees) or Course Sequence Plan (all master degrees) that must be on file in the Office of Graduate Studies by the end of the first semester of study.

**Application Requirements for Online Programs**

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

*Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.*

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (https://myonline.miami.edu/SignIn/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

**International Students (who attended college/university outside of the United States)**

All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services listed below. Follow the specific instructions of the selected evaluation service to request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation. We do not issue any student Visa’s for International UOnline students.
All online international students who have been admitted to an online program at the University of Miami are not eligible for an F-1 visa.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will not be received and will delay the admissions process.

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower – Suite 902, Locator Code: 2991
Miami, FL 33146

The evaluation report and supporting documents are required before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

Approved Evaluation Services
- Educational Credential Evaluators, Inc. (ECE) (https://www.ece.org/)
- World Education Services (WES) (http://www.wes.org/students/)

TOEFL (Test of English as a Foreign Language)
If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl/) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. The TOEFL code for the University of Miami is 5815.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

- TOEFL Internet Minimum Score: 94
- TOEFL Computer Minimum Score: 240
- TOEFL Paper Minimum Score: 600

TOEFL Waiver
The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived and worked in an English-speaking country for the past two or more years.

Letters of Recommendation
Students will input their recommender's information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student's recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student's Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

Admissions & Admissions Decisions
Once the University receives the student's complete application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)
If the application meets the standard admissions requirements and the University has received all official transcripts, from all institutions entered on their online application, the student will receive an offer of full admission in approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Conditional Admit (with Unofficial Transcripts and/or Test Scores)
If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended, as entered on their online application, and/or the student's unofficial test scores (if
required). Unofficial transcripts may be considered acceptable **ONLY IF** the document is in a pdf format and **ALL** of the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit earned
- Grade earned
- Degree conferred with date (if applicable)
- No other documents will be accepted

Students receive notification typically **within 48 business hours** after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students **MUST** pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student’s Financial Aid funds **will not be disbursed** until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student’s financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (http://bulletin.miami.edu/graduate-student-handbook-online-students/cost-fees-billing-payment/) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is **only available to online students** at this time. **UM Employees are not eligible for Monthly Payment Plans at this time.**

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (http://www.miami.edu/index.php/registrar/calendar/) Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for official transcript deadlines.

**Accepting Admission**

When a student’s admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer. Students can also view the admissions decision the online application portal found here (https://myonline.miami.edu/).

A student’s Enrollment Advisor will guide him/her through the next steps (https://myonlinesupport.miami.edu/recently-admitted/) to accept their offer of admission and pay their non-refundable enrollment deposit. A student’s offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have **fourteen (14) calendar days** to accept their offer of admission by paying their non-refundable $300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day timeframe according to the Deposit Date on the official Admission letter, the student’s application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the last official Deposit Deadline as set on the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. Deferrals are not permitted unless the student has been approved for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020).
Deferral Exception Appeal

In extenuating circumstances, students may choose to apply for a Deferral Exception ([https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020](https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020)). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and should contact their Enrollment Advisor for additional information regarding documents required for admission. Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. ([http://www.miami.edu/index.php/registrar/calendar/](http://www.miami.edu/index.php/registrar/calendar/)) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.

- If a student’s Deferral Exception application is **denied**, the student’s offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.
- If a student’s Deferral Exception is **approved**, the student’s start date will be updated to the next immediate term and the student will be sent a new admissions letter indicating the approval and updated start date.
  - If a student **has not accepted** their offer of admission, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day time frame, the student’s application will be withdrawn and the student must sit out (1) one additional term before reapplying.
  - If a student **has already accepted** their offer of admission, and has been approved for a deferral exception, the student’s start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.

Any student who chooses to reapply for a future term is **not guaranteed admission** and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

The offer of Admission Expiration

Offers of Admission are **valid for one term only unless a Deferral Exception has been granted**. To officially accept the offer of admission, a student must log into Canelink ([https://myonlinesupport.miami.edu/recently-admitted/](https://myonlinesupport.miami.edu/recently-admitted/)) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student’s original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
- A student failed to meet the requirements of a Conditional Admission.
- A student failed or did not complete the Student Readiness Orientation (SRO)
- A student’s Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application ([https://myonline.miami.edu/signup/](https://myonline.miami.edu/signup/)) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application. All students who are readmitted will need to complete the Student Readiness Orientation (SRO) by their deadline, regardless of prior completion, and adhere to all admissions deadlines as set forth in the Academic Calendar.

Not Admitted

If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically **within 48 business hours** after the University received the student’s completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal ([https://myonline.miami.edu/signup/](https://myonline.miami.edu/signup/)).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.
**Transcripts for Admissions**

**Official Transcripts**
- MUST Arrive in a sealed envelope with the school's stamp/seal across the back or on the institution's official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar's signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami

Online Enrollment Office

1320 South Dixie Highway

Gables One Tower –Suite 902, Locator Code: 2991

Miami, FL 33146

Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. **Students are responsible for ensuring that they have their transcripts sent to the address above** and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).

**Electronic Transcripts**

Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student's Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.

**Official Transcripts, Scores & Conditional Admission**

The University must receive official transcripts for all institutions attended, as entered on their online application, before any student can be considered fully admitted into the University.

**Official Transcripts/International Evaluations Due Date**

If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student's official transcripts from all institutions attended, as entered on their online application, or International Evaluations from an approved evaluation service, **by the date listed on the UOnline Academic Calendar**. A student's Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student's official transcripts. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**Official Test Scores Due Date**

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University MUST receive their official test scores **by the date listed on the UOnline Academic Calendar**. A student’s Admissions letter will provide the exact due date for the student’s official test score(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**UONLINE OFFICIAL TEST SCORE SCHOOL CODES**

**TOEFL CODES:** Institution: 5815

**GRE CODES:** Institution (All UOnline programs): 4405

**GMAT CODES:**
- School of Business - UOnline Finance/Accounting Certificate: 7NV-S1-23
- School of Business - UOnline Master of Finance: 7NV-S1-35
- School of Business - UOnline Master of Professional Accounting: 7NV-S1-53
- School of Business - UOnline Professional MBA: 7NV-S1-01
- **College of Arts & Sciences** - UOnline Master of Public Administration: 7NV-HM-66
- **School of Education** - UOnline Master & EdD of Applied Learning Sciences: 7NV-HM-66

**Financial Aid & Tuition Payment**

If students apply for Financial Aid, Financial Aid will be **NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.**

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student MUST pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.
Official Transcripts and Test Scores Not Received
If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

• A student will be removed from their current course and next course
• A student will be administratively withdrawn and may be reinstated if the University receives the student's official transcripts.
• A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

Enrollment Deposit
Once students have received their offer of admission or conditional admission, they will pay a non-refundable enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.

What the Enrollment Deposit Is
The enrollment deposit payment is:

• Paid one time per UOnline program
• Non-refundable including if the student's Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
• Due no later than the date listed on the academic calendar.
• Applied against a student's 1st tuition bill
• Valid for as long as the Offer of Admission is valid:
  • If a student's Offer of Admission for their UOnline program has expired and he/she reapplications to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
  • Transferable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
• Not transferrable to any campus-based program.

Paying the Enrollment Deposit
After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu/) to pay the student's enrollment deposit with the following payment options:

• Online Credit Card payment:
  • MasterCard
  • Visa
  • American Express
  • Discover
• E-check (drawn on a US bank only)
  • Bank-to-Bank, Exchange Bureau or Wire Transfer.
    • Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.
• International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments/)

Degree Requirements
In addition to the formal academic requirements (as outlined below), the School of Education and Human Development requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education and Human Development reserves the right to dismiss any students who are academically or personally unwilling or unable to carry out the professional responsibilities of the respective profession for which they are being trained. Conduct which may be considered unprofessional may include, but is not limited to, research or professional misconduct; dishonesty, cheating, plagiarism; exercise of professionally poor judgment; sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation; and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

Doctor of Philosophy (Ph.D.)
Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.
The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Office of Graduate Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with the Office of Graduate Studies in the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit to the Admission’s Coordinator a signed Graduate Handbook Acknowledgement of Receipt and the Graduate Student Honor Code by the end of their first semester of enrollment.

The residence requirement is two full-time consecutive semesters of coursework at the University of Miami.

The minimum total credit hours required beyond the Bachelor’s are 60, plus a minimum of 12 dissertation research credit hours.

15 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

A student must pass a Qualifying Examination before being admitted to Candidacy for a doctorate. The content and conditions for administering the Qualifying Examination are defined by the program area in which a student is enrolled.

A student's score on the Qualifying Examination is the professional judgment of the supervisory committee that was appointed to score that examination. As such, no academic appeals of scores on Qualifying Examination are possible.

If a student fails an initial attempt at passing a program's Qualifying Examination, the student's supervisory committee may allow a student a second opportunity to pass a new Qualifying Examination that is administered within a year of the original, at its sole discretion.

A student who fails a program's Qualifying Examination may not proceed any farther in the program and is, instead, dismissed at the end of the then-current term. Beyond the then-current term in which a student's Qualifying Examination is scored, no additional financial assistance will be provided to a student who is scheduled to be dismissed from the program for failure in the Qualifying Examination.

Students are required to complete all Ph.D. requirements within eight years of initial enrollment.

**Doctor of Education (Ed.D.)**

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Office of Graduate Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with the Office of Graduate Studies in the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit to the Admission’s Coordinator a signed Graduate Handbook Acknowledgement of Receipt and the Graduate Student Honor Code by the end of their first semester of enrollment.

The minimum total credit hours required beyond the Bachelor’s are 60, plus a minimum of 12 dissertation research credit hours.

A supporting area consisting of at least 12 credit hours is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education and Human Development.

A minimum of 12 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ed.D. requirements within eight years of initial enrollment.

**Specialist in Education (Ed.S.)**

The Specialist in Education is a terminal degree that is independent of both doctoral degrees (Ph.D. and Ed.D.) that are offered by the SEHD.

Although there is normally some overlap in coursework, admission to a specialist program does not imply that the student has been or will be admitted to a doctoral program.

A supervisory committee consisting of three faculty members in the student’s area of study will be appointed by the School of Education and Human Development.

Upon admission to the specialist program, a formal program of study is approved by the Supervisory Committee.

A minimum of 60 graduate credit hours, (or 30 credit hours after completion of the Master’s program) is required.
The program must include at least 30 graduate credit hours earned at the University of Miami and at least 18 graduate credit hours earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen, a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Supervisory Committee.

All specialist students must engage in teaching and/or research appropriate to their degree program.

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.

Master of Science in Athletic Training (M.S.A.T.)
A minimum of 60 graduate credit hours is required.

All work towards the Master's degree must be completed within six years of initial enrollment.

Master of Science in Education (M.S.Ed.)
A minimum of 30 graduate credit hours is required.

EPS: Students enrolled in any counseling program must complete the required 15-credits of practicum and “Personal Growth Experience” form.

TAL: Students enrolled in any certification program that has been approved by Florida Department of Education must fulfill any and all additional requirements that are specified by the program approval.

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen, a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program plan. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the student's advisor.

All work towards the Master's degree must be completed within six years of initial enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development's Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Continuous Enrollment
The School of Education and Human Development adheres to the Graduate School's continuous enrollment requirement.

Financial Assistance
Financial assistance whose sources of funding are outside of the School of Education and Human Development, for example, Federal loans provided by the University of Miami, shall be governed by all applicable rules, regulations, and policies. Specifically, many federal loans and grants have conditions limiting the programs and/or courses to which they may be applied. Some federal loans are restricted to graduate courses only; some fellowships, grants or traineeships may entail post-graduation employment commitments. Alternatively, private scholarships or fellowships may have their own conditions. Before accepting any form of financial assistance, please be sure to ask about and to fully understand the conditions that govern whatever type of financial assistance you are offered.

In addition to University-wide fellowships and the availability of student loans, the School of Education and Human Development may provide financial assistance for students enrolled in its graduate programs. These may include tuition-based scholarships, teacher-tuition scholarships, training fellowships, graduate student assistants, and other forms of help.

Notwithstanding a student's time to completion, the School of Education and Human Development limits a student's eligibility for scholarships and other financial assistance that is under its control to five years from the time of initial enrollment.

Scholarship-based financial assistance is to be used only for courses that define each student's program of study. Students who enroll in courses outside of their program of study will be charged full tuition for those courses.

Teacher Tuition Scholarships do not apply to doctoral (Ph.D. and Ed.D.) programs.
Tuition scholarship assistance may not be applied to the retaking of courses for any reason whatsoever.

Educational and Psychological Studies

EPS 601. Field Studies in Education. 1-6 Credit Hours.
Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 605. Regression Methods. 3 Credit Hours.
The aim of this course is to provide a solid foundation in the basic concepts of multivariate statistics, and its application to practical research questions. This course extends the content of EPS 671 (ANOVA methods) and EPS 672 (regression methods) to cover methods used when there are multiple dependent variables to be modeled simultaneously. This course focuses on the traditional multivariate methods (as opposed to the contemporary models of structure equation modeling) that see wide use in the behavioral sciences. The general topics covered in the course include, but are not limited to: introductory matrix algebra, multivariate analysis of variance (MANOVA), factorial MANOVA, discriminant function analysis, and exploratory factor analysis. In all cases, this course is intended to provide a solid conceptual background of these topics, as well as a thorough description/practice of the application of these topics to real data scenarios.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 620. Workshop in Education. 3 Credit Hours.
Study in special interest areas in education.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 622. Community Well-being and Change: Theory and Practice. 3 Credit Hours.
This course is designed to promote an understanding of the factors associated with healthy communities. It provides a comprehensive overview of the relevant skills and theories including: ecological/systems theory/models; community theories (sense of community, social capital, environmental psychology); and critical social theory, social justice, and social determinants of well-being.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 623. Development and Change in Community Organizations: Theory and Practice. 3 Credit Hours.
This course focuses on the unique role of non-profit, community-based organizations in promoting human and community development. Students will engage in an analysis of the range of functions that organizations serve and the various organizational strategies used in community settings.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 624. Essentials of Research in Social and Behavioral Sciences. 3 Credit Hours.
Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 625. Program Evaluation. 3 Credit Hours.
Terminology, models, standards, practices, and common problems associated with program evaluation in Educational and Social Service settings. Prerequisite: EPS 670 and 553 or equivalents.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 626. Multicultural Communities in a Globalized Society. 3 Credit Hours.
This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large. Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 627. Community Youth Development. 3 Credit Hours.
This course in community youth development (CYD) will focus on the philosophical, sociological, and educational foundations of a youth development perspective that highlights youth as powerful catalysts for change and positive forces in shaping communities. We reflect on how youth development is inextricably linked with family and community development. After reviewing and critiquing traditional adolescent development theories, students will engage with theories and practices of CYD, youth empowerment, youth civic engagement, youth organizing, social justice youth development, youth activism, and critical youth engagement.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPS 628. Social Change Praxis. 3 Credit Hours.
In this course, we will explore the meaning of social change and the nature of power, examine past and present social movements, and learn about the strategies and methods groups have used to build community and deploy collective power in their efforts to change minds, systems, institutions, policies, communities, and nations. Together, we will learn more about critical theories of power, collaboration, systems, and social mobilization, and look at real-life cases to see how theory can be applied in practice. The concept of praxis was chosen as the organizing framework because it requires students to develop an intellectual relationship to their activism. Praxis, simply put, means action informed by theory. In addition to reflecting upon our own values and assumptions as agents of change, we will develop skills for facilitating engaging discussions, recruiting and motivating community members, developing a shared social analysis, mobilizing resources, and building coalitions for social change. We will identify common strategies used in successful campaigns and analyze the choices groups have made in their pursuit of the collective power necessary to achieve their social change goals.
Prerequisite: EPS 622. And EPS 623. And EPS 624. And EPS 625. And EPS 626.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 629. Seminar in Community and Social Change. 3 Credit Hours.
This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 635. Special Topics in Educational and Psychological Studies. 1-3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. This course is designed for students wishing to focus on a specific area of study within the umbrella of Educational and Psychological Studies. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 667. Professional, Legal and Ethical Issues in Counseling. 3 Credit Hours.
Professional, legal, ethical, and licensing issues in the counseling profession.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 668. Social and Cultural Diversity and Counseling. 3 Credit Hours.
Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 669. Psychopathology for Counselors. 3 Credit Hours.
In depth introduction to abnormal human behavior patterns of concern to mental health professionals. Clinical conditions will be examined within the context of currently most viable theory and research relating to etiology, assessment, diagnosis and treatment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 670. Dynamics of Marriage and Family Systems. 3 Credit Hours.
Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 671. Family Therapy. 3 Credit Hours.
Concentrated study of several approaches to family therapy including systemic and psychosocial perspectives. Theory and techniques of family therapy are taught in lecture, videotape, and simulation.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 672. Therapy for Couples. 3 Credit Hours.
Theory and technique linked to working with couples, in marriage and in other relationships.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 673. Counseling in Community Settings. 3 Credit Hours.
Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 674. Lifestyle and Career Counseling. 3 Credit Hours.
An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 675. Therapeutic Group Procedures. 3 Credit Hours.
This course examines both the theory and practice of group counseling. The course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 676. Counseling Process and Practice. 3 Credit Hours.
The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 677. Assessment Strategies for Counselors I. 3 Credit Hours.
This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 678. Counseling Theories and Practice. 3 Credit Hours.
Study of theories and concomitant practices in counseling and therapy.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 679. Lifespan Human Development. 3 Credit Hours.
Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 680. Theory and Practice with Children and Adolescents. 3 Credit Hours.
Course prepares students to provide preventive and therapeutic interventions with children and adolescents including theory, research, and practice.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPS 681. Counseling and Sexuality. 3 Credit Hours.
Emphasis is placed on self-awareness and acceptance of all dimensions of human sexuality. Readings and classroom activities focus on biological aspects of sexuality, an understanding of sexual dysfunctions, and their treatment.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 682. Practicum in Counseling I. 1-4 Credit Hours.
Supervised Practicum at the Institute for Individual and Family counseling and other appropriated clinical settings relating theoretical formulations to intervention strategies appropriate to specialization.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 684. Research and Program Evaluation in Counseling. 3 Credit Hours.
Course focuses on the interpretation and application of research data as applied to clinical practice. Skills in using behavioral research-based literature to identify, evaluate and interpret appropriate interventions are also emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 685. Substance Abuse and Addictions: Theories and Counseling. 3 Credit Hours.
Theories and research on individual, systemic causes, and outcomes of substance abuse, and concomitant practices in counseling and therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 686. Working with Black Clients: Treatment and Assessment Considerations. 3 Credit Hours.
This course presents three core content areas with respect to the treatment and assessment of Black populations. The first content area addresses historical aspects of the development of Black psychology. Additionally, it will review ethnocentrism, the misuse of Western psychology to marginalize African Americans and reasons for scientific abuses against people of color, such as the Tuskegee Syphilis Study. Lastly the first content area will focus on topics such as the Black family, racism, cultural mistrust, stereotype threat, Black/White relations, and Black mental health. Concomitant aspects of Black culture including; racial identity development, spirituality, sexuality, common misconceptions about Black populations, and within group differences related to gender, class, age, and sexual orientation will be peripherally addressed. The second content area presents a culturally-informed perspective on the psychological assessment and treatment of African Americans. It will focus on topics such as ethnic/racial identity models, cultural variables that may affect DSM 5 diagnoses, epidemiological mental health data across ethno-racial groups, biased measures, culturally specific interventions, and important factors to consider during the delivery of treatment. The third module will focus largely on the infusion and integration of the first two modules in therapeutic practice with Black populations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 687. Latino Youth and Families. 3 Credit Hours.
This course will focus on the Latino family with emphasis on the development of Latino youth in the U.S. Latino youth and their families will be described within an ecological context. The following social and cultural contexts and their impact on Latino youth development will be addressed: cultural values; parenting practices; religious belief systems; poverty and chronic stressors; immigration and acculturation; ethnic identity; psychosexual development; bilingualism; suicidality; resiliency; and academic barriers. Recommendations for culturally responsive counseling will be discussed throughout.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 688. Spanish for Mental Health Professionals. 3 Credit Hours.
This course will address the nuances and role of language in the context of counseling, with a focus on the Spanish language. The course will include a dual lens: on the experience of the bilingual counseling client and on the experience of the counselor with varying degrees of proficiency in Spanish. We will address (1) the role of language within the counseling setting with bilingual clients, (2) how cultural values influence language, (3) how cultural values and customs influence the degree of emotion or energy expressed in language and emotion-laden states, (4) the common challenges and experiences of counselors in speaking in Spanish with their clients, and (5) recommended terms and words to use in Spanish in the counseling setting. The course will include assigned readings, lectures, class discussion, videos and role-plays to facilitate assimilation of the material.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPS 689. Psychological Interventions with Hispanic/Latino Populations. 3 Credit Hours.
Explores the diversity of experiences among Hispanics and their implications for therapy. Topics include: racial diversity among Hispanics, sociopolitical factors in mental health, the impact of immigration on mental health, special psychological treatments: trauma treatment, family interventions and bilingual counseling.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 693. Bereavement and Attachment Factors for Children and Families. 1-3 Credit Hours.
This course will focus on attachment and development of factors as they relate to the bereavement and loss experience of children, adolescents, young adults, and families. Effective methodology in the care of these populations will be explored. Content will include the trajectory of grief in childhood development, manifestation of loss and grief, risk factors in the loss experience, attachment issues, types of loss, popular notions of loss and treatment, and best practice in bereavement work.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 698. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 699. Advanced Individual Study I. 1-6 Credit Hours.
Individual work on a special project under faculty guidance.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 700. Quantitative Methods I. 3 Credit Hours.
This course provides an introduction to data analysis and statistical inference. Students learn to describe data (quantitatively and graphically), to select and compute statistical estimates and hypothesis tests, to use computer packages (SPSS) to accomplish these tasks, and to interpret and write about the results of the estimates and tests. Knowledge of basic algebra is needed. Higher mathematics (e.g., trigonometry, calculus) is not used.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 701. Introduction to Research Methods. 3 Credit Hours.
The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students required to complete literature search on a topic of their interest and submit a report of their findings.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 702. Quantitative Methods II. 3 Credit Hours.
This course introduces students to techniques of data analysis and statistical inference based on the General Linear Model (GLM). The major topics covered in this class include simple/multiple regression, one- and two-way Analysis of Variance (ANOVA) followed by multiple comparisons, Analysis of Covariance (ANCOVA), and Repeated Measures ANOVA. This course aims to provide a solid conceptual background of these topics, as well as the analytic skills for conducting educational and psychological research in practice. Knowledge of basic algebra and SPSS is required, as is an understanding of the fundamental principles of descriptive statistics and hypothesis testing (as taught, for example, in EPS 700 or equivalent). Knowledge of calculus is not required. Students will conduct statistical analyses using real datasets.
Prerequisite: EPS 700 or Equivalent.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 703. Applied Multivariate Statistics. 3 Credit Hours.
This course will provide: (1) a conceptually-oriented introduction to regression methods and (2) opportunities to learn related data-analytic techniques.
Prerequisite: EPS 700 or Equivalent and EPS 702 or Equivalent.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 704. Computer Applications in Educational and Behavioral Science Research. 3 Credit Hours.
This course introduces the use of statistical software packages R for acquiring, managing, and preparing datasets that are required to produce reliable and valid statistical inferences. With a special focus on R, the course will cover a broad range of hands-on activities in the data analytic process including data coding, file manipulation tasks, data screening, and statistical analysis, and also provide a brief introduction to R programming.
Components: LSN.
Grading: GRD.
Typically Offered: Summer.

EPS 705. Measurement and Psychometric Theory. 3 Credit Hours.
EPS 705 (Measurement and Psychometric Theory) is a first component of a sequence of classes in order to acquaint students with cutting edge models in test theory and with the application of computer software with which to implement those theories. This sequence of classes provides an introduction to contemporary measurement principles implicated in the design and analysis of scales, tests, and psychological inventories. EPS 705 covers the essentials of classical test theory, factor models of test items, generalizability theory, and a brief introduction of item response theory. After completing the course, students should be provided foundations for further study of measurement theory and be prepared to take a course for item response theory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 706. Categorical Data Analysis. 3 Credit Hours.
Categorical data is abundant in many different fields such as education, psychology, and marketing. The use of statistical methods for categorical data has increased dramatically in recent years. Categorical data can be numeric or character, but it is always a discrete number of levels. Virtually every research project categorizes some of its observations: male or female, marital status, political or religious affiliation, race of patient, and so on. Prerequisite: EPS 553 and EPS 671.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 707. Item Response Theory. 3 Credit Hours.
The purpose of the course is to provide training in the theory and application of item response theory (IRT) as it pertains to educational and psychological measurements. Focus will be given to discussing IRT as a measurement model used to measure the properties of items and individuals. Particular attention will be given to contrasting the properties of the IRT model to the classical test theory, and the application of IRT to actual data sets.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 708. An Introduction to Structural Equation Modeling for Multivariable Data. 3 Credit Hours.
This course will provide (1) a conceptually-oriented introduction to Structural Equation Modeling for multivariate data and (2) opportunities to learn related data-analytic techniques. Prerequisite: EPS 703 or Equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 709. Introduction to Multilevel Modeling. 3 Credit Hours.
This course will provide: (1) a conceptually-oriented introduction to multilevel modeling and (2) opportunities to learn related data-analytic techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 710. Meta-Analytic Methods for Research Synthesis. 3 Credit Hours.
Meta-analysis is the general practice of combining, comparing, and interpreting statistics across a set of studies that investigate the same (or similar) phenomena using a properly motivated theoretical framework. Meta-analysis has become a popular tool in a variety of research disciplines, including the social sciences, education, medicine, and business. This course provides a thorough introduction to the theoretical foundations of meta-analysis, discusses commonly used statistical techniques, and analyzes several examples of the existing meta-analysis. Emphasis is placed on application, so that students are trained to independently perform a meta-analysis, from start to finish, in whatever substantive area interests students the most.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 711. Advanced Topics in Research, Measurement, and Evaluation. 3 Credit Hours.
Review of emerging quantitative methodological advances relevant to educational research for which formal course title and syllabus have not been
developed and formalized in the UM Bulletin. Allow for experimental instructional formats. See Course Notes for specific topic.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 712. Field Experience in Educational Research. 2-6 Credit Hours.
A total of 125 hours of supervised practical experiences in educational research. Emphasis is placed on actual participation in a wide variety of on-going research projects through associations with an approved educational R & D center. Normally taken in two or three credit blocks.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 714. Qualitative Methods I. 3 Credit Hours.
An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various
types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 715. Qualitative Methods II: Case Studies and Grounded Theory. 3 Credit Hours.
Types and designs of case studies, development of protocol, field work, data analysis, and report writing. Practical procedures and techniques for
conducting grounded theory studies, including data coding and analysis, and reporting of results.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 716. Qualitative Methods II: Interviews and Content Analysis. 3 Credit Hours.
Sociological and oral history interview methods, including methodological issues, computer-based coding, decoding, and interpreting data. Visual and
text based content analysis, scoring schemas, and inter-rated reliability are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 717. Survey Research Methods. 3 Credit Hours.
Focus on standards and practical strategies for designing different types of survey instruments and conducting survey research. Students are required
to develop a proposal for survey research, develop a survey instrument, and conduct small pilot study by collecting, analyzing, and reporting survey
data.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 725. Seminar in Community Well-Being. 1-6 Credit Hours.
This course provides an overview of the field of community psychology. We will examine the conceptual and theoretical developments in community
psychology since the 1965 Swampscott Conference (the ‘birthplace’ of community psychology) through reading primary sources—articles,
monographs and book chapters—by those who have shaped the field. The readings will include some empirical research studies, but our key focus is
the conceptual writings. The goal of this course is to understand and critique different theoretical perspectives in the field of community psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
EPS 731. Theories of Community Research and Action. 3 Credit Hours.
This course provides an overview of theoretical perspectives and how they are applied to social and psychological issues in the field of community
psychology. The course examines the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference
(the ‘birthplace’ of the field) through reading primary sources—articles, monographs and book chapters—by those who have shaped the field.
Readings also include empirical articles that illustrate the application of these concepts to research. Class discussions are central to this course. In
addition, course assignments include the following: (1) brief reflections on readings 3 times during the course of the semester; (2) an interview with a
community psychologist and a short essay based on the interview; (3) the final paper is a systematic critical literature review on the topic of interest to
students. In this paper, students critique a body of empirical work using theoretical perspectives in community psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 732. Community Based Participatory Action Research. 3 Credit Hours.
The purpose of this course is to introduce students to several traditions of community based participatory action research (CBP AR). CBP AR is carried out in collaboration between academic researchers and members of communities, and involves an iterative process of developing research questions, designing methods, implementing data collection, interpreting results, and often developing interventions. Students will begin by reviewing different intellectual traditions in participatory research including Community Based Participatory Research (CBPR), Participatory Action Research (PAR), Critical PAR and others. We will also stress the ways that participatory research has developed within the traditions of Community Psychology, such as Ecological Inquiry and Participatory Evaluation. While all these three traditions are related and overlapping, students will be encouraged to critique and contrast these approaches.
Prerequisite: EPS 670.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 737. Organization and Administration of Higher Education I. 3 Credit Hours.
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 738. Effective Teaching, Learning, Assessment, and Curriculum in Higher Education. 3 Credit Hours.
Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

EPS 739. The Community College. 3 Credit Hours.
An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 740. Administration of Student Affairs. 3 Credit Hours.
History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 741. Basic Skills in Counseling and Interviewing. 3 Credit Hours.
Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 742. Higher Education in the United States: From Harvard to Present. 3 Credit Hours.
Broad view of issues and problems in higher education. Fundamental ideas and significant literature are analyzed from historical, philosophical, and societal perspectives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 743. Psychological Bases of Education. 3 Credit Hours.
Review and extension of basic principles of psychology underlying educational practice. Basic concepts of educational psychology which contribute to effective education will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 744. Student Diversity in American Higher Education. 3 Credit Hours.
Emphasis on the diversity of today's undergraduate students. An examination of the sociological context and philosophical orientation of contemporary college students is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 745. Organization & Administration of Higher Ed II: Governance, Leadership and Finance. 3 Credit Hours.
Provides an overview of selected topics in governance, administrative leadership and finance in higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 746. College Student Development: Theory, Research and Practice. 3 Credit Hours.
Emphasis on student growth and development during college and an analysis of the factors which affect development along cognitive and affective dimensions. An in-depth examination of college student development theories is included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 747. Critical Issues in Student Affairs: The Law and Higher Education. 3 Credit Hours.
Emphasis on the most pressing issues facing the profession of student affairs today including diversity, funding, staff retention and the law and student affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 748. Enrollment Management: Theory and Practice. 3 Credit Hours.
Comprehensive overview of principles and practices of a strategic process that begins with recruitment and continues through graduation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 749. Advanced Seminar in Enrollment Management. 3 Credit Hours.
In-depth exploration of topics in enrollment management, including market research, market testing, pricing strategies, strategic planning, and development of a future vision.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 751. Seminar in Higher Education Administration: Contemporary Issues. 3 Credit Hours.
A review of recent developments, research findings, changing issues, and problems in contemporary American higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 752. Dissertation Seminar. 3 Credit Hours.
The development and analysis of dissertation proposals will be required. Detailed coverage of the research process, proposal elements, dissertation writing and all aspects of doctoral research will be emphasized. Extensive feedback on research ideas and writing is involved.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 753. Internship in College Teaching. 3 Credit Hours.
A program in observation and supervised teaching in the community junior or liberal arts college. The student spends 15-20 hours per week. Included is a seminar held with the college supervisor which meets several times during the semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 754. Practicum: Administration of Higher Education. 1-6 Credit Hours.
This course is designed to provide students with an opportunity to develop professional competencies while they apply theory to practice. Opportunities can be pursued in enrollment management or student affairs related offices either on campus or at other higher education institutions. Students will contract for the type of experience desired and a formal research paper and presentation will culminate this activity.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
EPS 755. Group Dynamics and Communication Skills. 3 Credit Hours.
Emphasis on group dynamics, group procedures and communication skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 764. Workshop in Education: Selected Topics. 1-3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 765. Workshop in Education: Selected Topics in Higher Education. 1-3 Credit Hours.
Study in special interest areas in higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 766. Workshop in Education: Institutional Research & Higher Ed Policy Analysis. 3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 767. Counseling Psychology: Theory, Research and Practice I. 3 Credit Hours.
Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career
development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum
of 12 credits.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 768. Counseling Psychology: Theory, Research and Practice II. 3 Credit Hours.
Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career
development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum
of 12 credits.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 770. Psychological Appraisal I. 3 Credit Hours.
Orientation to psychological appraisal with emphasis on development of skill in assessment of intellectual functioning.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 771. Psychological Appraisal II. 3 Credit Hours.
Orientation to psychological appraisal with emphasis on use of procedures which facilitate preparation for, and evaluation of, intervention efforts in the
personality and social-behavioral areas.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 772. Vocational Psychology and Career Development. 3 Credit Hours.
This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major
approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also
explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and
social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to
integrate research, theory, practice, public policy, and social justice.
Academic Plan Equal Counseling.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
EPS 775. Doctoral Practicum I. 1-9 Credit Hours.
Supervised counseling experiences with clients at the Institute for Individual and Family Counseling. Individual and small group supervision by program faculty.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 776. Doctoral Practicum II. 1-9 Credit Hours.
This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 777. Advanced Practicum in Counseling Psychology. 1-9 Credit Hours.
Supervised experience appropriate to the work of the counseling psychologist.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 779. Vocational Psychology and Career Development. 3 Credit Hours.
This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to integrate research, theory, practice, public policy, and social justice.
Requisite: Restricted to Doctoral Students in the Counseling Psychology program.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 780. Cultural Diversity and Mental Health. 3 Credit Hours.
This seminar course provides advanced training in conceptualizing the individual within cultural and sociopolitical contexts. Emphasis is placed on the 'state of the science' on multicultural empirical research as well as on the 'state of the art' in translating scientific findings to applied clinical contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 781. The Social Bases of Human Activity and Flourishing. 3 Credit Hours.
Human beings are the most intensely social animals, and this course explores the evolutionary, developmental, and social domains in which that social nature is expressed. Topics include attachment processes, imitation learning, identity formation, social norms, intergroup processes, aggression, and social hierarchy. The course has an evolutionary framework, and explores developmental and social domains of human behavior. These domains point to what makes it possible for humans to flourish as the social creatures we are
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 782. Supervision in Counseling Psychology. 3 Credit Hours.
This seminar course provides an overview and discussion of theories, research, and practice of supervision and consultation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 785. Preparing Future Faculty Seminar. 1-3 Credit Hours.
The goal of this course is to introduce you to the larger role of university professor. The class is designed to give you some general sense of university structure and of the breadth of opportunities in higher education, to think through your own vision of "being a professor" particularly the part of that role that focuses on teaching, and to help you on the job search by preparing a professional portfolio that will help you get that first job and, hopefully, set you on a smooth career path. The PFF seminar will provide you with contextual and interdisciplinary knowledge of professoriate. Each seminar will be designed to aid you in your goal to become an outstanding faculty member. PFF will give you an overview of life on the academic job market and the pre-tenure years. It is your responsibility to tailor that information to fit your needs. It is expected that you take the information you learn in PFF and speak with mentors in your discipline to glean further insights into faculty life.

Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 789. Special Topics in Counseling Psychology. 3 Credit Hours.
This graduate course will examine research and practice in a specialty area within counseling psychology. Content may vary from term to term. Probable topics include psychopathology and consultation. Readings will include articles, books, and/or book chapters by key scholars who have shaped and/or are shaping the field. A focus will be placed both on empirical research studies and conceptual writings. The goal of this course is for students to gain key counseling psychology competencies in a specialty area within the field.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 798. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 799. Advanced Individual Study II. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 802. Practicum Laboratory I. 1-4 Credit Hours.
Individual, dyad, and small group supervision at approved Practicum sites.
Corequisite: EPS 682 and Prerequisites: EPS 667 and EPS 669 and EPS 676 and EPS 678.

Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 803. Internship in Counseling Psychology. 1-6 Credit Hours.
Supervised internship in Counseling Psychology in an approved facility.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her adviser. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 820. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EPS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 825. Continuous Registration Master's Study. 1 Credit Hour.
Master thesis Research. 1-12 Credit Hours. Master students enrolled for credit as determined by advisor. This course will be graded each term.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
EPS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 835. Doctor of Education Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.
Post-Candidacy Dissertation Research. 1-12 Credit Hours. Doctoral students enrolled for credit as determined by advisor. This course will be graded each term.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and Ed.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Certificate in Higher Education Administration/Enrollment Management
http://sites.education.miami.edu/higher-education-administrationenrollment-management-cert/

Overview
College and universities are complex institutions that constantly need skilled administrators who understand all aspects of the ever-shifting higher education environment. The Certificate in Enrollment Management is a 12-credit minimum program designed for working professionals who already have master’s degrees and seek career-enhancing skills and credentials.

The certificate can be integrated into the Master of Science in Higher Education Administration Program (for a total of 39 credits). It can be completed in addition to or after completion of a master’s program in higher education administration or related field.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.
International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission
The Higher Education Administration Program Certificate offers a choice between concentrations in Enrollment Management and Student Life & Development. The Enrollment Management focus is on data-driven decision-making in the complex, ever-shifting higher education environment.
Goals

Designed for working professionals who already have a master's degree, the program aims to provide career-enhancing skills and credentials today's higher education administrators need to help their institutions and students succeed.

Student Learning Outcomes

- Students will demonstrate understanding of enrollment management (EM), the characteristics of a successful enrollment manager, and the components of an effective strategic plan.

Certificate in Higher Education Administration/Student Life and Development

http://sites.education.miami.edu/higher-education-administration-student-life-development-cert/

The Certificate in Student Life and Development is a 12-credit minimum program designed for working professionals who already have master's degrees and seek career-enhancing insights, skills, and credentials. The program is focused on students transition and adjustment to college and on elements of the college environment that enhance their academic achievement and personal development and well-being.

The certificate can be integrated into the Master of Science in Higher Education Administration Program (for a total of 39 credits). It can be completed in addition to or after completion of a master's program in higher education administration or related field.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu) for further assistance.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

### Certificate in Latino Mental Health Counseling

**Overview**

This Certificate requires previous graduate training. It can be acquired after graduation from the Master’s Program in Counseling or can be integrated into the Doctoral Program in Counseling Psychology. It can be completed in addition to or after completion of a degree program in counseling, psychology or a related field.

### Mission

The Higher Education Administration Program Certificate offers a choice between concentrations in Enrollment Management and Student Life & Development. The Student Life focus is on students’ transition and adjustment to college and on elements that enhance their academic achievement and personal well-being.

### Goals

Designed for working professionals who already have a master's degree, the program aims to provide career-enhancing skills and credentials today's higher education administrators need to help their institutions and students succeed.

### Student Learning Outcomes

- Students will demonstrate holistic understanding of how college affects diverse undergraduate students, including student development theories on psychosocial, cognitive, moral, identity, authorship, self-efficacy and other related indices.

Total Credit Hours: 12
Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Student Learning Outcomes

• Students will demonstrate critical reasoning skills in their discussions of clinical and research material about Latinos in two courses: EPS 689 Psychological Interventions with Hispanic/Latino Populations, and EPS 687 Latino Youth and Families.
• Students will become knowledgeable about empirically supported interventions for mental disorders among Latino clients.
• Students will improve their Spanish-language proficiency for use in professional counseling settings.

Executive Ed.D. in Higher Education Leadership

http://sites.education.miami.edu/higher-education-leadership-et-ed-d/

Overview

The Higher Education Leadership program, which offers a Doctor of Education degree (Ed.D.), is committed to preparing students for senior leadership positions in colleges and universities, state and federal agencies, and other educational organizations. The Executive Ed.D. program is guided by a practitioner-scholar model that combines theoretical offerings with application to practical higher education problems. Students focus on areas of special interest and choose dissertation projects that address issues confronting the contemporary higher education workplace.
The Executive Ed.D. is designed to meet the needs of working professionals. Courses are offered on weekends, and a cohort design allows students to develop meaningful relationships, support one another, and learn from the diverse experiences of fellow educators.

The curriculum emphasizes the impact of theory and empirical evidence on administrative, organizational, and policy contexts in post-secondary education. Unique to the University of Miami Executive Ed.D. in Higher Education Leadership is its component in enrollment management, a comprehensive strategy that promotes the seamless integration of administrative responsibilities to efficiently and effectively meet institutional needs and support student success.

Admission Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Education (Ed.D.)
In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ed.D. program will include the following:

• letters of recommendation should address the applicant's academic potential;
• available student space in the program; and
• admissions interview.

International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

### Mission

The Executive Ed.D. Program in Higher Education Leadership prepares students for senior-level administrative, academic, policymaking, and other leadership roles in both public and private spheres of higher education. To nurture effective leaders, our emphasis is on data-driven decision-making. Grounded in research, theory, applications to daily practice, and enrollment management, our intensive weekend cohort format allows working professionals with master's degrees to retain full-time careers while earning a Doctor of Education.

### Goals

Students emerge with the knowledge, skills, versatility, and creativity for solving problems, taking advantage of opportunities, and leading change in a range of educational settings.

### Student Learning Outcomes

- Students will grasp the basics of social science research on issues in higher education and demonstrate skills in asking effective research questions, developing sound methodology and conducting appropriate analyses.
- Students will effectively apply knowledge of leadership theory, research and best practices to problems of practice in higher education.
- Students will master all doctoral dissertation components as demonstrated through communication effectiveness – written and oral deliveries – at quality academic and professional levels.

### M.S.Ed. in Community and Social Change

http://sites.education.miami.edu/community-and-social-change-m-s-ed/
Overview
The Community and Social Change Master’s program is a 30-36 credit program designed to prepare a new generation of creative leaders for the not-for-profit sector who are knowledgeable in the research, theories, and practice of individual and social well-being. The vision of the program is to be a hub for innovative and applied leadership in community well-being and social change. The mission of the program is to prepare globally aware leaders, researchers, and agents of change who create, inspire, and engage community organizations to foster well-being in diverse community settings. The program is designed to develop community leaders who can help understand and address the real challenges faced by local communities in a multicultural and global context. The program is designed to accommodate a variety of students by offering courses in a unique format that incorporates the following domains:

1. Core theory and skill-building coursework,
2. Core research coursework,
3. Experiential field experience (practicum), and
4. Capstone requirement (Independent project).

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)
In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For Community and Social Change (EPS): Professionals who have worked full-time for at least three years in a not-for-profit setting may apply for a waiver of the GRE requirement. Please contact the program directly for conditions governing this waiver.

International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission

The mission of the program in Community & Social Change (C&SC) is to prepare globally aware leaders, researchers, and agents of change who create, inspire, and engage community organizations to foster well-being in diverse community settings.

Goals

Program objectives include:

• Produce students who understand the constructs of well-being and how to apply them in community-based work settings;
• Produce students with an awareness of their values and how these impact their work in communities, as well as students who can critically think about and evaluate community based organizations, community and human services and programs; and
• Produce students with skills that translate across diverse settings and a basic understanding of emerging technology as it relates to community and social change efforts.

Student Learning Outcomes

• Students will demonstrate an awareness of their values and assumptions and be able to think analytically, logically and critically about social problems and solutions.
• Students will demonstrate in-depth knowledge of the theories and practices of community and social change by the time they graduate.
• Students will demonstrate an understanding of multicultural settings and the components necessary to work with competence in diverse settings.
• Students will demonstrate an ability to organize and communicate information effectively and incorporate technology and digital media.

M.S.Ed. in Counseling

http://sites.education.miami.edu/marriage-family-therapy-m-s-ed/

Overview

Programs offered in counseling are characterized by intensive clinical supervision by faculty members in an on-campus clinic, by strengths in the areas of family systems and couples' therapy, and by the rich multi-ethnic composition of the community, students and clients.
Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission

To prepare students for professional practice at the Master’s level in Mental Health Counseling (MHC), and Marriage and Family Therapy (MFT) through the integration of theory, research and skills derived from science-based education.

Goals

The Master’s program prepares students to function as culturally competent counselors to address the mental health needs of a diverse client population.

Student Learning Outcomes

- Our counseling students will demonstrate knowledge of DSM-5 (Diagnostic and Statistical Manual of Mental Disorders- 5th Edition) symptom criteria for mental disorders. They will accurately identify clinical symptoms and provide the corresponding diagnosis based on DSM-5 criteria.
- Students are expected to demonstrate competence in developing case conceptualizations. Specifically, students should be able to incorporate theories in developing comprehensive case conceptualizations of practicum patients (patients treated at our on-campus training clinic).
- Students will demonstrate knowledge in the application of ethical guidelines governing the practice of mental health counseling.

M.S.Ed. in Higher Education Administration

http://sites.education.miami.edu/higher-education-administration-institutional-research-and-policy-analysis-m-s-ed/

Overview

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, and Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today’s challenges from a broad-based, highly informed perspective.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants
whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;

- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Curriculum Requirements
Enrollment Management Concentration
The Enrollment Management concentration (33 credit hours), the product of a unique collaboration between the School of Education and Human Development and the Division of Enrollment Management, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the Miami Business School. Opportunities abound for integrating research and theory in daily practice.

Mission

The Higher Education Administration Program leading to a Master of Science in Education prepares students to begin careers at colleges and universities, and professionals to acquire career-advancing knowledge and skills. The program’s three tracks are based in enrollment management, which uses theory, research, collaboration across office lines and strategic decision-making to effect student success. In emphasizing hands-on experiences, the tracks – Enrollment Management, Student Life & Development, and Institutional Research & Policy Analysis – instill comprehensive understanding of today’s higher education.

Goals

Our program works to impart the ability to apply theory and research to practice in complex, multicultural environments; to make sound decisions; and to obtain, at minimum, middle management positions in the field.

M.S.Ed. in Research, Measurement and Evaluation

http://sites.education.miami.edu/research-measurement-evaluation-m-s-ed/

The curriculum of the M.S. Ed. in RME is structured around three components: (A) a core set of 24 credits (8 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of elective coursework; and (C) a comprehensive exam occurring upon the completion of the 24 credits of required coursework. The specific details of the curriculum are given below.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.
Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Comprehensive Exam
Each student must successfully pass a comprehensive exam that covers the content of the core 24 credits. This exam assesses the student’s competency in these core areas of research methodology and use of statistical software, and is based on content that is aligned with the material covered in the core 24 credits.

Total Credit Hours 30

1 Students work with faculty member(s) to select from a large number of graduate courses relevant to the students’ interests and professional goals. Appropriate courses may be related to advanced statistical modeling or other content areas.

2 Upon the approval of your academic advisor, you can take the classes from other departments.

This is a sample Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

### Mission

The mission of the RME Master’s program is to provide students with the requisite training in the application of statistical and measurement methodologies to be a data analyst, research coordinator, or measurement advisor in a variety of professional (e.g., educational assessment) and/or academic (e.g., doctoral student in a related program) settings.

### Goals

**Student Learning Outcomes**

- Students will demonstrate adequate mastery in the advanced statistical and measurement methodology.
- Students will demonstrate adequate mastery for conducting statistical analyses and database management using the R program.

### Ph.D. in Community Well-Being

[http://sites.education.miami.edu/community-well-being-ph-d/](http://sites.education.miami.edu/community-well-being-ph-d/)

### Overview

The program in Community Well-Being trains community-engaged action-researchers committed to promoting social justice through rigorous theoretical analysis and community-based research. The program is grounded in the discipline of community psychology and focuses on...
community-engaged scholarship that involves the researcher in a mutually beneficial partnership with the community. The program prepares scholars for careers in academia, research, and public policy.

Admission Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs);
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted; and
• International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS).

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ph.D. program will include the following:

• letters of recommendation should address the applicant’s academic potential;
• available student space in the program;

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

**Total Credit Hours**: 72

---

**Mission**

The mission of the program is to produce community-engaged scholars who promote individual, relational, and collective well-being through community-based research and action.

**Goals**

**Student Learning Outcomes**

- Students will demonstrate a breadth of knowledge and understanding of the main perspectives, theoretical approaches, and meta competences in community psychology.
- Students will demonstrate knowledge and skills with research designs and methods used in community research.
- Students will demonstrate a deep understanding and mastery of ONE SPECIFIC AREA OF FOCUS that contributes to scholarship and generates new knowledge relevant to community psychology and community well being.

**Ph.D. in Counseling Psychology**

http://sites.education.miami.edu/counseling-psychology/

**Overview**

The Counseling Psychology Program has been fully accredited by The American Psychological Association since 1989 and has a proud tradition of preparing students as scholars, clinicians. The program is firmly committed to the foundational values of the discipline of counseling psychology, including its emphasis on prevention, optimal human development, and the promotion of individual, family, and community well-being. The program strives to prepare students who will make a difference in the world through research, scholarship, and reflective practice. The mission of the program...
is to nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multicultural complex world.

**Application Requirements**

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

**Doctor of Philosophy (Ph.D.)**

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ph.D. program will include the following:

- letters of recommendation should address the applicant's academic potential;
- available student space in the program;
- For EPS: Counseling: receipt of completed applications by the predetermined cut-off date. Please reference the SEHD web site, as doctoral applications are reviewed once each year.

**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

**Honor Code/Handbook of Policies and Procedures**

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development's Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

**Sample Plan of Study**

This is a sample Plan of Study. Please note that students may be admitted with or without a Master's degree. The sequence shown is combined for all students, regardless of graduate coursework prior to admission. Students who have taken graduate coursework prior to admission can petition for course waivers of prerequisite courses taken. There is no limit to the number of waivers we accept. Petitions for course waivers are evaluated to determine whether the courses are (a) fully equivalent, (b) partially equivalent, or (c) not equivalent. Students who are able to waive out of courses may lower their time to graduation, depending on the number of courses waived. Students should meet with their academic advisor each semester to determine the appropriate course selection.

* Course taught in alternate years.

Mission

To nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multiculturally complex world.

Student Learning Outcomes

- Students will demonstrate an understanding of scientific knowledge in psychology and will be able to critically evaluate and conduct research relevant to the practice of counseling psychology.
- Students will demonstrate the ability to engage in competent clinical practice as scientist-practitioners.
- Students will demonstrate the ability to engage in ethical behavior and will be responsive to issues of diversity in multiple contexts.

Ph.D. in Research, Measurement, and Evaluation

http://sites.education.miami.edu/research-measurement-evaluation-ph-d/

The curriculum of the Ph.D. in RME is structured around six components: (A) a core set of 36 credits (12 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of a research apprenticeship, in which students conduct mentored research under the supervision of RME faculty members; (C) 6 credits of field experience in educational research, in which students play active roles in the design and analysis of an applied research or evaluation projects; (D) the doctoral qualifying exam; (E) 12 credits of the doctoral dissertation and (F) 6 credits of electives (12 credits of electives for students who do not hold a master degree).

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ph.D. program will include the following:
• letters of recommendation should address the applicant's academic potential;
• available student space in the program;

**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

**Honor Code/Handbook of Policies and Procedures**

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

</tbody>
</table>

**Research Apprenticeship 6**

For a minimum of 6 research apprenticeship credits, students work under the mentorship of RME faculty members (or approved faculty members outside of RME) on original studies pertinent to research, measurement, and evaluation. It is expected that the work completed during the apprenticeship culminates in a manuscript that is suitable for publication in an academic journal. The 6 credits of apprenticeship are documented as two 3-credit blocks of EPS799 (Advanced Individual Study II). Form for registering for EPS799 can be found on the SEHD website under the resource tab; and the research apprenticeship must be completed prior to the commencement of dissertation hours (EPS830).

**Field Experience in Educational Research 6**

Students must complete a minimum of 6 credits in field experience related to educational research. The field experience involves providing methodological assistance to a research or evaluation project at the University of Miami or other approved organization (e.g., the evaluation division of Miami-Date County Public Schools). The nature of the field experience must be approved by the student's advisor prior to commencing the credit hours. The field experience credits are currently documented as EPS712.

**Doctoral Qualifying Exam**

Students must successfully pass the doctoral qualifying exam prior to the commencement of the doctoral dissertation.

**Dissertation Hours 12**

Total Credit Hours: 66-72

1. EPS 799 (Advanced Individual Study) and EPS 712 (Field Experience in Educational Research) can be repeated over and above the credits fulfilling a student’s apprenticeship (6 credits) and field experience (6 credits) requirements.

2. 6 credits for students with a Master degree; 12 credits for students without a Master degree

3. Upon the approval of your academic advisor, you can take the classes from other departments.

4. Additional courses may be substituted upon approval from a student’s academic advisor. These options include a variety of graduate courses in the fields of computer science, psychology, education, and other areas of interest.

This is a sample Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

## Mission
The mission of the RME doctoral program is to provide students with the requisite training in the application of statistical and measurement methodologies to conduct original research in the fields of educational research and measurement methodology, and to serve as experts in the areas of research design, data analysis, and measurement.

## Goals
### Student Learning Outcomes
- Students will demonstrate mastery of the computer programming skills that is required for conducting research project using computer simulation in R.
- Students will conduct original research in the field of statistical and measurement methodology.
- Students will demonstrate the ability to provide methodological consultation.

## Kinesiology and Sport Sciences

http://sites.education.miami.edu/kin/

Dept. Code: KIN

## Programs
### Doctor of Philosophy (Ph.D.)
- Exercise Physiology

### Master of Science in Athletic Training (M.S.A.T.)
- Athletic Training

### Master of Science in Education (M.S.Ed.)
- Applied Physiology
- Sport Administration

## Masters Programs in Kinesiology and Sport Sciences
- M.S. in Athletic Training (p. 2135)
- M.S.Ed. in Applied Physiology (p. 2139)
Doctoral Programs in Kinesiology and Sport Sciences

- Ph.D. in Exercise Physiology (p. 2149)

KIN 601. Organization and Administration of Sport Programs. 3 Credit Hours.
Administrative and organizational procedures and problems specific to athletic administration, recreation and leisure sports administration, and physical education.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

KIN 602. Fiscal Management in Sport Administration. 3 Credit Hours.
Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 603. Principles of Sport Marketing. 3 Credit Hours.
This course will focus on the vast world of sports marketing. The basic principles of marketing and marketing management will be introduced and integrated with application of these principles to sport and sports-related organizations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 604. Essential Leadership Skills in Sport. 3 Credit Hours.
This course will examine the concept of leadership as it pertains to sports and other professions. Various leadership and management skills will be included with a focus on practical applications in a work environment. Theory and self-assessment strategies will be incorporated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 605. Sport Sponsorship and Promotion. 3 Credit Hours.
This course is designed to provide a detailed examination of the relationship between sport and corporate sponsorship. Topics covered will include the theoretical premise of sponsorship, alignment marketing, strategic communication through sponsorship, sponsorship sales and service, determining the value of sponsorship, and evaluation of sponsor activities. Individual athlete endorsement and mega-event sponsorship such as the Olympics will be examined in-depth. Objectives, risks, and benefits from the property or platform offering a sponsorship and from the sponsoring organization will be considered.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 606. Ethical Decision Making in Sports. 3 Credit Hours.
This course will examine ethical decision-making in a variety of environments with an emphasis on sport professions. Real and hypothetical situations will be utilized, and the course will combine theory with practical application. The case method in sport ethics will be incorporated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 607. Legal Aspects of Sports. 3 Credit Hours.
Legal liability, personal injury, negligence and other related legal aspects of sports and exercise science.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 608. Advanced Globalization in Sport. 3 Credit Hours.
This course will address the intertwined relationship between globalization, sport, and development from a critical global perspective. This course highlights the extent to which contemporary sport cultures are the result of an interplay between local and global forces. We will explore the international character of professional and amateur sports including international competitions, league expansions beyond national boundaries, and the movement of athletes. Course topics include international sport organization, international competition, sport governance, international dispute resolution, international sports law, and new media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 609. Advanced Sport Information Management. 3 Credit Hours.
This course examines the complex fields of sport communication. Students will investigate the unique, symbiotic relationship that exist between sport and the media; examine various theoretical framework (e.g., agenda set, hegemonic, uses and gratification, elaboration likelihood model) that are pertinent to developing an understanding of the sport/media complex.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

KIN 610. Event Management. 3 Credit Hours.
This course is designed to introduce students to principles and practices of planning, funding and managing facilities associated with sports participation including professional sport venues, college sports, parks, recreational sport and health/fitness clubs. Students will gain an understanding of promoting, marketing, and maintaining sport facilities.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 611. Field Experience in Sport Administration I. 1-3 Credit Hours.
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: PRA.
Grading: GRD.
Typically Offered: Fall.

KIN 612. Field Experience in Sport Administration II. 1-3 Credit Hours.
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: SEM.
Grading: GRD.
Typically Offered: Fall & Summer.

KIN 613. Field Experience in Sport Administration III. 1-3 Credit Hours.
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.

Components: PRA.
Grading: GRD.
Typically Offered: Summer.

KIN 615. Practical Approach to Motivation and Ethical Decision Making. 1-3 Credit Hours.
A critical study of practical problems of professionals in Exercise and Sport Sciences.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 616. Advanced Sport Governance. 3 Credit Hours.
This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.

Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

KIN 617. Creative Approaches to Problem Solving and Conflict Management. 3 Credit Hours.
This hands-on course will examine the concepts of problem solving and conflict management from both personal and organizational perspectives. Students will have the opportunity to study in-depth both of these concepts (and the relationship between them) through a combination of lecture, theory, individual and group activities, readings, practical exercises, and self-assessment tools.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 619. Advanced International Club/Sport Management- Brazil. 3 Credit Hours.
This course is designed to examine the various sport-based organizations that comprise the sport industry in Brazil. Examined areas will include products/services offered, marketing opportunities and challenges, public relations, economic impact on the local community, physical facilities, internship/employment opportunities, strengths, weaknesses, opportunities, threats, and the unique aspects and challenges of sport in Brazil. The class will also compare and contrast sport in the United States and sport in Brazil.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 620. Contemporary Issues in Sport. 3 Credit Hours.
Problem identification, investigation, analysis, and problem solving approaches in Kinesiology and Sport Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 621. Advanced Systemic Exercise Physiology. 3 Credit Hours.
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular and the pulmonary systems. Students will be able to understand and interpret terminology and research literature published in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 623. Food Science and Management Principles. 3 Credit Hours.
A comprehensive course designed to provide knowledge of food chemistry, safety, service and management.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 624. Athletic Training Techniques - Manual Therapy. 3 Credit Hours.
This course will introduce theoretical concepts and hands-on techniques to mobilize joints and soft tissue in order to modulate pain, facilitate healing, and restore mobility and function.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 625. Applied Biomechanics in Athletic Training. 3 Credit Hours.
In-depth study of the human skeletal and muscular systems with a focus on the mechanics of movement as related to physical activity, sports, and athletics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 626. Nutrition Diet and Exercise. 3 Credit Hours.
Students will learn the latest concepts in weight management, physical fitness, and healthy eating. They will be able to understand the complex interplay of carbohydrates, protein, fat, water, fiber, vitamins, and minerals in the nourishment of their body and overall well-being. They will also examine serious health issues such as the use/misuse of anabolic steroids, weight control, and eating disorders.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 627. Community and Global Nutrition. 3 Credit Hours.
This course is designed to provide an overview of nutritional issues & related aspects of infectious and chronic disease impacting the health and performance of athletes, individuals & groups domestically & globally. Economic and environmental issues which impact nutritional status and deficiency in the Western societies & third world countries will be addressed. An international and cultural perspective on food, eating behaviors and customs will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 628. Basic Statistics in Kinesiology and Sport Sciences. 3 Credit Hours.
Introduction to basic statistical techniques commonly used in the Exercise and Sport Sciences. Designed as a prerequisite for KIN 646 (Formally ESS 646).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

KIN 630. Cellular Exercise Physiology. 3 Credit Hours.
The course examines Bioenergetics and Muscular Physiology in training and detraining. Topics include the energy systems and their functional application during exercise, muscle structure and function, cellular and sub-cellular modifications of organelles and contractile mechanisms as result of training and physiological bases of training techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 631. Laboratory Techniques in Functional Evaluation of Skeletal Muscle. 3 Credit Hours.
This course examines the theories of data collection and collection techniques used to evaluate musculo-skeletal and neuromuscular function. The application of both computerized and non-computerized collection systems for performance evaluation is covered. The course is also designed to establish a clear linkage between the acute and chronic musculo-skeletal and neuromuscular changes that occur during exercise and the laboratory methods used to assess those changes. Collection theory, musculoskeletal and neuromuscular function, methods of strength evaluation, anaerobic power testing, electromyography, and a number of other functional parameters will be discussed.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

KIN 632. Sports Injuries: Prevention and Treatment. 3 Credit Hours.
Prevention, diagnosis, treatment and rehabilitation of sports injuries. Anatomical and Kinesiological application to sports injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 634. Integrative and Functional Nutrition. 3 Credit Hours.
This course will discuss integrative and functional medicine and how it emerged. This course will analyze the healthcare models that include personalized care and the whole-person perspective. In this course we will discuss various factors that influence disease including diet and nutrition, stress, activity level, pharmaceuticals and environmental pollutants. Alternative approaches to treatment will also be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 635. Clinical Biomechanics for Sport Medicine Professionals. 3 Credit Hours.
A lecture course stressing biomechanics of joints and pathomechanics of orthopedic injuries.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 636. Strength and Conditioning I. 3 Credit Hours.
This course serves as the practical/technical foundation for major compound movements and Olympic lifts. It also provides comprehension of movement specific dynamic warm-ups, advanced stretching techniques, methods for identifying movement compensations and underlying issues as well as evaluating Olympic techniques. Due to the practical nature of the course, all the sections of this course are held in the Hecht Athletic Center (HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 637. Strength and Conditioning II. 3 Credit Hours.
This course is the continuation of Strength and Conditioning I (KIN 536). It provides more advanced Olympic weightlifting techniques and ballistic training, alongside a continued focus on corrective exercises to ensure a reduced risk of injury. The course also provides an introduction to exercise programming including specialized training techniques for athletic development. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center (HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 638. Nutrition during the Lifecycle. 3 Credit Hours.
This course is designed to examine the changes in nutrition requirements during the life cycle, particularly as related to growth, development and aging. Psychosocial, cultural, and economic issues related to food intake at various life stages will be reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 639. Dietary Supplements and Human Performance. 3 Credit Hours.
Evidence-based examination of supplements, food phytochemicals, and their relation to disease & performance.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 640. Exercise Psychobiology. 3 Credit Hours.
This course is designed primarily for graduate level Exercise and Sport science students who are interested in the biochemical basis of personality as affected by exercise and sport. The course involves interdisciplinary integration and comprehensive reviews of ancient and current literature dealing with exercise, stress, emotional, personality, immune system function and neuroendocrine function.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 641. Neurophysiology in Exercise Science. 3 Credit Hours.
Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student's ability to convey information using the written word.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 642. Strength and Conditioning. 3 Credit Hours.
A comprehensive overview of strength and conditioning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 643. Professional Training and Counseling for Intergrative Health. 3 Credit Hours.
Students will learn the integrative health care model, theories, behavior change models, approaches & techniques used in nutritional counseling to help athletes, individuals and groups implement and sustain behaviors, lifestyles, and attitudes to achieve optimal health. Lecture & personal application will allow for the development of skills in each of these areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 645. Therapeutic Lifestyle to Combat Chronic Disease. 3 Credit Hours.
This course presents an in-depth examination of chronic conditions and medical problems commonly observed in athletes. Students will learn about the etiology of the medical condition, how exercise affects the condition, how nutrition affects the condition, and the most recent therapeutic treatments prescribed for the condition.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 646. Elite Conditioning I. 3 Credit Hours.
Elite Conditioning I provides an introduction to evaluation techniques catered specifically to the athletic population including tests for strength, power, speed, agility, balance and stability. The courses also provides instruction on how to apply these evaluations to their respective sports/positions. These evaluation techniques provide data that students will use in the process of corrective exercise prescription. Students are taught how to implement corrective strategies to improve athletic performance. Due to the practical nature of the course, all sections of this course are held in the Hecht Athletic Center(HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 647. Elite Conditioning II. 3 Credit Hours.
Elite Conditioning II is the continuation of Elite Conditioning I (KIN 546). This course provides students with an understanding of the design and implementation of periodized conditioning programs for athletes based on the testing, evaluation, and applications to specific sports learned in Elite Conditioning I. The course focuses on speed agility and quickness for sports. It also includes practical implementation of ballistic, plyometric, speed, and conditioning drills emphasizing evidence based methods and training techniques. Due to the practical nature of the course, all sections of this course are held in Hecht Athletic Center(HAC).
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 649. Nutrition Assessment and Lab. 3 Credit Hours.
Application of the principles of normal and therapeutic nutrition, nutrition assessment, evaluation and intervention as related to sports performance and the management and treatment of disease states. Laboratories will allow for the development of skills in each of these areas.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.
KIN 650. Nutritional Biochemistry. 3 Credit Hours.
To learn the fundamental biochemical structure and pathways governing nutrient intake and utilization. Students will learn how major forms of nutrients (macro-nutrients, vitamins, minerals and trace elements) are processed and utilized by different organs with a particular emphasis on muscle metabolism. Students will also learn how to relate their newly acquired knowledge to health and disease outcomes with focus on lifestyles disease related to metabolism such as diabetes and obesity.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 655. Medical Nutrition Therapy. 3 Credit Hours.
The role of nutrition in the prevention and treatment of various disease states including diabetes, cardiovascular disorders, endocrine and gastrointestinal disorders, enteral feeding, renal disease, cancer and AIDS/HIV, and weight management. This course instructs on the use of the Nutrition Care Process for assessment and documentation.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 657. Diagnostic Imaging Techniques in Sports Medicine. 3 Credit Hours.
This course is designed as an elective for undergraduate KIN students or graduate students. The basic physics of radiological imaging will be covered including radiology, fluoroscopy, CT scan, ultrasound, MRI, and nuclear medicine including image archiving. Normal anatomy will be compared to the corresponding radiographic anatomy. Common sports injuries will be evaluated by multiple radiographic modalities and will be correlated with the clinical condition. Discussion will include bony pathology as well as soft tissues such as ligaments, tendons, and menisci.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 661. Facility Management. 3 Credit Hours.
Facility management provides students with an understanding of fitness entrepreneurship, giving students a comprehensive understanding of the, laws, regulations, polociese, and work involved in setting up a fitness facility such as a gym, wellness center, or athletic training center. Students are responsible for developing a viable sports or fitness complex including all aspects of administrative and facility management.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 662. Fitness Facility Management II. 3 Credit Hours.
Fiscal management as related to athletic sports administration, recreation and leisure sports administration, and physical education.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 663. Foundations of Athletic Training. 3 Credit Hours.
This course will cover foundational knowledge in Athletic Training with an emphasis on health promotion and injury and disease prevention. Public Health and Epidemiology, Nutrition Health and Wellness, and basic principles of Exercise Physiology will be covered. Students will be required to complete an IPE service learning project with another health professional to promote health, wellness, or physical activity research, practice, and/or policy on campus or at the community, state, or federal level. Prerequisite: American Heart Association BLS CPR/AED certification for the Health Care Providers (or approved equivalent).

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 664. Orthopedic Assessment 1: Pathophysiology of Injuries. 3 Credit Hours.
This course provides the student with an analysis of the etiology, pathology, and clinical science of muscular and skeletal diseases, disorders, and conditions. An introduction to clinical/laboratory assessment techniques, basic injury management, and knowledge of common imaging and surgical procedures are presented.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 665. Orthopedic Assessment 2: Examination of the Musculoskeletal System. 3 Credit Hours.
This course will prepare students to examine a patient with a musculoskeletal condition by obtaining a pertinent history from the patient, performing relevant systems review, and by selecting appropriate diagnostic tests and measures. The student will be able to synthesize examination data to complete the orthopedic evaluation and engage in the diagnostic process.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 667. Elements of Sports Psychology. 3 Credit Hours.
Introduction to the study of sport and exercise psychology including theory, current research and practical application.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 668. Developmental Sports Psychology. 3 Credit Hours.
Examination of the concept of sport psychology which includes but is not limited to performance, enhancement, student performance and academic application.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

KIN 669. The Foundations of Exercise Programming. 3 Credit Hours.
Students will learn various assessments of Health and Wellness, and discover how to most effectively prescribe exercise strategies to treat the diagnosed needs of an individual.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 670. Advanced Programming. 3 Credit Hours.
Advance programming allows students to dissect sports by movement, metabolism and limitation. The course investigates current trends and evidenced based applications of specific training techniques for optimal sport performance. Students will perform complete sports analysis and develop periodized programs for major sports.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 671. Sport Industry in South Florida. 3 Credit Hours.
This course will examine the various sport based organizations/events that are part of the sport industry in South Florida. Study of these organizations/events will include (a) products/services produced, (b) organizational structure, (c) economic impact on the local community, (d) key management personnel, (e) physical facilities, and (f) internship/employment opportunities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 673. Advanced Sport Governance. 3 Credit Hours.
This course provides the student with an examination of the governing organizations of sport at the youth, secondary, intercollegiate, professional, international, sport specific and Olympic levels. In addition, policy development in sport management will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

KIN 677. Advanced Nutrition for Health and Fitness. 3 Credit Hours.
This course presents an in-depth study of the nutritional concerns of today's Recreational and competitive athlete. Topics include dehydration, classic carbohydrate loading, protein needs, ergogenic aids, and more. State-of-the-art research in the field is provided. This is also a writing intensive course. Thus, writing skills will represent an integral part of one's grade.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 678. Pharmacology for Allied Health Professionals. 3 Credit Hours.
The study of drug families and drugs in common use across spectra of age, illness, disease, and disability. Students will understand body systems treated with current pharmaceuticals over-the-counter (OTC) medications, and neutraceuticals. Actions, key adverse effects, and influences on individuals undergoing physical activity will be emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 679. Principles of Exercise Prescription/Assessment: Cardiovascular. 3 Credit Hours.
This course presents a comprehensive overview of the physical, physiological and metabolic responses of the human body to exercise testing and training both in health and disease. The successful student will gain an understanding of the process involved in prescribing safe and effective therapeutic exercise in healthy individuals as well as patients with heart and lung disease, diabetes and obesity. An overview of environmental and legal considerations in the prescriptive process will also be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 680. Principles of Exercise Prescription: Neuromuscular. 3 Credit Hours.
An examination of the scientific bases of modern training techniques designed to optimize performance, their functional application and potential impact on performance in sport and everyday activity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 681. Development and Maturation of Athletes. 3 Credit Hours.
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes as it impacts physical performance. Additionally, students will learn the bases of pediatric exercise physiology in order to understand the concepts of motor development, strength, aerobic and anaerobic performance in the pediatric population.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 682. Clinical Pathology and Immediate Primary Care. 3 Credit Hours.
This course will focus on the pathology of non-orthopedic conditions including medical emergencies. Students will be able to recognize common injuries and illnesses, provide immediate treatment interventions, and make medical referrals and transport decisions when necessary. Pre-requisite: KIN663 and Current AHA BLS CPR/AED certification for the Health Care Providers (or approved equivalent as determined by ECC requirements from the BOC).
Prerequisite: KIN 663.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 684. Obesity, Metabolic Disease, and Inflammation. 3 Credit Hours.
The focus of this course is on the integrative neurophysiological functions that regulate and influence obesity, metabolic disease, and inflammation. Students will be able to understand the role that chronic inflammation plays in the pathology of disease. A combination of lecture, critical reading, and group discussion will be utilized to explore the underlying basis for metabolic abnormalities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 685. Advanced Topics in Kinesiology and Sport Sciences. 3 Credit Hours.
This course will provide a synthesis of essential concepts in specialty subjects relevant to one’s field of interest.
Components: THI.
Grading: GRD.
Typically Offered: Spring & Summer.

KIN 686. Exercise Prescription/Assessment Laboratory. 3 Credit Hours.
This course presents an overview of the laboratory techniques used to assess cardiovascular endurance and general fitness, pulmonary function and anaerobias observed during competition.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

KIN 687. Laboratory Experience in Sports Nutrition. 3 Credit Hours.
This laboratory class provides case study analyses and computerized nutrient analysis systems designed to evaluate nutrition and hydration needs of the recreational and competitive athlete. From urinalysis and blood work, to body composition and computerized nutrient data base systems, this laboratory provides a clinical approach to evaluating the nutrition status of the exercising individual. Corequisite: ESS 577.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 688. Advanced Gross Anatomy in Kinesiology and Sport Sciences. 3 Credit Hours.
Human dissection of the major muscles, arteries, and nerves of the body. This course is held at the Medical Campus, cadaver laboratory. Special consideration is given to injury sites in sports such as the knee, shoulder, elbow, neck and spinal areas. Students are required to pay a $100 laboratory fee for the class. This course is to be taken by Athletic Training majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 689. Directed Readings in Kinesiology and Sport Sciences. 3 Credit Hours.
Directed Readings focusing on research and contemporary trends in the field.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 690. Special Topics in Kinesiology and Sport Sciences. 1-3 Credit Hours.
This course is designed for students wishing to focus on a specific area of study within the umbrella of the Kinesiology and Sport Sciences curriculum. Students will be given supervision and support in a direction relevant to their needs and interests in a structured setting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 698. Professional Training and Counseling for Integrative Health. 3 Credit Hours.
Current research in nutrition and nutritional care, nutrition profession, ethics and roles in food service, clinical and community. Seminars designed to cover state-of-the-art overview of current and emerging topics will be presented by invited outside guest speakers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 699. Advanced Programming for Endurance Athletes. 3 Credit Hours.
This course provides students with training techniques to improve aerobic capacity, endurance, and lactate threshold for optimal performance. Students will review evidenced based principles of sports nutrition, strategies to ensure proper hydration, thermoregulation, and fuel (substrate) availability during prolonged exercise as well as develop programs for competitive sports including triathlon, marathon, and cycling.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

KIN 702. Athletics in the United States. 3 Credit Hours.
An Assessment of athletics in the United States. Focus on historical perspectives, contemporary issues, interface with international athletics, and future trends.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 704. Recreation in the United States. 3 Credit Hours.
An assessment of recreation and leisure in the United States. Focus on past, present, and future trends, problems, and issues.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

KIN 710. Advanced Adolescent Growth and Maturation. 3 Credit Hours.
This course is an in-depth study of pediatric exercise physiology with special emphasis on growth, maturation, physical activity, and performance. Topics include a comprehensive summary of biological growth and maturation, processes that impact physical performance. Additionally, students will learn the basis of training pediatric populations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 712. Applied Sport Psychophysiology. 3 Credit Hours.
The study of the physiological effects of acute vs. chronic training on homeostatic function, musculoskeletal systems, energy system function, cardiovascular system, and the pulmonary system. Students will be able to understand and interpret terminology and research literature published in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
KIN 714. Therapeutic Interventions. 3 Credit Hours.
Students will acquire the theoretical knowledge necessary for the clinical application of therapeutic exercise, modalities, and evidenced based rehabilitation programs. Principles of therapeutic exercise, open and closed chain exercise, muscle re-education, and special therapeutic techniques such as aquatic therapy. In addition, students will apply specific physiological effects, therapeutic indications, and contraindications associated with thermal, mechanical, electromagnetic, and acoustic modalities.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 715. Evidence-Based Sports Medicine and Research Methods. 3 Credit Hours.
The student will learn the systematic approach to creating and answering clinical questions through review and application of existing research. Students will learn how to develop a relevant clinical question using a pre-defined question format, use standard criteria or developed scales to critically appraise the structure, rigor, and overall quality of research studies, and determine the effectiveness and efficacy of an athletic training intervention. Students will also learn the theoretical foundation of clinical outcomes assessment and the standard methods of outcomes assessment in athletic training clinical practice.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 716. Advanced Rehabilitation Techniques in Athletic Training. 3 Credit Hours.
This is an advanced athletic training course designed to enhance the athletic trainer's ability to plan and implement a comprehensive sports injury rehabilitation program based on the sequential events of musculoskeletal tissue healing. Discussion focuses on the development of a conceptual model for sports injury rehabilitation which incorporates rehabilitation phases, intervention goals, and progression criteria. Application of the problem-oriented approach to the management of athletic injuries is a predominant theme throughout this course.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 717. Applied Clinical Techniques in Athletic Training. 3 Credit Hours.
This clinical laboratory course focuses on athletic training skills utilized in the diagnosis and treatment of primary care of patients. Students will become proficient in utilizing diagnostic tools and tests. In addition, students will become proficient in wound care, suturing, initiating and maintaining appropriate intravenous (IV) therapies and the collecting, handling, and processing of blood specimens for analysis.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 718. Administration and Professional Development. 3 Credit Hours.
Concepts of legal liability, insurance, budget/financial management, human resources, inventory control, facilities design and maintenance will be addressed. This course will enable the student to understand reimbursement guidelines; understand medical delivery systems, health care policy, and legislation in the United States. In addition, students will learn the basics related to accounting, billing, coding, accounts payable, and risk management.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 720. Practicum in Athletic Training. 3 Credit Hours.
Clinical education and field experience in a healthcare setting. Students are assigned to a licensed health care professional who will serve as the student's preceptor. Students will learn alongside their preceptors as they are exposed to the role, and function of a health care provider while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on emergency preparedness and readiness through Simulation and Interprofessional Education. Prerequisite: KIN 663 Foundations of Athletic Training

Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 721. Independent Study 1: Clinical Internship Experience. 3 Credit Hours.
This elective internship course will allow students to seek a professional Athletic Training internship in a particular area of clinical interest under the supervision of a licensed/certified health care clinician.

Components: IND.
Grading: GRD.
Typically Offered: Fall.
KIN 722. Practicum in Athletic Training 2. 3 Credit Hours.
Clinical education and field experience in a healthcare setting. Students are assigned to a licensed athletic trainer who will serve as the student’s preceptor. Students will learn alongside their preceptors as they are exposed to the role and function of an athletic trainer while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on utilizing Interprofessional Education (IPE) and simulation to enhance physical evaluation and assessment skills. Prerequisite: KIN 720 Practicum in Athletic Training 1
Prerequisite: KIN 720.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

KIN 723. Independent Study 2: Research Experience. 3 Credit Hours.
This elective research experience course will allow students to pursue research in an area of particular interest under the supervision of a faculty member.
Components: IND.
Grading: GRD.
Typically Offered: Spring.

KIN 724. Practicum in Athletic Training III. 3 Credit Hours.
Clinical education and field experience in a healthcare setting. Students are assigned to a licensed health care professional who will serve as the student’s preceptor. Students will learn alongside their preceptors as they are exposed to the role, and function of a health care provider while practicing clinical skills with a variety of patient populations. In addition, students will meet for scheduled in-services and clinical labs with a focus on integrating athletic training knowledge and skills through Simulation and Interprofessional Education (IPE). Prerequisite: KIN 722 Practicum in Athletic Training 2
Prerequisite: KIN 722.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 725. Independent Study III. 1 Credit Hour.
This course is an advanced study of a particular theme or topic in the athletic training field such as students’ research topic, current issues of relevance to certified athletic trainers and other professionals in the sports health care professions. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 726. Practicum in Athletic Training IV. 3 Credit Hours.
Field experience at the athletic training setting through working with collegiate athletes to expose students to the role and function of athletic training as a certified athletic trainer and clinical instructor as well.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

KIN 727. Pract in Nutrition. 3 Credit Hours.
Planned supervised practice experience component in dietetic and nutrition practice of up to 900 hours shall provide the applicant with a broad spectrum of experiences in dietetics and Nutrition in clinical, community and food service to meet licensure requirements.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 735. Methods in Biomechanical Analysis. 3 Credit Hours.
Examination of methods of research, instrumentation, and quantitative application of kinematic and kinetic concepts in the biomechanical analysis of human movement.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 740. Neuropathology in Exercise Science. 3 Credit Hours.
Examination of the functions of the central, peripheral, and autonomic nervous systems in regulating exercise homeostasis and the structural and functional modifications to the systems through training. NOTE: This course is a writing intensive course. This means that all examinations and papers include a critical evaluation of the student’s ability to convey information using the written word.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 741. Aging: Physiological Changes and Their Implications of Training. 3 Credit Hours.
The physiological changes that occur due to aging and their impact on fall prevention, independence, and the application of prophylactic exercise prescriptions.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 742. Fundamentals of Cardiology. 3 Credit Hours.
This course represents an in-depth review and evaluation of the field of cardiology. Students must understand the etiology of coronary artery diseases, assessment techniques in the evaluation of cardiac pathologies, the latest risk factors, and most recent trends in treatment and rehabilitation. Phase I through Phase IV review of Cardiac Rehabilitation will be fully examined.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 743. Laboratory Experiences in Cardiac Rehabilitation. 3 Credit Hours.
This class provides hands-on clinical experiences in preparation of patient for testing, assessment of pre-existing medical conditions and risk factors as well as appropriate procedures for stress testing. Student will, in addition, have the opportunity to view Thallium stress tests, echocardiography and cardiac surgical procedures such as angioplasty and bypass surgery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 744. Interpretation of the Electrocardiogram. 3 Credit Hours.
This class will provide information of the electrophysiology of the heart, medicines used to improve heart function, and critical examination of waveform analyses in interpreting the electrocardiogram. Prerequisite: KIN 642 (Formally ESS 642) or permission of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 746. Research Methods in Kinesiology and Sport Sciences. 3 Credit Hours.
This Course reviews the approach and research methods used to evaluate quantitative research questions in the field of Kinesiology and Sport Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 747. Analytic Methods in Kinesiology and Sport Sciences. 3 Credit Hours.
Methods of analyzing research data in Kinesiology and Sport Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 755. Exercise Biochemistry. 3 Credit Hours.
This course presents an in-depth examination of the biochemical basis of exercise. Topics include carbohydrate and lipid metabolism at rest and during exercise, integration of metabolism, the use of stable isotopes in the characterization of substrate kinetics, and metabolic bases of fatigue. Both the instructor and the students will incorporate current peer-reviewed research in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 763. Seminar and Special Topics in Athletic Training. 3 Credit Hours.
Scenarios and subject matter that will help facilitate the student's transition to practice will be emphasized. There will be a focus on current issues and emerging topics and technologies in the healthcare profession. Students will prepare for class discussion by reviewing assigned readings from professional journals and other pertinent sources. Class sessions will consist of lectures, laboratories, and discussion sessions. Also, career development and responsibility topics such as leaderships, entrepreneurship, ethics, patient values, diversity and cultural competency.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
KIN 764. Athletic Training Clinical Field Experience. 6 Credit Hours.
This course is an immersive clinical education experience, where Athletic Training students under the supervision of a preceptor will demonstrate the ability to integrate knowledge and skills with clinical problem-solving while assuming professional like roles in various clinical patient care settings. Students will be required to post weekly reflections in an electronic journal and to attend scheduled webinars.
Prerequisite: KIN 722.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 765. Teaching Assistant Training in Kinesiology. 3 Credit Hours.
This course involves training and teaching assistant experience under the supervision of faculty. Students will have the opportunity to assist faculty in the teaching of workshops, clinical laboratory and/or undergraduate theory courses offered in the Kinesiology department.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 766. Research in Athletic Training. 3 Credit Hours.
This course is an advanced study of a particular theme or topic in the athletic training field including a research topic, current professional issues of relevance to certified athletic trainers and other sports medicine/allied healthcare professionals.
Prerequisite: KIN 715 and KIN 763.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 781. Issues Specific to Women's Health. 3 Credit Hours.
This course focuses upon clinical health issues relevant to women. Students will acquire a body of knowledge concerning the specific biological and physiological changes women experience from birth to maturity, and from the pre- to post menopausal state. Women will learn significant issues related to women's health and be able to make more educated decisions regarding their health and treatment options.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 782. Psychosocial Issues in Women's Health. 3 Credit Hours.
This course covers a broad perspective of women and their self-esteem, their femininity, and their role in family household. Attention will be paid to the historical, cultural, and anthropological development of women and their role in society. The influence of gender will explore several areas which include a) pregnancy, b) menopause, c) menstrual cycle, d) stress and career vs. family, e) depression, and f) body image.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 783. Sports Medicine for the Female Athlete. 3 Credit Hours.
This course focuses upon the physiological effects of exercise on the female athlete as it relates to her performance and health. Physiological differences between male and female will be examined as it impacts the women's performance abilities and potential. Gender specific problems regarding the exercising female will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

KIN 784. Energetics of Obesity and Weight Management. 3 Credit Hours.
This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition, and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

KIN 785. Neurological Mechanisms of Weight Regulation. 3 Credit Hours.
This course is designed to evaluate dieting, rebound effect, set point theory, brown fat, and adaptive thermogenesis, as they relate to the etiology of obesity. The course will cover a step-by-step approach in the recognition and management of the overweight patient. The course will also examine adipocyte morphology and the health implications of being overweight and obese. Students will examine the impact of both diet and exercise on long-term weight management.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
KIN 790. Strength and Conditioning Independent Study/Project. 3 Credit Hours.
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 791. Practicum in Kinesiology and Sport Sciences/Master's students. 1 Credit Hour.
The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Master’s projects.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 792. Optional Internship-Strength and Conditioning. 1 Credit Hour.
This 1 credit internship allows students to pursue professional internships in the field of strength and conditioning/fitness entrepreneurship. Students will be provided with contact information and a number of opportunities by Dr. Biagioli respective to their interests.
Components: SEM.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

KIN 793. Research Colloquium.. 1-3 Credit Hours.
This course presents graduate students with the theoretical and practical tools necessary for presenting their scientific research in an organized, logical, and analytical manner.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 794. Advanced Individual Study. 1-3 Credit Hours.
The Application for Admission to Individual Study Form will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 795. Graduate/Clinical Field Experience in Kinesiology and Sport Sciences. 1-3 Credit Hours.
Practical experience not ordinarily available through coursework sequences. Placement in a variety of settings, clinics, public and private voluntary agencies and schools. Supervised by a faculty member of the department.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 799. Special Project. 1-3 Credit Hours.
This course represents the capstone course in a students field and should represent a culmination of all information learned in class.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 800. Supervised Practicum. 1-3 Credit Hours.
Students will be engaged in supervised experiential learning designed especially for their entry into their field. The student will be supervised by an approved preceptor (industry professional, clinician, or researcher) for the practical application of previously studied theory. Practicum hours will vary based on the nature of the experience.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

KIN 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
KIN 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in ESS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

KIN 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 830. Pre-Candidacy to Dissertation Research. 1-10 Credit Hours.
Admission to doctoral program. Requires approval of advisor and department chair.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

KIN 835. Practicum. 1-2 Credit Hours.
The course presents graduate students with the theoretical and practical tools necessary for expanding their critical thinking and argumentative skills in order to present their scientific research results in an evaluative, logical and analytical manner. The course consists of weekly presentations of related literature, results, and findings on various Doctoral projects.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

KIN 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.
For doctoral students working on their dissertations.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

KIN 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the PH.D. Student, after the student has been enrolled for the permissible cumulative total in appropriate doctor al research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Athletic Training

Overview
This is a 60-credit program for people interested in Athletic Training.

To be a prestigious international student-centered academic program that provides the student with the flexibility to formulate an individual educational, clinical, and research plan.

The Athletic Training program at the University of Miami is a graduate professional program accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam.

Athletic Trainers (ATs) are health care professionals who render service or treatment, under the direction of or in collaboration with a physician. As a part of the health care team, services provided by ATs include injury and illness prevention, wellness promotion and education, emergent care, examination, and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence requirements and other important information regarding the requirements for completion of the Athletic Training degree.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.
Applicants must:

• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;

• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;

• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;

• provide a personal statement that addresses the mission and purpose of the program being applied to;

• resume;

• take part in an admissions interview (required by some programs); and

• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Athletic Training (M.S.A.T.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.A.T. program will include the following:

• B.A. or B.S. in exercise science/kinesiology or a related field,

• A minimum 3.0 cumulative GPA

• A minimum 297 GRE score and 4.0 Analytical Writing score. A waiver of the GRE requirement may be available. Please contact the program director for more information

• A minimum of 100 observation experience hours (volunteer hours or work hours) with an Athletic Trainer is required

• At least one of the recommendation letters above must be written by an Athletic Trainer

• An interview may be required. Applicants will be notified as appropriate; and

• Applicants must complete or be enrolled in the prerequisite coursework listed below prior to acceptance and/or enrollment (Please contact the Program Director for course equivalency information)

Required prerequisite coursework for admissions

At the undergraduate or graduate level

• Anatomy & Physiology (Separate or combined a minimum of 6 credits)

• Biology: Introduction with Lab

• Chemistry: Introduction with Lab

• Introduction to Physics

• Introduction to Statistics

• Psychology: Intro to Psychology or Sports Psychology (preferred)

In addition to the above courses, CPR Certification is required (AHA BLS for Healthcare Providers or equivalent as indicated by Board of Certification’s ECC list). Students must have proof of current certification before the start of classes and maintain certification throughout the program.

Recommended foundational coursework for admissions

The following courses are suggested foundational areas of knowledge that are included in the curriculum of the MSAT program. However, introductory courses in the areas below may provide the student with extra preparation for the rigorous graduate coursework of the MSAT program. Therefore, these courses are suggested but not required for admissions or for completion of the degree program:

• Nutrition: Introduction to Nutrition or Sports Nutrition

• Exercise Physiology

• Kinesiology and/or Biomechanics

• Care & Prevention of Athletic Injuries, Intro to Athletic Training, or Equivalent

Transfer of courses

Transfer of graduate credits previously earned from other accredited healthcare degree-granting programs is determined on a case-by-case basis. The Program Director and the appropriate course instructor(s) will review the transfer course syllabus to ensure the content match those of the program’s course and that all competencies can be identified. Credits can be transferred ONLY if they are less than six years old, were taken from a graduate degree program, and taken in an accredited institution. In addition, students must have earned a grade of B or better in the course.
**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

**Honor Code/Handbook of Policies and Procedures**

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development's Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

### Mission

To prepare students to be successful independent healthcare practitioners, immediately ready to assume the roles and responsibilities required to advance in the Athletic Training Profession.
Goals
1. Employ evidence-based strategies and practices
2. Gain diverse clinical experiences
3. Develop sound critical thinking skills
4. Utilize Administrative skills and knowledge to enhance best practices for patients and organizations
5. Be stewards of and advocates for the AT Profession
6. Value and employ Patient-Centered Care including cultural competency
7. Understand the AT’s role in public health education.
8. Be an active member of the IPE team

Student Learning Outcomes

• Educate and communicate with patients and stakeholders to enhance wellness and minimize the risk of injury and illness
• Implement and perform systematic, evidence-based examinations and assessments to formulate valid clinical diagnoses and determine patients’ plan of care
• Develop, implement, evaluate and update plans of care using evidence-based interventions to optimize patient outcomes
• Implement and perform appropriate emergency and immediate care procedures to prevent and reduce the risk of morbidity and mortality

M.S.Ed. in Applied Physiology
http://sites.education.miami.edu/exercise-physiology-m-s-ed/

Overview
This 30-credit program can be completed in one academic year. The program is designed to be flexible to allow students to tailor the curriculum to optimally align with their interests and career goals. All students complete 9 credits in the curriculum core and may select 21 credits from the electives. Career paths that align with national board exams in strength and conditioning, sports nutrition and clinical exercise physiology can be completed within the 30 credits including practical and clinical experiences.

Admission Requirements
This program accepts applications on a rolling basis for Spring, Summer, or Fall admissions.

• A B.A. or B.S. from an accredited institution is required.
• Undergraduate coursework in human anatomy, human physiology, and exercise physiology.
• Minimum 3.0 cumulative GPA
• TOEFL scores are required for international students whose native language is not English

Mission

The mission of the M.S.Ed. program in Applied Physiology is to provide students with advanced-level knowledge, skills and competencies in the applied sciences concomitant with practical and clinical experiences. Students will develop the specific capabilities to enhance human health and performance through applied nutrition, physical training, and clinical practice which are applicable to careers in health, fitness and sport.

Goals

The M.S.Ed. in Applied Physiology provides students with advanced-level knowledge, skills and competencies in the applied sciences which reflect the role delineation for clinical board exams and careers in applied nutrition, human performance and clinical practice in cardiac rehabilitation. Students will develop the knowledge and skills to successfully practice in the health, fitness and sport sectors as high level practitioners and administrators.

Student Learning Outcomes

- Students will develop the competencies to successfully sit for national certification in sports nutrition, strength and conditioning or clinical exercise physiology.
- Students will be career-ready for jobs aligned with the selected path of applied physiology in either sports nutrition, strength and conditioning, fitness administration, or clinical practice in cardiovascular and metabolic disease management.
- Students will be highly capable of delivering and instructing effective programs for diverse population segments in health, fitness and sport sectors.

M.S.Ed. in Sport Administration

http://sites.education.miami.edu/sport-administration-m-s-ed/
Overview
This is a 30-credit program for persons interested in sport administration or sport management.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)
In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:
- For Sport Administration (KIN): Applicants with 3-years of professional work or military experience may apply for a GRE waiver. Please contact the program directly for specific waiver criteria.

International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission

Sport Administration's mission is to educate and nurture students; to create knowledge; and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders within the sport industry for our nation and the world. The program will prepare the next generation of leaders, researchers, and agents of change and well-being in the sport community; to promote knowledge with in the widespread realm of the sport sciences and prepare graduates for careers in the sport industry and academia, reflective of our multicultural community. The sport industry has been expanding rapidly, both in spectators and participants. As the industry grows, the need for administrators with specialized training becomes more complex and important. Sport Administration is an attractive field for young professionals. A degree in Sport Administration is widely recognized by industry professionals and gives graduates an important advantage when seeking employment.

Goals

The University of Miami program in Sport Administration prepares individuals for a career in this field according to their personal and professional goals.
Student Learning Outcomes

- Students will demonstrate an overall knowledge and understanding of the core concepts in Sport Administration.
- Students will demonstrate strong oral and written communication skills by demonstrating the ability to engage their peers, and clearly demonstrate both context and purpose of written and oral communications.

M.S.Ed. in Sport Administration (Online)

Overview

This is a 30-credit program for persons interested in sport administration or sport management.

Applying to the Online Programs

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (https://myonline.miami.edu/SignIn/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

International Students (who attended college/university outside of the United States)

All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services listed below. Follow the specific instructions of the selected evaluation service to request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation. We do not issue any student Visa’s for International UOnline students.

All online international students who have been admitted to an online program at the University of Miami are not eligible for an F-1 visa.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will not be received and will delay the admissions process.

University of Miami

Online Enrollment Office

1320 South Dixie Highway

Gables One Tower –Suite 902, Locator Code: 2991

Miami, FL 33146

The evaluation report and supporting documents are required before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

Approved Evaluation Services

- Educational Credential Evaluators, Inc. (ECE) (https://www.ece.org/)
- World Education Services (WES) (http://www.wes.org/students/)

TOEFL (Test of English as a Foreign Language)

If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl/) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. The TOEFL code for the University of Miami is 5815.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program.
TOEFL Internet Minimum Score: 94
TOEFL Computer Minimum Score: 240
TOEFL Paper Minimum Score: 600

**TOEFL Waiver**
The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived and worked in an English-speaking country for the past two or more years.

**Letters of Recommendation**
Students will input their recommender’s information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student’s recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student’s Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

**Admissions & Admissions Decisions**
Once the University receives the student’s complete application with all required documents, the admissions review process will start.

**Regular Admit (with Official Transcripts)**
If the application meets the standard admissions requirements and the University has received all official transcripts, from all institutions entered on their online application, the student will receive an offer of full admission in approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

**Conditional Admit (with Unofficial Transcripts and/or Test Scores)**
If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended, as entered on their online application, and/or the student’s unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF the document is in a pdf format and ALL of the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit hours earned
- Grades earned
- Degree conferred with date (if applicable)
- No other documents will be accepted

Students receive notification typically within 48 business hours after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Students MUST pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year.

Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student’s Financial Aid funds will not be disbursed until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student’s financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important
deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (http://bulletin.miami.edu/graduate-student-handbook-online-students/cost-fees-billing-payment/) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is only available to online students at this time. UM Employees are not eligible for Monthly Payment Plans at this time.

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (http://www.miami.edu/index.php/registrar/calendar/) Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for official transcript deadlines.

Accepting Admission
When a student's admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer. Students can also view the admissions decision the online application portal found here (https://myonline.miami.edu/).

A student's Enrollment Advisor will guide him/her through the next steps (https://myonlinesupport.miami.edu/recently-admitted/) to accept their offer of admission and pay their non-refundable enrollment deposit. A student's offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have fourteen (14) calendar days to accept their offer of admission by paying their non-refundable $300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day timeframe according to the Deposit Date on the official Admission letter, the student’s application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the last official Deposit Deadline as set on the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. Deferrals are not permitted unless the student has been approved for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020).

Deferral Exception Appeal
In extenuating circumstances, students may choose to apply for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and should contact their Enrollment Advisor for additional information regarding documents required for admission. Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. (http://www.miami.edu/index.php/registrar/calendar/) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.

- If a student's Deferral Exception application is denied, the student's offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.
- If a student's Deferral Exception is approved, the student's start date will be updated to the next immediate term and the student will be sent a new admissions letter indicating the approval and updated start date.
  - If a student has not accepted their offer of admission, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day timeframe, the student’s application will be withdrawn and the student must sit out (1) one additional term before reapplying.
  - If a student has already accepted their offer of admission, and has been approved for a deferral exception, the student's start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.

Any student who chooses to reapply for a future term is not guaranteed admission and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

The offer of Admission Expiration
Offers of Admission are valid for one term only unless a Deferral Exception has been granted. To officially accept the offer of admission, a student must log into Canelink (https://myonlinesupport.miami.edu/recently-admitted/) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the
University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

**Reapplying/Readmission**

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student’s original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
- A student failed to meet the requirements of a Conditional Admission.
- A student failed or did not complete the Student Readiness Orientation (SRO)
- A student’s Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application (https://myonline.miami.edu/signup/) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application. All students who are readmitted will need to complete the Student Readiness Orientation (SRO) by their deadline, regardless of prior completion, and adhere to all admissions deadlines as set forth in the Academic Calendar.

**Not Admitted**

If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically **within 48 business hours** after the University received the student’s completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (https://myonline.miami.edu/signup/).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.

**Transcripts for Admissions**

**Official Transcripts**

- MUST Arrive in a sealed envelope with the school’s stamp/seal across the back or on the institution’s official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar’s signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami

Online Enrollment Office

1320 South Dixie Highway

Gables One Tower –Suite 902, **Locator Code: 2991**

Miami, FL 33146

Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. Students are responsible for ensuring that they have their transcripts sent to the address above and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).

**Electronic Transcripts**

Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student’s Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.

**Official Transcripts, Scores & Conditional Admission**

The University must receive official transcripts for all institutions attended, as entered on their online application, before any student can be considered fully admitted into the University.

**Official Transcripts/International Evaluations Due Date**

If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student’s official transcripts from all institutions attended, as entered on their online application, or International Evaluations from an approved evaluation service, by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the official transcript(s) and he/she may
check Canelink to verify that the University has received the student’s official transcripts. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

### Official Test Scores Due Date

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University **MUST receive their official test scores by the the date listed on the UOnline Academic Calendar**. A student’s Admissions letter will provide the exact due date for the student’s official test score(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

### UONLINE OFFICIAL TEST SCORE SCHOOL CODES

**TOEFL CODES:** Institution: 5815
**GRE CODES:** Institution (All UOnline programs): 4405
**GMAT CODES:**
- School of Business - UOnline Finance/Accounting Certificate: 7NV-S1-23
- School of Business - UOnline Master of Finance: 7NV-S1-35
- School of Business - UOnline Master of Professional Accounting: 7NV-S1-53
- School of Business - UOnline Professional MBA: 7NV-S1-01

**College of Arts & Sciences**: UOnline Master of Public Administration: 7NV-HM-66
**School of Education**: UOnline Master & EdD of Applied Learning Sciences: 7NV-HM-66

### Financial Aid & Tuition Payment

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student **MUST pay the tuition bill by the payment due date**. Students should review the Payment policies for payment options and consequences for non-payment.

### Official Transcripts and Test Scores Not Received

- A student will be removed from their current course and next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student’s official transcripts.
- A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

### Enrollment Deposit

Once students have received their offer of admission or conditional admission, they will pay a **non-refundable** enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.

### What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- **Non-refundable** including if the student’s Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than the **date listed on the academic calendar**.
- Applied against a student’s 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
  - If a student’s Offer of Admission for their UOnline program has **expired** and he/she reapplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
  - Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
  - **Not transferrable** to any campus-based program.

### Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu/) to pay the student’s enrollment deposit with the following payment options:
• Online Credit Card payment:
  • MasterCard
  • Visa
  • American Express
  • Discover
• E-check (drawn on a US bank only)
  • Bank-to-Bank, Exchange Bureau or Wire Transfer.
    • Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.
• International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments/)

Mission
Sport Administration’s mission is to educate and nurture students; to create knowledge; and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders within the sport industry for our nation and the world. The program will prepare the next generation of leaders, researchers, and agents of change and well-being in the sport community; to promote knowledge with in the widespread realm of the sport sciences and prepare graduates for careers in the sport industry and academia, reflective of our multicultural community. The sport industry has been expanding rapidly, both in spectators and participants. As the industry grows, the need for administrators with specialized training becomes more complex and important. Sport Administration is an attractive field for young professionals. A degree in Sport Administration is widely recognized by industry professionals and gives graduates an important advantage when seeking employment.

Goals
The University of Miami program in Sport Administration prepares individuals for a career in this field according to their personal and professional goals.

Student Learning Outcomes
• Students will demonstrate an overall knowledge and understanding of the core concepts in Sport Administration.
• Students will demonstrate strong oral and written communication skills by demonstrating the ability to engage their peers, and clearly demonstrate both context and purpose of written and oral communications.

Ph.D. in Exercise Physiology
http://sites.education.miami.edu/exercise-physiology-ph-d/

Overview
The Ph.D. in Exercise Physiology requires 72 credits.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.
Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ph.D. program will include the following:

- letters of recommendation should address the applicant's academic potential;
- available student space in the program;

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

¹ For further information, please contact the Graduate Program Director.
² For guidance, please contact the Graduate Program Director.
* Coursework specialization is available in this program for persons interested in clinical and research orientation in the area of exercise physiology.
** 2/3 of all coursework must be at or above the 700 level. Students entering with a Master's degree in Exercise Physiology or a related degree must take a minimum of 30-credit hours of graduate coursework at the University of Miami in addition to 12-credit hours of dissertation.
# Sample Plan of Study

This is a sample Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

| Year One          |  | Credit Hours |
|-------------------|--------------------------|
| **Fall**          | KIN 630                  | Cellular Exercise Physiology | 3 |
|                   | KIN 631                  | Laboratory Techniques in Functional Evaluation of Skeletal Muscle | 3 |
|                   | KIN 679                  | Principles of Exercise Prescription/Assessment: Cardiovascular | 3 |
|                   | **Credit Hours**         | 9 |
| **Spring**        | KIN 621                  | Advanced Systemic Exercise Physiology | 3 |
|                   | KIN 686                  | Exercise Prescription/Assessment Laboratory | 3 |
|                   | KIN 735                  | Methods in Biomechanical Analysis | 3 |
|                   | **Credit Hours**         | 9 |

| Year Two          |  | Credit Hours |
|-------------------|--------------------------|
| **Fall**          | EPS 702                  | Quantitative Methods II | 3 |
|                   | KIN 746                  | Research Methods in Kinesiology and Sport Sciences | 3 |
|                   | Outside Supporting Field Course | 3 |
|                   | **Credit Hours**         | 9 |
| **Spring**        | EPS 703                  | Applied Multivariate Statistics | 3 |

|                   | **Credit Hours**         | 9 |
| **Spring**        | KIN 840                  | Post-Candidacy Dissertation Research | 3 |
|                   | **Credit Hours**         | 3 |

| Year Five         |  | Credit Hours |
|-------------------|--------------------------|
| **Fall**          | KIN 840                  | Post-Candidacy Dissertation Research | 3 |
|                   | **Credit Hours**         | 3 |
Mission

The mission of the Ph.D. program in Exercise Physiology is to provide students with advanced knowledge, skills and competencies in the applied sciences concomitant with the ability to conduct advanced level research using laboratory proficiencies required of the field. Students will also learn to provide services related to health and wellness to our diverse Miami community.

Student Learning Outcomes

• Students will demonstrate advanced level knowledge, skills, and competencies in the field of Exercise Physiology.
• Students will be able to demonstrate advanced level clinical laboratory proficiencies required of the field of Exercise Physiology.
• Students will demonstrate proficiency in their ability to write intelligently about concepts and theory in Exercise Physiology and conduct scientific research in the field.
• Students will demonstrate proficiencies in their written and oral communication skills.

Teaching and Learning

http://sites.education.miami.edu/tal/

Dept. Code: TAL

Programs

Doctor of Philosophy (Ph.D.)

• Teaching and Learning

This individually-tailored program is designed to help students achieve their professional research-based career goals. A central component of the doctoral program in Teaching and Learning includes work on research projects that support collaboration with faculty and the application of course work as students develop their own research ideas. TAL’s Ph.D. program emphasizes an understanding of theory in scholarly inquiry; the intellectual framing and conduct of empirical research; the placement of research within cultural contexts and policy settings; designing, implementing and testing of transformative learning-environments that promote deep learning; and critical analysis of policy, research and practice.

Specializations are offered in:

• Language & Literacy Learning in Multilingual Settings (LLLMS)
• Science, Technology, Engineering, and Mathematics (STEM)
• Special Education (SPED)

Doctor of Education (Ed.D.)

• Applied Learning Sciences
• Applied Learning Sciences (online)

Master of Science in Education (M.S.Ed.)

• Applied Learning Sciences
• Applied Learning Sciences (online)
• Early Childhood Special Education
• Education and Social Change
• Special Education
• Teaching English to Speakers of Other Languages (TESOL) and Bilingual Education (BE)

Specialist in Education (Ed.S.)

• Early Childhood Special Education

The Ed.S. degree is a terminal degree, for educators who already have a relevant Master’s degree and who wish to increase their proficiency in their chosen field. The program requires 30 additional credit hours beyond the Master’s Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those...
pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees receive additional or different assignments. Please contact the Department of Teaching and Learning for a program sheet and course listings for the above programs.

Certificates (Non-Degree Programs)

- Applied Learning Sciences (online)

Masters Programs in Teaching and Learning

- M.S.Ed. in Applied Learning Sciences (p. 2182)
- M.S.Ed in Applied Learning Sciences (Online)
- M.S.Ed in Early Childhood Special Education (p. 2191)
- M.S.Ed. in Education and Social Change (p. 2192)
- M.S.Ed. in Special Education (p. 2195)
- M.S.Ed. in Teaching English to Speakers of Other Languages (TESOL) and Bilingual Education (BE) (http://bulletin.miami.edu/graduate-academic-programs/education-human-development/teaching-learning/tesol/)

Specialist Programs in Teaching and Learning

Doctoral Programs in Teaching and Learning

- Ed.D. in Applied Learning Sciences (p. 2170)
- Ed.D. in Applied Learning Sciences (p. 2170) (online)
- Ph.D. in Teaching and Learning (p. 2200)

TAL 600. Human Learning. 3 Credit Hours.
This course provides an overview of major theories of human development from childhood through adulthood. This course will focus on the individual learner as influenced by individual- and social-learning processes; the interrelationships between human learning and development; social settings for learning such as classroom, business, and informal learning environments; the applications of learning theories and models; the learning of language(s), content, social practices, and reasoning processes. Emphasis will be placed on how social, cultural, and linguistic diversity interact to create variation in human learning.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 601. Educational Assessment and Accountability. 3 Credit Hours.
This course covers the principles and classroom applications of educational measurement and assessment as well focuses on accountability policies and practices at the school, district, state and federal levels.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 602. Organizational Learning. 3 Credit Hours.
This course provides an overview on how organizations adapt and change, including changes that could be thought of as constituting “learning.” Changes in shared values, structures, and practices can facilitate and/or hinder an organization’s capacity to gather, select, and process information, to retain that information, and to act upon knowledge valued and created by members. Emphasis is placed on how participants’ own careers fit within their employment or field-placement sites as learning organizations and how their efforts can help their sites to learn.

Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 603. Technology Applications in Education. 3 Credit Hours.
This course is designed to help you better understand why and how to use modern technologies in educational settings. Throughout the course, you will identify and share accessible technological resources, participate in hands-on activities, conduct mini-teaching, and create technology-enhanced instructional materials. You will examine the affordances and constraints of a variety of technologies including mobile learning, computer-based visualizations, web-based curriculum platforms, augmented and mixed reality, and online collaboration tools. You will discuss with the instructor and peers critical issues and policy relevant to the effective use of technologies in K-12 classrooms or informal learning environments. As a graduate level course, you will need to conduct a small-scale research that investigates the effectiveness of a technology-enhanced learning environment.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 604. Building Positive Relationships in Inclusive Secondary Schools. 3 Credit Hours.
Designed to assist general education teachers in meeting the needs of diverse secondary school students. Focus on students with disabilities, language and culture in the classroom, and developing culturally competent classroom management methods.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 605. Mentoring and Internship in Classroom Teaching. 3-6 Credit Hours.
A comprehensive program of supervised teaching in elementary or secondary class rooms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 606. Issues and Strategies for ESOL. 3 Credit Hours.
This course provides a comprehensive foundation in ESOL (English for Speakers of Other Languages) competencies based on Florida’s mandates and TESOL standards. Theory and practice will be emphasized in the areas of applied linguistics, cross cultural communication and understanding, methods of teaching, assessment, and curriculum and material development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 607. Instructional Leadership. 3 Credit Hours.
An examination of the components of effective supervision of instruction. Leadership theories which apply to educational settings: legal rights and responsibilities of students, teachers and administrators will be covered. As well as the examination of various models of teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 608. Language Development for Linguistically and Culturally Diverse Students. 3 Credit Hours.
Course will provide an introduction to theories of linguistics, first and second language acquisition, as well as foundations of English learner education. Readings and lectures will serve to highlight the development of language and literacy, including challenges faced by students for whom Standard English is a second language and/or a second dialect. This course will be the first in a two-course ESOL sequence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 609. Supervised Practicum in Reading and Writing. 3 Credit Hours.
Supervised practicum in reading and writing. Emphasis is on assessment and interventions for elementary and secondary students with a range of academic, linguistic and cultural challenges in becoming proficient readers.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 610. Literacy and Learning Strategies in the Content Area. 3 Credit Hours.
Literacy instruction in content areas for grades 6 through 12; instructional methods and materials for development of language arts, reading, and study skills. Emphasis on appropriate materials, motivation, and support for students with exceptional needs and English language learners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 611. Topics in the Professional Development and Supervision of Teachers. 3 Credit Hours.
Topics include the preparation of clinical teachers to induct, guide, and supervise the field experiences of students and associate teachers; techniques in the observation and supervision of in-service teachers; creation and implementation of professional development plans; reading in the research on teacher development across the career.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 612. Building Positive Relationships with Diverse Learners. 3 Credit Hours.
An examination of the principles of various theoretical perspectives of classroom management and discipline. Applications to the management of behavior problems of children and adolescents. Contemporary research analyzed and discussed. Writing intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 613. Prescriptive Teaching of Exceptional Students. 3 Credit Hours.
Techniques for individualization of instruction for exceptional students, including educational prescription, and curriculum adaptation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 614. Assessment in Special Education. 3 Credit Hours.
A survey of assessment instruments used to assess and evaluate exceptional students in inclusive and special education settings. Emphasis is on assessments for students in K-12 settings with a range of academic, linguistic, and cultural challenges in becoming proficient learners. Graduate students will complete a research paper using APA writing format.
Prerequisite: TAL 629.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 615. Reading in the Elementary School. 3 Credit Hours.
Extending competencies in teaching reading, including exceptional children in the regular classroom, with emphasis on applying findings from research in reading to classroom practices. 20 hours of field experience required for all students who are not currently teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

TAL 616. Mathematics in the Elementary School. 3 Credit Hours.
Content, methods, and research appropriate for teaching mathematics in the elementary school, including exceptional children in the regular classroom. Content is defined as a pre-algebra mathematics. 20 hours of field experience required for all students who are not currently teaching.
Writing intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 617. Science in the Elementary School. 3 Credit Hours.
Extending competencies of elementary school teachers in teaching science to children, including exceptional children in the regular classroom. Development of science programs based on research which has classroom applications. 20 hours of field experience required for all students who are not currently teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

TAL 618. Social Studies in the Elementary School. 3 Credit Hours.
Extending competencies in teaching social studies to children, including exceptional children in the regular classroom, with an emphasis on research applications. 20 hours of field experience required for all students who are not currently teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 619. Exceptional Student Education and Classroom Management. 1-5 Credit Hours.
Introduction to theories and methods of effective classroom management and learning environments, perceptions of disabilities, addressing disruptive behaviors in classrooms and behavioral assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 620. Teaching and Management for Diverse Classrooms. 3 Credit Hours.
This course will emphasize building a classroom culture and community that meets the needs of all students, including learners with disabilities and learners with culturally and linguistically diverse backgrounds. A history of major legal requirements for diverse populations is examined, including the meaning of learning differences, definitions and causes of disabilities, language acquisition processes, and methods for teaching diverse populations. An introduction to theories and methods of effective classroom management for building learning communities is integrated throughout the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 621. Student Teaching in the Elementary School. 5-6 Credit Hours.
A comprehensive semester-long program in observation and supervised teaching in the elementary school. The student spends full-time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 622. Student Teaching in the Secondary School. 5-6 Credit Hours.
A comprehensive program in observation and supervised teaching in the secondary school. The student spends full-time in a secondary school participating in all activities of the teacher under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 623. Seminar on Teaching. 1-3 Credit Hours.
Topical seminar to accompany associate teaching
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 624. Education and the Arts. 3 Credit Hours.
Exploration of the fine and performing arts and their relation to PreK-12 education. Emphasis is placed on experiential learning and methods of incorporating the arts in school curricula. The course also includes a focus on the value of the arts to the individual and society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 625. Online Teaching and Leadership. 3 Credit Hours.
Introduction to teaching-learning process in online learning environments, including asynchronous modalities, assessment and evaluation, technology and digital copyright usage.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 626. Workshop in Education. 1-6 Credit Hours.
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 627. Understanding Culture in the Classroom. 3 Credit Hours.
This course explores the conflicts and the strategies for resolution between the patterns of culture in the classroom and the patterns of culture that school children bring to the classroom - patterns which are learned in their families and communities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 628. Internship in Special Education Settings. 3-6 Credit Hours.
A comprehensive program of supervised teaching in special education settings. The student spends two full semesters employed as a full-time teacher while under the guidance of school and university personnel.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 629. Educating Exceptional Students. 3 Credit Hours.
A survey course in special education emphasizing characteristics and problems associated with various categories of exceptional learners. Policy, issues, and trends in special education will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 630. Instructing Students Who Have Literacy Challenges. 3 Credit Hours.
Administration and interpretation of instructional assessments with instructional strategies and materials based upon scientifically based reading research for the prevention and remediation of reading difficulties.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 631. Assessment of Reading and Related Learning Disabilities. 3 Credit Hours.
Theories and procedures for screening, diagnosis, and progress-monitoring of reading and related learning disabilities. Includes instruction and supervised clinical experiences in administration and interpretation of assessments with an emphasis on prevention, identification, and remediation of reading and related learning disabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 632. Intervention for Reading and Related Learning Disabilities. 3 Credit Hours.
Theories and procedures for screening, diagnosis, and progress-monitoring of reading and related learning disabilities. Includes instruction and supervised clinical experiences in administration and interpretation of assessments with an emphasis on prevention, identification, and intervention of reading and related learning disabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 633. Reading Comprehension. 3 Credit Hours.
Development of comprehension, rate, and study skills; reading in the content areas; evaluation of materials, organization of programs; issues, problems, and exceptional readers. Emphasis is placed on understanding reading as a process of student engagement in fluent decoding of words and construction of meaning.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 634. Language and Reading Instruction. 3 Credit Hours.
Extending competencies of K-12 school teachers in teaching reading to children, including exceptional children in the regular classroom. Emphasis on applying findings from research in reading and writing to classroom practices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 635. Inclusive Models of Teaching. 3 Credit Hours.
This course focuses on models of inclusion and the educational roles to support student success in inclusive settings. Topics addressed include: differentiated staffing patterns; working as a member of team; successful collaborative practices; effective communication; including differentiation of instruction and application of principles of Universal Design for Learning (UDL); co-teaching; strategies for working effectively with students, families, parents, guardians, administrators, general education teachers, paraprofessionals, and other professionals, including students, families, and team members; and creating school partnerships.
Prerequisite: TAL 629. And TAL 614.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 636. Universal Design for Learning and Assistive Technology Strategies for Transition. 3 Credit Hours.
This course focuses on evidence-based interventions and models of support for students with disabilities in K-12 settings and strategies for preparing students for transition from school. Topics addressed include: strategies for using Assistive Technology effectively; strategies for enhancing self advocacy and self determination for students with disabilities; strategies for enhancing family involvement in career development and post school employment; transition services and models; preparing students with disabilities for employment and postsecondary education; residential alternatives; recreation and leisure for students with disabilities.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 637. Field Experience Seminar I. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures. Corequisite: TAL 612.
Components: SEM.
Grading: CNC.
Typically Offered: Fall & Spring.

TAL 638. Language Arts and Culture in the Classroom. 3 Credit Hours.
Extending competencies in the language arts including linguistic and cultural diversity and children with disabilities in elementary classrooms. Emphasis on research applications. 20 hours of field experience required for all students who are not currently teaching. Writing intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 639. Field Experience Seminar II. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures. Co-requisite: TAL 606.
Components: LAB.
Grading: CNC.
Typically Offered: Fall & Spring.

TAL 640. Typical and Atypical Child Development. 3 Credit Hours.
Theories and research in the development of children from conception through eight years of age. Factors which influence development and the relationship of typical development to patterns of delayed and atypical development. Writing intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 641. Working with Families of Young Children with Disabilities: Strategies and Medical Issues. 3 Credit Hours.
This course will address issues related to working with families of young children with special educational and health needs. This will include strategies for effective communication and collaboration with all members of the interdisciplinary team. This is a writing intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 642. Evaluation and Assessment in Infant and Early Childhood Special. 3 Credit Hours.
Students will become familiar with a variety of formal and informal screening, evaluation, assessment instruments, and procedures currently in use with children birth to eight. They will learn criteria for selecting and using developmentally and culturally appropriate instruments and become familiar with the multi-, inter-, and trans-disciplinary team approaches. Students will write formal reports and develop an IEP and an IFSP. May require field experience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 643. Intervention Strategies in Infant and Early Childhood Special Education. 3 Credit Hours.
The focus of this course will be the implementation of IEPs and IFSPs through the use of developmentally appropriate curriculum, methods, and intervention strategies for infants, toddlers, and young children with special needs. This will include implementation and adaptation of existing curriculum and materials for young children to meet the special needs of this population. May require field experience. Writing Intensive course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 644. Early Childhood Curriculum Development. 3 Credit Hours.
Development of curriculum for children from birth to eight years of age. Emphasis on application of research findings. 20 hours of field experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
TAL 645. Methods for Communications and Language in Young Children with Disabilities. 3 Credit Hours.
This course will focus on language theories, models, and methods for birth-eight year olds. The course will present an overview of normal development in communication and discuss conditions that might impede progress as well as signs that would suggest a problem is present. This course may require field experience.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 646. Working with Children who Exhibit Challenging Behaviors. 3 Credit Hours.
Challenging behaviors in young children; influences of culture, language, ethnicity; applying Response to Intervention in Preschool settings; evidence-based classroom and behavior management strategies; planning intensive individualized interventions; applying positive behavioral support.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 647. Language and Early Reading Instruction. 3 Credit Hours.
Factors related to emergent literacy with an emphasis on diverse aspects of language that influence literacy and learning; development of emergent literacy and word perception; emergent literacy curriculum development; appropriate assessment and instructional techniques. Understanding of reading as a process of student engagement in fluent decoding and construction of meaning. Writing intensive.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 648. Practicum/Internship with Infants and Toddlers with Disabilities. 3 Credit Hours.
A comprehensive program in observations and supervised teaching in a school/center for infants and toddlers with disabilities (0-3 yrs.). The student spends full time in the school/center participating in all activities of the teacher under the guidance of school and university personnel.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 649. Practicum/Internship with Children with Disabilities (3-5 yrs.). 1-6 Credit Hours.
A comprehensive program in observation and supervised teaching in a school/center for children with disabilities (3-5 yrs.). The student spends full time in the school/center participating in all activities of the teacher under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 650. Early Reading Instruction and Literature for Young Children. 3 Credit Hours.
Study of literature for young children emphasizing multicultural literature and use of literature across the curriculum. Development of emergent literacy; examination of emergent literacy curriculum as well as appropriate assessment and instruction techniques. Emphasis on understanding or reading as a process.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 651. Affective, Relational, and Cultural Factors and Processes in Learning. 3 Credit Hours.
This course explores the impacts of non-cognitive factors on learning and the inter-relationships among what are usually thought of as cognitive and non-cognitive spheres of learning. At times, there may be conflicts between cultural practices as found in learning settings (including classrooms, businesses, and informal learning environments) and the practices into which learners have been encultured by families and communities; at other times, an individual's identity and the values being imparted in a learning environment may work synergistically. The course includes a critical examination of the sources of these factors on human and organizational learning programs and practices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 652. Assessment of Human and Organizational Learning. 3 Credit Hours.
This course provides an overview of the assessment of learners in educational, business, work place, and informal settings, with an emphasis on considerations related to cultural and linguistic diversity. Topics include classroom-based assessment, high-stakes assessment in educational settings, testing for job placement and certification, and program evaluation. Among the assessment techniques to be covered are cognitive interviews, the analysis of group-based processes, discourse analysis, and focus-group work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 654. STEM Methods for Diverse Learners. 3 Credit Hours.
Research-based instructional practices and processes to meet the needs of all learners, including diverse populations, for mathematics/science education in schools.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 659. Practicum in Education and Social Change. 3 Credit Hours.
This practicum course is the culminating project for the Education and Social Change Master's Program. Participants will review the literature, design, and present an action project within the context of a school or community setting.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 660. Instruction and Assessment in the Secondary School.. 3 Credit Hours.
Research-based instructional processes in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 661. Instruction in Secondary English.. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching language arts in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 662. Instruction in Secondary Mathematics. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching mathematics in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 663. Instruction in Secondary Science. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching science in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 664. Instruction in Secondary Social Studies. 3 Credit Hours.
Analysis of methods, materials, and content appropriate for teaching the social sciences in the secondary school.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 665. Methods of Teaching in the Elementary School. 3 Credit Hours.
Theories and research-based practices for reading/language arts, science, social studies, and math instruction for all learners, including diverse populations in elementary classrooms.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 666. Introduction to the Politics of Education, Teaching, and Learning. 3 Credit Hours.
Survey overview of political debates involving education as a nested and loosely-coupled system where pressures at one level can be supported or countermanded at another. Historical and critical take on present-day debates. Depending on student interests, may go in-depth on topics such as economic politics, cultural politics, state and local control.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

TAL 667. Education Reform, Policy, and the Social Organization of Schooling. 3 Credit Hours.
This course is designed to introduce students to the politics and policy debates in American education, including how the U.S. K-12 public education is organized as a socially-constructed system. We will examine the politics of a variety of recent reforms at the local, federal and state levels and their impact on institutions, students and the public.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 668. Human Development, Learning and Schooling. 3 Credit Hours.
Major theories of child development and learning will be discussed with a focus on how they apply to teaching and learning in K-12 schools.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 669. Teacher and Student Well-Being in Education. 3 Credit Hours.
This will be an intensive, 600 level course specifically designed for students taking the Master's degree in Education and Social Change. The main thrust of the course will be to link theory and research on personal, organizational, and collective well-being with educational success and school reform. Well-being is a positive state of affairs, brought about by the simultaneous satisfaction of personal, relational, organizational, and community needs. In this course we will examine the signs, sources, and strategies of well-being in individuals, relationships, organizations and communities. The course will focus on applications of theory and research to the well-being of students, parents, teachers, and schools. We will explore the organizational well-being of schools and the policy changes needed to improve the linkages between community development and educational success of children living in poverty. Some of the questions that will be explored in the course include: What is well-being? How is your personal well-being related to the well-being of other people, organizations, and communities? What is the role of values in promoting a just society? What strategies might work for engaging relevant constituencies in educational and social change? The course will be divided into five sections as follows: - Paradigms of well-being and educational reform - Personal well-being of children, teachers, parents, and administrators - Organizational well-being with a focus on schools and educational settings - Community well-being and its relationship to educational policy - Challenges and conclusions. We will cover theory and research as well as practical skills. We will watch videos, engage in role playing, discuss, and write about well-being. Our hope is that the theory and skills that you pick up in this class will help you in your personal life, your educational work, and your community change efforts. You should begin thinking about your final paper as you learn through the presentations, readings, discussions, and other assignments for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 670. Teacher Preparation Seminar I. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 671. Curriculum, Assessment, Teaching and Learning for Physical Science. 3 Credit Hours.
Analysis of content knowledge, pedagogy, and materials appropriate for teaching physical science, K-16. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in physical science, pedagogy, and student literacy in physical science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 672. Curriculum, Assessment, Teaching and Learning for Number, Operations, and Algebra. 3 Credit Hours.
This course examines topics that address the mathematical ideas underlying number, operations and algebra. Related K-16 curriculum, instructional and assessment issues will be also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 673. Curriculum, Assessment, Teaching and Learning for Measurement and Geometry. 3 Credit Hours.
Topics involving measurement and geometry in the K-16 mathematics curriculum, how students learn and reason, assessment, instructional strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 674. Internship in the Elementary School. 3-6 Credit Hours.
A comprehensive program of supervised teaching in a K-6 classroom in the elementary school. The student spends a full semester employed as a full-time teacher while under the guidance of school and university personnel.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 675. Curriculum, Assessment, Teaching and Learning in the Earth Sciences. 3 Credit Hours.
Analysis of content knowledge, pedagogy, and materials appropriate for teaching Earth science, K-16. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in Earth science, pedagogy, and student literacy in life science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 676. Curriculum, Assessment, Teaching and Learning for Data Analysis and Probability. 3 Credit Hours.
Data in the K-16 mathematics: how to gather (biased and unbiased samples), store, manage, represent, analyze. Probabilistic inferences in K-16 mathematics: chance, odds, counting, related topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 677. Applied Research in Education. 3 Credit Hours.
A graduate course in education emphasizing different research methods educators and researchers can utilize to gauge and improve student learning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 679. Teacher Preparation Seminar II. 0 Credit Hours.
This hybrid zero credit course has been designed to provide additional support for students in our teacher preparation programs. Students will enroll in this course while they participate in a series of field experiences where they gain practical experience integrating theory and practice while working with students in K-12 settings. Major topics include: the Florida Educator Accomplished Practices, Live Text, and guidelines and procedures.
Components: SEM.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

TAL 680. Foundations of Bilingual Education. 3 Credit Hours.
This course will focus on the historical foundations of bilingual education in the U.S., current models of bilingual or dual language programs in PK-12 school settings, and contemporary understandings of bilingualism/biliteracy development using sociolinguistic and sociocultural perspectives.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 681. Principles of Curriculum Development and Engagement for TESOL. 3 Credit Hours.
Components of curriculum and instructional management and engagement in ESOL classrooms. Pupil/teacher interaction, curriculum organization, student assessment and evaluation, materials development and adoption, utilization of resources, and classroom organization.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 682. Methods of Teaching Content Areas in TESOL. 3 Credit Hours.
This course examines subject matter education for English language learners (ELLs) in the K-12 and international English as a foreign language (EFL) settings. Best practices are investigated and applied within different teaching contexts with a focus on helping students gain access to core subject knowledge.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 683. Introduction to Theories and Practice of TESOL. 3 Credit Hours.
Theory and practical methodology of language and literacy instruction and assessment to children, adolescents, and adults for whom English is not their first language, in alignment with current state, national, and professional standards (as applicable). There will be a focus on inquiry into instructional approaches based on contemporary theories of learning, standards-based and data-driven lesson planning, and reflective practices in the teaching and assessment of English learners.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 684. Advances Techniques in TESOL. 3 Credit Hours.
This course addresses advanced techniques in TESOL. The course focuses on methods and approaches for teaching English language learners and specific strategies to deliver instruction in the content areas.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 685. Language Assessment. 3 Credit Hours.
This course will familiarize students with the nature of and current methodologies of language assessment within a framework of psychometric and linguistic.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 686. Principles of First and Second Language Acquisition. 3 Credit Hours.
This course will familiarize students with the principles and processes at work in the acquisition of first and other languages. The course focuses on similarities and differences in the ways that first and second languages are learned and factors that influence the learning process for both. Participants will become familiar with current research related to language acquisition through course lectures, interactive course activities and individual as well as collaborative presentations.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 687. Home Language Strategies. 3 Credit Hours.
As a culminating course in the Bilingual/Biliteracy program track, this course will review theories in bilingual development, sociolinguistics, and language teaching in Spanish to build Spanish language proficiency for dual language teachers. There will also be an emphasis on communicating with Spanish-speaking parents of K-12 English learners.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 689. Language and Literacy for Academic Learning. 3 Credit Hours.
This course introduces key concepts and practical teaching approaches for learning the academic literacies needed to be successful in school contexts. Review of language theories and research concerning teaching academic literacy for education are highlighted throughout the course and embedded within disciplinary contexts for different subject areas (i.e., mathematics, social studies/history, English language arts, and science). Linguistic pedagogy is a central focus of the course to examine applications of language theory in K-12 classrooms serving English learners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 690. Topics in Education. 3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 691. Workshop in Education. 1-6 Credit Hours.
A critical study of practical problems of teachers. Significant problems are defined, literature and research are reviewed, and individual or small group projects are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 692. Curriculum, Assessment, Teaching and Learning for the Life Sciences. 3 Credit Hours.
Analysis of content knowledge, pedagogy, and materials appropriate for teaching life science, K-16. The course content focuses on instructional practice with an emphasis on developing teacher content knowledge in life science, pedagogy, and student literacy in life science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 700. Professional Seminar. 1 Credit Hour.
The TAL Pro-seminar consists of a series of interactive sessions at which faculty, doctoral students, and guest speakers have the opportunity to
discuss current topics in education research. Its purpose is to enhance the culture of scholarship and collegiality within the Department and to provide
informal guidance to doctoral students on research and career directions in education.
DOCTORAL STANDING.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 701. Teacher in American Society. 3 Credit Hours.
An historical, philosophical, and sociological analysis of the teaching profession in American society. The role and status of teachers in American
culture will be discussed. Contemporary issues such as the union movement, status assignment, rewards and incentives, and the role of the teacher
as an instrument in the definition of the culture will also be covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 702. The Social and Cultural Foundation of Education. 3 Credit Hours.
This course is an interdisciplinary seminar reviewing the major literature in the Social and Cultural Foundation of Education. Classic, Modern and Post-
Modern texts will be read with an emphasis on the literature written after 1980 (Post-Modern). Emphasis will be placed on the exploration of key policy
questions, as well as the analysis of key sociological concepts related to the field such as hegemony, cultural reproduction, social capital and privilege.
The course is intended to provide a “baseline” for understanding the field.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 703. Issues and Trends in Multicultural Education. 3-6 Credit Hours.
The study and critical examination of the theory and practice of multicultural education. Development of a personal theory of effective education for
pluralism is included.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 704. Introduction to the Learning Sciences. 3 Credit Hours.
In this course we will explore perspectives and research on domain-specific and domain-general learning in and out of schools, especially those
typically considered in the field of the Learning Sciences. We will examine various perspectives researchers use to inform their work and how these
perspectives provide insight into what it means to learn and know. The course objectives include the following: -Understand key questions addressed
in research on learning -Understand foundational and modern theories and perspectives in learning -Understand how various learning theories are
applied in domain-specific/general research contexts and their limitations -Develop and articulate your own perspectives and research questions on
learning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 705. Design of online learning environments. 3 Credit Hours.
This course provides an overview of technology applications in learning environments, including history, theoretical foundations, design processes,
and available technologies. The course includes an exploration of online learning applications/software, instructional design considerations, and
curriculum development for online settings. Topics could include multi-literacies, digital youth network, media and connected learning, web-based
learning, AI and machine based learning models.
TAL 704 OR TAL 600.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 706. Design of Formal Learning Environments. 3 Credit Hours.
This course on instructional design provides an overview of theoretical approaches to learning that can be used to analyze learning environments,
of learning goals for creation and sequencing of learning activities, and of how resources can be deployed in support effective learning. Topics can
include the use of theoretical learning trajectories, tenets and applications of universal design, and social support and intellectual scaffolds for
learning.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
TAL 707. Design for workplace related learning. 3 Credit Hours.
This course deepens participants’ understandings of workplace training and professional development by relating learning to needs assessments; instructional design techniques; program planning, marketing, and delivery techniques; and evaluation of adult learning programs within a variety of organizational settings. Emphasis is placed on constructing training and professional development programs that are meaningful to a diverse workforce and that achieve individual and organizational outcomes to improve an individual's and the organization's performance.

Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 708. Design of Out-of-School, Informal Learning. 3 Credit Hours.
This graduate seminar focuses on learning concepts and practices in and out of formal (school) instructional settings. People learn across a variety of places and over their entire lifespans; much of this learning is elective or interest-driven, in the sense that people voluntarily engage in activity in order to learn. In this we course, we consider how learning is organized within and across a variety of informal settings, including state and national parks, museums, theater organizations, zoos, aquariums, sports teams, one-on-one performance coaching, after school programs, non-profit community centers, in families or home environments, in virtual or online social spaces, and even in interactions between medical personnel and their clients. This course will include ties to sociocultural theories of development and learning as applied to out-of-school, informal contexts. The course provides a review of new empirical research and an overview of theoretical approaches to learning that can be used to analyze informal learning environments. The course will involve theoretical and empirical readings with group discussion, but also visits from and to people who are involved in learning in informal settings.

Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 709. Applied Research and Development in Learning Sciences - Seminar I. 1-3 Credit Hours.
Students define and conceptualize a group-based project on learning within their particular employment settings. Groups will develop and implement a plan for a well-focused first effort. The project and its results may be submitted as a digital artifact making use of multiple media in a single language (such as English, French, Italian, Spanish, Portuguese or Chinese) by a team where that language was used to implement the plan and where its use will facilitate the project’s completion. Each individual member of the team submits a paper defining their unique contributions to the project in such a way that it is clear that the work built upon and drew from course work in the Learning Sciences. Individual contributions must be substantive and should be complementary. Projects must be approved by advisor before it is implemented; if a language other than English will be employed, it must also be approved by faculty who will review and evaluate it.

Components: SEM.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

TAL 710. Introduction to Research. 3 Credit Hours.
This graduate course focuses on diverse philosophies and epistemologies of research and the various methodological traditions that arise from them. Students will develop an understanding of and appreciation for a range of complementary educational research traditions. The goal is to enable students to participate meaningfully and critically in multiple discourse communities that employ and/or produce research bearing on substantive local, national, and international issues in education.

Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 711. Video Analysis Methods. 3 Credit Hours.
Video-based data has become ubiquitous in educational research. This methods course is designed to facilitate learning how to use video-based research methods in educational research. Despite the growing interest in video-based approaches, we are still beginning to theorize about various points of view when collecting and analyzing video data. There are practical questions about collecting video data and a growing number of software programs to support data analysis. The goal of this course is to learn about video-based methods for data analysis by critically engaging with how others do video analysis and by doing it collectively in the classroom and individually in a final paper.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 712. Applied Research and Development in the Learning Sciences - Seminar 2. 1-3 Credit Hours.
Students build upon, (re)define, (re)conceptualize, (re)develop and (re)implement their group-based project from TAL709 by using the research methods employed in its evaluation. The advanced project and its results may be submitted as a digital artifact making use of multiple media in a single language (such as English, French, Italian, Spanish, Portuguese or Chinese) by a team where that language was used to implement the plan and where its use will facilitate the project's completion. Each individual member of the team submits a paper defining their unique contributions to the project in such a way that it is clear that the work built upon and drew from course work in the Learning Sciences. Individual contributions must be substantive and should be complementary. Projects must be approved by advisor before it is implemented; if a language other than English will be employed, it must also be approved by faculty who will review and evaluate it.

Components: SEM.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
TAL 714. Introduction to Qualitative Methods. 3 Credit Hours.
The purpose of this course is to introduce graduate students to qualitative research methods and enable them to become educated consumers of such research. Students will also be introduced to basic strategies of qualitative interviewing and observation and will be encouraged to reflect on the potential fit between their own developing skills and their research interests.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 720. Research in Residence - Masters. 1 Credit Hour.
Masters-degree and Ed.S. students enrolled for credit as determined by advisor. Credit awarded when thesis is accepted.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 730. Topics in Language and Literacy Learning. 1-3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 731. Language Policy and Planning (K-12). 3 Credit Hours.
The course focuses on the areas that have been of particular interest to sociolinguists and language planners, namely, status planning, corpus planning, prestige planning, language-in-education planning, the language rights of linguistic minorities and the more recent movements from macro issues on language policy and planning (LPP) to micro issues involved in indexing linguistic, ethnic and racial identities. In addition, the course will address matters of migration, imperialism, state formation and political conflicts due to LPP in the United States as well as in countries in Latin America, the Caribbean, Africa, Asia and Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 732. Seminar in Reading. 3 Credit Hours.
Seminar providing intensive study of contemporary topics in reading. Open to advanced graduate students in reading.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 733. Applied Linguistics. 3 Credit Hours.
In-depth study of phonology, morphology, syntax, semantics and pragmatics of spoken and written discourse and the application to second language acquisition theories. Issues of nonstandard dialects and creoles as well as their impact on literacy challenges will be discussed. Globalization of English and linguistic imperialism will be addressed.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 734. Theory and Research in Reading. 3 Credit Hours.
This course explores the intellectual roots of theories of reading and how these are used to generate testable research hypotheses about linguistic, psychological, social, and cultural factors that influence and sustain reading development and reading performance. The course surveys works that have influenced research and theory in the field of reading from its inception in the early 1900’s—through the work of experimental psychologists such as Huey—to present times. The readings and lectures will include work that represents the influence of the intellectual traditions of the introspectionists, behaviorism, cognitive psychology, constructionism, socio-cultural theory, and cognitive neuroscience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 735. Theory and Research in Writing. 3 Credit Hours.
Seminar that explores the complementary relationship between reading and writing through the reading and analysis of theoretical and research literature on writing theory and writing instruction.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 736. Pidgins, Creoles and African-American English in Sociolinguistic Research. 3 Credit Hours.
The course examines the typology of languages that emerged in North and South America as well as in the Caribbean as a result of sociolinguistic contact between European languages and west African languages, namely, pidgins, creoles and African-American English. The course also examines current debates on the extent to which the superstrate and substrate languages as well as the principles of Universal Grammar and the Language Bioprogram Hypothesis have contributed to the linguistic structures of Atlantic Pidgins, Creoles and African-American and Creole cultures are explored. Additionally, the course addresses the sociolinguistic research that advocates dialect diversity and the affirmation of vernacular languages as a means of social and educational reform.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 752. Seminar in Reading/Learning Disabilities. 3-12 Credit Hours.
Contemporary topics in reading and learning disabilities. Rotating topics and faculty. Open only to advanced graduate students in reading and learning disabilities pursuing specialist or doctoral degrees. Specialist students enroll for a total of six hours, and doctoral students for a total of 12 hours. Course may be repeated for a total of 12 credits. Subtitles describing the topics to be offered will be shown in parentheses in the printed schedule, following the title.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 753. Introduction to Science of Learning. 3 Credit Hours.
This course provides an overview of the major theoretical traditions and foundations that undergird and inform the Science of Learning across human settings. We will learn about the study and design of learning experiences as well as technologies and strategies for facilitating learning including access to learning and learner linguistic and cultural diversity and inclusion.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 754. Disability and Diversity: Critical Views. 3 Credit Hours.
Examines critical issues in the cultural/historical conceptualization of the field of special education against the background of cross-cultural views of disabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 755. Current Issues in Special Education. 3 Credit Hours.
Current issues and trends in special education from historical, societal, policy, practice, and research perspectives. Topics may include identification, referral, and eligibility; inclusion and Least Restrictive Environment; parent involvement; participation of students with disabilities in high-stakes testing; cultural/linguistic diversity; the disproportionate placement of minorities; and teacher qualifications, certification, and education.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 756. Research in Special Education. 3 Credit Hours.
Critical analysis of empirical research studies in selected areas of special education research, focusing on research designs, data analysis methods, and interpretation of findings.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 757. Seminar in Special Education. 3-12 Credit Hours.
Study in special interest areas in special education. May be taken for up to 12 credits.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

TAL 758. Topics in Special Education. 1-3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing in important educational issues for which format course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
TAL 770. Topics in STEM Education. 1-3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which format course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 772. Instructional Design and Technology in STEM Education. 3 Credit Hours.
This course is designed to help you take an engineering approach in instructional design, development, and evaluation in STEM education. The course focuses on instructional systems development with a particular emphasis on technology-enhanced K-12 STEM education environments. We will develop an in-depth theoretical understanding and practical skills of instructional design and technology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 773. Teaching and Teacher Education. 3 Credit Hours.
This course focuses on several key dimensions of schools and schooling and their relationship to larger historical and social contexts, including the history of U.S. education; equity issues in past and present U.S. education; contemporary educational issues & theory; and international/global education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 774. STEM Learning. 3 Credit Hours.
Provides an overview of the historical roots and current state of the learning sciences, as they apply to the study of learning in science, technology, engineering and mathematics (STEM). Organized around reading, discussion and synthesis of research.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 775. STEM Curriculum and Policy. 3 Credit Hours.
Study of mathematics and science curricula, with the inclusion of engineering and technology as applied science and mathematics. Study of the competing forces that shape curriculum including standards documents, state and national policy, conceptions of the disciplines, modern and postmodern analyses of curriculum theory.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 776. Assessment in STEM Education. 3 Credit Hours.
Overview of the theoretical and research frameworks for student assessment in science, technology, engineering and mathematics (STEM). Topics include classroom-based assessment, testing for high stakes and other purposes, national and international comparisons in mathematics and science achievement and factors impacting on STEM-related persistence and careers.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 777. STEM-Education Research Practicum. 3 Credit Hours.
Defining an empirical or theoretical research issue, arguing for its importance; framing the study based on related research; designing, implementing and documenting appropriate research methods; reporting and interpreting the results; writing and submitting a manuscript – in the fields that comprise STEM-education.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 778. Diversity and Equity in STEM Education. 3 Credit Hours.
Issues of unequal student achievement, course taking, degree-seeking, and careers that rely on science, engineering, technology and mathematics (STEM). Focus is on social-demographic groups defined along lines of race, ethnicity, social class, gender language, and their interactions. Historical and social antecedents, current day policies and practices, extant research consequences and future trends.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
TAL 790. Advance Topics in Education. 3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. Course number indicates appropriate student audience. See Course Notes for specific topic.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 793. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study form will be required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 794. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study form will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

TAL 796. Practicum/Internship: Elementary Exceptional Student Education Classroom. 1-6 Credit Hours.
A comprehensive program of observations and supervised teaching in an elementary exceptional student education classroom. The student spends full time in the classroom participating in all activities of the teacher under the guidance of school and university personnel.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 801. Advanced Individual Study for Doctoral Students. 1-3 Credit Hours.
Individual work on a special project under faculty guidance. Application for Admission to Advanced Individual Study form will be required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's or Ed.S. thesis enrolls for credit. In most departments no to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 815. Post-Candidacy Thesis Research. 1-12 Credit Hours.
Masters-degree and Ed.S. students enrolled for credit as determined by advisor. Credit awarded when thesis is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

TAL 825. Continuous Registration - Master's Study.. 1 Credit Hour.
To establish residence for non-thesis master's study who are preparing for major examinations or working on culminating project. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

TAL 830. Pre-Candidacy Dissertation Research.. 1-12 Credit Hours.
Doctoral students enrolled for credit as determined by advisor. Credit is awarded when dissertation is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 835. Doctor of Education Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.
TAL 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.
Doctoral students enrolled for credit as determined by advisor. Credit is awarded when dissertation is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

TAL 850. Research in Residence. 1 Credit Hour.
Doctoral students enrolled for credit as determined by advisor. Credit awarded when dissertation is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

TAL 862. Principles of Curriculum Development and Classroom Management for TESOL. 3 Credit Hours.
Components of curriculum and instructional management in ESOL classrooms. Pupil/teacher interaction, curriculum organization, student assessment and evaluation, materials development and adoption, utilization of resources, and classroom organization will be covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

TAL 878. Teaching in the Elementary School (YR). 3-6 Credit Hours.
A comprehensive year-long program in observation and supervised teaching in the elementary school. The student spends full time in an elementary school participating in all activities of the teacher under the guidance of school and university personnel following the calendar of the school system.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

Ed.D. in Applied Learning Sciences
Overview
The 45-credit post-Master's EDD in Applied Learning Sciences prepares students for careers that require expertise in multiple facets of human learning.

Admission Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide official transcripts showing completion of an earned master's degree from an accredited institution and an acceptable master's grade point average. A minimum of 3.0 master GPA is required.
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Education (Ed.D.)
In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ed.D. program will include the following:
- an earned master’s degree is required;
- letters of recommendation should address the applicant’s academic potential;
• available student space in the program; and
• admissions interview.

International Applications
All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision
Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

Honor Code/Handbook of Policies and Procedures
The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

## Mission

The EDD program in the Applied Learning Sciences will provide people across a broad array of fields with the intellectual tools to (re)think about how they interact with subordinates, trainees, mentees, and students as learners and to (re)think their own roles as being that of a teacher where teachers design, implement, and evaluate the impacts of learning environments for their students.

## Goals

The program's three specific foci, which students are expected to integrate in a culminating applied project, are:

- **Learning**: how people, as individuals, groups, or parts of an organization, learn;
- **Design**: the design, implementation, and revision of learning environments that enhance human learning; and
Assessment: the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

Student Learning Outcomes
As a result of the EDD program, graduates will:

- **Learning:** Be able to assess learners’ initial knowledge as regards to what said learners are supposed to understand;
- **Design:** Be able to design and implement learning environments that will help learners to learn and to understand their intended outcomes; and,
- **Assessment:** Be able to evaluate and modify learning environments against how well learners achieved their own learning outcomes.

Ed.D. in Applied Learning Sciences (Online)

Overview
The 45-credit post-Master’s EDD in Applied Learning Sciences prepares students for careers that require expertise in multiple facets of human learning.

Applying to the Online Programs
In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (https://myonline.miami.edu/SignIn/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

International Students (who attended college/university outside of the United States)
All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services listed below. Follow the specific instructions of the selected evaluation service to request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation. We do not issue any student Visa’s for International UOnline students.

All online international students who have been admitted to an online program at the University of Miami are not eligible for an F-1 visa.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will not be received and will delay the admissions process.

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower –Suite 902, Locator Code: 2991
Miami, FL 33146

The evaluation report and supporting documents are required before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

Approved Evaluation Services
- Educational Credential Evaluators, Inc. (ECE) (https://www.ece.org/)
- World Education Services (WES) (http://www.wes.org/students/)
TOEFL (Test of English as a Foreign Language)
If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl/) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. The TOEFL code for the University of Miami is 5815.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

TOEFL Internet Minimum Score: 94
TOEFL Computer Minimum Score: 240
TOEFL Paper Minimum Score: 600

TOEFL Waiver
The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

• Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
• Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
• Students have lived and worked in an English-speaking country for the past two or more years.

Letters of Recommendation
Students will input their recommender's information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student's recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student's Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

Admissions & Admissions Decisions
Once the University receives the student's complete application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)
If the application meets the standard admissions requirements and the University has received all official transcripts, from all institutions entered on their online application, the student will receive an offer of full admission in approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Conditional Admit (with Unofficial Transcripts and/or Test Scores)
If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended, as entered on their online application, and/or the student's unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF the document is in a pdf format and ALL of the following items are legible on the transcript document:

• Name of the institution
• Student name
• Cumulative Grade Point Average (preferred)
• Course numbers
• Course names
• Credit hours earned
• Grades earned
• Degree conferred with date (if applicable)
• No other documents will be accepted

Students receive notification typically within 48 business hours after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students MUST pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial...
Aid award no later than the first day of class. Student’s Financial Aid funds will not be disbursed until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student’s financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (http://bulletin.miami.edu/graduate-student-handbook-online-students/cost-fees-billing-payment/) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is only available to online students at this time. UM Employees are not eligible for Monthly Payment Plans at this time.

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (http://www.miami.edu/index.php/registrar/calendar/) Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for official transcript deadlines.

Accepting Admission

When a student’s admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer. Students can also view the admissions decision online application portal found here (https://myonline.miami.edu/).

A student’s Enrollment Advisor will guide him/her through the next steps (https://myonlinesupport.miami.edu/recently-admitted/) to accept their offer of admission and pay their non-refundable enrollment deposit. A student’s offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have fourteen (14) calendar days to accept their offer of admission by paying their non-refundable $300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day timeframe according to the Deposit Date on the official Admission letter, the student’s application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the official Deposit Deadline as set on the UOnline Academic Calendar (http://www.miami.edu/index.php/register/calendar/), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. Deferrals are not permitted unless the student has been approved for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020).

Deferral Exception Appeal

In extenuating circumstances, students may choose to apply for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and should contact their Enrollment Advisor for additional information regarding documents required for admission. Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. (http://www.miami.edu/index.php/register/calendar/) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.

- If a student’s Deferral Exception application is denied, the student’s offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.
- If a student’s Deferral Exception is approved, the student’s start date will be updated to the next immediate term and the student will be sent a new admissions letter indicating the approval and updated start date.
  - If a student has not accepted their offer of admission, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day time frame, the student’s application will be withdrawn and the student must sit out (1) one additional term before reapplying.
  - If a student has already accepted their offer of admission, and has been approved for a deferral exception, the student’s start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.
Any student who chooses to reapply for a future term is not guaranteed admission and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

The offer of Admission Expiration
Offers of Admission are valid for one term only unless a Deferral Exception has been granted. To officially accept the offer of admission, a student must log into Canelink (https://myonlinesupport.miami.edu/recently-admitted/) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission
There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student’s original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
- A student failed to meet the requirements of a Conditional Admission.
- A student failed or did not complete the Student Readiness Orientation (SRO)
- A student’s Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application (https://myonline.miami.edu/signup/) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application. All students who are readmitted will need to complete the Student Readiness Orientation (SRO) by their deadline, regardless of prior completion, and adhere to all admissions deadlines as set forth in the Academic Calendar.

Not Admitted
If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically within 48 business hours after the University received the student’s completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (https://myonline.miami.edu/signup/).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts
- MUST Arrive in a sealed envelope with the school’s stamp/seal across the back or on the institution’s official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar’s signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower –Suite 902, Locator Code: 2991
Miami, FL 33146

Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. Students are responsible for ensuring that they have their transcripts sent to the address above and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).

Electronic Transcripts
Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student’s Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.
Official Transcripts, Scores & Conditional Admission
The University must receive official transcripts for all institutions attended, as entered on their online application, before any student can be considered fully admitted into the University.

Official Transcripts/International Evaluations Due Date
If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student’s official transcripts from all institutions attended, as entered on their online application, or International Evaluations from an approved evaluation service, by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student’s official transcripts. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

Official Test Scores Due Date
If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University MUST receive their official test scores by the the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the student’s official test score(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

UONLINE OFFICIAL TEST SCORE SCHOOL CODES

TOEFL CODES: Institution: 5815

GRE CODES: Institution (All UOnline programs): 4405

GMAT CODES:
School of Business - UOnline Finance/Accounting Certificate: 7NV-S1-23
School of Business - UOnline Master of Finance: 7NV-S1-35
School of Business - UOnline Master of Professional Accounting: 7NV-S1-53
School of Business - UOnline Professional MBA: 7NV-S1-01
College of Arts & Sciences - UOnline Master of Public Administration: 7NV-HM-66
School of Education - UOnline Master & EdD of Applied Learning Sciences: 7NV-HM-66

Financial Aid & Tuition Payment
If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student MUST pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

Official Transcripts and Test Scores Not Received
If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

• A student will be removed from their current course and next course
• A student will be administratively withdrawn and may be reinstated if the University receives the student’s official transcripts.
• A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

Enrollment Deposit
Once students have received their offer of admission or conditional admission, they will pay a non-refundable enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.

What the Enrollment Deposit Is
The enrollment deposit payment is:

• Paid one time per UOnline program
• Non-refundable including if the student’s Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
• Due no later than the date listed on the academic calendar.
• Applied against a student’s 1st tuition bill
• Valid for as long as the Offer of Admission is valid;
  • If a student’s Offer of Admission for their UOnline program has expired and he/she reapplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
• Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.

• Not transferrable to any campus-based program.

**Paying the Enrollment Deposit**

After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu/) to pay the student’s enrollment deposit with the following payment options:

• Online Credit Card payment:
  • MasterCard
  • Visa
  • American Express
  • Discover

• E-check (drawn on a US bank only)
  • Bank-to-Bank, Exchange Bureau or Wire Transfer.
    • Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.

• International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments/)

### Mission

The EDD program in the Applied Learning Sciences will provide people across a broad array of fields with the intellectual tools to (re)think about how they interact with subordinates, trainees, mentees, and students as learners and to (re)think their own roles as being that of a teacher where teachers design, implement, and evaluate the impacts of learning environments for their students.

### Goals

The program’s three specific foci, which students are expected to integrate in a culminating applied project, are:
• **Learning**: how people, as individuals, groups, or parts of an organization, learn;
• **Design**: the design, implementation, and revision of learning environments that enhance human learning; and
• **Assessment**: the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

### Student Learning Outcomes

As a result of the doctoral program, graduates will:

• **Learning**: Be able to assess learners' initial knowledge as regards to what said learners are supposed to understand;
• **Design**: Be able to design and implement learning environments that will help learners to learn and to understand their intended outcomes; and,
• **Assessment**: Be able to evaluate and modify learning environments against how well learners achieved their own learning outcomes.

### Ed.S. Early Childhood Special Education

http://sites.education.miami.edu/early-childhood-special-education-ed-s/

This program is closing and no longer accepting new students pending approval by the Southern Association of Colleges and Schools Commission on Colleges.

The Specialist in Education (Ed. S.) degree program with a concentration in Early Childhood Special Education includes coursework and practicum experiences that could lead to endorsement in Pre-Kindergarten Disabilities. Please contact the Florida Department of Education’s Bureau of Educator Certificate for any questions regarding endorsement.

In addition to the required 30 credits listed below, students in this program (a) may be assigned advanced level assignments within courses; (b) may be required to complete additional graduate level coursework; (c) will be required to increase the level of implementation of the capstone project; and (d) will be required to write a publishable paper based on the advocacy project and submit it a practitioner special education journal.

### Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

### Master of Science in Education (M.S.Ed.)

**In addition** to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

• For some M.S.Ed. programs in TAL: Teachers with **at least** three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

### International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.
Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

2020-2021  2181
M.S.Ed. in Applied Learning Sciences

The 30-credit MSED in Applied Learning Sciences focuses on human learning, whether alone or in social settings. The program’s three specific foci, which students are expected to integrate in a culminating applied project, are:

- **Learning**: how people, as individuals, groups, or parts of an organization, learn;
- **Design**: the design, implementation, and revision of learning environments that enhance human learning; and
- **Assessment**: the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

**Application Requirements**

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

**Master of Science in Education (M.S.Ed.)**

*In addition* to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

**Honor Code/Handbook of Policies and Procedures**

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission
The MSEd program in the Applied Learning Sciences will provide people across a broad array of fields with the intellectual tools to (re)think about how they interact with subordinates, trainees, mentees, and students as learners and to (re)think their own roles as being that of a teacher where teachers design, implement, and evaluate the impacts of learning environments for their students.

Goals
As a result of the MSEd program, graduates will:

• Be able to assess learners’ initial knowledge as regards to what said learners are supposed to understand;
• Be able to design and implement learning environments that will help learners to learn and to understand their intended outcomes; and,
• Be able to evaluate and modify learning environments against how well learners achieved their own learning outcomes.

Student Learning Outcomes
M.S.Ed. in Applied Learning Sciences (Online)

Overview
The 30-credit MSED in Applied Learning Sciences focuses on human learning, whether alone or in social settings.

Applying to the Online Programs
In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of “B” or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our online application portal found here (https://myonline.miami.edu/SignIn/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

International Students (who attended college/university outside of the United States)
All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services listed below. Follow the specific instructions of the selected evaluation service to request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation. We do not issue any student Visa’s for International UOnline students.

All online international students who have been admitted to an online program at the University of Miami are not eligible for an F-1 visa.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will not be received and will delay the admissions process.

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower –Suite 902, Locator Code: 2991
The evaluation report and supporting documents are required before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

**Approved Evaluation Services**
- Educational Credential Evaluators, Inc. (ECE) (https://www.ece.org/)
- World Education Services (WES) (http://www.wes.org/students/)

**TOEFL (Test of English as a Foreign Language)**
If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl/) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. The TOEFL code for the University of Miami is 5815.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

TOEFL Internet Minimum Score: 94
TOEFL Computer Minimum Score: 240
TOEFL Paper Minimum Score: 600

**TOEFL Waiver**
The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived and worked in an English-speaking country for the past two or more years.

**Letters of Recommendation**
Students will input their recommender’s information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student's recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student's Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

**Admissions & Admissions Decisions**
Once the University receives the student's complete application with all required documents, the admissions review process will start.

**Regular Admit (with Official Transcripts)**
If the application meets the standard admissions requirements and the University has received all official transcripts, from all institutions entered on their online application, the student will receive an offer of full admission in approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

**Conditional Admit (with Unofficial Transcripts and/or Test Scores)**
If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended, as entered on their online application, and/or the student’s unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF the document is in a pdf format and ALL of the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit hours earned
- Grades earned
• Degree conferred with date (if applicable)
• No other documents will be accepted

Students receive notification typically **within 48 business hours** after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students **MUST** pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student's Financial Aid funds **will not be disbursed** until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student's financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (http://bulletin.miami.edu/graduate-student-handbook-online-students/cost-fees-billing-payment/) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is **only available to online students** at this time. **UM Employees are not eligible for Monthly Payment Plans at this time.**

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (http://www.miami.edu/index.php/registrar/calendar/) Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for official transcript deadlines.

**Accepting Admission**

When a student's admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer. Students can also view the admissions decision the online application portal found here (https://myonlinesupport.miami.edu/). A student's Enrollment Advisor will guide him/her through the next steps (https://myonlinesupport.miami.edu/recently-admitted/) to accept their offer of admission and pay their non-refundable enrollment deposit. A student's offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have **fourteen (14) calendar days to accept their offer of admission** by paying their non-refundable $300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day timeframe according to the Deposit Date on the official Admission letter, the student's application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the last official Deposit Deadline as set on the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. Deferrals are not permitted unless the student has been approved for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020).

**Deferral Exception Appeal**

In extenuating circumstances, students may choose to apply for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and contact their Enrollment Advisor for additional information regarding documents required for admission. Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. (http://www.miami.edu/index.php/registrar/calendar/) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.
• If a student's Deferral Exception application is denied, the student's offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.

• If a student's Deferral Exception is approved, the student's start date will be updated to the next immediate term and the student will be sent a new admissions letter indicating the approval and updated start date.
  • If a student has not accepted their offer of admission, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day time frame, the student’s application will be withdrawn and the student must sit out (1) one additional term before reapplying.
  • If a student has already accepted their offer of admission, and has been approved for a deferral exception, the student's start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.

Any student who chooses to reapply for a future term is not guaranteed admission and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

The offer of Admission Expiration

Offers of Admission are valid for one term only unless a Deferral Exception has been granted. To officially accept the offer of admission, a student must log into Canelink (https://myonlinesupport.miami.edu/recently-admitted/) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

• A student’s original Offer of Admission has expired and he/she never started the online program.
• A student requests to change to a different program.
• A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
• A student failed to meet the requirements of a Conditional Admission.
• A student failed or did not complete the Student Readiness Orientation (SRO)
• A student’s Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application (https://myonline.miami.edu/signup/) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application. All students who are readmitted will need to complete the Student Readiness Orientation (SRO) by their deadline, regardless of prior completion, and adhere to all admissions deadlines as set forth in the Academic Calendar.

Not Admitted

If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically within 48 business hours after the University received the student's completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (https://myonline.miami.edu/signup/).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts

• MUST Arrive in a sealed envelope with the school’s stamp/seal across the back or on the institution’s official envelope
• Be opened only by a member of the University of Miami admission staff
• Have a Registrar’s signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower –Suite 902, Locator Code: 2991
Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. Students are responsible for ensuring that they have their transcripts sent to the address above and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).

**Electronic Transcripts**

Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student’s Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.

**Official Transcripts, Scores & Conditional Admission**

The University must receive official transcripts for all institutions attended, as entered on their online application, before any student can be considered fully admitted into the University.

**Official Transcripts/International Evaluations Due Date**

If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student’s official transcripts from all institutions attended, as entered on their online application, or International Evaluations from an approved evaluation service, by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student’s official transcripts. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**Official Test Scores Due Date**

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University MUST receive their official test scores by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the student’s official test score(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**UONLINE OFFICIAL TEST SCORE SCHOOL CODES**

**TOEFL CODES:**  Institution: 5815

**GRE CODES:**  Institution (All UOnline programs): 4405

**GMAT CODES:**

- School of Business - UOnline Finance/Accounting Certificate: 7NV-S1-23
- School of Business - UOnline Master of Finance: 7NV-S1-35
- School of Business - UOnline Master of Professional Accounting: 7NV-S1-53
- School of Business - UOnline Professional MBA: 7NV-S1-01
- College of Arts & Sciences - UOnline Master of Public Administration: 7NV-HM-66
- School of Education - UOnline Master & EdD of Applied Learning Sciences: 7NV-HM-66

**Financial Aid & Tuition Payment**

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student MUST pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

**Official Transcripts and Test Scores Not Received**

If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

- A student will be removed from their current course and next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student’s official transcripts.
- A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

**Enrollment Deposit**

Once students have received their offer of admission or conditional admission, they will pay a non-refundable enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.
What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- **Non-refundable** including if the student’s Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than the date listed on the academic calendar.
- Applied against a student’s 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
  - If a student’s Offer of Admission for their UOnline program has **expired** and he/she reapply to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
  - Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
- **Not transferrable** to any campus-based program.

Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu/) to pay the student’s enrollment deposit with the following payment options:

- Online Credit Card payment:
  - MasterCard
  - Visa
  - American Express
  - Discover
- E-check (drawn on a US bank only)
  - Bank-to-Bank, Exchange Bureau or Wire Transfer.
    - Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.
- International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments/)

### Mission

The MSEd program in the Applied Learning Sciences will provide people across a broad array of fields with the intellectual tools to (re)think about how they interact with subordinates, trainees, mentees, and students as learners and to (re)think their own roles as being that of a teacher where teachers design, implement, and evaluate the impacts of learning environments for their students.

### Goals

The program’s three specific foci, which students are expected to integrate in a culminating applied project, are:

- **Learning**: how people, as individuals, groups, or parts of an organization, learn;
- **Design**: the design, implementation, and revision of learning environments that enhance human learning; and
- **Assessment**: the assessment of learning and the evaluation of individual, social, technological, and design factors that advance or impede learning.

### Student Learning Outcomes

As a result of the MSEd program, graduates will:

- **Learning**: Be able to assess learners’ initial knowledge as regards to what said learners are supposed to understand;
- **Design**: Be able to design and implement learning environments that will help learners to learn and to understand their intended outcomes; and,
- **Assessment**: Be able to evaluate and modify learning environments against how well learners achieved their own learning outcomes.
M.S.Ed. in Early Childhood Special Education

http://sites.education.miami.edu/early-childhood-special-education-m-s-ed/

This program is closing and no longer accepting new students pending approval by the Southern Association of Colleges and Schools Commission on Colleges.

Early Childhood Special Education prepares students to work with young children with disabilities and their families in inclusive, collaborative, and natural environments. As part of the 30 credits of coursework, students complete 6 credits of practicum experiences in high-need urban settings involving collaborative partners within the UM as well as community agencies. The program culminates in the presentation of an Advocacy Capstone project. Coursework, practicum experiences and Capstone projects start scholars on a pathway to advocacy for high-need children and their families.

The program includes coursework and practicum experiences that could lead to endorsement in Pre-Kindergarten Disabilities. Please contact the Florida Department of Education’s Bureau of Educator Certificate for any questions regarding endorsement.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

### M.S.Ed. in Education and Social Change

http://sites.education.miami.edu/education-social-change-m-s-ed/
Overview

The Education and Social Change program's conceptual framework focuses on the world of education beyond classroom walls, the classroom context of teaching, and the students in classrooms, comprising a holistic, developmental approach across the three areas. Overall, the goals of the program track are to improve instruction for diverse populations, to prepare teachers for leadership roles within their schools, and to develop capacity to lead future change efforts in support of public education.

The Education and Social Change M.S. Ed. program track is made up of 10 courses (3 credits each) or 30 credits. Following the University of Miami’s policies for credit transfer, it is possible to transfer in and apply up to six (6) graduate credit hours from an accredited institution's similar course content listed below to meet the program's 30-credit requirement for degree completion. See graduate program advisor for guidance.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the M.S.Ed. program will include the following:

• For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development's Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission
The mission of the School of Education and Human Development (SEHD) is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community. The Education and Social Change Master’s degree's goals and objectives mirror the SEHD’s mission statement by focusing on educational policy systems at the federal, state, and local levels, as well as providing instructional opportunities to learn in order to promote equity and social justice in public schools and classrooms. While other new or continuing Master's in Education programs in the Teaching and Learning (TAL) department focus on specific instructional areas or student populations, the Education and Social Change (ESoC) program track is the only TAL master's program offering the graduate coursework required by the Florida Department of Education (FDOE) to fulfill Full Certification requirements when the teacher candidate has secured a FDOE-issued Temporary Certificate. No formal background in education or teaching experience is required. Thus, The ESoC program provides cutting edge theoretical and practical understandings to teaching and learning for social justice and equity in diverse classroom settings. Additionally, the program partially fulfills state teacher certification requirements for novice teachers with a FDOE Temporary Teaching Certificate.

Goals
The ESoC program coursework will build the leadership and advocacy skills of graduates to become more effective teachers of diverse students and lead efforts that support public education and equitable opportunities for all public school students. Upon completion of the program, students will have the knowledge and capacity needed to advocate, create and lead social change efforts in education.

Student Learning Outcomes
• Students will demonstrate knowledge of diversity from ecological, multicultural, and global perspectives.
• Students will be able to communicate well in oral, written, and digital media formats.
• Students will demonstrate knowledge of instructional practices for diverse learners and a Systems Change approach to education reform efforts.

M.S.Ed. in Special Education
http://sites.education.miami.edu/special-education-m-s-ed/

Overview
This degree prepares individuals to work with students with disabilities in collaborative school environments. The course of study consists of 30-36 credits over six terms (one year that includes two summers). The program accommodates both working teachers and individuals seeking initial teacher certification in special education.

The initial certification option includes 6-credit hours of student teaching including related Florida Educator Accomplished Practices support. The State approved program provides competencies for initial certification in K-12 special education with reading and ESOL endorsement.

Application Requirements
Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:
• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)
In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:
• For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Mission
Over the last decade, special education has been a critical shortage area in teaching at the national, state, and district levels. The US Department of Education reported on the designated teacher shortage areas by State for 2017-2018 and noted that special education is a critical shortage area in the state of Florida, the site of this program (See http://www2.ed.gov/about/offices/list/ope/pol/tsa.doc). Further, the Miami-Dade County Public School district has issued a recruitment call for certified special educators to meet the critical shortage area demand. Almost 50% of the current MDCPS open teaching positions require a special education teaching certification. This goal of this program is to address the critical shortage by producing certified special education teachers who possess the requisite knowledge and skills to pursue careers in special education.

Goals
The specific learning objectives for this program are to increase:

• Knowledge of foundations of special education including knowledge of the IEP and the transition process;
• Knowledge of assessment and evaluation including reading, language/communication, and behavioral assessments and supports; and
• Knowledge of effective instructional practices in special education.

Student Learning Outcomes
• Students will demonstrate knowledge of foundations of special education.
• Students will demonstrate knowledge of assessment and evaluation for special education.
• Students will demonstrate knowledge of instructional practices in special education.

M.S.Ed. in Teaching English to Speakers of Other Languages (TESOL) and Bilingual Education (BE)
https://sites.education.miami.edu/tesol-and-bilingual-education/

Overview
This program is for teachers in Pre-K-16 contexts—English as a Second Language (ESL) specialists or mainstream content area teachers who work with emergent bilinguals or English language learners (ELLs) in the U.S. The Florida Department of Education ESOL Endorsement requirements are embedded within the program’s courses. This is a hybrid program with face-to-face meetings for locals; those not able to join the local meetings would be able to join virtually.

Concentration in Bilingual Education
This program is for U.S. teachers in Pre-K-12 settings who wish to boost their proficiency in Spanish and/or teach in dual language learning (DLL) or ESOL contexts. Typically DLL had ended in 5th or 6th grade; however, there is a recent and progressive push for biliteracy and bilingualism, which requires biliteracy in middle and high school grades, across content areas. Some Spanish language courses may be required, depending on proficiency. This is an hybrid program with face-to-face meetings for locals; those not able to join the local meetings would be able to join virtually.
Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

- Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
- provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- resume;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with at least three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Course Sequence Plan that must be on file in the Office of Graduate Studies by the end of the first semester of enrollment.

Honor Code/Handbook of Policies and Procedures

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

Mission

The mission of this program is to address the critical need for English language professionals who possess the requisite knowledge and skills to pursue careers in TESOL.
Goals

• Students will acquire foundational knowledge of language acquisition and development, research, partnership, and research in TESOL and Bilingual education.
• Students will acquire knowledge of planning, implementing, and managing ESL/bilingual education and content instruction.
• Students will acquire knowledge of assessment for English language learners, including language proficiency assessment and classroom-based assessment for ESL/bilingual education.

Student Learning Outcomes

• Students will demonstrate knowledge of foundations of TESOL and bilingual education, including language and culture, language acquisition and development, and ESL/bilingual education research, partnerships and advocacy.
• Students will acquire knowledge of planning, implementing, and managing ESL/bilingual education and content instruction.
• Students will demonstrate knowledge of assessment for English language learners, including language proficiency assessment and classroom-based assessment for ESL/bilingual education.

Ph.D. in Teaching and Learning

Overview

The Ph.D. Program in the Department of Teaching and Learning prepares highly qualified individuals to serve as educational leaders, researchers, designers and teacher educators whose work will contribute to improving teaching and learning both in and out of schools. The program has a strong focus on diversity and equity and supports faculty and student research in areas such as early development, instructional interventions, innovative use of technology, multilingualism, teacher preparation, family engagement, disability, education policy, and science, technology and mathematics learning. Incoming students are assigned a Supervisory Committee to advise them in developing their Program of Study. With the approval of their Supervisory Committee, doctoral students may apply up to 30 credits from an earned Master's degree towards the 60 required credits of coursework. Students must also enroll in 12 dissertation credits.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to all Graduate Programs in the School as well as specific documents listed under each concentration.

Applicants must:

• Graduate Record Exam (GRE) requirements may be waived for applications to Spring 2021 and following, pending final approvals. However, if the GRE is required for admissions, applicants must achieve acceptable scores on the GRE taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) or International English Language Testing Systems (IELTS) and the GRE;
• provide official transcripts showing completion of a bachelor’s degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
• provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
• provide a personal statement that addresses the mission and purpose of the program being applied to;
• resume;
• take part in an admissions interview (required by some programs); and
• exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD’s graduate programs, consideration for admission to the Ph.D. program will include the following:

• letters of recommendation should address the applicant’s academic potential;
• available student space in the program;
• For TAL: availability of faculty advisor willing to mentor the student.
**International Applications**

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the Office of International Student and Scholar Services. For an appropriate link to these requirements, please visit the Graduate School website.

**Admission Decision**

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study that must be on file in the Office of Graduate Studies by the end of the first academic year of enrollment.

**Honor Code/Handbook of Policies and Procedures**

The School of Education and Human Development follows the Graduate School’s Honor Code. All students are required to review the Graduate Student Honor Code and the School of Education and Human Development’s Handbook of Policies and Procedures for Graduate Students and submit the signed Acknowledgement of Receipt located on page 3 by the end of their first semester of enrollment.

**Mission**

The mission of the School of Education and Human Development is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

**Goals**

The goal of the doctoral program in Teaching and Learning (TAL) is to provide professional preparation for careers in research and teacher education in one of the following three specialty areas: Language, Literacy, and Learning in Multilingual Settings (LLLMS); Science, Technology, Engineering and Mathematics (STEM) Education; and Special Education (SPED).

All students are expected to develop and demonstrate a high level of competency in their area of specialization, in their knowledge of research methods, and in their knowledge of diversity as it applies to their area of research and practice. We expect that our graduates will go on to work as faculty in Institutions of Higher Education or as educational leaders in school systems, educational foundations, research organizations, and other settings.

**Student Learning Outcomes**

- Students will demonstrate knowledge of the literature on diversity in education, with particular attention to racial, ethnic, linguistic, and cultural diversity.
- Students will demonstrate in-depth knowledge of their area of specialization, i.e., LLLMS, STEM, or Special Education.
- Students will demonstrate their knowledge of research methods appropriate to their area of specialization.

**Engineering**

[http://www.miami.edu/engineering](http://www.miami.edu/engineering)

**Degree Programs**

The College of Engineering offers courses of graduate study leading to the degrees of:

- Master of Science (Environmental Health and Safety)
- Master of Science (Construction Management)
- Master of Science (Management of Technology)
- Master of Science in Architectural Engineering
- Master of Science in Biomedical Engineering
- Master of Science in Biomedical Engineering (Medical Physics)
- Master of Science in Civil Engineering
- Master of Science in Electrical and Computer Engineering
- Master of Science in Industrial Engineering
- Master of Science in Mechanical Engineering
- Master of Science in Mechanical Engineering (Additive Manufacturing)
- Master of Science in Ocean Engineering

Ph.D. degrees are offered in the areas of:

- Biomedical Engineering
- Biomedical Engineering (Medical Physics)
- Civil Engineering
- Civil Engineering (Architectural or Environmental Emphasis)
- Electrical and Computer Engineering
Admission Requirements

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements or visit coe.miami.edu/apply

B.S. to M.S.

In engineering, the master’s – not the bachelor’s – degree is the first professional degree, so all engineers should seek to obtain an M.S. degree. In order to facilitate the obtainment of an M.S. degree, the University of Miami (UM) College of Engineering (CoE) offers the M.S. degree through a number of possible venues or entry points, as summarized below. Every one of our M.S. degree programs requires 10 courses or 30 credit hours to complete; this can be typically undertaken in one, 9-month academic year (i.e., by enrolling in 15 credit hours per semester).

General Admission Requirements
1. A B.S. degree from an accredited program.
2. Typically a cumulative grade point average of 3.0 on a 4.0 scale
3. Most international students must provide a TOEFL iBT score of 80 or higher, or an IELTS score of 6.5 or higher to demonstrate English proficiency.

B.S. to Ph.D.

Direct admission to the Ph.D. track by students holding B.S. degrees is limited to students with exceptional credentials. These credentials typically include a minimum GPA of 3.5 on a 4.0 scale and a minimum GRE of 308 (verbal plus quantitative). After completion of the Departmental M.S. requirements, students enrolled in the direct B.S. to Ph.D. track may apply for an M.S. degree.

M.S. to Ph.D.

Criteria for admission into the Ph.D. program for students with an appropriate M.S. degree include a minimum GPA of 3.5 on a 4.0 scale within their M.S. degree program and a minimum GRE of 302 (verbal plus quantitative).

The College offers graduate programs leading to degrees in both traditional and interdisciplinary areas of study. The primary focus of the College lies in those areas and problems that cross traditional lines. Given the interdisciplinary nature of programs, flexibility is provided in course selection which allows each student to pursue a program especially tailored to the goals of the individual. Given the strengths of the University, graduate programs are offered in conjunction with other schools or units. These programs include:

- Biomedical Engineering in conjunction with the School of Medicine
- Engineering Management
  - Dual M.S. in Industrial Engineering and M.B.A. in conjunction with the Miami Herbert Business School
- M.S. program in Management of Technology in conjunction with the Miami Herbert Business School
- M.S. in Environmental Health and Safety in conjunction with the School of Medicine.

The M.S. and Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College must submit three letters of recommendation from individuals familiar with the applicant’s abilities and background.

Students who hold a bachelor’s degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student’s overall program is planned by the student and the student’s advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

Accepted M.S. applicants can apply and be considered on a competitive basis for partial tuition scholarships. Need based aid also can be awarded, as determined through the financial aid process. A minimum graduate GPA of 3.0 must be maintained in order to maintain satisfactory progress.

Accepted Ph.D. applicants financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.
Financial support is provided predominantly to students pursuing Ph.D. degrees.

For further information, contact Office of Admission, College of Engineering at gradadm.eng@miami.edu or 305-284-2404, option 2.

**Degree Requirements**

**Requirements for the Master of Science Degree (Thesis Option)**
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 course credit hours must be at the 700-level.
- 6 credit hours of the required 30 must be earned in thesis work.
- An oral examination in defense of the thesis.

**Requirements for the Master of Science Degree (Non-Thesis Option)**
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 of the course credit hours must be at the 700 level.
- In most departments a 3 credit hour graduating project is required.

**Requirements for the Doctor of Philosophy Degree**
- The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
- Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.
- At least 18 credit hours in courses must be taken beyond the requirements for the M.S. degree of which 6 credit hours must be at the 700 level.
- All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.
- Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.
- Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credit hours or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.
- Departments may have requirements in addition to the above general requirements for their own graduate programs.

For further information, contact Office of Admission, College of Engineering at gradadm.eng@miami.edu or 305-284-2404, option 2.

**Postgraduate Certificate Program**
- A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 credit hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.
- Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.
- The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.
- No transfer credit hours will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.
- Basic admission requirement for the Program is a bachelor's degree in a recognized field of engineering or registration as a Professional Engineer by examination.
- Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Master's Degree, and may apply up to 6 credit hours toward the M.S. degree.

**Ph.D. Course Exchange with Florida International University**

University of Miami Ph.D. students are eligible to enroll in courses at Florida International University for a maximum of 6 credit hours. Enrollment in FIU courses requires approval through the student's program of study committee. See FIU/UM Ph.D. exchange section of the Graduate School section of the bulletin for more details.

**Biomedical Engineering**

**Dept. Code:** BME

**Degree Programs**

The Department of Biomedical Engineering offers three different programs of graduate study leading to the degrees of Master of Science (MS) and Doctor of Philosophy (PhD) in Biomedical Engineering:
• BS/MS in Biomedical Engineering
• MS in Biomedical Engineering
• PhD in Biomedical Engineering (including MD/PhD).

The Bachelor of Science / Master of Science (BS/MS) program is available only to qualified undergraduate students enrolled within the Department of Biomedical Engineering. This program gives qualified internal undergraduate students the opportunity to receive a BS and MS degree in five years.

The graduate program in biomedical engineering includes a medical physics program accredited by the Commission on Accreditation of Medical Physics Educational Programs (CAMPEP). This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The graduate programs in Biomedical Engineering at the University of Miami provide a diverse interdisciplinary training experience through collaboration with clinical programs at the University of Miami School of Medicine.

Areas of Research

The broad areas of research in Biomedical Engineering include:

• Imaging, optics and lasers, diagnostic and surgical instrumentation
• Biomechanics, microfluidics, biomaterials and tissue engineering
• Neural engineering, brain-computer-interfaces
• Medical physics

Graduate students receive training and conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Most of our graduate students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

Masters Programs in Biomedical Engineering
• B.S./M.S. Five-Year Program in Biomedical Engineering (p. 2214)
• M.S. in Biomedical Engineering (p. 2227)

Doctoral Program in Biomedical Engineering
• Ph.D. in Biomedical Engineering (p. 2234)

Certificate Program
• Medical Physics (p. 2243)

BME 601. Biochemistry and Cellular Physiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and subcellular systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 602. Human Physiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 603. Neurophysiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 606. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 607. LabView Applications for Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 610. Introduction to Medical Robotics. 3 Credit Hours.
This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.
Prerequisite: BME 211. And BME 310. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 612. Regulatory Control of Biomedical Devices. 3 Credit Hours.
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 613. Biomedical Systems Engineering. 3 Credit Hours.
This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufacturability, reliability, maintainability, feasibility demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 620. Medical Imaging Systems: X-ray and CT. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include imaging fundamentals, radiographic imaging (X-ray) system, and computed tomography (CT) system.
Prerequisite: ECE 201, BME 211, BME 330 Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 621. Medical Imaging Systems: MRI, NMI and Ultrasound. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include magnetic resonance imaging (MRI) system, nuclear medicine imaging (NMI) system, and ultrasound imaging system.
Prerequisite: ECE 201. And BME 211. And BME 330. Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 622. Scanning Electron Microscopy for Engineers. 3 Credit Hours.
Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 623. Neurosensory Engineering. 3 Credit Hours.
Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, neural signal processing, cochlear and visual implants.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 624. Neuromotor Engineering. 3 Credit Hours.
Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the fundamental engineering approaches, technical principles, neurophysiology, and applications of neuroprosthetics. We will cover Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 625. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 626. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 635. Advanced Biomaterials. 3 Credit Hours.
Applications of biomaterials in different tissue and organ systems. Relationshi p between physical and chemical structure of materials and biological system re sponse are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 640. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.
Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.
Prerequisite: ECE 315. And ECE 304. Or ECE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 641. Medical Electronic Systems Laboratory. 2 Credit Hours.
Laboratory course for BME 540. Design of medical instruments integrated with microcomputers and telemetry devices.
Pre/Corequisite: BME 540. Or BME 640.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
BME 645. Biomedical Optical Instruments. 3 Credit Hours.
Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included. 
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.

BME 646. Medical Applications of Lasers. 3 Credit Hours.
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagating in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 655. Fundamentals of Computational Neuroscience. 3 Credit Hours.
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 656. Principles of Cellular and Tissue Engineering. 3 Credit Hours.
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.
Prerequisite: BME 302. And BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 666. Cell and Tissue Engineering Laboratory. 1 Credit Hour.
The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 667. Tissue Engineering Lab. 1 Credit Hour.
The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.
Co-requisite: BME 635 or BME 665.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 670. Advanced Biomedical Signal Processing. 3 Credit Hours.
This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.
Prerequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 671. Introduction to Biosignal Processing Lab. 1 Credit Hour.
Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 675. Tissue Mechanics. 3 Credit Hours.
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large
deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
Prerequisite: BME 375. And BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 681. Radiation Biology and Physics. 3 Credit Hours.
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course
will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical
models for radiobiological analysis. Corequisite or prerequisite: BME 502 or permission of instructor.
Corequisite: BME 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 682. Radiation Therapy Physics. 3 Credit Hours.
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The
course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized
dosimetric analysis of radiation therapy to different clinical conditions.
Prerequisite: BME 310. Or Pre/Corequisite: BME 681.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 683. Radiation Protection. 3 Credit Hours.
This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment
and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of
radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff.
Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and
clinical needs.
Prerequisite: BME 681. Or Pre/Corequisite: BME 682.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 685. Immunoengineering. 3 Credit Hours.
Immunoengineering is a novel interdisciplinary field that combines biomaterial science and bioengineering design with immunology to develop cutting
edge technology for the prevention, rapid diagnosis and treatment of infectious diseases, cancer, autoimmune and inflammatory diseases. The goal of
this course is to provide a basic background in immunology that will allow understanding the need for immunoengineering and providing the tools to
be able to design novel vaccines, anti-inflammatory agents, and immunotherapy. Application of biomaterials for immunoengineering applications will
be reviewed through lectures, reading assignments and journal clubs. This course will provide valuable knowledge of an emerging field that will impact
both the academic and industrial world.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 687. Finite Element Analysis for Engineers. 3 Credit Hours.
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electro-
magnetic, optical, and fluid flow problems.
Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 695. Current Trends in Regenerative Medicine. 3 Credit Hours.
This team-taught course provides background, clinically-relevant applications and ethical aspects of regenerative medicine as it applies to multiple
types of cell, tissues and organs. The course is divided into modules focused on one application of regenerative medicine and taught by an expert in
that specific topic area. The course includes hands-on demonstrations of key techniques and problem-based group projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 699. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the
student's field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 702. Organs on Chips. 3 Credit Hours.
This course provides a comprehensive introduction to engineering the living and non-living components of cellular systems in a dish. The first part of
the course will focus on cell source, with an emphasis on human stem cell acquisition and differentiation. The second part of the course will focus on
biomaterials and methods for engineering tissues. The final portion of the course will be a survey of tissue engineering in the clinic today and existing
"Organ on Chip" platforms. Throughout the course, laboratory principles will be discussed, including cell culture and gene editing. Most of the assigned
reading will be recent primary literature articles.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 705. Senior Design Project. 3 Credit Hours.
Team-based capstone design project. Students will apply the Biodesign concepts learned in BME 401, including the phases of identify, invent and
implement. In the identify phase, students will perform unmet-need identification, technical and economic feasibility and screening to end with a
need statement and a set of specifications and constraints. In the invent phase, the students design a proof of concept prototype and perform a
technological de-risking exercise by means of a killer experiment. In the implement phase, student teams develop a device for which a risk analysis is
completed, and verification protocols are designed and performed. Student teams are required to report their progress on a regular basis.
Prerequisite: BME 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 706. Master's Project. 3 Credit Hours.
Comprehensive MS research or design project in biomedical engineering. Open only to students who are enrolled in the MS program. This course is a
requirement for all MS students in biomedical engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 711. Accelerated Basic Science Curriculum. 1-9 Credit Hours.
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive
complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and
Neurophysiology, Systematic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript
for this course. MD-PhD Students Only
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BME 713. Application of Computers in Medicine. 3 Credit Hours.
Applications in the clinical and medical research laboratories for physiological data acquisition, analysis, and management of patient records.
Differences among computer systems and languages for clinical and research activities are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 722. Scanning Electron Microscopy Special Projects. 3 Credit Hours.
An advanced course for graduate students with basic skills in SEM. Course is open only to masters or Ph.D. students. Students will have an
opportunity to do independent research under supervision of the instructor on special projects of interest that may be related to their field of study as
long as it is not part of their thesis or dissertation.
Prerequisite: BME 522 Or BME 622.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 725. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BME 726. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 728. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 729. Advanced Medical Imaging. 3 Credit Hours.
Analysis of contemporary medical imaging systems and the associated technologies. The course focuses on principles of advanced medical imaging systems. Topics include multimodality imaging, three-dimensional image reconstruction and visualization, clinical and research applications, and derivation and comparison of algorithms.
Prerequisite: BME 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 731. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 732. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 735. Auditory and Visual Neural Systems. 3 Credit Hours.
Design and application of auditory and visual neural systems and devices for medical purposes. Methodologies and instrumentation using electrophysiological, psychophysical and other measurements are explored focusing on diagnostic and therapeutic applications.
Prerequisite: BME 603.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 740. Implantable Biomedical Devices. 3 Credit Hours.
Development and advances in implantable materials and devices especially those used as electrically driven prostheses. Topics include pacemakers, defibrillators, catheters, neurological stimulators, heart assist, bone repair, and other diagnostic and therapeutic devices. The historical, medical significance, business, economic, and technical aspects of these devices and the associated instruments for monitoring are discussed. Fundamentals of electrochemical corrosion and stimulation as well the technology of implantable power sources are reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 745. Biomedical Optical Imaging and Diagnostics. 3 Credit Hours.
Review of geometrical optics, fiber optics, and tissue optics. Introduction to physical optics: interference, diffraction, and polarization; optical imaging resolution limits, super-resolution imaging, advanced optical microscopy, and optical coherence tomography (OCT). Imaging through scattering tissue, imaging and diagnostics with polarized light, fluorescence, infrared, and Raman spectroscopy and applications are also discussed. Optical diagnostics using scattered light: laser Doppler flowmetry, and dynamic light scattering; and opto-chemical and evanescent wave sensors are also covered.
Prerequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BME 760. Stem Cell-Based Tissue Engineering. 3 Credit Hours.
Principles and advanced topics on cellular and tissue engineering. Topics include biodegradable and non-biodegradable biomaterials, cytokines, the traditional and stem cell-based tissue engineering approaches, bioreactors and special topics such as bone, cartilage and other tissues.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

BME 761. Stem Cell Design. 3 Credit Hours.
Stem cell engineering is a relatively new field of research that focuses on using stem cells and tissue derived products to repair damaged or diseased tissues. This course will examine through the most recent publications the role of stem cells and tissue derived donors for tissue repair, wound healing, and as well as regeneration/repair. In addition, we will highlight the use of engineered products developed from tissue banks associated with the different type of cells for clinical application. The course will use a mix of lectures/article presentations and discussion format to effectively present relevant information.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

BME 779. Biomedical Engineering Seminar Series. 1 Credit Hour.
A course for Biomedical Engineering doctoral students. Students will attend lectures and roundtable discussions with leading experts from both academia and industry.
**Components:** SEM.
**Grading:** SUS.
**Typically Offered:** Fall & Spring.

BME 780. Graduate Scholarship in Biomedical Engineering. 3 Credit Hours.
A course for Biomedical Engineering doctoral students. Students will learn to critically review scientific journal articles as well as NIH research proposals (i.e. R01, R03, F30/31 and R21). Students will also learn how to read federal grant application guidelines and determine what is required for a highly competitive written application. The students will have the opportunity to prepare their own research proposal in the form of an F31 NIH application on a biomedical engineering topic of interest. Students will also learn how to prepare and present their research findings at conferences.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

BME 781. Radiation Dosimetry and Physics. 3 Credit Hours.
Application of radiation physics in the field of radiation therapy. The course will cover the relevant subjects of modern physics, the basic modalities and basic instrumentations of radiation therapy, the principles of particle transport and radiation dose computation and quality assurance of radiation therapy instruments. The subject of radiation protection will also be discussed.
Prerequisite: BME 582. Or BME 682.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

BME 783. Radiation Therapy Physics Clinical Rotation. 3 Credit Hours.
Students will observe clinical activities at a designated radiation therapy center for ten hours per week. Rotation includes observation of daily treatment, simulation, dose planning, physics quality assurance and routine physics support activities (special physics consultation, weekly physics chart check, monitoring radiation safety activities, support of brachytherapy procedures). Students will meet with the course instructor one and a half hours/week to discuss the schedule and the progress of the rotation activities. Students need to submit reports on each radiation therapy category.
Prerequisite: BME 682. And BME 781.
**Components:** THI.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

BME 784. Medical Physics Journal Club. 1 Credit Hour.
The course aims to keep track of recent developments in the field of Medical Physics for therapeutic and diagnostic purposes in oncology through reading, discussion and presentation of identified scientific papers from the major journals of Medical Physics among enrolled students.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

BME 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
**Components:** THI.
**Grading:** SUS.
**Typically Offered:** Fall, Spring, & Summer.
B.S./M.S. Five-Year Program in Biomedical Engineering

Overview
The Department of Biomedical Engineering offers a dual-degree program that culminates with students receiving both Bachelor of Science and Master of Science (BS/MS) in Biomedical Engineering concurrently. This program is available only to qualified students enrolled in the undergraduate program in Biomedical Engineering at the University of Miami. This program is intended to give qualified Biomedical Engineering students the opportunity to acquire both a baccalaureate degree (BSBE) and a Master of Science (MSBE) degree in five years rather than the 4 plus 2 years (approximately) that is traditionally expected. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants complete BME 705 (http://bulletin.miami.edu/search/?P=BME%20705) in lieu of BME 402 (http://bulletin.miami.edu/search/?P=BME%20402)/BME 403 (http://bulletin.miami.edu/search/?P=BME%20403).
- Up to 6 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree. If their schedule allows, students may be able to complete an additional 3 credits of graduate classes during their fourth year.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their fourth year.
- Students can register for a maximum of 6 graduate credit hours in each semester of their fourth year.
- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

Admission Requirements
The dual BS/MS program is available only to qualified undergraduate students enrolled in the Department of Biomedical Engineering, in any of the four Concentrations (Electrical, Mechanical, Biomaterials and Tissue, PreMed). Typically, students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application.
Undergraduate students must take the Graduate Record Examination (GRE) before the end of their classification as a senior and attain a combined score of more than 300 on the verbal and quantitative portions. Students must meet all other pertinent graduate school and College of Engineering requirements.

Qualified students must apply prior to the beginning of final exams in the second semester of their junior year. Students are strongly advised to apply to the BS/MS program as early as possible in their junior year to facilitate academic advising and course selection in the second semester of their junior year. Before submitting an application, interested students should discuss the program and the possibility of entering the program with an academic advisor.

The College of Engineering Office of Admission will carefully review academic credentials for admission into the program and will notify students of their acceptance into the program. All admitted students will have a special advising appointment with Dr. Narasimhan, Assistant Dean for Undergraduate Studies, to discuss academic issues specific to the BS/MS program.

**Curriculum Guidelines**

In the dual-degree BS/MS program in the Department of Biomedical Engineering, the first four years of the curriculum are altered as follows:

- The 3 credits of Senior Design Project (BME 402/BME 403) are eliminated.
- In Semester I of the senior year, one 3-credit Undergraduate Technical Elective is replaced with BME 705 (MS Design Project I).
- In Semester II of the senior year, one 3-credit Undergraduate Technical Elective is replaced with one 3-credit Graduate Technical Elective.

Graduate Technical Electives taken in the senior year must be chosen from the BME graduate course offerings, with the approval of their academic advisor. The credits of Graduate Technical Electives completed in the fourth year are counted toward the 30 credits required for the MS degree.

Students admitted in the dual degree BS/MS program can take a maximum of six (6) graduate credits per semester in their senior year, for a maximum of twelve (12) graduate credits per year, without incurring additional costs if they are full-time undergraduate students during this period. Students should register for courses towards their graduate degree as "G" credits and not as "U" credits. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

To register for graduate credits during their senior year, students must be in senior status and must complete and submit the Graduate School’s "Application for Undergraduates to Take Graduate Coursework" form. This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status.

In the Senior year, students must be registered for a minimum of 12 undergraduate credits each semester to maintain full-time status as an undergraduate student. After completing the senior year, students must register as graduate students.

**BS/MS Design Project (BME 705/706)**

In lieu of the 3-credit senior design project (BME 402/BME 403) students enrolled in the dual-degree BS/MS program register for 6 credits of Master Design Project (BME 705/BME 706). The 3 credits of BME 705 satisfy the undergraduate senior design requirements, in which students complete a year-long capstone design project that follows the same guidelines and format as BME 402/BME 403. Students enroll in BME 705 during the first semester of their senior year and receive their final project grade at the end of their senior year. The 3 credits of BME 706 satisfy the non-thesis Master’s project requirement. Students enroll in BME 706 during the first semester of their fifth year. The BME 706 project can be a continuation of the student's BME 705 project, or an entirely new project. The format and guidelines for BME 706 are described in the MS section of the bulletin.

**Graduation Requirements**

Students accepted into the dual degree program must maintain at least a 3.0 Cumulative GPA, and meet all other pertinent Graduate School requirements, including a minimum of 3.0 GPA in the credits applied toward the MS degree.

**Curriculum Requirements**

**BSBE/MSBE (Biomaterials and Tissue Concentration)**

Students in the BSBE Biomaterials and Tissue concentration are required to complete the following courses for the dual degree:

<table>

**Total Credit Hours**

|         |                                                  | 155-158 |

1 PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours).

2 Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor.

3 Graduate courses are 600 or 700 level courses chosen from the BME course offerings with the approval of the advisor. Up to 6 credits of graduate courses can be taken in other engineering disciplines.

4 Students may be able to register for this additional graduate class if their course load allows.

1. PS/HA Cognate: Students must complete a minimum of 1 People & Society (PS) cognate and 1 Humanities & Arts (HA) cognate, to be selected from the list of available cognates (http://www.miami.edu/index.php/registrar/cognates/). Each cognate should be a minimum of 3 courses (9 credit hours).

2. Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor.

3. Technical Elective Lab is selected from BME 303, BME 395, BME 507 or BME 567.

4. Graduate courses are 600 or 700 level courses chosen from the BME course offerings with the approval of the advisor. Up to 6 credits of graduate courses can be taken in other engineering disciplines.

5. Students may be able to register for this additional graduate class if their course load allows.

M.S. in Biomedical Engineering

Masters Program Objectives

The goal of the MS program in Biomedical Engineering at the University of Miami is to prepare students for successful careers in the biomedical industry, academia, or government (FDA, US Patent Office), or for further study in doctoral or health-related programs.

The educational objective of the program is to provide students with the technical and intellectual skills required to solve complex technical or scientific problems at the interface of engineering and medicine or biology.

Admission Requirements

The qualifications and documentation required for admission to the MS program in Biomedical Engineering are the same as for the College of Engineering.

The Department of Biomedical Engineering generally admits four types of students to its MS program:

• Students with undergraduate degrees in biomedical engineering and other engineering disciplines who seek advanced professional training or specialization in a particular area of biomedical engineering
• Professional engineers with degrees in other engineering disciplines who plan to enter the field of biomedical engineering
• Students with an undergraduate degree in Physics, Mathematics, Computer Science, Chemistry, Biology or other fields of natural or health science who seek to diversify their career opportunities by acquiring an engineering degree
• Students who are preparing for admission to advanced health-related or other professional programs such as medical school

Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

Admission Requirements

The qualifications and documentation required for admission to the MS program in Biomedical Engineering are the same as for the College of Engineering.

The Department of Biomedical Engineering generally admits four types of students to its MS program:

• Students with undergraduate degrees in biomedical engineering and other engineering disciplines who seek advanced professional training or specialization in a particular area of biomedical engineering
• Professional engineers with degrees in other engineering disciplines who plan to enter the field of biomedical engineering
• Students with an undergraduate degree in Physics, Mathematics, Computer Science, Chemistry, Biology or other fields of natural or health science who seek to diversify their career opportunities by acquiring an engineering degree
• Students who are preparing for admission to advanced health-related or other professional programs such as medical school

Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

Curriculum Requirements
The curriculum combines advanced coursework which provides depth in a specific area of concentration and advanced problem-solving skills, with supervised research or design in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine, or in the local biomedical industry.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the MS program. Master's students select a course of study together with the graduate advisor and/or with their mentor and the thesis committee (for the thesis option) based on their own needs or interests. Students can choose from any of the graduate course offerings, as long as they satisfy the general course requirements and the course prerequisites.

Required Core Courses
All students enrolled in the MS program in Biomedical Engineering are required to complete the following core graduate courses:

• Human Physiology Courses (BME 601/BME 602/BME 603, 3 credits each). Students enrolled in the BS/MS program must take exactly two of these three courses, no more and no less. Other students can choose to complete all three courses.
• Regulatory Control of Biomedical Devices (BME 612, 3 credits)

The three human physiology courses are designed to provide a basic understanding of organ-level physiology and anatomy, neurophysiology, and cellular and molecular biology. Students with an MD from a medical school accredited by the World Health Organization are exempted from taking these courses. Students holding advanced degrees in the life sciences, or equivalent experience in the field, may also be exempt. Each such exception requires the approval of the Department Chairperson and Faculty member responsible for the course of concern. Students who receive an exemption, must replace the exempted course(s) with another 3-credit graduate course(s) that meets the degree requirements.

Students with a background in an engineering or scientific field with no prior exposure to biology/medicine are required to complete all three Unified Medical Sciences courses.

Non-Thesis MS Program
The MS non-thesis option is intended for students with an undergraduate degree in biomedical engineering or related disciplines who seek advanced training or specialization in a specific area of biomedical engineering; for professional engineers with undergraduate degrees in other disciplines who want to enter the field of biomedical engineering; and for students who want to prepare for admission to advanced health-related or other professional programs.

Graduation Requirements

† Graduate-level courses are courses that are 600 and above.
**Non-Thesis MS Project**

**General description**
All students enrolled in the MS non-thesis program must complete a 3 credit Master's project (BME 706), under the supervision of a project mentor and departmental project coordinator. The project must demonstrate the candidate’s ability to solve complex scientific or technical problems at the interface of engineering and medicine or biology.

The MS project can be a research or design project. The project must include a significant research or design component contributed by the M.S. student, including, but not limited to, the design of an experiment or process; the development of a device, instrument, or system; the development of a computer program; the analysis of experimental data. Projects cannot be limited solely to the review of literature, the development of research or design proposals, or the collection of experimental data.

At the completion of their project, students must submit a written project report and complete a public oral defense of their project.

**Project Mentor**
Students who select the MS non-thesis track must identify a project mentor and select a project before they register for their second semester of full-time study. The project mentor is generally a primary faculty member of the Department of Biomedical Engineering. The role of the project mentor is to help the student identify a suitable project, to monitor the progress of the student, to provide guidance and training in the relevant topics, and to review the final report and presentation.

Students may complete their project under the supervision of a faculty member from another Department at the University of Miami, or from the local biomedical industry, under the following conditions:

- The student must receive the approval of the Department Chairman and Graduate Program Director.
- The student must identify a co-mentor who must be a primary faculty member of the Department of Biomedical Engineering. The co-mentor must be familiar with the topic of the proposed project. The role of the co-mentor will be to monitor the student progress and ensure that the Master's project report and presentation satisfy all of the relevant requirements.

**Project Coordinator**
The project coordinator is a member of the primary faculty of the Department of Biomedical Engineering who is responsible for teaching the BME 706 course. The role of the project coordinator is to:

- Help students identify a project and mentor.
- Ensure that the projects satisfy the program objectives.
- Provide general guidance and graduate scholarship training.
- Ensure that the students are making suitable progress towards the project goals.

**Project Abstract**
Non-Thesis MS students must submit a one-page project abstract to the Department Chairman or Graduate Program Director and to the MS Project Coordinator at the time when they register for BME 706. The abstract must include the name of the project mentor (and co-mentor, if any), the title of the proposed project, and a brief description of the goals of the project and proposed methods. The abstract must be approved by the mentor, MS Project Coordinator, and Department Chairman or Graduate Program Director before the student can start work on the project. ([Project Abstract Template](http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Abstract_Template.pdf))

**Project Report**
Non-thesis MS students must submit a detailed report describing the work completed during the project. The report must describe the objectives and significance of the work, and summarize the activities completed by the student as part of the MS project. The report must demonstrate that the work performed by the student satisfies the general project criteria. The typical length of non-thesis M.S. project reports is 20 to 30 pages. If the project resulted in the submission of a full-length peer-reviewed scientific article, the article can be submitted in lieu of a report, as long as the following conditions are satisfied:

- The student must be the first author of the article.
- The article must reflect the work performed by the student as part of the project.
- The article must be submitted for publication in a peer-reviewed journal or conference proceedings volume.
- A one to two page introduction must be submitted to summarize the project goals and main outcomes.

The report must be reviewed and approved by the project mentor (and co-mentor, if any). Once the report is approved by the mentor(s), one printed copy and one electronic version in PDF format must be submitted to the Project Coordinator by the specified deadline. The final report must be approved and signed by the Project Mentor(s), Project Coordinator and Graduate Program Director or Department Chairman. ([Signature Page Template](http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/Signature_Page_Template.pdf))
Project presentation
Non-thesis MS students must give an oral presentation of their project. The oral presentation is generally scheduled during the scheduled final examination time of BME 706 in the semester of graduation.

Project grade
The final grade for the project is given by the Project Coordinator. The final grade is a combination of a grade submitted by the Project Mentor(s) assessing the overall performance of the student on the project, and a grade given by the Project Coordinator assessing the quality of the oral presentation and report.

MS Thesis Program
The thesis option is typically selected by students who are oriented towards a career in academic or industrial research and development, or students who want to acquire an initial independent biomedical research experience before seeking admission to doctoral programs.

Graduation Requirements
Graduation requirements for the MS Thesis Option include:

† Graduate-level courses are courses that are 600 and above.

MS Thesis
General Description
The Master's thesis is a research monograph which describes the significance of the research and summarizes the research activities completed as part of the MS degree requirements. The objective of the thesis is to evaluate the candidate's competence in the area of the MS research. The thesis must demonstrate that the research is original and that the candidate has the ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology.

Thesis Mentor
Students who select the MS thesis track must identify a thesis mentor before they register for their second semester of full-time study. The thesis mentor must hold a primary or secondary faculty appointment in the Department of Biomedical Engineering. Exceptions can be made only with approval of the Graduate Program Director and Department Chairman.

The thesis mentor supervises the research work of the student and provides training and guidance in the relevant research topics, including design of experiments, experimental techniques, and scholarship activities. The mentor helps the student select a thesis topic and develop a plan, and chairs or co-chairs the thesis committee. The mentor works closely with the student to ensure that there is satisfactory progress towards the thesis goals.

Thesis Committee
The thesis must be approved by a thesis committee. The duties of the thesis committee are:

- to consult with and to advise students on their research;
- to meet, at intervals, to review progress and expected results;
- to read and comment upon the draft thesis;
- to meet, when the thesis is completed, to conduct the final oral examination and to satisfy itself that the thesis work is original; that it demonstrates the candidate's ability to solve complex scientific and/or technical problems at the interface of engineering and medicine or biology; that it is written in lucid and correct English; and that it is submitted in approved format.

The thesis committee will consist of not less than three members, with the following requirements:

- The committee chair shall be a Primary Faculty member of the Department of Biomedical Engineering, as well as a regular member of the Graduate Faculty. The Committee Chair is generally also the thesis mentor.
A thesis mentor who is not a member of the Primary Faculty of the Department of Biomedical Engineering, can serve as Co-Chair of the Thesis Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.

It is an additional requirement of the Department of Biomedical Engineering that at least two committee members should be primary Faculty members from the Department.

One committee member must be from outside the Department. Outside members of the thesis committee can include part-time faculty that teach within the Department.

At least one committee member must be a regular member of the Graduate Faculty of the University of Miami.

The committee is nominated by the Graduate Program Director. Usually, the student consults with his/her research mentor and with the Chairperson or Graduate Program Director to select the Committee members.

**Thesis Format and Deadlines**

It is the duty of the student to ensure that the thesis defense is scheduled and that a final version of the thesis approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis submission can be found on the Graduate School website (https://grad.miami.edu/).

Each thesis must be accompanied by a Certificate of Defense Approval for Master’s Thesis (https://grad.miami.edu/policies-and-forms/forms/) signed by all members of the Committee. Forms can be downloaded from the Graduate School website.

**Evaluation Forms**

The student is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-ms/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Thesis Committee for the final oral examination. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The completed forms must be collected by the Thesis Mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

**Transfer to MS Non-Thesis Program**

Students enrolled in the MS thesis program who do not wish to complete their thesis can transfer to the MS non-thesis program and graduate from the MS program under the following conditions:

- The transfer must be approved by the Department Chair or Graduate Program Director.
- All requirements of the MS non-thesis option must be satisfied, including completion of a 3 credit MS project (BME 706), submission of a project report, and oral defense of project. Completed thesis credits may count towards the three credit MS project requirement.

**MS in Biomedical Engineering: Medical Physics**

The MS in Biomedical Engineering offers a special track in Medical Physics. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

The program is opened to students enrolled in the regular MS program, as well as the dual degree (BS/MS) program. Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students in the Medical Physics Program must complete Human Physiology for Engineers (BME 602) and one of the remaining two courses from the human physiology (BME 601 or BME 603) course series, and the following 22-credit core curriculum in the area of medical physics:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 620</td>

<tr>
<td>BME 784</td>
<td>Medical Physics Journal Club</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Total Credit Hours</td>
<td>22</td>
</tr>
</tbody>
</table>

Any remaining credits required to complete the degree must satisfy the general requirements of the MS program. Students enrolled in the MS program in Medical Physics may require a total of 31 credits (non-thesis option) or 34 credits (BS/MS and thesis option) to complete the program requirements.
The topic of the BS/MS project (BME 705/BME 706), MS project (BME 706, non-thesis option), or MS thesis must be related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Sample Plan of Study

Non-Thesis MS Program

A typical curriculum for the MS non-thesis option is shown in the following table. The course sequence and timeline can be adjusted based on individual needs. The minimum residence requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Credit Hours: 30

Students who are not able to complete their thesis during the 3rd semester and have completed all 30 required credits of graduate work, must enroll in 0 credits of Research in Residence (BME 820 (http://bulletin.miami.edu/search/?P=BME%20820)) to maintain full-time student status.

Sample Plans of Study

MS Program in Medical Physics

Typical curricula for each option of the MS program in Medical Physics are shown in the following tables. The curriculum for the BS/MS in Medical Physics can be found in the BS/MS section of the bulletin. The course sequence and timeline can be adjusted based on individual needs. The minimum residence requirement for the MS degree is two semesters in full-time study or the equivalent in part-time work.

| Total Credit Hours | 34 |
*Students who are not able to complete their thesis during the 3rd semester and have completed all 30 required credits of graduate work, must enroll in 0 credits of Research in Residence (BME 820) to maintain full-time student status.

**Mission**

The mission of the Biomedical Engineering Program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

**Goals**

The educational objective of the program is to provide students with the technical and intellectual skills required to solve complex technical or scientific problems at the interface of engineering and medicine or biology.

**Student Learning Outcomes**

- High level ability to apply knowledge of mathematics, science and engineering to formulate and solve relevant biomedical engineering problems.
- Ability to communicate the scientific and technical research effectively in writing and oral presentations.
- Ability to conduct supervised research and development.

**Ph.D. in Biomedical Engineering**

**Program Objectives**

The goal of the PhD program in Biomedical Engineering at the University of Miami is to train students for independent research and innovation in biomedical engineering. The program is designed to prepare graduates for careers in academia, industrial research and development, or government (FDA, US Patent Office).

PhD students conduct research at the Department of Biomedical Engineering and at clinical departments and research centers at the School of Medicine, including the Bascom Palmer Eye Institute, the Miami Project to Cure Paralysis, the Diabetes Research Institute, the University of Miami Ear Institute, Biomedical Nanotechnology Institute, the Departments of Pathology, Radiology, Radiation Oncology, Otolaryngology, and Surgery, and the Miami Veterans Administration Research Service. Many of our doctoral students work closely with physicians to develop and investigate new therapies, devices, and technologies that address real-world clinical problems.

**Admission Requirements**

The qualifications and documentation required for admission to the PhD program in Biomedical Engineering are the same as for the College of Engineering.

In general, the Department admits three types of students to its PhD program:

- Students with MS degrees in Biomedical Engineering or related science and engineering fields.
- Students with MD degrees with undergraduate degrees in sciences or engineering.
- Highly qualified students with BS degrees in engineering or sciences.

Students admitted with non-engineering degrees are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

The PhD program in biomedical engineering is also a degree-granting program of the University of Miami's MD-PhD program.

Internal M.S. students (thesis or non-thesis) who wish to pursue a doctoral degree can transfer from the MS program to the doctoral degree program under the following general requirements:

- Submission of an application for admission to the PhD program.
- Submission of a letter of support by a faculty member who agrees to serve as the student's Ph.D. dissertation advisor.
- Approval of the application by the Department's Graduate Admissions Committee.

**Graduation Requirements**

The general requirements for award of the Doctor of Philosophy include:

- Completion of a minimum of 60 course credits beyond the BS degree.
- Satisfactory completion of an oral qualifying examination.
- The submission, oral defense, and approval of a dissertation proposal.
• The submission, oral defense and approval of a dissertation.
• Completion of the publication requirements.

All work, including credit transferred from other institutions, must be completed within 8 years of the time of admission to graduate work, and/or within four years of approval of the dissertation proposal. An average of B (3.0) is required for a graduate degree, and no “D” credit may be counted toward the degree. A C- is the lowest passing grade for graduate students.

**Admission Requirements**

The qualifications and documentation required for admission to the PhD program in Biomedical Engineering are the same as for the College of Engineering.

In general, the Department admits three types of students to its PhD program:

• Students with MS degrees in Biomedical Engineering or related science and engineering fields.
• Students with MD degrees with undergraduate degrees in sciences or engineering.
• Highly qualified students with BS degrees in engineering or sciences.

Students admitted with non-engineering degrees are generally given conditional admission and required to take additional undergraduate courses in engineering, physics, and/or mathematics depending on their previous course work, as specified in the admission letter. The requisite courses will be prescribed by the Department Chair or Graduate Program Director during the first advising session.

The PhD program in biomedical engineering is also a degree-granting program of the University of Miami's MD-PhD program.

Internal M.S. students (thesis or non-thesis) who wish to pursue a doctoral degree can transfer from the MS program to the doctoral degree program under the following general requirements:

• Submission of an application for admission to the PhD program.
• Submission of a letter of support by a faculty member who agrees to serve as the student's Ph.D. dissertation advisor.
• Approval of the application by the Department's Graduate Admissions Committee.

**Curriculum Requirements**

The PhD curriculum was designed to provide the technical and intellectual skills required to identify and solve complex scientific or technical problems at the interface of engineering and medicine or biology. The curriculum combines advanced coursework which provides depth in a specific area of concentration, with independent original research in one of the laboratories of the faculty from the Department of Biomedical Engineering or the School of Medicine.

Except for the Medical Physics program there are no formalized graduate curricular tracks in the PhD program. The student's mentor and supervisory committee work with the student to develop a personalized course plan, based on the student's own needs and interests. The personalized course plan is designed to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. The course plan can include any of the graduate course offerings, as long as the student satisfies the course pre-requisites.

The proposed individualized course curriculum must be submitted to the Graduate Program Director for final approval or to the Department Chairperson when the Graduate Program Director is the student's mentor.

**Required Core Courses**

There are four core graduate courses: Human Physiology courses (BME 601/BME 602/BME 603, 3 credits each) and a Graduate Scholarship course (BME 780, 3 credits). Additionally, students are required to register for the Biomedical Engineering Seminar Series (BME 779, 1 credit) for their first four semesters.

The three human physiology courses are designed to provide a basic understanding of organ-level physiology and anatomy, neurophysiology and cellular and molecular biology. Students admitted to the PhD program with a BS degree are required to take all three courses. Students admitted to the PhD program with an MS degree only need to complete 2 of the 3 courses. Students enrolled in the MD-PhD program and students with an MD from a medical school accredited by the World Health Organization are exempted from taking these 3 courses. With the permission of the graduate advisor, students who have completed these courses or similar coursework in a previous graduate course of study may substitute technical electives for this requirement.

The Graduate Scholarship course (BME 780) provides training in grant proposal writing, manuscript preparation and other doctoral-level research and professional skills. The Biomedical Engineering Seminars course (BME 779) is a seminar series on research and professional topics in Biomedical Engineering.

**MD-PhD program**

Students enrolled in the MD-PhD program start the PhD program after completion of the first two years of medical school.
MD-PhD students who choose BME as their degree-granting program can count up to 15 credits of work completed during the first two years of medical school towards their PhD degree requirements (See: Credit Requirements). To receive credit, students enroll in the following courses:

- BME 711- Accelerated Basic Science Medical Curriculum (9 credits). BME 711 satisfies the Unified Medical Sciences (9 credits) requirement.
- PIB 731 - Laboratory Research (1-6 credits). Students receive up to 3 credits for each research rotation that they complete during their first two years of medical school, up to a maximum total of 6 credits. To receive credit, students must submit a report for each rotation, following the guidelines for BME Independent Study reports.

All MD PhD students must complete a 3-credit biostatistics course. Students who have successfully completed equivalent coursework in a previous course of study can be exempted from this requirement.

**Medical Physics Program**

The Department of Biomedical Engineering at the University of Miami offers a special PhD program in Medical Physics accredited by CAMPEP. The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine.

Candidates are required to have completed a 3 credit course in Modern Physics (PHY 360 or equivalent) and a 3 credit course covering the physical foundations of medical imaging (BME 330 or equivalent) before they start their course work in the Medical Physics program.

Students enrolled in the Medical Physics Program must follow the general requirements of the PhD program and must complete the following courses:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Students enrolled in the Medical Physics program must complete their PhD dissertation project on a topic related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Students enrolled in the Medical Physics program must also complete an additional separate qualifying examination focused on the medical physics curriculum (see below section on qualifying examination).

**Credit Requirements**

The credit requirements are summarized below. Students admitted with non-engineering degrees are generally accepted conditionally, with the requirement to complete a set of undergraduate courses in engineering and/or mathematics before gaining full admission into the PhD program. The list of pre-requisite courses is defined before the start of the first semester of study by the Graduate Program Director and Department Chairperson, in consultation with the student mentor. Course pre-requisites are not counted towards the degree requirements.

**Direct BS to PhD Track**

</tr>
</tbody>
</table>
If the student has completed equivalent coursework, this requirement can be waived. However, these courses must be substituted with another 9 credits of coursework.

A minimum of 15 credits of additional courses to be selected by the student in consultation with his/her mentor and the supervisory committee. Beyond the minimum requirement of 27 course credits, the supervisory committee shall decide which additional courses, if any, will be required to ensure that the student is prepared for advanced independent research and technical innovation in biomedical engineering. A three credit advanced biostatistics course is strongly recommended.

More information about these courses can be found on the CoE website (http://www.coe.miami.edu/) and the UM RCR website (https://bioethics.miami.edu/clinical-and-research-ethics/responsible-conduct-of-research/).

A minimum of 12 credits of dissertation work must be completed. Students should enroll into BME 830 before admission to candidacy and BME 840 after admission to candidacy.

**Research in Residence**

Once a student has completed all required course and dissertation credits, he or she must enroll in Research in Residence status (BME 850, 0 credit) until the degree has been granted. Research in Residence status is considered full time enrollment. Credit is not granted for research in residence, but a fee is charged for each enrollment.

**Qualifying Examination Schedule**

The examination will be administered at the beginning of the third semester that a student is enrolled in the PhD program.

**Qualifying Examination Committee**

The oral qualifying examination will be administered by a qualifying examination committee, to be nominated by the Graduate Program Director or Department Chair, with input from the research mentor. The committee will consist of 3 tenured or tenure-track primary faculty in the Department of Biomedical Engineering. The committee members will be selected based on the student's research area. The research mentor cannot be a member of the qualifying examination committee for his/her students. At least one additional tenured, primary BME faculty member who is not part of the committee will serve as neutral observer. The observer will moderate the examination and will ensure that the examination follows the required standards and will help resolve any conflicts that may arise.

**Format**

The committee will provide the student with a list of topics to study at least 3 months before the exam, including fundamental knowledge of physiological and engineering principles, data analysis, and experimental methods. At the start of the exam, the student will provide a brief overview of his/her research topic. During the exam, the committee will assess the student's grasp of the topics as well as critical thinking and problem-solving skills. The oral qualifying examination will be closed to the public. The examination should last approximately 1 hour, and will be followed by a deliberation period of the qualifying examination committee. The entire examination will be recorded and the recording will be stored in a secured database until the student graduates from the program.

**Evaluation and Repeat Rule**

After the oral examination, the student's qualifying examination committee will deliberate and determine if the student passed the examination. The findings of the qualifying examination committee will be summarized in a letter to the student from the Graduate Program Director. A student who fails will be given an opportunity to retake the examination. The letter will include a list of topics where the student needs improvement that will be included in the second examination. The second examination must be scheduled within 3 months and will be given by the same committee. A student who fails the examination at the second trial will be dismissed from the program.
Medical Physics Qualifying Examination

Students enrolled in the Medical Physics program must pass an additional written examination focused on topics covered in the Medical Physics curriculum. The examination is typically scheduled the semester following the regular BME screening examination, and consists of 6 separate written tests on the following topics, corresponding to courses in the curriculum: Anatomy/Radiobiology BME 602/BME 681; Medical Imaging (BME 620/BME 729); Radiation Therapy Physics (BME 682); Radiation Protection (BME 683); Radiation Dosimetry (BME 781); Medical Physics Clinical Rotation (BME 783). The entire examination is scheduled in a single day, with each test lasting 55 minutes. The minimum passing score for each test is 70%. Students who fail one or more of the tests must retake the test(s) before the end of the semester. Students who fail the same test twice are dropped from the Medical Physics program.

Supervisory Committee

Following the successful completion of the oral qualifying examination, a Ph.D. Supervisory Committee is appointed by the Chairperson of the Department of Biomedical Engineering. Usually, the student consults with his/her research mentor and with the Chairperson to select the Committee members. In the Department of Biomedical Engineering, the members of the Supervisory Committee usually also eventually serve on the Dissertation Committee. The role of the Supervisory Committee is to administer the dissertation proposal, and to make up any additional written or oral examination deemed necessary to complete the qualifying examination.

In the Department of Biomedical Engineering, the Supervisory Committee must be comprised of at least five members. The minimum requirements of the committee composition are given below:

- At least three primary BME faculty members
- At least one external member. The external member is either a University of Miami faculty member who holds a primary appointment outside of BME, a faculty member from another University or from outside of academia. If the external member is from outside of academia, he/she must be a recognized expert in the field holding a leadership position.

The five members include the committee chair, who is a Graduate Faculty member of the Department of Biomedical Engineering. If the committee chair is not a Primary Faculty member of the Department of Biomedical Engineering, a second Co-Chair who is a Primary Faculty of the Department of Biomedical Engineering is required.

For more information about the Supervisory Committee, please also see the Graduate Student Handbook, which can be found on the Graduate Student Handbook, which can be found on the Graduate School website (www.grad.miami.edu (https://www.grad.miami.edu/)). The Graduate School website also provides a list of Faculty who are members of the University of Miami Graduate Faculty.

Dissertation Proposal

Format

Each student must submit an original written proposal describing the goals of the dissertation research project, the significance of the work, preliminary studies, and the research plan. The proposal must be submitted to the Supervisory Committee and orally defended before the end of the fourth semester for students admitted with an MS degree and before the end of the first semester of the third year for students admitted with a BS degree. The student’s knowledge of the proposed research topic will be tested during the oral defense. If any deficiencies are discovered during the defense of the proposal, an additional written or oral examination may be required by the Ph.D. Supervisory Committee.

Evaluation Forms

The candidate is responsible for distributing dissertation proposal evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Supervisory Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

Admission to Candidacy

A student who has passed the written qualifying examination, and successfully defended the dissertation proposal must:

- submit a signed "Approval of the Dissertation Proposal (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Department_Dissertation_Proposal_Approval.pdf)" form to the Graduate Program Director of the Department of Biomedical Engineering.
- form a Dissertation Committee (see below)
- submit an Application for Admission to Candidacy (https://grad.miami.edu/policies-and-forms/forms/) for the Ph.D./Ed.D./D.M.A. to the Graduate School to be granted admission to candidacy.

Admission to candidacy recognizes the fact that a student enrolled in the PhD program has completed all doctoral degree requirements except completion of an acceptable dissertation project and defense of the dissertation. Completion of the required course credits and dissertation credits (BME 830 and/or BME 840) is not a requirement for admission to candidacy in the Department of Biomedical Engineering.
No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the dissertation defense is scheduled.

**Dissertation Committee**
In the Department of Biomedical Engineering, the Dissertation Committee is generally the same as the Supervisory Committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The Dissertation Committee is nominated by the Department, and is approved and appointed by the Dean of the Graduate School.

As with the Supervisory Committee, the Dissertation Committee must be comprised of at least five members, including the committee chair. The minimum requirements of the committee composition are given below:

- At least three primary BME faculty members
- At least one external member. The external member is either a University of Miami faculty member who holds a primary appointment outside of BME, a faculty member from another University or from outside of academia. If the external member is from outside of academia, he/she must be a recognized expert in the field holding a leadership position.

The five members include the committee chair, who is a Graduate Faculty member of the Department of Biomedical Engineering. If the committee chair is not a Primary Faculty member of the Department of Biomedical Engineering, a second Co-Chair who is a Primary Faculty member of the Department of Biomedical Engineering is required.

One additional requirement is that the Dissertation Committee of students enrolled in the M.D.-Ph.D. program must include one member of the M.D.-Ph.D. program committee.

If a student and his/her mentor decide to change the members of the Dissertation Committee after being admitted to candidacy, a Committee Composition Change Request Form must be completed. This form can be completed electronically via Dynamic Forms on the Graduate School's website.

**Bi-Annual Progress Review**
The student must schedule a bi-annual meeting with the dissertation committee. The purpose of the meeting is to give the student an opportunity to present his/her doctoral research progress to the committee and to receive the committee's feedback and recommendations. The student must submit a brief progress report to the dissertation committee at least seven days before the meeting. During the meeting, the student will present his/her doctoral research progress to the committee. The presentation will be followed by a discussion session. At the end of the discussion session, the committee will meet alone to discuss the student's progress and provide recommendations to the mentor. The mentor will provide a written summary of the discussion and committee recommendations to the student and to the Graduate Program Director. Students who are not making adequate progress may be terminated from the program.

**Doctoral Dissertation**
**General Description**
The doctoral dissertation is a monograph which describes the significance of the research and summarizes the research activities completed as part of the doctoral degree requirements. The objective of the dissertation is to evaluate the candidate's competence in the area of the Ph.D. research. The dissertation must demonstrate that the research is original and that it makes a significant contribution to the field of study.

A final public oral defense of the dissertation is required. However, none but the members of the dissertation committee may interrogate the candidate. The defense must be held before the deadline published on the Graduate School website (https://grad.miami.edu/), generally at least two weeks prior to the last day of class in the semester the student wishes to graduate. The student must submit the Defense Notice Form (https://grad.miami.edu/policies-and-forms/forms/) available on the Graduate School website (https://grad.miami.edu/) and provide a copy to the Department of Biomedical Engineering.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

**Dissertation Format and Deadlines**
It is the duty of the student to ensure that the dissertation defense is scheduled and that a final version of the dissertation approved by the Dissertation Editor is submitted to the Dissertation Editor by the required deadlines set by the Graduate School. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found on the Graduate School website (https://grad.miami.edu/). The Graduate School also encourages students to contact the Dissertation Editor at the Graduate School when they start preparing their dissertation.

Students must inform the Department of Biomedical Engineering of their intent to defend at least 2 weeks in advance of the defense date, by email to the Department staff. The email must include the dissertation title and the date, time and location of the defense. The information will be posted in the Department's physical and online bulletin boards.
Each dissertation must be accompanied by Certificate of Defense Approval for Doctoral Dissertation signed by all members of the Committee. Forms can be downloaded from the Graduate School website (https://www.grad.miami.edu/).

**Evaluation Forms**
The candidate is responsible for distributing dissertation evaluation forms (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/SACS_Graduate_Rating_Grid_Rubric_2016.pdf) to the members of the Dissertation Committee. The evaluation forms are used to assess the overall quality of the graduate program at the Department, College, and University level. The evaluation forms are available on the Graduate School and Department of Biomedical Engineering websites. The forms must be completed by the Committee members after the dissertation defense. The completed forms must be collected by the Dissertation mentor and forwarded to the Office Manager at the Department of Biomedical Engineering.

**Publication Requirements**
As a requirement for graduation, all PhD Candidates at the University of Miami Department of Biomedical Engineering are expected to have published, or have in press (i.e., the manuscript must have received final acceptance), in high quality peer-reviewed journals, a minimum of 2 publications describing work related to the dissertation. The candidate must be the first author on at least one of these two publications. In addition, the candidate must have been the presenting author of at least 2 oral or poster presentations describing the dissertation work at major peer-reviewed international conferences.

**Teaching Requirements**
Students enrolled in the PhD program in Biomedical Engineering who passed their qualifying examination are required to participate in undergraduate teaching activities. The minimum requirement will be to teach one undergraduate classroom lecture per academic year, under the supervision of the primary or secondary mentor, and/or the faculty responsible for the course and to help supervise at least one undergraduate student research project per academic year. For each classroom lecture, the mentor will provide feedback to the student and complete and sign a teaching evaluation form (http://bulletin.miami.edu/graduate-academic-programs/engineering/biomedical-engineering/biomedical-engineering-phd/Grad_Teaching_Eval.pdf) which must be returned to the Graduate Program Director.

**Suggested Plan of Study**

Mission
The mission of the Biomedical Engineering Program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

Goals
The goal of the PhD program in Biomedical Engineering at the University of Miami is to train students for independent research and innovation in biomedical engineering. The program is designed to prepare graduates for careers in academia, industrial research and development, or government (FDA, US Patent Office).

Student Learning Outcomes
• Advanced ability to apply knowledge in mathematics, science and engineering to formulate and solve relevant biomedical engineering problems and conduct research.
• An ability to communicate the scientific and technical research effectively in writing and oral presentations.
• Ability to conduct independent research and contribute to existing knowledge.

Certificate Program in Medical Physics
Overview
Associated with the Department of Biomedical Engineering's graduate program in Medical Physics, the University of Miami offers a Certificate Program in Medical Physics. The Certificate Program is accredited by CAMPEP (Commission on Accreditation of Medical Physics Educational Programs) and is a non-degree granting program. The objective of this two-semester program is to allow qualified individuals who have obtained PhD degrees in Physics, Engineering or a related field with a physics-minor-equivalent background to transition into a career in medical physics.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment for further assistance.

Civil, Architectural and Environmental Engineering

https://cae.coe.miami.edu/index.html

Dept. Code: CAE

Mission Statement
The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

• Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning.
• Conduct high-quality research that will advance the body of knowledge and improve the quality of human life.
• Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Disciplines
Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Degree Programs
The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of:

• Master of Science in Architectural Engineering
• Master of Science in Civil Engineering
• Master of Science in Civil Engineering - Environmental Engineering emphasis
• Doctor of Philosophy in Civil Engineering
• Doctor of Philosophy in Civil Engineering - Architectural Engineering emphasis
• Doctor of Philosophy in Civil Engineering - Environmental Engineering emphasis

The specialty areas of study in Civil Engineering include:

• Structural Engineering and Structural Materials
• Environmental Engineering
• Water-Resources Engineering

The specialty areas of study in Architectural Engineering include:
Admission Requirements

All applicants to the graduate program are required to submit official academic transcripts, GRE scores (optional for some MS programs), and a minimum of three letters of reference. Specific admission criteria are described in this Bulletin under Engineering (p. 2203) - General Admission Requirements.

Applicants who hold a bachelor's degree in a field other than civil, architectural, or environmental engineering may be admitted to the graduate program (and to candidacy, if applicable) upon completion of (a) the regular graduate degree requirements, and (b) 31 undergraduate deficiency credits, which include:

1. Calculus (6 credits)
2. Advanced Mathematics
   - Differential Equations, or other mathematics similar in rigor (3 credits)
   - Probability and Statistics (3 credits)
3. General Chemistry (3 credits)
4. Calculus-based Physics (7 credits)
5. Statics (3 credits)
6. Engineering Science related to area of study (3 credits)
   - Examples of Engineering Science courses include Mechanics of Materials, Fluid Mechanics, Dynamics, and Thermodynamics
7. Engineering Design related to area of study (3 credits)
   - Examples of Engineering Design courses include Concrete Structures, Steel Structures, Water-Resources Engineering I, and Water Quality Control Systems

The deficiency courses listed above apply to students without an earned undergraduate degree in engineering, while the Engineering Science and Engineering Design courses apply to students with an earned undergraduate degree in engineering, but not necessarily in civil, architectural, or environmental engineering.

The list represents the minimum number of required deficiency credits for each subject area. Additional deficiency credits may also be warranted based upon the recommendations of a student's advisor and/or Supervisory Committee. Students should be cognizant that the deficiency course list is not exhaustive and may not necessarily include all pre-requisite courses needed to enroll in their desired graduate-level coursework. A student must still satisfy the pre-requisites of graduate-level courses prior to enrollment. Therefore, ample care should be taken when planning a Program of Study upon matriculation.

Prior Coursework Evaluation: Students may be exempt from individual deficiency courses if they have already completed these deficiency credits at another institution. A student's prior coursework can be evaluated and shall be based upon a student's official transcript. A delegated CAE Faculty member in the student's primary area of study shall determine which, if any, deficiency credits have already been satisfied. Questions regarding the equivalency of coursework (completed at another institution) to its counterpart here at the University of Miami shall be addressed by the relevant department and instructor at the University of Miami.

Prior Work Experience: In rare cases, students may be able to satisfy specific deficiency credits if they can demonstrate a substantive knowledge of the subject area through examination using written/oral assessment and supportive evidence such as peer-reviewed journal articles authored by the student, professional licenses, or other quantifiable experience. An examination of all evidence of experience shall be vetted by the relevant instructor at the University of Miami prior to making a recommendation to the CAE Graduate Program to either waive or require deficiency credits for a specific subject area.

Course Selection and Enrollment: Undergraduate-level deficiency courses at the University of Miami typically range between the 100 and 400 levels. The student shall enroll in the corresponding courses identified in the undergraduate CAE curriculums to satisfy the deficiency credits for Calculus, Advanced Mathematics, Chemistry, Physics, and Statics. To satisfy the deficiency credits for Engineering Science and Engineering Design, the student's advisor and/or Supervisory Committee will select courses on an individual bases. If a student has not yet selected an advisor nor established a Supervisory Committee, the Graduate Program Director shall serve as the student's advisor in the interim. The Graduate Program Director will identify coursework in consultation with a delegated faculty member in the student's area of study.

In accordance with Graduate School Policy, a student in deficiency status may not enroll in supervised research, but is permitted to enroll in graduate-level courses as long as the student has satisfied the course pre-requisites.
Research Opportunities

Civil Engineering: Current research activities include properties of concrete materials, composite structural systems, fiber-reinforced concrete, modeling and simulation of engineering materials, multi-scale modeling of materials, fracture mechanics, structural steel behavior, structural health monitoring, structural repair and rehabilitation.

Architectural Engineering: Current research activities include energy, indoor air quality, heating, ventilating and air conditioning (HVAC), environmentally compatible construction materials and systems, life-cycle building systems integration, and sustainable affordable housing.

Environmental Engineering: Current research activities include development of new physicochemical water and wastewater treatment processes, potable wastewater reuse, solid and hazardous waste management, health and environmental risks analysis, environmental/economic planning for sustainable development, hazardous waste remediation, environmental health studies, water quality studies, ground-water, surface-water, and contaminant-transport processes, hydrologic processed, water resources planning and management, and water policy.

Graduate Academic Standing

A student enrolled in any CAE graduate program is required to make adequate progress towards graduation, maintain a minimum Grade Point Average (GPA), and achieve acceptable course grades.

Throughout their graduate study, a student's graduate academic standing will either be Good Standing, or Probation.

Good Standing: A student's status is considered Good Standing if he/she is:

1. maintaining an overall cumulative GPA greater than or equal to 3.000,
2. achieving a term GPA greater than or equal to 3.000 in every semester,
3. achieving grades of "C" or better in all coursework,
4. complying with the University of Miami’s Honor Code,
5. making adequate progress towards graduation (see below for criteria), and
6. making satisfactory progress towards the completion of a dissertation or thesis (for Ph.D. and thesis-based M.S. students)

To be eligible for graduation, a student must have a GPA greater than or equal to 3.000, and no grade below "C" in all courses in the student’s approved Program of Study. In accordance with university policy, all course grades are included in the GPA, and the Graduate School's Repeat Rule applies to courses with grades lower than "C".

Progress: Failure to make adequate progress towards graduation includes, but is not limited to:

• failure to maintain the GPA requirements or grades specified for Good Standing
• having incomplete grades in more than 30% of the total credit hours registered towards the degree
• withdrawing (with a W grade) from more than 30% of the total credit hours registered towards the degree
• Failure to progress in research needed to complete a dissertation or thesis

It is the student’s responsibility to provide regular updates (at least once per semester) to his/her Advisor and Supervisory Committee members, and inform them of any courses in which they withdrew (with a W grade), received grades of C or below, or received an Incomplete. A student who does not satisfy all of the above requirements (for Good Standing) may be placed on Probation or dismissed from the program.

At the request of a student’s Advisor or Supervisory Committee member, or at the discretion of the Graduate Program Director, the Graduate Program Director can initiate a formal assessment of a student's progress. This assessment may include a joint meeting of the student’s Supervisory Committee, the Graduate Program Director, and the student. The student will be given an opportunity to present his/her case to explain any shortcomings in his/her progress or performance. The Supervisory Committee will place the student in Good Standing, on Probation, or dismiss the student from the program.

Probation: A student who does not meet all of the requirements for being in Good Standing must consult with his/her Advisor and/or Supervisory Committee to review his/her progress and develop a plan to rectify the performance problems. A student will be given one semester (on Probation status) to improve his/her performance and satisfy the requirements of Good Standing. Otherwise, the student will be dismissed from the program.

A student on Probation may not be permitted to enroll in courses, or may be limited to a certain number of credit hours specified by the Supervisory Committee, and may have an electronic hold placed on future enrollment until grades for work-in-progress are reviewed by the student's Supervisory Committee.

Dismissal: The decision to dismiss a student shall be made by the student's Supervisory Committee. If the decision is made not to dismiss, the student may be placed on Probation. A student dismissed from the graduate program can appeal the dismissal through the Graduate Program Director, then the Department Chair, then by following the guidance provided in the Graduate Student Handbook. The initial appeal must be formally submitted in its entirety (including all relevant supporting documents) in writing or by email to the Graduate Program Director within 30 calendar days.
of the dismissal notification. A subsequent appeal to the Department Chair must also be submitted within 30 calendar days of being notified that the initial appeal was denied by the Graduate Program Director.

**Masters Programs in Civil, Architectural and Environmental Engineering**

- M.S. (p. 2258) (p. 2256) Civil Engineering (p. 2258)

**Graduate Course Grouping Convention**

Graduate students may be permitted to enroll in courses offered by any department in the University of Miami. Each course is categorized into one of 8 groups:

1. Group A: 700-level lecture-based CAE Courses in civil, architectural, and environmental engineering
2. Group B: 600-level lecture-based CAE courses in civil, architectural, and environmental engineering
3. Group C: 600- or 700-level CAE courses in Construction Management (CM)
4. Group D: Any pre-approved course in any UM Department at the 600- or 700-level (i.e. XXX 600-799)
5. Group E: CAE Independent Study (Special Problems)
6. Group F: CAE Master’s Thesis
7. Group G: CAE Master’s Design Project
8. Group H: CAE PhD Dissertation

Course Descriptions

CAE 604. Master's Design Project. 3 Credit Hours.
Course is taken in place of CAE 404 for students accepted to the Bachelor to Master (4+ 1) degree program in the CAE Department. A project elaborating on a topic from the students Senior Design course is the basis of the course. See CAE 403 and CAE 404 for the description of the Senior Design Project.
Prerequisite: CAE 403.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 610. Structural Mechanics. 3 Credit Hours.
Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 611. Advanced Structural Analysis. 3 Credit Hours.
General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 620. Advanced Design of Concrete Structures. 3 Credit Hours.
Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included.
Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 621. Advanced Design of Steel Structures. 3 Credit Hours.
Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.
Prerequisite: CAE 310. And CAE 321.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 622. Design of Prestressed Concrete Structures. 3 Credit Hours.
Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included.
Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 623. Design of Masonry Structures. 3 Credit Hours.
Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.
Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 625. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.
Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 630. Water Resources Engineering II. 3 Credit Hours.
Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project.
Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 631. Surface-Water Hydrology. 3 Credit Hours.
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.
Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 632. Ground-Water Hydrology. 3 Credit Hours.
Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 633. Water-Quality Control in Natural Systems. 3 Credit Hours.
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.
Pre or Corequisite: CAE 430. And CAE 440.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 640. Environmental Chemistry. 3 Credit Hours.
Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.
Prerequisite: CHM 112.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 641. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.
Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 642. Solid and Hazardous Waste Engineering. 3 Credit Hours.
Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.
Prerequisite: CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 660. Sustainable Construction. 3 Credit Hours.
Pre or Corequisite: CAE 403. Or CAE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 661. Computer Aided Architecture Engineering Design. 3 Credit Hours.
The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated
and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are
covering including 3D modeling of buildings and building components, embedded cost-estimating and the phasing the construction process. Basics of
REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation
analysis and whole building energy analysis. Upon completion student can receive a PBA certification from Autodesk.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 665. Facilities Operation and Management. 1-3 Credit Hours.
Facilities management topics based on core concepts of International Facility Management Association (IFMA) involving management of corporate
needs, health, safety, security, operation and maintenance of physical facilities. This course will focus on development and understanding of
sustainable facilities management responsibilities involving the building envelope, preventative maintenance, system operational efficiencies, data
analytics and intelligent building systems, building security, maintenance staffing, infrastructure utility requirements as well as holistically integrated
assets, people, corporate strategic planning and technology. Additionally development of skills to engage in facilities management functions
which include EPA environmental / waste disposal, fleet management and statutory regulations as well as emergency management planning will be
emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 669. Construction Management Seminars. 1 Credit Hour.
Seminar series on construction management required for all students in the construction Management MS program. The faculty coordinator will set
up a series of weekly Seminars on topics such as risk management, construction safety, environmental conservation and policy, conflict resolution,
ethics, quality control and construction permitting. Speakers will include leading researchers and specialists from the construction industry. Grades
will be based on reports submitted by the students on the seminar topics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 670. Advanced Foundation Engineering. 3 Credit Hours.
Prerequisite: CAE 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 681. Energy-Efficient Building Design. 3 Credit Hours.
Concepts and methods of energy-efficient and environmentally-friendly building design. Topics include energy and sustainable design strategies,
climate, passive and active solar design, passive cooling systems, day lighting, and computer simulation of energy flows in buildings. A quantitative
understanding of energy fundamentals, examples from practice, and design exercises using computer simulation programs are emphasized.
Prerequisite: CAE 481.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 682. Building Energy Modeling and Simulation. 3 Credit Hours.
Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic
simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and
building loads.
Pre-Co-requisite: CAE 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 690. Special Topics. 1-3 Credit Hours.
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 691. Special Topics in Construction Management. 1-3 Credit Hours.
Sub-titles describing the topics to be offered in Construction Management's Special Topics will be shown in parenthesis, in the printed class schedule following the title, "Special Topics.”
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 695. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 702. Finite Element Methods. 3 Credit Hours.
Variational principles and their application to finite element methods. Applications to: plane stress and plane strain, three-dimensional stress analysis, bending of plates, and axi-symmetric shells. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 711. Theory of Elasticity. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 712. Structural Reliability. 3 Credit Hours.
Basic theory and tools of structural reliability including theory of probability, statistical assessments as well as inference and model building. Topics include: review probability theory; descriptive statistics; uncertainty modeling; estimation and model building; structural reliability theory; first and second order reliability methods; Level I methods/code calibration; load combinations; Bayesian decision analysis and reliability updating. Prerequisite: IEN 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 714. Structural Dynamics. 3 Credit Hours.
Elementary structural dynamic analysis covering single degree-of-freedom and multiple degree-of-freedom systems. Topics include: free, damped and forced vibrations; transmissibility and ground motion; arbitrary, step and pulse excitation; numerical evaluation; rigid and flexible bodies; natural frequencies and modes; tuned-mass dampers; responses and spectrum; practical indications as well as an introduction to wind and earthquake engineering. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 716. Fracture Mechanics. 3 Credit Hours.
Theory of fracture mechanics for linear elastic and nonlinear material behavior, energy release rate, stress intensity factor, and J-integral with practical application to brittle fracture and fatigue. Case studies involving civil infrastructure such as bridges, buildings, pipelines and ships. Metallurgical aspects of fatigue and fracture.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 730. Environmental Hydrology. 3 Credit Hours.
Principles of ecohydrology, agricultural hydrology, impacts of climate change, fundamentals of remote sensing and geographic information systems for hydrologic applications, statistical applications in hydrology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 735. Water and Wastewater Engineering: Treatment and Reuse. 3 Credit Hours.
Physical treatment processes; Chemical unit processes; Advanced biological treatment processes; Sludge treatment and disposal; Industrial water supply and wastewater treatment; Membrane systems for wastewater treatment and case studies; Advanced wastewater treatment and reuse; Environmental nanotechnology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 743. Risk Analysis. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 744. Risk Management and Resilience. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 761. Building Information Modeling II. 3 Credit Hours.
The course prepares students to utilize the predictive capabilities Building Information Modeling (BIM) technology in the Architecture, Engineering, and Construction (AEC) Industry. Continuing from the fundamental lessons of CAE 361 BIM I, this course prepares students for in depth modeling of engineering systems within AEC projects. Modeling of Structural, Mechanical, Electrical and Plumbing systems will be covered. Using the BIM of these systems to predict the system performance will be covered in the form of analytical modeling and detailed energy modeling.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 762. Construction Project Management. 3 Credit Hours.
This course is designed to provide a practical background and working knowledge of how Construction Projects are developed and managed through professional Program Management. Elements consisting of Program Organization, Program and Project conception, Project planning, Scoping, effective project communication strategies, budgeting, scheduling, controls, resource and cost management and behaviors of the Program Manager to lead. The Project Management Body of Knowledge (PM BoK) guide relating to scope, time, cost, quality and other knowledge areas for planning and control of projects throughout their entire lifecycle. This course will also explore various applications that use construction project management software such as Primavera, eBuilder, etc. as interactive platform tools. Key leadership skills and managerial styles needed to effectively build, manage, and lead a successful project team.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 765. Construction Accounting and Finance. 3 Credit Hours.
This course will investigate the theory and practice of financing large projects. Insights into the logic of capital structure decisions – the mix of debt and equity, the choices among debt alternatives, private/public partnerships - will require an understanding of financial theory and an investigation of the relevant literature will be conducted. Accounting techniques will be reviewed that will provide students with a toolset for performing financial analyses in the construction industry. Finally, case projects will be evaluated by the class and decisions made regarding project viability using the tools presented during the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CAE 766. Forensic Engineering. 3 Credit Hours.
OBJECTIVE OF THE COURSE IS TO INTRODUCE STUDENTS INTO THE FIELD OF FORENSIC ENGINEERING. THIS COURSE IS DESIGNED TO PROVIDE BACKGROUND AND WORKING KNOWLEDGE OF HOW FORENSIC ENGINEERING PROJECTS ARE INITIATED AND MANAGED FROM THE ENGINEER'S AND ATTORNEY'S PERSPECTIVES. VARIOUS ELEMENTS REQUIRED IN A FORENSIC INVESTIGATION PROJECT FROM CONDITION ASSESSMENT TO EXPERT REPORT PREPARATION AND EXPERT TESTIMONY WILL BE COVERED. THE ROLE OF THE FORENSIC ENGINEERING EXPERT WILL BE EXPLAINED FROM THE VIEW OF THE ENGINEER AND FROM THE ATTORNEY. BY ENGAGING STUDENT IN THE GROUP PROJECT ASSIGNMENT, IN WHICH HE/SHE IS DEALING WITH THE REAL-LIFE EXAMPLES (DEFECTS), AND BY PARTICIPATING IN A MOCK MEDIATION AND DEPOSITION/TRIAL BY THE END OF THIS COURSE STUDENT WILL BE EQUIPPED WITH KNOWLEDGE ALLOWING HER/HIM TO BETTER DEAL WITH A REAL LIFE SITUATIONS.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 769. Construction Management Capstone Course. 3 Credit Hours.
The Construction Management Capstone Project is taken during the final semester of study in the MS in construction management program. It is designed to reinforce the knowledge and skills acquired during the program of study via a simulated construction project. The faculty coordinator will pair student teams with industry partners who will guide them through the steps in planning, coordination and execution of a building project. The course will provide students experience in the use of various project management tools in a virtual setting. Site visits and interaction with the project members will also provide experience in solving complex and strategic issues that often arise on actual construction projects. A comprehensive project report will be due at the end of semester which will be graded by the faculty coordinator in consultation with the industry partners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 780. Indoor Environmental Modeling. 3 Credit Hours.
Prediction of indoor environment using computational fluid dynamics techniques. Advanced topics in thermal comfort and indoor air quality. Basic concepts of turbulence modeling and numerical methods for natural, forced, and mixed convection and jet flows indoors. Simulation of air velocity, temperature, and contaminant concentrations in buildings. Comparison of the simulated results with measured data.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 781. Advanced Building Energy Modeling and Simulation. 3 Credit Hours.
Equation-based object-oriented building energy modeling. Coupling of different building simulation tools. Applications in rapid prototyping of new building systems, model-based design and evaluation of building control, and building performance evaluation.
Prerequisite: CAE 582. Or CAE 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 790. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title “Advanced Topics”.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 791. Advanced Topics in Construction Management. 1-3 Credit Hours.
Sub-titles describing the topics to be offered in Construction Management’s Special Topics will be shown in parenthesis, in the printed class schedule following the title, “Special Topics.”
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 795. Special Problems. 1-3 Credit Hours.
Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 810. Master's Thesis. 1-6 Credit Hours.  
The student working on his/her Master's thesis enrolls for credit as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

CAE 820. Research in Residence. 1-6 Credit Hours.  
Used to establish research in residence for the thesis for the Master’s degree after the student has enrolled for the permissible cumulative total in CAE 810. Credit not granted. May be regarded as full-time residence.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

CAE 825. Continuous Registration--Master's Study. 1 Credit Hour.  
To establish residence for non-thesis master’s students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

CAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.  
Doctoral dissertation credits taken prior to the Ph.D. student’s candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours of CAE 830 may be taken in a regular semester, nor more than 6 credit hours in a summer session.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

CAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.  
Doctoral dissertation credits taken after the Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours in CAE 840 may be taken in a regular semester, nor more than 6 credits in a summer session.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

CAE 850. Research in Residence. 1 Credit Hour.  
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.  

B.S./M.S. in Civil Engineering  

Admission Requirements  
Undergraduate students of the department having a GPA of 3.0 or better are encouraged to apply to the 5-year BS/MS program during their junior year. Applicants are required to submit official transcripts, official GRE scores, and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.  

Graduation  
Requirements for graduation are:  

- Minimum of 30 graduate-level credits with a GPA of at least 3.0, and no grade lower than C  

Of the 30 graduate-level credits:  

- At least 24 credits of lecture-based courses  
- At least 15 credits in CAE  
- At least 12 credits of courses at the 700 level  
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study / Special Problems)  
- Up to 6 credits can be Independent Study (Special Problems and/or Master’s Design Project)  

Thesis research (CAE 810) will not count towards the degree. CAE 665 - 669 and CAE 765 - 769 shall not count towards the degree.
Transfer of credits from other institutions

- A total of 6 credits of transfer and/or exchange coursework not counted towards the student’s BS may be taken at another institution and used to satisfy requirements for the M.S. The number of eligible credits for transfer is 9, when pre-approved coursework is taken as part of a semester abroad experience.

Curriculum

The program of study is tailored to the student’s background and goals by their advisor, and must be approved as constituting an MS in Civil or Architectural Engineering by the student’s Program of Study Committee. The committee comprises a minimum of 3 members, as follows:

- The CAE Committee Chair (Advisor) shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the CAE Committee Chair (Advisor) must be either a full-time or part-time member of the Department; and
- In addition to the Committee Chair, at least one of the members must be tenured/tenure-earning, or a member of the Graduate Faculty.

M.S. in Architectural Engineering

Overview

The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Master of Science degree in Architectural Engineering (MSAE).

The educational objectives of the Master of Science program in Architectural Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of Architectural Engineering
2. Have advanced capability to apply knowledge to engineering problems

The degree program has the following options:

- Thesis option
- Non-Thesis option
- 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department

For all options, a minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. degree. The M.S. degree can be typically completed within one calendar year.

The Program of Study is the student's specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee).

Curriculum Requirements - Thesis Option

A minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". Of the 30 credits:

- At least 24 credits of lecture-based courses
- At least 15 credits in CAE courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- 6 credits of Master’s Thesis (CAE 810) and an oral examination in defense of the thesis

The table presents an overview of the course selection:

Notes:
1. All courses are 3 credit hours unless otherwise indicated
2. Independent Study/Special Problems (CAE 595, CAE 695, CAE 795) will not count towards the degree requirements
3. Master's Design Project (CAE 604) will not count towards the degree requirements

The M.S. thesis must be defended, approved by, and signed by the student's Thesis Committee, which is typically the same as the student's Supervisory Committee or, if not, has a composition that is equivalent to the Supervisory Committee. Refer to the Additional Details section (below) for additional options and restrictions.

Curriculum Requirements - Non-Thesis Option

4. Master's Thesis (CAE 810) will not count towards the degree requirements

Refer to the Additional Details section (below) for additional options and restrictions.

Additional Details

• There is also a 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department. For this combined degree programs only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9-credit hour transfer is to be approved by the student's M.S. Supervisory Committee prior to initiating a study abroad program. With the exception of the dual M.S. program with UniBo (http://www.coe.miami.edu/departments/cae-engineering/graduate/dual-ms/), transferred credits cannot be used to satisfy the requirements of an external degree.
• Admissions requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 2203) and under Master's Degree.
• A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. degree.
• Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) will not count towards any CAE degree requirement. CAE 665 - 669 and CAE 765 - 769 shall not count towards the degree.
• The Supervisory Committee must have a minimum of 3 members, including:
  1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty.
  2. Full-Time or Part-Time CAE Faculty
  3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

Mission

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

• Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning;
• Conduct high-quality research that will advance the body of knowledge and improve the quality of human life; and
• Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Goals

The educational objectives of the M.S. program in Architectural Engineering are to produce graduates whom:

• Have advanced technical knowledge in at least one specialty area of architectural engineering; and
• Have advanced capability to apply knowledge to engineering problems.
Student Learning Outcomes
- Students will demonstrate an advanced knowledge of the discipline (mathematics, science, and engineering), including methodology relevant to a specialty area.
- Students will demonstrate an advanced ability to identify, formulate, and solve engineering problems.
- Students will demonstrate an advanced ability to generate technical contributions and effectively communicate them to the scientific community.

M.S. in Civil Engineering
Overview
The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Master of Science degree in Civil Engineering (MSCE) with three areas of specialty:
- Structural Engineering and Structural Materials
- Environmental Engineering
- Water-Resources Engineering

The educational objectives of the Master of Science program in Civil Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of civil engineering
2. Have advanced capability to apply knowledge to engineering problems.

In each of the specialty areas, several options are available:
- Thesis option
- Non-Thesis option
- 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department
- 5-Year B.S./Dual M.S. option available for qualified undergraduate students enrolled within the CAE Department; students earn a B.S. and two M.S. degrees (one at the University of Miami and one at the University of Bologna, Italy) by spending their 5th year studying abroad.

For all options, a minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements of the M.S. degree. The M.S. degree can be typically completed within one calendar year.

The Program of Study is the student’s specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee).

Curriculum Requirements - Thesis Option
A minimum of 30 graduate-level credits are required with an average of "B" or better and no grade below "C". Of the 30 credits:
- At least 24 credits of lecture-based courses
- At least 15 credits in CAE courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- 6 credits of Master’s Thesis (CAE 810) and an oral examination in defense of the thesis

3. Master’s Design Project (CAE 604) will not count towards the degree requirements
4. Master's Thesis (CAE 810) will not count towards the degree requirements

Refer to Additional Details section (below) for additional options and restrictions.

Additional Details
- There is also a 5-Year B.S./M.S. option available for qualified undergraduate students enrolled within the CAE Department. For this combined degree program only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9-credit hour transfer is to be approved by the student’s M.S. Supervisory Committee prior to initiating a study abroad program. With the exception of the dual M.S. program with UniBo (http://www.coe.miami.edu/departments/cae-engineering/graduate/dual-ms/), transferred credits cannot be used to satisfy the requirements of an external degree.
- Admissions requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 2203) and under Master’s Degree.
- A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. degree, and with grades of "B" or above) may be taken at another institution (with pre-approval) to satisfy the requirements for the M.S. Degree.
- Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) will not count towards any CAE degree requirements. CAE 665 - 669 and CAE 765 - 769 shall not count towards the degree.
- The Supervisory Committee must have a minimum of 3 members, including:
  1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty
  2. Full-time or part-time CAE faculty
  3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

Mission
The mission of the Department of Civil, Architectural, and Environmental Engineering is to:
Goals

The educational objectives of the M.S. program in Civil Engineering are to produce graduates who:

• Have advanced technical knowledge in at least one specialty area of civil engineering; and
• Have advanced capability to apply knowledge to engineering problems.

Student Learning Outcomes

• Students will demonstrate an advanced knowledge of the discipline (mathematics, science, and engineering), including methodology relevant to a specialty area.
• Students will demonstrate an advanced ability to identify, formulate, and solve engineering problems.
• Students will demonstrate an advanced ability to generate technical contributions and effectively communicate them to the scientific community.

M.S. in Construction Management

Situational Background

The U.S. Census Bureau puts the total annual value of construction in the United States at approximately $900 billion (8% of the U.S. gross national product), making the construction industry one of the most important sectors of the nation’s economy.

The University of Miami’s MS in Construction Management program is a practice-oriented advanced graduate degree that offers a blend of construction and business management courses. This degree program is designed to develop leaders and managers for complex building projects, with mastery in best practices related to resiliency, sustainability, building information modeling, project delivery and decision-making. The University is uniquely situated in a booming metropolis where commercial and residential construction is a large and important industry.

The Construction Management Program

• Offers an interdisciplinary approach with the participation of other graduate programs at the University of Miami.
• Prepares graduates for a variety of employment opportunities. Potential employers include general contractors, real estate developers, subcontractors, construction management firms and architectural engineering firms.

Objective

The MS in Construction Management provides a foundation for those who want to effectively lead a construction project or business.

Who Is the MS Program For?

The program is open to both entry-level graduate students who want to pursue a career in construction management and professionals who have responsibilities in engineering, architecture, business and law fields, and want to further their knowledge and skills.

Industry Advisory Board

One of the differentiators of the MS program is that it is informed by an industrial advisory board with significant experience in construction management. The advisory board currently consists of:

• Henry E. Adams, Kiewit Corporation
• Rodney Barreto, Floridian Partners, LLC; Chairman - Fish & Wildlife Foundation of Florida
• Scott Desharnais, Moss Construction
• Kobi Karp, Kobi Karp Architecture and Interior Design
• Thomas Koulouris, AECOM / Jackson Health Systems
• Ana Veiga Milton, President of Jose Milton Foundation
• John L. Murphy, DLA Piper LLP (US)
• Ari Pearl, South Florida Developer
• Jaime S. Saavedra, Turner Construction
• Victor Sanchez, Goldman Properties
Description

Graduates of the program obtain the technical proficiency, financial knowledge, entrepreneurial skills, and business acumen needed for success in this continuously evolving industry.

Graduates of the program will learn how to integrate multiple professional requirements for bringing construction projects to successful completion, including estimating, cost control, risk, new technologies, project planning, scheduling, negotiation and labor relations. Coursework also examines how to manage the various types of contractual relationships governing the owner, the contractor, subcontractors, consultants and architects, as well as the essential skills of bidding, negotiating, handling disputes and claims, devising and implementing strategic business plans, and leadership.

Through consultations with industry leaders, advisory board members, faculty members, and colleagues in the construction industry, the curriculum for the University of Miami’s MS-CM is continually evaluated against current best practices and the highest standards. Participants have immediate access to knowledge and skills that address current issues and developments in the industry.

The current director of this program is Dr. Esber Andiroglu. (http://www.coe.miami.edu/faculty-directory/name/esber-andiroglu/)

Admission Requirements

All students applying to the graduate program are required to submit GRE scores and three letters of recommendation. All students applying for admission, but most especially International students should consult the College of Engineering Admissions webpages for Prospective MS Students (https://www.umcoe.miami.edu/apply/prospective-ms-students/) or PhD Students (https://www.umcoe.miami.edu/apply/prospective-phd-students/).

Students who hold a bachelor’s degree in a field other than civil, architectural, and environmental engineering may be admitted to the graduate program upon completion of appropriate deficiency courses, in addition to the regular requirements for the graduate degree.

Deficiency courses are as follows:

1. Calculus, 10 semester credits
2. Advanced Mathematics, 6 semester credits
3. General Chemistry, 4 semester credits
4. Physics (with Calculus), 8 semester credits
5. Engineering Mechanics (Statics), 3 semester credits
6. Engineering Science related to area of study, 3 semester credits
7. Engineering Design related to area of study, 6 semester credits

In general, items 1 through 7 apply to students without an undergraduate degree in engineering, and items 6 and 7 apply to students with an undergraduate degree in engineering. The student’s graduate committee will select courses for items 6 and 7 on an individual basis.

1. For Students who have not taken CAE 762 or IEN 763 during Fall Semester
2. Not required if enrolled in RED 670 during Spring Semester

**Mission**

The vision of the MS CM program is to provide an interdisciplinary, flexible and state-of-the-art curriculum that provides students with knowledge and marketable skills to become future leaders of construction related organizations worldwide, by utilizing existing infrastructure resources at University of Miami, with program-generated additional resources as necessary.

**Goals**

Graduates of the program obtain the technical proficiency, financial knowledge, entrepreneurial skills, and business acumen needed for success in this continuously evolving industry.

**Student Learning Outcomes**

- Students will develop technical professional proficiency
- Students will acquire financial knowledge
- Students will develop entrepreneurial skills

**Dual M.S. in Civil Engineering with the University of Bologna**

The Department of Civil, Architectural, and Environmental Engineering (CAE) at the University of Miami (UM) has partnered with the University of Bologna (UNIBO) in Italy to offer a dual Master of Science degree program in Civil Engineering (Dual MSCE). Each dual degree program is structured in four semesters and consists of courses and research with two semesters to be completed at UM, and two semesters to be completed abroad at UNIBO. The degrees conferred by each institution are as follows:

**Dual Degree Program Area of Emphasis**

- **Civil Engineering**
- **Environmental Engineering**

**Academic Degree Obtained at UNIBO**

- **Laurea Magistrale in Civil Engineering (Classe LM) - Taught in English**
  - Laurea Magistrale in Ingegneria per l'Ambiente ed il Territorio (Classe LM 35) - “Earth Resources Engineering” International Curriculum taught in English

**Academic Degree Obtained at UM**

- **MS in Civil Engineering (Environmental Emphasis)**

Upon Completion of the Dual Degree Program requirements, the students will be awarded two separate and distinct Master’s of Science degrees.

This program is open to students who are admitted to the graduate program at the end of their junior year as part of the 4+1 (BS + MS) program. Students applying for this program must have a minimum grade point average of 3.0, and score more than 300 on the Graduate Record Examination (GRE).
Once enrolled in the 4+1 (BS+MS) program, students are eligible to apply to the dual MS degree program. The five-year program leading to a B.S. and dual M.S. degrees (BS/2MS) can be completed in 10 semesters as long as the student makes satisfactory progress.

Admission to the 4+1 (BS+MS) program and the BS + dual M.S. program is conducted through the College of Engineering Admissions Office. Any student interested in applying should contact the Director of Admissions in the College of Engineering and their academic advisor in the CAE Department. Both should conduct an overview and feasibility study based on the student's current program of study, and discuss the application requirements and timeline.

The curriculum for the dual M.S. degree program consists of courses that are required for the MS-UM degree, courses for the MS-UNIBO degree, and common courses shared between the programs. In general, students will enroll in the following program of study during their 4th year (Senior Year), and 5th year (at UNIBO). The table is shown in UM credit equivalents:

| | Total Credit Hours | 18 |

| | Total Credit Hours | 18 |

Students shall submit an individual Program of Study to select courses as part of the program. The individual study program must be approved by both institution's Academic Coordinators. A thesis is required as part of the program and will be completed at UNIBO while working with an advisor at UM. Students must defend their Master's Thesis according to the rules and modalities of UNIBO to obtain the Laurea Magistrale degree.

Program credits are reported using two systems: the European Credit Transfer System (ECTS) and the United States College Credit System (US). The transfer rate between the systems is 2 ECTS credits = 1 US credit. The credit requirements for each MS program are based on the transfer credits between the institutions.

Any deviation from the designated course lists requires pre-approval by the student's UM supervisory committee, the UM CAE Graduate Program Director, and the UNIBO Academic Advisor prior to course registration.
5 YEAR BS/DUAL MS
COURSE SCHEDULE FOR CIVIL ENGINEERING

4TH Year (Senior Year at UM): All courses in Table A (24 U.S., 48 ECTS) + 2 courses in Table B (6 U.S., 12 ECTS)

5th Year (at UNIBO): The remaining courses in Tables B and C (24 U.S., 48 ECTS) + Civil Engineering Research (6 U.S., 12 ECTS) + CAE 795: Special Problems (4 U.S., 8 ECTS). Courses in Table C consist of Curriculum courses and Elective courses which can be chosen by the student, depending on the study area they are interested. They are shown in Tables E, F, and G.
