Course covers the fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electroacoustical analysis of transducers including acoustic suspension, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses. Open to MUE and EAN Majors only.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 602. Audio Signal Processing I. 3 Credit Hours.
A study of the theory and practice of digital audio topics including discrete time sampling, quantization, dithering, PCM, A/D and D/A conversion, digital filtering, oversampling, modulation codes, timebase, error correction codes, magentic storage, DAT, and optical storage.
Requisite: Frost School of Music only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 603. Audio Signal Processing II. 3 Credit Hours.
A study of the theory and practice of digital audio topics including fiber optics and networks, compact disc, interconnection, psychoacoustics, low bit-rate perceptual coding, MPEG, digital audio broadcasting, sigma-delta conversion, noise shaping, digital video, and emerging technologies. Open to MUE and EAN Majors only.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 604. Audio Signal Processing III. 3 Credit Hours.
Theory, design, and development of computer audio synthesizers and analyzers. Students implement software synthesizers including analog and physical modeling, wave-table, wave-shaping, and FM designs. Classical and modern theories of timbre and time-frequency analysis are included.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MMI 606. Current Trends in Music Engineering II. 3 Credit Hours.
MMI 606 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 608. Current Trends in Music Engineering III. 3 Credit Hours.
MMI 608 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 610. Computational Psychoacoustics. 3 Credit Hours.
This course deals with the fundamentals of audition in human biological systems, including auditory sensory transduction, cochlear processes, neural pathways, cortical organization, and auditory illusions, with specific applications to perceptual data reduction techniques and auditory displays.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 611. Current Trends in Music Engineering IV. 3 Credit Hours.
MMI 611 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 620. Audio Technology for Musicians. 3 Credit Hours.
Introduction and overview of audio technology with emphasis on music recording, production equipment, and techniques. Topics include microphones, loudspeakers, mixing consoles, interconnection, amplifiers, digital processing, time code, and surround sound. Open to non-MUE majors.
Components: LEC.
Grading: GRD.

MMI 621. Timbral Ear Training. 3 Credit Hours.
Students in this course will accomplish four primary goals: 1) instantaneous discernment of ISO frequency regions and critical bands; 2) aural identification of audio-processing techniques, artifacts, and problems; 3) development of critical thinking skills and competence in current audio listening test methodologies; and 4) successful completion of a comprehensive bank of critical listening "golden ears" tests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 630. Entrepreneurship for Musicians. 3 Credit Hours.
Course explores a wide range of options for musicians who want to pursue music business careers in their regional music markets. Students examine opportunities in performance, recording, composition, education, and more. Emphasis is placed on the packaging of musical skills in the marketplace and on the financial management of a small proprietary music business. As a result, the student musician will be prepared to make career decisions with foresight and planning.
Requisites: Graduate Music Students Only.
Components: DIL.
Grading: GRD.
Typically Offered: Spring.

MMI 631. Recording Engineering Seminar. 3 Credit Hours.
Students in MMI 531 will accomplish three primary goals: 1) understanding historical trends in the audio recording industry, particularly those involving key technological advances; 2) understanding and appreciating recent advances in sound recording technologies and methods; and 3) development of critical thinking, research, writing, and presentation skills.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 632. Arts Leadership. 3 Credit Hours.
Course explores critical concepts of leadership, decision-making, and teamwork in wide-ranging arts presentation setting. Through experiential learning, students practice and acquire the knowledge and skills vital for effective navigation through the dynamic arts industry.
Requisite: MBEI Or MPRS Or JDMM Or JDMA.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI 637. Recorded Music Operations. 3 Credit Hours.
This course provides a study of the activities involved in commercially exploiting recorded music. The course includes an analysis of activities involved in the production, manufacturing, distribution, and marketing of a recorded music product; as well as related royalty accounting, mechanical licensing and master-use licensing activities.
Components: DIL.
Grading: GRD.
Typically Offered: Spring.

MMI 641. Tour Management and Production. 3 Credit Hours.
Students will become familiar with the responsibilities of a tour planner. Individual tour planning projects are assigned which will give the students insight into the management and production of a tour.
Requisite: Frost School of Music only.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 643. Marketing in the Arts and Entertainment. 3 Credit Hours.
Students learn how to fulfill demand and influence consumer behavior through effective marketing techniques. The course provides the students with information on the latest technologies being employed to reach and communicate with target consumers.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 645. Music Placement and Exploitation. 3 Credit Hours.
This course provides an in-depth study of the creative and business aspects involved with the discovery, placement and exploitation of music in the current entertainment business. Students explore the processes of how music is placed in television, film, commercials, video games, with new media and recording artists. This course covers the roles of the various players in the music placement business and studies creative approaches, negotiation techniques and licensing practices. The DIY music creator, both the songwriter and recording artist, and their music representative will learn how to prepare, package, present, place and exploit their music as well as how to build a fan base. Students will learn how to locate resources for licensable music, offer creative options, select and license appropriate music, combine music with a variety of media, negotiate with a variety of rights holders, and generate license requests, agreements, and cue sheets.
Prerequisite: MMI 673 and MMI 774.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 673. Music Publishing. 3 Credit Hours.
This course provides an in-depth study of the creative and business aspects, concepts and practices of the music publishing industry. The course covers the acquisition, exploitation, administration and protection of songs in the contemporary music publishing business. Students will also study the income sources, royalty rates and payment procedures currently used in the music industry as they apply to musical compositions. Music publishing agreements currently used for the acquisition and administration of songs are reviewed in-depth. Foreign music publishing issues are explored as related to domestic music publishing. Students will also learn how to create and operate their own music publishing company.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 693. Special Projects in Music Media and Industry. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: DIS.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 694. Special Topics in Music Media and Industry. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 701. Advanced Digital Audio Electronics. 3 Credit Hours.
Topics in digital audio including discrete time signals, digital filters, error digital audio processors, FFT, CIRC, and digital recorders are discussed. Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 705. Current Trends in Music Engineering I. 3 Credit Hours.
Theory, design and development of audio signal processing techniques. Topics include DSP architectures, systems design, algorithm development, and applications. DSP development tools used to write, debug, and test programs including time-domain based effects such as reverb, chorus, flanging, and digital delay as well as frequency-domain projects such as FIR, IIR, and FFT filters and vocoders.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 706. Current Topics in Audio Analysis and Signal Processing. 3 Credit Hours.
MMI 606 surveys recent topics related to audio analysis, synthesis, and signal processing with an emphasis in software programming and practical applications. Course material is drawn from several topics: current audio APIs and plug-in architectures, computational theories of musical timbre, machine listening, spatial audio, digital audio effects, new digital audio synthesis techniques, and machine-musician interaction modalities.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 715. Contemporary Songwriting I. 3 Credit Hours.
Explores modern songwriting techniques, song lyric theory, song form, melodic development, pop harmony and rhythm and grooves. Students will analyze a variety of recordings by top modern songwriters. Students will compose and record a number of original songs for the course.
Requisite: Must be in the School of Graduate Music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 726. Performing Arts Center and Facility Management. 3 Credit Hours.
Students learn the many aspects of managing a live entertainment and performing arts center facility. Logistics, management, budgeting, marketing and programming within a live entertainment and performing arts facility are addressed.
Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

MMI 735. World of the Working Musician. 3 Credit Hours.
Building a career in the twenty-first century and beyond creates challenges both exciting and daunting. The purpose of this course is to provide grounding, critical information, as well as planning and vision for shaping the key components of launching and sustaining a career in the arts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 736. Sponsorship, Development, and Financial Management in the Live Entertainment Industry. 3 Credit Hours.
Students learn how to write and present a line-item budget for an arts presentation event, arts presenting organization, and an arts facility. Specific techniques and methods that are used to reduce event risk and safety are discussed.
Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

MMI 738. Legal Aspects of the Live Entertainment Industry. 3 Credit Hours.
Students become familiar with various Artist, Client, Production, Vendor and Facility Contracts and Agreements commonly used in the industry.
Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

MMI 739. Small Contemporary Ensemble. 1 Credit Hour.
A performing ensemble of student-generated contemporary musical repertoire.
Requisite: Must be in the School of Graduate Music.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI 740. Arts Presenting Project. 3 Credit Hours.
Students develop and produce an Arts Presenting event. Students will be responsible for all aspects of budgeting, marketing, promotion and production of the event. This will be a semester long project requiring the knowledge and skills learned throughout the Arts Presenting Program. Requisite: Frost School of Music only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 750. Music Business Agreements. 3 Credit Hours.
This course explores the legal agreements between different parties in the music business, such as record companies, recording artists, music producers, and licensees. Emphasis is placed on the different ways of contractually addressing intellectual property ownership and usage, compensation, and exclusive services. Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 751. Recording Studio Workshop. 1 Credit Hour.
Introduction to the multi track recording studio environment. Hands-on lectures and labs including tracking, overdub and mixdown session management, techniques, and philosophies are included. Topics also include audio routing, equalization, effects, and microphone technique. Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 752. Music Licensing. 3 Credit Hours.
This course provides an in-depth exploration of an extensive variety of music licenses and international licensing concepts. Students acquire practical experience utilizing licensing parameters. Students will also be able to identify, explain, and apply music licensing terms and procedures. The licensing of music in print, sound recordings, the Internet, commercial productions, electrical transcriptions, synchronization for theatrical films and television programs, public performances and theatrical music productions are among the areas covered in this course. Students will also be able to identify and explain the various revenue streams and collection procedures of the international music business. Requisite: Frost School of Music only.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 753. Transducer Workshop. 1 Credit Hour.
Fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electro-acoustical analysis of transducers including acoustic suspensions, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses. Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 759. Digital Audio and MIDI Production. 3 Credit Hours.
Weekly lab focused on Pro Tools proficiency and the intricacies of audio technology relating to a modern producer/film composer. Topics include Digital Audio definitions and uses, Pro Tools understanding, shortcuts and proficiency, and MIDI.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 760. Virtual Orchestration. 3 Credit Hours.
This project-based seminar/lab is designed to expose students to the basics of MIDI orchestration with particular emphasis on the creation of fully-realized mock-ups.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 761. Media Writing 1: Film Scoring Foundations. 3 Credit Hours.
Seminar in the aesthetics and psychology of mood music, sound-film synchronization, timing techniques, and scoring procedures. Analysis and performance of student projects is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 762. Media Writing 2: Film Scoring Extensions. 3 Credit Hours.
Adaptation of previous semester's techniques to television scripts and performed music. Pre-recording, direct recording, and dubbing procedures are included as well as preparation and performance of complete film cues. Each student is required to conduct his/her project.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 763. Media Writing 3: Video Game Scoring. 3 Credit Hours.
Project based seminar/workshop designed to provide students the opportunity to gain the skills, knowledge and experience necessary to produce a variety of musical works for use in visual media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 770. Synthestration. 3 Credit Hours.
Weekly lab focused on Sound Design/synthesis as it applies to the modern producer. Topics include different synthesis techniques, different waves, modulation controls, signal flow as it applies to modular synths, hardware synths vs “softsynths,” and FX processing common to synth instruments.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 771. Production 1: Recording and Production Techniques. 3 Credit Hours.
Recording studio production procedures. Topics include artist and material selection, session planning, and analysis of the producer’s role.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 772. Production 2: Audio FX Processing and Multitrack Mixing. 3 Credit Hours.
Project-based course designed to provide students with a clear understanding of most Audio effects used in Mixing and Music Production. Students are expected to complete one multitrack mix a week, and present to the class their work for critique and review. Additional emphasis is placed on psychoacoustics, room acoustics, and loudness.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 773. Production 3: Advanced Production Seminar. 3 Credit Hours.
Project-based course designed to provide the opportunity to record, produce, mix, and commercially release an EP. Students are expected to use their music production skills to produce a studio-quality commercial recording of a fellow student, including recording, sound design, and mixing. Additional emphasis will be placed on budget management, studio and musician booking, mastering in preparation for release, and extras including meta-data and artwork.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 774. Music Copyright Law. 3 Credit Hours.
This course provides an in-depth study of the essential provisions of the U.S. copyright law as they are related to music.
Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

MMI 780. Advanced Analysis of Current Topics in the Music Business. 3 Credit Hours.
This course provides students with in-depth study of advanced topics in the music business, including recent developments in the areas of music licensing, copyright, international markets, live music, artist development, data management, and others. Particular focus is placed on ways to meet the current challenges facing the industry.
Requisite: Graduate Plan of MBEI or MPR or JDMM or JDML.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 793. Special Projects in Music Media and Industry. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MMI 794. Special Topics in Music Media and Industry. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 802. Music Business Internship. 3 Credit Hours.
Practical experience in different areas of the music business under the supervision of professional firms and the university.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MMI 804. Internship in Arts Presenting. 3 Credit Hours.
Practical experience in different areas of arts presenting under the supervision of professional firms and the university.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MMI 805. Master's Media Writing and Production Project. 1-3 Credit Hours.
This project will require supervised completion of a proposal, business plan, project completion and presentation, reflective journal, and media writing and production electronic press kit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MMI 813. Master's Research Project. 1-3 Credit Hours.
The student working on his/her master's research project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MMI 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

J.D./M.A. in Arts Presenting and Live Entertainment Management

Overview
The University of Miami School of Law and the Frost School of Music offer the first ever joint degree program in law and arts presenting. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Arts in Arts Presenting & Live Entertainment Management (http://www.miami.edu/frost/index.php/arts_presenting/).

In this specialization, students not only learn the essentials of law, but also the common practices of the arts presenting and live entertainment industry — essential skills for becoming a successful attorney in this area of the music and entertainment industry. Through this joint program, students can complete both degrees in less time (3 to 4 years) while studying at a top law school and one of the best music schools in the country. And, as one of the major music cities in the U.S., Miami offers exceptional internship and work opportunities.

Admission Requirements

- Applicants may apply before they begin the J.D. program OR they may apply during their first or second year of Law School. (*Students must be accepted to the J.D. program before they are eligible for acceptance into the J.D./M.M. program.*)
- Students should let Professor Gary Wood know that they are applying to the M.A. program.
- Students will find an application for the joint degree program under the list of graduate program applications (https://www.applyweb.com/miamigrd/)
- Only the LSAT exam is required.
- Students who apply to the joint degree program are giving permission for the M.M. (or M.A.) program admissions staff and faculty to review their complete J.D. application.
- Students already enrolled in the M.A. program are not eligible to apply to the joint program.
• All the requirements of the J.D. and M.A. programs must be fulfilled.

**Curriculum Requirements**

• Students will complete the first-year law school curriculum in its entirety before taking any M.A. courses.
• All other J.D. requirements must be met. Six credits will be satisfied by two M.A. courses. These courses must be completed before the J.D. degree will be conferred.
• Twenty-one credits of M.A. courses are required and cover topics such as tour management and production, live entertainment industry agreements and legal aspects, music copyright, performing arts center and facility management, sponsorship in the live entertainment industry, marketing and promotion, and others. More information about courses in the M.A. curriculum can be found in the UM Academic Bulletin (http://bulletin.miami.edu/graduate-academic-programs/music/music-media-industry/arts-presenting-ma/).
• Nine School of Law credits will be applied to the M.A. degree in the areas of intellectual property, business, and tax law topics. The M.A. degree will not be conferred until these nine credits are completed.
• Students are encouraged to fashion a balanced upper-class law school curriculum which prepares them to provide legal services to clients in the business and entertainment industries including specific offerings regarding arts and entertainment law, as well as more general offerings in domestic and international aspects of fields such as antitrust, business associations, commercial law, intellectual property, tax and torts.
• The M.A. curriculum is prescribed and is offered primarily in the fall and spring semesters, with limited offerings in the summer. Most courses are offered only in the fall or spring of a given academic year. Some courses may be available to take online.
• If a student in the joint program wants to take music elective course (e.g., Musicology, Psychology of Music, Audio for Producers, etc.) arrangements will be made to accommodate the request.
• Students are able to complete the joint degree program within three years if summer courses are taken. Students may also choose to complete the program within three and ½ years or four years.

### J.D./M.M. in Music Business and Entertainment Industries

#### Overview

The University of Miami School of Law and UM's Frost School of Music - ranked one of the top music business schools by [Billboard Magazine](http://www.billboard.com/biz/articles/news/record-labels/7534379/12-elite-music-business-schools-shaping-the-industrys-future?utm_source=twitter) and by the *Hollywood Reporter* - offer the first ever joint degree program in law and music business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Music in Music Business and Entertainment Industries degree from the School of Music [here](http://www.miami.edu/frost/index.php/music_business/).

In this specialization, students not only learn the essentials of law, but also the common practices of the music business – essential skills for becoming a successful attorney in the music industry.

Through this joint program, students can complete both degrees in less time (3 to 4 years) while studying at a top law school and one of the best music schools in the country. And, as one of the four major music cities in the U.S. and as the music center for the Latin American Divisions of all major music companies, Miami offers exceptional internship and work opportunities.
Admission Requirements
Requirements for admission to the graduate studies for the Juris Doctor/Master of Music in Music Business and Entertainment Industries degree are:

• Applicants may apply before they begin the J.D. program OR they may apply during their first or second year of Law School. (Students must be accepted to the J.D. program before they are eligible for acceptance into the J.D./M.M. program.)
• Students should let Professor Serona Elton know that they are applying to the M.M. program.
• Students will find an application for the joint degree program under the list of graduate program applications: https://www.applyweb.com/miamigrd/index.ftl
• Only the LSAT exam is required.
• Students who apply to the joint degree program are giving permission for the M.M. (or M.A.) program admissions staff and faculty to review their complete J.D. application.
• Students already enrolled in the M.M. program are not eligible to apply to the joint program.
• All the requirements of the J.D. and M.M. programs must be fulfilled.

Curriculum Requirements

• Students will complete the first-year law school curriculum in its entirety before taking any M.M. courses.
• All other J.D. requirements must be met. Six credits will be satisfied by two M.M. courses. These courses must be completed before the J.D. degree will be conferred.
• Twenty-one credits of M.M. courses are required and cover topics such as music copyright law, music industry agreement, music publishing and licensing, recorded music operations, marketing and promotion, and others. More information about courses in the M.M. curriculum can be found in the UM Academic Bulletin (http://bulletin.miami.edu/graduate-academic-programs/music/music-media-industry/music-business-entertainment-industries-mm/).
• Nine School of Law credits will be applied to the M.M. degree in the areas of intellectual property, business, and tax law topics. The M.M. degree will not be conferred until these nine credits are completed.
• Student are encouraged to fashion a balanced upper-class law school curriculum which prepares them to provide legal services to clients in the business and entertainment industries including specific offering regarding arts and entertainment law, as well as more general offerings in domestic and international aspects of fields such as antitrust, business associations, commercial law, intellectual property, tax and torts.
• If a student in the joint program wants to take music elective course (e.g., Musicology, Psychology of Music, Audio for Producers, etc.) arrangements will be made to accommodate the request.
• Students are able to complete the joint degree program within three years if summer courses are taken. Students may also choose to complete the program within three and ½ years or four years.

M.A. in Arts Presenting and Live Entertainment Management

Overview

Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that’s distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors. AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program (https://artspresenting.frost.miami.edu/).

Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.sliderroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio
Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- April 1 - All JD/MM and JD/MA applicants
- June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- February 1 - Priority portfolio deadline
- April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
Decisions

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines

• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

Credit Hours
**Mission**

The Arts Presenting and Live Entertainment Management (AP LIVE) masters degree program makes possible specialized, comprehensive and experiential learning in the multifaceted field of live arts presentations. Keen attention to leadership, project management, operations, personnel, finances and for-profit and non-profit arts business models serves as the foundation of the curricular learning, research and activity. With greater-Miami and arts connection to professional across the U.S. and beyond, students graduating from the University of Miami and the Frost School of Music are fully prepared to enter the workforce as dynamic professionals poised to step in successfully to wide-varieties of arts settings around the world.

**Goals**

The program has three primary objectives:

- Each student is fully engaged in the entirety of Arts Presenting and Live Entertainment Management subject matter, with exposure to all of the professional-level issues of the field. To that end, courses are designed with syllabi that ensures a sequence of learning filled with each of the best-practice topics and tactics necessary for gaining professional level skills and wherewithal.

- Each student is engaged in research designed to capture far-reaching information formed from intense study and field experiences. Such research will result in (at least) two formal papers and presentations that exemplify exceptional effort and provide lasting value for the learner. Such research includes, but is not limited to creating and managing projects of various sizes, business models and implementation strategies, industry-related statistical analysis such as environmental scans, demographics and so forth, as well as the exploration of arts-based subjects that go to the heart of the arts presenting reason d'etre.

- Each student is introduced to professionals in the field—across the U.S. and beyond—such that they have developed a meaningful and useful network of mentors and contacts offering insights into arts presenting management issues, best practices and opportunities for further learning. The network of contacts is compelled into existence by way of course-work throughout the degree program that relies upon expert input as part of the assignments objectives, as well as professionals introduced by faculty.

**Student Learning Outcomes**

- Students will demonstrate the ability to create a graduate-level, high quality and extensively researched paper on a critical topic applicable to the course.

- Students demonstrate mastery of live presentations. Through research on an arts-based, course-specific topic, students organize information and share in a formal presentation as a means of exhibiting A) appropriate and effectual planning and format organizational skills, and B) proper and engaging communication competence. In so doing, students gain experience and capacities for successful live presentations frequently required in the professional field, such as funding requests, board reports, pre-concert discussions, educational lectures and more.

- Students demonstrate mastery of creating a comprehensive grant request.
M.A. in Arts Presenting and Live Entertainment Management (Online)

Overview
Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that’s distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors. AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program (https://artspresenting.frost.miami.edu/).

Admission Requirements
Applying to UOnline

How to Submit Your Application
When you decide to pursue a degree with UOnline, you’ll have a dedicated enrollment advisor to guide you through the application process. Follow the steps outlined below and contact your enrollment advisor with any questions.

Close all tabs (https://uonline.miami.edu/admissions/)

• 1. START YOUR APPLICATION (https://uonline.miami.edu/admissions/)
  Go to our online application (https://myonline.miami.edu/signup/).

• 2. COMPILE DOCUMENTS (https://uonline.miami.edu/admissions/)
  Upload the following required documents in the upload section:
  - Unofficial Transcript: Submit a copy of your transcript from all academic institutions attended.
  - Test Scores: Depending on the program you choose, you may need to submit graduate exam results. GRE and GMAT waivers are available for qualified applicants.
  - Résumé: Submit your most recent résumé that appropriately illustrates your professional experience.
  - Personal Statement: Submit a one-page personal statement addressing your interest in the program concerning your professional background and career aspirations.
  - Language Proficiency: International students who do not hold an undergraduate U.S. degree must submit Test of English as a Foreign Language (TOEFL) scores. For more information, please see the Student Handbook (http://bulletin.miami.edu/graduate-student-handbook-online-students/?_ga=2.34928225.1136839122.1586795706-1670025083.1584388400).

• 3. REQUEST YOUR OFFICIAL TRANSCRIPTS (https://uonline.miami.edu/admissions/)
  Request your transcripts electronically (preferred) or by regular mail:
  to etranscripts@miami.edu, or mail it to:
  Online Enrollment – Admissions Office
  1320 S. Dixie Hwy, Suite 902
  Locator – 2291
  Coral Gables, FL 33146-2291

  Please note: All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services.

• 4. OBTAIN TWO PROFESSIONAL RECOMMENDATIONS (https://uonline.miami.edu/admissions/)
  Enter the names and contact information for two (2) people who can comment on your professional ability in the online application. Your references automatically receive an email to fill out your recommendation online. You can then track the status of each recommendation in the system. Recommendations must be received by the application deadline to be considered for admissions.

• 5. APPLY FOR FINANCIAL AID (https://uonline.miami.edu/admissions/)
  Click here (https://uonline.miami.edu/scholarship-aid/) for more info about financial aid and the scholarships available to our students. Our enrollment advisors are also available to help you every step of the way.

Admission Decision Timeline
Once you have submitted your application, we will be in touch in the next two days.
If you are accepted to study online with the University of Miami, you have 24 hours to accept your offer and can then start your online student readiness orientation.

Keen attention to leadership, project management, operations, personnel, finances and for-profit and non-profit arts business models serves as the foundation of the curricular learning, research and activity. With greater Miami and arts connection to professional across the U.S. and beyond, students graduating from the University Miami and the Frost School of Music are fully prepared to enter the workforce as dynamic professionals poised to step in successfully to wide-varieties of arts settings around the world.

Goals
The program has three primary objectives:

• Each student is fully engaged in the entirety of Arts Presenting and Live Entertainment Management subject matter, with exposure to all of the professional-level issues of the field. To that end, courses are designed with syllabi that ensures a sequence of learning filled with each of the best-practice topics and tactics necessary for gaining professional level skills and wherewithal.

• Each student is engaged in research designed to capture far-reaching information formed from intense study and field experiences. Such research will result in (at least) two formal papers and presentations that exemplify exceptional effort and provide lasting value for the learner. Such research includes, but is not limited to creating and managing projects of various sizes, business models and implementation strategies, industry-related statistical analysis such as environmental scans, demographics and so forth, as well as the exploration of arts-based subjects that go to the heart of the arts presenting reason d’etre.

• Each student is introduced to professionals in the field—across the U.S. and beyond—such that they have developed a meaningful and useful network of mentors and contacts offering insights into arts presenting management issues, best practices and opportunities for further learning. The network of contacts is compelled into existence by way of course-work throughout the degree program that relies upon expert input as part of the assignments objectives, as well as professionals introduced by faculty.

Student Learning Outcomes

• Students will demonstrate the ability to create a graduate-level, high quality and extensively researched paper on a critical topic applicable to the course.

• Students demonstrate mastery of live presentations. Through research on an arts-based, course-specific topic, students organize information and share in a formal presentation as a means of exhibiting A) appropriate and effectual planning and format organizational skills, and B) proper and engaging communication competence. In so doing, students gain experience and capacities for successful live presentations frequently required in the professional field, such as funding requests, board reports, pre-concert discussions, educational lectures and more.

• Students demonstrate mastery of creating a comprehensive grant request.

M.M. in Media Writing and Production

Overview
In the Media Writing and Production program, we are dedicated to not only providing the foundational skills necessary for the student to pursue a career in the media industry, but also to stimulate and encourage student awareness of their unique gifts as a creative musician. We accomplish this by promoting critical analysis and creative problem-solving skills throughout the program. Courses are designed to provide students with a cohesive program of study that incorporates both current and foreseeable trends — from the manipulation of sound through a digital audio workstation (DAW), the hybrid use of acoustic and electronic instruments, to the implementation and use of sound libraries and synthesizers that will best prepare students for competition in today’s industry. For more information, please visit the website for the Media Writing and Production (https://mediawriting.frost.miami.edu/degrees/mm-in-media-writing-and-production/) Program (https://artspresenting.frost.miami.edu/).

Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.
Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date
International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

### Total Credit Hours
30

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

### Mission
The mission of the Media Writing and Production Masters of Music degree program is to provide the student with the skills necessary to pursue a career as a creator and producer of commercial music. The purpose of the Media Writing and Production program is to provide advanced competency as a composer, arranger and producer of commercial music. In contrast with other departments, the Media Writing and Production department culminates with the writing and defense of a thesis conforming to graduate school guidelines.

### Goals
The program emphasizes the following objectives:
• Students will graduate in a timely manner from the program
• Students will be highly satisfied with their understanding of craft of creating music for media.
• Students will be prepared to find success in the media industry.

Student Learning Outcomes

• The student will develop and defend a portfolio of musical works, and compose a detailed narrative of his/her process, demonstrating advanced competencies as a composer, arranger and producer of music commensurate with current contemporary/commercial music professionals. (Thesis project.)
• The student will develop the ability to analyze and identify sonic problems encountered during the production of contemporary/commercial music. The student will demonstrate the skills necessary to execute viable solutions through advanced competencies in Digital Audio Workstation (DAW) techniques, including editing, signal processing and mixing. He/she will create acceptable final mixes of their works and generate deliverable in prescribed audio and/or video format. Student performance is measured using a standard grading system. Criteria include the sonic and aesthetic qualities of the finished product, deliverables, meeting deadlines, and musical score/DAW layout.
• The student will demonstrate the ability to compose, arrange and produce of music for visual media in both virtual and acoustic formats, and prepare all deliverables including digital assets (audio files, DAW sessions, midi files and track assignments), music preparation including score layout and final mixes (stereo mix, sub mixes and stems) conforming to delivery requirements commonly required in the contemporary/commercial music industry.

M.M. in Music Business and Entertainment Industries

Overview
In today’s fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBIE program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the Music Business program (https://musicbusiness.frost.miami.edu/).

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mbi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
M.M. in Music Business and Entertainment Industries

- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

---

**Mission**

The mission of the Music Business and Entertainment Industries Program is to prepare students for careers in the music business profession, specifically in the areas involving music publishing, the record business, music distribution, music copyright and music licensing. This is accomplished through courses focused on these topics.

---

**Goals**

Students in the Master of Music in Music Business and Entertainment Industries degree program have a passion for music and business and want to pursue careers which combine the two. They come to the Frost School of Music to be with others from across the country who have similar interests and to prepare for a professional career in the music business through study with members of our renowned faculty.

Coursework, extra-curricular participation, and internships are vital components of the degree program. The program is interdisciplinary in nature with emphasis placed upon courses in music business, music, and business. Majors study music business topics such as copyright, music publishing, record companies, entertainment contracts, music licensing, touring, and music marketing, as well as others. Students are also able to take several
graduate courses offered outside of the Music Business and Entertainment Industries program as electives, such as courses in our Arts Presenting and Live Entertainment Management program and courses offered in the Herbert Business School or School of Communication.

**Student Learning Outcomes**

- Students will demonstrate knowledge of the fundamentals of the music publishing industry, including music licensing, royalties, publishing agreements, and how a song catalog is commercially exploited.
- Students will demonstrate knowledge of the fundamentals of the recorded music industry, including how content is created, distributed, and marketed, and how recording agreements are structured.
- Students will demonstrate knowledge of the fundamentals of music copyright and music licensing, including how it applies to musical works and sound recordings, copyright infringement, the length of copyright protection, and international treatment of music copyrights.

### M.M. in Music Business and Entertainment Industries (Online)

**Overview**

In today's fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBEI program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the Music Business program (https://musicbusiness.frost.miami.edu/).

**Admission Requirements**

**Applying to UOnline**

When you decide to pursue a degree with UOnline, you'll have a dedicated enrollment advisor to guide you through the application process. Follow the steps outlined below and contact your enrollment advisor with any questions.

Close all tabs (https://uonline.miami.edu/admissions/)

1. **START YOUR APPLICATION** (https://uonline.miami.edu/admissions/)
   Go to our online application (https://myonline.miami.edu/signup/).

2. **COMPILE DOCUMENTS** (https://uonline.miami.edu/admissions/)
   Upload the following required documents in the upload section:
   - Unofficial Transcript: Submit a copy of your transcript from all academic institutions attended.
   - Test Scores: Depending on the program you choose, you may need to submit graduate exam results. GRE and GMAT waivers are available for qualified applicants.
   - Résumé: Submit your most recent résumé that appropriately illustrates your professional experience.
   - Personal Statement: Submit a one-page personal statement addressing your interest in the program concerning your professional background and career aspirations.
   - Language Proficiency: International students who do not hold an undergraduate U.S. degree must submit Test of English as a Foreign Language (TOEFL) scores. For more information, please see the Student Handbook (http://bulletin.miami.edu/graduate-student-handbook-online-students/?_ga=2.34928225.1136839122.1586795706-1670025083.1584388400).

3. **REQUEST YOUR OFFICIAL TRANSCRIPTS** (https://uonline.miami.edu/admissions/)
   Request your transcripts electronically (preferred) or by regular mail:

   to etranscripts@miami.edu, or mail it to:

   Online Enrollment – Admissions Office
   1320 S. Dixie Hwy, Suite 902
   Locator – 2291
Coral Gables, FL 33146-2291

Please note: All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services.

- 4. OBTAIN TWO PROFESSIONAL RECOMMENDATIONS (https://uonline.miami.edu/admissions/)
   Enter the names and contact information for two (2) people who can comment on your professional ability in the online application. Your references automatically receive an email to fill out your recommendation online. You can then track the status of each recommendation in the system. Recommendations must be received by the application deadline to be considered for admissions.

- 5. APPLY FOR FINANCIAL AID (https://uonline.miami.edu/admissions/)
   Click here (https://uonline.miami.edu/scholarship-aid/) for more info about financial aid and the scholarships available to our students. Our enrollment advisors are also available to help you every step of the way.

**Admission Decision Timeline**
Once you have submitted your application, we will be in touch in the next two days.

If you are accepted to study online with the University of Miami, you have 24 hours to accept your offer and can then start your online student readiness orientation. (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission

The mission of the Music Business and Entertainment Industries Program is to prepare students for careers in the music business profession, specifically in the areas involving music publishing, the record business, music distribution, music copyright and music licensing. This is accomplished through courses focused on these topics.

Student Learning Outcomes

- Students will demonstrate knowledge of the fundamentals of the music publishing industry, including music licensing, royalties, publishing agreements, and how a song catalog is commercially exploited.
- Students will demonstrate knowledge of the fundamentals of the recorded music industry, including how content is created, distributed, and marketed, and how recording agreements are structured.
- Students will demonstrate knowledge of the fundamentals of music copyright and music licensing, including how it applies to musical works and sound recordings, copyright infringement, the length of copyright protection, and international treatment of music copyrights.

M.S. in Music Engineering Technology

Overview

Since 1975, the Music Engineering Technology program at the University of Miami Frost School of Music has pioneered education in music and technology, setting the standard by which the National Association of Schools of Music (NASM) accredits other such programs around the United States. Alumni of the program have contributed significantly to the music and audio industries and upon graduation pursue careers ranging from recording engineer to software designer.

The Music Engineering Technology program offers a two-year Master of Science graduate degree for students who have completed an undergraduate degree in electrical engineering or computer science. These students study the software and hardware design of audio systems and perform independent research that culminates in a thesis project. Upon graduation, these students are widely placed in top corporations that span the audio industry. For more information, please visit the website for the Music Engineering program (https://musicengineering.frost.miami.edu/).

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

Step 1 - Apply

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
- Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:
December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here [https://www.wes.org/](https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials [https://www.wes.org/#get-started](https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list [http://naces.org/members.html](http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610

or electronically to:  
fsom.graddocs@miami.edu

- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only  
- Applications are accepted for only one degree program  
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration  
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.  
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.  
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript  
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant  
- For information on where to submit supplemental materials, please see our Contact Information [https://admissions.frost.miami.edu/contact-us/](https://admissions.frost.miami.edu/contact-us/)

Credit Hours 5

Total Credit Hours 30

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

**Mission**
The mission of the Music Engineering Technology program is to:

- Provide the highest quality education in the field of music engineering technology
- Promote advancements in the fidelity and creativity of music recording, production, and reproduction
- Promote advancements in the invention, design, and implementation of audio hardware and software.

**Goals**
The goals of the MS Music Engineering Technology program are to:
• Engage experiential and novel teaching modalities that lead to rapid student acquisition of elite technical skills that qualify them for cutting-edge positions in the audio industry;
• Prepare students for potential placement in PhD programs in Music Technology, Computer Science, Electrical Engineering, Digital Informatics, or Media Engineering;
• Ensure that curricular offerings are current and able to educate students in new and future theory and practice; and
• Place graduates into professional career positions.

Student Learning Outcomes

• Students will demonstrate advanced problem solving skills to find a solution to an engineering research problem.
• Students will demonstrate fundamental understanding of software engineering concepts and applications as applied to music engineering problems.
• Students will demonstrate advanced understanding of electrical and computer engineering concepts and applications to audio analysis and signal processing.

Music Theory - Composition

https://composition.frost.miami.edu/index.html

Degree Programs

Known for its aesthetic diversity and openness to the ever-changing and progressive world of composition, the Frost School of Music’s Department of Music Theory and Composition (https://composition.frost.miami.edu/) has a long tradition of distinguished faculty and students. When today’s post-baccalaureate composers decide to pursue a Master’s Degree in Composition, they look to Frost faculty composers for inspiration and mentoring. At Frost, graduate students are well coached to take the next steps toward their professional maturation. They work one-on-one with our dedicated faculty to expand their music portfolios, enter competitions, apply for commissions and network in the music profession. Candidates for the Doctor of Musical Arts in Composition (D.M.A.) develop advanced research and teaching skills that are applicable to careers in higher education. For more information, please visit the website for the department of Music Theory and Composition (https://composition.frost.miami.edu/).

Doctoral Program in Music Theory - Composition

• D.M.A. in Composition (p. 2833)

Masters Programs in Music Theory - Composition

• M.M. in Music Composition (p. 2837)

MTC 601. The Aesthetics of Music. 3 Credit Hours.
Survey of thought and discourse about the nature, roles, values, experiences, and meanings of music. Variety of perspectives, including those of the listener, performer, and composer are addressed. Application to musical interpretation and criticism is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 605. Analysis and History of Electroacoustic and Acousmatic Music. 2 Credit Hours.
Course examines electroacoustic and acousmatic music from both a historical/literature and analytical perspective. Analytical techniques with a focus on an ecological analysis approach will be conducted as well as a survey of electroacoustic, acousmatic, and digital music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 606. Digital Editing and Sequencing. 3 Credit Hours.
Computers as control devices for music synthesis and digital manipulation of pre-recorded sounds. Topics include interfacing sequencing software with software synthesizers, performance techniques, and sound design using samples.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 607. Studio Licensing. 2 Credit Hours.
Licensing for access to Digital Arts and Media Writing Studios. Topics covered include digital audio recording and editing, sound synthesis/design, audio signal processing, sound analysis and spatial placement of sound. Course includes studio-use qualifying exams.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MTC 615. Choral Arranging. 3 Credit Hours.
Arranging for choir and vocal groups with and without instrumental accompaniment in all styles.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 616. Advanced Orchestration. 3 Credit Hours.
Scoring for the symphonic orchestra with an emphasis on recent techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 617. Analysis of Popular Music Since 1950. 3 Credit Hours.
Course examines popular music in the second half of the Twentieth Century from a music analytical perspective. Critical skills needed for this analysis are identified and developed. Analytical techniques for understanding the determination and utilization of musical elements and structures in contemporary popular music are applied. Various contemporary genres and some precursors are examined and particular stylistic determinants of their compositional and performance models are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTC 618. Advanced Counterpoint. 3 Credit Hours.
Three-voice fugal writing in Bach’s style, followed by compositional projects in a variety of twentieth-century contrapuntal style
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 621. Multimedia for Musicians. 3 Credit Hours.
Presents an overview and introduction to the creation of multimedia projects for presentation on the Web. Focus is placed on building websites, and the creation of multimedia content for online delivery. Software tools for the manipulation of digital media, including audio and video, are utilized in the realization of course projects.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTC 667. Graduate Composition and Technologies. 2 Credit Hours.
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 693. Special Projects in Music Theory and Composition. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 694. Special Topics in Music Theory and Composition. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 705. Digital Art and Sound Design. 3 Credit Hours.
Software-based techniques of sound synthesis. Topics will include synthesis using Ircam Tools, Max/Msp, Jitter, Csound, and PureData.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MTC 711. Experiential Musicianship and Theory Pedagogy. 3 Credit Hours.
This course advances two complementary facets: (1) students develop their musicianship skills—here understood as the combination of aural, analytical, performative (ensemble), sight-singing, and keyboard orientation skills—as a means for developing a strong foundation for music making and teaching; and (2) students develop an informed philosophy about pedagogical paradigms, particularly (but not exclusively) in relation to music theory and aural skills, by surveying scholarship on a wide range of topics, including repertoire, assessment, perception and cognition, diversity, improvisation, composition, writing, keyboard orientation, disability, and beyond.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 712. Advanced Comprehensive Theory. 3 Credit Hours.
Music theory as a research discipline is expanding in every conceivable direction, including a growing involvement with the non-Western canon, conscious inclusion of context and interpretation, and a heightened awareness of methodological advances in other disciplines. Students will become acquainted and engage with influential methodological paradigms of the last fifty years through weekly reading/analysis assignments and seminar discussions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 713. Twentieth Century Idioms. 3 Credit Hours.
Relevant modes of perception, influences, and technical devices in 20th-century music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 715. Graduate Composition. 2 Credit Hours.
Creative work in composition requiring a multi-movement work scored for full orchestra, symphonic band, or chorus with orchestra or band.
Components: LSN.
Grading: GRD.
Typically Offered: Fall.

MTC 717. Analytical Techniques. 3 Credit Hours.
Examination and practice of various techniques used in the analysis of music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 719. Introduction to Schenkerian Analysis. 3 Credit Hours.
A first course in the theory and analytical practice of Heinrich Schenker. Students will learn the principles and techniques of Schenkerian analysis and will apply them to the study of works in smaller sectional forms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 730. Introduction to Spectralism. 3 Credit Hours.
To give the student a further understanding of the art and techniques of spectral composition, through listening, research, analysis, and composition (optional).
Requisite: Must be in the School of Graduate Music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 748. Electronic Music Ensemble. 1 Credit Hour.
An in-depth study and performance of electroacoustic music compositions.
Components: ENS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTC 767. Advanced Graduate Composition and Technologies. 2 Credit Hours.
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MTC 782. Composition Workshop. 1 Credit Hour.
Variety of composition concepts and problems are dealt with through assignments and projects with special emphasis on practical considerations.
Requisite: MTCP_MM or MTCP_DMA Majors Only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 793. Special Projects in Music Theory and Composition. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Requisites: Graduate Music Students Only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 794. Special Topics in Music Theory and Composition. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Requisites: Graduate Music Students Only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 797. Studio Rhythm Section. 1 Credit Hour.
A performing ensemble of student-generated contemporary musical repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 799. Ensemble Ibis for New Music. 1 Credit Hour.
An in-depth study and performance of 20th century music.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MTC 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MTC 831. Doctoral Essay. 1-12 Credit Hours.
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MTC 731 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MTC 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
D.M.A. in Composition

Overview
Known for its aesthetic diversity and openness to the ever-changing and progressive world of composition, the Frost School of Music's Department of Music Theory and Composition has a long tradition of distinguished faculty and students. When today's post-baccalaureate composers decide to pursue a Doctor of Musical Arts degree in Composition, they look to Frost faculty composers for inspiration and mentoring. At Frost, graduate students are well-coached to take the next steps toward their professional maturation. They work one-on-one with our dedicated faculty to expand their music portfolios, enter competitions, apply for commissions, and network in the music profession. Candidates for the Doctor of Musical Arts in Composition (D.M.A.) develop advanced research and teaching skills that are applicable to careers in higher education.   - Applicants with international transcripts, please click here for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
- GRE Score - Please contact your program faculty for specific GRE information
- TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements.

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.
Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

## Mission

The mission of the Doctor of Musical Arts program in Composition is to provide students with advanced preparation in the field of composition.

## Goals

The goals of the program are:
• To enable students to develop advanced compositional skills beyond the level of the Master of Music degree in Composition;
• To help students consider or choose their compositional directions or options in the 21st century;
• To help students get their music performed or realized; and
• To help students develop a strong profile or identity as a composer.

Student Learning Outcomes
• Students will be able to demonstrate advanced composition knowledge.
• Students will be able to analyze music from pre-Baroque up through 21st century and of six different genre types (orchestra, opera, choral, solo, chamber, and electroacoustic).
• Students will be able to write effectively about their own compositions.

M.M. in Music Composition
The M.M. in Music Composition requires composition lessons and courses in music technology and theory. The thesis project for this degree consists of composing a major work. Teaching Assistantships are available but highly competitive.

Application Guidelines
• Applications are accepted for the fall term only
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.

Admission Requirements
• Completed application and fee
• Official transcripts from all higher education institutions attended
• 3 letters for recommendation
• Portfolio
  • Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements
• GRE Score (https://admissions.frost.miami.edu/graduate/how-to-apply/gre-information/)
  • GRE (https://www.ets.org/gre/) scores are only valid for a period of five years. The Frost School of Music Graduate program requires a minimum 295 combined Verbal and Quantitative score and minimum 4.0 on the Analytical Writing. The GRE codes for UM are as follows: Institution Code R5815, Department Code 2404
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
  • Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found on International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
  • TOEFL (https://www.ets.org/toefl/) and IELTS (https://www.ielts.org/) scores are only valid for a period of two years. The Frost School of Music requires applicants to receive a minimum TOEFL score of 80 or a minimum IELTS score of 6.5. The TOEFL codes for UM are as follows: Institution Code R5815, Department Code 2404

### Mission

The mission of the Master of Music in Composition is:

- To provide the highest quality and most educational and creative environment for work relating to the creation and understanding of music;
- To foster advancement in composition;
- To provide students with advanced work in the field of composition and thus enabling a career in professional or scholarly pursuit of music;
- To substantially contribute to the Frost School of Music’s role as a regional, national, and international nexus for the creation and understanding of music.
Goals
The objectives of the program are:

- To provide training for students to develop advanced compositional skills;
- To prepare students to meet the needs and challenges of the musician in the 21st century;
- To provide students with the skills, knowledge, and experience to complete independent and original work in the field;
- To give students an advanced knowledge of music as performers, composers, or listeners, enlarging and enhancing their musical interests and abilities.

Student Learning Outcomes
- Students will be able to compose musical works of artistic merit.
- Students will present a well-organized recital of their compositions.

Musicology
https://musicology.frost.miami.edu/

Degree Programs
Graduate students seeking the M.M. in Musicology at the Frost School of Music enjoy a balanced curriculum of study in music literature, analysis, performance, and research methods (https://musicology.frost.miami.edu/).

Our stellar faculty and extensive library resources help students fulfill their musical and academic goals while preparing for advanced study. Musicology majors interact and collaborate with others in a variety of musical disciplines, gaining insight into the role their own specialization plays in a thriving musical environment. For more information, please visit the website for the department of Musicology (https://musicology.frost.miami.edu/).

Masters Program in Musicology
- M.M. in Musicology (p. 2843)

MCY 620. History and Literature of the Wind Band. 3 Credit Hours.
An historical survey of wind band literature, the evolution of the military band, the wind band, and the wind orchestra.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 621. Symphonic Literature. 3 Credit Hours.
A survey of orchestral music from the end of the seventeenth century to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 622. Operatic Literature. 3 Credit Hours.
The history and literature of opera from the end of the sixteenth century to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 624. Classical Music of the Twentieth and Twenty-First Centuries. 3 Credit Hours.
Music of the 20th and 21st centuries in the Western Art Music tradition, with emphasis on developments since 1945 in Europe and the Americas focusing on modernist, avant-garde, and postmodernist.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 625. Art Song Literature. 3 Credit Hours.
A survey of the solo vocal literature from the 16th century to the present, with particular emphasis on the 19th-century French and German repertoire.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MCY 626. Keyboard Literature I. 3 Credit Hours.
A survey of keyboard literature from its beginning to approximately 1750 emphasizing changes in styles of writing and expression, development of
techniques suited to the primary instruments in use (including the early organ, clavichord, harpsichord and forte-piano), ornamentation both specified
and improvised, forms, and ideas for interpretation based on historical sources.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 627. Keyboard Literature II. 3 Credit Hours.
A survey of solo keyboard literature from approximately 1750 to the present emphasizing changes in styles of writing and expression, development
of technique suited to the primary instruments in use (including the clavichord, harpsichord, forte-piano and modern piano), embellishment both
specified and improvised, forms, and ideas for interpretation based on historical sources (including facsimiles, printed scores, written records and
sound recordings, particularly those by the composers themselves).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 629. Music of the Baroque Period. 3 Credit Hours.
Literature and history of music from the end of the sixteenth to the middle of the eighteenth centuries.
Components: LEC.
Grading: GRD.

MCY 630. Music of the Classical Period. 3 Credit Hours.
The musical styles which developed between the mid-eighteenth century and the nineteenth century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 632. History of Chamber Music. 3 Credit Hours.
Styles and forms in chamber music literature from the seventeenth century to the present.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 633. Music of the Romantic Period. 3 Credit Hours.
The musical styles which developed during the nineteenth century.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 635. Choral Literature I. 2 Credit Hours.
Choral music of the sixteenth through the eighteenth centuries. A combination of lecture-discussion and class performance.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 636. Choral Literature II. 2 Credit Hours.
Choral music of the nineteenth and twentieth centuries. A combination of lecture-discussion and class performance.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 637. Music in the United States. 3 Credit Hours.
A survey of music in the United States from the 19th century through the 20th century. The course explores some of the diverse ways that peoples
from differing backgrounds have created and used music to express notions of themselves, their cultures, and this country.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MCY 638. Music, Gender, and Sexuality. 3 Credit Hours.
An exploration of music from around the world from the perspective of women. We will examine the roles women have played, and still play, as creators and performers in art music and popular music traditions. Representations of women and gender ideologies will also be discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 640. Music and Religion. 3 Credit Hours.
Music and Religion are fundamental aspects of human existence, evidence of which goes back some 30,000 years. This seminar course will explore musical and religious experiences in human history and the use of music within major religious traditions. It will include specific study of some of the major monuments of sacred music of the western classical tradition.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 653. Miami’s Musical Heritage. 3 Credit Hours.
A study of the musical traditions and practices of the various cultures that are part of Miami’s unique multi-ethnic society

Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

MCY 654. Music Cultures of the World. 3 Credit Hours.
A study of music culture of the region including the music of folk societies, popular artists, and classical musicians. Open to non-majors.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MCY 662. Music of Argentina and Brazil. 3 Credit Hours.
An in-depth study of Argentine and Brazilian musical cultures covering folk, popular, and classical traditions. Open to non-majors.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 664. Seminar in Latin American Music Collections. 3 Credit Hours.
Examines Latin American music materials at the Cuban Heritage Collection and Special Collections at the Richter Library. Focuses on interpreting original documents and acquiring archival techniques.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 683. History of the American Musical Theatre. 3 Credit Hours.
An examination of the development of musical theatre from its European opera and operetta background to an indigenous American art form. The areas to be explored include the rise and fall of various genre of musical shows, integration of story, song and dance, important producers, directors, lyricists, composers, and new fields such as director-choreographer. The development of an American cultural consciousness and political and socio-economic trends of various decades that greatly influenced the content and form of musical shows is also examined.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 693. Special Projects in Musicology. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.

Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 694. Special Topics. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MCY 702. Interpreting Music History and Culture: An Introduction to Musicology. 3 Credit Hours.
This course functions as an introduction to the study of musicology and ethnomusicology at an advanced level. Students will become acquainted with research methodologies as well as major debates in the field from the last thirty years. The goal is for students to leave the course with the ability to conduct independent research in musicology and ethnomusicology.
Requisite: Frost School of Music only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 711. Musicology Pedagogy. 3 Credit Hours.
Musicology Pedagogy. The course explores various philosophies of and approaches to teaching music history and literature.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 716. Graduate Musicology Forum. 0 Credit Hours.
Graduate Musicology Forum: A weekly gathering of faculty and students featuring lectures and discussion on current topics in musicology and ethnomusicology.
Components: FOR.
Grading: SUS.
Typically Offered: Fall & Spring.

MCY 720. Jazz Cultures: History and Historiography. 3 Credit Hours.
This course surveys a range of the sounds and practices that have been called jazz over the past century and explores some of the ways in which musicians, educators, scholars, journalists, audiences, and others have understood and shaped this genre.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 728. Music Bibliography. 3 Credit Hours.
The course introduces students to a range of research materials dealing with music history and literature. In addition, students will gain the necessary skills to engage successfully in academic research, with a focus on source citation, formatting, and argumentative writing.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MCY 793. Special Projects in Musicology. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 794. Special Topics in Musicology. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MCY 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master’s degree after the student has completed the required hours of thesis credit.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
Students seeking the M.M. in Musicology at the Frost School of Music enjoy a balanced curriculum of study in music literature and analysis, critical theory, and research methods, along with opportunities to develop skills in music performance, composition, and pedagogy.

Total Credit Hours 30

---

Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Department of Modern Languages and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in ITA 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master's thesis.

### Year One

**Fall**

- MCY 728   Music Bibliography  3
- MCY 702   Interpreting Music History and Culture: An Introduction to Musicology  3
- MTC 6XX/7XX Music Theory Elective  3

**Credit Hours**

**Spring**

- MCY 6XX/7XX Musicology Elective  3
- MCY 6XX/7XX Musicology Elective  3
- Non MCY Music Elective  3

**Language Proficiency**

**Credit Hours**

**Total Credit Hours** 9

---

### Year Two

**Fall**

- MCY 6XX/7XX Musicology Elective  3
- Non MCY Elective, In or Beyond Music  3
- MCY 810   Master’s Thesis  3

**Credit Hours**

**Spring**

- MCY 810   Master’s Thesis  3

**Credit Hours**

**Total Credit Hours** 30

* Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Department of Modern Languages and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in ITA 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master’s thesis.
This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

**Mission**

Faculty and students of the Department of Musicology (MCY) in the Frost School of Music at the University of Miami advance the interdisciplinary study of music by examining how, when, where, and why people create, experience, and understand music. Coursework in the program is designed to enable students to acquire in-depth knowledge of musicology and to develop students’ abilities to write and talk effectively about relevant issues within musicology and related disciplines.

**Goals**

**Student Learning Outcomes**

- Students will acquire, demonstrate, and apply in-depth knowledge of musicology and related fields.
- Students will demonstrate discipline-specific writing skills commensurate with professional norms.
- Students will demonstrate discipline-specific oral-communication skills commensurate with professional norms.

**Studio Music and Jazz**

https://jazz.frost.miami.edu/

**Degree Programs**

The mission of the Studio Music and Jazz Instrumental Degree Programs (https://jazz.frost.miami.edu/) is to: (1) prepare jazz instrumentalists to enter the music profession or further jazz studies; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact discs, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production. For more information, please visit the website for the department of Studio Music and Jazz (https://jazz.frost.miami.edu/).

**Doctoral Programs in Studio Music and Jazz**

- D.M.A. in Jazz Composition (p. 2855)
- D.M.A. in Jazz Performance (p. 2860)

**Masters Programs in Studio Music and Jazz**

- M.M. in Jazz Performance, Instrumental (p. 2869)
- M.M. in Jazz Performance, Vocal (p. 2873)
- M.M. in Jazz Pedagogy (p. 2865)
- M.M. in Studio Jazz Writing (p. 2878)

**MSJ 609. Jazz Composition I. 2 Credit Hours.**

Study of advanced composition techniques as applied to the Jazz idiom, making extensive use of analysis of established compositions and compositional methods. Both the individual and interactive characteristics of melody, harmony, rhythm, and form will be stressed.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**MSJ 610. Jazz Composition II. 2 Credit Hours.**

This course is a continuation of MSJ 500 with an emphasis on melody writing, reharmonization techniques, pentatonic/blues composition, and an introduction to advanced harmonic materials.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

**MSJ 616. Jazz Vocal Arranging. 2 Credit Hours.**

Analysis and techniques of jazz vocal writing.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.
MSJ 619. Advanced Modern Arranging I. 3 Credit Hours.
Advanced arranging and composition for the Jazz and studio ensemble.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 620. Advanced Modern Arranging II. 3 Credit Hours.
Advanced arranging and composition for the Jazz and studio ensemble.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 621. Advanced Modern Arranging III. 3 Credit Hours.
Course addresses scoring for large jazz ensemble, utilizing chord scale voicings and line writing techniques. Emphasis is placed on orchestration styles such as Duke Ellington, Gil Evans, and Thad Jones.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 622. Introduction to Midi Sequencing and Digital Workstations. 2 Credit Hours.
An introduction to Midi Sequencing with hands-on experience working with a computer sequencing workstation. Topics include sequencing, quantizing, editing, mixing, and effects processing.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 644. Jazz Pedagogy and Administration. 3 Credit Hours.
The philosophy, methods, and materials of instruction pertinent to the teaching and management of a jazz and commercial curriculum at the high school and college level. Includes preparation of model curricula and supervised instruction.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 665. Advanced Improvisation I. 3 Credit Hours.
Exploration of advanced Jazz improvisation performance and practice techniques. Utilization of non-traditional harmonic motion, advanced chord scale relationships, and motivic development will be stressed, with the goal of musicality in improvisation. Enrollment open to seniors or graduate MSJ majors (or permission of instructor).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 666. Advanced Improvisation II. 3 Credit Hours.
Refinement of improvisation concepts leading towards the establishment of a personal style of playing. Open only to senior or graduate majors in Studio Music and Jazz.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 693. Special Projects in Studio Music and Jazz. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 694. Special Topics in Studio Music and Jazz. 1-2 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.
MSJ 703. Jazz Piano Class I. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 704. Jazz Piano Class II. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Graduate students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 712. Preliminary Masters Recital. 1 Credit Hour.
The Preliminary Recital gives the master's student an opportunity to gain experience in planning and executing a concert program before the required Master's Recital, as well as provides a venue to present additional performance repertoire in a structured concert setting.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MSJ 714. Advanced Orchestration. 3 Credit Hours.
Techniques for scoring for the modern symphony orchestra.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 715. Jazz Composition Seminar I. 3 Credit Hours.
Creative work in Jazz Composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 716. Jazz Composition Seminar II. 3 Credit Hours.
Develop an understanding and control of compositional concepts and techniques required to work within a professional environment.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 717. Advanced Jazz Vocal Arranging. 2 Credit Hours.
This course is designed to help advanced instrumental arrangers explore vocal arranging.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 719. Large Jazz Ensemble Conducting and Repertoire. 2 Credit Hours.
This course will expose students to the methods, procedures, and practices involved in directing large jazz ensembles. Score study, conducting, and performance programming will be covered. Emphasis will be placed on the selection of level appropriate repertoire. Additional topics include working with guest artists, ensemble finances, and the audition process.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 720. Analysis of Jazz Styles. 3 Credit Hours.
A comparative study of Jazz styles from 1900 to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 724. Seminar in Jazz Pedagogy. 1 Credit Hour.
This course provides a laboratory for students to gain experience in the areas of jazz education discussed in MSJ 644 Jazz Pedagogy and Administration. These areas include jazz history, jazz improvisation, small ensemble coaching, and big band conducting. Students will lecture in the subjects of improvisation and history, and conduct ensembles in both a small combo and a big band setting. Communication skills, repertoire selection, rehearsal techniques, conducting skills, concert preparation, and performance will be assessed. All student teaching experiences will be video recorded and added to the students' Final Project portfolio.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MSJ 730. Applied Jazz Instruction Jazz I. 1-2 Credit Hours.
Advanced private study in the jazz idiom. Topics may include repertoire, improvisation, theory/harmony, and/or composition, at the discretion of the instructor. Student must have completed five semesters on the principal instrument. Permission of both course instructor and principal instrument teacher/advisor required.
Components: LSN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 731. Applied Jazz Instruction II. 1-2 Credit Hours.
Advanced private study in the jazz idiom. Topics may include repertoire, improvisation, theory/harmony, and/or composition, at the discretion of the instructor. Student must have completed five semesters on the principal instrument. Permission of both course instructor and principal instrument teacher/advisor required
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 734. E.C.M. Ensemble. 1 Credit Hour.
This ensemble performs music typical of the contemporary European jazz styles such as those characterized by the Edition of Contemporary Music (E.C.M.) Recording Company.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 736. Small Jazz Ensemble. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 737. Small Jazz Ensemble I. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 739. Small Jazz Vocal Ensemble. 1 Credit Hour.
Small groups of vocalists with a rhythm section, dedicated to a particular style and body of literature.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 742. Jazz Percussion Techniques. 1 Credit Hour.
This course is designed to increase the rhythmic awareness of students thorough mastering basic drumset and hand percussion skills and to demonstrate how these skills can be taught in a public school or college setting for non percussion majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 743. Small Jazz Ensemble III. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 744. Small Jazz Ensemble IV. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 745. Small Jazz Ensemble V. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 746. Small Jazz Ensemble VI. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 747. Small Jazz Ensemble VII. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques leading to an advanced performance level. This course will strengthen compositional and arranging skills as students must contribute original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 750. Studio Jazz Band. 1 Credit Hour.
This ensemble performs music in the recent big band tradition, from leaders such as Duke Ellington, Count Basie, Buddy Rich, Bob Brookmeyer, and Thad Jones. The group performs on campus with an emphasis on studio recording.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 751. Concert Jazz Band. 1 Credit Hour.
The Concert Jazz Band is the premiere big band at the Frost School of Music. Students are required to perform at an advanced level, and work with a variety of guest artists. Requirements include the ability to sight read difficult material, and to improvise in various styles. Audition is required.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 753. Jazz Band III. 1 Credit Hour.
Big Band designed for graduate students needing experience with classic Big Band repertory.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 755. Monk/Mingus Ensemble. 1 Credit Hour.
This ensemble is dedicated to the study and performance of the music of the influential jazz composers Charles Mingus and Thelonius Monk.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.
MSJ 756. Funk/Fusion Ensemble. 1 Credit Hour.
Small jazz ensemble focusing on contemporary electric jazz/rock/fusion/Latin styles. Emphasis is placed on original compositions by the members of the ensemble. The most common instrumentation is bass, drums, piano/synthesizer, guitar, and saxophone.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 757. Horace Silver Ensemble. 1 Credit Hour.
This ensemble is dedicated to the study and performance of the music of Horace Silver.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MSJ 758. Frost Sextet. 1 Credit Hour.
An advanced ensemble dedicated to the performance of original and standard repertoire in the jazz idiom
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 759. Rhythm and Blues Ensemble. 1 Credit Hour.
Mid-level ensemble for both instrumentalists and vocalists designed to familiarize students with classic Rhythm and Blues material from the 50s, 60s, and 70s, while preparing for a series of concerts throughout the semester. Students are guided through the process of putting a working band together and preparing it for performances and recordings, including what is expected of and from instruments, vocalists, producers, promoters, and other industry personnel.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 760. Avant Garde Ensemble. 1 Credit Hour.
This ensemble offers students the opportunity to develop the "free form" improvisation in either the bebop based style of Ornette Coleman or the fusion oriented style as typified by Bill Laswell.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 762. Jazz Saxophone Ensemble. 1 Credit Hour.
A reading ensemble comprised of four or five saxophones. Literature may include saxophone quartet and/or saxophone quintet with rhythm section. The ensemble focuses in on fundamental principles of sight-reading, blend, intonation, phrasing, articulation, rhythmic accuracy, as well as overall interpretation.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 764. Contemporary Rhythm Section Techniques I. 1 Credit Hour.
This is an ensemble for freshmen rhythm section players. The focus of this ensemble is to introduce students to various styles of rhythm section playing-- from swing and modern Jazz through Rock, Funk, R&B, and other commercial styles of music. Concepts of sound, groove, balance and blend, repertory, and accompaniment are also discussed.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 765. Contemporary Rhythm Section Techniques II. 1 Credit Hour.
Fundamentals of rhythm section playing for guitarists, pianists, bassists, and drummers. It covers a variety of contemporary styles within the rock, jazz, Lat in, and pop idioms. Students are grouped into ensembles which perform in class weekly.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 766. Small Jazz Ensemble Lab. 0 Credit Hours.
Performance Lab designed to work in conjunction with all of the 140 level ensembles. Provides environment in which students are required to perform on a regular rotating schedule throughout the semester. These performances are critiqued by the institution and other faculty, as well as students, in order to nurture a critical but positive atmosphere.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 767. Salsa Ensemble. 1 Credit Hour.
An ensemble of instrumentalists and singers performing a wide variety of Salsa and Latin jazz styles with emphasis on improvisation.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MSJ 769. Jazz Guitar Ensemble I. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 770. Jazz Guitar Ensemble II. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 771. Jazz Guitar Ensemble III. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 772. Jazz Guitar Ensemble (Workshop I). 1 Credit Hour.
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 773. Jazz Guitar Ensemble (Workshop II). 1 Credit Hour.
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSJ 775. Jazz Writing Ensemble. 1 Credit Hour.
This class is a seminar in jazz arranging and composition techniques for Studio/Jazz Writing master’s students and DMA students in Jazz Composition. The class consists primarily of topics related to jazz and studio arranging and composition, recording techniques, rehearsal techniques, music technologies, music business, and entrepreneurship. Topics are examined utilizing hands-on technology, score analysis, listening, guest lectures, and long range projects.
Components: ENS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSJ 780. Advanced Jazz Improvisation Theory. 3 Credit Hours.
Review of fundamentals and introduction of advanced topics in jazz harmony and scale resources for improvisation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 793. Special Projects in Studio Music and Jazz. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 794. Special Topics in Studio Music and Jazz. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MSJ 795. Jazz Vocal Ensemble I. 1 Credit Hour.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 796. Jazz Vocal Ensemble II. 1 Credit Hour.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 797. Jazz Vocal Ensemble III. 1 Credit Hour.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 805. Master's Jazz Pedagogy Project. 1 Credit Hour.
This project consists of a portfolio that students create during their four semesters in the program. Many employers require video of candidates in multiple teaching environments. Students will be videotaped during teaching demonstrations. All videos, plus several required documents the student will create, are archived in the portfolio, to be assessed in the fourth and final semester. The majority of these videos will be produced in MSJ 724 Jazz Pedagogy Seminar.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MSJ 811. Master's Recital Paper. 1-3 Credit Hours.
The student working on his/her recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSJ 812. Master's Recital. 1 Credit Hour.
A masters recital lasting at least 60 minutes that may include some chamber works but consists primarily of solo pieces. Students are required to write Program Notes.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MSJ 813. Master's Jazz Writing Project. 1-3 Credit Hours.
The student working on his/her master's jazz writing project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSJ 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSJ 831. Doctoral Essay. 1-12 Credit Hours.
Required of all candidates of the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MSJ 731 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSJ 832. Doctoral Recital. 1 Credit Hour.
A formal recital displaying improvisational, interactive, and compositional skills appropriate to the doctoral level.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
MSJ 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSJ JA7. Applied Jazz Arranging. 1-2 Credit Hours.
Applied Jazz Arranging level M is the first level of DMA private jazz arranging lessons. At this level the instructor evaluates the writer’s breadth of knowledge of arranging and orchestration techniques and expands on the key arrangers of various styles, genres and mediums.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

Jazz Bass at the Master’s level. The student will pursue a course of study that is directed toward their musical goals. This course will examine, through transcription and analysis, the important figures in the history of jazz bass, and also those performances in which the student is interested.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JB7. Jazz Bass. 1-2 Credit Hours.
Jazz Bass at the Doctoral level. The student will pursue a course of study that is directed towards their musical goals. This course will also examine, through transcription and analysis, the important figures in the history of jazz bass, and also those performances in which the student is interested.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBX. Secondary Jazz Bass - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JC6. Applied Jazz Composition. 1-2 Credit Hours.
Applied Jazz Composition level I is the first level of private jazz composition lessons in the Studio Jazz Writing Masters program. At this level the instructor evaluates the writer’s general knowledge of jazz composition with emphasis on harmonic vocabulary and form.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JC7. Applied Jazz Composition. 1-2 Credit Hours.
Applied Jazz Composition level M is the first level of DMA private jazz composition lessons. At this level the instructor evaluates the writer’s knowledge of early jazz composers (1920-1940) with emphasis on harmonic vocabulary and form.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JD6. Jazz Drumset. 1-2 Credit Hours.
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JD7. Jazz Drumset. 1-2 Credit Hours.
Private lessons which focus on the development of drumset skills. The course will cover sticking technique, hand/foot patterns, groove, balance, and rhythm section interaction. Students are required to perform and improvise at a professional level.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JDX. Secondary Jazz Drumset - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JG6. Jazz Guitar. 1-2 Credit Hours.
Graduate Studies in Jazz Guitar are designed to take into account each student’s talent, previous accomplishments and particular interests. After a careful assessment of the student’s strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JG7. Jazz Guitar. 1-2 Credit Hours.
Graduate Studies in Jazz Guitar are designed to take into account each student’s talent, previous accomplishments and particular interests. It is expected that a graduate student at the DMA level would be, to a large extent, self-directing and capable of original research. After a careful assessment of the student’s strengths and weaknesses, a course of study will be custom-designed, with possible areas of study drawn from (but not limited to) the following list: advanced jazz concepts in melody, harmony and rhythm, sight-reading, repertoire expansion, transposition, technique, composition, and pedagogy. Assistance with recital preparation will be given as appropriate and necessary. The prerequisite for the first level (JGM) is a Master’s Degree and the successful completion of the audition for the DMA program.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

Students are encouraged to seek refinement in the areas of harmony, chord voicings, improvisation vocabulary, rhythmic concepts, and technique. A nuanced approach to performing in a musical and expressive manner, with special regard to phrasing, dynamic contrast, articulation, and part balance will be stressed. Advanced techniques in reharmonization, rhythmic phrasing, and solo piano will be explored. Atypical song forms and contemporary repertoire will be introduced. Developing an individual approach to improvising and composing will be encouraged. Recital preparation will focus on programming and other important aspects of concert planning.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JP7. Jazz Piano. 1-2 Credit Hours.
Emphasis placed on developing an individual identity as an artist. Creation of a distinct concept for an ensemble and/or solo piano approach through original composition and/or arranging will be stressed. Career advancement as a performer and/or educator will be explored.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPX. Secondary Jazz Piano - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JS6. Jazz Saxophone. 1-2 Credit Hours.
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. Specific jazz improvisation topics may include advanced forms, non-traditional harmony, traditional harmony in twelve keys, advanced rhythmic meters and subdivisions, balancing melodic/harmonic/rhythmic elements, approaches to non-structured "free" forms, and expansion of the repertoire. Related areas may also be addressed within the private lesson format, such as composition, doubling, and keyboard skills.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JS7. Jazz Saxophone. 1-2 Credit Hours.
The graduate student will be encouraged to seek further refinement in all areas, including tone, intonation, technique, stylistic interpretation, improvisation, as well as be thoroughly versed in the pedagogy of the instrument. MSJ JSX. Secondary Jazz Saxophone - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. One-hour lessons are given for students enrolled for 2 credits; half-hour lessons are given for students enrolled for 1 credit.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TB6. Jazz Trombone. 1-2 Credit Hours.
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. Jazz styles are researched through listening to and transcription of established jazz instrumentalists. Advanced jazz theory and jazz piano are also included. The student is required to perform and improvise at a professional level.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TB7. Jazz Trombone. 1-2 Credit Hours.
Private lessons focus on various facets of jazz trombone performance. These include jazz and classical instrumental studies focusing on proper warm up and advanced articulation exercises. MSJ VBX. Secondary Jazz Vibraphone - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VO6. Jazz Voice. 1-2 Credit Hours.
Private studio vocal study at the master of music graduate level devoted to the continued development of skills and repertoire with particular attention to discovering and nurturing the individual student’s artistic direction.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VO7. Jazz Voice. 1-2 Credit Hours.
Private studio vocal coaching at the doctoral level devoted to refining all skills, technique, and repertoire for professional performance and pedagogy.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

D.M.A. in Jazz Composition

Overview
The mission of the three year Doctor of Musical Arts in Jazz Composition is to provide students with opportunities for advanced study in jazz and studio arranging, composition and orchestration. The overriding goal is to help students find their individual voice as composer/arrangers by the continued development of high-level skills that will enable him or her to pursue a career as a professional arranger/composer. Students encounter a creative, challenging and nurturing educational experience designed to meet their individual needs and desires with a respect to tradition and a reflection of current professional trends.

The DMA in Jazz Composition is a very flexible program with an abundance of curricular choices. Along with course work typical of DMA programs including music bibliography, psychology of music and pedagogy and administration, students are able to choose from a wide range of composition, arranging and orchestration courses in both the jazz and classical departments depending on needs and interests. In addition, DMA Jazz Composition students have access to the jazz departments 24 channel Pro Tools HD2 recording facility and 8 channel Pro Tools studio/mixing lab.

DMA jazz composition students projects are recorded by award winning ensembles including the Frost School of Music: Concert Jazz Band, HMI Studio Orchestra, Studio Jazz Band, Jazz Vocal 1 and Frost Symphony Orchestra.
Alumni from this program are working throughout the music industry as: film and game composers, feature film orchestrators, trailer and library music composers, concert music composers, music producers, music directors, studio session players and educators (public school, colleges and universities).

**Admission Requirements**

**On-Campus Programs**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

**Step 1 - Apply**

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information.

**Step 2 - Submit Supplemental Materials**

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official.
- Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services.
- An official transcript is required for every school attended, even if it was only a single class.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately.
- Resume - attached to the application at the time of submission. This does not need to be sent separately.

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information.
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information.
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

**Step 3 - Audition/Interview/Upload Portfolio**

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.
Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

**Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/wwi-applicants/)**
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- April 1 - All JD/MM and JD/MA applicants
- June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- February 1 - Priority portfolio deadline
- April 1 - Final application and portfolio deadline - all applications-supplemental materials/porfolios are due by this date

**International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)**
- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.*

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.*

**Mission**

The mission of the Doctor of Musical Arts program in Jazz Composition is to facilitate advanced composers/arrangers in developing their unique voice in jazz composition and to guide them in their continuing music career. With an emphasis on compositional originality, the Jazz Composition Program intends to provide students with opportunities for advanced study in jazz composition and orchestration to develop the jazz composition skills beyond that developed in their undergraduate and master’s programs.

**Goals**

The program objectives are to:

- Identify, recruit, and retain high quality students who are seeking to develop their jazz and studio writing skills beyond that developed in their undergraduate and master’s programs;
- Evaluate, revise, and develop curricular offerings to continue to meet the challenges facing professional musicians today;
- Maintain, present, and develop performance and outreach programs that will enable the jazz department to serve as a cultural resource in South Florida;
• Provide a creative, challenging, and nurturing educational experience that respects jazz tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.

Student Learning Outcomes

• Students will excel in a tool set of skills that include most of the following:
  • Compose and arrange for large jazz ensemble, orchestrate for Symphonic Orchestra,
  • Arrange for vocal choirs,
  • Arrange for solo vocalist with small or large jazz ensemble,
  • Compose in a variety of styles of music,
  • Record and mix with Pro Tools software,
  • Edit video with Final Cut Pro software,
  • Become fluent in either Sibelius or Finale notation software.
• Students will also solidify their unique voice as a jazz composer.

D.M.A. in Jazz Performance Instrumental/Vocal

Overview

At the University of Miami Frost School of Music, a Doctor of Musical Arts (D.M.A.) degree is offered in Jazz Performance (instrumental or vocal). This program requires a minimum of 60 credits beyond the master’s degree, including studies in performance, jazz composition and arranging, and general core courses in music history, music theory, and music education. The program culminates with a doctoral essay. For more information, please contact Graduate Admissions at the Frost School of Music.

The Frost School of Music and Jazz Instrumental Program offers students the chance to study with top professionals via an innovative, concentrated, and individualized curriculum. The program is designed to train the total musician, developing skills in performance, composition, arranging, studio recording/technology, and music business/entrepreneurship. Frost students are exposed to a wide range of improvisation-based music, from the traditional jazz canon through the most current trends, while having the opportunity to develop an individual voice and pursue a personal musical direction. The Frost School’s Studio Music and Jazz Instrumental Program offers students the chance to study with top professionals via an innovative, concentrated, and individualized curriculum. The program is designed to train the total musician, developing skills in performance, composition, arranging, studio recording/technology, and music business/entrepreneurship. Frost students are exposed to a wide range of improvisation-based music, from the traditional jazz canon through the most current trends, while having the opportunity to develop an individual voice and pursue a personal musical direction. The MSJ faculty includes numerous Grammy award winners and nominees, a MacArthur Genius Grant recipient, and veterans of the bands of Art Blakey, Horace Silver, Roy Haynes, Maria Schneider, Jack McDuff, Eddie Palmieri, Woody Herman, Buddy Rich and scores of other past and present jazz legends.

Our jazz graduates can be found in all corners of the music industry, performing with current jazz masters (Jeff “Tain” Watts, Esperanza Spaulding, Roy Haynes, David Liebman), TV orchestras (Jimmy Kimmel and Saturday Night Live bands), pop stars (Gloria Estefan, James Taylor, Rolling Stones, Paul Simon) and behind the scenes in recording studios, orchestra pits, and ensembles of all types and sizes throughout the world. Many are also accomplished composers, conductors, producers, and music business entrepreneurs. Frost jazz graduates populate all the world’s major music centers, and hold teaching positions at over one hundred universities and arts academies across the globe. Frost students routinely win awards from organizations such as Downbeat, ASCAP, Betty Carter Jazz Ahead, Thelonious Monk Institute, and numerous national instrumental competitions.

Frost jazz majors study one-on-one with a world-class private teacher each semester, along with courses in theory, keyboard, ear training, improvisation, arranging, composition, jazz history, music technology, and the business of music. At the core of the experiential curriculum is doing, and Frost students spend most of their time making music. The ensemble program includes both big bands and small groups, concentrating on a wide array of genres including classic bop, hard bop, post-bop, Latin, fusion, “ECM”, odd meter, Avant garde, and composer/theme ensembles dedicated to the music of the masters. Faculty artists Brian Lynch and Dafnis Prieto both mentor student-artist ensembles that feature both their own works and student compositions. Advanced students also can organize and direct their own ensembles for class credit.

Departmental student performances are scheduled twice a week, and numerous acclaimed international guest artists perform and lecture on campus each year. Recent artist residencies include Dave Holland, David Liebman, Chris Potter, Kenny Barron, Alan Ferber, Christian McBride, Jason Moran, Maria Schneider, and Joshua Redman. The Frost Henry Mancini Institute, under the artistic direction of James Newton Howard, affords students the opportunity to perform large-format works in conjunction with world renown guest performers, composers, and conductors.

Our jazz community is a recording culture! Jazz majors have access to four state-of-the-art recording facilities: the department’s own dedicated recording studio, the Weeks studio, the Gusman Hall Studio, and the film/media production lab. Find out more about Frost facilities, including the new Patricia L. Frost Faculty Studios (https://facilities.frost.miami.edu/), and visit our YouTube channel (https://www.youtube.com/user/UnivMiamiJazz/).

In addition to experiencing music on-campus, the greater Miami metropolitan area (population: five million) is rich with international, multiethnic opportunities for gigging, study, and fun. Students perform regularly in clubs, cafes, concert halls, and various other live venues. Frost students can also study abroad for a semester at four partner institutions located in Europe and Australia, and can participate in a five-year program combining the undergraduate performance degree with master’s in jazz pedagogy, effectively saving an entire year of graduate tuition.
We invite you to contact Frost music admissions and schedule a visit to view in person the unique advantages of studying Studio Music and Jazz at Frost.

**Admission Requirements**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

**Step 1 - Apply**

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

**Step 2 - Submit Supplemental Materials**

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

**Step 3 - Audition/Interview/Upload Portfolio**

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants

• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants.
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required

The Frost School of Music is requiring international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

Josef Silny & Associates (JS&A), Inc. International Education Consultants, is the preferred evaluation service for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information, including the Application for Evaluation of Foreign Educational Credentials.

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list.

Evaluation Fee

Applicants are responsible for the evaluation fee.

Submission of Evaluation

The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

• Please click here for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at
the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different
vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate
program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are
awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in
order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final
transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior
music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate
engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.*

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.*
Mission

The mission of the Doctor of Musical Arts Degree in Jazz Performance is to:

• Provide the terminal degree through advanced, in-depth study in the areas of musicianship and performance practice that will support a professional performance career as a jazz artist;
• Provide performance opportunities that integrate the skills learned in both performance and academic classes, foster creativity and research, demonstrate advanced musical techniques and a thorough understanding of historical style and performance practice;
• Continue to develop the skills for analyzing and articulating thoughts about music in a scholarly written format;
• Provide requisite skills to manage the non-performance aspects of a career.

Student Learning Outcomes

• Students will demonstrate proficiency in musical and academic presentation skills necessary to support a professional career as a leader in the music industry.
• Students will demonstrate understanding and application of jazz scholarship on an approved research project related to the major area of study.
• Students will develop individual instrumental performance skills necessary to be competitive in jazz and contemporary music professions. Students will be able to prepare difficult musical performances without assistance.

M.M. in Jazz Pedagogy

Overview

The mission of the Master of Music program in Jazz Pedagogy is to provide students with a platform to continue their growth as artists while simultaneously creating opportunities for vocational training in the field of jazz education. The overriding goal is to prepare students for careers as both artists and educators by giving them high-level training and experience in both fields.

Jazz Pedagogy is a unique two-year course of study that includes private instruction on the student's principal instrument and full participation in the jazz ensemble program at Frost. Students take a wide range of jazz courses that include advanced improvisation, advanced arranging, and composition. Additionally, pedagogical training and experience are garnered through a broad range of courses such as: The Teaching Artist, World of the Working Musician, seminars in jazz pedagogy, and a course in Jazz Cultures taught by renowned musicologist and jazz scholar Dr. David Ake.

The culminating project for this program is a digital portfolio created by the student. The focus of this portfolio is to highlight student skills and abilities in a multitude of areas, in order to enhance job opportunities and sustainable careers in a continually evolving music industry.

Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
Teaching/Conducting Sample
Writing Sample
Prescreening/Audition/Interview
Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).
Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio
Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:
December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:
December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:
a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here [https://www.wes.org/](https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials [https://www.wes.org/#get-started](https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list [http://naces.org/members.html](http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610

or electronically to:  
fsom.graddocs@miami.edu

- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information [https://admissions.frost.miami.edu/contact-us/](https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.*
Mission
The mission of the Master of Music degree in Jazz Pedagogy is to prepare students for careers in advanced level performance, private music teaching, or entry-level jazz teaching positions in community colleges and four-year institutions of higher learning. It will also provide a foundation for further advanced graduate work at the doctoral level. The underlying philosophy is that the best teachers are also skilled performers.

Goals
• Preparing students for careers as teachers in the field of higher education.
• Providing students with advanced jazz performance skills beyond those achieved in pursuit of their degree.
• Providing students with an understanding of jazz tradition, and current professional trends.

Student Learning Outcomes
• Students will develop proficiency in pedagogical strategies, theory, and historical trends necessary for career preparation in music instruction.
• Students will create and develop digital portfolios of their accomplishments in writing, research, teaching, and performing.
• Students will develop a high level of performance proficiency that will prepare them for sustainable careers as working professional musicians and artists.

M.M. in Jazz Performance, Instrumental
Overview
This program strives to identify, recruit, and retain high quality students who are seeking to develop jazz performance expertise beyond that developed in the bachelor’s degree. We maintain, present, and develop performance and outreach programs that enable the jazz department to serve as a cultural resource in South Florida. We strive to provide a creative, challenging, and nurturing environment that respects tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET
• Upload a prescreening (if applicable) through SlideRoom – check the Audition/Portfolio Requirements page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
• GRE Score - Please contact your program faculty for specific GRE information
• TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information
Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation
Josef Silny & Associates (JS&A), Inc. International Education Consultants, is the preferred evaluation service for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://grad.miami.edu/assets/pdf/JSA-document-

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**

Applicants are responsible for the evaluation fee.

**Submission of Evaluation**

The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610

or electronically to:  
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**

- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Mission**

The mission of the Master of Music Degree program in Studio Music and Jazz Performance is to prepare jazz musicians to enter the music profession and/or pursue doctoral studies. The Master of Music Program in Jazz Performance provides students with opportunities for advanced instrumental or vocal study, jazz improvisation and interaction development, and both small and large group ensemble experience. Our principle focus is on the development of high-level performance skills that will enable a student to pursue a career as a professional studio/jazz musician.

**Goals**

The specific objectives are:

- Provide students with advanced jazz performance expertise beyond that developed in the bachelor’s degree;
- To prepare students to meet the challenges facing professional musicians today;
- Provide students with an understanding of jazz tradition, current professional trends and an ability to innovate.

**Student Learning Outcomes**

- Students will demonstrate instrumental performance skills and academic understanding of the historical, theoretical, and performance practice necessary to be competitive in jazz and contemporary music professions.
- Students will develop proficiency in ensemble performance skills necessary for participation and functionality in the jazz and contemporary music professions.
- Students will develop proficiency in improvisation, composition, arranging, and interaction skills necessary for successful performance within the jazz idiom and a variety of styles appropriate to the jazz and contemporary music profession.

**M.M. in Jazz Performance, Vocal**

**Overview**

This program strives to identify, recruit, and retain high quality students who are seeking to develop jazz performance expertise beyond that developed in the bachelor’s degree. We maintain, present, and develop performance and outreach programs that enable the jazz department to serve as a cultural resource in South Florida. We strive to provide a creative, challenging, and nurturing environment that respects tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)

• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information.

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official.
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services.
  • An official transcript is required for every school attended, even if it was only a single class.
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.

• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately.

• Resume - attached to the application at the time of submission. This does not need to be sent separately.

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information.

• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information.

• Teaching/Conducting Sample

• Writing Sample

• Prescreening/Audition/Interview

• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom (https://fsomgrad.slideroom.com/#/Login). Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines ([https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/))

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants ([https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/))

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants ([https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**

The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here ([https://www.wes.org/](https://www.wes.org/)) for more information, including the Application for Evaluation of Foreign Educational Credentials ([https://www.wes.org/#get-started](https://www.wes.org/#get-started)).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list ([http://naces.org/members.html](http://naces.org/members.html)).

**Evaluation Fee**

Applicants are responsible for the evaluation fee.

**Submission of Evaluation**

The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**

• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

**Mission**

The mission of the Master of Music Degree in Jazz Performance is to prepare jazz musicians to enter the music profession and/or pursue doctoral studies. The Master of Music Program in Jazz Performance provides students with opportunities for advanced vocal study, jazz improvisation and interaction development, and both small and large group ensemble experience. Our principle focus is on the development of high-level performance skills that will enable a student to pursue a career as a professional studio/jazz musician.

**Goals**

The specific objectives are:

- Provide students with advanced jazz performance expertise beyond that developed in the bachelor’s degree;
- To prepare students to meet the challenges facing professional musicians today;
- Provide students with an understanding of jazz tradition, current professional trends and an ability to innovate.

**Student Learning Outcomes**

- Jazz Vocal students will demonstrate a level of creativity with imagination and original ideas providing a new musical experience that reaches beyond the expectations of the musical task.
- Jazz Vocal students will demonstrate a mastery of fluidity, fluency and facility in their vocal technique by the time they graduate.
- Jazz Vocal students will demonstrate a mastery of expression in their interpretation of jazz literature. Interpretation will be appropriate, relevant, and complimentary beyond the expectations of the musical task.

**M.M. in Studio Jazz Writing**

**Overview**

The Master of Music program in Studio/Jazz Writing provides students with opportunities for advanced study in jazz and studio arranging, composition and orchestration. The overriding goal is to help students develop a high-level skill set that will enable him or her to pursue a career as a professional arranger/composer, orchestrator, film and media composer and educator. Students encounter a creative, challenging and nurturing educational experience that respects tradition, reflects current professional trends, fosters innovation and stimulates growth among students and faculty alike.

Studio/Jazz Writing is a unique and intense two-year course of study that includes writing for large and small jazz ensembles, symphonic orchestra, large and small jazz vocal ensembles and writing for film and media. In addition, studio/jazz writing majors learn “hands on” how to run a recording studio. Students gain experience recording, mixing and mastering their own writing projects. All SJW (Studio/Jazz Writing) majors receive training in Pro Tools Digital recording and have access to the jazz departments 24 channel Pro Tools HD2 Recording Studio and a Pro Tools 8 channel studio/mixing lab. Additional course work also includes Virtual Orchestration: creating mock-ups of orchestral scores with our extensive sample library. SJW students writing projects are recorded by award winning ensembles including the Frost School of Music: Concert Jazz Band, HMI Studio Orchestra, Studio Jazz Band, Jazz Vocal 1 and Frost Symphony Orchestra.

Alumni from this program are working throughout the music industry as: film and game composers, feature film orchestrators, trailer and library music composers, concert music composers, music producers, music directors, studio session players and educators (public school, colleges and universities).

**Admission Requirements**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.
Step 1 - Apply

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
- Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
- An official transcript is required for every school attended, even if it was only a single class
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date
International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.

- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

**Mission**

The mission of the Master of Music program in Studio Jazz Writing is to prepare composers/arrangers to enter the music profession and to provide students with opportunities for advanced study in jazz and studio arranging, composition and orchestration with an emphasis on the development of high-level skills that will enable him or her to pursue a career as a professional arranger/composer. We aim to develop student jazz writing skills beyond those developed during the Bachelor's degree.

The program objectives are:

- Identify, recruit, and retain high quality students who are seeking to develop their jazz and studio writing skills beyond that developed in their undergraduate programs;
- Evaluate, revise, and develop curricular offerings to continue to meet the challenges facing professional musicians today;
- Maintain, present, and develop performance and outreach programs that will enable the jazz department to serve as a cultural resource in South Florida;
- Provide a creative, challenging, and nurturing educational experience that respects jazz tradition, reflects current professional trends, fosters innovation, and stimulates growth among students and faculty alike.

**Goals**

- Provide students with opportunities for advanced study in jazz and studio arranging.
- Provide students with opportunities for advanced study in orchestration.
- Provide students with opportunities for advanced study in composition.

**Student Learning Outcomes**

- Students will be able to write an arrangement for large jazz ensemble (Big Band).
- Students will demonstrate an appropriate level of skill in adapting (orchestrating) music for a symphony orchestra with attention to idiomatic writing for the four choirs of the orchestral strings, winds, brass and percussion.
- Students will demonstrate musical composition/arranging, audio production, and academic skills necessary for successful participation in professional musical environments.

**Vocal Performance**

https://vocal.frost.miami.edu/index.html

Graduate students seeking a degree in the department of Vocal Performance have already proven themselves to be highly accomplished artists. They come to the Frost School of Music to further hone their skills, to discover new perspectives, and to gain a competitive edge for the next step in their professional careers. Candidates for our advanced degrees in performance, conducting, and pedagogy (https://vocal.frost.miami.edu/) are leaders in the various programs of the Department of Vocal Performance, and they, in turn, go on to become leaders in their respective areas of specialty. For more information please visit the website for the department of Vocal Performance (https://vocal.frost.miami.edu/).

**Masters Programs in Vocal Performance**

- M.M. in Choral Conducting (p. 2903)
- M.M. in Vocal Performance (p. 2907)
Doctoral Programs in Vocal Performance

• D.M.A. in Choral Conducting (p. 2889)
• D.M.A. in Vocal Pedagogy and Performance (p. 2894)
• D.M.A. in Vocal Performance (p. 2898)

Artist Diploma in Vocal Performance

• A.D. in Vocal performance (p. 2888)

MVP 608. Choral Score Study. 2 Credit Hours.
In depth study of selected choral or choral/orchestral works related to literature being performed by university ensembles during the academic year.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 638. Vocal Pedagogy. 2-3 Credit Hours.
Course covers methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production with practical application, observing and teaching individual and class voice in a supervised environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 652. Vocal Prfrm Prep. 1 Credit Hour.
Musical preparation of a wide range of assigned vocal literature from all periods for performance in forums, juries, and recitals. Special emphasis is on musical values, styles, translations of texts, diction, pronunciation of Italian, German, French, and English, and memorization.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 680. Opera Production. 1 Credit Hour.
Opera production for main stage production, scenes, and other productions. Open only to students that are cast in productions, as determined by audition and faculty decision. Typically taken by vocal performance majors.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 688. Voice Performance in Salzburg, Austria. 0 Credit Hours.
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive vocal training from University of Miami faculty as well as distinguished guest artists. A class in vocal repertoire is also included.
Requisite: Must be in Salzburg Program.
Components: LEC.
Grading: AUD.
Typically Offered: Summer.

MVP 693. Special Projects in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 694. Special Topics in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 710. Vocal Literature for Teaching: English. 3 Credit Hours.
Study of the historical body of English language vocal repertoire as it relates to voice classification, age, and technical development of a singer.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MVP 711. Vocal Literature for Teaching: Italian. 3 Credit Hours.
The student working on his/her recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 712. Vocal Literature for Teaching: German. 3 Credit Hours.
Study of the historical body of German vocal repertoire as it relates to voice classification, age, and technical development of a singer.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 713. Vocal Literature for Teaching: French. 3 Credit Hours.
Study of the historical body of French vocal repertoire as it relates to voice classification, age, and technical development of a singer.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 714. Vocal Literature for Teaching: Musical Theater. 3 Credit Hours.
The student enrolls for recital credit during the semester in which he/she presents the Artist Diploma Recital.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 730. Studio Teaching Techniques. 1 Credit Hour.
Application of the principles studied in MVP 638. Candidates will be assigned students for applied voice study, under supervision of the instructor.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 732. Teaching the Singer Actor. 2 Credit Hours.
Exploring teaching techniques for developing the skills of the singer.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MVP 736. Voice Disorders. 3 Credit Hours.
Assessment and treatment of the human voice. Course promotes an understanding of the terminology, clinical assessment, and therapy protocols used in treating the dysfunctional or damaged voice.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 738. Advanced Vocal Pedagogy. 3 Credit Hours.
Course addresses advanced methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production; historical perspectives; and comparative pedagogical publications. Includes practical application, observation and teaching individual and class voice in a supervised environment.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 739. Vocal Pedagogy Internship. 1 Credit Hour.
Observation in the field of choice, including, but not limited to studio work, medical setting or speech pathology setting.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.
MVP 747. Men's Chorale. 1 Credit Hour.
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 748. Bella Voce. 1 Credit Hour.
This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 750. Lyric Diction for Singers - English and Italian. 1 Credit Hour.
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in English. International Phonetic Alphabet is presented as a learning tool.
Requisite: Frost School of Music only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

MVP 752. Lyric Diction for Singing - German and French. 1 Credit Hour.
Class designed for voice majors and principals, with a focus on the development of pronunciation skills for teaching and singing in German. International Phonetic Alphabet is used as a learning tool.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MVP 772. Choral Conducting: Major Work Emphasis. 1 Credit Hour.
Course focus is placed on major choral-orchestral works with particular emphasis on two or three major works. In addition, conductors preparation for choral-orchestral works, including instrument transportation, score preparation, musical line, historical context, and score marking, are included.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 773. Choral Conducting Workshop: Smaller Choral Works. 1 Credit Hour.
Study of smaller choral works by Poulenc, Hindemith, Ravel, Debussy, Brahms, Mendelssohn, Schubert, Schumann, etc., with emphasis on style, interpretation, and gesture.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 780. Symphonic Choir. 1 Credit Hour.
Study and performance of choral literature appropriate for large choir, including choral orchestral masterworks.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 784. Chamber Singers. 1 Credit Hour.
An ensemble of eighteen to twenty undergraduate and graduate students. The ensemble performs challenging chamber choir repertoire from the Renaissance through the Twentieth Century.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 785. Frost Chorale. 1 Credit Hour.
This ensemble performs significant choral literature with an emphasis on music of the Twentieth-Century and on choral/orchestral works including opera. Open to all qualified graduate students, regardless of major.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MVP 788. Stagecraft & Acting for Opera. 1 Credit Hour.
This course is designed to provide advanced work developing stagecraft and acting skills unique to operatic performing. Physical release and expression, coordination, mental agility, individual artistry, creativity and emotional availability are all critical to the successful singing actor in opera, and the work of this course is to build a solid foundation in these areas.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 793. Special Projects in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 794. Special Topics in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 805. Masters Project. 1 Credit Hour.
Masters Project for the Masters Degree in Vocal Performance. Students will develop a portfolio for professional use.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MVP 811. Master's Recital Paper. 1-3 Credit Hours.
The student working on his/her recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MVP 812. Master's Recital. 1 Credit Hour.
The student enrolls for recital credit during the semester in which he/she presents the master’s recital.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MVP 813. Masters Second Recital. 1 Credit Hour.
Optional second recital in the Masters Degree in Vocal Performance. Taken with advisor approval.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MVP 814. Artist Diploma Recital. 1 Credit Hour.
The student enrolls for recital credit during the semester in which he/she presents the Artist Diploma Recital.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MVP 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master’s degree after the student has completed the required hours of thesis or project credit.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MVP 831. Doctoral Essay. 1-12 Credit Hours.
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MVP 731 may be taken in a regular semester, nor more than six in a summer session.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MVP 832. Doctoral Recital. 1-2 Credit Hours.
Required of all candidates for the D.M.A.
Requisite: Frost School of Music only.
Components: PRA.
Grading: SUS.
Typically Offered: Fall & Spring.

MVP 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.
Requisite: Frost School of Music only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP CD6. Conducting. 1-2 Credit Hours.
Applied lesson in conducting for masters students majoring in choral conducting.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP CD7. Conducting. 1-2 Credit Hours.
Applied lesson in conducting for doctoral students majoring in choral conducting.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP CDX. Secondary Choral Conducting - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Requisite: Frost School of Music only.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VO5. Voice. 1-4 Credit Hours.
Private studio lessons for providing progress towards establishing an efficient and balanced concept of posture, breath management, phonation, resonance with clarity of articulation in required languages, the ability to sustain a professional sound and perform with established skills for vocal, physical and emotional communication in voice juries and performances of concert and opera, and the skills for a professional career as a classical singer.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VO6. Voice. 1-2 Credit Hours.
Private lessons for providing progress towards establishing an efficient and balanced concept of posture, breath management, phonation, resonance with clarity of articulation in required languages, the ability to sustain a professional sound in the upper register and perform with established skills for vocal, physical and emotional communication in voice juries and performances of concert and opera, and the potential for a professional career as a classical singer.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MVP VO7. Voice. 1-2 Credit Hours.
Private lessons for providing progress towards establishing an efficient and balanced concept of posture, breath management, phonation, resonance with clarity of articulation and workable knowledge of required languages, the ability to sustain a professional sound in the upper register and perform with advanced skills for vocal, physical and emotional communication in voice juries and performances of concert and opera, and the potential for a professional career as a classical singer and/or teacher of music.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOX. Secondary Voice - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

A.D. in Vocal Performance

Overview
Graduate students seeking a degree in the department of Vocal Performance have already proven themselves to be highly accomplished artists. They come to the Frost School of Music to further hone their skills, to discover new perspectives, and to gain a competitive edge for the next step in their professional careers. Candidates for our advanced degrees in performance, conducting, and pedagogy (https://vocal.frost.miami.edu/) are leaders in the various programs of the Department of Vocal Performance, and they, in turn, go on to become leaders in their respective areas of specialty. For more information please visit the website for the department of Vocal Performance (https://vocal.frost.miami.edu/).

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

On-Campus Auditions

- The audition should consist of at least four selections, and at least one must be an aria
- The repertoire must represent four historical periods (Baroque, Classical, Romantic and Contemporary) and four languages (English, Italian, French, and German)
- The applicant will first perform a selection of his or her choice. The faculty will then request to hear other selections as time permits.

Audition Guidelines

- An accompanist will be provided for on-campus auditions. A $20 accompanist fee will be collected prior to the audition.
- All Doctoral of Musical Arts applicants must audition on-campus
- Recorded auditions uploaded to SlideRoom (https://fsomgrad.slideroom.com/#/Login/#/Login) are acceptable for admission to the Masters Degree and Artist Diploma programs, but an on-campus audition is strongly encouraged
- All applicants who wish to be considered for assistantships or scholarships must audition on-campus
- Once your audition is scheduled, please send your audition repertoire information to Professor Alan Johnson at ajohnson1@miami.edu
- At the audition, the applicant should present:
  - List of repertoire prepared for the audition (five copies)
  - Current resume, including educational and performance experience
  - A representative list of previously studied repertoire
  - Photo (optional)

Auditions for Graduate Teaching Assistantships

All students applying for Assistantships must perform an on-campus audition and must have a completed application on file by December 1.

Applicants wishing to be considered for a Voice Teaching Assistantship must have completed a vocal pedagogy course and have prior teaching experience.

Mission

The mission of the Artist Diploma in Vocal Performance is to train and equip singers to pursue a career singing on the national and international operatic, recital and concert stages.

Student Learning Outcomes

- Student will perform two solo recitals, demonstrating skill in vocal technique.
- Student will research and write program notes to accompany solo vocal recital.
- Student will sing two solo recitals that include repertoire in at least 4 languages and represent at least 4 historical, musical periods.

D.M.A. in Choral Conducting

Overview

Candidates for the Doctor of Musical Arts in Choral Conducting at the University of Miami Frost School of Music must possess and demonstrate a gift of musical leadership based upon broad experience with choral ensembles and a strong foundation of skills from previous training. Admission requirements include baccalaureate and masters degrees in music and practical experience in choral conducting through church, school, or community ensembles. Enrollment in this major is only by special permission after completion of the application and audition process.

The mission of the Doctor of Musical Arts in Choral Conducting at the Frost School of Music is to:

1. Provide a music performance-based education and to train conductors to further develop knowledge and skills on and off the podium
2. Promote a platform of learning that includes excellence in performance, creativity, artistry, and scholarship
3. Foster a sense of community involvement in the arts and the greater musical world

This degree combines scholarship with practical concerns in a way that prepares graduates for a diverse life in choral music, whether they choose to focus on an academic career, professional career, or a combination of the two. Emphasis on excellence in conducting and teaching, negotiating the job markets, becoming an outstanding clinician and adjudicator, and administrative opportunities has allowed this program to consistently place graduates in outstanding positions throughout the country.
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

**Mission Statement**

The mission of the Doctor of Musical Arts in Choral Conducting is:

- To provide a specifically music performance-based education and to train conductors to firmly establish and demonstrate professional level conducting skills;
- To provide a platform of learning that includes performance, creativity, scholarship, and significant research;
- To foster a sense of community involvement of the arts and in the arts.

Because choral conducting students are working with an "instrument" comprised of human singers, the variables with which they must work (as opposed to a solo instrument) are various.

**Goals**

After graduation, they are prepared to work in any number of venues, including academia, sacred music setting (church music), professional choir, community choir, and more.

**Student Learning Outcomes**

- Students will, through the completion of 3 degree recitals, demonstrate the ability perform as conductors with musical/stylistic awareness, as well as professional presentation and demeanor.
- Students will demonstrate a high level research and scholarship skills.

**D.M.A. in Vocal Pedagogy and Performance**

**Overview**

The Doctor of Musical Arts in Vocal Pedagogy and Performance prepares the experienced singer who has a solid record of performance in operatic, concert, and recitals for a successful career as a teacher of voice. It is the perfect degree for a voice teacher who wants to strengthen teaching, performance, and research skills. By combining the traditional pedagogical traditions with the latest research and innovation, our graduates are excellently prepared to win employment and further their careers as teachers and performers. The Frost School of Music Department of Vocal Performance is uniquely positioned to prepare doctoral students for the world of vocal pedagogy, vocal performance, and scholarly research. We are part of a large school of music that is innovative and embracing of both traditional and contemporary vocal arts. The department faculty has expertise with traditional operatic performance (Metropolitan Opera, Covent Garden, Chicago Lyric, San Francisco, Berlin, Zurich, La Scala, etc.), avant-garde performance (BAM, NYC Symphony Space, etc.) and early music. The faculty is recognized as world-class pedagogues and has a history of successful teaching, resulting in students that enjoy careers in the world of vocal performance. In addition, opportunities to work with the faculty in other Frost School departments and programs, such as jazz, musical theater, and contemporary/pop, afford students a wide variety of pedagogical experiences that uniquely prepare them for employment. The degree is tailored for each student to build on strengths while addressing areas that need improvement. Students participate in doctoral course work that prepares them to move into a career as a performer-teacher in the field of vocal pedagogy and performance. Courses prepare the student as teacher, stage director, and administrator of faculties in schools, colleges, and universities. The course work helps students build practical and extensive knowledge of repertoire for teaching, including English, French, German, Italian and Musical Theater. Additionally, the curriculum affords performance opportunities in opera and recital, arranges internships with master teachers in voice studios and speech pathologists and otolaryngologists' practices. Furthermore, the option of incorporating a cognate allows students acquire expertise in a related area, thus preparing them to successfully move forward in their careers.

**Admission Requirements**

**On-Campus Programs**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.
Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date
International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.

• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.

• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript

• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant

• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

**Mission**

The mission of the Doctor of Musical Arts in Vocal Pedagogy and Performance is to train the future vocal pedagogues and performers to prepare them for their future as a teacher of singing and performance.

**Student Learning Outcomes**

- Students will demonstrate vocal skills to a professional level and technical skills.
- Students will demonstrate teaching methods with advanced skills in technique, such as breath technique, language, tension release and repertoire selection.
- Students will demonstrate writing, research, and presentation skills required of the DMA Vocal Pedagogy and Performance terminal degree.

**D.M.A. in Vocal Performance**

**Overview**

Graduate students seeking a degree in the department of Vocal Performance have already proven themselves to be highly accomplished artists. They come to the Frost School of Music to further hone their skills, to discover new perspectives, and to gain a competitive edge for the next step in their
professional careers. Candidates for our advanced degrees in performance, conducting, and pedagogy (https://vocal.frost.miami.edu/) are leaders in the various programs of the Department of Vocal Performance, and they, in turn, go on to become leaders in their respective areas of specialty. For more information please visit the website for the department of Vocal Performance (https://vocal.frost.miami.edu/).

Students in the Doctor of Musical Arts in Vocal Performance are accomplished, experienced performers who seek to deepen and expand their musical understanding and abilities, whether their goals are to perform in concert halls or opera houses, or to work as a voice teachers or stage directors. Vocal performance students at all levels work tirelessly to develop and maintain an efficient vocal technique and compelling artistry through study with a voice faculty whose members are established master teachers and performers. Private voice lessons, vocal coaching, lyric diction, and language study are vital components of the degree programs, as are music theory, music history and literature, opera literature, art song repertoire, and vocal pedagogy. Students gain essential stage skills and experience through participation in Frost Opera Theater, which compliments and builds on their work in the voice studio. Many voice students work professionally as members of Seraphic Fire, Florida Grand Opera chorus, and as singers with various performing organizations throughout South Florida. Master classes with some of the world’s foremost artists are regularly scheduled. Renee Fleming, Helen Donath, Marilyn Horne, Florence Quivar, and Measha Brueggergosman are among the artists who have recently shared their insights and experiences with our students. Our goal is to prepare you for the next step in your career as a professional singer and/or teacher. Our graduates are singing all over the world—in opera, oratorio, professional choral organizations, musical theater and recital stages—and they teaching in colleges and universities across the country. We look forward to welcoming you as a student to the Department of Vocal Performance at the University of Miami Frost School of Music!

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.
For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/). Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).

• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required

The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).
Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

Credit Hours  10
Total Credit Hours  60

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

Mission
The mission of the Doctor of Musical Arts in Vocal Performance is to provide the terminal degree with advanced, in-depth study in the areas of musicianship and performance practice that will support a professional performance career as a classical singer. The student will be provided performance opportunities to integrate the skills learned in music and other classes and will continue to work in established and new areas of research and creative activities. Each student will continue to develop the skills for writing about music in a scholarly, written format.

Student Learning Outcomes
- Students will demonstrate skills as a vocal performer with advanced technical and musical skill that will support a professional career.
- Student will demonstrate performance skills in ensemble that will lead towards a professional stage career.
- Students will demonstrate writing, research, and presentation skills required of a DMA terminal degree.

M.M. in Choral Conducting

Overview
Candidates for the Master of Music in Choral Conducting at the University of Miami Frost School of Music must possess and demonstrate a gift of musical leadership based upon experience with choral ensembles and a solid foundation of training. Admission requirements include a baccalaureate degree in music, and practical experience in choral conducting through church, school, or community ensembles is preferred. Enrollment in this major is only by special permission via application and audition.

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.
Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).
Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio
Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.
Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. * This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.
Mission
The mission of the Master of Music degree in Choral Conducting is:

• To provide a specifically music performance-based education and to train conductors to firmly establish and demonstrate professional level conducting skills;
• To provide a platform of learning that includes performance, creativity, scholarship, and significant research;
• To foster a sense of community involvement of the arts and in the arts.

Because choral conducting students are working with an “instrument” comprised of human singers, the variables with which they must work (as opposed to a solo instrument) are various.

Goals
After graduation, they are prepared to work in any number of venues, including academia, sacred music setting (church music), professional choir, community choir, and more.

Student Learning Outcomes

M.M. in Vocal Performance

Overview
Graduate students seeking a degree in the department of Vocal Performance have already proven themselves to be highly accomplished artists. They come to the Frost School of Music to further hone their skills, to discover new perspectives, and to gain a competitive edge for the next step in their professional careers. Candidates for our advanced degrees in performance, conducting, and pedagogy (https://vocal.frost.miami.edu/) are leaders in the various programs of the Department of Vocal Performance, and they, in turn, go on to become leaders in their respective areas of specialty. For more information please visit the website for the department of Vocal Performance (https://vocal.frost.miami.edu/).

Students in the Master of Music in Vocal Performance degree program are serious musicians, and they come to the Frost School of Music to take an important step toward attaining their goals as a vocalist, whether to perform in concert halls or opera houses, or to work as a voice teacher. Vocal performance students at all levels work tirelessly to develop and maintain an efficient vocal technique and compelling artistry through study with a voice faculty whose members are established master teachers and performers. Private voice lessons, vocal coaching, lyric diction, and language study are vital components of the degree programs, as are music theory, music history and literature, opera literature, art song repertoire, and vocal pedagogy. Students gain essential stage skills and experience through participation in Frost Opera Theater, which compliments and builds on their work in the voice studio. While in Miami, many Frost voice students work professionally as members of Seraphic Fire, Florida Grand Opera chorus, and as singers with various performing organizations throughout South Florida. Master classes with some of the world’s foremost artists are regularly scheduled. Renee Fleming, Helen Donath, Marilyn Horne, Florence Quivar, and Measha Brueggergosman are among the artists who have recently shared their insights and experiences with our students. Our goal is to prepare you for the next step in your career as a professional singer and/or teacher. Our graduates are singing all over the world—in opera, oratorio, professional choral organizations, musical theater and recital stages—and they teaching in colleges and universities across the country. We look forward to welcoming you as a student to the Department of Vocal Performance at the University of Miami Frost School of Music!

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official. Applicants with international transcripts, please click here for specific instructions about approved evaluation services. An official transcript is required for every school attended, even if it was only a single class. Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.

Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately. Resume - attached to the application at the time of submission. This does not need to be sent separately.

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty for specific GRE information.
- TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information.
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements. Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.

Music, Media, & Industry Application Deadlines
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants

TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants. Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.
Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Mission Statement**

The mission of the Master of Music Degree in Vocal Performance is to:

- Provide students the highest quality of education available in the areas of vocal performance and musicianship that will provide them the skills required to lead to professional performance careers as classical singers;
- Stimulate the student’s awareness and artistic creativity in the filed of vocal performance;
- Provide students public performance opportunities in a supportive and encouraging environment;
- Provide students the writing and research skills needed in order to adequately prepare them for study at the doctoral level;
- Provide career development opportunities through direct connections with professionals in the field, including directors, conductors, coaches, and other relevant individuals as chosen by the voice faculty.

**Student Learning Outcomes**

- Students will demonstrate their vocal skills in their singing to a professional level.
- Students will demonstrate the necessary writing skills to adequately prepare them for study at the doctoral level.
- Students will demonstrate advanced recital stage skills.

**Nursing and Health Studies**

http://www.miami.edu/sonhs

The University of Miami (UM) School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

**Mission**

The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

**Nursing Accreditation**

The MSN and DNP programs in the SONHS are accredited by the following:

Commission of Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
(202) 887-6791

The Nurse Anesthesia program is accredited by the following:

Council on Accreditation of Nurse Anesthesia Education Programs (COA)
222 South Prospect Avenue
Park Ridge, IL 60068-4001
Graduate Degrees and Academic Programs

The SONHS offers a variety of academic programs across six graduate degrees:

1. Doctor of Philosophy (PhD) in Nursing Science
   a. BSN-to-PhD
   b. MSN-to-PhD

2. Doctor of Nursing Practice (DNP)
   a. BSN-to-DNP, Nurse Anesthesia Track
   b. MSN-to-DNP (1 Year, 1 Year Plus, and 2 Year)

3. Master of Science in Nursing (MSN)
   a. Adult-Gerontology Acute Care Nurse Practitioner (Full-time and Part-time)
   b. Adult-Gerontology Primary Care Nurse Practitioner (Full-time and Part-time)
   c. Family Nursing Practitioner (Full-time and Part-time)

4. Master of Science (MS)
   a. Health Informatics (online)

5. Post-Graduate Certificate
   a. Adult-Gerontology Acute Care Nurse Practitioner
   b. Adult-Gerontology Primary Care Nurse Practitioner
   c. Family Nursing Practitioner
   d. Psychiatric Mental Health Nurse Practitioner

6. Post-Bachelor's Certificate
   a. Health Informatics (online)

Admission

Admission to graduate programs in the SONHS is subject to the rules, regulations, and procedures as set forth in the Academic Bulletin, the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/), and the SONHS website (http://www.miami.edu/sonhs/index.php/sonhs/admissions/), and as determined by each graduate nursing program, the Graduate School, and the Office of International Admission. Applicants must meet specific admission requirements (http://www.miami.edu/sonhs/index.php/sonhs/admissions/) before they may be evaluated for admission to the SONHS' graduate programs. Applications for the SONHS' graduate programs, except for the online Informatics programs, are submitted through NursingCAS (http://www.nursingcas.org/). Applications for the online Informatics programs are submitted through UOnline (http://www.miami.edu/online/admissions/).

Degree Requirements

The degree requirements for each SONHS graduate program are outlined under the "MASTERS" and "DOCTORAL" tabs above. All graduate programs are lock-step, meaning students must follow the Plan of Study under which they were admitted as listed in the Academic Bulletin and the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/), and they must successfully complete the courses in each semester to progress to the next. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss any questions related to their degree requirements.

Doctor of Philosophy (PhD) in Nursing Science

The principal goal of the PhD with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

Doctor of Nursing Practice (DNP)

The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. The program is offered in two formats: the MSN-to-DNP and the BSN-to-DNP, Nurse Anesthesia track. The BSN-to-DNP, Nurse Anesthesia program is available as an entry into practice degree, meaning it is available to post-baccalaureate nurses with or without a master's degree in nursing.

The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that address health care disparities
- Evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities
- Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities
• Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities
• Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems
• Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities

Master of Science in Nursing (MSN)
The MSN degree is designed for professional nurses holding a Bachelor of Science in Nursing (BSN) degree. Registered nurses with baccalaureate degrees in other fields are also eligible to apply for admission. The following specialty tracks available in the SONHS focus on selected areas of advanced practice nursing and nursing education:
  • Adult-Gerontology Acute Care Nurse Practitioner
  • Adult-Gerontology Primary Care Nurse Practitioner
  • Family Nurse Practitioner

Degree requirements may be completed in three semesters of full-time study or five semester of part-time study.

Master of Science (MS)
The MS in Health Informatics online program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic healthcare record systems.

Post-Graduate Certificate
Post-Graduate Certificate options are available in each of the following areas to students who possess a MSN degree and who wish to focus on selected areas of advanced practice nursing and nursing education:
  • Adult-Gerontology Acute Care Nurse Practitioner
  • Adult-Gerontology Primary Care Nurse Practitioner
  • Family Nurse Practitioner
  • Psychiatric Mental Health Nurse Practitioner

All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Post-Bachelor’s Certificate
The Post-Bachelor’s Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within healthcare. UOnline’s flexible Informatics programs give students the option to complete their MS in Health Informatics while earning a Post-Bachelor’s Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor’s Certificate itself. The 15 credit Post-Bachelor’s Certificate is made up of the first 5 classes of the MS program. Credits completed for the Post-Bachelor’s Certificate can be applied toward the MS degree.

Academic Policies
Student Responsibilities
Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/), as well as all written changes to the plan of study.

Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) or by an official in the SONHS.

Academic Bulletin and Student Handbook
In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin. The Student Handbook contains the most current information. Consult the appropriate Associate Dean or Program Director or reach out to a staff member in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss questions related to academic requirements and opportunities.
Technical Standards
Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant's ability to complete all components of the program.

Observation
The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

Communication
Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor
Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative
These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social
Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Clinical Clearance
Before students can enter the SONHS' graduate nursing programs, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student’s background report contains any infractions, regardless of how they were resolved or adjudicated, he/she will not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs). Additional certifications may be required for specific graduate programs.
Refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) or speak with a representative in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) for more information.

**Grades**

Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS’ policies related to grades, progression, and dismissal.

Graduate nursing students must earn a B or higher in each course to progress. Any graduate student who receives a “C” or lower in a nursing course will be dismissed from his or her program. A grade of "B-" or "C+" for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time. The student will be dismissed if he/she fails a second course even if he/she retook and passed the previous failed course. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a “lab section” by UM). Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

A grade of B or higher is considered a passing grade for the MS Health Informatics program, which includes all courses completed as part of the Post-Bachelor’s Certificate Health Informatics program (if applicable).

When a course must be repeated, progression in the graduate program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the graduate program.

**Grade Point Averages (GPAs)**

Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

**Requirements to Continue**

Students who are enrolled in SONHS’ graduate programs must maintain a 3.0 GPA to progress.

**Requirements to Graduate**

Students who are enrolled in SONHS’ graduate programs must maintain a 3.0 GPA to graduate.

**Prerequisites and Corequisites**

Students must successfully complete all specified prerequisites with a B or higher. Students must also register for all required corequisites at the time of enrollment. If students enroll in a course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Program Director, Associate Dean, or Dean. Students should contact their appropriate Associate Dean or Program Director, or a staff member in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss any questions related to course enrollment.

**Transfer Credit**

SONHS graduate students may, depending on their program, transfer up to 9 credits toward their graduate degree at the discretion of their Associate Dean. Detailed course descriptions or syllabi are required for transfer equivalency reviews.

**Pre-immersion Course**

Prior to enrollment in any SONHS graduate program, except for the Informatics programs, students must complete a mandatory online pre-immersion, orientation, and/or writing express course. These courses are listed in students’ first term of enrollment but it does not affect students’ GPAs. Failure to complete these courses may delay entry into the clinical nursing courses. Information about the these courses will be provided to eligible students by the SONHS.

**Research Experience**

Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research/) during their time at the UM. Students should speak with their appropriate Associate Dean or Program Director to learn more about the research opportunities available to them at the UM.

**Accommodations Policy for Students with Disabilities**

The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (http://umarc.miami.edu/arc/ODS.html), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS’ policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.
Financial Assistance

Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (http://www.miami.edu/admission/index.php/ofas/).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (http://www.sonhs.miami.edu/admissions-and-financial-aid/financial-aid-and-community-scholarships/).

Full-time PhD students are considered for financial support, which may include:

1. **Tuition Scholarships:** These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.

2. **Graduate Stipends:** These cash awards, paid monthly, are intended as part of an educational assistance program for PhD degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

Students may speak with a representative in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) if they have any questions.

Facilities

The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators and approximately 1,100 undergraduate and graduate students enrolled in the SONHS’ health science, nursing, and public health programs.

In Fall 2017, the SONHS opened the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital/). The Simulation Hospital is a one-of-a-kind facility, as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility uses the latest simulation technology to provide SONHS students with the highest-quality healthcare education through a variety of simulated clinical environments. It also provides opportunities for public health-related simulation experiences and creates ample opportunities for inter-professional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (http://library.miami.edu/) on the Coral Gables Campus and the Louis Calder Memorial Library (http://calder.med.miami.edu/) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children's Hospital, and approximately 170 other community partners.

Master of Science in Nursing (MSN) Programs

• MSN-to-PhD (p. 2956)

Doctor of Nursing Practice (DNP) Programs

• BSN-to-DNP, Nurse Anesthesia Track (p. 2928)
• MSN-to-DNP (p. 2951)

NUR 601. Advanced Pharmacology. 3 Credit Hours.
Advanced practice nursing application of pharmacological and pharmacokinetics for the purpose of selecting appropriate drug therapies for diverse populations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 602. Doctoral Level Orientation/Nur. 0 Credit Hours.
This course provides entering doctoral students with an evaluation of their writing ability and a review of formal writing skills. Other topics pertinent to success for nursing coursework at the doctoral level are addressed.
Components: LEC.
Grading: NON.
Typically Offered: Fall & Spring.

NUR 603. Healthcare Databases: Design, Development and Clinical Application. 3 Credit Hours.
This course focuses database systems, development, design, and implementation within the context of health care. Special emphasis is placed on the role of database applications for continuous quality improvement and regulatory compliance. Students will design a relational database applicable to informatics leadership responsibilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 604. System Life Cycle/Project Management. 3 Credit Hours.
This course covers the identification and development of information technology plans for projects supporting the health care organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. This course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on an IT enterprise project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 605. Health Information Exchange. 3 Credit Hours.
This course is designed to introduce the informatics professional to the basic principles of Health Information Exchange. The focus will be on interoperability between ambulatory clinics, acute care facilities and long-term care; electronic health records; electronic prescribing systems and consumer health care informatics. Special emphasis is placed on the role of HIE in the American Recovery and Reinvestment Act.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 606. Advanced Practice Preparation. 0 Credit Hours.
This preparatory experience provides students an opportunity to review concepts of pharmacology; physiology; and health assessment prior to beginning the Master of Science in Nursing program. Activities related to academic strategies and writing are also included, to assist in improving study and writing skills.
Components: LEC.
Grading: NON.
Typically Offered: Fall & Spring.

NUR 607. Leadership and Professional Development Strategies for Nursing Informatics. 3 Credit Hours.
In this course students will be exposed to the principles of organizational culture, dynamics, mission, vision, values, and goals as it impacts nursing. Additionally they will learn current theories of change management and resource management for nursing informatics practice. They will explore change agent roles in project management and processes.
Co-requisite: NUR 604.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
NUR 608. Concepts in Advanced Practice Nursing. 3 Credit Hours.
Major concepts necessary for advanced practice nursing. Included are: major scientific theories, health and health promotion, health policy, ethical issues, epidemiology, technology in health care, and advanced practice role competencies. Specific emphasis is placed on understanding culture and cultural diversity in health care.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 609. Professionalism in Advanced Practice Nursing. 2 Credit Hours.
Focuses on the synthesis of concepts and principles necessary to develop leaders in advanced practice nursing specialties. Emphasis is placed on the role of the advanced practice nurse for optimal delivery of health care to clients across the life span.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 610. Adult Gerontology Acute Care I. 4 Credit Hours.
Analysis of selected theories and conceptual models of nursing and their implementation in practice and research. Approaches to development of a scientific body of knowledge for nursing practice is included. (2) Prerequisite: Graduate status.
Prerequisite: NUR 601 and 612 and 613.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 611. Foundations of Anesthesia Science and Technology for Nurse Anesthetists. 5 Credit Hours.
Introduction to the application of basic sciences to nurse anesthesia. This course includes the application of principles of physics, molecular biology, biochemistry and medicinal chemistry.
Prerequisite: Anesthesia Track and NUR 601 and 612 and 613.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 612. Physiology/Pathophysiology for Advanced Practice Nursing. 3 Credit Hours.
Analysis of physiologic and pathophysiologic mechanisms of health and illness.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 613. Advanced Health Assessment and Diagnostic Reasoning. 3 Credit Hours.
Emphasis on culturally sensitive comprehensive health assessment and diagnostic reasoning related to advanced nursing practice. Special emphasis is placed on advanced health assessment, including age appropriate health screenings; prenatal, pediatric, and geriatric assessment; and interpretation of basic laboratory tests and diagnostic studies utilized in advanced nursing practice. Specialty specific seminars address issues for individual tracks within advanced practice nursing.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 614. Basic Concepts in Anesthesia Nursing. 5 Credit Hours.
This course is an overview of fundamental knowledge and skills for entry into advanced practice anesthesia nursing. Concepts include essential techniques, monitoring and equipment, and pharmacologic interventions for common problems and conditions requiring routine surgical procedures in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
Prerequisite: NUR 601 and NUR 611 and NUR 612 and NUR 613 and Co-requisite: NUR 617.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 615. Professional Aspects of Anesthesia Nursing. 2 Credit Hours.
This course focuses on the development and current trends in nurse anesthesia practice, education, and research. Concepts include the historical, legal, legislative, and professional role issues associated with advanced practice anesthesia nursing. Professional responsibilities, ethical issues, diversity, cultural competency, quality assurance, continuing education, and professional involvement are emphasized.
Prerequisite: NUR 646 and Co-requisite: NUR 650.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
NUR 616. Pharmacology for Acute Care Nursing. 3 Credit Hours.
Focuses on foundational pharmacologic principles and associated application to clinical practice in acute care nursing. Integration of pharmacological concepts and interventions in safe, culturally competent, and interdisciplinary acute care advanced nursing practice are emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 617. Pharmacology for Anesthesia Nursing. 3 Credit Hours.
Focuses on pharmacological principles and associated application to clinical practice in nurse anesthesia. Integration of pharmacological concepts and interventions in safe, culturally competent, and interdisciplinary anesthesia practice are emphasized.
Prerequisite: NUR 601 and NUR 611 and NUR 612 and NUR 613 and Corequisite: NUR 614.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 619. Advanced Concepts of Anesthesia Nursing I. 7 Credit Hours.
This course will provide an in-depth knowledge and skills of anesthesia nursing care for a variety of common problems and conditions across anesthesia specializations. Concepts include assessment, techniques, planning and pharmacologic interventions for specialty surgical procedures in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
Prerequisites: NUR 601 and NUR 611 and NUR 612 and NUR 613 and NUR 614 and NUR 617.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 620. Advanced Concepts of Anesthesia Nursing II. 11 Credit Hours.
This course will provide in-depth knowledge and skills of highly specialized problems and conditions requiring anesthesia or surgical interventions. Concepts include assessment, techniques, planning and pharmacologic interventions for regional anesthesia, pain management, care of obstetrical patients and patients with catastrophic conditions in a highly structured and guided clinical learning environment. Cultural competence and interdisciplinary anesthesia care across the lifespan is emphasized.
Prerequisites: NUR 601 and NUR 611 and NUR 612 and NUR 613 and NUR 614 and NUR 617 and NUR 619.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 621. Diagnostics and Nursing Interventions for Acute Care Nursing. 3 Credit Hours.
Selected diagnostic tests and intervention techniques essential to acute care nursing. Critical thinking and decision making related to interdisciplinary assessment of acute care patients. Cultural issues related to diagnostics and intervention.
Prerequisite: NUR 601 and 612 and 613.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 622. Acute Care Nursing of Adults I. 4 Credit Hours.
The first of two sequential clinical practicums designed for the development of scientific knowledge and advanced practice skills in the area of acute care nursing. Involves synthesis of concepts, knowledge and skills gained in previous courses applied to the care of the acutely ill patient. Focuses on the advanced practice of acute care nursing via the nurse practitioner/clinical nurse specialist.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 623. Maternal Child Health in Primary Care Practice. 5 Credit Hours.
Theoretical and clinical bases for advanced practice nursing management of infants and children. Emphasis is placed on strategies for health maintenance and prevention of health problems and management of alterations.
Prerequisite: NUR 628.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
NUR 624. Introduction to Pedagogy. 3 Credit Hours.
This course provides students a foundation in Pedagogy using examples from nursing education. Students will learn about educational theory, the cultural context of education, and the role of teaching in the academy. Educational strategies to be discussed include didactic, online, clinical, laboratory, and simulation. Best practices in assessment and evaluation will be emphasized.
Requisite: Must Be A Nursing PhD Student Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 625. Adult Gerontology Acute Care II. 7 Credit Hours.
Theoretical and clinical focus for the nurse practitioner as an advanced practice nurse in the health care management of adult populations in rehabilitative settings and residential facilities including assisted living, long term, and home care. (2:6) Prerequisite or corequisite: NUR 601.
Prerequisite: NUR 613 and 617.
Prerequisite: NUR 601 and 610 and 612 and 613.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 626. Advanced Concepts in Gynecological Health Care for Women. 2 Credit Hours.
Theoretical and clinical bases for the provision of complex gynecological care of women. Emphasis is on strategies for promotion of transcultural health care needs and management of alterations according to the advanced practice roles.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 627. Primary Prenatal Healthcare of Women. 1-2 Credit Hours.
Theoretical and clinical bases for providing primary prenatal care of women. Emphasis is on management strategies for promotion of transcultural health care needs according to the advanced practice role.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 628. Adult Gerontology I. 5 Credit Hours.
Theoretical and clinical bases for health care management of health alterations in the adult population. Emphasis on strategies for health maintenance and prevention of health problems, management of alterations, discharge planning and rehabilitation of individuals and aggregate population.
Corequisite: NUR 601. And NUR 612. And NUR 613.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 630. Research Methods and Evidence-Based Practice. 3 Credit Hours.
Research process, research methods, and the analysis of data using quantitative and qualitative approaches. Focuses on understanding levels of evidence for implementing evidence-based practice and performance improvement in nursing practice and health care. Investigates research methods associated with health disparities, access to health care, and clinical outcomes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

NUR 631. Adult Gerontology II. 4-7 Credit Hours.
Theoretical and clinical bases for health management of health alterations in the adult population. Emphasis on strategies for health maintenance and prevention of health problems, management of alterations, discharge planning and rehabilitation of individuals and aggregate population.
Prerequisites: NUR 601 and NUR 612 and NUR 613 and NUR 628.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 634. Perinatal Health Care. 0-6 Credit Hours.
Continuation of the application of physiologic, psychosocial, and cultural concepts to perinatal health care management. Emphasis is placed on nurse-midwifery management of intrapartum, postpartum, and neonatal clients.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
NUR 635. Innovation in Nursing Informatics. 3 Credit Hours.
This course explores contemporary concepts in nursing informatics. The course examines the historical context of nursing informatics, followed by an exploration of emerging technologies including tele-health, wireless medical devices, consumer health informatics, interactive education, and social media. This course prepares students to critically evaluate and incorporate evolving technology. Special emphasis is placed on the social, ethical, regulatory, and legal issues associated with health care innovations.
Corequisite: NUR 633.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

NUR 636. Nursing Informatics Internship. 3 Credit Hours.
This course is designed to prepare students to function as Nursing Informatics Specialists. Emphasis is on the synthesis of health care informatics theory and mastery of technical applications and each of their respective roles in nursing informatics practice. Students design a scholarly project at the level of a clinical analyst under the direction of a faculty member and preceptor.
Co-requisite: NUR 635.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

NUR 637. Capstone Practicum in Nursing Leadership in Informatics. 3 Credit Hours.
In the capstone course students will assimilate and apply the knowledge and skills they have acquired from their course work in the program. Students will complete a non-thesis capstone project that requires them to critically analyze and solve a problem they might realistically encounter in health informatics using their skills in data acquisition, project management, data presentation, and risk management. Students will also develop and submit an electronic portfolio that contains key examples of work the work they generated during their time in the program along with a self-reflection of that work.
Prerequisites: NUR 604 and NUR 607 and NUR 608 and NUR 630 and NUR 633 and NUR 636 and NUR 658 and BTE 450 and BTE 685 and Co-requisites: NUR 603 and NUR 605.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

NUR 638. Adult Gerontology Acute Care III. 6 Credit Hours.
Theoretical, clinical, and research basis of advanced practice nursing in the care and management of adults in primary care setting. (2:15) Prerequisite: NUR 628.
Prerequisite: NUR 625.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

NUR 639. Acute Care Nursing of Adults II. 0-7 Credit Hours.
The second of two clinical practicums designed to guide the development of scientific knowledge and advanced practice skills in the area of acute care nursing. Designed to assist the student to assume the role of the Acute Care Nurse Practitioner/Clinical Nurse Specialist.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

NUR 640. Teaching and Learning Theory in Clinical Nursing Education. 3 Credit Hours.
This course covers principles and practices of teaching and learning integral to clinical nursing education and identifies the role of the faculty in teaching students with diverse learning styles and needs within a variety of clinical settings.
**Components:** DIL.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

NUR 641. Methods for Clinical Nursing Education. 3 Credit Hours.
The focus of this course is the organization and management of instruction for clinical nursing education. Emphasis is placed on effective strategies for the development of learning opportunities in diverse clinical settings.
**Components:** DIL.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

NUR 642. Evaluation in Clinical Nursing Education. 3 Credit Hours.
The course explores principles and practices of evaluation integral to clinical nursing education.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.
NUR 643. Practicum in Nursing Education. 5 Credit Hours.
The focus of this course is laboratory and clinical application of principles of teaching and learning.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 644. Leadership and Professional Development Strategies for Nursing. 4 Credit Hours.
In this course, students will be exposed to the principles of organizational culture, dynamics, mission, vision, values, and goals as it impacts nursing. Additionally they will learn current theories of change management and resource management for nursing practice. They will explore change agent roles in project management and processes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 645. Interdisciplinary Anesthesia Nursing I. 9 Credit Hours.
Initial integration and synthesis course of advanced knowledge and skills for interdisciplinary anesthesia nursing care. Selected topics and clinical case studies include collaborative-decision-making, effective communication, planning and evaluation for patients with complex problems and conditions across the lifespan. With continual guidance, students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.
Prerequisites: NUR 601, NUR 611, NUR 612, NUR 613, NUR 614, NUR 617, NUR 619, NUR 620.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 646. Interdisciplinary Anesthesia Nursing II. 11 Credit Hours.
Second integration and synthesis course of advanced knowledge and skills for interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. With moderate guidance students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.
Prerequisite: NUR 601 and NUR 611 and NUR 612 and NUR 613 and NUR 614 and NUR 617 and NUR 619 and NUR 620 and NUR 645.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 647. Advanced Practice Nursing Integration. 6 Credit Hours.
Integration of the components of the Advanced Practice Nursing role to analyze advanced practice issues.
Prerequisite: NUR 623 and 631.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 648. Internship. 0-7 Credit Hours.
Integration and role synthesis of Advanced knowledge and skills in nurse midwifery care for women and infants within diverse cultural clinical settings. Selected topics include practice management and clinical case studies to include diagnosis, collaborative practice, planning and evaluations of care for normal and complex conditions for the female adolescent, reproductive age woman and infant, the mature women and their families.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 650. Interdisciplinary Anesthesia Nursing III. 11 Credit Hours.
This course is the third and final integration and synthesis course of advanced knowledge and skills of interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. With minimal guidance students assume greater responsibility for culturally competent and interdisciplinary anesthesia care.
Prerequisite: NUR 646.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 651. Qualitative Data Analysis. 3 Credit Hours.
The course is designed to help the student develop skills and understanding relating to the advanced analysis of qualitative data. The course assumes all students will either be in or nearing the analysis stages in their research. Focus is on preparation and management of text and media data for analyses; the creation and application of various types of coding to data; the distinctions in coding data evolving from different qualitative approaches; and analysis of longitudinal qualitative data. Permission required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
NUR 652. Introduction to Clinical Inquiry I. 3 Credit Hours.
Combines clinical knowledge and hands-on clinical experience in an area of the student's potential research interest. Students will practice under the supervision of an advanced practice nurse in the specialty area. Students are expected to begin the process of identifying clinical research problems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 653. Introduction to Clinical Inquiry II. 5 Credit Hours.
Combines clinical knowledge and hands-on clinical experience in an area of the student’s potential research interest. Students will practice under the supervision of an advanced practice nurse in a specialty area. There will be a focus on health care delivery systems. Students are expected to translate clinical problems into researchable questions.
Prerequisite: NUR 674 Or NUR 669.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 654. The Evolution of Nursing Practice and Application of Theory in Nursing Practice. 3 Credit Hours.
This course is an overview of the conceptual foundations of nursing science and nursing practice. Knowledge from basic and applied sciences and ethics as well as the history of the global evolution of nursing practice are examined.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

NUR 655. Health Care Management, Economics, Financing, and Ethics. 3 Credit Hours.
This course is an overview of health care management, financing, ethics and core and advanced concepts of health care economics. This course will also examine issues associated with health care management, economics, and ethics.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 656. Global Health. 3 Credit Hours.
This course covers diverse topics that affect the health of the population and advanced practice nursing internationally.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 657. Population Based Health and Health Care Disparities. 3 Credit Hours.
This course is an overview of knowledge from nursing, public health and other disciplines for population based assessment. Population based models and frameworks from nursing, public health, and other disciplines will be explored. The importance of cultural and ethical dimensions in program development is highlighted.
Prerequisites: NUR 654 and NUR 656 and NUR 663 and NUR 664.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 658. Health Policy Development and Implementation. 3 Credit Hours.
An exploration of health care organizations and healthcare policy, and how change is effected in both. Health care policy and planning to address health care disparities at the local, state, and federal levels will be explored. Organizational diagnosis, organizational change, and ethical dimension of public policy formulations and implementation will be highlighted.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 659. Technology in Health Care. 3 Credit Hours.
An exploration of the various aspects of the evolving technology to improve and transform health care and advanced practice nursing. This course prepares DNP nursing students to design, select and use technology to support, manage, and improve patient care and health care systems.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
NUR 660. Translational Science. 3 Credit Hours.
Emphasis is on translational science which includes organizational readiness and promoting change in a health care environment. Focus is on utilizing systematic analysis to identify, plan, execute and appraise best evidence on selected topics.
Prerequisites: NUR 654 and NUR 663 and NUR 664.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 662. Nursing Epistemology. 3 Credit Hours.
Focus on historical and philosophical perspectives in the development of knowledge and patterns of knowing with in-depth examination of the evolution of nursing science. Analysis of concepts relevant to nursing phenomena. Approaches to scientific development in nursing with emphasis on theory building and theory generation.
Requisite: Must Be A Nursing PhD Student Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 663. Research. 3 Credit Hours.
This course is an analysis of evidence-based nursing practice. During the course, students acquire the knowledge base to resolve clinical practice problems and direct evidence-based practice.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

NUR 664. Applied Biostatistics for Nursing Practice. 3 Credit Hours.
This course is an overview of basic statistical concepts and computer applications related to healthcare, nursing, and biomedical research. An examination of both parametric and non-parametric statistics in program evaluation, testing and process outcomes, and/or basic research studies is included.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 665. Quantitative Research Methods. 3 Credit Hours.
In-depth exploration of research methods and design for quantitative research in nursing. Emphasis on development of a research problem; quantitative research design from descriptive to randomized clinical trials; epidemiologic designs; threats to validity; sampling and power analysis; measurement including psychometric theory, data collection and management; and interpretation of data. Other topics include ethics, human subjects' protection, and translation of findings into practice.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 667. Research Practicum. 1 Credit Hour.
Student participates in an ongoing research project under the guidance of a faculty member. Conducts the practical aspects of research including: IRB application/continuing reports, data collection and management.
Prerequisite: NUR 665 and NUR 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 669. Symptom Science in Nursing. 3 Credit Hours.
This course will provide the student with knowledge of symptom science in nursing, including biological, behavioral, environmental, socio-cultural, and clinical factors that may influence the trajectory of chronic illness. The course will also focus on theories and research designs to define and measure symptom experiences in health and illness for individuals and families.
Prerequisite: NUR 662 and NUR 665 and NUR 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
NUR 670. Qualitative Methods in Research. 3 Credit Hours.
Exploration of inductive approaches to research and the use of qualitative methods including grounded theory, ethnography, focus group, and phenomenology. The techniques include unstructured and structured interviews. Discussion of techniques, analysis, and the ethical and political implications of special problems in qualitative research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 672. DNP Scholarly Project Seminar I. 3 Credit Hours.
Emphasis is on translational science which includes organizational readiness and promoting change in a health care environment. Focus is on utilizing systematic analysis to identify, plan, execute and appraise best evidence on selected topics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

NUR 673. DNP Scholarly Project Seminar II. 3 Credit Hours.
This second capstone course is the implementation and evaluation of the project developed in Capstone I.
Prerequisite: NUR 672.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 674. Applied Statistics: Generalized Linear and General Estimating Equations. 4 Credit Hours.
Overview of GLM, GZLM, and GEE, which combine many aspects of ANOVA/ANCOVA and multiple regression models for continuous and categorical independent and dependent variables, moderation/mediation, multiple independent variables, and repeated measures of dependent variables. Computer applications using real data and standard statistical software packages will be utilized.
Prerequisite: NUR 665 and NUR 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 676. Practice Immersion Experience I. 2-12 Credit Hours.
This course contains individually precepted learning experiences across the spectrum of advanced practice nursing in a variety of settings. Students develop expertise within the scope of their nursing practice.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 677. Practice Immersion Experience II. 2-12 Credit Hours.
This course contains individually precepted learning experiences across the spectrum of advanced practice nursing in a variety of settings. Students develop expertise within the scope of their nursing practice.
Requisite: Enrollment in the DNP Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 678. Applied Statistics: Structural Equation Modeling and Hierarchical Linear Modeling. 3 Credit Hours.
Overview of structural equation modeling (SEM) and hierarchical linear modeling (HLM) for continuous, categorical, longitudinal, and nested data. Computer applications using real data and statistical software packages (Exel, SPSS, Mplus).
Prerequisite: NUR 674.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 680. Research Ethics. 1 Credit Hour.
This is a hybrid course that addresses the ethical and responsible conduct of research, protection of human subjects, and nursing science career development.
Requisite: Must Be A Nursing PhD Student Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 681. Measurement of Nursing Phenomenon. 3 Credit Hours.
Development of instruments to measure a phenomenon of concern within the domain of nursing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 682. Advanced Practice Psychopharmacology. 2 Credit Hours.
Review of common psychoactive medications, classes, uses, effects, side effects, and prescriptive implications.
Components: DIL.
Grading: GRD.
Typically Offered: Spring.
NUR 683. Theoretical Bases for Advanced Practice Psychiatric Mental Health Nursing. 2 Credit Hours.
Review of theories and practice of individual, group and, family therapy; role of advanced practice mental health nursing, ethics, research, legislative practice.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 684. Advanced Practice Psychiatric Mental Health Nursing Therapeutic Interventions. 5 Credit Hours.
Assessment and treatment of persons with major psychiatric disorders.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 685. Advanced Practice Psychiatric Mental Health Nursing Preceptorship. 4 Credit Hours.
Clinical preceptorship with experience in individual, and group, therapy. Includes experiences in prescribing psychoactive medications.
Prerequisites: NUR 682 and NUR 683 and NUR 684.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 686. Advanced Practice Psychiatric Mental Health Nursing Preceptorship II. 5 Credit Hours.
Clinical preceptorship with experience in individual, and family therapy. Includes experiences in prescribing psychoactive medications.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

NUR 688. Health Systems Development and Leadership Practice Immersion II. 2 Credit Hours.
This course contains individually precepted learning experiences across the spectrum of nursing in a variety of settings. Students develop expertise within the scope of their nursing practice.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 689. New Method of Implementation-Practice Immersion Experience III. 2 Credit Hours.
This course contains individually precepted learning experiences across the spectrum of nursing in a variety of settings. Students develop expertise within the scope of their nursing practice.
Prerequisites: NUR 676, NUR 688.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 690. Independent Study. 1-6 Credit Hours.
A in depth study of a specified area in advanced nursing of special interest to the student, under faculty guidance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 694. Clinical Praticum for DNP Nurse Anesthesia Clinical. 7 Credit Hours.
This course is the clinical integration and synthesis of advanced knowledge and skills of interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. Students assume responsibility for culturally competent and interdisciplinary anesthesia care with minimal assistance.
Prerequisite NUR 650.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 695. Clinical Praticum for DNP Nurse Anesthesia. 9 Credit Hours.
This course is the clinical integration and synthesis of advanced knowledge and skills of interdisciplinary anesthesia nursing care for complex problems and conditions across the lifespan. Students assume responsibility for culturally competent and interdisciplinary anesthesia care with minimal assistance.
Prerequisite: NUR 694.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.
NUR 696. Crafting the Dissertation Proposal Part I. 2 Credit Hours.
The course is designed to help students focus and refine their ideas for their dissertation proposals. Focus is on developing and refining the ideas for the dissertation, and writing the introductory/review of the literature/methods chapters. The student will also begin preparation for a grant submission. During the semester, the course coordinators will assist the student in choosing a dissertation chair who will also provide input into the proposal.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 697. Selected Topics. 0-12 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing topics will be shown in class schedule in parentheses after selected topic notation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 698. Selected Topics. 0-6 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing topics will be shown in class schedule in parentheses after selected topic notation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 699. Special Topics in Nursing Research. 1-3 Credit Hours.
Directed or independent research in collaboration with a faculty member providing opportunity for participation in ongoing nursing research. Specific requirements and credit allocation determined by contractual arrangement between student and faculty member.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 700. Post Master Clinical. 0-12 Credit Hours.
Post Master Clinical
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 701. Clinical Continuation. 0-6 Credit Hours.
Clinical Continuation
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 702. Adult Gerontology III. 7 Credit Hours.
Integration of the components of the Advanced Practice Nursing role to analyze adult gerontology advanced practice issues.
Prerequisite: NUR 631.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 707. Becoming a Successful Nurse Scientist. 2 Credit Hours.
This course builds skills for academic and career success, provides a forum for discussing current issues in nursing that have implications for research, and professional development.
Prerequisite: NUR 681 and NUR 679.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 708. Scholarship in Nursing. 1 Credit Hour.
In this course, students will individually with a faculty member to develop the study's scholarship. Faculty and students will identify student strengths and weaknesses and create a specific plan for improvement. The goal of this course is to produce a student first author manuscript for submission to a peer-reviewed scientific journal, and an abstract for submission to a scientific conference.
Prerequisite: NUR 674 and NUR 680 and NUR 669.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
NUR 709. Selected Topics in Nursing Research. 3 Credit Hours.
This course involves a critical analysis of emerging issues in nursing research, including priority research areas of the National Institute of Nursing Research (NINR) and the focal research areas of the School of Nursing and Health Studies.
Prerequisite: NUR 679 and NUR 708.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 796. Crafting the Dissertation Part 2. 2 Credit Hours.
The course is designed to help students: learn how to pursue funding for their dissertation research; and write the third (methods) chapter of their dissertation proposal. In addition to attending class, students are expected to meet regularly with their advisor (future Dissertation Chair) to obtain his/her input on assignments.
Prerequisite: NUR 696. And NUR 671.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: DIS.
Grading: SUS.
Typically Offered: Fall & Spring.

NUR 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12 credits. Not more than 12 hours of NUR 730 may be taken in a regular semester, nor more than six in a summer session. A student who has passed (a) qualifying examinations, and (b) is engaged in an assistantship, may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

NUR 850. Research in Residence. 1-3 Credit Hours.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

BSN to DNP
BSN-to-DNP Degree Requirements
The BSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

To receive the BSN-to-DNP, students must:
1. Complete all course work as required with an overall GPA of 3.0 or better
2. Complete all required clinical and practice immersion hours
3. Successfully complete the DNP scholarly project before graduation
4. Successfully complete annual benchmark exams, before progressing into next phase of the program
5. Successfully pass the DNP comprehensive examination, which is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program
6. Pass a comprehensive clinical nurse anesthesia oral board examination

Four tracks are offered within the BSN to DNP program:
1. Nurse Anesthesia
2. Acute Care
3. Family Nurse Practitioner
4. Adult Geriatric Primary Care

**Admission Requirements**

1. Bachelor’s and Master’s degrees, preferably in nursing, from regionally-accredited institutions
2. Minimum cumulative GPA of 3.0 for the Bachelor’s and Master’s degrees
3. Introductory statistics course
4. Two letters of recommendation, preferably from individuals with doctorates in nursing
   a. At least one reference from an academic source.
5. Statement of professional goals
6. Current CV/resume
7. Current, unrestricted RN license to practice nursing in the State of Florida or the state/territory of current practice
8. Current Basic Life Support (BLS) for Health Care Providers certification
   a. Only BLS certifications from the American Heart Association are accepted.
9. National certification in a nursing specialty
10. Documentation of clinical hours in Master’s course of study (download form)
   a. Applicants must have a minimum of 440 precepted clinical hours or supervised residency hours at the Master’s level.
   b. If an applicant does not have the minimum 440 hours, a portfolio (download portfolio template) and a Verification of Clinical Hours Equivalency form (download form) may be submitted for evaluation of clinical hours equivalency.

*Note: This course is completed online via Blackboard prior to matriculation. Students are registered for the course in their first semester.

**Note: This course is 28 Lab Hours.

Mission

The purpose of the DNP program is to prepare scholars and researchers to contribute to the growth of nursing practice and health care delivery through recognized methods of scholarly inquiry and dissemination of practice innovations. Additionally, graduates of this program will be prepared to collaborate with PhD colleagues to provide innovative leadership to the profession and make the practice of nursing more effective.

Student Learning Outcomes

- Students will integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice which assist with the resolution of health care disparities.
- Students will be able to evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities.
- Students will be able to make meaningful contributions in the area of developing quality, cost effective health care collaborations addressing health care disparities.

MS - Health Informatics (online)

This program is no longer accepting students pending approval by the Southern Association of Colleges and Schools Commission on Colleges.

Degree Requirements

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM’s online Health Informatics program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Health Informatics program prepares graduates to enter or excel in this field by offering rigorous courses, which cover:

- Information security
- Data analytics
- Project management
- Public health informatics
- Health information exchange
- Database design

The program includes a 3 credit capstone practicum, which allows students to apply the informatics knowledge they have gained to real-world situations and problems.

The Health Informatics program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next.

Questions related to degree requirements should be directed to the UOnline Academic Advisors (https://miami.laureatepartners.net/student-experience/student-support/).

Admission

For information on admission to the program please click here (https://miami.laureatepartners.net/programs/masters-in-health-informatics/).

Plan of Study

The Health Informatics program is a lock-step program. Students must complete the coursework in the order specified in the Plan of Study below, and they must successfully complete each course to progress to the next. Students are admitted to begin the program in the fall, spring, or summer. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-services/).

Mission

The mission of the MS Health Informatics program is to prepare highly competent health informatics professionals who can advance the frontiers of healthcare through their leadership and innovation.

Goals

Student Learning Outcomes

- Demonstrate advanced knowledge of computer information systems (Meditech, Epic, Cerner, etc), health care databases, systems administration and project management.
- Apply various strategies for maintaining information security and regulating data access.
- Students will be able to organize, retrieve, manage and develop health information data and knowledge.
**MSN - Adult-Gerontology Acute Care Nurse Practitioner**

**Degree Requirements**

The Adult-Gerontology Acute Care Nurse Practitioner program may be completed by finishing one of the following tracks:

- Full-time (3 Semesters)
- Part-time (5 Semesters)

The Adult-Gerontology Acute Care Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

1. NUR 613 includes 28 lab hours that are not included in clinical hours.
2. This course is completed online via Blackboard prior to matriculation. Students are registered for the course in their first semester.
Mission
The mission of the MSN program is to educate students and support faculty committed to excellence in the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

Goals
Student Learning Outcomes
- Students will be able to incorporate professional ethics and social justice in the development of the advanced practice role.
- Students will demonstrate proficiency in comprehensive health assessment of individuals and families across the lifespan at an advanced practice nursing level.
- Students in the Adult Gerontology Acute Care Nurse Practitioner Track will be able to synthesize concepts and theories from the basic sciences, humanities, and medicine in learning to deliver care to this population of patients.

MSN - Adult-Gerontology Primary Care Nurse Practitioner
Degree Requirements
The Adult-Gerontology Primary Care Nurse Practitioner program may be completed by finishing one of the following tracks:

Mission

The mission of the MSN program is to educate students and support faculty committed to excellence in the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

Goals

Student Learning Outcomes

- Students will be able to incorporate professional ethics and social justice in the development of the advanced practice role.
- Students will demonstrate proficiency in comprehensive health assessment of individuals and families across the lifespan at an advanced practice nursing level.
- Students from the Adult Gerontology Primary Care Nurse Practitioner program will be able to identify, describe, analyze and evaluate a topic on issues of aging which will demonstrate ability to integrate and manage health and social problems in the Adult Gerontology population.

MSN - Family Nurse Practitioner

Degree Requirements

The Family Nurse Practitioner program may be completed by finishing one of the following tracks:

- Full-time (3 Semesters)
- Part-time (5 Semesters)

The Family Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

---

1 NUR 613 includes 28 lab hours that are not included in clinical hours.
2 This course is completed online via Blackboard prior to matriculation. Students are registered for the course in their first semester.

**Mission**

The mission of the MSN program is to educate students and support faculty committed to excellence in the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

**Goals**

**Student Learning Outcomes**

- Students will be able to incorporate professional ethics and social justice in the development of the advanced practice role.
- Students will demonstrate proficiency in comprehensive health assessment of individuals and families across the lifespan at an advanced practice nursing level.
- Students from the Family Nurse Practitioner program will demonstrate ability to integrate information to manage acute and chronic health problems in advanced clinical practice with emphasis on strategies for health maintenance and health problems.

**MSN to DNP**

**MSN-to-DNP Degree Requirements**

The MSN-to-DNP program may be completed by finishing one of the following tracks:

- 1 Year
- 1 Year Plus
- 2 Year (Fall Entry)
- 2 Year (Spring Entry)

The MSN-to-DNP program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).
To receive the MSN-to-DNP, students must:

1. Complete all coursework as required with an overall GPA of 3.0 or better
2. Complete all required clinical hours
3. Successfully complete the DNP scholarly project
4. Successfully pass a comprehensive examination, which is an integrative experience to demonstrate students’ mastery of the outcome objectives of the program

Mission
The purpose of the DNP program is to prepare scholars and researchers to contribute to the growth of nursing practice and health care delivery through recognized methods of scholarly inquiry and dissemination of practice innovations. Additionally, graduates of this program will be prepared to collaborate with PhD colleagues to provide innovative leadership to the profession and make the practice of nursing more effective.

Student Learning Outcomes
• Students will integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice which assist with the resolution of health care disparities.
• Students will be able to evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities.
• Students will be able to make meaningful contributions in the area of developing quality, cost effective health care collaborations addressing health care disparities.

PhD - Nursing Science

PhD, Nursing Science Degree Requirements
The PhD in Nursing Science program may be completed by finishing one of the following tracks:

• BSN-to-PhD
• MSN-to-PhD

The PhD in Nursing Science program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

To receive the PhD degree, the candidate must meet all the general requirements for the PhD degree with respect to course work, residency, the qualifying examination, 12 credit hours of dissertation, and successful defense of the dissertation.

Students in the SONHS are responsible for meeting their degree requirements. It is the student’s responsibility to understand fully and comply with all the provisions of the Academic Bulletin and written changes to their Plan of Study. Students are provided assistance by faculty advisors and other faculty members. Requests for deviation from the Plan of Study or SONHS requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this Academic Bulletin may be withdrawn from classes unilaterally or have a stop placed upon their future enrollment by appropriate SONHS officials. The SONHS reserves the right to change academic requirements to include course offerings that ensure students receive the highest-quality and most-current education. Classes may be held on weekdays or weekends and will be listed as such in the course schedule. Any programmatic changes are transmitted by written notice in the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) or by an official in the SONHS.

**Mission**

The purpose of the PhD Program in Nursing is to prepare scholars and researchers to contribute to the growth of nursing science through recognized methods of scholarly inquiry and dissemination of research findings. Additionally, graduates of this program will be prepared to provide innovative leadership to the profession and make the practice of nursing more effective.

**Goals**

The program prepares students to:

- Synthesize knowledge from nursing and other disciplines to extend the science of nursing;
- Demonstrate cultural competence and ethical practices in conducting qualitative and quantitative research methods and design;
- Conduct research in a focused area of scientific inquiry;
- Disseminate scholarly findings for the purposes of building and expanding the science of nursing;
- Provide creative and visionary leadership for the advancement of nursing science; and
- Engage in scholarly interdisciplinary inquiry.

**Student Learning Outcomes**

- Students will demonstrate the ability to synthesize knowledge from nursing and other disciplines.
- Demonstrate ethical practices in designing and conducting qualitative and quantitative research studies.
- Students will develop proficiency in scholarly writing.

**Post Masters Certificate - Adult Gerontology Acute Care Nurse Practitioner**

**Degree Requirements**

A Post-Master’s Certificate in Adult-Gerontology Acute Care Nurse Practitioner is available to students who possess a MSN degree and who wish to focus in this specific area of advanced practice nursing and nursing education. All students are required to complete core courses for their selected area of study and may be required to take additional courses at the graduate level based on their gap analysis.

Once the gap analysis is complete, students will be issued a Plan of Study specific to their level of preparation. The Post-Master’s Certificate program is then lock-step, which means students must complete the coursework as specified in their Plan of Study and must successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

Post Masters Certificate - Psychiatric Mental Health Nurse Practitioner

Degree Requirements

The Psychiatric Mental Health Nurse Practitioner program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/). Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the appropriate Associate Dean or Program Director, or staff member in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Post-Bachelors Certificate - Health Informatics (online)

This program is no longer accepting students pending approval by the Southern Association of Colleges and Schools Commission on Colleges.

Degree Requirements

UOnline’s flexible Informatics programs give students the option to complete their MS in Health Informatics while earning a Post-Bachelor's Certificate in Health Informatics along the way or to focus on just earning the Post-Bachelor's Certificate itself. The 15 credit Post-Bachelor’s Certificate is made up of the first 5 classes of the MS program. Credits completed for the Post-Bachelor’s Certificate can be applied toward the MS degree.

The health informatics field is growing. The Bureau of Labor Statistics projects that employment in the field of health informatics increases 23% by 2022, much faster than average of 11% for all occupations nationwide. The UM's online Post-Bachelor's Certificate program is designed to prepare graduates for rewarding informatics careers in a wide range of industries within health care, including hospitals, government, health insurance providers, medical vendors, pharmaceutical and biotechnology companies, and consulting firms. With the ongoing implementation of the Affordable Care Act, these roles will be essential as more organizations begin moving to electronic health care record systems.

The Post-Bachelor’s Certificate program is a lock-step program. Students must complete the coursework as specified in the Plan of Study for the specific track under which they were admitted and as listed in the Academic Bulletin and the Student Handbook (http://www.sonhs.miami.edu/...
Students must also successfully complete the courses in each semester to progress to the next. Questions related to degree requirements should be directed to the UOnline Academic Advisors (http://www.miami.edu/online/student-experience/student-support/).

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

**Mission**

The mission of the MS Health Informatics program is to prepare highly competent health informatics professionals who can advance the frontiers of healthcare through their leadership and innovation.

**Goals**

**Student Learning Outcomes**

- Demonstrate advanced knowledge of computer information systems (Meditech, Epic, Cerner, etc), health care databases, systems administration and project management.
Message from the Dean

Graduate school at the University of Miami is a place where students gain proficiency in a specialty with the guidance of dedicated faculty in the presence of a community of world-class scholars. UM students are thought leaders and innovators whose accomplishments are showcased on a global stage. Our students represent the best and the brightest and their engagement with our faculty continues to elevate the University.

The Graduate Student Handbook for Online Students

The Graduate Student Handbook for Online Students is an excellent resource for graduate online students at the University of Miami. The Handbook contains all applicable policies and valuable information for graduate online students compiled into one comprehensive manual. Online graduate student enrollment is governed by this Handbook. This handbook describes policies and procedures pertaining to the Graduate School and online graduate study at the University of Miami. Policies or procedures for online graduate students may vary from policies or procedures of campus-based graduate students. This Graduate Student Handbook is applicable to UOnline Students only. In the event of a conflict between this handbook for online graduate students and any other applicable University policies or procedures, the terms of this handbook shall control. It is the student’s responsibility to be aware of and comply with all policies, procedures and deadlines. Although the Handbook contains general information, students should be aware of regulations and policies that directly pertain to individual graduate programs, as many programs have additional requirements of their own, as well as a program handbook.

Policies Modification

This is the official University of Miami source for the enrollment, business, and financial policies associated with the University’s UOnline programs. The University reserves the right to amend and update these policies at any point in the future. Amendments to these policies will be published on the University Registrar’s website.

Additional University of Miami Policies

Please also consult these policies:

- Our privacy statement (http://www.miami.edu/index.php/privacy_statement/) for our privacy and data collection polices.
- Technology policies
  - Acceptable Use of Information Technology Resources (http://www.miami.edu/it/index.php/a060_acceptable_use_of_info_tech_resources_by_students/)
  - Use of University Computing Facilities (http://www.miami.edu/it/index.php/a046_use_of_university_computing_facilities/)

About the Graduate School

The Graduate School is the administrative body overseeing all master’s and doctoral programs.

Mission and Goal Statement

The mission of the Graduate School is to promote graduate education, scholarship and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.
The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally, the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility, the recommendation for the degree rests with the faculty.

**Academic Calendar**

Please visit the Office of the University Registrar (http://www.miami.edu/index.php/registrar/calendar/) website for the most recent academic calendar for UOnline programs.

**Definitions**

**New Student**

A new student is a student who has been admitted to a program and paid the enrollment deposit but not yet completed the first 7 days of the first program course.

**Continuing Student**

A continuing student is a student who has completed at least the first 7 days of the first course in their program and not yet graduated from the program.

**Course**

A course is an educational component made up of academic content, assignments and activities, the successful completion of which earns a student credit hours toward completion of a program. A course is delivered and accessed online via a learning management system (LMS). A course is 7 weeks long.

**Academic Plan/Program of Study**

A series of courses that make up a full degree or certificate program. All courses in a program must be successfully completed for a student to be considered for graduation.

**Academic Year**

The academic year is August through July and consists of 3 terms (Fall, Spring, Summer).

**Term**

A term is the discrete length of time in which courses are offered. A term is 15-weeks long and encompasses two 7-week sessions with a 1-week break in between them.

- Fall Term is August – December
- Spring Term is January – April
- Summer Term is May – July

**Session**

A session is the discrete length of time during which a single course is completed. A session is 7-weeks long.

**General Academic Requirements and Regulations**

All graduate work (except for the master’s degree in Law, J.D. in Law, and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of their programs in regard to attendance, examinations, payment of fees and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Prospective students should note that “graduate study” means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative and scholarship of the student. The term must be distinguished from “post-graduation study” which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor’s degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right, to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.
Time to Completion

Time to completion starts when a student begins any program in the Graduate School. All work must be completed within three (3) years of the start date to the graduate program, for those studying for the various master’s degrees. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director. Course availability may vary by program and term; therefore students who may need to withdraw or take a break from their program should work directly with their Academic Advisor (https://myonlinesupport.miami.edu/advising/) to ensure timely completion within the three (3) year window. Students in the UOnline Applied Learning Sciences (Master’s & Doctoral) and Frost Online graduate programs have six (6) years to complete their requirements for graduation.

A student is ineligible for financial aid when it becomes mathematically impossible for him/her to complete the program within 150% of the length of the program. The length of the program is the amount of time necessary for a student to complete all requirements for a degree or certificate.

Each online degree program has a minimum time within which a student may complete the degree if the student takes the courses on a continually enrolled basis. Online degrees are flexible, and the actual time to completion, within the three-year limit, can vary by student. However, if a student is not continuously enrolled for a period greater than one year, he or she must reapply to the program and will lose any tuition discounts previously applied to their account. A student may be eligible for any tuition discounts available to new students at the time of the student’s re-admission, and should contact the Online Enrollment Office to see if they qualify.

Graduate Transfer Credits

• Transfer credits from an outside institution may not be applied toward any online degree in the School of Business.
• A maximum of 6 credit hours may, with the permission of Program Director, be applied to the M.S. Ed. in Sport Administration degree online.
• Certain UOnline business courses may be transferable to other UOnline business programs. Students should contact their Academic Advisor (https://myonlinesupport.miami.edu/advising/) to see if their courses are eligible to transfer.
• Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.
• Students in the UOnline degree programs may not transfer or transfer credit hours from the online degree version of these programs to the campus based versions of the programs without the permission of the Program Director and the Dean of the school. Should a student obtain permission for such a transfer, they will not be admissible back to their original program once transferred.
• Students may not transfer any credits from any campus-based program to any of the UOnline programs without the permission of the Program Director and the Dean of the school.
• Students may not take any individual UOnline course and transfer into an existing campus program using the online course as an elective course option.
• Transfer credit hours grades will not be factored into a student’s cumulative grade point average at the University. Transfer credit hours only impact the number of credit hours earned.

Online Program Course Information

Students should review their school’s program page for more information on course descriptions, pre-requisite requirements, and other program specifics. Course sequencing is subject to change each term and does not align with campus sequencing. For additional information on course sequencing or specific online student requirements, please contact Academic Advising (https://www.tfaforms.com/433870/).

**Registration**

**Registration and Online Course Access**
Registration starts about 4 weeks before each term. Each term contains two 7-week sessions with about a 1-week break in between each session. Students will have access to their online course via Blackboard approximately four (4) days before the first day of class. New and continuing students will be automatically registered by their advisor, and are only registered for classes at the beginning of each semester. Students may take time off from their program, but run the risk of exceeding the time to completion requirements depending on available course sequencing. Students who wish to take time off should contact their Academic Advisor (https://myonlinesupport.miami.edu/advising/) prior to their withdrawal to ensure appropriate course availability and to determine their ability to complete their degree program in the required time frame upon the student’s return. All UOnline students will have an Academic Advising hold showing in their CaneLink account throughout the remainder of their program. This hold will not be removed and is used for registration purposes only. Students should pay close attention to the Academic Calendar for important registration deadlines.

**New Student Registration**
Students will be eligible for registration once the University has received their enrollment deposit, paid in full, and once students have completed and passed their required Student Readiness Orientation (SRO) no later that their given deadline. Students will be registered into courses for the entire first term, both first and second sessions (2 courses per term), by the Office of the University Registrar. In some cases, students may be registered for their Session I course prior to the start of the term and registered for their Session II course up to 10 days after Session I begins. If this occurs, a student may request to have their Session II course added prior to the start of the term by contacting Academic Advising (https://www.tfaforms.com/433870/). Students will have access to the online course approximately 4 days before each session start date. New students enrolled in a Certificate program, but plan on applying to a Master’s program upon completion, are encouraged to contact Academic Advising (https://www.tfaforms.com/433870/) immediately to discuss the most optimal registration options available.

**Continuing Student Registration**
Students will be eligible for registration provided they have no financial or other holds on their account or are not withdrawn. If a student has previously withdrawn from their UOnline program, and it has been less than one year since they have been enrolled, the student should contact their
Academic Advisor (https://www.tfaforms.com/433870/) to be re-enrolled for the upcoming term no later than the Readmission Deadline for their desired term. Please refer to the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important deadlines regarding registration for continuing students. Students will be registered into courses for the entire term, both first and second sessions (2 courses per term), by the Office of the University Registrar. Students will have access to their course approximately 4 days before each session start date.

Financial, Academic and Other Holds
If students have any financial or other holds, they will not be registered into a course until they have met the requirements to remove the hold. Please refer to the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important dates regarding registration for continuing students and readmission. Students will not be registered past the deadline due to delayed payments on the students account. Tuition for each term must be paid in full and cannot be deferred to a future term.

Full-Time Study
All online programs are designed for students to attend full-time. Students are considered full-time pending they meet the credit requirements posted by the Office of the University Registrar. Students should contact their Academic Advisor (https://www.tfaforms.com/433870/) for further information on part time status.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School and the Office of the University Registrar.

No full-time faculty member may be a full-time online student, whether or not working toward a degree. Nor may a full-time online student be a full-time faculty member.

No full-time online student will be a principal investigator on any grant or contract, whether in name or fact. And no principal investigator will be a full-time online student.

Admissions

Applying to the Online Programs
In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework/work experience required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of "B" or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found here (https://myonline.miami.edu/SignIn/). Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all the components and required documents for their application. Students’ Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions. Students will then transition to their UOnline Student Advocate who will work with them through their first year, then transition to their designated Academic Advisor for important Graduation and completion requirements throughout the remainder of their program.

International Students (who attended college/university outside of the United States)
All graduate applicants who have attended a college or university outside the United States must submit official transcripts and diplomas (if available) from all colleges and universities attended to one of the three approved evaluation services listed below. Follow the specific instructions of the selected evaluation service to request a course-by-course evaluation with degree equivalency and grade point average (gpa) calculation. We do not issue any student Visa’s for International UOnline students.

The evaluation report and copy of all the official documents used in the evaluation must be sent directly from one of the three approved evaluation services to the address below. It is the responsibility of the student to ensure their evaluation is sent to the correct address. Evaluations sent to other addresses on campus will not be received and will delay the admissions process.
The evaluation report and supporting documents are required before the Admissions Committee can review the application. Any documents received by the University will become the property of the University and will not be returned to the applicant or sent to a third party including the evaluation services.

Approved Evaluation Services

• Educational Credential Evaluators, Inc. (ECE) (https://www.ece.org/)
• World Education Services (WES) (http://www.wes.org/students/)
• Josef Silny & Associates (JS&A) (https://www.jsilny.org/default.aspx)

TOEFL (Test of English as a Foreign Language) & IELTS (International English Language Testing System)

If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit this web page (http://www.ets.org/toefl/) to arrange to take the test. The TOEFL and IELTS scores are valid for 2 years after the test date. Some programs may require one test vs another. Please check with your UOnline Enrollment Advisor for program requirements.

The TOEFL code for the University of Miami is 5815. The IELTS code for the University of Miami is 4862.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

| TOEFL Internet Minimum Score | 94 |
| TOEFL Computer Minimum Score | 240 |
| TOEFL Paper Minimum Score | 600 |

TOEFL Waiver

The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

• Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
• Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
• Students have lived and worked in an English-speaking country for the past two or more years.

Letters of Recommendation

Students will input their recommender’s information directly into the online application which will generate an email with a unique link sent directly to the recommender. Letters of Recommendations must be submitted directly by the student’s recommender using the unique link provided to them via email. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted. The student’s Enrollment Advisor may provide guidance to the recommender if they have technical trouble or questions regarding the process.

Admissions & Admissions Decisions

Once the University receives the student’s complete application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)

If the application meets the standard admissions requirements and the University has received all official transcripts, from all institutions entered on their online application, the student will receive an offer of full admission in approximately 48 business hours after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Conditional Admit (with Unofficial Transcripts and/or Test Scores)

If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended, as entered on their online application, and/or the student’s unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF the document is in a pdf format and ALL of the following items are legible on the transcript document:

• Name of the institution
• Student name
• Cumulative Grade Point Average (preferred)
• Course numbers
• Course names
• Credit hours earned
• Grades earned
**Academic Calendar**

Students **must** pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, and successfully passed the Student Readiness Orientation (SRO), they may be eligible to receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. **Student’s Financial Aid funds will not be disbursed** until the student has participated in their first course and all official admissions documents and all required Financial Aid documents have been received. Students are responsible for checking CaneLink to ensure that their funding is ready for disbursement.

Students will not be registered for the next term until their current balance is paid in full. In the event the student’s financial aid award is delayed, students should work directly with their Student Advocate or Academic Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if that their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) (p. 2974) section for guidance on setting up a monthly payment plan, as well as the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options and is only available to online students at this time. **UM Employees are not eligible for Monthly Payment Plans at this time.**

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline (http://www.miami.edu/index.php/registrar/calendar/) Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for official transcript deadlines.

**Accepting Admission**

When a student’s admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor which includes next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer. Students can also view the admissions decision online application portal found here (https://myonlinesupport.miami.edu/). A student’s Enrollment Advisor will guide him/her through the next steps (https://myonlinesupport.miami.edu/recently-admitted/) for accepting their offer of admission and pay their non-refundable enrollment deposit. A student’s offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Students will have **fourteen (14) calendar days** to accept their offer of admission by paying their non-refundable $300 Enrollment Deposit. If a student fails to accept their offer of admission within the fourteen (14) calendar day time frame according to the Deposit Date on the official Admission letter, the student’s application will be withdrawn. Students who apply late will forfeit the full (14) calendar day acceptance policy and will be required to accept their offer no later than the last official Deposit Deadline as set on the UOnline Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/), which may be less than (14) calendar days. Students should refer to their official Admissions letter for their exact deposit deadline. If a student chooses to reapply, they will need to wait one (1) additional term before reapplying. **Deferrals are not permitted unless the student has been approved for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020).**

**Deferral Exception Appeal**

In extenuating circumstances, students may choose to apply for a Deferral Exception (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020). Students who choose not to accept their offer of admission must apply for a Deferral Exception no later than their Deposit Deadline as specified by the Admissions letter, or will be withdrawn and will need to wait one (1) additional term before reapplying. Deferral Exception Requests are only eligible for the next immediate term. Students who would like to wait to start in future terms will need to reapply and should contact their Enrollment Advisor for additional information regarding documents required for admission. Any student who has already accepted their offer of admissions must apply for a Deferral Exception no later than the official Completed Enrollment Application Deadline for their current term as per the Academic Calendar. (http://www.miami.edu/index.php/registrar/calendar/) Deferral requests submitted after the deadline will not be reviewed. Any student who has already been withdrawn due to missing their deposit deadline, failing their SRO requirement, or by voluntarily submitting a Withdrawal request will not be eligible to defer and must reapply.

- If a student’s Deferral Exception application is **denied**, the student’s offer of admission will be withdrawn and they must wait one (1) additional term before reapplying.
• If a student’s Deferral Exception is approved, the student’s start date will be updated to the next immediate term and the student will be sent a new admissions letter indicating the approval and updated start date.
  • If a student has not accepted their offer of admission, and is approved for a deferral exception, the student will have fourteen (14) calendar days to accept their offer from the date of the deferral approval as per their deferral approval letter. If a student does not accept their offer of admission within the fourteen (14) calendar day timeframe, the student’s application will be withdrawn and the student must sit out (1) one additional term before reapplying.
  • If a student has already accepted their offer of admission, and has been approved for a deferral exception, the student’s start date will be updated and a new admissions letter will be sent with the updated term and approval. If a student chooses to withdraw before the census date or is administratively withdrawn for any reason, the student must sit out one (1) additional term before reapplying to the program.

Any student who chooses to reapply for a future term is not guaranteed admission and will be subject to any changes in tuition, scholarships, and/or admissions requirements for that term.

Offer of Admission Expiration
Offers of Admission are valid for one term only unless a Deferral Exception has been granted. To officially accept the offer of admission, a student must log into Canelink (https://myonlinesupport.miami.edu/recently-admitted/) and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within the fourteen (14) day time frame/deadline on their official Admissions Letter, he/she must reapply to the University and program after sitting out one additional term. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission
There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:
  • A student’s original Offer of Admission has expired and he/she never started the online program.
  • A student requests to change to a different program.
  • A student has been withdrawn from his/her program for more than 1 calendar year (3 consecutive terms).
  • A student failed to meet the requirements of a Conditional Admission.
  • A student failed or did not complete the Student Readiness Orientation (SRO)
  • A student’s Deferral Exception Appeal was denied

To reapply, students can login and start the Online Application (https://myonline.miami.edu/signup/) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application. All students who are readmitted will need to complete the Student Readiness Orientation (SRO) by their deadline, regardless of prior completion, and adhere to all admissions deadlines as set forth in the Academic Calendar.

Not Admitted
If a student’s application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically within 48 business hours after the University received the student’s completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (https://myonline.miami.edu/signup/).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal. Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student’s Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts
  • MUST Arrive in a sealed envelope with the school’s stamp/seal across the back or on the institution’s official envelope
  • Be opened only by a member of the University of Miami admission staff
  • Have a Registrar’s signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami
Online Enrollment Office
1320 South Dixie Highway
Gables One Tower –Suite 902, Locator Code: 2991

Miami, FL 33146
Please ensure that the locator code is included in the address. Transcripts may not be received if address is missing the locator code or sent to another address on campus. Students are responsible for ensuring that they have their transcripts sent to the address above and are subject to all deadlines as per the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/).

**Electronic Transcripts**

Electronic transcripts will be considered official only if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student's Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts address.

**Official Transcripts, Scores & Conditional Admission**

The University must receive official transcripts for all institutions attended, as entered on their online application, before any student can be considered fully admitted into the University.

**Official Transcripts/International Evaluations Due Date**

If a student was Conditionally Admitted into a program with unofficial transcripts, the University MUST receive the student's official transcripts from all institutions attended, as entered on their online application, or International Evaluations from an approved evaluation service, by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student’s official transcripts. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**Official Test Scores Due Date**

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University MUST receive their official test scores by the date listed on the UOnline Academic Calendar. A student’s Admissions letter will provide the exact due date for the student’s official test score(s) and he/she may check Canelink to verify that the University has received the student’s official test scores. Students should refer to the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/) for important due dates.

**UOnline Official Test Score School Codes**

- **TOEFL CODE:** Institution: 5815
- **IELTS CODE:** Institution: 4862
- **GRE CODES:** Institution (All UOnline programs): 4405
- **GMAT CODES:**
  - School of Business - UOnline Finance/Accounting Certificate: 7NV-S1-23
  - School of Business - UOnline Master of Finance: 7NV-S1-35
  - School of Business - UOnline Master of Professional Accounting: 7NV-S1-53
  - School of Business - UOnline Professional MBA: 7NV-S1-01
  - College of Arts & Sciences - UOnline Master of Public Administration: 7NV-HM-66
  - School of Education - UOnline Master & EdD of Applied Learning Sciences: 7NV-HM-66

**Financial Aid & Tuition Payment**

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all institutions attended and/or test scores, if required.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student MUST pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

**Official Transcripts and Test Scores Not Received**

If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

- A student will be removed from their current course and next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student’s official transcripts.
- A student may owe a tuition balance from being withdrawn and must have their tuition bill paid in full before being eligible for reinstatement

**Enrollment Deposit**

Once students have received their offer of admission or conditional admission, they will pay a non-refundable enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be required to complete and pass their Student Readiness Orientation (SRO) within (4) four weeks or by the deadline provided, in order to be eligible for their first term registration.
What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- **Non-refundable** including if the student’s Offer of Admission has expired, he/she failed the Student Readiness Orientation (SRO), and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than the date listed on the academic calendar.
- Applied against a student’s 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
  - If a student’s Offer of Admission for their UOnline program has expired and he/she reapplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
  - Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
- **Not transferrable** to any campus-based program.

Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink (https://canelink.miami.edu) to pay the student’s enrollment deposit with the following payment options:

- Online Credit Card payment:
  - MasterCard
  - Visa
  - American Express
  - Discover
- E-check (drawn on a US bank only)
  - Bank-to-Bank, Exchange Bureau or Wire Transfer.
  - Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.
- International Payments with Flywire (http://www.miami.edu/finance/index.php/student_account_services/cashier_services-1/international_student_payments/)

New Students

Student Readiness Orientation

Once a student has been admitted and paid the non-refundable enrollment deposit, a student can start the Student Readiness Orientation. (https://myonline.miami.edu/signup/) The Student Readiness Orientation (SRO) is an interactive series of **required** activities in the University’s social media environment. and will be accessed by students through their UOnline student portal (https://myonline.miami.edu/signup/). During the SRO, students will meet other students, prepare for online learning at the University of Miami and familiarize themselves with their support structures and University academic policies.

Students will have (4) four weeks to complete and pass the SRO and will receive an email with their official SRO completion deadline via email from their Enrollment Advisor. For students to be fully prepared for their courses, completion of the SRO is mandatory and must be passed within (4) four weeks of submitting the enrollment deposit. Students who submit their enrollment deposit late may have less than (4) four weeks to complete the required activities and should refer to their official SRO email for their deadline. There are no extensions or exceptions allowed when completing the SRO.

Students who fail to complete or do not pass the SRO by the deadline will be administratively withdrawn and will need to wait (1) one additional term before being eligible to reapply. Additional activities, such as the New Student Checklist, (https://myonlinesupport.miami.edu/2015/08/13/new-student-checklist/) may also be required in order for students to be prepared for class. Student should work closely with their Enrollment Advisor and Student Advocate to receive guidance on completion of these additional activities.

Successful Completion

Once students have successfully completed and passed all required activities in the Student Readiness environment, they will be eligible to register for their first term’s courses. Students should review the Syllabus to ensure that they complete the required activities with a passing grade.

Program Change

If a student changes his/her program, the student may be required to complete some program-specific portions of the Student Readiness Orientation (https://myonline.miami.edu/signup/) or New Student Checklist (https://myonlinesupport.miami.edu/2015/08/13/new-student-checklist/). If so, the student’s Enrollment Advisor will inform the student and provide access to the relevant Student Readiness Orientation activities.
Offer of Admission Expiration
If a student’s Offer of Admission has expired and he/she has not started a program, the student will be required to retake the Student Readiness Orientation (https://myonline.miami.edu/signup/) once he/she has been re-admitted into the program.

Technical Requirements
To help ensure success, students should be proficient using e-mail, the Internet, and common desktop productivity software. During the course of the program, requirements (either hardware or software) may change from the original technology recommendation. Students should consult the software/hardware requirements within the program or with the faculty member or Student Support Team (https://www.emailmeform.com/builder/form/ift36G870aSUABMY/) for any technology recommendations that may have changed since the original recommendation mentioned below or within the program of study. Below are some initial recommendations. Please note that these recommendations and requirements may change as technology changes and may also vary from course to course. Also please note that specific programs of study may have other specific requirements:

Recommended Setup
- Internet access required; 6-10 Mbps speed or higher recommended; Broadband is recommended as students with dial-up may experience degraded performance
- Windows Vista/7 or Mac OS X with virtualization software (like Parallels with Windows OS)
- 2GB of RAM minimum
- 40GB hard drive
- speakers, and headphone connected to the computer
- Inkjet or laser printer
- Scanner or Scanning Application for mobile devices
- Portable media (thumb drive)

Software Requirements
- Recommended Web browser—current version of Chrome
- Other Web browsers (Internet Explorer ver. 9.0 or higher or Firefox’s current and next most recent releases).
- Microsoft Office
- Adobe Reader ver. 10.1 or higher
- Adobe Flash Player ver. 11.7 or higher
- Apple QuickTime ver. 7.7 or higher
- Windows Media Player ver. 11 or higher
- Antivirus software (e.g., McAfee or Norton) installed, running, and kept current by promptly installing the upgrades and patches made available by the software manufacturer

Tablet/Laptop Recommendation
Students enrolled in programs that require participation in academic residencies are encouraged to use a laptop or tablet computer for their work. Some coursework may not be fully compatible with use of a tablet or mobile device; therefore, it is recommended that students have a desktop/laptop available if needed.

Additional Technology Requirements
Some programs may require additional technology requirements that are not mentioned above. Please refer to the program course(s) syllabi or course materials list in the UOnline Support Center (https://myonlinesupport.miami.edu/) to review any special technology requirements for the program of study.

Cost, Fees, Billing and Payment
Tuition Includes
- Online learning environment and courses
- Application processing
- Non-refundable Enrollment Deposit (paid separately and deducted from 1st tuition bill)
- Technology fee
- Access to the online library, career center, and disability services
- Student and Technical Support
Tuition Does NOT Include
- Course Materials, Books and e-books
- Late Payment Fees, if assessed
- Graduation related fees

Your Tuition Invoice and Payment
Immediately after students have been registered into class, their tuition bill will be available in their student center through Canelink (https://canelink.miami.edu). Payment in full is due or arrangements to pay finalized by the 1st day of the 1st class of each term. If the University does not receive payment in full by this date, students will be removed from the online classes. Students are responsible for ensuring their payments are made on time regardless of whether they are utilizing a third party for payment. Students who are utilizing a third party for payment may need to find alternative payment arrangements to ensure they meet the payment deadlines as per the Academic Calendar. (http://www.miami.edu/index.php/registrar/calendar/)

Payment Currencies
A student invoice is in United States Dollars (USD) and the University accepts payment only in United States Dollar, USD.

Payment Methods
The University offers several payment methods, described below. A student’s tuition invoice will contain instructions for using these payment methods.

Credit Card
A student may pay by credit card via the University’s partner, Elavon. A student can pay with:
- MasterCard
- Visa
- American Express
- Discover

Students will be charged a processing fee of 2.5% to pay by credit card.

eCheck (ACH)
Students may pay their tuition by E-check (ACH) online through your Canelink account:
- Click on the “Student Home” tab
- Navigate to Finances section
- Click on “Account Inquiry”
- Click on “Payment” and follow the instructions.

Students will not be charged any additional fee if they pay by e-Check. For additional help, contact the Student Support Team (https://www.emailmeform.com/builder/form/ift36G870a5UABMY/).

Wire Transfer
Students may pay their tuition by wire transfer. The wire transfer instructions can be obtained through CaneLink.

How to obtain wire transfer instructions:
1. Log into CaneLink and go to Student Center, click on the Account Inquiry button under the Finances.
2. Click on Make a Payment to pay your tuition and select Wire Transfer Payment (USA & International).
3. Select the country from the “What country are you paying from” dropdown list. For domestic wire instructions, select the US wire transfer payment option.
4. Create a Flywire account, to track your wire payment, and enter basic identification information for the University to identify your payment.
5. The bank account wire instructions will be provided.
6. An email will be sent with a unique wire identification number.

Students should make sure their full name, student ID number, and unique wire ID number are included with the wire transfer to ensure the funds are applied correctly.
Wire/Bank Transfer Fees
Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payment. The University is not responsible for any fees students may incur during the transfer process.

Payment by a Third Party
A “third party sponsor” refers to any organization which formalizes a contract with the University and provides a guarantee letter assuming financial responsibility for a student’s, or group of student’s, tuition and fees, in full or portion thereof. Employers are not considered third party sponsors since sponsorship cannot be dependent upon the student’s continued employment with the organization. Students who plan on using their employer’s tuition reimbursement benefits are responsible for their tuition by the due date. Students with this type of assistance must inform the Financial Aid Office to ensure that financial aid is awarded appropriately and that funds are applied appropriately.

If a student’s tuition is paid via Third Party Sponsorship, the student will still remain subject to all policies, including due dates, late payment fees and financial hold rules and consequences.

Monthly Payment Plan (MPP)
Through the Monthly Payment Plan, term tuition payment is divided into 4 monthly payments for the Fall and Spring terms. The Summer term payment schedule is divided into 3 monthly payments and is only available to online students at this time. Each monthly payment is due on the 1st of the month and is not directly debited from the student’s account. UM Employees are not currently eligible to enroll in the Monthly Payment Plan at this time. UM Employees are encouraged to reach out to the Enrollment Advisor for other payment options.

- Students must pay each term in full before they will be registered for the next term (see payment methods section). This chart details the Monthly Payment Plan option available during the Fall and Spring Terms only.

<table>

</tbody>
</table>

Late Payment
- If payment is not received by payment due date, a registration hold will be placed on a student’s account the next business day.
- Once payment has been received, the registration hold issued for late payment will be removed.

Tuition Reductions, Scholarships, Special Offers
During the Enrollment and Admissions process and at the University's discretion, tuition reductions and scholarships may be offered to incoming students. Existing students will not be eligible for any new tuition reductions offered to incoming students. A tuition reduction will remain on a student’s account for the duration of the online program for which they received the reduction provided the student remains academically eligible and does not withdraw from the program for longer than one-year. Any student who is not enrolled in their program for greater than one year, will no longer be eligible for their initial tuition reduction and must reapply for admission to a program. A student may be eligible for any new tuition reductions being offered upon reapplication to a UOnline program. Students should contact an Enrollment Advisor for current offerings and qualifying criteria.

If students qualify for a tuition reduction, their Enrollment Advisor will provide them, in writing, the formal terms and conditions specific to that tuition reduction. The reduction will be included in a student’s tuition statement(note in Financial Aid package if applicable and deducted from tuition accordingly. If financial aid is awarded prior to the tuition reduction being applied to a student’s bill, the financial aid award will be adjusted accordingly. Student should contact (gradprof.finaid@miami.edu) the Financial Aid Office if they have questions regarding this adjustment.

UM Tuition Remission
As with other special Master’s degree programs and doctorate programs, UOnline programs are not available for University of Miami Tuition Remission. Please refer to the Tuition Remission policies on the University of Miami’s Human Resources website for additional details on the benefit program.

Tuition Increase
The University reviews tuition rates each year and reserves the right to increase tuition for existing students.

If the University does increase tuition:
- The increase will be implemented at the beginning of the Fall term and will apply forward to any future unbilled tuition.
- Students’ tuition invoices moving forward will be adjusted to reflect the increase.
Change Payment Plan

Students may request to change payment plans. Currently the options are:

- Payment in Full to Monthly Payment Plan.
- Monthly Payment Plan to Payment in Full.

Payment Plan changes will be implemented only at the beginning of the next term. Students must complete any payments due for the current term as agreed under their current payment plan before they can request a new payment plan.

Students should contact the Student Support Team for more information about changing their payment plan. Formal requests must be in writing/online form.

Billing Support

The student’s Enrollment Advisor and Student Support Team will be able to answer questions or provide information about a student’s invoice.

University of Miami VA Pending Payment Compliance

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA.

This school will not:

- Prevent the student’s enrollment
- Assess a late penalty fee to the student
- Require the student to secure alternative or additional funding
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class
- Provide a written request to be certified
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

Graduate Grading

Scale/Quality Points

An average of B (3.0) is required for a graduate degree, and no “D” credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded “D”.

No transferred credit hours are calculated into the University of Miami G.P.A.

Grade Interpretations

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent accomplishment.</td>
</tr>
<tr>
<td>B</td>
<td>Good accomplishment.</td>
</tr>
<tr>
<td>C</td>
<td>Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).</td>
</tr>
<tr>
<td>S</td>
<td>Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of “S” to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of “S” reflects that a student is in good academic standing.</td>
</tr>
<tr>
<td>D</td>
<td>Poor (not acceptable for credit hour toward the advanced degree).</td>
</tr>
<tr>
<td>F</td>
<td>Failure.</td>
</tr>
<tr>
<td>W</td>
<td>Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the University. Courses dropped after last date must have approval of Dean of Graduate School. Credit hour can be earned only by successful repetition of the course.</td>
</tr>
</tbody>
</table>
Repeating Courses & Academic Progression

In complete work in passing status with the instructor’s permission to complete the course. (Not to be used for thesis or dissertation credit hours). Student may request an incomplete from the professor if: • they have completed at least 75% of the course and • have a C or better in the course at the time of the request. The “I” should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student’s primary school or college and the Dean of the Graduate School approve the delay. If the “I” is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of “I”s on a student's transcript).

NG Symbol assigned by the Office of the University Registrar indicating that the instructor has not yet reported the student’s grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student’s graduation.

Faculty Senate Legislation #85005(B)

Quality Points

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.70</td>
</tr>
<tr>
<td>D+</td>
<td>1.40</td>
</tr>
<tr>
<td>D</td>
<td>1.30</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols “S”, “W”, and “I” are not counted as credit hour attempted.

Repeating Courses & Academic Progression

Repeating Courses

A student may appeal to repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. A course may be repeated only once unless written authorization is provided by the Program Director, Dean of the School and Dean of the Graduate School, and requires program approval. Students must complete a Course Retake Appeal form (https://myonlinesupport.miami.edu/forms/) no later than the readmission deadline per the Academic Calendar for the requested retake term. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a “C-” or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated. If a student attempts to retake a passed course, taking the same course to obtain a better grade, financial aid may be affected.

Registrations which involve repeating a course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

UOnline Business Students

Graduate students in the Miami Business School who fall below the 3.0 GPA may be placed on academic probation. Within one semester after their GPA falling below 3.0, Master’s students wishing to repeat a course may petition their program director to do so. If the petition is approved by the graduate program director, the grade obtained in their second attempt will replace the original grade for purposes of calculating their GPA for clearance for graduation only. Authorization to repeat a course is limited to courses in which an unsatisfactory grade was earned (as determined by the graduate program director).

Additionally, a course may be repeated only once and students may not repeat more than two courses. The student’s transcript will continue to show all attempts and the GPA computation will include all grades earned for purposes other than computing the GPA for clearance for graduation. If a course in which an unsatisfactory grade of lower than a “B-” was earned is repeated and the repeat grade is “C-” or higher, the number of credits required for graduation will be increased by the number of credits repeated. Registrations which involved repeating course in which a grade of “A” or “B” has already been earned may not earn quality points or credit hours, nor count as credits attempted.
UOnline MSEd Sport Administration

UOnline students must earn a grade of "C" or better in KIN 601 before taking KIN 602 or KIN 603. Should a student earn below a "C" in KIN 601, the student will be automatically withdrawn from their Session 2 course for that term and rescheduled for the immediate next term in KIN 601 to repeat. Students failing to earn the required pre-requisite grade will be responsible for tuition for both attempts.

UOnline MS Health Informatics

The minimum passing grade for each course is a B. An overall average of B (3.0) is required for the graduate degree and certificate.

A student may receive only one (1) grade below a B while they are enrolled in the program. If that grade is below a C, the course must be repeated and a grade of B or better achieved on the retake. The repetition of the course will not eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. All grades are included in the computation of the quality point average.

Students receiving a second grade below B will be dismissed from the program regardless of their cumulative GPA.

UOnline Applied Learning Sciences (Certificate/MSEd/EdD)

UOnline students who receive a failing course grade in either of programs' first two courses will not be eligible to take additional courses due to the lock-step nature of the program. Instead, the student is required to wait until the next cohort begins and to retake the course(s) in question with that new cohort. Students failing to earn the required pre-requisite grade will be responsible for tuition for both attempts. Both APLS seminar courses are graded on a satisfactory/unsatisfactory grading scale. Students are only permitted to retake a failed ("U") seminar course one additional time (Total of 4 attempts per seminar course). Repeated grades of "U" will result in dismissal from the program.

Academic Standing, Probation, and Dismissal

At the end of each course, UOnline and the Schools and Colleges, shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. If a student is placed on Academic Probation or is Academically Dismissed, they will receive an official letter outlining the specifications of their probation or dismissal. Students on Academic Probation or who have been Academically Dismissed may see changes to their course sequencing, eligibility changes to financial aid, and may be required to meet with their UOnline Academic Advisor prior to being eligible for future registration.

Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal. All Graduate students are required to maintain a minimum 3.0 cumulative GPA throughout their program. U/S grades do not count towards a student's cumulative GPA.

Academic Probation

Students shall be placed on Academic Probation if they fall below a 3.0 cumulative GPA after any course. Students who fail to make satisfactory progress toward meeting the degree requirements specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. A student's GPA is reviewed after each course is completed. If a student consistently fails to close the gap towards achieving a 3.0 GPA (this could include receiving grades of incomplete, withdrawing from courses, a student's GPA dropping even farther, among others), that student may be dismissed from the program after the program director has reviewed that student's performance.

Students may also be placed on probation for non-academic reasons (e.g., failure to follow professional norms of participation in online discussion, among others) at any time during their program. Steps needed to re-mediate non-academic performance issues will be spelled out in the letter placing the student on probation.

Students on Academic Probation must meet with their academic advisor after each course to review their academic progression, future course sequencing, and may need to repeat courses, as necessary. Academic Probation may affect financial aid eligibility, so it is recommended that students reach out to the Financial Aid office for further clarification on their specific status.

Academic Dismissal

A student who remains on probation after one term and is not meeting academic progression standards may be subject to Academic Dismissal based on the information found in the probation letter from the School or College. The decision to dismiss shall be made by the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall remain on Academic Probation and must meet the requirements of their academic probation letter, and will be required to meet with their UOnline Academic Advisor after each course to review their academic progression.

Appeals and Readmission

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to UOnline Academic Advising and the School or College within thirty (30) days of the notice of dismissal. In some cases, a student may choose to submit a second appeal directly to the Graduate School using the process and time frames here (http://bulletin.miami.edu/general-university-information/graduate-policies-and-procedures/academic-policies/). Appeals that are submitted outside of the approved time frame will not be accepted. All Graduate School decisions are final and will be communicated in writing to the student.
Attendance

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below). A student should contact their Academic Advisor if they need to request a military withdrawal (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com).

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University.

1. On recommendation of the Dean of the school, students who withdraw after the 5th week of the session because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Attendance and Participation, 1st Week (new and continuing students)

Online courses are not independent study courses. They involve a mixture of independent work outside the online course environment and presence within the course room. Authentic student engagement includes activities such as doing assigned readings, preparing and presenting quality assignments and participating substantively in online discussion. Logging into the online course alone does not demonstrate adequate engagement or participation.

Attendance during the first week of each course ensures you are on the right path to successfully completing your course and helps ensure that all students are assigned to groups with active participants to support quality group work. Participation in an online course is defined as the submission of a gradable assignment and/or discussion post about academic matters that is verifiable via the gradebook in the Learning Management System (LMS) (i.e. Blackboard) classroom. Participation in outside systems or software do not count towards the participation requirement and must be showing as a gradable item in the gradebook of the LMS.

Students are required to attend, engage and participate in each of their online course(s) in an active and timely fashion. For each course, a student must participate by submitting their Week 1 assignments/discussion(s) during the first 7 calendar days from the course start date. This policy is the same for both New and Continuing students. If a new or continuing student logs in, but does not participate in any Week 1 activities by the end of day 7 (Eastern Standard Time) of a course, they will be administratively withdrawn from the program and must contact their Enrollment Advisor or Academic Advisor regarding eligibility for readmission. Because of strict accreditation and financial aid regulations, all students are required to actively participate in the course at some point during its first seven days, regardless of any due dates posted on the course's syllabus or any extensions granted by the instructor(s). Active participation is defined as any one of the following: submission of a gradable assignment or submission of a discussion post about academic matters that is verifiable via the gradebook of the LMS classroom. Participation in outside systems or software do not count towards the participation requirement and must be showing as a gradable item in the gradebook of the classroom in the LMS.

Any student who does not actively participate in the course within the first week will be automatically withdrawn.

Attendance by Day 7

By the end of the Day 7 (Eastern Standard Time) of each Course, a student must log into the Blackboard classroom to actively indicate his/her intention to participate in and complete that course. If by Day 7 the student has logged in and submitted an assignment and/or discussion post and has not formally rescheduled his/her start date or withdrawn from the program the student will:

- Be considered as attending the course.
- Be obligated to pay for the course in full or make all payments in accordance with the monthly payment plan.
- Be responsible for adhering to all University policies and course policies.

No Attendance by Day 7

Starting on the first day of each course the Enrollment Advisor or Academic Advisor will contact the student if the student has not yet logged in to the Blackboard classroom, and remind the student to do so. If the student does not log into the Blackboard classroom the end of Day 7 (Eastern Standard Time), the student will be removed from the current course and will no longer be able to attend class. The student will be administratively withdrawn from the term and will need to contact their Enrollment Advisor or Academic Advisor to discuss their options for returning.
If a student is a **new student** and has been administratively withdrawn for lack of participation, the student will need to sit out one (1) term before being eligible to reapply in the future. A student who chooses to remain in the course will be subject to all applicable deadlines as stated in the course syllabus. Active and ongoing participation is required in all courses and lack of attendance may result in failing the course.

If a student is a **continuing student** and the Academic Advisor has been able to contact the student, the student will be encouraged to submit a withdrawal request (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) with a return date to ensure he/she is not withdrawn from the program. A student who chooses to remain in the program will be subject to all applicable deadlines as stated in the course syllabus. Active and ongoing participation is required in all courses and lack of attendance may result in failing the course.

The Enrollment Deposit will remain on the student's account and remains non-refundable. If the student has a tuition balance, it will be voided and reissued on the 1st day of the next course for which the student is registered should the student choose to change their start date.

**Removed from Course Erroneously**

If a student believes he/she has been **removed from the course erroneously**, the student should contact his/her Academic Advisor (https://www.tfaforms.com/433870/) to discuss options.

**No Contact or Response by Day 7**

A student will be designated as a non-starter and will be administratively withdrawn, if a student has not logged into the Blackboard classroom by Day 7 and the Enrollment Advisor or Academic Advising Team has not been able to contact the student. If a student does not log into Blackboard by Day 7 of session 1 of the term, the student will be administratively withdrawn from the term, all courses that are enrolled in for the term (both Session 1 & 2). If a student does not log into Blackboard by Day 7 of Session 2, the student will be administratively withdrawn from Session 2 of the term only. Students will not be registered for future sessions until they meet with their Academic Advisor to discuss future course sequencing/scheduling.

**New Students**

If an Enrollment Advisor does not receive a withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) from the student by Day 7 of the term, the student will be administratively withdrawn from the term. If the Offer of Admission expires, the student will be required to reapply to the program.

**Continuing Students**

If the Academic Advising Team does not receive a withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) from the student by Day 7 of the term, the student will be administratively withdrawn from the program. The student should contact the Academic Advising Team (https://www.tfaforms.com/433870/) if they intend to return in the future and should review the Academic Calendar for all applicable deadlines regarding readmission.

**On-going Attendance**

Students should continue to login and attend class every week. Students who do not participate in their courses as indicated by course requirements, or fail to notify the University that they are no longer attending by submitting a withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com), will be at risk of failing their course. Students who miss more than one week of attendance should contact their instructor immediately and refer to their course syllabus for any late assignment policies. This may result in the requirement for the return of previously awarded federal financial aid. If the University is required to return federal student aid funds, the student will be required to pay any outstanding balance owed the University.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. This Federal Financial Aid calculation is separate and in addition to the Refund Policy and Schedule. If a student has questions pertaining to either policy, they should contact their Academic Advisor (https://www.tfaforms.com/433870/).

**Student Change Requests**

**Reschedule Start Date, Student Initiated**

A new student may not reschedule his/her start date once the offer of admission has been accepted unless a Deferral Exception Appeal Request (p. 2968) has been approved.

Students must submit their Deferral Exception Appeal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?RequestedDynamicFormTemplate=2688d0b9-6031-4812-8f79-84fe37812020) to their Enrollment Advisor and discuss the options and any financial and academic consequences no later than the approved deferral deadline. In extra ordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor for more information regarding the UOnline Student Appeal process.
Choosing to Remain in the Course

If after discussing with their Enrollment Advisor students decide to remain in the course, students’ Enrollment Advisor will confirm this verbal decision with the students formally, in writing via email, reiterating the financial and academic obligations. Students should reply to the email and confirm their wish to remain in the course. Students must submit a withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) if they choose not to remain in their course and should review the Academic Calendar for applicable drop deadlines. Email requests will not be honored.

Choosing to Reschedule

Students who are approved to defer their start date will have their Deferral Exception Appeal Request (p. 2968) form processed and:

- Students will be removed from any courses currently enrolled.
- Students will be enrolled into the courses for the immediate following term from their original start date.
- Students may lose any associated tuition reductions (please see tuition reduction’s terms and conditions).

Students will receive a deferral decision via the electronic form and can confirm with their Enrollment Advisor within 1-2 business days that the start date change has been completed. The student may also view their start date change in Canelink.

The Enrollment Deposit will remain on the student’s account. If a student has received the 1st tuition balance, it will be voided and reissued before the 1st day of the new start date. Students should check the Academic Calendar for future term registration time frames and will not need to complete the Student Readiness Orientation (SRO) a second time as long as the student completed and passed the SRO by the original completion deadline, as per the student’s original acceptance letter.

Financial Obligations After Day 7

If a student does not submit the Withdrawal Request form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) by the end of Day 7, after Day 7 the student will be obligated to pay for the course in accordance with the refund policy and schedule and is not eligible for a credit of tuition towards the rescheduled terms.

Offer of Admission Expired

If a student’s Offer of Admissions has expired, he/she will not be able to reschedule the start date and must reapply to the Program.

Add a Course

Each active student will be registered at least 14 days before each term start into the appropriate course(s) according to the sequence and rules of the program. Any student requested changes will be implemented by 1 day before the course start to ensure proper section and group assignments. New students must contact their UOnline Student Advocate to discuss any changes or concerns about course registration. Continuing students should contact their Academic Advisor to discuss any changes or concerns about course registration. If a student misses the registration deadline for the term, they will need to wait until the following term to register. No late registration requests will be accepted. Students are registered at the beginning of each term for both sessions and no mid-term registration is allowed.

Drop a Course

A student may drop a course only before or by the end of Day 7 (Eastern Standard Time) in order to avoid financial or academic (grading) consequences as per the refund policy and course syllabus.

If a student is a new student, he/she must contact the Enrollment Advisor to discuss the need to drop a course and potentially reschedule the start date if a deferral exception is approved. Due to the scheduling and sequence of courses, new students may need to be dropped from all courses in the term and may need to wait to be rescheduled at the beginning of the next available term for their program.

If the student is a continuing student he/she must contact the Academic Advisor to discuss the need to drop a course and withdraw from the program. In some cases, due to course scheduling and sequence, a student may need to drop all courses from the term and wait to enroll in a future term. Continuing students should work closely with their Academic Advisor to discuss all rescheduling options and ensure they are meeting the required times-to-completion for their program. All students should adhere to the Academic Calendar for registration and drop deadlines. No mid-term registrations are allowed.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. If a student plans to drop a course or to withdraw from their program, they should consult both the Financial Aid withdrawal policy as well as the Refund Policy for UOnline programs to determine their financial responsibilities.
Retaking the Entire Course
If a student is required to retake an entire failed course and/or has achieved a grade lower than the required in a pre-requisite (including an Incomplete "I" grade), the student must submit a Course Retake Appeal Form (https://myonlinesupport.miami.edu/forms/) no later than the Readmission Deadline per the Academic Calendar, and get approved by the program. If approved:

- The student will be re-registered for the failed course the next time it is offered or in the next session
- If the student has already been registered into the next course in the program sequence, the registration will be adjusted.
- The student will be billed the full course tuition.
- The student can receive Financial Aid to pay for the second course retake, but if the student fails and takes the course a THIRD time, Financial Aid will not be available and the student must pay for the course tuition out-of-pocket. A student may contact their Academic Advisor for more information on payment options.

Change of Program
Students may request to change from their current program to another online program. The student must apply to the new program and provide information necessary for admission into that program. The student's Enrollment Advisor will work with the student and the admissions staff to determine if the student is qualified to apply for a new program. Please note that program changes will be implemented as per the University's Online academic calendar deadlines and subject to SRO completion requirements.

If the student is still a new student (has not completed the 1st 7 days from the start date) the student should contact their Enrollment Advisor. If the student is a continuing student he/she should contact the Academic Advisor to discuss all of the options and the new program admissions requirements. Tuition and any applicable tuition discounts that were previously applied to a new or continuing student's balance will be subject to change upon changing the program.

Certificate to Master's Students
Certificate students who are interested in completing the remaining half of the Master's courses must formally apply and get admitted to the Master's program in order to continue. Students should reach out to their Enrollment Advisor after their third Certificate course in order to allow enough time to apply for the Master's degree. There is no guarantee that students will be admitted into the Master's degree and are subject to the same admissions requirements and deadlines as a new applicant. It is the student's responsibility to reach out to the UOnline Enrollment Department for further details on what is needed to apply. Certificate students who apply in their third course and are admitted to the Master's program are waived from the SRO completion requirement for the Master's program.

Non-Standard Change of Program
If a student is eligible to change into a new program, he/she will be registered into the appropriate course and start the new program in the next available term. Approved completed courses will be transferred into the new program. Students will not be charged another enrollment deposit.

If a student does not meet the admissions requirements, the student should continue to work with the Enrollment Advisor or Academic Advising on other options that may be available.

Withdraw from Course but Not Program
If a student needs to withdraw from a course but does not wish to withdraw from the program, the student should contact their Academic Advisor to discuss the academic and financial implications. The student should also review the academic calendar for important dates regarding withdrawal from a course and how the withdrawal will be reflected on the transcript. In some cases, due to course scheduling and sequencing, a student may need to drop all courses from the term and may have to wait longer than one term to be rescheduled. Continuing student should work closely with their Academic Advisor to discuss all rescheduling options and ensure they meet time-to-completion requirements for their program.

If after discussions with the their Academic Advisor the student decides to withdraw from a course, the deadlines for withdrawal, as they appear on the academic calendar, will apply. Additionally, if students withdraw from the course after the "last day to drop without a W" as per the Academic Calendar, they will:

- Be required to pay for the course in accordance with the refund policy and schedule for online programs.
- Receive a Withdraw (W) grade for that course and, for this reason, will remain registered in that course until the course end date so the final grade can be posted to the student's official record.

Students must submit their Withdrawal Request (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) no later than the "last day to drop With a W" as per the Academic Calendar. Any Withdrawal requests submitted after this date will not be processed for the current session. The student will remain in their current course and must be resubmit the Withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) after the course ends in order to be formally withdrawn.
Withdraw from Program

If students are withdrawn from the program this means they are permanently suspended from continuing with their studies. Therefore, students will not be registered for future courses or have access to the online student community, the academic environment or other related program privileges.

If a student is considering withdrawing from the program, he/she should be aware of the financial and academic consequences for doing so. There are different consequences for withdrawing before and after Day 7.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University as per the refund policy and schedule. Students should contact their Academic Advisor before withdrawing to fully understand their financial obligations upon withdrawal.

Student-Initiated Withdraw from Program BEFORE Day 7

Should a student wish to withdraw from the program before, or by the end of Day 7 (Eastern Standard Time) of their first course, students must submit a Withdrawal Form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) by the end of Day 7 (Eastern Standard Time) of their course to make the request. If the student decides to withdraw from the program by end of Day 7 of the current course:

- The student will be removed from their course(s).
- The student will be refunded for the course(s) in accordance with the refund policy for online programs (minus the enrollment deposit).
- The course(s) will not appear on the student’s record.

The effective program withdrawal date will be the date/time the Withdrawal Form was submitted and should be processed within 3-4 business days by the Office of the University Registrar. Should the student’s withdrawal need to be reviewed by other departments, such as Financial Aid, processing time may be extended to 14 business days.

The Enrollment Deposit and some program fees remain non-refundable. If the student received a tuition invoice, it will be recalculated or cancelled in accordance with the refund policy and schedule and effective date of program withdrawal.

Student-Initiated Withdraw from Program AFTER Day 7

If the student would like to withdraw from the program after Day 7 (Eastern Standard Time) of the course start, students must submit a Withdrawal Form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) no later than the “last day to drop with a ‘W’” (Eastern Standard Time) as per the Academic Calendar, of their current course to make the request. If the student decides to withdraw from the program before or after Day 7:

- The student will be removed from any course currently enrolled.
- The student will receive a Withdrawal (W) on the student’s record for their course.
- The effective program withdrawal date will be the date/time the Withdrawal Form was submitted and should be processed within 3-4 business days by the Office of the University Registrar. Should the student’s withdrawal need to be reviewed by other departments, such as Financial Aid, processing time may be extended to 14 business days.

The enrollment deposit and some program fees remain non-refundable. Any tuition payments made by the student for the course through the time of withdrawal will not be applied or credited towards any future courses the student may enroll into. If a student is using Financial Aid, a recalculation of financial aid may be required to determine if any funds need to be returned to Title IV. In this case, the calculation may take up to 45 days from the effective date of withdrawal to appear on the student’s account. Students may check Canelink to review their account and balance. Students must submit their Withdrawal Request (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) no later than the "last day to drop With a W" as per the Academic Calendar. Any Withdrawal requests submitted after this date will not be processed for the current session. The student will remain in their current course and must be resubmit the Withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com) after the course ends in order to be formally withdrawn.

Administration-Initiated Withdraw from Program

The student may be withdrawn from the program for academic progress issues, academic integrity, non-payment or other administrative issues (such as not receiving official transcripts by the deadline). In this event, the student will receive formal notification that he/she will be withdrawn from the program and may owe a balance.

The student will still be responsible for completing payment on any previously taken courses and will be subject to all billing, payment and collections policies.
Withdraw from Institution

If the student requested to withdraw from the program, he/she will be formally withdrawn from the Institution within 1-calendar year/365 days of the effective withdrawal date on record. Until this time, the student may still request to be reinstated to the program under certain circumstances. A student should contact Academic Advising for next steps on reinstatement if they choose to return within one year of withdrawing. Students who submit a withdrawal from the institution will need to reapply and should contact an Enrollment Advisor to help guide the admissions process. Prior coursework is not guaranteed to be applied to any programs upon readmission.

If the student is withdrawn from the program for more than one year (three (3) consecutive terms) he/she will be withdraw from the Institution immediately and may not be reinstated either to the program or Institution. Students who have been withdrawn from their program for more than one year will need to reapply and should contact their Academic Advisor for next steps.

Withdrawal Appeal Process

In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7/) for more information on the UOnline Withdrawal Appeal process. The appeal form must be submitted within 30 calendar days from the date of withdrawal from the University or if the appeal is being submitted for a semester that is completed, the form must be submitted within 30 calendar days of the last day of the end of the semester in question. Students must adhere to the specific documentation requirements as stated on the Appeal Form and submit all required documentation, along with the completed form to univregistrar@miami.edu. A decision will be sent electronically to the email address provided on the Appeal Form within a months time from the date it was received.

Reinstatement to Program

If a student has been withdrawn from the program, he/she may be reinstated to the program if:

- The student was not withdrawn from the program for academic progress or misconduct reasons.
- The student was not withdrawn from the Institution or is not in the process of being withdrawn from the Institution.
- The student has no unpaid tuition balance.
- The student has been withdrawn from the program for less than 1 calendar year (365 calendar days/3 consecutive terms). If the student is withdrawn for more than 1 calendar year, he/she must reapply to the program.

Students may not credit any previously paid tuition to courses they register into once reinstated and should contact their Academic Advisor (https://www.emailmeform.com/builder/form/u0FnTh276J4GycEdxz7/) to discuss the reinstatement process and requirements.

Late Payments, Holds, Collections and Refunds

Late Payment Fees

A payment is considered late if it has not been paid by 1 day after the payment due date. Late fees may be assessed to the student’s account.

University of Miami VA Pending Payment Compliance

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA.

This school will not:

- Prevent the student’s enrollment
- Assess a late penalty fee to the student
- Require the student to secure alternative or additional funding
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class
- Provide a written request to be certified
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

Financial Hold

Students are expected to pay tuition on time. Paying on time ensures timely registration into subsequent courses so that a student can continue to advance toward completing the program. Students must pay for each term in full before they can continue on to the next term.

If a student is 15 or more days past due on 1 or more invoices, he/she will be placed on Student Account/Financial Hold.
If a Student Account/Financial hold is placed, students:

- will be able to complete the current course
- will not be registered into future courses until all outstanding invoices have been paid.
- will not be able to receive transcripts or a diploma

Placement on Student Account Hold
Students will receive a reminder that payment is due as well as overdue. Students will also be notified once a Student Accounts Hold is placed on their account.

Removal From Student Account Hold
Once students have made their overdue payment, the Student Accounts Hold will be removed within 24 hours and students will be registered into the next course in the next available term.

Third Party Collections
The University utilizes third party collections services to collect on unpaid balances.

Refund Schedule
A student who withdraws or is withdrawn from the program may be entitled to a refund according to the rules outlined below.

By or Before Day 7 (Week 1) of Each Course
If a student withdraws from the program by, or before Day 7 (Eastern Standard Time) of a course, he/she will be refunded 100% of tuition paid for that course, excluding the enrollment deposit. If the student withdraws during the refund period and has not yet paid any tuition owed for that course, the Student Accounts Office will cancel the balance for that course.

Day 8-14 (Week 2) of Each Course
If a student withdraws from the program after Day 7, but not later than Day 14, he/she will receive a 50% refund.

Day 15-49 (Week 3-Week 7) of Each Course
If a student withdraws from the program on or after Day 15, he/she will receive no refund and will be obligated to pay for the entire course they are currently enrolled.

The effective withdraw date is:

- If initiated by the student, it is the date the student formally submitted the withdrawal form (https://qafederation.ngwebsolutions.com/sp/startSSO.ping?PartnerIdpId=https://caneid.miami.edu/idp/shibboleth&TargetResource=https://dynamicforms.ngwebsolutions.com)
- If initiated by the Administration, it is the date the administration formally entered/processed the withdrawal.

Overpaid Tuition
After students have withdrawn, if they paid more than what they owed on a course, they will be refunded the difference between what they paid and the amount due as determined by the refund schedule and effective withdraw date. Overpayment tuition refunds are typically processed on or about 14 days after the start of each term; however, in certain circumstances this time frame may be delayed. Students may check their Canelink account to view when refunds have been processed.

Refund Policy and Schedule - Timeline and Methods
All refunds will be paid via the payment method paid and within 30 days of the effective withdrawal date on record.

Ethics, Student Rights and Responsibilities
Students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics, or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project,
form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the student's program and/or the Graduate School. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Graduate Honor Code can be reviewed on the Dean of Students (p. 2988) website.

Disciplinary and Grievance Procedures for Graduate Students

Two types of procedures exist:

- Academic and
- Nonacademic.

Procedures for handling disciplinary and grievance matters are handled by the Graduate Student Appeals Committee. Contact the Graduate School for details about the appeals process. The Graduate School expects an appeal to have gone through the program or department and then the School's Academic Dean prior to its being heard by the Graduate School. The University Ombudsperson may also be consulted. For more information, please refer to the Academic Policies page.

Honors and Awards

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Who's Who Among Students in American Universities and Colleges

The Graduate School solicits nominations for this award annually. Nominations are provided by Graduate Program Directors at the beginning of the spring term.

- Graduate Student Awards
- Graduate Student Organization Award
- GSA Executive Award
- Senate Award
- Academic Award
- Graduate Student Award

Requirements for Commencement

It is the responsibility of the student to apply for graduation through Canelink during the student's final term prior to the deadline for the next commencement ceremony.

Both the dates for commencement and the deadline to apply for graduation are published in the online academic calendar (http://www.miami.edu/index.php/registrar/calendar/). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students will be degree candidates until they have been cleared by the Graduate School.

Participation in the commencement ceremony or the listing of a student's name in the commencement book in no way implies or ensures graduation. A student's graduation is contingent upon successful completion of the degree requirements and approval by the academic school or college.

Commencement ceremonies are held in May and December only. Those students completing degree requirements during the fall, spring, or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving a Ph.D., D.M.A., D.N.P., D.P.T., or Ed.D. degree and plan to participate in the hooding ceremony and all master's students marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the department/school to participate in the ceremonies.

Participation in commencement for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for the program.
2. The student must have a minimum of 3.00 cumulative grade point average;
3. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last term of study must be paid in full by the beginning of the final term.

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:
1. All original documents (transcripts from previous degrees entered on their online application, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one term before graduation. The Graduate School does not require application to candidacy for master’s, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation (if applicable) no later than two weeks before the last day of class in the term he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the term he/she wishes to graduate for their clearance to be processed in time.

Graduate Student Association

The primary function of the GSA is to promote effective graduate student participation in University affairs. The GSA serves as a liaison between graduate students, faculty, and the administration. In addition, the GSA exists as a forum to support and improve the quality of the graduate student environment at the University of Miami. The University of Miami Graduate Student Association is an active member of the National Association of Graduate-Professional Students. All graduate students at the University of Miami are members of the GSA.

Graduate Council

The mission of the Graduate Council is to promote graduate education, scholarship, and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities and to maintain high ethical and academic standards in graduate studies.

Student Resources

Dean of Students Office

The mission of the Dean of Students Office is to foster the personal development of students by providing a range of programs and services that create an optimal learning and living environment. The Graduate Honor Code (https://doso.studentaffairs.miami.edu/_assets/pdf/policies/student_rights_and_responsibilities_handbook.pdf#page=10) and the Student Rights and Responsibilities Handbook (p. 2964) are two methods in which the University encourages ethical behavior in all its students. The Graduate Honor Council is a student organization which investigates violations of the Graduate Honor Code and decides appropriate action. The Dean of Students Office also oversees the University Chaplains Association, which consists of various campus ministries to serve the spiritual needs of students. For more information on these and other services offered by the Dean of Students Office, call 305-284-5353 or visit our website (https://doso.studentaffairs.miami.edu/).

Career Development

The Toppel Career Center assists undergraduate students, graduate students, and alumni in formulating their career plans and in pursuing internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

HireACane.com is a management system where students can access internships, jobs, on-campus recruiting information, career programs, and companies/organizations attending Careers Expos and Fairs. Students can only access these additional online resources by activating and logging into their HireACane.com account.

Student Disability

The Academic Resource Center (ARC) provides academic resources and support to ensure that students with documented disabilities are able to access and participate in the opportunities available at the University of Miami.

All students seeking accommodations for a disability must register with the Office of Disability Services. Students should disclose that they are a UOnline student for fastest processing times. Students should register as soon as possible so that the office has sufficient time to receive and review the necessary documentation and coordinate reasonable accommodations. To register, schedule an appointment with the ARC at 305-284-2374 or e-mail us (disabilityservices@miami.edu).

Before a determination is made regarding a request for accommodations, the student must complete the proper forms and submit current, appropriate, and full documentation of the disability as required by ARC.

SPECIAL PROGRAMS

Miami Semester/Year Program

http://www.miami.edu/miamisemester

The Miami Semester/Year – Visiting Student Program provides the opportunity for degree-seeking students attending other colleges to spend one or two semesters living, studying and doing research at the University of Miami. Domestic and international students may enroll in this program, taking advantage of our diverse academic community, renowned faculty, and beautiful South-Florida landscape.

The Miami Semester/Year – Visiting Student Program is limited to degree-seeking undergraduates in good standing attending other universities and colleges. Participating students will be required to take a minimum of twelve credits.

If an academic area of study is not listed below, please contact the Miami Semester Program Office to inquire if your program of interest is available or can be developed to meet your academic requirements.

Course offerings are subject to change depending on availability.

American Studies

American Studies allows students to select three courses from the American Studies (AMS) Program’s course offerings, and additional classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today’s society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students’ understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Architecture: New Urbanism

The Architecture program allows for students currently majoring in architecture at other colleges and universities to gain perspective of the field in South Florida. Students enroll in six credits of Architectural Design and six to nine credits of related electives or courses in Urban Studies. Students are required to maintain a standard full-load of credits for the spring semester of 12-15 UM credits.

**Office of Professional Advancement - Non Credit Courses**

www.continue.miami.edu/opa

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the:

Office of Professional Advancement, Division of Continuing and International Education  
University of Miami  
111 Allen Hall  
Coral Gables, Florida 33146-1610  
305-284-4000 or  
email opa@miami.edu.  
Additional information on the web (http://www.continue.miami.edu).

**Allergy Diagnostics & Allergen Immunotherapy Training Program**

In collaboration with the University of Miami Division of Continuing & International Education and the Miller School of Medicine. The Allergy Diagnostics & Allergen Immunotherapy Training Workshop gives medical practitioners the training they need to diagnose, treat, and manage patients
with noncomplex, non-life-threatening allergies. The Academy of Allergy & Asthma in Primary Care endorses this program, which fits with its mission
to support primary physicians in better managing their allergy-suffering patient populations.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx? p=214).

Business and Leadership Certificate Programs

The Business Program offerings provide a range of certificates focused on enhancing skills and improving organizational performance. The development of core skills in cutting edge disciplines, with application based learning, will prepare Program participants for profit and non-profit sectors across a broad spectrum of disciplines, including Leadership and Management, Business and Communication Skills, Consulting, Human Resources, Nonprofit, and Meeting and Event Planning.

Leadership Development and Management offerings include Executive Leadership, Fundamentals of Leadership, Managing Cross-Functional Teams, Management and Supervision, Organizational Leadership, and Strategies for successful negotiation. These Programs emphasizes the development and enhancement of vital leadership skills for those tasked with leading organizations, or have the desire to enter into one in the near future.

Business offerings include Ethical Business Decision Making, Alternative Methods of Problem Solving, Group Facilitation, Problem Solving and Decision-Making Strategies. These Programs prepare participants for the skilled, ethical decision-making, problem solving, and critical thinking skills necessary to make informed decisions that create and maintain an ethical work environment.

Human Resources offerings include Managing Organizational Change, Fundamentals of Delivering Training, and Conflict Resolution. These programs emphasize the development and enhancement of key skills for those who have the need and desire to learn how to effectively manage change, present effective training, and resolve workplace conflict to increase employee engagement, productivity, and teamwork.

The Nonprofit Programs are designed to develop and cultivate necessary skills that nonprofit managers to effectively manage challenges often associated with the nonprofit sector. Participants who currently hold a management role, or have the desire to move into a management role within a non-profit organization of any type will elevate skills in Nonprofit Operational Management, Nonprofit Fundraising, Grant Writing, and Fundamentals of Philanthropy.

Meeting and Event Planning Program participants are those tasked with or looking to engage in designing and coordinating any type of organizational meeting or event. Program areas include Fundamentals of Meeting Planning and Event Development and Negotiation Skills for Event Planners. Emphasis is placed on gaining an in-depth understanding of skills that will enable participants to help clients and/or internal organizational departments design and coordinate an effective, multifaceted meeting and/or event that will accomplish the client’s or organizational goals and objectives.

Additional Programs include Innovation and Organizational Consulting. The Innovation Program emphasizes key roles of individual entrepreneurs and organizational innovation in private and public services, design thinking as a problem-solving tool, and understanding communication approaches, leadership practices, and the relationship between the marketing and sales functions in the workplace. The Organizational Consulting Program provides the knowledge needed to think critically and solve problems creatively for an organization based on assessment of the client’s needs.

For a full list of business certificate programs offered, please visit our website (https://www.continue.miami.edu/default.aspx).

Certificate in Happiness Studies (CiHS)

The Certificate in Happiness Studies (CiHS) program is the first and only of its kind. This program explores happiness through the lens of different disciplines - including psychology and philosophy, as well as history, theology, biology, economics, literature, art, and so on. CiHS provides the knowledge and the tools to generate happiness on the individual, interpersonal, organizational, and national levels. The Certificate in Happiness Studies program is a 12- month online experience that includes academic lectures and live webinars, as well as ongoing interactions with faculty and other students.
Certified Professional Coach Program

This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. The Certified Professional Coach Program is a 140 hour, eleven month program designed for those interested in a career in coaching, who also want outstanding training in order to serve clients at the highest level. Additionally, it is designed for leaders, managers, human resource professionals, teachers, or service professionals (doctors, lawyers, counselors, consultants, etc.) who want to dramatically improve their ability to communicate, motivate, inspire, and empower others.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=80).

Coding Boot Camp Certificate

University of Miami (UM) Coding Boot Camp is a 24-week, part-time web development course offered on our Coral Gables campus in partnership with Trilogy Education Services. The full-stack curriculum includes HTML5, CSS3, JavaScript, jQuery, Node.js, Java, Database Theory, MongoDB, Heroku, Git, and more.

For more detailed course descriptions, current schedule and prices, please visit our website (http://www.continue.miami.edu/en/packagedetail.aspx?p=198).

Cyber Security Certificate

University of Miami Division of Continuing and International Education in collaboration with HackerUSA, offers unique hands-on skill based programs in Cyber security. HackerUSA has over 20 years of experience and is a leading educational provider for cyber security training. They bring a wealth of expertise that allows our cyber security programs to be innovative and high quality. Our students will be exposed to the most advanced technologies used today and will gain real practical experience.

For more detailed course descriptions, current schedule and prices, please visit our website. (http://www.continue.miami.edu/en/packagedetail.aspx?sc=108)

Data Analytics Certificate

University of Miami (UM) Data Analytics Boot Camp, in partnership with Trilogy Education Services, is a 24-week, part-time program offered on our Coral Gables campus that will empower you to gain the knowledge and skills to conduct robust analytics on a host of real-world problems. Throughout the course, you’ll be gaining proficiencies on a host of marketable technologies like Advanced Excel, Python, JavaScript, (D3.js, Leaflet.js), HTML/CSS, API Interactions, Social Media Mining, SQL, Tableau, Fundamental Statistics, Machine Learning, R, Git/GitHub and more.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=207).

Digital Marketing Certificate

University of Miami Division of Continuing and International Education in collaboration with HackerUSA, offers the Digital Marketing Boot Camp. This program is designed to jump-start the careers of students who are new to digital marketing, upskill traditional marketers, and reskill career changers. The program will qualify students to work in a variety of digital marketing positions, including Social Media Management, Content Management, SEO Digital Strategy, PPC Management, SEM Campaign Management, and more.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=216).

Electronic Medical Records Specialist Certificate

Manage electronic medical records and gain the professional knowledge to become an essential member of the healthcare team. Learn through hands-on practice sessions using PrimeSUITE®, electronic medical records software. The Program prepares students to sit for the Certified Electronic Health Records Specialist (CEHRS) examination through the National Health Career Association.

For detailed course description, calendar and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=169).

Green Professional Building Skills Training (GPRO) Certificate Program

Offered in partnership with the Urban Green Council, an affiliate of the U.S. Green Building Council (USGBC), the GPRO Certificate Program is taught by GPRO-certified University of Miami instructors who are experienced professionals in the construction industry and are well-informed about sustainability issues. The program is customized for the climate and regional needs of South Florida. Participants learn to use building metrics to
reduce operating costs, improve occupancy rates and raise tenant satisfaction. This knowledge enables them to implement leading-edge practices that reduce energy, water use, and waste, plus make buildings healthier and safer for occupants. The GPRO Certificate Program is offered in partnership with the UM College of Engineering’s Master of Science in Construction Management Program.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=209).

**Human Resources Management Certificate Program**

This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. The curriculum covers the following topics: Strategic Management, Legal and Regulatory Issues; Employment, Planning, and Placement; Benefits and Compensations: Development and Administration; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management. The comprehensive curriculum works for the newcomer as well as the seasoned professional and is especially useful to small and medium-size business owners. (6 months)

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=3).

**IT Training Certificates**

The University of Miami, Division of Continuing and International Education has partnered with IT Training Solutions to offer database and informational technology non-credit certificate programs. IT Training Solution is an international training provider specializing in comprehensive IT Technical and Certification courses. Together we are empowering students to learn complex material and review concepts in an easy to use online, interactive course. We are continually updating the content in these courses to stay current with the trends and new developments in the industry. Each quarter 3-5 new titles are released.

For more detailed course descriptions, current schedule and process, please contact us at 305-284-4000.

**Instructional Design & Technology**

Instructional Design & Technology is an online series of courses designed for education professionals and corporate trainers who are interested in instructional design, alternative instructional delivery systems and designing online courses or modules. It offers professionals the opportunity to bridge the gap between research and practice.

For more detailed course descriptions, current schedule and process, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=206).

**Interior Design Certificate Program**

If you have always had an eye for design, and have a knack for taking an ordinary space and making it feel extraordinary, then the University of Miami Certificate in Interior Design is for you. The Certificate in Interior Design Program offers non-credit courses to those who want to enrich their cultural experiences or who are interested in improving their professional or occupational skills. Taught by industry professionals, our Certificate in Interior Design program focuses on the important fundamentals to enter the design field. A hands-on program, students will learn history of interiors, principles and elements of design, Color Theory, freehand and computer drafting, specification and materials, professional practice, and building a portfolio.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=115).

**Medical Billing and Coding Certificate**

The Medical Billing & Coding Program begins with a standard block of courses necessary to obtain the foundation knowledge needed for certification in billing and coding. Essential sciences are covered in the medical terminology, anatomy & physiology, diagnostic coding, and disease pathology modules. Once these core medical topics are covered, the Program provides the learner with the knowledge and skills needed to perform diagnostic coding, using the ICD-9 and ICD-10 coding systems, and procedural coding. Students will participate in a module specific focusing on CPC® examination preparation.

For detailed course description, current schedule and prices, please visit our website. (http://www.continue.miami.edu/en/packagedetail.aspx?p=182)

**Paralegal Concentration Certificates**

The Paralegal Concentration Certificates provide both beginning and experienced paralegals with expansive educational and professional opportunities. These Practice Area Concentration certificate programs allow paralegals to augment current skills and focus on virtually any area of the law. Choose to specialize in one of the following areas of concentration: Contract law, Business law, Criminal law and Procedures, Bankruptcy law, Intellectual Property, Immigration law, Wills and Trust, Employment law, Real Estate law, and Litigation. Give yourself an edge in today's competitive job market. All Paralegal Concentration courses are available online so students are able to enroll at any time.
Office of Professional Advancement - Non Credit Courses

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=119).

**Paralegal Studies Certificate Program**

The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The Paralegal Program classes are offered weekday evenings at the Coral Gables campus or as a fully online program.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=14).

**Patient Advocacy Certificate Program**

The Patient Advocacy Certificate Program is an eight-module, fully online course that prepares students to confidently take and pass the Board Certified Patient Advocate (BCPA) certification examination. Patient Advocates help patients and their families understand diagnoses, prognoses and outcomes as well as available treatment options. The Patient Advocacy Certificate Program focuses on skill development while ensuring that students are fully informed about the scope of practice of the patient advocate.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=204).

**Personal Financial Planning Certificate Program**

Designed for students preparing for professional examinations and professional practice in personal financial planning.

Our program consists of providing the highest quality CFP education through Dalton Education, a leading provider of innovative education solutions in financial planning. The founders of Dalton Education have helped thousands of financial professionals earn the CFP® certification marks with their leading CFP review course, THE DALTON REVIEW®. Students can choose from an independent, self-paced, online education program or a live, instructor-led, internet-delivered program.

For more detailed course descriptions, current schedule and prices, please visit our website (https://www.continue.miami.edu/default.aspx).

**Post Baccalaureate Certificate in Computer Sciences**

The Post Baccalaureate Certificate in Computer Science (PBC) is a non-credit program designed for people with a Bachelor of Science degree in another discipline, who wish to learn the core skills of Computer Science. Completion of the PBC will provide opportunities to apply computational techniques in other areas, to change career paths towards computing, or to continue on to graduate student in Computer Science.

The PBC includes courses in programming, computer architecture and systems, some mathematics, and an elective chosen from the many courses available in the Department of Computer Science. By completing this one-year non-credit program, students will obtain the knowledge and skills at the heart of Computer Science, opening the doors to new and exciting opportunities. Students will be able to:

- Write efficient computer programs using appropriate data structures.
- Use their understanding of computer organization and architecture to select and utilize computer systems effectively.
- Use UNIX-based computer systems, and write programs that make use of the UNIX operating system.
- Characterize the underlying theory of computational systems.
- Discuss and write about a range of topics in Computer Science (as presented in seminars).
- Use basic mathematics in the development of computer software.

Pre-requisites for the PBC program are a Bachelors Degree, Calculus I, and Computer Programming I (or equivalent). Credit can be given for prior study. At least 15 credits of PBC courses must be completed at the University of Miami.

For more detailed course descriptions, current schedule and prices, please visit our website (http://www.continue.miami.edu/en/packagedetail.aspx?p=196).

**Project Management Professional Certificate (PMP®)**

This program satisfies the educational requirement needed to qualify to take the Project Management Professional (PMP®) exam. Learn the core competencies of project management, following the Project Management Institute’s A Guide to the Project Management Body of Knowledge, (PMBOK® Guide). Become proficient in the knowledge areas, process groups, skills and techniques delineated in the PMBOK® Guide to execute projects effectively and efficiently through all stages.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=150).
SHRM® Certification Course (SHRM-CP™/SHRM-SCP™)

Establish yourself as a globally-recognized human resource expert by earning the new standard in HR Certification: SHRM Certified Professional (SHRM·CP®) and SHRM Senior Certified Professional (SHRM·SCP®). Designed for SHRM credential candidates, this course will expand and test your knowledge of practical, real-life competencies in areas critical for HR career success. Combining expert instruction with the SHRM Learning System® for SHRM·CP®/SHRM·SCP®, you will learn faster, retain more knowledge, and stay on track for success on the exam.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=161).

Social Media Management Education Program

University of Miami is proud to offer a Social Media Professional Certificate and Social Media Strategist Certificate through Dalton Education. This is a cutting edge program, designed to teach the business applications of social media communications. This self-paced online program is convenient, practical, and affordable with the flexibility to begin at a time that works best for you.

For more detailed course descriptions, current schedule and prices, please visit our website (http://continue.miami.edu/en/packagedetail.aspx?p=141).

Study Abroad

www.studyabroad.miami.edu

Dept. Code: SAP

With over 60 unique opportunities overseas during the summer, fall, spring and intersession terms, students have options to study abroad on UM programs that align with their individual academic interests. Programs are open to sophomores, juniors, and seniors who meet posted eligibility requirements for admission such as minimum cumulative GPA. Students can live and learn abroad through short term and long term programs with UM faculty or at UM partner universities overseas. Programs with UM faculty are unique in their emphasis on experiential learning, pre-arranged group housing, excursions, and courses taught by UM professors and overseas academic experts. Examples of these programs include UM semester-on-locations in Prague, Shanghai, Paris, Latin America, Cape Town, India, the Galapagos, and Rome, as well as short term faculty-led programs during the summer, January intersession, and spring break in Europe, Asia, Africa, and South America. In some programs it is possible to earn graduate credit hours for study taken abroad.

Academics

The Schools and Colleges at UM encourage study abroad options for their students. Students are advised to plan as early as freshman year so studying abroad can be incorporated into their academic plan. With the assistance of the Study Abroad Office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Students can apply their courses abroad to their majors, minors, cognates, or elective credits with careful planning and academic department approval; the curriculum must be worked out by the student in conjunction with an advisor.

Students receive UM credit hours and grades while studying at any of UM's partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study Aboriginal studies at University of Sydney, be immersed in Spanish culture in Seville, explore Iceland's unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at University of San Andres in Argentina. Many of these programs are delivered in English so foreign language proficiency is not required for UM study abroad opportunities.

Students enrolled in any study abroad program at a partner institution may not earn 25 percent or more of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning 25 percent or more of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

Finances

Students who participate in UM Study Abroad programs will receive UM grades and credits and are able to use their existing financial aid and scholarships towards semester program costs.

The cost of studying abroad varies depending on the type, length, and location of the program. Students are often surprised at how affordable studying abroad can be. Participants are charged full tuition for the term abroad and the financial aid package will be adjusted based on the estimated expenses of the program. Students participating in UM study abroad programs will be able to use their financial aid and scholarships abroad.

As studying abroad is seen as such an important aspect of a college career, many national and institutional scholarships are available. Interested students should begin to research scholarship opportunities early. The most prestigious study abroad scholarships, which grant up to $10,000 per
semester, have applications with deadlines up to 18 months before the study abroad program begins. Several other scholarships, with deadlines similar to program application deadlines, are also available and grant up to $5,000. Learn more about finances and scholarships by visiting the Study Abroad website, speaking with the advisors in the Study Abroad Office and the Office of Financial Assistance Services.

For additional information, contact:

Office of Study Abroad
Dooly Memorial Classroom Building, Suite 125
Coral Gables, FL 33146
Tel: 305-284-3434
Email: studyabroad@miami.edu
Website: studyabroad.miami.edu (http://www.studyabroad.miami.edu/)

Non-UM Programs

Students who study through a non-UM program, domestic or study abroad, and would like to have those credit hours applied toward their UM degree, must apply for Non-UM Program status. For more specific information on the Non-UM program process please see the Non-UM Study Abroad Program Policy and Steps. (https://studyabroad.miami.edu/explore-our-programs/types-of-programs/non-um-programs/)

As of July 1, 2017, the non-UM fee is $350 per semester.

Summer Scholars Program

http://www.miami.edu/ssp

As one of the nation’s most active research universities, the University of Miami specializes in innovative thinking and great teaching – a combination that is showcased in the Summer Scholars Program (SSP). Students learn from distinguished UM faculty and study in classes that connect classroom ideas and hands-on learning in our exciting precollege programs.

SSP is designed to expose high school students to university academics and campus life before commencing undergraduate studies. Students can attend the Summer Scholars Three-Week Credit Program to earn college credit or the UM Academies Two-Week Non-Credit Program for an immersive academic experience. Residential and commuter options are available.

Interested high school students should seek further information and application requirements (http://www.miami.edu/ssp/).

Summer Scholars Three-Week Credit Program

The Summer Scholars Three-Week, Credit Program is open to rising high school juniors and seniors. Courses are taught by UM faculty. Each academic specialty consists of two courses (3 credits each) for a total of 6 credit hours.

UM Academies Two-Week Non-Credit Program

The UM Academies Two-Week Non-Credit Program is open to rising high school sophomores, juniors and seniors. Courses are taught by UM faculty in an engaging academic setting that allows students to get hands-on with their academic passions and explore college life. Students enroll in one course (non-credit).

Summer Sessions and InterSessions

http://www.miami.edu/summersessions

Summer Sessions

The Summer Sessions program at the University of Miami is an exceptional opportunity for students to enhance their educational goals in a concentrated time period and for the South Florida community to take part in some of the innovative and unusual courses taught by outstanding faculty and well-known guest lecturers.

InterSession - Special Academic Programs

- January (First) and Spring Break (Second) InterSessions (http://www.miami.edu/intersession/)
- Summer A (First) and Summer B (Second) InterSessions (https://www.dcie.miami.edu/credit-degree-programs/summer-credit-sessions/summer-intersection-clases/)

January, Spring Break, Summer A (May), and Summer B (June) InterSessions are short term credit hour courses designed so you can concentrate fully on topics not normally offered during regular semesters; getting individual quality time with distinguished faculty members; and sharing knowledge with other students.

Tuition charges for January and Spring Break InterSession are separate from and in addition to your spring tuition charges (ARE NOT included in the full time 12-20 credit hours "Flat Rate" of Spring Semester).

Due to the intense format of the InterSession courses, there are special drop and refund policies.

Grades:

Official grades for January (First) InterSession and Spring Break (Second) InterSession courses will be provided with the spring semester grades in May. Official grades for Summer InterSession classes will be provided at the end of the summer session in which they are offered.

Accounting Business Administration (ACC)

**ACC 211. Principles of Financial Accounting. 3 Credit Hours.**
Course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ACC 212. Managerial Accounting. 3 Credit Hours.**
Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.
Prerequisite: ACC 211 or ACC 221 or ACC 223 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ACC 221. Accelerated Principles of Financial Accounting. 3 Credit Hours.**
This course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. This course is not open to students with credit for ACC 211.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**ACC 222. Accelerated Managerial Accounting. 3 Credit Hours.**
This course provides an introduction to managerial/cost accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective. This course is not open to students with credit in ACC 212.
Prerequisite: ACC 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**ACC 223. Principles of Financial and Managerial Accounting. 4 Credit Hours.**
This course provides an introduction to financial and managerial accounting. Since this course focuses on accounting’s role in providing information for management decisions, it also includes techniques for planning and controlling business operations to achieve company goals. Topics include the accounting cycle, financial statements, and financial ratios. From a managerial perspective, topics include job-order, process costing, activity-based costing, cost behavior, cost volume profit analysis, budgets, variances, and capital budgeting.
Prerequisite: MTH 161 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**ACC 301. Cost Accounting. 3 Credit Hours.**
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.
Prerequisite: ACC 212 or ACC 222 or ACC 223 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
ACC 311. Intermediate Accounting I. 3 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with
generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements
with brief coverage of the statement of cash flows.
Prerequisite: ACC 212 Or ACC 223 or Pre/Corequisite: ACC 222 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ACC 312. Intermediate Accounting II. 3 Credit Hours.
A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income
taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 315. Accounting for Health Care Organizations.. 3 Credit Hours.
This course develops a working knowledge of the financial accounting and reporting processes in health care, services industry, and governmental
organizations. Focus is on accounting in health care, service industry and for-profit organizations. This will not count as an accounting course for
accounting majors and will not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
Prerequisite: ACC 212 or ACC 222 and Requisite: HSMP major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 402. Auditing. 3 Credit Hours.
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally
accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of
internal control, audit evidence, documentation, and audit reports.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 403. Fundamentals of Taxation. 3 Credit Hours.
Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property
transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the
basic income tax formula including income exclusion, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are
also introduced.
Prerequisite or Corequisite: ACC 311 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 404. Advanced Taxation. 3 Credit Hours.
Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax
planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction
to estate and gift taxation.
Prerequisite: ACC 403 and Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 406. Accounting Systems. 3 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as
well as manual systems. Micro computers are used as a learning tool.
Prerequisite: ACC 311 And Requisite: BUSINESS SCHOOL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ACC 411. Advanced Accounting. 3 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships.
Prerequisite or Corequisite: ACC 312 AND Requisite: Business School and Junior Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 496. Directed Studies in Accounting. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 497. Directed Studies in Accounting. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 498. Special Topics in Accounting. 3 Credit Hours.
Special topics in selected non-STEM areas of Accounting.
Requisite: Business School And Junior Or Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 499. Special Topics in Accounting. 3 Credit Hours.
Special topics in selected STEM areas of Accounting.
Requisite: Business School And Junior Or Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 506. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 522. Advanced Issues in Auditing. 3 Credit Hours.
Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Prerequisite: ACC 402. And Requisite: Accepted into the Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 524. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.
Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 530. International Financial Reporting Standards. 1 Credit Hour.
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
Prerequisite: ACC 312 and Requisite: Accepted into the Accounting Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 550. Accounting Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.
Requisite: Business School.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 555. Accounting Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors Accounting.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

ACC 572. Advanced Financial Analysis. 2 Credit Hours.
This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Prerequisite: ACC 312. And Requisite: Accepted into the Accounting Accelerated Program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.
The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.
Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys of accounting literature.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.
Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.
An exploration of complex financial reporting issues using the case method.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.
Course covers four major segments. First, it reviews the basic concepts and too ls associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.
Prerequisite: ACC 301. Or ACC 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 606. Internal Auditing. 2 Credit Hours.
Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.
Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 607. Financial Accounting and Reporting. 3 Credit Hours.
Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 608. Managerial Accounting. 3 Credit Hours.
Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.
Prerequisite: ACC 607.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 610. Financial Reporting Research. 2 Credit Hours.
The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 611. Auditing Seminar. 2 Credit Hours.
Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.
Prerequisite: ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 616. CPA Review I. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida’s educational requirements for taking the CPA exam.
Prerequisite: ACC 411.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 617. CPA Review II. 3 Credit Hours.
The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida’s educational requirements for taking the CPA exam.
Prerequisite: ACC 411.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 620. Accounting Controls in Information Technology. 2 Credit Hours.
The course develops students’ understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
Prerequisite: ACC 406. Or ACC 636.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ACC 622. Advanced Issues in Auditing. 3 Credit Hours.
The course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.
Prerequisite: ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 623. International Accounting and Taxation. 2 Credit Hours.
The course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.
Prerequisite: ACC 211. Or ACC 600. Or ACC 607. Or ACC 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.
The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 626. Litigation and Advisory Services. 2 Credit Hours.
The course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. Students will learn about different investigative techniques for quantifying fraud, and how fraud can be detected and prevented as well as the accountants’ role in litigation, such as acting as expert witness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ACC 627. Accounting Regulations and Compliance. 2 Credit Hours.
This course is designed to expose and educate students in a number of rules and regulations faced by the accounting profession, with an emphasis on the financial industry. This course will cover in moderate depth, regulatory agencies and the compliance of the regulations the agencies are charged with upholding. Students will also be exposed to regulatory and compliance programs, bribery and corruption acts such as the Foreign Corrupt Practices Act and the UK Bribery Act, and various anti-money laundering provisions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 628. Introduction to Accounting Analytics. 2 Credit Hours.
This course introduces students to applications of data analytics techniques in accounting which includes: financial reporting, managerial accounting, taxation, and auditing.
Prerequisite: ACC 301. And ACC 402. And ACC 403.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.
This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.
Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 632. Intermediate Accounting I. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Prerequisite: ACC 211. And ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.
The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.
Prerequisite: ACC 311. Or ACC 632.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.
Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ACC 635. Auditing. 2 Credit Hours.
Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 311. Or ACC 632. And ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.
Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.
Prerequisite: ACC 211. And ACC 212.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 639. Income Taxation and Business Entities. 2 Credit Hours.
This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.
Prerequisite: ACC 403. Or ACC 673.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ACC 640. Corporate Taxation I. 2 Credit Hours.
Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 641. Corporate Taxation II. 2 Credit Hours.
An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.
Prerequisite: ACC 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.
Investigation of current topical areas in taxation.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.
Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 645. Partnership Taxation. 2 Credit Hours.
Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 647. Estates and Gift Taxes. 2 Credit Hours.
Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent's gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.
Prerequisite: ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 648. Financial Reporting Implications of Income Taxes.. 2 Credit Hours.
This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)
Prerequisite: ACC 312. Or ACC 633. And ACC 404. Or ACC 639.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 649. Issues in Tax Policy. 2 Credit Hours.
This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.
Prerequisite: ACC 403. Or ACC 673.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 650. Accounting Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.
Prerequisite: ACC 312. Or ACC 633.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.
This course covers Managerial Accounting concepts applied to health care organizations. Topics include cost allocation and management control systems.
Prerequisite: ACC 212. Or ACC 608. Or ACC 671.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.
This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.
Prerequisite: ACC 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.
This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 665. Health Care Financial and Managerial Accounting. 2-3 Credit Hours.
This course covers managerial and financial accounting concepts applied to health care organizations. Topics include cost allocation and management control systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 666. Accounting for Sustainability. 2 Credit Hours.
Most large firms now report metrics of progress towards the firm's goals with respect to environmental, social, and governance (ESG) aspects of sustainability, often integrating sustainability reporting with financial reporting. The course examines the value of sustainability reporting in terms of indicating efficiency, risk, and brand capital. The course analyzes emerging metrics for sustainability and emerging reporting systems. The course also examines SEC and other regulations for reporting sustainability, and how such reporting is viewed by stakeholders.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 670. Financial Reporting and Analysis. 2 Credit Hours.
The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student's ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student's ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 672. Advanced Financial Analysis. 2 Credit Hours.
Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.
Prerequisite: ACC 211. Or ACC 607. Or ACC 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.
This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, inclusions, statutory deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students' appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.
Prerequisite: ACC 312. Or ACC 633.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.
Internal control is the process by which owners influence manager's of organization to implement the organization's strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.
Prerequisite: ACC 301. Or ACC 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 677. Forensic Accounting. 2 Credit Hours.
This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.
Prerequisite: ACC 312. Or ACC 633. And ACC 402. Or ACC 635.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.
The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.
The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.
Prerequisite: ACC 681.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 683. Taxation. 4 Credit Hours.
The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.
The objective of the course is to develop students’ understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.
This course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ACC 686. Auditing. 4 Credit Hours.
Course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.
The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 688. Advanced Accounting and Financial Reporting. 4 Credit Hours.
The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.
Prerequisite: ACC 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ACC 689. Current Issues in Accounting. 4 Credit Hours.
Current issues in accounting focuses on international financial reporting standards and accounting for governmental and not-for-profit organizations. This course introduces core concepts and tools of accounting and financial reporting for managers of global, governmental, and not-for-profit organizations.
Prerequisite: ACC 682.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 690. Fraud and Forensic Accounting: Ethics and Legal Environment. 4 Credit Hours.
This course focuses on conducting fraud examinations and includes discussion of procedures used in forensic accounting examinations and the rationale supporting such procedures.
Prerequisite: ACC 682 And ACC 685.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ACC 698. Selected Topics. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.
Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ACC 701. Empirical Accounting Research I. 3 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: THI.
Grading: GRD.
Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 0-3 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. Prerequisite: ACC 701 or permission from the instructor.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.
This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.
This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, an empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ACC 825. Comprehensive Test Preparation. 1-3 Credit Hours.
Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ACC 826. Introduction to Textual Analysis in Accounting Research. 3 Credit Hours.
This course will provide students with essential practical skills to apply popular textual analysis methods and help develop understanding of the key concepts and challenges associated with textual analysis and data analysis.

Components: SEM.
Grading: GRD.
Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their qualifying examinations they may take the maximum allowable credit stated above.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
Aerospace Studies (AIS)

AIS 101. Heritage and Values 1. 1 Credit Hour.
This course provides an introduction to the Air Force, hopefully encouraging students to pursue an AF career or at least seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. As a foundational course, this course also provides a historical perspective such as lessons on war and US military, AF operations, principles of war, and airpower (see the complete lesson list below). As a whole, this course provides students with a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. Students will be introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. A succinct perspective of the course objective is to sell the AF as a career and lay a strong foundation built on AF Core Values.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 102. Heritage and Values 2. 1 Credit Hour.
A continued introduction to the Air Force, hopefully encouraging students to pursue an AF career or at least seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values. As a foundational course, this course also provides a historical perspective such as lessons on war and US military, AF operations, principles of war, and airpower (see the complete lesson list below). As a whole, this course provides students with a knowledge-level understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. Students will be introduced to the Air Force way of life and gain knowledge on what it means to be an Airman. A succinct perspective of the course objective is to sell the AF as a career and lay a strong foundation built on AF Core Values.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AIS 150. Leadership Laboratory. 0 Credit Hours.
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment 155 Commander and Operations Flight Commander.
Components: LAB.
Grading: CNC.
Typically Offered: Fall & Spring.

AIS 201. Team and Leadership Fundamentals I. 1 Credit Hour.
This course is designed to provide a fundamental understanding of both leadership and team building. It is imperative that cadets are taught from the beginning that there are many layers to leadership, including aspects that don't always jump to mind. Such things include listening, understanding themselves, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management. Students should demonstrate basic verbal and written communication skills. Cadets will apply these lessons at Field Training.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 202. Team and Leadership Fundamentals 2. 1 Credit Hour.
This course is designed to provide a fundamental understanding of both leadership and team building. It is imperative that cadets are taught from the beginning that there are many layers to leadership, including aspects that don't always jump to mind. Such things include listening, understanding themselves, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management. Students should demonstrate basic verbal and written communication skills. Cadets will apply these lessons at Field Training.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
AIS 301. Leading People and Effective Communication I. 3 Credit Hours.
A continued course designed to build on the leadership fundamentals taught in previous level courses. The cadets will have the opportunity to utilize their skills as they begin more of a leadership role in the detachment. The goal is for cadets to have a more in-depth understanding of how to effectively lead people, and provide them with the tools to use throughout their detachment leadership roles. Secondly, cadets will hone their writing and briefing skills. Many of the cadets will be uncomfortable with public speaking, and this semester is designed to get them used to briefing. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 302. Leading People and Effective Communication 2. 3 Credit Hours.
A continued course designed to build on the leadership fundamentals taught in previous level courses. The cadets will have the opportunity to utilize their skills as they begin more of a leadership role in the detachment. The goal is for cadets to have a more in-depth understanding of how to effectively lead people, and provide them with the tools to use throughout their detachment leadership roles. Secondly, cadets will hone their writing and briefing skills. Many of the cadets will be uncomfortable with public speaking, and this semester is designed to get them used to briefing. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AIS 401. National Security, Leadership Responsibilities and Commissioning Preparation 1. 3 Credit Hours.
Cadets enrolled in this course should comprehend the basic elements of national security policy and process. The student should comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. The final semester of this course is designed to prepare cadets for life as a second lieutenant. This is a great time for instructors to include any information they feel would help their cadets as they transition from military life to civilian life.
Corequisite: AIS 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AIS 402. National Security, Leadership Responsibilities and Commissioning Preparation 2. 3 Credit Hours.
Cadets in this course should comprehend the basic elements of national security policy and process. The student should comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. Africana Studies (AAS)

AAS 150. Introduction to Africana Studies. 3 Credit Hours.
Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

AAS 260. History of Slavery in the Atlantic. 3 Credit Hours.
The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

AAS 290. Special Topics. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
AAS 350. Black Leadership in the U.S.. 3 Credit Hours.
Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.
Prerequisite: 3 Credits in AAS.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

AAS 390. Special Topics. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

AAS 490. Senior Seminar in Africana Studies. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

American Studies (AMS)

AMS 101. Introduction to American Studies. 3 Credit Hours.
An interdisciplinary approach to American Studies with attention to a particular theme or period.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

AMS 301. Topics in American Studies. 0-3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 310. The United States in the World. 3 Credit Hours.
The culture and history of the United States in a global framework.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 321. Topics in American Studies: History. 3 Credit Hours.
This course explores the field of history (including the study of experiences, texts, and theoretical aspects of individual and cultural pasts) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 322. Topics in American Studies: Literature. 3 Credit Hours.
This course explores the field of literature (including the study of experiences, texts, and theoretical aspects of literary expression) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 323. Topics in American Studies: Politics. 3 Credit Hours.
This course explores the field of politics (including the study of experiences, texts, and theoretical aspects of polity or institutional governance) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 324. Topics in American Studies: Religion. 3 Credit Hours.
This course explores the field of religion (including the study of experiences, texts, and theoretical aspects of religious beliefs and institutions) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
AMS 325. Topics in American Studies: Law. 3 Credit Hours.
This course explores the field of law (including the study of experiences, texts, and theoretical aspects of jurisprudence and legal culture) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 326. Topics in American Studies: Education. 3 Credit Hours.
This course explores the field of education (including the study of experiences, texts, and theoretical aspects of literacies and the education of individuals and communities) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 327. Topics in American Studies: Film. 3 Credit Hours.
This course explores the field of film (including the study of experiences, texts, and theoretical aspects of cinematic expression) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 328. Topics in American Studies: Music. 3 Credit Hours.
This course explores the field of music (including the study of experiences, texts, and theoretical aspects of musical composition and expression) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 329. Topics in American Studies: Art. 3 Credit Hours.
This course explores the field of art (including the study of experiences, texts, and theoretical aspects of aesthetics and creative expression) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 330. Topics in American Studies: Sociology. 3 Credit Hours.
This course explores the field of sociology (including the study of experiences, texts, and theoretical aspects of human engagements in society) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 331. Topics in American Studies: Geography. 3 Credit Hours.
This course explores the field of geography (including the study of experiences, texts, and theoretical aspects of spatial and regional studies) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 332. Topics in American Studies: Anthropology. 3 Credit Hours.
This course explores the field of anthropology (including the study of experiences, texts, and theoretical aspects of human cultural development) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 333. Topics in American Studies: Environmental Studies. 3 Credit Hours.
This course explores the field of environmental studies (including the study of experiences, texts, and theoretical aspects of environmentalism and sustainability) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
AMS 334. Topics in American Studies: Ethnic Studies. 3 Credit Hours.
This course explores the field of ethnic studies (including the study of experiences, texts, and theoretical aspects of racialized ethnic groups) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 335. Topics in American Studies: Women's and Gender Studies. 3 Credit Hours.
This course explores the field of gender studies (including the study of experiences, texts, and theoretical aspects of gender) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 336. Topics in American Studies: LGBTQ Studies. 3 Credit Hours.
This course explores the field of LGBTQ studies (including the study of experiences, texts, and theoretical aspects of LGBTQ individuals and groups) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 337. Topics in American Studies: Cultural Studies. 3 Credit Hours.
This course explores the field of cultural studies (including the study of experiences, texts, and theoretical aspects of culture/cultural groups) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 338. Topics in American Studies: International Studies. 3 Credit Hours.
This course explores the field of international studies (including the study of experiences, texts, and theoretical elements emerging from international or global arenas) in relation to a U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 339. Topics in American Studies: Urban Studies. 3 Credit Hours.
This course explores the field of urban studies (including the study of experiences, texts, and theoretical aspects of urban or city life) within and in relation to the U.S. context. Specific focus and content vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

AMS 350. History and Culture of South Florida. 3 Credit Hours.
The history and culture of South Florida from a multidisciplinary perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

AMS 399. Independent Study. 1-3 Credit Hours.
By arrangement with instructor; content varies.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.

AMS 401. Seminar in American Studies. 3 Credit Hours.
Content varies by semester.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

AMS 499. Independent Study. 3 Credit Hours.
By arrangement with instructor; content varies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.
AMS 501. Senior Project. 3 Credit Hours.
All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

AMS 505. Honors Thesis. 3 Credit Hours.
American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505: honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

Anthropology (APY)

APY 100. Introduction to Forensic Investigation (EXP). 3 Credit Hours.
Students will go into the field to gain an introductory understanding about skeletal identification and crime lab processes.
Requisite: Plan of Summer Scholar Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 101. Introduction to Anthropology. 3 Credit Hours.
A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 105. HIV: Sex, Science, and Society. 3 Credit Hours.
The important role that science plays and has played in ameliorating suffering for mankind. We will include an analysis of the scientific, human, and policy-related issues associated with HIV/AIDS.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 109. Anthropology of Religion. 3 Credit Hours.
Through themes such as myth, word and text, symbol, gender, pilgrimage, embodiment, and ritual, students learn about lived religion through anthropological research and field methods. The course also exposes introductory-level students to diverse world religious traditions: Korean folk religion, Indonesian Islam, Hinduism in diaspora, Judaism across cultures, Japanese temple Shinto traditions, and more.
Components: LEC.
Grading: GRD.

APY 200. Introduction to Forensic Anthropology (EXP). 3 Credit Hours.
Students will learn the basics of the human bone structure and how it relates to anthropology and forensic studies.
Requisite: Plan of Summer Scholar Program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 201. Principles of Archaeology. 3 Credit Hours.
History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 202. Principles of Cultural Anthropology. 3 Credit Hours.
Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
APY 203. Principles of Physical Anthropology. 3 Credit Hours.
The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 204. Principles of Linguistic Anthropology. 3 Credit Hours.
Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 205. Medicine and Health Care in Society. 3 Credit Hours.
A sociohistorical analysis of the intersection between medicine, health care and society, using examples throughout the world. It will reflect on 'taking-for-granted' concepts such as the 'body, risk, illness and healing' and their relationships to culture, power, and society, as well as the plurality of narratives and discourses on health and healing practices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 208. Short-Changed in the City. 3 Credit Hours.
Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 230. The Sounds of the World’s Languages. 3 Credit Hours.
The range of sounds produced by the speakers of the world’s languages. An introduction to phonetics, with a focus on acoustically-oriented methods used in contemporary phonetics.
Prerequisite: APY 204.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 301. World Prehistory. 3 Credit Hours.
The global prehistoric record, with emphasis on the development of social complexity and ancient states.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 302. Ethnographies of Black Life. 3 Credit Hours.
Themes that have shaped Anthropology’s engagement with Black Life. Critique between Black Studies and the social Sciences with particular focus on the discipline of anthropology, interrogation of the methods and theoretical frameworks employed to empirically distill the social conditions and political formations of black diasporic peoples.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

APY 306. Human Evolution. 3 Credit Hours.
The macroevolution of humans using the fossil record of vertebrates, including the development of uniquely human behavioral and anatomical adaptations, and of diversity in living populations.
Prerequisite: APY 201 or APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
APY 307. Human Adaptation. 3 Credit Hours.
Human biological adaptation to different environments and stress is examined anthropologically within an evolutionary framework. Mechanisms of adaptation to temperature extremes and other climatic variables, high altitude, disease, nutritional stress, urbanization, extraterrestrial conditions, and other environmental challenges are described in relation to biological and behavioral variations among human populations. The limits of human performance and human adaptive potential in the present and future are explored.
Prerequisite: APY 201 and APY 202 and APY 203 and BIL 101 and BIL 109.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 309. Evolution of Human Behavior. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 310. Primate Behavior and Adaptation. 3 Credit Hours.
The taxonomy, distribution, anatomy, social behavior and adaptations to habitats of human and non-human primates as seen from an evolutionary perspective.
Prerequisite: APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 312. Primate Cognition. 3 Credit Hours.
Examination of the cognitive capacities of non-human primates and the implications of current research for understanding the evolution of human cognition. Example topics include knowledge of categories, space and quantities; curiosity and innovation; causality and mechanical reasoning; memory and planning; theory of mind; imitation and culture; and communication and language.
Prerequisite: APY 203 or APY 310 Or PHI 246 Or PSY 250.
Components: LEC.
Grading: GRD.

APY 315. Folk and Alternative Medicine. 3 Credit Hours.
Historical and cultural backgrounds of health therapies, including theoretical bases of traditional ethnomedical, nonwestern, and complementary medical systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 320. The Evolution of Language. 3 Credit Hours.
Popular contemporary hypotheses on the origins and development of language.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 340. Marine Archaeology. 3 Credit Hours.
Location, excavation, and study of submerged sites.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 345. Blood and Chocolate: Ancient Civilizations of Mesoamerica. 3 Credit Hours.
An archaeological approach to understanding the major pre-Columbian cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis on the ancient Maya. The particular accomplishments of this area such as the domestication of chocolate and corn, hieroglyphic writing, and elaborate sacrificial rituals will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 356. Florida Archaeology. 3 Credit Hours.
Archaeological remains of ancient cultures in the Florida peninsula, from initial occupation to the Colonial Period.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
APY 360. Anthropology of Food. 3 Credit Hours.
Evolution of human diet, basic nutrition, food taboos, effects of domestication, effects of diet on skeletal remains, analysis of your own food habits, and the impact of certain foods on the biocultural evolution of our species.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 361. Gender and Language. 3 Credit Hours.
The ways in which language is used in the constitution of gender from a cross-cultural perspective. Course is co-listed with WGS 361.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 362. The Languages of the World. 3 Credit Hours.
The world’s languages. The primary focus is on major differences and similarities among the structural properties of languages from diverse regions and linguistic families. In short, an introduction to linguistic typology.
Prerequisite: APY 204.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 376. Economic Anthropology. 3 Credit Hours.
The structure and operation of the small-scale economy in the social system is examined. The interrelationship between social and economic systems, and the formation of non-market economies.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 377. Anthropology of Political Systems and Discourse. 3 Credit Hours.
Political systems and processes in tribal societies, with special emphasis on dispute settlement, the organization of political control, and the use of oratory. Case studies from Latin American and African examples.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 384. Caribbean Archaeology. 3 Credit Hours.
An examination of human lifeways in the Antillean archipelago from first settlement through the development of complex socio-political structures in the Late Ceramic Age and ultimately the arrival of European and African migrants.
Prerequisite: APY 201.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 385. Caribbean Cultures. 3 Credit Hours.
Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 390. Dead Bodies & Bioethics. 3 Credit Hours.
The ethical dilemmas faced by those who work or interact with dead bodies. We will explore dead bodies in multiple forms-decomposing, skeletonized, mummified, plastinated, etc. to address such topics as commercialization, public display, heritage and dark tourism, politicization, exhumation, consent, ownership, violence, and descendant communities. Our approach will be an anthropological one, though we will also draw from the fields of medicine, philosophy, law, history, and the humanities.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 391. Gender in Ancient Cultures. 3 Credit Hours.
A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
APY 392. Sex and Culture. 3 Credit Hours.
A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 393. Drugs and Culture. 3 Credit Hours.
Cross cultural review of human drug use with special attention to the use of drugs in cultural context.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 394. Comparative Religion. 3 Credit Hours.
A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 395. Gender, Race, and Class. 3 Credit Hours.
To explore human differences, we will interrogate common sense as: thinking about gender, race, and class. Certain queries will be addressed. What roles do scientific practice, political systems, and popular media play in shaping our thinking about differences? Where do we draw the line between biological fact and social construction? How do these facets of identity intersect and inform individuals’ everyday experiences? How might knowledge allow us to speak truth to power when institutional oppression occurs? An anthropological perspective will provide the central frame, though feminism, history, medicine, biology, psychology, and law will inform our considerations.
Prerequisite: APY 202 or GSS 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 396. Youth Culture, Identity, and Globalization. 3 Credit Hours.
Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 397. Violence and Ritual. 3 Credit Hours.
Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.
Prerequisite: APY 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 398. Coastal Cultures. 3 Credit Hours.
Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 399. The Anthropology of Kinship and Family in America. 3 Credit Hours.
Theories of kinship and the family. It will examine emergence of new patterns of kinship networks and construction of individuals. Ethnographic materials will be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti, Jamaica and the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 405. Readings in Anthropology. 1-3 Credit Hours.
Supervised readings on special topics in Anthropology.
Components: THI.
Grading: GRD.
Typically Offered: Fall.
APY 406. Readings in Anthropology. 1-3 Credit Hours.
Supervised readings on special topics in Anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 413. Medical Anthropology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 414. Human Osteology. 3 Credit Hours.
Identification and interpretation of the human skeleton, including age, sex, hard tissue pathology and traumas. 
Prerequisite: APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

APY 415. Forensic Anthropology II: Fieldwork. 3 Credit Hours.
The investigation, analyses, and legal aspects of human remains recovered from crime scenes and mass disasters.
Prerequisite: APY 203 or APY 414.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 416. Bioarchaeology-Peopling the past. 3 Credit Hours.
Contextualization of bodies in space, cultural milieu and time are the primary focus of this course. Students will explore bioarchaeology's history, development and major topical concerns.
Prerequisite: APY 201 or APY 203.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 417. Archaeometry: The Science of Material Culture. 3 Credit Hours.
The archaeological application of a physical science (physics, chemistry, geology, etc.) techniques to answer pertinent anthropological questions about past societies.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 418. Seminar in Anthropology. 3 Credit Hours.
Consideration of special topics in physical anthropology, linguistics, archaeology and ethnology and their interrelationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 419. Politics of the Past. 3 Credit Hours.
The intersection of archaeology, politics, capitalism, and discrimination to consider the presentation, misconstrual, revision, and reclamation of the past. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

APY 420. Archaeology, Architecture, and the City. 3 Credit Hours.
Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
APY 421. Interpreting Bodies. 3 Credit Hours.
Perceptions, representations, and regulation of the physical body as a gendered and sexual site, as a source of pleasure, as a means of social validation, and as an object of coercion. Writing Credit. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.
Prerequisite: APY 202 and GSS 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 422. Pseudoscience in Archaeology. 3 Credit Hours.
Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 423. Paleopathology: Health and disease in ancient peoples. 3 Credit Hours.
Paleopathology aims to familiarize students with the range of health conditions that present in preserved human remains and to explain the linkages between disease prevalence and culture, economics, and politics.
Prerequisite: APY 414 and APY 416.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

APY 435. Anthropology of Nature and Environment. 3 Credit Hours.
This course is an introduction to the anthropological investigation of nature, biology, and environment. Taking examples from cultural anthropology and the subfields of environmental anthropology, political ecology, and the anthropology of science, the course builds an understanding of the various ways in which ideas about nature and human nature and nature making practices shape our contemporary world: its places, spaces, life forms, and forms of life.
Prerequisite: APY 202.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 480. Undergrad Internship Anthrology. 3-9 Credit Hours.
The purpose of the undergraduate internship is practical application of coursework to hands-on learning with field and laboratory research conducted in partnership with an academic, governmental, non-profit and/or private sector business entity. The goal is to acquire and practice skill sets required for advancement in professional careers. Students may elect to participate in more than one internship because of the four-field approach of the discipline of Anthropology.
Prerequisite: APY 201 or APY 202 or APY 203 or APY 204.
Components: DIL.
Grading: GRD.
Typically Offered: Summer.

APY 484. Anthropological Theory. 3 Credit Hours.
Theoretical frameworks directing data collection and research methodology in anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 485. Archaeological Theory and Technique. 3 Credit Hours.
Theoretical traditions that shape modern archaeological research design and interpretation.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
APY 486. Advanced Colloquy in Black Feminist Theory and Praxis: Major Works of 7 Black Feminist Thinkers. 3 Credit Hours.
Black feminist theory, produced primarily by Black women scholars, artist and activists, throughout the diaspora, constitutes a distinctive and influential body of politics and thought. Black feminist’s uninvited interventions in Black politics, arts and letters—produced at the interstices of violence, silence, invisibility, or forgetting—exposes and makes available a wider horizon of possibilities than had been proposed before its emergence. The central theoretical innovation of this praxis (later claimed by theorists of various stripes), is the multiple—‘interlocking’, ‘intersectional’, ‘compounded’—constitution of “identity” oppression, aesthetic sensibilities, for example, and therefore of roads toward freedom. This distinctive body of work is not only interdisciplinary, multilingual; but also constitutive to specific geographies, politics, experiences, and particular intellectual and political streams.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

APY 501. Methods of Anthropological Research. 3-6 Credit Hours.
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 502. Field Studies in Anthropology. 3-6 Credit Hours.
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 505. Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Prerequisite: APY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 506. Workshop in Anthropology. 3-6 Credit Hours.
This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 511. Artlab At Lowe. 3 Credit Hours.
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

APY 512. Advanced Medical Anthropology. 3 Credit Hours.
Applications of theories and methods of medical anthropology to problems in human health and disease.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 518. Advanced Seminar in Anthropology. 3 Credit Hours.
Specialized topics in Anthropology to involve students into current research specializations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 601. Advanced Seminar in Archaeology, Theory and Practice. 3 Credit Hours.
History and theoretical foundation of modern archaeology; ethics, professional standards, and best practices in archaeology; cultural heritage management with special emphasis on NAGPRA; compliance with Secretary of the Interior standards, Section 106 regulatory knowledge and skills for compliance with government regulations, and current topical literature on archaeology.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
APY 602. Advanced Seminar in Cultural Anthropology. 3 Credit Hours.
The application of the anthropological perspective, data collection and analyses methods, and theoretical foundations of traditional cultural anthropology to understanding and working on solving human problems in the modern world. Topics include the design, conduct, and application of modern ethnological methods to research venues in business, governmental/NGO agencies, conflict studies, natural disasters, medical, globalization and financial organizations. Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 603. Advanced Seminar in Biological Anthropology. 3 Credit Hours.
The historical and theoretical foundations of modern biological anthropology. Topics include ethics and standards for human subjects; applied bioarchaeology, biological anthropology in medical/legal settings, primatology, Human biology and adaptive diversity, modern perspectives on race, and skeletal biology of modern peoples. The development of professional research and writing skills for the discipline is integral to course goals. Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 604. Advanced Seminar in Linguistic Anthropology. 3 Credit Hours.
Core aspects of linguistics theory, and consider the ways in which modern linguistic techniques can be applied in the investigation of both common and uncommon typological patterns in the world’s 7000+ languages. Requisite: Graduate Status or Permission of Instructor. Typically Offered: Fall & Spring.

APY 605. Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 611. Methods of Anthropological Research. 3-6 Credit Hours.
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 612. Advanced Medical Anthropology. 3 Credit Hours.
Applications of theories and methods of medical anthropology to problems in human health and disease.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 615. Advanced Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 616. Advanced Workshop in Anthropology. 3-6 Credit Hours.
This course is designed for graduate students to participate in special topics in Anthropology and related fields.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 628. Advanced Graduate Seminar. 3 Credit Hours.
Specialized topics in Anthropology to involve students into current research specializations.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
APY 690. Teaching Practicum in Anthropology. 3 Credit Hours.
Logistics and pedagogical issues of teaching anthropology, including skill set and materials suitable for employment in settings for which the master’s is the required, e.g., two-year schools. The student will evaluate texts, create teaching materials for a given subfield, master commonly-available electronic teaching and learning tools, and teach one class as directed.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 696. Advanced & Graduate Colloquy in Black Feminist Theory and Praxis: Major of 7 Black Feminist Thinkers. 3 Credit Hours.
Black feminist theory, produced primarily by Black women scholars, artist and activists, throughout the diaspora, constitutes a distinctive and influential body of politics and thought. Black feminist’s uninvited interventions in Black politics arts and letters—produced at the interstices of violence, silence, invisibility, or forgetting—exposes and makes available a wider horizon of possibilities than had been proposed before its emergence. The central theoretical innovation of this praxis (later claimed by theorists of various stripes), is the multiple-‘interlocking,’ ‘intersectional,’ ‘compounded’—constitution of “identity,” oppression, aesthetic sensibilities, for example, and therefore of roads toward freedom. This distinctive body of work is not only interdisciplinary, multilingual, but also constitutive to specific geographies, politics, experiences, and particular intellectual and political streams.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

APY 699. Directed Reading in Anthropology. 3-6 Credit Hours.
Supervised readings on special topics in Anthropology, allowing the student to work independently with an Anthropology professor, conducting research on a topic of both of their choosing.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 702. Field Studies in Anthropology. 3-6 Credit Hours.
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 805. Graduate Internship: Professional Practice of Anthropology. 1-9 Credit Hours.
An internship designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid. This course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 810. Master's Degree Thesis Preparation and Writing. 1-9 Credit Hours.
Preparation/completion of a written thesis for the master's degree when the student has completed the thesis research, is engaged in writing the thesis, and expects to use the facilities and resources of the Anthropology department and the university; enrollment is required when the completed thesis is defended and approved. This course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**Applied Marine Physics (AMP)**

**AMP 536. Modeling of Physical-Biological Interactions. 3 Credit Hours.**
The course is designed to teach students the basics components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
Applied Music (MAP)

MAP 264. Vocal Techniques. 2 Credit Hours.
Components: LEC.
Grading: GRD.

Arabic (ARB)

ARB 101. Elementary Arabic I. 4 Credit Hours.
Fundamental writing and grammar principles; pronunciation; simple reading and translation. Closed to native speakers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARB 102. Elementary Arabic II. 4 Credit Hours.
Modern Standard Arabic; oral and written exercises. Closed to native speakers.
Prerequisite: ARB 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 201. Intermediate Arabic I. 3 Credit Hours.
Modern Standard Arabic; oral and written exercises. Closed to native speakers.
Prerequisite: ARB 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARB 202. Intermediate Arabic II. 3 Credit Hours.
Readings designed to integrate listening comprehension, speaking, reading, and writing skills in Modern Standard Arabic. Discussion of Arab society, history and culture. Closed to native speakers.
Prerequisite: ARB 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 203. Advanced Arabic. 3 Credit Hours.
5th semester course in Modern Standard Arabic. Continued development of all four language skills (listening, speaking, reading, and writing) together with study of cultural aspects of the Arab world. Conducted in Arabic. Closed to students who graduated from a high school in which the primary language of instruction was Arabic.
Prerequisite: ARB 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARB 204. Arabic 204: Advanced Arabic II. 3 Credit Hours.
The sixth course of the Modern Standard Arabic sequence within the Arabic Studies Program. The three primary goals of the Arabic language sequence are: (1) developing oral and written communicative abilities in Arabic; (2) understanding the rich culture of the Arabic-speaking world through engaging with texts and cultural artifacts; (3) studying and understanding the Arabic language, from grammar and spelling to writing with coherence, cohesion and accuracy.
Prerequisite: ARB 203.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 207. Arabic for Heritage Learners. 3 Credit Hours.
Arabic for Heritage Learners is a 200 level course specifically designed for students of Arab descent who fulfilled the equivalent of ARB 201. The course will hone students’ ability in critical reading, writing, debate, and discussion of pertinent topics in Arab culture. The course material will focus on the history of Arab culture, literature, film, and music. By the end of the semester students will develop their ability in critical reading and writing in MSA.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARB 208. Arabic for Heritage Learners II. 3 Credit Hours.
Arabic 208 is combined with the sixth course of the Modern Standard Arabic sequence within the Arabic Studies Program. The three primary goals of the Arabic language sequence are: (1) developing oral and written communicative abilities in Arabic; (2) understanding the rich culture of the Arabic-speaking world through engaging with texts and cultural artifacts; (3) studying and understanding the Arabic language, from grammar and spelling to writing with coherence, cohesion and accuracy.
Prerequisite: ARB 202 or ARB 207.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARB 310. Topics in Arabic Literature and Culture in Translation. 3 Credit Hours.
Specific topics within the literature and cultures of the Arabic-speaking world, including literary, cinematic, and artistic representations of central themes or issues, and the cultural production of particular historical periods or national or immigrant groups. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.
Prerequisite: ENG 106 or ENG 107.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 311. Arab Cultures: A Cultural History of the Arab World. 3 Credit Hours.
Study of the main points of Arab cultural history, from Pre-Islamic times to the period following European colonization with an emphasis on intellectual history and literary and visual arts. This course is taught in English and does not fulfill the CAS foreign language requirement.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 312. Topics in Gender and Sexuality in Translation. 3 Credit Hours.
Topics in gender and sexuality in the context of the Arab world, through literary and/or cultural studies. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 394. Arabic Internship. 1-3 Credit Hours.
The internship is an opportunity to apply analytical, interpretative, and creative skills developed in coursework. Internships ordinarily take place outside the University and they involve UM faculty supervision, as well as supervised on-site experience in an Arabic-speaking cultural, business, or not-for-profit organization. Students need to fill out the Internship Application Form. Normally 27 internship hours are required per credit earned. A maximum of three semester hours of internship credit may be counted toward the student’s degree program. Permission of MLL faculty member is required (the host will apply documentary evidence of the hours worked).
Prerequisite: ARB 204.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 410. Language and Power in the Arab World. 3 Credit Hours.
The multiple languages and linguistic registers present in the Arab world and, through materials from linguistics, anthropology, political science, music, art, and literature, leads them into an exploration of the main socio-linguistic features of Arabic and their broader cultural ramifications. This course is conducted in English. It does not fulfill the College of Arts & Sciences language requirement.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARB 591. Directed Readings. 1-3 Credit Hours.
Directed readings (Independent study) in Arabic Studies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 625. Arabic for Graduate Students. 0 Credit Hours.
The Arabic language through a communicative approach implementing the use of new vocabulary and applied use of grammatical theories thereby advancing reading comprehension as well as writing skills. The main focus of this class is on communication in Arabic where we aim for maximum use of the language in the classroom. The instructor will strive to speak exclusively in Arabic during class, and students will be expected to do the same with their instructor and classmates
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARB 641. Elementary ARB I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, as well as to provide an introduction to the Arabic-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 642. Elementary ARB II for Graduate Students. 0 Credit Hours.
Continuation of ARB641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Arabic, and continued study of the Arabic-speaking world.
Prerequisite: ARB 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 651. Intermediate ARB I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level Arabic. Designed to enhance graduate students' communication skills at the intermediate level. Intended principally for students who will carry out research in areas related to the Arabic-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 652. Intermediate ARB II for Graduate Research. 0 Credit Hours.
For graduate students with previous study of Arabic at the intermediate level. Designed to enhance graduate students' communication skills in both written and spoken Arabic at the high-intermediate level. Intended primarily for students who will carry out research in the Arabic-speaking world.
Prerequisite: ARB 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 653. Advanced ARB I for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Arabic language at the advanced-low level. Intended principally for students who will carry out research related to the Arabic-speaking world.
Prerequisite: ARB 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 654. Advanced ARB II for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Arabic language at the advanced-intermediate level. Intended principally for students who will carry out research related to the Arabic-speaking world.
Prerequisite: ARB 653.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARB 657. Intermediate Arabic - Graduate Heritage. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Arabic language at the high-intermediate level. Intended principally for heritage learners who will carry out research related to the Arabic-speaking world.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 658. Advanced ARB for Graduate Heritage Learners. 1 Credit Hour.
Designed to enhance graduate students' communication skill in the Arabic language at the advanced-low level. Intended principally for heritage learners who will carry out research related to the Arabic-speaking world.
Prerequisite: ARB 657.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARB 691. Directed Readings. 1-3 Credit Hours.
Directed readings (Independent study) in Arabic Studies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARB 692. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

Architecture (ARC)

ARC 101. Architecture Design I. 6 Credit Hours.
Introduction to architectural design as an intellectual and aesthetic discipline directed at the analysis, interpretation, synthesis and transformation of the physical environment. Topics include concept, site, form, analysis, use of precedents, technique and the ability to communicate design ideas.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 102. Architecture Design II. 6 Credit Hours.
Architectural response to shelter, space and setting requirements. Topics include design thinking skills, programming, site analysis, use of precedents and anthropometrics and human behavior.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 109. Introduction to Architecture. 3 Credit Hours.
(Includes Design & History) Introduction to architectural ideas and principles including composition, space, form, function, history and methods of exploring architectural and urban design problems. Students will learn the relationship between two dimensional and 3 dimensional spaces through analytical drawing and model making. Course pedagogy includes weekly lectures in history and theory to better inform the design process. This course will encourage intuitive action, rapid visual analysis and interpretation.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 110. Visual Studies. 3 Credit Hours.
Concurrent with the ARC 109 course, the visual studies course explores Architectural drawing as a means of discovery, exploration, analysis and representation. Coursework begins with freehand drawing, in which students explore and refine their observation and representational skills, followed by an introduction to digital drawing and 3-d fabrication used in the profession today. The students will develop a portfolio in book format that illustrates the body of work produced during the three- week program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ARC 111. Visual Representation I. 3 Credit Hours.
An introduction to architectural representation as exploration, selection coordination and acquisition of visual knowledge including analog and digital techniques. Topics include: orthographic and oblique projections, geometric constructions, sketching, shade and shadow, and basic knowledge of digital tools.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 112. Visual Representation II. 3 Credit Hours.
An intermediate course that continues methods integration introduced in Visual Representation I with an increased focus on three dimensional projections.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 121. Architecture and Culture. 1 Credit Hour.
Architecture as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies.
Corequisite: ARC 101, 111.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 122. Architecture and Behavior. 1 Credit Hour.
The course focuses on the study of human behavior and its relationship to the design process. Topics include: cultural diversity, social equity and the application of psychological factors in the design of buildings and their environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 141. On-Site Survey of European Architecture and Urbanism. 3-6 Credit Hours.
On site introduction to architecture and the city with a historical review of European architecture and urban form from the classical to the contemporary. Students travel with faculty to survey selected European architectural and urbanistic precedents at specific locations. Elective course open to all majors; lecture and seminar format.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ARC 203. Architecture Design III. 6 Credit Hours.
The course focuses on the design of urban form and its relationship to the natural environment. Topics include: site analysis and design, context, climate, access and circulation and landscape.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 204. Architecture Design IV. 6 Credit Hours.
The design course focuses on building materials, techniques and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 213. Visual Representation III. 3 Credit Hours.
An advanced representation course that builds on the tools and methods of visual Representation I & II while introducing students to more advanced techniques of three dimensional modeling that integrates analog and digital techniques. Topics covered include: composition, diagramming, research and analytical drawing, perspective, and the integration of digital tools.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 223. Architecture and the Environment. 1 Credit Hour.
Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental intervention, case studies of vernacular building techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 230. Building Technology I: Materials and Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 231. Building Technology: Structural Systems. 3 Credit Hours.
Structural systems: the tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 267. History of Architecture I: Ancient, Medieval and Renaissance. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 268. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present. Corequisite: ARC 204.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 292. Introduction to Architecture Design I. 3 Credit Hours.
Survey of the architecture profession and introduction to architecture design for non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques and procedures of design.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 293. Introduction to Architecture Design II. 3 Credit Hours.
Continuation of ARC 292 and an introduction to the interactions between architecture and the engineering disciplines for non-architecture majors. Theories of building and site design, technology as an integral component of design, program, site, climate and methodology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 294. Introduction to the Development of Architecture. 3 Credit Hours.
Introduction to architecture for non-architecture majors. Vocabulary, themes, principles and processes of design, cultural, social, economic and technological influences demonstrated through historic examples.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 301. Architecture Design. 3 Credit Hours.
Comprehensive building and site design for students transferring into the architecture program at third year level. Topics include human, environmental, cultural and technological factors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 305. Architecture Design V. 6 Credit Hours.
The design course focuses on the analysis and design of housing typologies within the context of the city. Topics include: programming, research and the integrated evaluation and design making in the design process.
Components: STU.
Grading: GRD.
Typically Offered: Fall.
ARC 306. Architecture Design VI. 6 Credit Hours.
The design course focuses on the ability to demonstrate skills associated with making integrated architectural design decisions across multiple systems. Students must display an ability to make design decisions within a complex architectural project while demonstrating broad integration and consideration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 323. On Site Study of Selected Architecture and Urbanism. 3-6 Credit Hours.
On site study of specific architectural and/or urbanistic precedents at selecte d locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ARC 324. On Site Graphic Analysis of Selected Architecture and Urbanism. 3 Credit Hours.
On site analysis and illustration of specific architectural and/or urbanistic p recedents at selected locations. Diagrams, sketches, and drawings recording, an alyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ARC 362. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; building envelope and assemblies, plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 363. Environmental Building Systems II. 3 Credit Hours.
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 371. Ancient Architecture. 3 Credit Hours.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 373. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.
History of architecture and human settlements. Early Christian and Byzantine ar chitecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medie val architecture in Western Europe.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 382. Architecture and Culture in Italy. 3 Credit Hours.
A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 407. Architecture Design VII. 3-6 Credit Hours.
Elective design studio course: student and faculty select areas of in-depth study. Topics are broadly defined and vary from semester to semester.

ARCHITECTURE MAJORS.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 408. Architecture Design VIII. 3-6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics are broadly defined and vary from semester to semester.
**Components:** STU.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

ARC 452. Management of Professional Practice. 3 Credit Hours.
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

ARC 475. Colonial Architecture. 3 Credit Hours.
History of architecture and human settlements. Colonial Architecture from the 16th through the 19th centuries in North and South America, the Caribbean, India and Africa.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 476. 19th and 20th Century Architecture. 3 Credit Hours.
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 481. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

ARC 482. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

ARC 483. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

ARC 500. Architecture Theory. 3 Credit Hours.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 501. Architecture Design and Theory I. 6 Credit Hours.
Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.
**Components:** STU.
**Grading:** GRD.
**Typically Offered:** Fall.

ARC 502. Architecture Design and Theory II. 6 Credit Hours.
Technology component; materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.
ARC 503. Architectural Design and Theory III. 6 Credit Hours.
Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 504. Architecture Design and Theory I. 6 Credit Hours.
Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 507. Architecture Design. 6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 509. Architecture Design IX. 3-6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
ARCHITECTURE MAJORS.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 510. Architecture Design X. 3-6 Credit Hours.
Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.
ARCHITECTURE MAJORS.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 511. Visual Representation I. 3 Credit Hours.
Issues covered in the course will deal with the illustration of ideas in architectural manner. Students are to use the skill of drawing and model-making, either by hand or on the computer, as their new language. Topics will include how to read, understand, and create design drawings, to draw from observations and analyze their subject matter, to be able to distinguish the relevance of a particular drawing and to structure how they present their information. Students will be instructed to properly craft their work in and outside of studio in an effort to see their work evolve and improve.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 512. Advanced Visual Analysis. 3 Credit Hours.
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 513. Advanced Visual Representation. 3 Credit Hours.
Students will learn to carefully evaluate space, color, depth, hierarchy, balance and scale in all architectural visual representation. The assignments will explore different media as it is used in the profession including but not limited to: diagrams, renderings, plans, elevations, sections, and axonometric. Through lectures and workshops, the course will provide a combination of both theoretical and practical lessons encompassing the fundamentals of architectural visual representation. The course will also include parallel lectures on typography, architectural graphic design, and verbal presentation. The lectures will be given by highly regarded industry professionals who will address the way that students can be aware of and understand typography, verbal presentation, and graphic design fundamentals as it relates to architecture. The class will consist of three parts. Part I introduces students to the fundamentals of 3d modeling and drafting as part of a representation workflow. The exercise will include both urban and building scales. Part II concentrates on understanding and dissecting more complex geometries through advance use of digital parametric software such as Grasshopper. Part III focuses on visual representation based on a studio project with emphasis on graphic techniques for final presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 514. Michelangelo. 3 Credit Hours.
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 515. Computer Modeling. 3 Credit Hours.
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 516. Architectural Watercolor Renderings. 3 Credit Hours.
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 517. Construction Documents. 3 Credit Hours.
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 518. Documentation of Historic Architecture. 3 Credit Hours.
Principles of preservation and restoration, research methods, measured drawings, surveying methods, and case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 519. Architecture and Color. 3 Credit Hours.
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 523. Urban Design Competition. 1-3 Credit Hours.
Intensive, collaborative urban design project, combining master planning and real estate development expertise, to be submitted to international peer reviewed competition. Project teams are comprised of students from several different degree programs, such as architecture, urban design, real estate development, business, and law.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 524. Selected Topics in Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 525. Landscape Arch Design I. 3 Credit Hours.
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares, and response to urban and architectural context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 526. Landscape Arch Design II. 3 Credit Hours.
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 527. Architecture Photography. 3 Credit Hours.
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 528. Historic Preservation. 3 Credit Hours.
Basic design principles for the rehabilitation of historic buildings and districts. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 529. Research in Design-Methods and Procedures. 3 Credit Hours.
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 531. Building Technology II: Structural Systems. 3 Credit Hours.
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 532. Building Structures I. 3 Credit Hours.
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 533. Building Structures II. 3 Credit Hours.
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
Prerequisite: ARC 532.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ARC 534. The Palazzo in Italian Architecture. 3 Credit Hours.
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 535. Historic Italian Urbanism. 3 Credit Hours.
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 536. Italian Gardens. 3 Credit Hours.
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 537. Research in Rome. 3 Credit Hours.
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 538. Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 539. Adaptation to Climate Change. 3 Credit Hours.
Introduction to the phenomena and related discussion on the topic of climate change. Review of current scientific evidence, tactics for mitigation of emissions and other causal actions, followed by study of the adaptation required by changing conditions. Class assignments include creative proposals for adaptation action.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 540. Tropical Architecture. 3 Credit Hours.
A discussion of tropical architecture and the theme of tropicalism. Research, analysis and documentation in drawing of selected case studies
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 541. Seminar on Town Design. 3 Credit Hours.
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 542. Seminar on Housing. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 543. Seminar on Retrofit of Suburbia. 3 Credit Hours.
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 544. Architecture of Palladio. 3 Credit Hours.
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.
Components: LEC.
Grading: GRD.

ARC 545. Urban Composition. 3 Credit Hours.
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 546. Studies of Havana. 3 Credit Hours.
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 547. Architecture and Urban Identity. 3 Credit Hours.
Study of the relationship between architecture and urbanism focusing on the ways in which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 548. Seminar in Community Development. 3 Credit Hours.
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 549. Construction and Project Management. 3 Credit Hours.
Management of construction projects including legal considerations and techniques of management science applied to construction. Includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, flow charts, tracking progress, construction contracts, indemnity agreements, and network planning techniques including CPM and PERT.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 550. Professional Lecture Series. 3 Credit Hours.
Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 551. Contemporary Theories of Architecture. 3 Credit Hours.
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 553. Structural Design Theory. 3 Credit Hours.
Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 554. Architecture of South Florida. 3 Credit Hours.
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 555. 18th and 19th Century American Architecture and Architects. 3 Credit Hours.
The course concentrates on the development of early American architecture, Architects and Urbanism, primarily but not exclusively to 17th, 18th and 19th centuries with particular emphasis on theoretical, technological and cultural developments in America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 557. Design and Fabrication Techniques. 3-6 Credit Hours.
Design, construction and detailing of wood and other materials as applied to furnishings and interiors. Workshop includes research, exercises, documentation and a final project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 558. Theories of Landscape Architecture. 3 Credit Hours.
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design, including concerns such as urban heat island effect, climate change resilience, and health impacts of landscape.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 559. Sustainability and LEED Exam Prep. 1-3 Credit Hours.
Study of U.S. Green Building Council standards for environmental efficacy in building and neighborhood design. Emphasis on fundamental knowledge of green building concepts, including transportation, energy, water and air quality. Includes preparation for LEED Accreditation Exam and registration for exam that provides the credential signifying expertise in green building and a LEED rating.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 560. Contemporary Latin American Architecture. 3 Credit Hours.
An examination of Contemporary Latin American Architecture and Urbanism from the turn of the 20th Century to the present day. The work of some of the great figures on Latin American Modernism such as Niemeyer and Barragan, to contemporary figures such as Paulo Mendes da Rocha and Isay Weinfeld will be discussed. The influence of the Modern Movement in Europe and Le Corbusier will be reviewed. Large scale City Plans such as Lucio Costa’s Plan for Brasilia and Roberto Burle-Marx’s designs for Flamengo Park and Copacabana in Rio de Janeiro will be analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 568. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARC502.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 569. Directed Readings. 3 Credit Hours.
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student’s chosen area of interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 570. Modern Architecture. 3 Credit Hours.
History of architecture, landscape, and city design in the modern era.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 572. Selected Topics in World Architecture. 3 Credit Hours.
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 574. Renaissance Architecture. 3 Credit Hours.
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 577. The Architecture of Alvar Aalto. 3 Credit Hours.
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 578. Italian Rationalist Architecture. 3 Credit Hours.
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 579. An Introduction to Resilient Building and Community Design. 3 Credit Hours.
This course introduces students to the relationships between climate, resiliency, architecture and urbanism; building awareness of the growing challenges and opportunities ahead, and the intersections between these disciplines. What does resilience mean in this broader context, and how should escalating stressors and shocks be addressed? Students learn about climate sciences, then research, document, and analyze evolving resilient design strategies, at the scale of buildings, neighborhoods and cities, in the end, applying those lessons to a given case study site; developing a holistic set of resilient design recommendations. During the course, students interact with specialists in the fields of architecture and urban design, as well as related fields, such as engineering, social, marine and environmental sciences, and/or policymakers, to better comprehend first-hand the interwoven scientific, social, environmental, and governmental ramifications to resilient design. Lastly, students learn the mechanics of participatory design methods employed to engage communities in related efforts.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 580. Professional Advancement, Internship + Research (PAIR). 3 Credit Hours.
Research Component of PAIR program. Student, host office and faculty collaboratively develop a focused, in-depth research project related to the tasks the student is completing as part of the Internship Component of the PAIR program. Application and PAIR committee acceptance required prior to enrollment.

Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 581. Special Problems. 1-3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 582. Special Problems. 3-6 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 583. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 584. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 585. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 586. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 589. History of Cities. 3 Credit Hours.
Historical overview of the origin and development of cities around the world. Emphasis on intentional form of settlements (the ideal) as well as response to economic and political imperatives such as trade and defense (the real).

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 592. Cinema and Architecture. 3 Credit Hours.
The class studies the relationship between architecture and cinema. Lectures, film screenings, and readings, explore the origin and development of
filmic space with an emphasis on its relation to the real and poetic image of the city. The class analyzes selected films as they relate to, comment,
criticize, and anticipate the development of contemporary concepts of space, urban space, interior space, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 593. Computer Animation. 3 Credit Hours.
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial
choreography and story-boarding.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 594. Geographic Information Systems in Urban Design. 3 Credit Hours.
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and
visualization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 596. Interactive Multimedia in Design. 3 Credit Hours.
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 597. Designing for the Internet of Things. 3 Credit Hours.
This course examines how current research and development in embedded computation bears on architecture, landscape, and urbanism. Students will
explore the implications and impact of ubiquitous computing in its potential to change the way we conceive, construct, inhabit and interact with our
buildings, landscapes, and cities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 598. Introduction to Programming for Architects. 3 Credit Hours.
As digital tools continue to play an increasing role in the Architect’s toolkit, it is becoming increasingly important that Architects not only understand
how to use and navigate these tools but to customize and adapt them to their specific needs. Learning how to program allows Architects to start to
fully utilize the potential in digital tools by maximizing the possibilities in not only 3D modeling and digital fabrication but in responsive architecture,
embedded computation and animating spaces contributing to a more dynamic and potentially inter-connected built environment.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 601. Urban Design Studio I. 6 Credit Hours.
Introduction to urban design principles and techniques, in the master planning of a new community. Emphasis on the sustainability of human
settlements within the context of degradation of natural systems and resource depletion; regional environmental and infrastructure systems;
transportation and traffic; transit-oriented development; land use, building, and thoroughfare types.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 602. Urban Design Studio II. 6 Credit Hours.
Design projects focusing on contemporary challenges and goals for existing settlements, including urban and suburban disinvestment and
deterioration, urban redevelopment, social equity, resilience and adaptation to climate change, design for healthy communities and active living, and
urban agriculture.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 603. Urban Design Studio III. 6 Credit Hours.
Urban design projects that deploy full range of techniques for regional control of urban growth. Application of advanced technologies, including smart cities, innovations in transportation and traffic engineering, energy generation and conservation, and emissions reduction.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 604. Architecture Design and Theory I. 6 Credit Hours.
The inaugural design studio focuses on the role of architectural design as an integrative discipline. Using Miami as a laboratory and drawing from natural specimens, the studio will examine the relationship between nature, landscape and the built environment. It will use research and analysis, design thinking skills, ordering systems, site design, materials, methods, structure, light, space, and tectonics as a means of developing a meaningful design process. Components: STU.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 605. Architecture Design and Theory II. 6 Credit Hours.
This introductory design studio focuses on the role of architectural design as a responsive discipline. The studio will look at how architectural form is informed by thoughtful consideration of materials and methods of construction, as well as programming and context. Situated in an urban environment rich in material, stylistic and typological history, the studio will challenge students to develop a careful reading of place while responding to urban context, topography, and other site requirements. By considering issues of precedent, composition, display, and identity, it will examine the production of meaning in architecture.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 606. Architectural Design and Theory III. 6 Credit Hours.
The Rome Design Studio operates as a form of design-based critical inquiry into issues of urban design, architecture, and the adaptive reuse and transformation of buildings and spaces. Drawing will be explored as a means of analysis, in order to observe and record the urban and architectural conditions of Rome. Students will discover the layers of Rome, combining archaeology with architecture and urban history. Coursework emphasizes a critical reassessment of the historic urban sites relative to questions of program, infrastructure, and cultural changes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 607. Architecture Design and Theory IV. 6 Credit Hours.
Advanced Design Studio based course addressing more complex and ambitious topics related with the built environment, the ability to prepare and solve a program through design, materials, technique, technology, social human centered aspects of architecture, structure, architecture as light and space, site and context and environmental issues.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 608. Architecture Design. 3-6 Credit Hours.
Advanced Design Studio focusing on skills associated with making integrated architectural design decisions across multiple systems. Design decisions within a complex architectural project will focus on the consideration and broad integration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 609. Architecture Design. 3-6 Credit Hours.
Specialization component: student and faculty select areas of in-depth study in housing, resiliency, healthcare, urban design, housing and hospitality, historic preservation etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 610. Architecture Design Degree Project. 6 Credit Hours.
The Architecture Design Degree Project studio offers two options: 1) an independent design research project (design thesis) on a topic selected and developed by the student, or 2) a graduate research studio. Design Thesis is an opportunity for each student, working with a faculty advisor, to define an individual position with regard to the discipline of Architecture. The graduate research studio, led by a faculty member, will investigate relevant or thematic issues of architecture. All graduating students will be required to present their Degree Project, comprising research, analysis and creative work, as a book.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 611. Visual Representation. 3 Credit Hours.
Issues covered in the course will deal with the illustration of ideas in architectural manner. Students are to use the skill of drawing and model-making, either by hand or on the computer, as their new language. Topics will include how to read, understand, and create design drawings, to draw from observations and analyze their subject matter, to be able to distinguish the relevance of a particular drawing and to structure how they present their information. Students will be instructed to properly craft their work in and outside of studio in an effort to see their work evolve and improve.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 612. Advanced Visual Analysis. 3 Credit Hours.
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 613. Advanced Visual Representation. 3 Credit Hours.
Students will learn to carefully evaluate space, color, depth, hierarchy, balance and scale in all architectural visual representation. The assignments will explore different media as it is used in the profession including but not limited to: diagrams, renderings, plans, elevations, sections, and axonometric. Through lectures and workshops, the course will provide a combination of both theoretical and practical lessons encompassing the fundamentals of architectural visual representation. The course will also include parallel lectures on typography, architectural graphic design, and verbal presentation. The lectures will be given by highly regarded industry professionals who will address the way that students can be aware of and understand typography, verbal presentation, and graphic design fundamentals as it relates to architecture. The class will consist of three parts. Part I introduces students to the fundamentals of 3d modeling and drafting as part of a representation workflow. The exercise will include both urban and building scales. Part II concentrates on understanding and dissecting more complex geometries through advance use of digital parametric software such as Grasshopper. Part III focuses on visual representation based on a studio project with emphasis on graphic techniques for final presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 614. Michelangelo. 3 Credit Hours.
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo’s work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 615. Advanced Visualization Techniques. 3 Credit Hours.
Beginning at the urban scale, students will engage with the concept of mapping and the graphical representation of an urban environment. This will be done through site analysis and investigation of existing conditions for the neighborhood of Miami Beach, Fl. After the urban analysis, students will transition into the building scale and analyze a “Lifeguard House” in Miami Beach. Students will be asked to rethink and redesign the lifeguard house using Rhino 30. Each student will produce drawings including elevations, plans, sections, and exploded axonometric of their new design. Lastly, students will create a physical model using the laser cutter.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 616. Architectural Watercolor Renderings. 3 Credit Hours.
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 617. Construction Documents. 3 Credit Hours.
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 618. Documentation of Historic Architecture. 3 Credit Hours.
Principles of preservation and restoration, research methods, measured drawings, surveying methods, and case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 619. Architecture and Color. 3 Credit Hours.
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 620. Responsible Architecture. 3 Credit Hours.
A responsible architecture is one that takes into consideration aesthetics, ecology, sustainability, history, context (urban or otherwise), as well as the health, welfare, and joy of the people who occupy it. This course will address architecture from a distinctly humanist viewpoint, keeping in mind how man is inextricably connected to his environment, both architectural and natural. To focus on sustainability, typology, urbanism, or aesthetics alone would be to negate architecture’s interconnectedness. The creation of a responsible architecture requires this multi-layered approach.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 621. Housing, Infrastructure and Transportation. 3 Credit Hours.
Case studies in sustainable urban design. Survey and assessment of innovations in community design and building. Examples from the late nineteenth century to contemporary practice illuminate environmental, social, and economic goals and impacts in urban design.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 622. Urban Design History and Theory. 3 Credit Hours.
Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 623. Urban Design Competition. 1-3 Credit Hours.
Intensive, collaborative urban design project, combining master planning and real estate development expertise, to be submitted to international peer reviewed competition. Project teams are comprised of students from several different degree programs, such as architecture, urban design, real estate development, business, and law.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 624. Select Topics in Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 625. Landscape Arch Design I. 3 Credit Hours.
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares, and response to urban and architectural context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 626. Landscape Arch Design II. 3 Credit Hours.
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 627. Architecture Photography. 3 Credit Hours.
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 628. Historic Preservation. 3 Credit Hours.
Basic design principles for the rehabilitation of historic buildings and districts. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 629. Research in Design-Methods and Procedures. 3 Credit Hours.
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 630. Building Technology I: Materials and Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction tech- niques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 631. Building Technology II: Structural Systems. 3 Credit Hours.
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 632. Building Structures I. 3 Credit Hours.
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 633. Building Structures II. 3 Credit Hours.
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ARC 634. The Palazzo in Italian Architecture. 3 Credit Hours.
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 635. Historic Italian Urbanism. 3 Credit Hours.
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 636. Italian Gardens. 3 Credit Hours.
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 637. Research in Rome. 3 Credit Hours.
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 638. Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
Components: LEC.
Grading: GRD.

ARC 639. Adaptation to Climate Change. 3 Credit Hours.
Introduction to the phenomena and related discussion on the topic of climate change. Review of current scientific evidence, tactics for mitigation of emissions and other causal actions, followed by study of the adaptation required by changing conditions. Class assignments include creative proposals for adaptation action.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 640. Tropical Architecture. 3 Credit Hours.
A discussion of tropical architecture and the theme of tropicalism. Research, analysis and documentation in drawing of selected case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 641. Seminar on Town Design. 3 Credit Hours.
Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 642. Seminar on Housing. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 643. Seminar on Retrofit of Suburbia. 3 Credit Hours.
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 644. The Architecture of Palladio. 3 Credit Hours.
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 645. Urban Composition. 3 Credit Hours.
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 646. Studies of Havana. 3 Credit Hours.
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 647. Architecture and Urban Identity. 3 Credit Hours.
Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 648. Seminar in Community Development. 3 Credit Hours.
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 649. Construction and Project Management. 3 Credit Hours.
Management of construction projects including legal considerations and techniques of management science applied to construction. Includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, flow charts, tracking progress, construction contracts, indemnity agreements, and network planning techniques including CPM and PERT.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 650. Professional Lecture Series. 3 Credit Hours.
Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 651. Contemporary Theories of Architecture. 3 Credit Hours.
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 652. Management of Professional Practice. 3 Credit Hours.
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships, disputes and risk management.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 653. Structural Design Theory. 3 Credit Hours.
Relationship of structural systems to architectural design. Case studies in the ories of structure, form and construction.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 654. Architecture of South Florida. 3 Credit Hours.
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 655. 18th and 19th Century American Architecture and Architects. 3 Credit Hours.
The course concentrates on the development of early American architecture, Architects and Urbanism primarily but not exclusively to 17th, 18th and 19th centuries with particular emphasis on theoretical, technological and cultural developments in America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 657. Design and Fabrication Techniques. 3-6 Credit Hours.
Design, construction and detailing of wood and other materials as applied to furnishings and interiors. Workshop includes research, exercises, documentation and a final project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 658. Theories of Landscape Architecture. 3 Credit Hours.
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design, including concerns such as urban heat island effect, climate change resilience, and health impacts of landscape.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 659. Sustainability and LEED Exam Prep. 1-3 Credit Hours.
Study of U.S. Green Building Council standards for environmental efficacy in building and neighborhood design. Emphasis on fundamental knowledge of green building concepts, including transportation, energy, water and air quality. Includes preparation for LEED Accreditation Exam and registration for exam that provides the credential signifying expertise in green building and a LEED rating.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 660. Contemporary Latin American Architecture. 3 Credit Hours.
An examination of Contemporary Latin American Architecture and Urbanism from the turn of the 20th Century to the present day. The work of some of the great figures on Latin American Modernism such as Niemeyer and Barragan, to contemporary figures such as Paulo Mendes da Rocha and Isay Weinfeld will be discussed. The influence of the Modern Movement in Europe and Le Corbusier will be reviewed. Large scale City Plans such as Lucio Costa’s Plan for Brasilia and Roberto Burle-Marx’s designs for Flamengo Park and Copacabana in Rio de Janeiro will be analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 661. Building Technology I: Materials and Methods.. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction tech- niques; on-site and off-site processes; exterior finishes; assemblies, detailin g and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 662. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 663. Environmental Building Systems II. 3 Credit Hours.
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 665. Computer Modeling. 3 Credit Hours.
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 667. History of Architecture I. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 668. History of Architecture II. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 669. Directed Readings. 3 Credit Hours.
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 670. Modern Architecture. 3 Credit Hours.
History of architecture, landscape, and city design in the modern era.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 671. Ancient Architecture. 3 Credit Hours.
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 672. Selected Topics in World Architecture. 3 Credit Hours.
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, South West Asia, China, Japan, Pre-Columbian America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 673. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 674. Renaissance Architecture. 3 Credit Hours.
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 675. Colonial Architecture. 3 Credit Hours.
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 676. 19th and 20th Century Architecture. 3 Credit Hours.
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 677. The Architecture of Alvar Aalto. 3 Credit Hours.
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 678. Italian Rationalist Architecture. 3 Credit Hours.
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 679. An Introduction to Resilient Building and Community Design. 3 Credit Hours.
This course introduces students to the relationships between climate, resiliency, architecture and urbanism; building awareness of the growing challenges and opportunities ahead, and the intersections between these disciplines. What does resilience mean in this broader context, and how should escalating stressors and shocks be addressed? Students learn about climate sciences, then research, document, and analyze evolving resilient design strategies, at the scale of buildings, neighborhoods and cities, in the end, applying those lessons to a given case study site; developing a holistic set of resilient design recommendations. During the course, students interact with specialists in the fields of architecture and urban design, as well as related fields, such as engineering, social, marine and environmental sciences, and/or policymakers, to better comprehend first-hand the interwoven scientific, social, environmental, and governmental ramifications to resilient design. Lastly, students learn the mechanics of participatory design methods employed to engage communities in related efforts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 680. Professional Advancement, Internship + Research (PAIR). 3 Credit Hours.
Research Component of PAIR program. Student, host office and faculty collaboratively develop a focused, in-depth research project related to the tasks the student is completing as part of the Internship Component of the PAIR program. Application and PAIR committee acceptance required prior to enrollment.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 681. Special Problems. 1-3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 682. Special Problems. 3-6 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 683. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 684. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 685. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ARC 686. Special Problems. 3 Credit Hours.
Group or individual investigations of significant architectural issues, offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 690. History of Cities. 3 Credit Hours.
Historical overview of the origin and development of cities around the world. Emphasis on intentional form of settlements (the ideal) as well as response to economic and political imperatives such as trade and defense (the real).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 691. Housing and the Contemporary City. 3 Credit Hours.
Housing is a relatively new field and discipline, born of the complex interplay of urban development, building traditions, architectural innovation and basic human needs. The role of housing in building the city, and the role of the city in determining the shape and content of housing, will be the point of departure for this survey and seminar. The student is expected to gain an understanding of how building typology, history, urban traditions, site design, the functional issues of lifestyle and culture affect the critical issue of housing design. Simultaneously, an awareness of the role of housing design in the creation and articulation of urban space will be studied.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 692. Cinema and Architecture. 3 Credit Hours.
The class studies the relationship between architecture and cinema. Lectures, film screenings, and readings, explore the origin and development of filmic space with an emphasis on its relation to the real and poetic image of the city. The class analyzes selected films as they relate to, comment, criticize, and anticipate the development of contemporary concepts of space, urban space, interior space, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 693. Computer Animation. 3 Credit Hours.
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 694. Geographic Information Systems in Urban Design. 0-3 Credit Hours.
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 695. Interactive Multimedia in Design. 3 Credit Hours.
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 696. Advanced Topics. 3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 697. Designing for the Internet of Things. 3 Credit Hours.
This course examines how current research and development in embedded computation bears on architecture, landscape, and urbanism. Students will explore the implications and impact of ubiquitous computing in its potential to change the way we conceive, construct, inhabit and interact with our buildings, landscapes, and cities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARC 698. Introduction to Programming for Architects. 3 Credit Hours.
As digital tools continue to play an increasing role in the Architect's toolkit, it is becoming increasingly important that Architects not only understand how to use and navigate these tools but to customize and adapt them to their specific needs. Learning how to program allows Architects to start to fully utilize the potential in digital tools by maximizing the possibilities in not only 3D modeling and digital fabrication but in responsive architecture, embedded computation and animating spaces contributing to a more dynamic and potentially inter-connected built environment.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 699. Directed Research. 1-6 Credit Hours.
The course addresses the issues of design as research and pre-design. Students will develop research, write a thesis statement, select a site, prepare a site documentation and site analysis, and develop an architectural program for the thesis project, select pertinent case studies and diagram them. This work will be collected and presented as both a presentation and in book form. In addition, the course prepares students for an independent design project through thoughtful development of a thesis question, site and program. The preparation of the thesis question will require the development of basic research strategies and methods, and understanding of how to find an evaluate sources, the analysis and synthesis of information, the development of a research plan and a design method, and the written and oral presentation of these skills to an outside audience.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 701. Masters Final Project. 6 Credit Hours.
Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 720. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Art (ART)

ART 101. Introduction to Drawing I. 3 Credit Hours.
Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 102. Introduction to Drawing II. 3 Credit Hours.
Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 103. Two-Dimensional Design. 3 Credit Hours.
Line, rhythm, shape, pattern, value, and color in pictorial composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 104. Intro to 3D Design. 3 Credit Hours.
A background in the elements of three-dimensional aesthetics that will broaden students' understanding and creativity in making sculptural objects. This course is the foundation for further study in sculpture, glass, and ceramics courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 105. Figure Drawing. 3 Credit Hours.
Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.
Prerequisite: ART 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 107. Introduction to Drawing III. 3 Credit Hours.
Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.
Prerequisite: ART 101.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ART 109. Introduction to Electronic Media. 3 Credit Hours.
Computer skills for desktop publishing and digital imaging.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 180. Studies in Studio Art. 1-3 Credit Hours.
Studio studies taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ART 202. Introduction to Painting. 3 Credit Hours.
Materials and techniques of easel painting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 206. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 210. Introduction to Digital Photography. 3 Credit Hours.
DSLR Camera and Lens Techniques and Adobe LightRoom Processing In Digital Photography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 217. Introduction to Sculpture. 3 Credit Hours.
Integrated approach to concept development, craftsmanship and appropriate use of materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 251. Introduction to Printmaking. 3 Credit Hours.
Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed collographs; relief printing from linoleum.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 252. Introduction to Lithography. 3 Credit Hours.
To learn how to image, process and print lithographic plates and stones. Hand drawn, photographic and computer generated images will be covered on positive working lithography plates; traditional graining, drawing and processing of lithographic stones will also be covered as an optional method for students to pursue. Most printing will be a single color run but adding a second plate and monotyping will also be demonstrated. Print quality is the primary criteria for judging prints: lithography is known for its ability to create continuous tone prints, so utilizing that range of tone in your images is important. You may develop and choose your own subject matter and content or work experimentally and non-objectively.
Components: STU.
Grading: GRD.
Typically Offered: Spring.
ART 253. Silkscreen I. 3 Credit Hours.
Beginning silkscreen: monotyping with screens, reduction printing, multiple run silkscreen printing and beginning photo silkscreen.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ART 254. Computer Applications for Printmaking. 3 Credit Hours.
Software programs used as printmaking manipulation tools to aid in the planning of prints.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 260. Special topics in Ceramics. 3 Credit Hours.
Rotating topics course with a focus on developing modeling skills with clay through various forming methods.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 261. Hand-Built Ceramics I. 3 Credit Hours.
Beginning hand-building techniques: pinching, coiling, slab construction; introduction to glazing and firing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 262. Wheel Thrown Ceramics I. 3 Credit Hours.
Introduction to wheel throwing, glazing and firing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 263. Introduction to Glass Blowing. 3 Credit Hours.
Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.
Prerequisite: ART 104.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 268. Figure in Clay I. 3 Credit Hours.
Introduction to modeling the human figure in clay with emphasis on form, volume, proportion, basic anatomy, and gesture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 291. Graphic Design I. 3 Credit Hours.
A comprehensive approach to understanding design fundamentals and the practice of graphic communications.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 292. Multimedia I/ Web Design. 3 Credit Hours.
Introduction to web design using several current time-based media.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 293. Typography. 3 Credit Hours.
Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 294. Multimedia II/Animation. 3 Credit Hours.
Animation using time-based media.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 301. Intermediate Painting I. 3 Credit Hours.
Painting in oil and acrylic. Emphasis on experimentation and creative expression.
Prerequisite: ART 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 302. Intermediate Painting II. 3 Credit Hours.
Painting in oil and acrylic; emphasis on experimentation and creative expression.
Prerequisite: ART 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 305. Intermediate Figure Drawing. 3 Credit Hours.
Continuation of ART 105.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 306. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 310. Intermediate Digital Photography. 3 Credit Hours.
Prerequisite: ART 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 311. Color Digital Photography. 3 Credit Hours.
Prerequisite: ART 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 312. Alternative Processes Photography. 3 Credit Hours.
Nineteenth Century Photographic Processes. From the Cyanotype to the Collodion Print, all in the service of creative expression.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 315. Socially Engaged Art. 3 Credit Hours.
Contemporary art practices and the role of visual arts in creating social change, through lectures, group discussions, Individual art projects and a collaborative, hands-on community-based art project. Note: This is a new course implemented as part of the Engaged Faculty Fellows program to provide students with the opportunity for civic engagement within the context of art-making.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ART 317. Intermediate Sculpture I. 3 Credit Hours.
Incorporation of symbol and metaphor to achieve meaning, use of additional materials and technical processes.
Prerequisite: ART 217.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 318. Intermediate Sculpture II. 3 Credit Hours.
Continuation of ART 317.
Prerequisite: ART 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 351. Intaglio/Relief II. 3 Credit Hours.
Continuation of ART 251. Additional processes such as mezzotint, relief printing from woodblocks, multiple block printing, photographic xerox transfers and photo etching.
Prerequisite: ART 251.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 352. Lithography II. 3 Credit Hours.
Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 353. Silkscreen II. 3 Credit Hours.
Continuation of ART 253, including silkscreening on canvas, larger format work, and advanced photo silkscreen techniques.
Prerequisite: ART 253.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 354. Computer Assisted Printmaking: Lithography and Silkscreen. 3 Credit Hours.
The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 355. History of Philosophy of Art. 3 Credit Hours.
An examination of the history of philosophical work on the arts (including literature, visual art, and music) from ancient times through the mid twentieth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 361. Hand-Built Ceramics II. 3 Credit Hours.
Continuation of ART 261.
Prerequisite: ART 261.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 362. Wheel Thrown Ceramics II. 3 Credit Hours.
Continuation of ART 262.
Prerequisite: ART 262.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 363. Cast Glass Processes. 3 Credit Hours.
The art of cast glass including sand casting and lost wax techniques.
Prerequisite: ART 263 or ART 104.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 364. Intermediate Glass Blowing. 3 Credit Hours.
Exploration of glass working techniques.
Prerequisite: ART 263.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 368. Figure in Clay II. 3 Credit Hours.
As continuation of ART 268, this intermediate course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, and gesture.
Prerequisite: ART 268.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 391. Graphic Design II. 3 Credit Hours.
Development of form and conceptual design. Contemporary visual rhetorical strategies such as metaphors, puns, irony and methonomy.
Prerequisite: ART 291.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 392. Multimedia III. 3 Credit Hours.
Video art, multimedia, installation art and interactive animation.
Prerequisite: ART 109.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 401. Advanced Painting I. 3 Credit Hours.
Development of a personal style in painting.
Prerequisite: ART 301 and ART 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 402. Advanced Painting II. 3 Credit Hours.
Continuation of ART 401.
Prerequisite: ART 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 405. Advanced Figure Drawing. 3 Credit Hours.
Continuation of ART 305.
Prerequisite: ART 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 406. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 407. Special Topics: Renaissance and Baroque Art. 3 Credit Hours.
Seminar on changing topics in Renaissance and Baroque Art.
Prerequisite: ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 410. Advanced Digital Photography I. 3 Credit Hours.
Development of a personal style in digital imaging. Course is designed for students to pursue a semester long thematic project.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 411. Experimental Photography. 3 Credit Hours.
Course content determined by faculty member teaching it from studio lighting class to the Artist Book Project. May be repeated for credit.
Prerequisite: ART 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 417. Advanced Sculpture I. 3 Credit Hours.
Individual and collaborative installation and site-specific art.
Prerequisite: ART 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 418. Advanced Sculpture II. 3 Credit Hours.
Development of a personal visual vocabulary.
Prerequisite: ART 417.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 451. Intaglio/Relief III. 3 Credit Hours.
Continuation of ART 351.
Prerequisite: ART 351.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 452. Lithography III. 3 Credit Hours.
Continuation of ART 352.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 453. Silkscreen III. 3 Credit Hours.
Continuation of ART 353.
Prerequisite: ART 353.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 454. Computer Assisted Printmaking: Intaglio and Relief. 3 Credit Hours.
Continuation of ART 354, photo etching and relief processes.
Prerequisite: ART 354.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 462. Advanced Ceramics. 3 Credit Hours.
Development of expressive skills in either handbuilding or wheel throwing techniques.
Prerequisite: ART 361 or ART 362.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 468. Figure in Clay III. 3 Credit Hours.
As continuation of ART 368, this advanced course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, gesture and expressive handling of clay.
Prerequisite: ART 368.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 491. Graphic Design III. 3 Credit Hours.
Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.
Prerequisite: ART 391.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 493. Illustration. 3 Credit Hours.
Contemporary illustration for print, new media, portfolio and exhibition.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 499. Honors Thesis. 3-6 Credit Hours.
Formal thesis and project including an exhibition supervised by member of the department faculty.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 501. Advanced Painting III. 1-6 Credit Hours.
Course content decided between student and professor.
Prerequisite: ART 402.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 502. Advanced Painting IV. 1-6 Credit Hours.
Continuation of ART 501.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 503. Advanced Painting V. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Prerequisite: ART 502.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 504. Advanced Painting VI. 1-6 Credit Hours.
Course content decided between student and professor. An Independent Study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 505. Advanced Painting VII. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 506. Special Topics in Studio Art for Undergraduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 509. Independent Study in Other Media. 1-6 Credit Hours.
Course content decided between student and professor. Independent study course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 510. Advanced Digital Photography 2. 3 Credit Hours.
Course content decided between student and professor. May NOT be repeated for credit.
Prerequisite: ART 410.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 511. Advanced Digital Photography 3. 3 Credit Hours.
Continuation of ART 510. May NOT be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 512. Independent Study in Photography. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 517. Advanced Sculpture III. 3 Credit Hours.
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
Prerequisite: ART 418.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 518. Advanced Sculpture IV. 3 Credit Hours.
Continuation of ART 517.
Prerequisite: ART 517.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 551. Intaglio/Relief IV. 3 Credit Hours.
Advanced work in intaglio/relief processes: course requirements decided between student and professor.
Prerequisite: ART 451.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 552. Lithography IV. 3 Credit Hours.
Advanced work in lithography: course requirements decided between student and professor.
Prerequisite: ART 452.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 553. Silkscreen IV. 3 Credit Hours.
Advanced work in silkscreen.
Prerequisite: ART 453.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 554. Computer Assisted Printmaking. 3 Credit Hours.
Advanced work in computer assisted printmaking; course requirements decided between student and professor.
Prerequisite: ART 454.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 555. Topics in Printmaking. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 562. Contemporary Ceramic Art. 3 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Prerequisite: ART 462.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 563. Independent Study in Ceramics/Glass. 1-6 Credit Hours.
Course content decided between student and professor. An independent study course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 564. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.
Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 591. Portfolio/Business of Design. 3 Credit Hours.
Individually supervised graphic design portfolio. Professional practices in design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 592. Special Projects/Multimedia/Portfolio. 3 Credit Hours.
Video Art, print design, illustration or multimedia portfolio preparation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 593. Seminar in Professional Practices. 1-6 Credit Hours.
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 599. Exhibition Preparation. 3 Credit Hours.
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 602. Advanced Painting ix. 1-6 Credit Hours.
Continuation of ART 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 603. Problems in Studio Art. 1-6 Credit Hours.
Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 604. Seminar in Studio Art. 3 Credit Hours.
Special topics in selected area of studio art.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ART 606. Special Topics in Studio Art for Graduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 609. Independent Study in Other Media. 1-6 Credit Hours.
Course content decided between student and professor. Independent study course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 630. Graduate Digital Photography I. 1-6 Credit Hours.
Advance Digital Photography Course: Content decided between student and professor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 631. Graduate Digital Photography II. 1-6 Credit Hours.
Advance Digital Course: Content decided between student and professor-Lecture
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 632. Graduate Independent Study in Photography. 1-6 Credit Hours.
Independent Study in Photography: Content decided between student and professor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 633. Graduate Digital Photography III. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 634. Graduate Digital Photography IV. 1-6 Credit Hours.
Continuation of ART 610.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 641. Graduate Painting I. 1-6 Credit Hours.
Self-directed study in consultation with instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 642. Graduate Painting II. 1-6 Credit Hours.
Self-directed study in consultation with instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 643. Graduate Painting III. 1-6 Credit Hours.
Self-directed study in consultation with instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 644. Graduate Painting IV. 1-6 Credit Hours.
Self-directed study in consultation with instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 645. Graduate Painting V. 1-6 Credit Hours.
Self-directed study in consultation with instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 646. Advanced Painting VIII. 1-6 Credit Hours.
Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 651. Intaglio/Relief. 1-6 Credit Hours.
Advanced intaglio/relief processes: course requirements decided between candidate and professor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 652. Lithography. 1-6 Credit Hours.
Advanced lithography. Course requirements decided between candidate and professor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 653. Silkscreen. 1-6 Credit Hours.
Advanced work in silkscreen.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 655. Topics in Printmaking. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ART 663. Portfolio/Business of Design. 3 Credit Hours.
Individually supervised graphic design portfolio. Professional practices in design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 664. Special Projects/Multimedia/Portfolio. 1-6 Credit Hours.
Video Art, print design, illustration or multimedia portfolio preparation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 665. Graphic Design. 3 Credit Hours.
Advanced graduate projects in graphic design.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 666. Multimedia. 3 Credit Hours.
Advanced graduate projects in multimedia.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 667. Experimental Illustration for Print and Interactive Media. 3 Credit Hours.
Exploration and innovation of contemporary illustration and digital publishing. Research and practice of new styles of international illustration for print and interactive media.
Prerequisite: ART 663 or ART 665.
Components: STU.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 671. Graduate Sculpture I. 1-6 Credit Hours.
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 672. Graduate Sculpture II. 1-6 Credit Hours.
Continuation of ART 671. Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 673. Graduate Sculpture III. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 674. Graduate Sculpture IV. 1-6 Credit Hours.
Continuation of ART 673. Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 675. Graduate Sculpture V. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 676. Graduate Sculpture VI. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 681. Writing About Art. 3 Credit Hours.
Writing about art on a professional level.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ART 682. Contemporary Ceramic Art I. 1-6 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 683. Contemporary Ceramic Art II. 1-6 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 684. Contemporary Ceramics Art III. 1-6 Credit Hours.
Content to be decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 685. Contemporary Ceramics Art IV. 1-6 Credit Hours.
Continuation of ART 661.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 686. Contemporary Ceramic Art V. 1-6 Credit Hours.
Continuation of ART 685: Contemporary Ceramic ART IV
Prerequisite: ART 685.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 687. Contemporary Ceramic Art VI. 1-6 Credit Hours.
Continuation of ART 686: Contemporary Ceramic Art V
Prerequisite: ART 686.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 688. Independent Study in Ceramics/Glass. 1-6 Credit Hours.
Theory, history and practice of Video Art and contemporary documentary film and their various manifestations. Creation of conceptual videos for exhibition, web and interactive media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
**ART 689. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.**
Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**ART 693. Seminar in Professional Practices. 1-6 Credit Hours.**
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**ART 699. Exhibition Preparation. 3 Credit Hours.**
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 810 Thesis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**ART 810. Master's Thesis. 1-6 Credit Hours.**
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

**ART 820. Research in Residence. 1 Credit Hour.**
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ART 810 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

## Art History (ARH)

**ARH 131. Survey of Western Art I. 3 Credit Hours.**
The art of western cultures from pre-history through the Middle Ages.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARH 132. Survey of Western Art II. 3 Credit Hours.**
The art of western cultures from the Renaissance through the 20th century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARH 207. History of Photography. 3 Credit Hours.**
A study of photography as a visual medium of expression and communication: a chronological examination of its origins, styles and uses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**ARH 220. Student Docent Practicum at the Lowe Art Museum. 1 Credit Hour.**
Students gain hands-on training and practical experience on becoming a museum docent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ARH 225. Introduction to Museum Studies. 3 Credit Hours.
An introductory study of the practices and methodologies that shape and guide curatorial studies within the context of museums and similar institutions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 250. Special Topics in Non-European Art. 3 Credit Hours.
Special topics in Non-European art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 260. Islamic Art. 3 Credit Hours.
Islamic art from the 7th to the 17th century including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Study of Islam as a religious and political entity showing how the Islamic world defined itself in cultural creation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARH 270. Spanish Art. 3 Credit Hours.
A chronological study from prehistory to the present, addressing significant periods in Spanish art history, and establishing the unique characteristics of this art. How the effects of historical conditions (Islamic presence on the peninsula, American colonies, Franco) have defined Spain as distinct from its European neighbors.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 320. Aesthetics and Meaning in African Art and Cultures. 3 Credit Hours.
This course is designed to historically, materially, artistically, and politically engage the diversity of artistic production and cultural life on the African continent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 321. Andean Art. 3 Credit Hours.
South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 325. Museum Studies Internship. 3 Credit Hours.
The Museum Studies internship is an independent study course in which the student works on educational projects or programs in a museum.
Components: FLD.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 326. Art of Japan. 3 Credit Hours.
The Arts of South Asia with selections from India and Thailand.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 327. Art of China. 3 Credit Hours.
The Art of East Asia with selections from China, Korea, and Japan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 332. Greek Art. 3 Credit Hours.
The art of ancient Greek civilization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARH 333. Roman Art. 3 Credit Hours.
Roman art from the 1st century B.C. through the 4th century A.D.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 335. Early Christian and Byzantine Art. 3 Credit Hours.
Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 336. Medieval Art. 3 Credit Hours.
Western European art from the 4th through the 12th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 337. Italian Renaissance Art. 3 Credit Hours.
The painting, sculpture, and architecture of Florence in the 15th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 338. Sixteenth Century Italian Art. 3 Credit Hours.
The painting, sculpture, and architecture of Italy in the 16th century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 339. Northern Renaissance Art. 3 Credit Hours.
The painting of France and the Netherlands in the 14th and 15th centuries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 340. Baroque Art. 3 Credit Hours.
Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas.
Prerequisite: ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 341. Eighteenth-Century European Art. 3 Credit Hours.
European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain.
Prerequisite: ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 342. Nineteenth-Century European Art. 3 Credit Hours.
Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 343. Modern Art. 3 Credit Hours.
Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 344. Contemporary Art. 3 Credit Hours.
American and European Art from the Second World War to the present in its social, political, and theoretical contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARH 345. Contemporary Art in American Culture. 3 Credit Hours.
A critical survey of visual art practices from the 1950s to the present within the United States. By analyzing the multiple legacies of the early avant-garde, the role of nationalism, and the development of the global art market, this course will consider the social, political, and philosophical questions raised by postmodernism and its formative influence on American art after WWII.
Prerequisite: ARH 131 or ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 346. History of Graphic Design. 3 Credit Hours.
Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 347. Special Topics in Art History. 3 Credit Hours.
Changing topics in Western and non-Western art that focus on a specific movement, style, or artist.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 349. Special Topics in Art and the Law. 3 Credit Hours.
Changing topics on the relationship between art and law, with a particular focus on policy and the art world.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 357. Critical Issues in the History Photography. 3 Credit Hours.
The history and theory of photography in visual culture and an exploration of debates regarding how this medium of mass communication has transformed our perceptions and conceptions of art, society, and culture over the past two centuries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 360. Art and Cinema. 3 Credit Hours.
Exploration of the relationship between art, art history, and cinema.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 365. Latin American Modernism. 3 Credit Hours.
The art and theories of Latin American Modernism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 385. Studies in Art History. 1-3 Credit Hours.
Art History studies taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ARH 405. Special Topics in Medieval Art. 3 Credit Hours.
Changing topics in Medieval Art.
Prerequisite: ARH 131.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 408. Special Topics in Modern Art. 3 Credit Hours.
Seminar on changing topics in Modern Art.
Prerequisite: ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARH 409. Special Topics in Contemporary Art. 3 Credit Hours.
Seminar on changing topics in contemporary art.
Prerequisite: ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 411. Special Topics: Museum Studies. 3 Credit Hours.
Seminar on changing topics in Museum studies.
Prerequisite: ARH 225. Requisite: Two additional art history courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 420. Cuban Art, Art History, and the Creation of the Modern Cuban Subject. 3 Credit Hours.
This seminar focuses on the fine art, visual culture, and performance history of Cuba during the 19th and 20th centuries.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 421. Reimagining Modernity: Haitian Art and Art History. 3 Credit Hours.
Haiti is a revolutionary society born out of the violence of slavery and revolution during the age of Enlightenment. It can be argued that it is a site of a double artistic modernity; post 1804 with the establishment of the Republic of Haiti and later the first art school in the Americas, and post 1943 following the founding of the Centre d'Art. However, Haiti is rarely considered as a site of modernity. Instead historically afflicted by incalculable crises and unspeakable violence at the hands of man and nature, the nation has been sidelined in art historical narratives in the Americas before and arguably since the 1943 renaissance. This class re-centers Haiti in the discipline of art history as a space that offers fascinating challenges to and possibilities for decentered global art histories. Drawing on seminal scholarship, unique archival resources and art collections at the University of Miami, the city of Miami and beyond, this seminar traces artistic practices and philosophies in and from Haiti that were trans-Atlantic in their formation and always global in their relations.
Components: SEM.
Grading: GRD.

ARH 450. Seminar in Methodology and Theory in the History of Art. 3 Credit Hours.
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 505. Problems in Art History. 3 Credit Hours.
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 506. Problems in Art History. 3 Credit Hours.
A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 507. Museum Studies Seminar. 3 Credit Hours.
The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 508. Museum Exhibition. 3 Credit Hours.
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARH 509. Museum Internship. 1-3 Credit Hours.
UM sponsored internship with Miami-area museum.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 510. Arts Administration Internship. 1-3 Credit Hours.
UM sponsored internship with Miami-area arts institution.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 511. Artlab @ the Lowe. 3 Credit Hours.
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
Prerequisite: ARH 131 and ARH 132.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 530. Seminar in Art History. 3 Credit Hours.
Special topics in western and nonwestern art. Semester’s topic will be announced.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 540. History of Museums and Collecting. 3 Credit Hours.
History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 550. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.
Special topics including museum practices and theory, women’s art and contemporary issues.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 560. Seminar in Non-European Art. 3 Credit Hours.
Special Topics in Non-European Art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 598. Seminar in Contemporary American Art. 3 Credit Hours.
Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ARH 605. Problems in Art History. 3 Credit Hours.
Students conduct independent, graduate research on an art historical topic approved by faculty.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 606. Problems in Art History. 3 Credit Hours.
Students conduct independent, graduate research on an art historical topic approved by faculty.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 607. Museum Studies Seminar. 3 Credit Hours.
The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARH 608. Museum Exhibition. 3 Credit Hours.
Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 609. Museum Internship. 3 Credit Hours.
UM sponsored internship with Miami-area museum.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 610. Arts Administration Internship. 1-3 Credit Hours.
UM sponsored internship with Miami-area arts institution.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ARH 611. Artlab @ the Lowe. 3 Credit Hours.
Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARH 630. Seminar in Art History. 3 Credit Hours.
Special topics in western and nonwestern art. Semester’s topic will be announced.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 640. History of Museums and Collecting. 3 Credit Hours.
History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.
Components: SEM.
Grading: GRD.

ARH 650. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.
Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 660. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.
Special topics including museum practices and theory, women’s art and contemporary issues.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 670. Seminar in Non-European Art. 3 Credit Hours.
Special Topics in Non-European Art.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARH 698. Seminar in Contemporary Art. 3 Credit Hours.
Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ARH 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
ARH 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in ARH 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

Atmospheric Science (ATM)

ATM 102. Introduction to Weather and Climate. 3 Credit Hours.
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 103. Survey of Modern Meteorology. 3 Credit Hours.
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to all RSMAS majors and minors.
Requisite: Major or Minor in the Rosenstiel School of Marine and Atmospheric Science and Pre/Corequisite: MTH 108 or higher (MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171).
Components: LEC.
Grading: GRD.
Typically Offered: Winter.

ATM 243. Weather Forecasting. 3 Credit Hours.
Application of physical principals to weather forecasting. Use interpretation of computer-generated forecast guidance products of the U.S. Weather Service.
Prerequisite: ATM 103 or MSC 103 and MTH 108 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 244. Tropical Weather and Forecasting. 3 Credit Hours.
Introduction to tropical weather systems, with an emphasis on hurricanes, and syntheses of observational data and numerical model predictions to create forecasts
Prerequisite: ATM 103 and ATM 243.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 265. Atmospheric Chemistry. 3 Credit Hours.
ATM 265 is focused on those aspects of environmental chemistry of most relevance to meteorology students. The class fulfills the American Meteorological Society (AMS) chemistry expectations for a Bachelor’s Degree in Meteorology, and in addition, addresses further recommendations from the AMS. AMS expects knowledge of atomic structure and chemical bonding, and, of the properties of gases. Recommended ‘beyond the basics’ goals include air quality and environmental science applications.
Prerequisite: ATM 103.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 303. Meteorological Instrumentation and Observation. 3 Credit Hours.
Techniques for measuring meteorological variables at the ground and in the free atmosphere.
Prerequisite: ATM 103, and PHY 101 or PHY 205 or PHY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 305. Atmospheric Thermodynamics. 3 Credit Hours.
Equation of state; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams.
Prerequisite: PHY 201 or PHY 205.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ATM 306. Advanced Principles in Broadcasting Meteorology. 3 Credit Hours.
Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.
Prerequisite: ATM 103 and ATM 243.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 307. Introduction to the Physics of Climate. 3 Credit Hours.
The physical mechanisms which govern the earth's climate and climate variability.
Prerequisite: ATM 305 or MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.
An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.
Prerequisites: CSC 120.
Prerequisite: CSC 120 or MSC 203.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 371. Readings in Atmospheric Science. 1-3 Credit Hours.
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from ATM371, ATM411, and ATM412 can be counted towards any of the RSMAS major or minor requirements with no more than 3 credits from each course.)
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

ATM 405. Atmospheric Dynamics I. 3 Credit Hours.
Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.
Prerequisite: ATM 305 (or MSC 305) and MTH 310 or MTH 211.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 406. Atmospheric Dynamics II. 3 Credit Hours.
Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.
Prerequisite: MSC 405 or ATM 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 407. Weather Analysis. 4 Credit Hours.
Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.
Prerequisite: ATM 305 or MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 409. Cloud Physics, Radiation, and Remote Sensing. 3 Credit Hours.
Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.
Prerequisite: ATM 305.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 411. Research in Atmospheric Science. 1-3 Credit Hours.
Individual, independent research projects with faculty supervision. A formal written report is required that satisfies signed contract with faculty supervisor.
Requisite: Junior or Senior Standing.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 412. Undergraduate Thesis in Atmospheric Science. 1 Credit Hour.
Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.
ATM 411 AND Senior Standing.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 511. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 532. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 533. Atmospheric Boundary Layer. 3 Credit Hours.
The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 534. Introduction to Atmospheric Chemistry. 3 Credit Hours.
This course covers the basic principles of atmospheric chemistry. Concepts taught will include gas phase reactions, the production and destruction of ozone, aerosol size and composition.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 536. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 537. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer terms effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 553. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
1 year of Calculus 1 year Physics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 554. Climate Variability. 3 Credit Hours.
This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 562. Advanced Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor'easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.
Prerequisite: ATM 243 and ATM 305 and ATM 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 563. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 581. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 582. Special Topics. 3 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 583. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 584. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 585. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ATM 611. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves and turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 614. Introduction to Weather and Climate. 3 Credit Hours.
This course will cover the structure, physics, dynamics and thermodynamics of the atmosphere; including weather analysis, weather forecasting, climate and climate change. Contemporary topics covered in this class will include global warming, the ozone hole, hurricanes, thunderstorms and other severe weather phenomena.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 624. Applied Data Analysis. 3 Credit Hours.
The course is intended to jump-start students in strategies for fruitful computer interaction practices for careers in MPO areas of science. Academic topics include key concepts in probability & statistics, issues of graphical evidence and inference, linear models and regression, spectral analysis, and matrix decomposition. Practical topics include hands-on exercises in data analysis and the sharing of code+results and interpretation. Students do projects on data from their research or interests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 632. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 633. Atmospheric Boundary Layer. 3 Credit Hours.
The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 634. Introduction to Atmospheric Chemistry. 3 Credit Hours.
This course covers the basic principles of atmospheric chemistry. Concepts taught will include gas phase reactions, the production and destruction of ozone, aerosol size and composition.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 636. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 637. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer terms effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 651. Introduction to Atmospheric Dynamics. 3 Credit Hours.
This course surveys the dynamics of atmospheric flow and the physically-grounded description and depiction of weather phenomena. It is intended to serve as core preparation for incoming PhD students whose research will be dynamical, while also serving as an accessible overview for students in other subdisciplines. For these reasons, it stresses phenomena and the essentials of our physical discourses about them (emphasizing useful approximations and lucid treatments), with enough exposure to the underlying full-complexity fundamentals to facilitate more advanced study in the future.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 652. Introduction to Atmospheric Physics. 3 Credit Hours.
The goal of this class is to develop an understanding of the fundamental physical processes governing cloud behavior and atmospheric radiative transfer, including atmospheric thermodynamics. The class will focus on processes with temporal scales of one day or less, and spatial scales of 1km or less, and will recognize the links to weather and climate, or through the student presentations. Students will learn about: cloud formation, lifetime, and dissipation, and how clouds interact with the aerosol, thermodynamic, and dynamic environments; about how clouds and clear skies interact with sunlight and infrared. This course is split into two sections: the first half will cover thermodynamics and cloud physics, and the second half will cover atmospheric radiation. Guest lectures by advanced graduate students and postdoctoral research associates will introduce students to current research areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 653. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 654. Climate Variability. 3 Credit Hours.
This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 660. Tropospheric Chemistry I. 3 Credit Hours.
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 662. Advanced Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor’easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 663. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 681. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ATM 682. Special Topics. 3 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 683. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 684. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 685. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 701. Seminar in Atmospheric Sciences. 1 Credit Hour.
Oral presentation of research and special topics by students, faculty, and visiting scientists.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

ATM 711. Geophysical Fluid Dynamics II. 3 Credit Hours.
The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 713. Predictability. 3 Credit Hours.
Introduction to concepts of predictability and error growth, beginning from the seminal papers of Ed Lorenz, and expanding into state estimation, data assimilation, forecast sensitivity and ensemble prediction.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 716. Lagrangian Fluid Dynamics and Predictability. 3 Credit Hours.
The ash cloud produced by the eruption of Eyjafjallajökull in Iceland, the oil spill produced by the explosion of the Deepwater Horizon drilling rig in the Gulf of Mexico, and release of debris and radioactive contamination into the Pacific Ocean after the Fukushima nuclear reactor was hit by the Tohoku tsunami, are examples of events that have caused considerable impact to the environment. They all represent problems in Lagrangian ocean or atmospheric dynamics in which predicting where the material released into the environment will be transported by the ocean currents or winds is critical. A common approach to predict the outcome of an event like the above is to run an ocean or atmosphere circulation model simulations and then integrate the resulting velocity fields from a given release location to predict pollutant trajectories. An important drawback of such an approach is that the predictions are highly sensitive to small changes in the release time and location. Attempts to cope with the sensitivity to initial conditions include running several different models for the same scenario, but this typically leads to even larger distributions of advected tracers, hiding the key organizing structures of the flow. Improved understanding and forecasting requires novel notions and techniques capable of casting light on why material is transported the way it is by a given flow. The goal of this course is acquaint the student with a series of recent developments originated at the interface of nonlinear dynamics and fluid dynamics that have led to a number of novel such notions and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ATM 731. Air-Sea Interaction. 3 Credit Hours.
Oceanic and atmospheric mixed layers including fluxes of heat, momentum, moisture and salt between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 732. Climate Dynamics. 3 Credit Hours.
Basic understanding of the Earth's Climate System and its variability on time scales ranging from weeks to millennia. Topics include internal atmospheric variability, coupled ocean-atmosphere interactions, and the theory, observations and modeling of climate change.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 750. Reaction Kinetics and Molecular Dynamics. 3 Credit Hours.
Theories and experimental techniques for studying kinetics in the gas-phase, association, unimolecular and bimolecular reactions, chain reactions, flames, statistical theories, potential energy surfaces, collision dynamics, kinetics in solution and the solid-state, experimental methods, diffusion-controlled processes, transition state theory, thermal decomposition, and nucleation are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 761. Atmospheric Chemistry II. 3 Credit Hours.
Advanced atmospheric chemistry.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 762. Computer Models in Fluid Dynamics. 3 Credit Hours.
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 765. General Circulation of the Atmosphere. 3 Credit Hours.
Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 767. Spectral and Finite Element Methods in Computational Fluid Dynamics. 3 Credit Hours.
The simulation of fluid flows in geometrically complex domains (like ocean basins) and/or with high fidelity requires the adoption of new discretization techniques that can simultaneously handle the complicated geometry and permit high accuracy solution. The finite element method has traditionally been used to tackle the geometric complexity while spectral methods have been developed to handle high accuracy in simple geometries. Here we present an approach to handle both complexity within a single framework, namely the spectral element method. The course starts by describing the weak formulation common to all finite element methods which, by design, are geometrically flexible. The second part of the course describe how high order polynomial can be implemented within the finite element framework to achieve high accuracy rates.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ATM 768. ENSO Dynamics, Prediction, and Predictability. 3 Credit Hours.
This course will provide students with a comprehensive observational and mechanistic understanding of the El Nino and the Southern Oscillation (ENSO) phenomena and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean interactions; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 772. Vortex Dynamics. 3 Credit Hours.
This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 774. Advanced Studies. 1-4 Credit Hours.
Supervised study of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 805. MPS Internship. 1-6 Credit Hours.
The MPS internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 810. Master Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ATM 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Biochemistry and Molecular Biology (BMB)

BMB 145. Introduction to BMB Research. 2 Credit Hours.
Students will collaborate on a research project and learn valuable laboratory skills. The goal for this course is to make students "research-ready" through an active, inquiry-based, platform for developing core competencies in biology, genetics, BMB (biochemistry & molecular biology), bioinformatics, scientific discourse and ethics.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
**BMB 245. Foundations in BMB Research. 2 Credit Hours.**
Students shadow a research assistant in the lab of a BMB faculty member and learn about the research projects and techniques used by the group. Students will assist in preparing reagents, conducting experiments, analyzing data and generating brief reports. Attendance in lab group meetings is expected. Students maintain a weekly online journal and will write a paper describing the research in the lab and proposing a research problem and approach to solve in BMB545.

Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**BMB 401. Biochemistry for the Biomedical Sciences. 4 Credit Hours.**
The biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids are rigorously described, emphasizing problem solving strategies required of biomedical field applications.
Prerequisite: CHM 201 or CHM 222. And with a grade of C- or higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BMB 402. Principles of Experimental BMB. 2 Credit Hours.**
An active, inquiry-based, platform for developing core competencies in biochemistry & molecular biology, making students "research ready".
Corequisite or Prerequisite: BMB 401.

Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

**BMB 411. Readings in BMB. 1 Credit Hour.**
Students read and discuss one BMB primary research article each week and answer a set of questions meant to provoke critical evaluation of the work. The course introduces students to critical reading of the primary literature in BMB and is open to students at any level. Peer-mentoring and informal student-led instruction is central to the course.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BMB 417. Metabolic Regulation. 3 Credit Hours.**
Students will learn to formulate mechanisms of enzyme catalysis and inhibition. Next, students will learn how to plot and analyze enzyme kinetic and binding data. Data analysis will be extended to more complicated, but realistic scenarios, to more rigorously examine metabolic flux control points.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**BMB 501. Senior Seminars. 1 Credit Hour.**
Students attend seminars of their own choice, presented by either visiting/residing faculty or graduate/postdoctoral students on recent research topics in BMB or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once.
Prerequisite: BMB 401.

Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

**BMB 506. Biomedical Case Studies. 1 Credit Hour.**
Students explore topics in BMB in the context of solving problems presented in a clinical/biomedical framework. Students work in small groups and independently to acquire, critically evaluate, synthesize and present information.
Corequisite or Prerequisite: BMB 401.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BMB 507. Protein Structure, Function and Biology. 3 Credit Hours.**
The physical characteristics and behavior of proteins are described, including structure, folding, dynamics, modifications, and interactions. In addition, experimental approaches to protein structure and function are addressed. Readings include both textbook assignments and current research articles, and a term paper is written and submitted for writing credit.
Prerequisite: BMB 401.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BMB 509. Molecular Biology of the Gene. 3 Credit Hours.
Biochemical processes involved in the flow of genetic information in both prokaryotes and eukaryotes are described, including DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Extensive classroom discussion is mandatory. Reading includes BMB primary research papers, course notes and a textbook. Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 511. Topics in BMB. 3 Credit Hours.
Students independently explore the literature in BMB with guidance by a BMB Faculty mentor. BMB primary research literature in an area of mutual interest to the student and the Faculty mentor (usually a content expert in that area) is discussed. Students prepare a paper or other appropriate product (e.g. computer software, a structural model, a dynamic simulation) for evaluation. Writing credit is available for papers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 514. Genetics and Genomics: Principles, Mechanisms, and Use. 3 Credit Hours.
The quantitative and analytical problem solving, as well as spatial reasoning in genetics. The course will propose genetic hypotheses, identify genetic predictions, create genetic systems for challenging these predictions, and analyze genetic data to solve practical problems. Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 518. Nanomedicine. 3 Credit Hours.
Students will learn how various nanomaterials are synthesized, characterized, and utilized in various medical applications, including imaging, drug delivery, gene therapy, and tissue engineering. Student abilities to read and comprehend advanced research topics and applications in nanotechnology and applications to medicine will be considerably enhanced. Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 519. Epigenetics and Nutrition. 3 Credit Hours.
How epigenetic mechanisms control gene expression and (ii) how epigenetic modifications are propagated. Then, students explore how such epigenetic control and inheritance can be modulated through diet and nutrition. Class participation and attendance are required, since in class discussion will be largely based on emerging and late-breaking topics from recent literature. Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 545. Research Problems in BMB. 3-12 Credit Hours.
Participation in the research laboratory of a faculty mentor to work on an independent research project. Students develop abilities to formulate good questions and sound hypotheses, design practical experiments, collect and analyze useful data, and make justifiable conclusions. Students maintain a weekly online journal, write a paper, and present their research in the lab. Two semesters of BMB 545 are required to write a thesis (pre-requisite for graduating with honors in BMB).
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 555. Cellular Structure, Function, and Biology. 3 Credit Hours.
Students learn composition and function of cellular organelles, and closely examine their biogenic and degradative pathways. Next, students learn cell signaling pathways and mechanisms controlling mitosis, meiosis, and cytokinesis that account for inherited traits. Studies of the molecular basis of cell-cell and cell-matrix interactions provide students with better understanding of tissue stability and function. Modern perspectives regarding stem and cancer cell biology are explored, along with new cell-based therapeutic strategies. Prerequisite: BMB 401.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BMB 601. Research Journal Club. 1 Credit Hour.
All MS students must participate in the BMB Journal Club course. In this course, pre-doctoral trainees are required to critically review published paper(s) of their choice in the BMB topic area in Fall semester and present their research findings in Spring semester. The MS students will participate in this course and will write summary of the presentation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 605. Principles of Biochemistry and Molecular Biology. 3 Credit Hours.
This course is divided into three parts. Part 1, examine the biochemical composition and structure of the four basic types of biological macromolecules: (i) carbohydrates, (ii) nucleic acids, (iii) proteins, and (iv) lipids. In addition, students will learn the composition and function of dietary nutrients and vitamins. Part 2, study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. A particular emphasis will be towards understanding control of gene expression by various epigenetic and signaling mechanisms. Part 3, learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 610. Advanced Topics in Biochemistry and Molecular Biology. 3 Credit Hours.
This is a special-topics course for graduate students and advanced undergraduate students. This course will focus on nanotechnology and its applications in medicine. This course offers an introductory concept of an interdisciplinary field of nanotechnology for students with physical, chemical, biological, medical, and engineering background. This course will be focused on nanomaterials, engineering of nanomaterials, cellular and intracellular interactions of nanoparticles, nanotechnology-based drug delivery systems, nano-based diagnosis, nanotoxicology, and clinical translational aspects of nanomedicines. Unique properties, which are offered by the materials at the nanoscale, will be discussed. Nanotechnology in sensing and diagnostics will be discussed. The topics to be discussed are of considerable interest across a broad range of areas in medicine, chemistry, biology, physics, pharmacy, medicine, mathematics, and engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 612. Human Genetics. 3 Credit Hours.
This course will provide the learner with greater knowledge and current understanding the human genome, the mechanisms by which variations and environmental factors contribute to human phenotypes. Examples of potential topics include chromosome aberrations, phenotype-genotype correlations, cytogenetics, multifactorial traits, population genetics, risk assessment, multi-generation Epigenetics, reprogramming and gene therapy. Importantly, students will learn the new developments in Epigenetics. Epigenetics is considered by many to be the "new genetics". The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. This course will discuss the overwhelming evidence of the contribution of non-genetic factors, such as nutrition, environment, and chemical exposure, on gene expression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 614. Molecular Genetics. 3 Credit Hours.
There are 4 major sub-disciplines of genetics. This course will focus on the first three and leave assessment of quantitative traits as needed for students work. The sub-disciplines include, 1. transmission genetics: basic principles of genetics and how traits are passed from one generation to the next. 2. Molecular genetics: the chemical nature of genes and genomes; how genetic information is encoded, replicated, and expressed. It includes the cellular processes of replication, transcription, and translation - by which genetic information is transferred from one molecule to another - and gene regulation - the processes that control the expression of genetic information. 3. population genetics: the genetic composition of groups of individual members of the same species and how that composition changes over time and geographic space, and 4. quantitative genetics: deals with phenotypes that vary continuously (in characters such as height or mass) – as opposed to discretely identifiable phenotypes and gene-products (such as eye color, or the presence of a particular biochemical).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 615. Structural Biology and Applications to Drug Discovery (Masters). 2 Credit Hours.
This course provides an introduction to structural biology and illustrates how understanding the relationship between structure and function of biological macromolecules drives drug discovery. The course will be in three parts, with the first covering experimental and computational tools of structural biology – X-ray crystallography, cryo-electron microscopy and molecular modeling. The second part of the course will look at examples where structural biology has influenced drug design. The final part of this course will look at structures of nucleic acid (DNA and RNA) binding proteins and how they inform drug discovery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BMB 617. Readings in Molecular Biology. 1 Credit Hour.
Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 618. Scientific Communications & Journal Review. 2 Credit Hours.
This course will train students in how to communicate science to different audiences. The lectures will focus on training students on how to make effective power point and poster presentations. Lectures will also guide on how to write manuscripts and grant applications. Training in data science as well as patents and inventions will be provided. Students will get understanding on academic career. Each student will prepare presentation on their research and will be guided by the instructor on how to improve it.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 619. Epigenetic Control of Gene Expression. 4 Credit Hours.
This course will provide thorough understanding of Epigenetics and the interaction of nutrients and the epigenome. Epigenetics is considered by many to be the new genetics because of the overwhelming evidence of the contribution of non-genetic factors such as nutrition, environment, and chemical exposure on gene expression. The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. Aberrations of epigenetics influence many diseases for which clinical intervention is already in place, and many novel epigenetic therapies for cancer, immune disorders, neurological and metabolic disorders, and imprinting diseases are on the horizon.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BMB 630. Research in Biochemistry and Molecular Biology I. 1-9 Credit Hours.
This will form the most significant portion of the MS student’s degree program. Students will perform research with a mentor that they choose depending upon their research interest. A committee consisting of 3 faculty from the graduate program will be formed to evaluate student for the final oral comprehensive examination. The final oral exam will be scheduled in the last semester of the study. This oral comprehensive exam will involve the review of all experimental data and the entire presentation. During the examination, the mentor is responsible for allotting appropriate time for questions by all participants. Students are expected to understand the significance of their findings, display adequate knowledge of the relevant literature and know the theory and limitations of methods employed. Students must demonstrate the ability to independently design, execute and interpret original experiments. This group will make a decision to pass or fail a student’s oral comprehensive exam.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 631. Independent Studies in BMB Scientific Research. 1-6 Credit Hours.
The overall goal of the BMB research is to provide students with an opportunity for independent learning with exposure to scientific research. Special work, lecture, laboratory experience, or a combination of any of these, as determined by the student advisor in accord with the student’s individual scientific interest.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 632. Internship in Biochemistry and Molecular Biology. 1-9 Credit Hours.
Through this course, students in the industrial track will participate in an internship in industry. The students’ mentor/course instructor will help in identifying internship opportunities for students and monitor their progress.
Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 633. Capstone project in Biochemistry and Molecular Biology. 1-3 Credit Hours.
This course will help students learn how to prepare presentations as well as write reports and publications. Students will also learn about the latest advances in the biochemistry field and upcoming topics of interest to the field to help them prepare for their careers. Students will write a report-based on the industrial internship. They will also prepare a presentation about the work performed. The students’ mentor/course instructor will provide guidance as needed in writing the report and presentation.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
BMB 641. Essentials of Biotechniques I. 1 Credit Hour.
Students will be introduced to a variety of techniques used in biotechnology research. The course will be a combination of lectures and hands-on technique experience. The course will teach students both traditional and new techniques used in BMB.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BMB 642. Essentials of Biotechniques II. 3 Credit Hours.
Students will be introduced to a variety of techniques used in biotechnology research. The course will be a combination of lectures and hands-on technique experience. The course will teach students both traditional and new techniques used in BMB.

Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BMB 645. Research Problems in Biochemistry, Cell and Molecular Biology. 2-3 Credit Hours.
Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 680. Responsible Conduct of Research. 1 Credit Hour.
In this course, ethical case studies are discussed, and an introduction to laboratory management is provided. Short lectures and discussion are conducted to provide students with the ability to tackle dilemmas and pitfalls associated with the responsible conduct of research. Information is provided on regulatory requirements of conducting research, including safety issues and the use of humans, animals, and radioactive/bio hazardous material. The obligations of scientists with respect to public policy and advocacy are also discussed. In addition, students will participate in an online RCR training course (RST-401/501/601 sections) offered by the Collaborative Institutional Training Initiative (CITI) Program at UM. A CITI Program RCR course typically requires around 4 hours to complete. These students receive an “S” (satisfactory) grade for a CITI RCR course after the completion of the online module. This online training course will serve as yearly continuation of RCR training after completion of the Research Ethics course. Additionally, every semester faculty in the department present a seminar related to topics in research ethics. Students also attend an online training in RCR. Several professional skills workshop such as grant writing workshop, career workshops, and seminars by professional scientists related to career are organized by the BMB department as well as the Office of Graduate studies. Students will attend these series of events.

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BMB 701. Research Journal Club. 1 Credit Hour.
All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 702. Biochemical Science Seminar. 1 Credit Hour.
The Biochemistry and Molecular Biology (BMB) department has an active seminar program that meets on every Friday at noon. In this program seminars are presented by the BMB faculty (primary and secondary), invited speakers within the University of Miami and from other universities, government agencies, and industry. All BMB Graduate Students enrolled in this course will be required to attend this seminar and and will have informal interactions with speaker, and exchange ideas at lunch on the seminar day.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BMB 705. Principles of Biochemistry and Molecular Biology. 3 Credit Hours.
This course is divided into three parts. In Part 1, you will examine the biochemical composition and structure of the four basic types of biological macromolecules: (i) carbohydrates, (ii) nucleic acids, (iii) proteins, and (iv) lipids. In addition, you will learn the composition and function of dietary nutrients and vitamins. Most important, you will be introduced to nature’s catalytic substances termed “enzymes”, paying special attention to their mechanisms of action and regulation. In Part 2, you will study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. Here, you will give particular emphasis towards understanding control of gene expression by various epigenetic and signaling mechanisms. In Part 3, you will learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials. You are expected to finish this course with rigorous understanding of the biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids. This will enable you to read and understand advancing topics and applications in a vast array of biomedical specialties.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 709. Advanced Biochemistry and Molecular Biology. 3 Credit Hours.
This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 710. Advanced Topics in Biochemistry and Molecular Biology. 1-5 Credit Hours.
This course is offered by various faculty members in the department on a rotating basis depending upon their expertise. For example, an advanced topic course in Nanomedicine offered by Dr. Deo and Dr. Dhar covers these topics through lectures.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 711. Best Practices in BMB Instruction. 1-3 Credit Hours.
Graduate students in the basic sciences will explore different approaches to science course development, implementation and assessment. This includes identifying gaps in the curriculum, creating classroom structure that reflects the content and execution of classroom activities, identifying and gathering appropriate material from the primary research literature, instructing undergraduates in how to become highly interactive self-directed learners, providing formative feedback to improve student achievement throughout a course, proper design and implementation of assessment tools, student communication, classroom management and ethics.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 712. Human Genetics. 3 Credit Hours.
This course will provide the learner with greater knowledge and current understanding the human genome, the mechanisms by which variations and environmental factors contribute to human phenotypes. Examples of potential topics include chromosome aberrations, phenotype-genotype correlations, cytogenetics, multifactorial traits, population genetics, risk assessment, multi-generation Epigenetics, reprogramming and gene therapy. Importantly, students will learn the new developments in Epigenetics. Epigenetics is considered by many to be the "new genetics". The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. This course will discuss the overwhelming evidence of the contribution of non-genetic factors, such as nutrition, environment, and chemical exposure, on gene expression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 714. Molecular Genetics. 4 Credit Hours.
This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic implementation, recombination, suppression, transposition, conjugation, transformation, transduction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, Drosophila, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in bio-medical research.
Components: DIL.
Grading: GRD.
Typically Offered: Spring.
BMB 715. Structural Biology and Applications to Drug Discovery. 2 Credit Hours.
This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the
discoveries of new drugs.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 716. Bioinformatics of Gene Regulation and Protein Function. 3 Credit Hours.
Among the skills required to become a successful interdisciplinary life scientist is the ability to navigate biological databases to better understand
gene and protein function. Genome sequences contain the signals that guide differential gene expression and encode structural RNAs, regulatory
RNAs and proteins. This course will introduce the tools, databases and evolutionary considerations that help us understand the regulation of
gene expression and predict protein function. The biochemical and regulatory functions encoded in genomic DNA sequences will be explored
using bioinformatics techniques including gene finding, BLAST searches, PubMed searches, high-throughput dataset mining, multiple alignments,
phylogenetic analysis, identification of conserved functional domains and motifs, assessment of protein-protein and protein-ligand interactions, gene
context and co-occurrence analysis, secondary and tertiary structural analysis, metabolic and cellular modeling, and phenotypic analysis. The
databases, tools and tutorials available at websites developed by the National Center for Biotechnology Information, EMBL-EBI, the Protein Data Bank,
and others will be used as supporting course materials. Each week will have a set of online videos and instructions to complete before the weekly live
lecture. The live lecture consist of a one hour slide presentation and one half-hour of Q&A discussions. Competency in bioinformatics will be assessed
by a midterm and a final exam.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

BMB 717. Nutrients, Enzymes, and Metabolic Flux. 3 Credit Hours.
Students learn how macronutrients (carbohydrates, protein, and lipids) and (ii) micronutrients (vitamins and minerals) are obtained in the diet,
digested, absorbed, and assimilated. Then, students learn to formulate mechanisms of enzyme catalysis and inhibition. Such analytical skills are
then used to more rigorously examine enzymes that control specific points of metabolic flux. Students finish this course with thorough mechanistic
understanding of (i) macronutrient composition, intake, and energy production and (ii) requirements of micronutrients and hormones in controlling
metabolic balance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 718. Scientific Communication. 3 Credit Hours.
This course will train students in how to communicate science to different audiences. The lectures will focus on training students on how to make
effective power point and poster presentations. Lectures will also guide on how to write manuscripts and grant applications. Training in data science
as well as patents and inventions will be provided. Students will get understanding on academic career. Each student will prepare presentation on their
research and will be guided by the instructor on how to improve it.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 719. Fundamentals of Epigenetics. 3 Credit Hours.
The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic
variants, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary
components. Students learn how to gather information about course topics and present their findings
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 720. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in
BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 731. Special Work. 1-3 Credit Hours.
Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student's individual interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BMB 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for this credit. In most departments not to exceed six credits, as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

BMB 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by the Office of Graduate and Postdoctoral Studies.
Components: DIL.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Biology (BIL)

BIL 101. Introductory Biological Science. 3 Credit Hours.
An introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 102. Humans and Biotechnology. 3 Credit Hours.
Major aspects of the biotechnology field for non-science majors. Students will learn about genetically modified organisms, biofuels from algae, detergents with enzymes, bacteria that eat oil, pigs that appear green, and much more. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 103. Introduction to Ecology. 3 Credit Hours.
Overview of ecological and evolutionary principles; relationships of organisms to living and non-living aspects of the environment; human impact on ecosystems. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 104. Genetics and Society. 3 Credit Hours.
Genetics for non-science majors. The basics of DNA, genes, gene function, genomes and inheritance. Application of genetics to real-world issues, both personal and societal, from the history of life to challenges and opportunities we face in the modern times at the molecular level.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 105. Biology of Plants. 3 Credit Hours.
Evolution and diversity of the plant kingdom; economic and cultural importance of plants to humans. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 106. Biology of Animals. 3 Credit Hours.
Evolution and diversity of the animal kingdom and the relationship between humans and other animals. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 107. Introduction to Evolution. 3 Credit Hours.
Processes and mechanisms of evolution. A scientific approach to the study of evolution by natural selection, concepts of fitness and adaptation, genetic and developmental bases of evolutionary change, how new species arise, major trends in evolution, extinction and human evolution. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 108. Molecular Journey to Being Human. 3 Credit Hours.
With a focus on the human species, students will explore the nature of DNA and proteins, the origin of life, RNA World hypothesis, the origins of human ancestors and modern humans, the recently-completed Human Genome Project, the genetic basis human diversity, and the ethics of using genetic knowledge to improve the quality of human life.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 109. Human Biology. 3 Credit Hours.
Structure and function of the human body, and the relationship of our species to its environment and other species. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 112. Human Hereditary Disease. 3 Credit Hours.
An overview of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. Discover the beauty of human nature, and our knowledge of it, as you develop an understanding of human genetics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 113. General Biology Honors Seminar. 1 Credit Hour.
Special topics in biology correlated with BIL 150.
Corequisite: BIL 150.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BIL 114. General Biology Honors Seminar. 1 Credit Hour.
Special topics in biology correlated with BIL 160.
Components: DIS.
Grading: GRD.
Typically Offered: Spring.

BIL 116. Introduction to Cancer Biology. 3 Credit Hours.
Basic concepts in cancer biology, including tumor cell proliferation, prevention and therapy (chemotherapy, radiation and immunotherapy). Discussions on lab diagnostic techniques such as DNA cell cycle, proliferation analysis, hormone and tumor marker receptor expression. Impact of research findings on the management and treatment of cancer. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 117. Introduction to Animal Behavior. 3 Credit Hours.
Introduction to the scientific study of how and why animals interact with each other and with their environment. Ecological, physiological, and evolutionary approaches to understanding the diversity of behaviors including neurobiology, learning, mating systems, cooperation, communication, habitat selection, and personalities. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 118. Introduction to Human Ecology. 3 Credit Hours.
An exploration of the interface between human biology and the science of ecology. Ecology is the branch of biology that studies the interactions of organisms with their environments, and our human species may have the most complex interactions of any species on Earth. Human Ecology will explore the evolutionary past, the economic present, and our imagined future, focusing on the life-support services that humans obtain from ecosystems and our increasingly powerful effects on those ecosystems. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 120. Tree of Life: Introduction to Biodiversity. 3 Credit Hours.
An exploration of the diversity and evolution of life on Earth, including case studies drawn from throughout the Tree of Life that represent the thrilling and surprising ways in which species have evolved to survive, reproduce, and interact. Not for credit in the biology major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 149. First Year Information. 0-1 Credit Hours.
First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BIL 150. General Biology. 4 Credit Hours.
Principles of biology at the cellular, genetic, and organismal levels of organization. Cell structure and function, energy transduction, biological information transfer, genetics, physiology.
Pre/Corequisite: ENG 105 Or ENG 106 Or ENG 107 Or AP ENG COMP =>5 Or SAT Verbal 700 or higher Evidence Base Read and Write Or 32 or higher ACT ENG And ALEKS MTH=>55 Or AP Cal AB score =>3 Or AP Cal BC score=>3 Or SAT MTH Sect Score =>600 Or ACT MTH=>25.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 151. General Biology Laboratory. 1 Credit Hour.
A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the cellular and molecular level.
Corequisite: BIL 150.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Summer.

BIL 152. HHMI General Biology Laboratory. 1 Credit Hour.
Laboratory exercises to accompany BIL 150. Students teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 153. Introductory Biology/Chemistry Laboratory I. 1 Credit Hour.
Integrated biology and chemistry laboratory exercises for first year students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 160. Evolution and Biodiversity. 4 Credit Hours.
Evolution and ecology of life on Earth. Systematics, biodiversity, evolutionary theory and mechanisms, with emphasis on the morphological, ecological, and behavioral adaptations of the diversity of life.
Prerequisite: BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 161. Evolution and Biodiversity Laboratory. 1 Credit Hour.
A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the organismal and ecological level.
Corequisite: BIL 160.
Components: LAB.
Grading: GRD.
Typically Offered: Spring & Summer.
BIL 162. HHMI Evolution and Biodiversity Laboratory. 1 Credit Hour.
Laboratory exercises to accompany BIL 160. Student teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BIL 163. Introductory Biology/Chemistry Laboratory II. 1 Credit Hour.
Integrated biology and chemistry laboratory exercises for first year students.
Corequisite: BIL 160 and CHM 112 or CHM 221.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BIL 190. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 194. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 195. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 213. HIV and Emerging Diseases: Sex, Science, and Society. 3 Credit Hours.
The importance and value of science in ameliorating human suffering. Students will hear from virologists, immunologists, cell biologists, behavioral scientists, primary care physicians, health care providers, drug discoverers, policy makers, vaccinologists, and HIV-infected individuals aiming to inspire and encourage students to be enthusiastic about science and scientific research on emerging diseases.
Prerequisite: BIL 150 and BIL 151 or BIL 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 220. Evolution and Disease. 3 Credit Hours.
Evolutionary perspectives on genetic disorders, cancer, virulence, drug resistance and diet. The role of biodiversity in understanding pathogens and parasites, emerging disease, natural products and drug discovery. How diseases have shaped human evolution.
Prerequisite: BIL 150 and BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 222. Plant Diversity. 3 Credit Hours.
The diversity and evolution of seed plants, the most important plants on land that shape our physical environment, affect climate, and provide humans with food, medicines, and materials important in all aspects of our lives. Survey of major lineages of Gymnosperms and Angiosperms, their evolutionary history, adaptations to life on land, reproductive biology, ecology, and economic benefits. Techniques for the collection of plant specimens from the field, and their preparation and identification for museum collections.
Prerequisite: BIL150 and BIL160 Or Consent of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 223. Plants and People. 3 Credit Hours.
A multi-disciplinary survey of ethnobotany and economic botany, emphasizing the ecosystem services that plants provide to humans.
Prerequisite: BIL150 and BIL160 Or Consent of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BIL 226. General Botany. 3 Credit Hours.  
Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.  
Prerequisite: BIL150 and BIL160 Or Consent of Instructor.  
Components: LEC.  
Grading: GRD.

BIL 227. General Botany Laboratory. 1 Credit Hour.  
Laboratory exercises to accompany BIL 226.  
Pre/Corequisite: BIL 223 or BIL 226 Or Consent of Instructor.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

BIL 228. Medical Botany. 3 Credit Hours.  
History of medical botany, approaches to health by different cultures, seperation and identification of secondary compounds and mechanisms of action. Molecular and physiological action of different secondary compounds in the treatment of common western ailments. In vivo identification of local medicinal plants.  
Prerequisite: BIL150 and BIL151 AND BIL160 and BIL161 for Biology Majors or Minors.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

BIL 230. Introduction to Marine Biology. 3 Credit Hours.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.

BIL 231. Introduction to Marine Biology Laboratory. 1 Credit Hour.  
Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.  
Pre/Corequisite: BIL 230.  
Components: LAB.  
Grading: GRD.  
Typically Offered: Fall.

BIL 244. Hormones and Behavior. 3 Credit Hours.  
A comparative approach to the relationship between hormonal mechanisms and behavior in both animal model systems and humans. An introduction to the endocrine system, sex differences in behavior, parental behavior, hormones and social behavior, learning and memory, stress and affective disorders, interactions between brain, hormones and behavior from a historical perspective viewing the emergence of key theories.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

BIL 250. Genetics. 3 Credit Hours.  
The nature, organization, replication, expression, and evolution of the genetic materials.  
Prerequisite: BIL 150 and BIL 160. BIL 151 or BIL 152 or BIL 153. BIL 161 or BIL 162 or BIL 163.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall, Spring, & Summer.

BIL 251. Genetics Laboratory. 2 Credit Hours.  
Laboratory exercises in genetics.  
Pre/Corequisite: BIL 250.  
Components: LAB.  
Grading: GRD.  
Typically Offered: Fall & Spring.

BIL 255. Cellular and Molecular Biology. 3 Credit Hours.  
Structure, molecules, and functions of cells.  
Prerequisite: BIL 150 and BIL 160. BIL 151 or BIL 152 or BIL 153. BIL 161 or BIL 162 or BIL 163.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall, Spring, & Summer.
BIL 256. Cellular and Molecular Biology Laboratory. 2 Credit Hours.
Laboratory exercises in cellular and molecular biology involving current research techniques and applications.
Pre/Corequisite: BIL 255 Or BIL 559.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BIL 258. Core Laboratory Techniques. 2 Credit Hours.
Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 261. High Altitude Biology and Medicine. 3 Credit Hours.
Mechanisms of hypoxia resistance influencing the requirement to match oxygen supply and demand throughout the oxygen cascade. Topics drawn from genomics, integrated physiology, population genetics, biochemistry, gene expression, evolution, and alpine medicine. Taxonomic examples from the literature will include humans, other mammals, birds, reptiles, amphibians, and fish.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 267. Science Documentary: Autism. 3 Credit Hours.
This course brings together students in both science and communication to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorders. Students will connect with people in the local community, and collaborate on short documentary films as well as audio exercises.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 268. Neurobiology. 3 Credit Hours.
Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.
Prerequisite: BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 280. Writing in Biology. 0 Credit Hours.
Writing instruction by faculty using biological topics in BIL courses offered at the 200 level.
Components: IND.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 281. Undergraduate Learning Internship in Biology. 1 Credit Hour.
Undergraduate Learning Intern in Biology Students serve as peer mentors in a laboratory setting, assisting a graduate laboratory instructor in teaching basic biological concepts to first year undergraduates in BIL 151 and BIL 161.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 284. Special Laboratory Topics in Biology. 1-4 Credit Hours.
Topics relevant to the biological sciences, listed as subtitle. May be combined/co-listed with other departments or programs.
Prerequisite: BIL 150 and BIL 151 and BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 285. Special Topics in Biology. 3 Credit Hours.
Topics relevant to the biological sciences, co-listed with other departments or programs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 286. Clinical Medicine I. 3 Credit Hours.
Bi-weekly clinical rotations with physicians at Miller School of Medicine and simulation labs at the Gordon Center.
Prerequisite: BIL 150 and BIL 160 AND CHM 111 or 121 AND CHM 113 and CHM 112 or CHM 221 AND CHM 114.
Components: PRA.
Grading: SUS.

BIL 287. Clinical Medicine II. 3 Credit Hours.
A continuation of Clinical Medicine I; bi-weekly clinical rotations with physicians at Miller School of Medicine and simulation labs at the Gordon Center.
Prerequisite: BIL 286.
Components: PRA.
Grading: CNC.
Typically Offered: Spring.

BIL 299. Seminar in Research Problems. 1 Credit Hour.
Discussion of current research of the Biology Faculty.
Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 or BIL 161 or BIL 162 or BIL 163.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 315. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.
The diverse sources, transformations, and sinks of chemical constituents in the sea; distribution of dissolved and particulate materials in the sea. Role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.
Prerequisite: MSC 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 316. Global Primary Production. 3 Credit Hours.
Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanisms, the physical environment and the fate of primary product on differ on land versus in the sea. This course reviews the magnitude and processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
Prerequisite: BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 320. Evolutionary Biology. 3 Credit Hours.
Microevolution, including mutation, genetic variation, natural selection, genetic drift, gene flow, and nonrandom mating. Evolutionary insights into behavior, including kin selection, sexual selection, and evolutionary game theory. Theories on the origins of life on Earth, its diversification and history. Human evolution, creationism, and the current extinction crisis.
Prerequisite: BIL 150 and BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 321. Invertebrate Zoology. 4 Credit Hours.
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 324. The Biology of Fishes. 3 Credit Hours.
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.
Prerequisite: BIL 255 and BIL 360.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 328. Biology of Birds. 4 Credit Hours.
General biology of birds. Lectures emphasizing avian behavior, evolution, ecology, and conservation. Field trips and laboratory emphasizing identification and systematics of South Florida birds. Lecture 3 hours, Laboratory one hour. Six weekend field trips, 6 hours each.
Prerequisite: At least one BIL course at the 200-level.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 329. Marine Vertebrate Zoology. 3 Credit Hours.
The form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Topics will include the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. Discussion of critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 330. Ecology. 3 Credit Hours.
The interactions of living organisms with each other and with their abiotic environment.
Prerequisite: BIL 250 or BIL 255. Calculus strongly recommended.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 331. Ecology Laboratory. 2 Credit Hours.
Lab and field exercises in ecology. Some Saturday field trips required.
Pre/Corequisite: BIL 330.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 332. Tropical Ecology. 3 Credit Hours.
Tropical ecosystem including world distribution of tropical climate biogeographical regions, deserts and environmental factors, grassland and primary production, savannah population dynamics, energy flow, biogeochemical cycling, succession, and biodiversity of tropical ecosystem.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 333. Conservation Biology. 3 Credit Hours.
The challenges facing conservation practitioners and the toolkit that has been developed to face these threats. Examination of important conservation cases and how endangered species and ecosystems are distributed across the globe; common threats to biodiversity and methods that have been developed to face these threats at both species and landscape scales; government implementation of conservation strategies. Students will read papers from the primary literature on a weekly basis that provide examples of how conservation tools are developed and implemented. Biology 330 (Ecology) is recommended.
Prerequisite: BIL 150 and BIL 151 and BIL 160 and BIL 161. BIL 330 recommended.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 334. Biogeography and Conservation. 3 Credit Hours.
The modern science of biogeography and its implications for the design of spatial strategies to conserve biodiversity and ecosystem services. Examination of the history of biogeography and its geographical and ecological foundations. Study of the fundamental biogeographic processes and uses them to investigate the evolution of biotas and explain the current biogeographic patterns. Exploration of the emerging field of conservation biogeography and its applications.
Pre/Corequisite: BIL 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BIL 335. Tropical Field Biology. 3 Credit Hours.
Intensive field study in the Costa Rican rainforest conducted during semester recesses with additional pre-trip lectures. Requires payment of trip costs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 336. Hurricanes and Ecology. 2 Credit Hours.
The ecology of disturbance by looking at hurricane impacts on coastal communities of South Florida. The course includes reading journal articles, and understanding the ecological theory behind succession and fragmentation of communities after storms. Weekend trips are required.
Prerequisite: BIL 150 and BIL 160.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 337. Coastal Ecology. 3 Credit Hours.
Unprecedented pressure from population growth, tourism, and resource exploitation of coastal ecosystems provides a theme for an overview of current coastal ecology, especially within a conservation and management framework. Hands-on learning in ecohydrology, coastal oceanography, integration of biological communities, and coastal wetland classification for tropical Florida and the insular Caribbean. Students will review and actively participate in water quality and environmental monitoring.
Pre/Corequisite: BIL 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 340. Herpetology. 4 Credit Hours.
Biology of reptiles and amphibians. Their evolutionary history, a description of their current diversity, and how this diversity is distributed geographically. Physiology, including thermoregulation, reproduction, locomotion, and feeding. Spatial ecology, communication, sexual selection, predation, and community assembly.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 343. Animal Communication. 3 Credit Hours.
How communication evolves and functions across species, from invertebrates to humans, through a range of acoustic, visual, and chemical signals. How physical constraints shape animal signals, how animals convey information through signaling, and how honesty is maintained in communication systems. Signaling in a variety of contexts, including mate attraction, competition, and predation.
Prerequisite: At Least 3 Credits of BIL 200 Level or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 348. Climate Change and Public Health. 3 Credit Hours.
The mechanisms by which climate change adversely affects human health, and the policy options for mitigating our exposure.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 350. Survey of Marine Mammals. 3 Credit Hours.
The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoo geography, physiology, husbandry, and biomedical aspects.
Prerequisite: BIL 150 and MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 351. Molecular Genetics Laboratory. 2 Credit Hours.
Classical and molecular genetics experimental techniques. Content will include dominant and recessive mutations, regulation of gene expression, transgenes and transposons, DNA and RNA sequencing, and other essential molecular genetic methods and principles demonstrated through original experiments in model organisms.
Prerequisite: BIL 250.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
BIL 352. Techniques in Scanning Electron Microscopy. 3 Credit Hours.
Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 353. Projects in Scanning Electron Microscopy. 2 Credit Hours.
Individual research projects in scanning electron microscopy. Six hours of laboratory.
Prerequisite: BIL 352.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 354. Biology of Viruses. 3 Credit Hours.
The molecular biology, ecology, and clinical relevance of prokaryotic and eukaryotic viruses, the most abundant and diverse biological entities on the planet. Current and emerging topics in virus research, including the role of viruses in modulating carbon and nutrient cycles in the biosphere, viral therapy as a tool against emerging multi-drug resistant bacteria, and viral spillover, using the 2020 coronavirus outbreak as a case study.
Prerequisite: BIL 150 and BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 360. Comparative Physiology. 3 Credit Hours.
How animals work and the physiological processes that allow for animal life. Fundamental aspects of physiology, such as homeostasis, metabolism, function of the nervous system, endocrine function, movement, gas and water transport. The relationship between structure and function through comparisons across diverse animal taxa. Emphasis on critical thinking and application of the scientific method.
Prerequisite: BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 365. Endocrinology. 3 Credit Hours.
The endocrine glands and the chemistry, mechanisms of action, and physiological effects of hormones. Emphasis on vertebrate hormones, including clinical aspects of human endocrinology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 367. Biology of Cancer. 3 Credit Hours.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 369. Fundamentals of the Biology of Aging. 3 Credit Hours.
How and why we age. The biology of aging at the molecular, cellular, and organismal levels in a comparative and evolutionary context.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 371. Readings in Biology. 1 Credit Hour.
Independent readings on selected topics in biology under the supervision of individual faculty.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 372. Readings in Biology. 1 Credit Hour.
Independent readings on selected topics in biology under the supervision of individual faculty.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.
BIL 374. Seminar in Biology. 1 Credit Hour.
Seminar in selected topics in biology.
Prerequisite: BIL150 and BIL160 and BIL151 or BIL152, or BIL153 and BIL161 or BIL162 or BIL163.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 375. Seminar in Biology. 1 Credit Hour.
Seminar on selected topics in biology.
Prerequisite: BIL150 and BIL160 and BIL151 or BIL152, or BIL153 and BIL161 or BIL162 or BIL163.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 376. Complementary and Integrative Medicine. 2 Credit Hours.
Almost 40% of Americans use health care approaches outside of mainstream Western medicine. These non-traditional approaches include acupuncture, meditation, massage therapy, reiki, yoga, hypnotherapy, chiropractic manipulation, and herbal medicine. Some of these approaches seem to hold promise in the healing process, while others have had little research to date. In this course, we will examine scientific evidence for the efficacy of these different approaches.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 380. Writing in Biology. 0 Credit Hours.
Writing instruction by faculty using biological topics in BIL courses offered at the 300 level.
Components: IND.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 381. Workshop Leaders in Biology I. 0-1 Credit Hours.
Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for a general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 382. Workshop Leaders in Biology II. 0-1 Credit Hours.
Peer-led Team Teaching of workshops for groups of BIL 160 students. May be taken once only for credit in the biology major, but may be taken additional times for general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 384. Special Laboratory/Field Topics in Biology. 1-4 Credit Hours.
Topics relevant to the biological sciences, listed as subtitle. Maybe combined/co-listed with other departments or programs.
Prerequisite: BIL 150 and BIL 151 and BIL 160 and BIL 161.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 385. Special Topics in Biology. 2-6 Credit Hours.
Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 386. Science Made Sensible Teaching Internship. 3 Credit Hours.
A teaching internship in which students spend at least 60 hours in Miami Dade County Public Schools assisting teachers with science education. Contributions to bimonthly workshops and group meetings, creation of lesson plans following Sunshine State Guidelines. One BIL course at the 200 level or higher.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
**BIL 389. Nonacademic Career in Biology. 2 Credit Hours.**
Speakers recruited from local biotech companies, conservation organizations, science museums, the National Park Service, and Customs as well as invasive species specialists, medical dosimetrists, principals of schools seeking biology teachers, and others will give weekly seminars about their practice of science in their occupations. Following each seminar, students will meet with speakers in an informal setting to discuss the particulars and prospects of the career in question. The express purpose of this course is to provide students with an idea of the utility of their biology degree in the workplace. Papers or writings that pertain to a particular career will be assigned prior to the seminar so that students will be ready with questions for the speaker.
Prerequisite: 1 Course in BIL 200 or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BIL 390. Studies in Biology. 1-5 Credit Hours.**
Special topics taken at other institutions with no direct equivalents.
Components: SEM.
Grading: GRD.

**BIL 395. Studies in Biology. 1-5 Credit Hours.**
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

**BIL 399. DNA and the Changing World. 3 Credit Hours.**
This is an online course, not intended for biology majors. It covers in-depth knowledge of DNA, gene, gene function, genome and inheritance with the focus on applying the knowledge to real-world issues; both personal and societal, from the history of life to challenges and opportunities in the modern times at the molecular level. Does not count towards a Biology major or minor.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BIL 402. Seminar in Biology. 1 Credit Hour.**
Seminar on selected topics in Biology.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BIL 403. Neuroscience Laboratory. 4 Credit Hours.**
Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific writing and computer applications in experimental design and analysis. Combined lecture and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**BIL 415. Coral Reef Science and Management. 3 Credit Hours.**
Coral reefs as biophysical and socioeconomic systems. Coral reef typology, geomorphology; biotic and abiotic components of coral reef ecosystems. Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BIL 426. Native and Introduced Plants of the Galapagos. 3 Credit Hours.**
The unique vegetation and introduced flora of the Galapagos Islands in Ecuador. Current conservation measures used to control the threats affecting native flora, and future prospects for conserving indigenous plants and for ensuring their rational utilization. Taught in the Galapagos as part of the UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 432. Ecology in the Galapagos. 3 Credit Hours.
Organisms in relation to their environment, with focus on interactive, hands-on learning that connects empirical nature with abstract thinking. Lectures, discussion and fieldwork on ecosystem ecology, plant dispersal and colonization; organisms’ responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents. Taught in the Galapagos as part of the UGalapagos semester.
Prerequisite: BIL 332.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 433. Conservation in Practice. 3 Credit Hours.
Intersection between economic development, science and conservation in one of the world’s most pristine and fragile ecosystems, the Galapagos Islands. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs and cultures. Taught in the Galapagos as part of the UGalapagos semester.
Prerequisite: BIL 432.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 434. Behavioral Ecology of the Galapagos. 3 Credit Hours.
Functional aspects of animal behavior, including topics such as animal communication, optimal foraging, mating systems, sexual selection, and the evolution of cooperation. Studies of the behavior of Galapagos organisms are emphasized.
Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 and BIL 161 or BIL 161 or BIL 162 or BIL 163.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 435. Origins, Ecology and Conservation of Insular Diversity. 3 Credit Hours.
Three-week field course in island systems. Ecological and evolutionary processes that maintain and create biological diversity in tropical islands. Natural selection, island biogeography, phylogenetics, colonization and community assembly of island species. On-site field surveys and experiments. Combined lecture and laboratory/field course.
Components: FLD.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 436. Stable Isotope Ecology. 3 Credit Hours.
Stable isotopes of essential elements (Oxygen, Carbon, Nitrogen, Hydrogen and Sulfur) as natural tracers of ecological processes. Principles of Chemistry, Physics and Biology will be integrated to allow interpretation, via these tracers, of how fundamental elements are cycled through the biosphere.
Prerequisite: BIL 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 441. Animal Behavior. 3 Credit Hours.
Mechanistic and evolutionary aspects of animal behavior. A survey of systems that illustrate the control, development and function of behavior in a variety of animals.
Prerequisite: BIL 150 and BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 442. Animal Behavior Laboratory. 2 Credit Hours.
An exploration of the amazing behaviors of animals from an explicitly evolutionary perspective. The study of the diversity of behavior in nature as shaped by natural and sexual selection. Topics will include: resource acquisition and defense, predator avoidance, mate choice and competition for mates, and cooperative behavior. Labs are inquiry based, with students designing, conducting and analyzing experiments to test hypotheses. Students will develop their scientific communication skills throughout the semester by gaining experience in oral presentations and writing manuscripts. Note that this course will involve two required field trips off campus.
Prerequisite: BIL 150 and BIL 160.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 450. The Biology of Symbiosis. 3 Credit Hours.
Symbiosis, interactions between species that live in close physical association, in particular those between microbes and multicellular eukaryotic hosts is fundamental to almost all aspects of biology. Building discipline specific knowledge about symbiosis. The course includes engagement with the scientific literature as a professional researcher, and development of foundational skills for presentation and synthesis of scientific information in visual, oral and written form.
Prerequisite: BIL 250 Or BIL 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 452. Evolution and Conservation Genetics. 3 Credit Hours.
Integration of evolutionary theory and genetics to address conservation problems and their solutions. Theory and empirical information pertaining to evolution on islands and the impact of humans on endemic species. Natural selection, sexual selection, population genetics, niches, diversity, and conservation in the context of the Galapagos Islands.
Prerequisite: BIL 150 and BIL 151 or BIL 152 or BIL 153 and BIL 160 and BIL 161 or BIL 161 or BIL 162 or BIL 163.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 454. Biological Core Concepts Through Medical Case Studies. 3 Credit Hours.
A capstone course in which students will complete a series of medically-oriented case studies. Knowledge of biology, chemistry, math, and physics will be applied to real-world issues. Critical thinking will be used to solve basic medical problems, and facilitate understanding of the interdisciplinary nature of medicine.
Requisite: BIL 150 And BIL 151 And BIL 160 And BIL 161 Or equivalent And one BIL 200 level or higher course.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 455. Developmental Biology. 3 Credit Hours.
A study of the process by which a fertilized egg gives rise to a multicellular organism with organs, tissues and cell types that are structurally and functionally distinct and are arranged in a characteristic three-dimensional body plan. This course will take a comparative approach using invertebrate and vertebrate models to cover the current understanding of the cellular, molecular and genetic mechanisms that regulate the development of animals. Evolutionary mechanisms and the biomedical relevance of developmental biology will be emphasized.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 456. Developmental Biology Laboratory. 2 Credit Hours.
Experimental analysis of animal development using a variety of techniques including experimental embryology, microscopy, molecular biology, genetics and immunochemistry. Following a short series of introductory labs and lectures, students will develop an independent research proposal and will spend the remaining weeks of the semester working on their projects under the guidance of the instructors. This class is restricted to students who have taken cell and molecular biology, developmental biology OR genetics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 468. Developmental Neuroscience. 3 Credit Hours.
Molecular, cellular, and physiological mechanisms controlling the proper development and function of neurons and neural circuits. Signaling mechanisms that regulate cell determination, proliferation, and differentiation. Neural migration and outgrowth, synaptic connectivity and plasticity, and neural basis of animal behavior.
Prerequisite: BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 480. Writing in Biology. 0 Credit Hours.
Writing instruction by faculty using biological topics in BIL courses offered at the 400 level.
Components: IND.
Grading: SUS.
Typically Offered: Fall & Spring.
**BIL 481. Undergraduate Teaching Assistant Training in Biology. 1-3 Credit Hours.**
Training and teaching assistance for undergraduate workshops or laboratories, under the direct supervision of faculty. Specific topic is indicated by course subtitle. This course may be taken no more than twice for credit in the Biology major or minor, and if taken twice, teaching assistance must be for two different BIL courses. May be taken multiple times for general elective credit only.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 482. PRISM Teaching Fellow. 2 Credit Hours.**
Undergraduate mentors to PRISM students, and teaching fellows to PRISM course instructors in biology.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 484. Special Laboratory Topics in Biology. 1-4 Credit Hours.**
Topics relevant to the biological sciences, listed as subtitle. May be combined/co-listed with other departments or programs.
Prerequisite: BIL 200 or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BIL 485. Special Topics in Biology. 2-6 Credit Hours.**
Topics relevant to the biological sciences, co-listed with other departments or programs.

Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 486. Advanced Science Made Sensible Teaching Internship. 3 Credit Hours.**
A teaching internship in which students spend at least 60 hours in Miami Dade County Public Schools assisting teachers with science education. Contributions to bimonthly workshops and group meetings, development of problem-based lesson plans to promote critical thinking.
Prerequisite: BIL 386.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 491. Departmental Seminar in Biology. 1 Credit Hour.**
Research seminars by distinguished biologists.

Components: SEM.
Grading: GRD.
Typically Offered: Fall.

**BIL 492. Departmental Seminar in Biology. 1 Credit Hour.**
Research seminars by distinguished biologists.

Components: LAB.
Grading: GRD.
Typically Offered: Spring.

**BIL 495. Projects in Biology. 2 Credit Hours.**
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 496. Projects in Biology. 2 Credit Hours.**
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

**BIL 497. Projects in Biology. 2 Credit Hours.**
Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
BIL 498. Senior Thesis. 2 Credit Hours.
Formal thesis preparation supervised by a member of the departmental faculty including a public oral defense and submission of the written document to the department.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 499. Research Colloquium. 1 Credit Hour.
Discussion of current research done by undergraduate students.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 508. Research in Progress Seminar. 1 Credit Hour.
Students will explore current research by Biology Department graduate students, postdoctoral fellows, and faculty through weekly research seminar presentations.
Components: SEM.
Grading: CNC.
Typically Offered: Fall & Spring.

BIL 511. Advanced Biostatistics. 4 Credit Hours.
Statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover non-parametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.
Prerequisite: At least one BIL course at the 300 level.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 515. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.
Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Introductions to cellular automatons and models based on social and behavioral networks. No prior programming experience required.
Prerequisite: At least one BIL course at the 200 level.
Components: LEC.
Grading: GRD.

BIL 520. Evolution. 3 Credit Hours.
Evidence for evolution; microevolution including natural selection, kin selection, genetic drift, gene flow, mutation, and evolutionary game theory; macroevolution including speciation, adaptation, phylogenetics, origin of life, and extinction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 521. Phylogenetics. 3 Credit Hours.
Concepts and methods in phylogenetic systematics. The importance of phylogenetic trees in biology. Use of phylogenies in taxonomy, trait evolution (including homology, adaptations and key innovations), biogeography, speciation, diversification rates, molecular evolution, molecular clocks, and gene duplication.
Prerequisite: BIL 250.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 523. Advanced Biology of Marine Invertebrates. 4 Credit Hours.
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 531. Advanced Field Ecology. 5 Credit Hours.
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 535. Molecular Ecology. 3 Credit Hours.
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 536. Molecular Ecology Laboratory. 1 Credit Hour.
Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.

Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 537. Ecosystem Ecology. 3 Credit Hours.
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 539. Conservation and Protected Areas. 3 Credit Hours.
The science and policy of park planning and management will be explored through four case studies. The case studies will explore key concepts in ecology and population biology relating to loss of habitat, habitat fragmentation, invasive species, pollution and declines in population size.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 551. Population Genetics and Genomics. 3 Credit Hours.
Introduction to population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., Drosophila), and non-model organisms.
Prerequisite: BIL 250.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 552. Bioinformatics Tools. 3 Credit Hours.
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 553. Biomedical Data Science. 3 Credit Hours.
Computational skills for analysis of genomic data sets. Basics of using a command line interface (text editor, Unix/Linux/iOSX), and logging into and getting started on Pegasus2. Python will be used to write scripts for downloading, manipulating, and analyzing data. File sharing and version control using github will be introduced at this stage, which will include RCR training. Analysis, interpretation, and presentation of Next Generation Sequencing data set (RNAseq, exome, or whole genome; public or their own. Interpreting and presenting results, to enable students to extract information from the data rather than just statistically analyze it.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 554. Electron Microscopy. 4 Credit Hours.
Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 555. Projects in Electron Microscopy. 2 Credit Hours.
Individual research projects in transmission electron microscopy, 6 hours.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 556. Ecological and Evolutionary Genomics. 3 Credit Hours.
The evolution of genomes, and the ecological interactions that drive their evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 559. Life in the Cell. 3 Credit Hours.
A comprehensive, advanced overview of the molecular biology of the cell, cells, and genomes.
Prerequisite: BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 565. Evolution and Development. 3 Credit Hours.
Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.
Prerequisite: BIL 250 or BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 568. Evolution and development of Nervous Systems. 3 Credit Hours.
Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 575. Advanced Special Studies in Biology. 1-6 Credit Hours.
Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 580. Writing in Biology. 0 Credit Hours.
Writing instruction by faculty using biological topics in BIL courses offered at the 500 level.
Components: IND.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 591. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

BIL 592. Studies in Biology. 1-5 Credit Hours.
Special topics taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.
BIL 608. Research in Progress Seminar. 1 Credit Hour.
Through weekly research seminar presentations, students will explore current research by Biology Department graduate students, postdoctoral fellows, and faculty. Current students will also prepare and present a research seminar on their past, present, or future research objectives for feedback from fellow students and faculty.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 610. Lab Group Meeting. 1 Credit Hour.
Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Fall semesters)
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

BIL 611. Lab Group Meeting. 1 Credit Hour.
Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Spring semesters)
Components: DIS.
Grading: SUS.
Typically Offered: Spring.

BIL 612. Graduate Core I. 3 Credit Hours.
Foundations of genome structure and how the information encoded in genomes is regulated by intrinsic and extrinsic factors during development and evolution. Major topics include genome structure, gene regulation, cells, development, physiology and EvoDevo.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 613. Graduate Core II. 3 Credit Hours.
Foundations of key ecological and evolutionary theory. Major topics in Ecology include population, community, physiological and ecosystem ecology. Major topics in Evolution include principles of natural selection, speciation, biodiversity, population genetics, neutral theory, molecular evolution, phylogenetics, and systematics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 614. Professional Writing and Grantsmanship. 3 Credit Hours.
Elements of argumentative writing, reader-oriented writing strategies, fundability of submitted grants, and techniques for mastering presentation venues such as posters and talks.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 615. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.
Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Course includes introductions to cellular automatons and models based on social and behavioral networks. No prior programming experience required.
Prerequisite: At least one BIL course at the 200 level.
Components: LEC.
Grading: GRD.

BIL 616. Professional Skills I. 1 Credit Hour.
Training and development in the skills necessary to become an accomplished professional scientist. Instruction on preparation, submission, and review of manuscripts; viewing and attending poster sessions; presenting scientific talks; communicating effectively with colleagues, lab partners, and the student's principal investigator.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BIL 618. Advanced Biostatistics. 4 Credit Hours.
This course will provide an overview of statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover non-parametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 620. Evolution. 3 Credit Hours.
Evidence for evolution; microevolution including natural selection, kin selection, genetic drift, gene flow, mutation, and evolutionary game theory; macroevolution including speciation, adaptation, phylogenetics, origin of life, and extinction.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 621. Phylogenetics. 3 Credit Hours.
Concepts and methods in phylogenetic systematics. The importance of phylogenetic trees in biology. Use of phylogenies in taxonomy, trait evolution (including homology, adaptations and key innovations), biogeography, speciation, diversification rates, molecular evolution, molecular clocks, and gene duplication.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 622. Plant Diversity. 3 Credit Hours.
The diversity and evolution of seed plants, the most important plants on land that shape our physical environment, affect climate, and provide humans with food, medicines, and materials important in all aspects of our lives. Survey of major lineages of Gymnosperms and Angiosperms, their evolutionary history, adaptations to life on land, reproductive biology, ecology, and economic benefits. Techniques for the collection of plant specimens from the field, and their preparation and identification for museum collections.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 623. Advanced Biology of Marine Invertebrates. 4 Credit Hours.
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 625. Advanced Herpetology. 4 Credit Hours.
Biology of reptiles and amphibians. Their evolutionary history, a description of their current diversity, and how this diversity is distributed geographically. Physiology, including thermoregulation, reproduction, locomotion, and feeding. Spatial ecology, communication, sexual selection, predation, and community assembly. Local field component will include an independent research project addressing a herpetological question.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 630. Population and Community Ecology: Theory. 3 Credit Hours.
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 631. Advanced Field Ecology. 5 Credit Hours.
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 632. Population and Community Ecology: Theory II. 3 Credit Hours.
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 633. Conservation Biology. 3 Credit Hours.
Challenges facing conservation practitioners and the toolkit that has been developed to face them. Distribution and value of biodiversity, threats to biodiversity, and methods that have been developed to face these threats at both species and landscape levels. Government implementation of conservation strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 634. Stable Isotope Ecology. 3 Credit Hours.
Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 635. Molecular Ecology. 3 Credit Hours.
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 636. Tropical Biology: An Ecological Approach. 8 Credit Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies. Lecture, laboratory, and fieldwork.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 637. Ecologia de Poblaciones. 7 Credit Hours.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 638. Tropical Managed Ecosystems. 8 Credit Hours.
Application of ecological principles to problems in agriculture, forestry, conservation and natural resource management in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 639. Ecosystem Ecology. 3 Credit Hours.
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 641. Animal Behavior. 3 Credit Hours.
Amazing behaviors of animals from an evolutionary perspective, including how the diversity of behavior in nature is shaped by natural and sexual selection.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BIL 645. Developmental Biology. 3 Credit Hours.
A study of the process by which a fertilized egg gives rise to a multicellular organism with organs, tissues and cell types that are structurally and functionally distinct and are arranged in a characteristic three-dimensional body plan. This course will take a comparative approach using invertebrate and vertebrate models to cover the current understanding of the cellular, molecular and genetic mechanisms that regulate the development of animals. Evolutionary mechanisms and the biomedical relevance of developmental biology will be emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 649. Seminar in Behavior. 1 Credit Hour.
Discussion of current literature in animal behavior. This course may be repeated for credit.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 650. The Biology of Symbiosis. 3 Credit Hours.
Symbiosis, interactions between species that live in close physical association, in particular those between microbes and multicellular eukaryotic hosts is fundamental to almost all aspects of biology. Building discipline specific knowledge about symbiosis. The course includes engagement with the scientific literature as a professional researcher, and development of foundational skills for presentation and synthesis of scientific information in visual, oral and written form.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 651. Population Genetics and Genomics. 3 Credit Hours.
Population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., Drosophila), and non-model organisms.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 652. Bioinformatics Tools. 3 Credit Hours.
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure-function analysis and various applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 653. Bioinformatics Algorithms. 3 Credit Hours.
The complexity of bioinformatics computations. Introduction to Perl and Bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor binding site recognition and motif finding, gene prediction, phylogeny, micro array analysis, RNA folding, gene design and synthesis.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 654. Electron Microscopy. 4 Credit Hours.
Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 655. Techniques in Scanning Electron Microscopy. 3 Credit Hours.
Tissue preparation, use of the scanning electron microscope (SEM), photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 656</td>
<td>Ecological and Evolutionary Genomics</td>
<td>3</td>
<td>The evolution of genomes, and the ecological interactions that drive their evolution.</td>
</tr>
<tr>
<td>BIL 661</td>
<td>High Altitude Biology and Medicine</td>
<td>3</td>
<td>High altitude biology and medicine: Mechanisms of hypoxia resistance influencing the requirement to match oxygen supply and demand throughout the oxygen cascade. Topics draw from genomics, integrated physiology, population genetics, biochemistry, gene expression, evolution, and alpine medicine. Taxonomic examples from the literature will include humans, other mammals, birds, reptiles, amphibians, and fish.</td>
</tr>
<tr>
<td>BIL 665</td>
<td>Evolution and Development</td>
<td>3</td>
<td>Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.</td>
</tr>
<tr>
<td>BIL 668</td>
<td>Evolution and development of Nervous Systems</td>
<td>3</td>
<td>Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.</td>

<td>Current Topics in Biological Research - DVP</td>
<td>1</td>
<td>Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting Professor program.</td>
</tr>
<tr>
<td>BIL 689</td>
<td>Nonacademic Careers in Biology</td>
<td>2</td>
<td>Speakers recruited from local biotech companies, conservation organizations, science museums, the National Park Service and Customs as well as invasive species specialists, medical dosimetrists, principals of schools seeking biology teachers, and others will give weekly seminars about their practice of science in their occupations. Following each seminar, students will meet with speakers in an informal setting to discuss the particulars and or prospects of the career in question. The express purpose of this course is to provide students with an idea of the utility of their biology degree in the workplace. Papers or writings that pertain to a particular career will be assigned prior to the seminar so that students will be ready with questions for the speaker.</td>
</tr>
<tr>
<td>BIL 810</td>
<td>Master's Thesis</td>
<td>1-6</td>
<td>The student working on their Master's thesis enrolls for credit, in most departments not to exceed six, as determined by the student’s advisor. May be regarded as full time residence.</td>
</tr>
</tbody>
</table>
BIL 820. Research in Residence - Master’s Thesis. 1 Credit Hour.
Used to establish research in residence for the thesis for the Master’s degree after the student has enrolled for the permissible cumulative total in BIL810 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D.. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL830 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BIL 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL840 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BIL 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Biomedical Engineering (BME)

BME 100. Introduction to Biomedical Engineering for Summer Scholars. 3 Credit Hours.
This introductory course is designed to expose high school students to biomedical engineering. The program is designed for the exemplary high school student interested in applied mathematics and science. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of Biomedical Engineering. The course content changes throughout the 3-week duration and includes topics on lasers, medical imaging, biomaterials, bioclectricity and biomechanics. The students will be able to understand the challenges associated with the designing, testing and FDA clearance of biomedical devices and the importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with the designing and testing of a bioelectric device. Summer Scholar Students only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

BME 110. Introduction to Innovation: Learning About Innovation by Innovating. 3 Credit Hours.
Introduction to diverse methods and tools that promote and nurture student creativity, entrepreneurship, team-work, and skills for creating business plans that consider ethical, global and financial issues. Students will learn to use the Maker Space facility to implement their design ideas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools for problem solving are discussed. Topics include the use of computer techniques for data acquisition, analysis, presentation, software design, computer aided drafting, and development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 112. Introduction to Biomedical Engineering. 2 Credit Hours.
Introduction to Engineering II provides an introduction to biomedical engineering analysis, design, and manufacturing processes. Ethics, Regulatory Factors, and Biomedical Design Tools (mechanical, electrical, and computer tools) are introduced. Students will also be given lectures from both Biomedical Engineering researchers and industrial professionals concerning their experiences and the current trends within the field. Hands on experience is provided.
Prerequisite: BME 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 123. Explorations in Engineering. 3 Credit Hours.
Introduction to engineering for non-engineers with emphasis on real-world engineering systems and services which are changing the way we live, communicate, learn, play, and care for ourselves, our communities and our planet. Students will learn how to use modern tools to observe and design simple engineering systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 211. Introduction to Programming for Biomedical Engineers. 3 Credit Hours.
This course will provide a comprehensive introduction to programming using MATLAB. The students will learn MATLAB functions for importing, analyzing, visualizing and exporting data, numerical computation, modeling and solving biomedical engineering problems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 265. Medical Systems Physiology. 3 Credit Hours.
Human physiological processes from a bioengineering and medical point of view. Pertinent aspects of anatomy, biophysics, biochemistry, and disease mechanisms are also included.
Prerequisite: BIL 150. And CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 266. Human Physiology Laboratory. 1 Credit Hour.
This course provides a series of laboratory experiments to assist students to learn human physiology through noninvasive measurements by using the Powerlab Physiology Data Acquisition station. Following introductory lectures in the lab, students will assemble measurement probes, connect different devices, collect data under normal and stimulating conditions, and perform data analysis. Lab report is required for each experiment.
Prerequisite: Or Corequisite: BME 265.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 302. Cellular Engineering. 3 Credit Hours.
Cellular engineering addresses issues related to understanding and manipulating cell structure-function relationships. This course is intended to bridge between cell biologists and engineers, to understand quantitatively cell biological aspects. Central to biomaterial and tissue engineering is our use of cells and our understanding of their interactions with their environment. It is important to understand how cells respond to external signals from their substrata or their milieu, how they move, and what they need in order to perform their desired function. Students are provided with an introduction to engineering principles and modeling at the cellular level. Of particular interest are cytomechanics, receptor/ligand binding, genetic engineering, enzyme kinetics, and metabolic pathway engineering.
Prerequisite: BIL 150. And CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 303. Cell Engineering Lab. 1 Credit Hour.
The principles of cell engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques, cell imaging, DNA cloning and cell transfection, microcontact printing. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment and fabrication of 2D culture substrates.
Prerequisite: BIL 150 and BIL 151.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 305. Biomedical Technology. 3 Credit Hours.
Non-mathematical introduction to technical and clinical aspects of biomedical engineering. Biomedical signals and instrumentation, sensors, transducers, physiological measurements, laboratory instrumentation, implants, cardiac assist devices, radiology, ultrasound, CT, MRI, transmission, and scanning electron microscopy. Field trips to clinical and research laboratories are included. Open only to non-BME students.
Prerequisite: BIL 150 and CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 310. Mathematical Analysis in Biomedical Engineering. 3 Credit Hours.
Mathematical modeling of physiological and other biomedical engineering systems and devices. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological regulation and control in biosystems.
Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 312. Biomedical Statistics and Data Analysis. 3 Credit Hours.
The course will provide a comprehensive introduction to biostatistical models and methods, with applications in clinical trials research, observational studies, physiology, genomics and public health. Various examples will be solved using MATLAB and the results will be compared and discussed. A brief introduction to R will be provided.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 320. The Evolution of Technology. 3 Credit Hours.
Organized and taught by an interdisciplinary team, this innovative course is designed for juniors and seniors. An experimental elective, the course uses multimedia to explore the ways in which innovation is driven by the needs of society and individuals, and nurtured by improvements in tools and production. Five broad subject areas will receive special attention: survival, communication, transportation, entertainment and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 330. Foundations of Medical Imaging. 3 Credit Hours.
Physical and biological principles of medical imaging, including ultrasound, X-ray, nuclear, magnetic resonance, electrical impedance and optical imaging. Propagation and interaction of ultrasonic waves, light waves, X-ray photons, and nuclear radiation in hard and soft biological tissue.
Corequisite: BME 310.
Prerequisite: PHY 222. And PHY 223. Or Pre/Corequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 335. Biomaterials. 3 Credit Hours.
Introduction to the field of Biomaterials. Review of materials science for four main types of biomaterials: ceramics, metals, polymers, and composites. Lectures on special topics given by guest lecturers who are active in their specific areas, under supervision of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 337. Fundamentals of Biomechanics. 3 Credit Hours.
Application of solid and fluid mechanics to describe the mechanical behavior of human motion, mechanical behavior of soft and hard biological tissues, cells and biofluids. Review of fundamental concepts and techniques of mechanics (stress, strain, constitutive relations). Focus on mechanical properties of specific tissues, including tendon, skin, smooth muscle, heart muscle, cartilage, and bone. Cellular and biofluid mechanics will be presented.
Prerequisite: MTH 311. And PHY 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 375. Undergraduate Research in Biomedical Engineering. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 399. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. May be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BME 401. Biomedical Design. 3 Credit Hours.
Introduction to the clinical problem-based design for undergraduate biomedical engineering students. Focus will be on need identification, concept generation, prototype development and testing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 402. Senior Design I. 2 Credit Hours.
This course deals with the introduction phase of an individual or group project for seniors. Need identification, screening, technical and economic feasibility, proof of concept development and killer experiment will be performed by students working on teams. Scheduled individual or group report presentations are required.
Prerequisite: BME 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 403. Senior Design II. 1 Credit Hour.
This course deals with the completion phase of an individual or group project for seniors. Concepts on projects related to the hypotheses/testing protocols, design limitations (constraints), and validation of the design in Biomedical Engineering will be discussed. Scheduled individual or group report presentations are required.
Prerequisite: BME 402.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 440. Biomedical Measurements. 4 Credit Hours.
Introduction to the principles of measurements in physiological and biological systems, as well as a discussion of measurable parameters, transducers, sensors, signal conditioning, and processing. Laboratory experiments are conducted in parallel with the course.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 450. Biomedical Transport Phenomena. 3 Credit Hours.
Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery. Introduction to physiological fluid flow in tissues.
Prerequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 460. Introduction to Physiological Fluid Mechanics. 3 Credit Hours.
The role of transport processes in biological systems, mathematical modeling of physiological fluid transport, conservation of mass and momentum, rheology of blood flow in large and small vessels, approximation methods for the analysis of complex physiological flow, fluid flow in the circulation and tissue. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological fluid flow.
Prerequisite: BME 310 and PHY 222.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 470. Biomedical Signal Analysis. 3 Credit Hours.
Time and frequency description, analysis and processing of biophysical and physiological signals. This course covers analytical and computational tools for measuring, manipulating and interpreting signals fundamental to biomedical engineering. Fourier analysis, Fourier transform, data acquisition, averaging, digital filter design, discrete Fourier transform, correlation, convolution, coherence are discussed.
Prerequisite: BME 211.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 480. Biomedical Instrumentation. 3 Credit Hours.
Analysis and design of systems and electronic circuits in biomedical instrumentation including modeling and simulation of dynamic measurement systems and implementation of analog signal processing. The functional principles, operation, clinical context and technological trends of medical instrumentation systems used in clinical and research applications will be discussed.
Prerequisite Or Corequisite: BME 440.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 506. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 507. LabView Applications for Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 510. Introduction to Medical Robotics. 3 Credit Hours.
This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.
Prerequisite: BME 211. And BME 310. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 512. Regulatory Control of Biomedical Devices. 3 Credit Hours.
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 513. Biomedical Systems Engineering. 3 Credit Hours.
This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufacturability, reliability, maintainability, feasibility demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 520. Medical Imaging Systems: X-ray and CT. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include imaging fundamentals, radiographic imaging (X-ray) system, and computed tomography (CT) system.
Prerequisite: ECE 201. And BME 211. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BME 521. Medical Imaging Systems: MRI, NMI and Ultrasound. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include magnetic resonance imaging (MRI) system, nuclear medicine imaging (NMI) system, and ultrasound imaging system.
Prerequisite: ECE 201. And BME 211. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 522. Scanning Electron Microscopy for Engineers. 3 Credit Hours.
Physics of transmission and scanning electron microscopy including x-ray spectroscopic analysis. Students will learn to independently operate and use the SEM for imaging in its role in research and engineering. Each student will be responsible for several imaging assignments and an independent research project related to their field of interest.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 523. Neurosensory Engineering. 3 Credit Hours.
Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, neural signal processing, cochlear and visual implants.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 524. Neuromotor Engineering. 3 Credit Hours.
Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the fundamental engineering approaches, technical principles, neurophysiology, and applications of neuroprosthetics. We will cover Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 525. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 526. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 535. Advanced Biomaterials. 3 Credit Hours.
Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 540. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.
Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.
Prerequisite: ECE 315. And ECE 304. Or ECE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BME 541. Medical Electronic Systems Laboratory. 2 Credit Hours.
Laboratory course for BME 540/640. Design of medical instruments integrated with microcomputers and telemetry devices.
Pre/Corequisite: BME 540. Or BME 640.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 545. Biomedical Optical Instruments. 3 Credit Hours.
Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 546. Medical Applications of Lasers. 3 Credit Hours.
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 555. Fundamentals of Computational Neuroscience. 3 Credit Hours.
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.
Prerequisite: BME 265 and Corequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 565. Principles of Cellular and Tissue Engineering. 3 Credit Hours.
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.
Prerequisite: BME 302. And BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 566. Cell and Tissue Engineering Laboratory. 1 Credit Hour.
The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment.
Pre/Corequisite: BME 565 Or BME 302.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 567. Tissue Engineering Lab. 1 Credit Hour.
The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.
Prerequisite: BME 302 and BME 303. And Corequisite: BME 335 or BME 565.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 570. Advanced Biomedical Signal Processing. 3 Credit Hours.
This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.
Prerequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 571. Introduction to Biosignal Processing Lab. 1 Credit Hour.
Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.
Prerequisite: BME 570. Or Corequisite: BME 570.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 575. Tissue Mechanics. 3 Credit Hours.
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
Prerequisite: BME 375. And BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 581. Radiation Biology and Physics. 3 Credit Hours.
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis.
Prerequisite: BME 265.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 582. Radiation Therapy Physics. 3 Credit Hours.
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a catagorized dosimetric analysis of radiation therapy to different clinical conditions.
Prerequisite: BME 310. Or Pre/Corequisite: BME 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 583. Radiation Protection. 3 Credit Hours.
This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.
Prerequisite: BME 581. Or Pre/Corequisite: BME 582.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 585. Immunoengineering. 3 Credit Hours.
Immunoengineering is a novel interdisciplinary field that combines biomaterial science and bioengineering design with immunology to develop cutting edge technology for the prevention, rapid diagnosis and treatment of infectious diseases, cancer, autoimmune and inflammatory diseases. The goal of this course is to provide a basic background in immunology that will allow understanding the need for immunoengineering and providing the tools to be able to design novel vaccines, anti-inflammatory agents, and immunotherapy. Application of biomaterials for immunoengineering applications will be reviewed through lectures, reading assignments and journal clubs. This course will provide valuable knowledge of an emerging field that will impact both the academic and industrial world.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 587. Finite Element Analysis for Engineers. 3 Credit Hours.
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electromagnetic, optical, and fluid flow problems.
Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 595. Current Trends in Regenerative Medicine. 3 Credit Hours.
This team-taught course provides background, clinically-relevant applications and ethical aspects of regenerative medicine as it applies to multiple types of cell, tissues and organs. The course is divided into modules focused on one application of regenerative medicine and taught by an expert in that specific topic area. The course includes hands-on demonstrations of key techniques and problem-based group projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 599. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 601. Biochemistry and Cellular Physiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and subcellular systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 602. Human Physiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 603. Neurophysiology for Engineers. 3 Credit Hours.
Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 606. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 607. LabView Applications for Biomedical Engineering. 1 Credit Hour.
Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.
Prerequisite: BME 112. And BME 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 610. Introduction to Medical Robotics. 3 Credit Hours.
This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.
Prerequisite: BME 211. And BME 310. And BME 330.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 612. Regulatory Control of Biomedical Devices. 3 Credit Hours.
Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 613. Biomedical Systems Engineering. 3 Credit Hours.
This course provides students with an understanding and appreciation of Biomedical Systems Engineering with emphasis on current day industrial project management and product development processes. The components of Systems Engineering to be presented include: functional system analysis, requirements analysis, translation of functions and requirements into a system and product architecture, and, finally, testing methods to verify the biomedical product meets all design requirements. Decision methodology, alternative concept analysis, trade-off studies, integration of human factors, manufacturability, reliability, maintainability, feasibility demonstration, and safety are all addressed as part of the product design system. The entire product development life cycle will be analyzed with relevant concepts from initial market evaluation, to requirement development, through final product manufacturing and product launch. The regulatory environment for biomedical devices will also be presented for both US FDA and international compliance. The lectures will provide detailed notes on the subjects; other articles as handouts or additional readings will also be assigned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 620. Medical Imaging Systems: X-ray and CT. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include imaging fundamentals, radiographic imaging (X-ray) system, and computed tomography (CT) system.
Prerequisite: ECE 201, BME 211, BME 330 Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 621. Medical Imaging Systems: MRI, NMI and Ultrasound. 3 Credit Hours.
Engineering and scientific principles of medical imaging systems. The physics concepts and engineering implementations for different medical imaging modalities are discussed. Topics include magnetic resonance imaging (MRI) system, nuclear medicine imaging (NMI) system, and ultrasound imaging system.
Prerequisite: ECE 201. And BME 211. And BME 330. Or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 622. Scanning Electron Microscopy for Engineers. 3 Credit Hours.
Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 623. Neurosensory Engineering. 3 Credit Hours.
Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, neural signal processing, cochlear and visual implants.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 624. Neuromotor Engineering. 3 Credit Hours.
Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the fundamental engineering approaches, technical principles, neurophysiology, and applications of neuroprosthetics. We will cover Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology.
Prerequisite: BME 265 and BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 625. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 626. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 635. Advanced Biomaterials. 3 Credit Hours.
Applications of biomaterials in different tissue and organ systems. Relationshi p between physical and chemical structure of materials and biological system re response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 640. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.
Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.
Prerequisite: ECE 315. And ECE 304. Or ECE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 641. Medical Electronic Systems Laboratory. 2 Credit Hours.
Laboratory course for BME 540. Design of medical instruments integrated with microcomputers and telemetry devices.
Pre/Corequisite: BME 540. Or BME 640.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BME 645. Biomedical Optical Instruments. 3 Credit Hours.
Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.

BME 646. Medical Applications of Lasers. 3 Credit Hours.
Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagat ion in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.
Prerequisite: PHY 222. And PHY 223. And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 655. Fundamentals of Computational Neuroscience. 3 Credit Hours.
Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 665. Principles of Cellular and Tissue Engineering. 3 Credit Hours.
Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.
Prerequisite: BME 302. And BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 666. Cell and Tissue Engineering Laboratory. 1 Credit Hour.
The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 667. Tissue Engineering Lab. 1 Credit Hour.
The principles of tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include hydrogel spectroscopy analysis, swelling tests, permeability tests, rheological tests, cell culture techniques, cell imaging, cell culture in hydrogels. Cell & Tissue engineering topics include cell cycle/metabolism, adhesion, biomaterials synthesis and characterization, biocompatibility.
Co-requisite: BME 635 or BME 665.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 670. Advanced Biomedical Signal Processing. 3 Credit Hours.
This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.
Prerequisite: BME 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 671. Introduction to Biosignal Processing Lab. 1 Credit Hour.
Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 675. Tissue Mechanics. 3 Credit Hours.
Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.
Prerequisite: BME 375. And BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 681. Radiation Biology and Physics. 3 Credit Hours.
The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis. Corequisite or prerequisite: BME 502 or permission of instructor.
Corequisite: BME 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BME 682. Radiation Therapy Physics. 3 Credit Hours.
The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.
Prerequisite: BME 310. Or Pre/Corequisite: BME 681.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 683. Radiation Protection. 3 Credit Hours.
This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.
Prerequisite: BME 681. Or Pre/Corequisite: BME 682.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 685. Immunoengineering. 3 Credit Hours.
Immunoengineering is a novel interdisciplinary field that combines biomaterial science and bioengineering design with immunology to develop cutting edge technology for the prevention, rapid diagnosis and treatment of infectious diseases, cancer, autoimmune and inflammatory diseases. The goal of this course is to provide a basic background in immunology that will allow understanding the need for immunoengineering and providing the tools to be able to design novel vaccines, anti-inflammatory agents, and immunotherapy. Application of biomaterials for immunoengineering applications will be reviewed through lectures, reading assignments and journal clubs. This course will provide valuable knowledge of an emerging field that will impact both the academic and industrial world.
Prerequisite: BME 335.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 687. Finite Element Analysis for Engineers. 3 Credit Hours.
Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electromagnetic, optical, and fluid flow problems.
Prerequisite: MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 695. Current Trends in Regenerative Medicine. 3 Credit Hours.
This team-taught course provides background, clinically-relevant applications and ethical aspects of regenerative medicine as it applies to multiple types of cell, tissues and organs. The course is divided into modules focused on one application of regenerative medicine and taught by an expert in that specific topic area. The course includes hands-on demonstrations of key techniques and problem-based group projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 699. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student’s field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 702. Organs on Chips. 3 Credit Hours.
This course provides a comprehensive introduction to engineering the living and non-living components of cellular systems in a dish. The first part of the course will focus on cell source, with an emphasis on human stem cell acquisition and differentiation. The second part of the course will focus on biomaterials and methods for engineering tissues. The final portion of the course will be a survey of tissue engineering in the clinic today and existing “Organ on Chip” platforms. Throughout the course, laboratory principles will be discussed, including cell culture and gene editing. Most of the assigned reading will be recent primary literature articles.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 705. Senior Design Project. 3 Credit Hours.
Team-based capstone design project. Students will apply the Biodesign concepts learned in BME 401, including the phases of identify, invent and implement. In the identify phase, students will perform unmet-need identification, technical and economic feasibility and screening to end with a need statement and a set of specifications and constraints. In the invent phase, the students design a proof of concept prototype and perform a technological de-risking exercise by means of a killer experiment. In the implement phase, student teams develop a device for which a risk analysis is completed, and verification protocols are designed and performed. Student teams are required to report their progress on a regular basis.
Prerequisite: BME 401.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 706. Master's Project. 3 Credit Hours.
Comprehensive MS research or design project in biomedical engineering. Open only to students who are enrolled in the MS program. This course is a requirement for all MS students in biomedical engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 711. Accelerated Basic Science Curriculum. 1-9 Credit Hours.
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systematic Physiology, Pathology, Medical Microbiology, and Pharmacology. A single grade will be entered on the graduate transcript for this course. MD-PhD Students Only
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BME 713. Application of Computers in Medicine. 3 Credit Hours.
Applications in the clinical and medical research laboratories for physiological data acquisition, analysis, and management of patient records. Differences among computer systems and languages for clinical and research activities are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 722. Scanning Electron Microscopy Special Projects. 3 Credit Hours.
An advanced course for graduate students with basic skills in SEM. Course is open only to masters or Ph.D. students. Students will have an opportunity to do independent research under supervision of the instructor on special projects of interest that may be related to their field of study as long as it is not part of their thesis or dissertation.
Prerequisite: BME 522 Or BME 622.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 725. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 726. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring.

BME 728. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BME 729. Advanced Medical Imaging. 3 Credit Hours.
Analysis of contemporary medical imaging systems and the associated technologies. The course focuses on principles of advanced medical imaging systems. Topics include multimodality imaging, three-dimensional image reconstruction and visualization, clinical and research applications, and derivation and comparison of algorithms.
Prerequisite: BME 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 731. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 732. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BME 735. Auditory and Visual Neural Systems. 3 Credit Hours.
Design and application of auditory and visual neural systems and devices for medical purposes. Methodologies and instrumentation using electrophysiological, psychophysical and other measurements are explored focusing on diagnostic and therapeutic applications.
Prerequisite: BME 603.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 740. Implantable Biomedical Devices. 3 Credit Hours.
Development and advances in implantable materials and devices especially those used as electrically driven protheses. Topics include pacemakers, defibrillators, catheters, neurological stimulators, heart assist, bone repair, and other diagnostic and therapeutic devices. The historical, medical significance, business, economic, and technical aspects of these devices and the associated instruments for monitoring are discussed. Fundamentals of electrochemical corrosion and stimulation as well the technology of implantable power sources are reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 745. Biomedical Optical Imaging and Diagnostics. 3 Credit Hours.
Review of geometrical optics, fiber optics, and tissue optics. Introduction to physical optics: interference, diffraction, and polarization; optical imaging resolution limits, super-resolution imaging, advanced optical microscopy, and optical coherence tomography (OCT). Imaging through scattering tissue, imaging and diagnostics with polarized light, fluorescence, infrared, and Raman spectroscopy and applications are also discussed. Optical diagnostics using scattered light: laser Doppler flowmetry, and dynamic light scattering; and opto-chemical and evanescent wave sensors are also covered.
Prerequisite: BME 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 760. Stem Cell-Based Tissue Engineering. 3 Credit Hours.
Principles and advanced topics on cellular and tissue engineering. Topics include biodegradable and non-biodegradable biomaterials, cytokines, the traditional and stem cell-based tissue engineering approaches, bioreactors and special topics such as bone, cartilage and other tissues.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BME 761. Stem Cell Design. 3 Credit Hours.
Stem cell engineering is a relatively new field of research that focuses on using stem cells and tissue derived products to repair damaged or diseased tissues. This course will examine through the most recent publications the role of stem cells and tissue derived donors for tissue repair, wound healing, and as well as regeneration/repair. In addition, we will highlight the use of engineered products developed from tissue banks associated with the different type of cells for clinical application. The course will use a mix of lectures/article presentations and discussion format to effectively present relevant information.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BME 779. Biomedical Engineering Seminar Series. 1 Credit Hour.
A course for Biomedical Engineering doctoral students. Students will attend lectures and roundtable discussions with leading experts from both academia and industry.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

BME 780. Graduate Scholarship in Biomedical Engineering. 3 Credit Hours.
A course for Biomedical Engineering doctoral students. Students will learn to critically review scientific journal articles as well as NIH research proposals (i.e. R01, R03, F30/31 and R21 ). Students will also learn how to read federal grant application guidelines and determine what is required for a highly competitive written application. The students will have the opportunity to prepare their own research proposal in the form of an F31 NIH application on a biomedical engineering topic of interest. Students will also learn how to prepare and present their research findings at conferences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BME 781. Radiation Dosimetry and Physics. 3 Credit Hours.
Application of radiation physics in the field of radiation therapy. The course will cover the relevant subjects of modern physics, the basic modalities and basic instrumentations of radiation therapy, the principles of particle transport and radiation dose computation and quality assurance of radiation therapy instruments. The subject of radiation protection will also be discussed.
Prerequisite: BME 582. Or BME 682.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 783. Radiation Therapy Physics Clinical Rotation. 3 Credit Hours.
Students will observe clinical activities at a designated radiation therapy center for ten hours per week. Rotation includes observation of daily treatment, simulation, dose planning, physics quality assurance and routine physics support activities (special physics consultation, weekly physics chart check, monitoring radiation safety activities, support of brachytherapy procedures). Students will meet with the course instructor one and a half hours/week to discuss the schedule and the progress of the rotation activities. Students need to submit reports on each radiation therapy category.
Prerequisite: BME 682. And BME 781.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 784. Medical Physics Journal Club. 1 Credit Hour.
The course aims to keep track of recent developments in the field of Medical Physics for therapeutic and diagnostic purposes in oncology through reading, discussion and presentation of identified scientific papers from the major journals of Medical Physics among enrolled students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BME 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BME 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BME 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BME 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BME 830. Pre-candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of BME 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in BME 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biostatistics (BST)

BST 603. An Introduction to Probability Theory and Its Applications. 3 Credit Hours.
This is an elementary introduction to probability theory. Its goal is to present the logic and the mathematics behind the theory, supply it with many examples and techniques, and to infuse these results in the student through many, many exercises.
Requisite: Academic Plan: BSTS_PHD or BSTS_MS.

Components: LEC.
Grading: GRD.

Typically Offered: Fall.

BST 605. Statistical Principles of Clinical Trials. 3 Credit Hours.
This course is designed for individuals interested in the statistical aspects of clinical trials. Topics include types of clinical research, study design, treatment allocation, randomization and stratification, quality control, sample size requirements, patient consent, and interpretation of results. This course will additionally cover strengths and limitations of alternative study designs such as quasi-experiments and observational studies. Common sources of bias in these alternative study designs will be described along with design approaches to minimize bias.

Components: LEC.
Grading: GRD.

Typically Offered: Spring.

BST 610. Introduction to Statistical Collaboration. 3 Credit Hours.
This course gives students exposure to issues arising in biostatistics consulting and collaboration. Students will learn how to identify the scientific objectives of a study and to develop a statistical strategy appropriate for those objectives. The student will become familiar with problems arising in consulting situations, specifically relating to identification of study objectives and framing of research questions, study design, power and sample size determination and choice of analytical approach. The student will learn to communicate through presentation of oral and written reports, and through student and faculty critiques of these reports. This course is open only to MS and PhD Biostatistics students or instructor's permission.
Requisite: Academic Plan: BSTS_PHD or BSTS_MS.

Components: LEC.
Grading: GRD.

Typically Offered: Summer.

BST 625. Survey of Statistical Computing. 3 Credit Hours.
This three credit course aims to familiarize students with the basic use of SAS and R for routine statistical analysis and prepare them for more advanced courses and/or thesis research. Statistical computation will be illustrated with examples in medical research, biological study and business. The focus of the course is on the computing environment, therefore a thorough discussion of statistical theories will not be provided. It is expected that students will already be prepared statistically.

Components: LEC.
Grading: GRD.

Typically Offered: Fall.
**BST 630. Longitudinal and Multilevel Data. 3 Credit Hours.**
This course offers students an introduction to linear and generalized linear models for the analysis of multi-level and longitudinal biomedical data. The course will also provide students with the opportunity to develop the skills necessary to perform analysis of these types of data using statistical software packages.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**BST 640. Modern Numerical Multivariate Methods. 3 Credit Hours.**
This course covers multivariate topics from both a classical as well as modern perspective. Topics to include: Multivariate Normal Distribution; Spectral Decomposition; Principal Component Analysis; Canonical Correlation Analysis; Newton's Method; Steepest Descent; Gradient Boosting; Coordinate Descent Algorithms; Trees; Forests; Discriminant Analysis. The R programming language (http://www.r-project.org) will be used extensively throughout the course for computation and statistical analysis.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**BST 649. Advanced Individual Study. 1-3 Credit Hours.**
Individual work on a special project under faculty guidance.
**Components:** IND.
**Grading:** SUS.
**Typically Offered:** Fall, Spring, & Summer.

**BST 650. Topics in Biostatistical Research. 1 Credit Hour.**
The course consists of a series of research level presentations in contemporary biostatistics research (broadly defined) by diverse outside speakers as well as faculty in the Division of Statistics or in other units on campus who are hosting presentations in biostatistics research. The emphasis will be on new methodologies and new developments in existing methodologies. However, recent developments on the implementation and comparison of methodology and on data types may also be included.
**Components:** LEC.
**Grading:** SUS.
**Typically Offered:** Fall & Spring.

**BST 660. Spatial Statistics. 3 Credit Hours.**
Spatial data commonly arise from many fields including business, ecological, and health studies. This course will cover advanced techniques to tackle the spatial correlation. Topics include variogram estimation, spatial prediction, spatial point pattern analysis, estimating function based methods and others. Real data examples will be used to motivate and illustrate the use of the methods.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**BST 665. Design and Analysis of Clinical Trials. 3 Credit Hours.**
This first part of this course is an advanced treatment of the key ideas undergirding the design and analysis of contemporary clinical trials. By the end of the course, students will have learned the statistical foundations of Phase I, II, and III trials from the standpoint of classical Frequentist, Bayesian, and adaptive designs. In addition, students will learn the usual mechanisms for preparing a clinical trial protocol, data safety and monitoring, interim analysis, and proper close out of a trial.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**BST 670. Bayes Data Analysis: Theory and Computing. 3 Credit Hours.**
This first part of this course is an advanced and comprehensive treatment of the foundations of Bayesian theory. Beginning with the Bayesian alternative to sampling theory, the course covers Savage’s axioms, the standard Bayesian inference procedure, subjective Bayes interpretation and prior selection, the minimax and complete class theorems, a variety of Bayesian principles (likelihood, stopping time etc.), and a selection of standard parametric and non-parametric examples. The second part focuses on the computational implementation of Bayesian inference, namely Gibbs sampling, Metropolis-Hastings, and other Markov-Chain-Monte Carlo techniques for obtaining the posterior and posterior quantities. Computational examples will be illustrated using R and WinBUGS. Special topics will include approximate Bayes computing (ABC) and particle methods.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**BST 675. Intermediate Probability. 3 Credit Hours.**
This course covers the basic foundations of probability to limit theorems at an intermediate level. Topics to include are events, random variables and their distributions, discrete and continuous random variables, generating functions, markov chains and convergence.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.
Biostatistics (BST)

**BST 676. Introduction to Generalized Linear Models. 3 Credit Hours.**
This course provides a unifying framework for formulation, estimation and inference using generalized linear models and towards the end examines some modern day extensions. Throughout the course, real data applications from medicine will be used and extensive use will be made of the R programming language.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**BST 680. Advanced Statistical Theory. 3 Credit Hours.**
The first part of this course is a searching treatment of many of the key ideas undergirding hypothesis testing and estimation. In particular, several of the main theorems in mathematical statistics will be stated and proved in full detail. By the end of the course, students will have acquired enough background material for the treatment of a special topic, through a mix of lectures and assignments. Topics will include asymptotic expansions, information theory and non-parametrics.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**BST 690. Theory of Survival Analysis. 3 Credit Hours.**
Survival analysis is an important tool of statistic with many applications. In this course, without losing sight of such applications, we will give special emphasis to the probabilistic foundations, in terms of counting processes and martingales. Topics include: Failure time models, inference in parametric models, Cox models, counting processes and martingales, likelihood, competing risks and analysis of recurrent event data. The R programming language will be used.

*Prerequisite:* MTH 524, MTH 525, and BST 680.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall.

**BST 691. High Dimensional and Complex Data. 3 Credit Hours.**
This course will cover some salient topics in high dimensional data analysis focusing on the uniqueness of the problem and discussing various analyses including error rate control methods, model based shrinkage, prediction, set analysis, cluster analysis, bump hunting and (if time permits), graphical models.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Spring.

**BST 692. Data Science and Machine Learning for Health Research. 3 Credit Hours.**
BST 692 (3-credits) will teach computational data science techniques using end-to-end data processing pipelines. It will focus on applied data analysis problems that the faculty are actively trying to solve. Students will be presented with data that the faculty are working on and will be asked to apply programming knowledge that they have learned in previous classes. They will then study and apply new data acquisition, data processing, and machine learning methods to handle problems that are not well handled by the common techniques. The goal of the class is to give students the opportunity to deploy a complete data science pipeline. Students will apply their data acquisition and exploration skills to real world problems; study modern machine learning methods; contrast traditional and new methods to deal with large, complex and messy data; and learn to disseminate results through online, interactive displays.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Summer.

**BST 695. Special Topics. 3 Credit Hours.**
The course is designed to allow the listing of special topics within the Division of Biostatistics degree programs and cross list topics with other department's offerings.

*Components:* LEC.
*Grading:* GRD.
*Typically Offered:* Fall & Spring.

**BST 830. Doctoral Dissertation (pre-candidacy). 1-12 Credit Hours.**
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 730 may be taken in regular semester, nor more than six in a summer session.

*Components:* THI.
*Grading:* SUS.
*Typically Offered:* Fall, Spring, & Summer.
BST 840. Doctoral Dissertation (Post-Candidacy). 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credits as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 740 may be taken in regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BST 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the PhD. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Business (BUS)

BUS 150. Business Analytics. 3 Credit Hours.
The primary purpose of this course is to build skills in learning and using software technologies to support business-oriented problem solving and decision making. Specifically, you will develop the ability to solve problems, to organize and analyze data using spreadsheet and database software, and to learn to distribute information to others through the effective use of collaborative technologies and the Web. Case problems will cover areas such as accounting, finance, marketing, statistics and operations management. Professors from several business school departments will discuss how their disciplines use spreadsheets to solve problems.
Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 155. Exploration of Faculty Research in SBA. 1 Credit Hour.
Students will be exposed to some of the SBA's top faculty researchers to learn more about research opportunities and styles of research methodologies within b usiness.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.

BUS 156. Global Business Studies Introductory Seminar. 1 Credit Hour.
The honors seminar provides an experiential introduction to culture, history, and geography of the region, as well as economic challenges and successes of business in the region. Course involves social interaction among Global Business Studies cohort through cultural visits and workshops/talks, both on and off campus. Travel component is designed to showcase key sectors of a regional economy, and includes case-study and presentation activities.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

BUS 200. Introduction to Business. 3 Credit Hours.
Businesses today operate in an exceedingly complex environment. Such factors as commodity prices, labor and capital markets, as well as trends in tastes and preferences are constantly changing. This course will explore many of the key issues facing business decision makers in the contemporary environment, including an introduction to business ethics and corporate social responsibility. The course will take an interdisciplinary perspective, touching on essentially all of the business functions including economics, finance, accounting, marketing, management, and business communications. Using approaches from different business disciplines, students will gain insight into the structures and systems of business, as well as the strategies that firms use to compete effectively in the global business environment. BUS200 serves as the foundational course for the Business Cognate in People & Society, and it is offered for Gen Ed credit only.
Requisite: Non Business Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 201. Money. 3 Credit Hours.
Financial decisions are at the heart of success in today's economy. Thus, financial literacy and the ability to manage personal finances is increasingly important. This GENERAL EDUCATION course delivers a comprehensive introduction to savings and borrowing, investments, and insurance, including such topics as budgeting, banking and consumer credit, the purchase of residential real estate, planning for retirement, starting a business, and understanding basic financial statements. Not for credit toward any business major or minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BUS 202. Introduction to the Legal Environment of Business. 3 Credit Hours.
The course provides an overview of legal principles impacting business. Students will explore fundamental features of the U.S. judicial system, conflict resolution, the domestic system of property rights, the U.S. Constitution, and the regulatory process, as they relate to the business firm or business as a societal actor. Topical areas may include business ethics, consumer protection, employment discrimination laws, privacy concerns, the law of competition, and environmental regulation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 203. Managing Effectively: A Skills Development Approach. 3 Credit Hours.
This Business Cognate course focuses on the seven core skills used by successful managers in their day to day work. Students will explore these skills, how they are applied and practiced in organizational settings, how they enable organizational success, and how they fit with the students' own capabilities. The course uses an action-based learning format that makes students participants in the process whereby they assess, practice, and enhance their own managerial skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 204. Intro to Corporate Sustainability. 3 Credit Hours.
This course introduces students to issues associated with business and sustainability, through the lens of corporate governance and corporate citizenship. Readings, class sessions, and assignments are designed to instill in students a practical understanding of key corporate sustainability frameworks, challenges and opportunities, institutions, and actors in the global corporate context. Students will learn to apply alternative decision making models to current business activities.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 206. Principles of International Business. 3 Credit Hours.
This course is designed to provide nonbusiness students with an understanding of what global business is, in particular how international business is conducted across countries with different sets of formal and informal institutions. It also addresses the issues facing multi-national corporations and the factors influencing their success or failure globally.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 211. Professional Development for Finance and Accounting. 1 Credit Hour.
This one-credit course is designed to immerse undergraduate BSAF students in professional development, including inculcating in them a deeper understanding of areas of specialization within accounting and finance, and of careers within those specialties, creation of a career direction and trajectory, development of job search strategies, enhancing their communication and networking skills, building and creating a compelling resume for these industries, and both general and specific interview techniques. It is designed to improve these students’ preparedness to find and secure internships and permanent placement offers, and ultimately to be successful in these industries.
Requisites: BSAF degree and Sophomore Status or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 255. Business and Society: Inquiry and Discourse. 1-3 Credit Hours.
This course will explore the relationships between business firms and their regulatory, ethical, political, cultural, and social environments. Students will be exposed to a wide range of source materials and academic activities, with the objective of developing their capacity for principled professionalism.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

BUS 256. Global Business Studies Seminar II. 1 Credit Hour.
This honors seminar introduces the key political movements and concepts that have shaped society in the region studied.
Components: THI.
Grading: GRD.
Typically Offered: Fall.
BUS 300. Critical Thinking and Persuasion for Business. 3 Credit Hours.
The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally.
Prerequisite: ENG 106 with a C- or better AND Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 356. Global Business Studies Seminar III. 1 Credit Hour.
This honors seminar facilitates understanding of economic challenges faced by business communities, connecting regional studies work with business curriculum. May be conducted in language of the region.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

BUS 400. Senior Experience for Business Students. 0 Credit Hours.
The Miami Business School Senior Experience (SBX) is a virtual, self-paced, credit/no credit course specially designed to assist business seniors in successfully navigating the final year at the University of Miami Business School. The course collects the various tasks required of business seniors under a single LMS-enhanced umbrella, making it easier for students to track completion of mandated assignments within established deadlines. SBX also serves as a hub for peer networking and for access to relevant resources for senior-level students, related to professional life, graduate study, and young alumni leadership opportunities. Videos, power points, blogs, threaded discussions, as well as detailed instructions and web-links for required activities for graduating seniors are only a click away.
Requisite: Business School And Junior Or Senior Status.
Components: DIL.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 428. Multidisciplinary Action Projects. 1-3 Credit Hours.
The University of Miami Business School's Multidisciplinary Action Projects course (UMAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsoring organizations.
Components: EXP.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 456. Global Business Studies Seminar IV. 1 Credit Hour.
The honors seminar is designed to introduce students to research methods and structuring a thesis question/argument.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 496. Directed Studies in Business. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 497. Directed Studies in Business. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 498. Special Topics in Business. 1-3 Credit Hours.
Special topics in selected non-STEM areas of Business.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BUS 499. Special Topics in Business. 1-3 Credit Hours.
Special topics in selected STEM areas of Business.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 555. Business Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BUS 556. Global Business Studies Seminar V. 1 Credit Hour.
This directed study course provides individual supervision in thesis writing.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

This honors seminar is designed for completion of the thesis writing and individualized preparation for thesis defense.
Requisite: Global Business Studies co-major.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

BUS 600. Critical Thinking and Persuasion for Business/Non-native English Speakers. 2 Credit Hours.
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling written arguments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 601. MBA Math Module. 0-3 Credit Hours.
This course provides the student with the necessary mathematical skills to progress toward an MBA degree. The course begins with a review of algebra and continues with the fundamentals of differential and integral calculus. The focus is on applying these concepts in solving business problems.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 602. Critical Thinking and Effective Writing. 1 Credit Hour.
Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 603. Critical Thinking and Effective Speaking. 1 Credit Hour.
Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one's view before adversarial audiences, display of data, and effective use of visual aids.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 604. Career Development and Enrichment. 0-1 Credit Hours.
This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 605. Residential Session Abroad. 1-6 Credit Hours.
One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BUS 610. Communicating for Career Success. 2 Credit Hours.
The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies. This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally. The critical thinking and communication elements of the course are supplemented with additional practical applications relating to career readiness, job search and job procurement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BUS 622. Global Business Consulting. 1-6 Credit Hours.
The Global Business Consulting (GBC) project is a collaborative course offered by participating CIBER schools to their Graduate Students. Students in related disciplines work in teams both virtually and in person on real business issues with multinational and local businesses and not-for-profits. Project supervision and final grade provided by Faculty Advisor.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

BUS 624. Asian/Pacific Business Environment- International Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 625. Latin America Business Environment - International Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 628. Multidisciplinary Action Projects. 1-4 Credit Hours.
The Multidisciplinary Action Projects core course (MAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors. For students, MAP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. MAP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges. For sponsoring organizations, MAP offers access to a high-caliber team of 4-6 students, the latest business concepts and tools, an external viewpoint, and rapid turnaround. The ultimate deliverable to the sponsor from a MAP project is a set of actionable, data-driven recommendations. MAP projects are based on sponsor needs and address a wide range of business issues — from identifying new processes and improving existing operations to launching new products and targeting new growth opportunities. Sponsors come from many different industries — from alternative energy to business process outsourcing to consumer products to financial services to healthcare to real estate to telecom. Sponsoring organizations may be large corporations, small entrepreneurial start-ups, or non-profit organizations. While each MAP project is different in context, all have essential features in common. All confront students with a real business challenge of significant importance and no existing solution. All require applying concepts and tools from multiple disciplines to successfully complete. All require dynamic sense-making, fact-based decisions, and high-performance teamwork. All unfold in unpredictable ways. All conclude with teams presenting actionable recommendations to project sponsors and faculty advisors.
Components: EXP.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 629. Graduate Business Exchange Program. 1-16 Credit Hours.
Course content may vary from semester to semester at selected universities.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 630. Fundamentals of Economics, Accounting, and Finance. 4 Credit Hours.
This course provides an overview of business economics, accounting, and finance. Economic themes primarily focus on microeconomic topics such as demand, supply, elasticity, and forms of competition. Accounting concepts include corporate financial statements, cost-volume-profit analysis, and traditional and activity-based cost accounting. Finance topics include time value of money, capital budgeting basics, foreign exchange, risk and return, modern portfolio theory, and financial markets. The course includes an integration of many of these concepts through an exposure to business plan development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 631. Business Analytics and Operational Excellence. 4 Credit Hours.
This course combines three disciplines that form the basis of a modern analytical approach to business management: statistics, optimization, and operations management. Many of the concepts covered are cross-disciplinary and can be applied to a variety of business functions and situations. Although specific examples will be used during the course to illustrate each concept, instruction will focus on the general applicability of the material. Topics to be covered include: numerical and categorical data, population/sample, parameter/statistic, introduction to excel, frequency distributions, histograms, pie charts, measures of variability, pivot tables, measures of association, random variables and distributions, sampling, types of hypothesis and of statistical errors, linear programming, network models, sensitivity analysis, integer and goal programming, forecasting, inventory management and location analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 632. Introduction to Strategy, Market, and Management. 4 Credit Hours.
This integrated course focuses on the external environment in which business firms operate and on the management techniques through which managers organize and motivate human resources to support strategic initiatives. It emphasizes in particular three critical sets of actors: customers, competitors, and employees. The purpose of the course is to introduce the student to basic conceptual frameworks and analytic models that managers use to a) identify and understand the customer segments that make up a marketplace, b) formulate strategies that achieve a competitive advantage within that marketplace, and c) lead and motivate employees in the execution of competitive strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 633. Business Plan Fundamentals and Communications. 4 Credit Hours.
This course provides students with the fundamentals in the development and preparation of a business plan, as well as of oral and written business communications. Students, after exploring new venture opportunities, will develop a comprehensive business plan, including its functional components (marketing, finance, operational, human and intellectual capital plans), the support with which to secure the needed financial and human resources, and the organization to manage the new venture. Students will also enhance their communication skills with which to identify critical issues, develop reasoned positions, display data, use visual aids effectively, state persuasive and compelling arguments for written documents as well as prepared and impromptu speeches, and deal with the media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BUS 634. Research Project. 1-6 Credit Hours.
Individually supervised research project in selected field. Scope of work must be approved by supervision instructor prior to registration. Total enrollment may not exceed six credits.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 635. Research Project. 1-6 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement. The study will be supervised and graded by a faculty member.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BUS 636. United States Business Environment - Domestic Trip. 1-4 Credit Hours.
Course content, dates and location will vary from semester to semester at selected universities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BUS 642. Global Residency - South America. 2-4 Credit Hours.
This global residency in South America is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of South America – and their impact on business activity. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in South America.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 643. Global Residency-North America. 2-4 Credit Hours.
This global residency in North America is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. In this global residency students take a closeup comparative look at Mexico and the United States and their place in the global business community from the perspective of Miami and Mexico City. In Miami, students begin by examining the role of the United States in global business, guided by world-class faculty and thought leaders in the field. They engage with executives from leading multinational companies on topics such as sustainable business, corporate innovation, and principled leadership. Students then move on to explore, firsthand, the burgeoning business environment in Mexico. In Mexico’s capital city, they dive into topics as diverse and important as mega trends in business development, high performance management, and transformational leadership.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 644. Global Residency-Asia. 2-4 Credit Hours.
This global residency in Asia is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program of four residencies, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of Asia – through the perspective of visits to China and India. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in Asia.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 645. Global Residency-Europe. 2-4 Credit Hours.
This global residency in Europe is one of four global residency courses associated with OneMBA, the truly global executive MBA program of Miami Herbert Business School. Across the OneMBA program, students experience a week-long global residency in each course: BUS642- Global Residency- South America, BUS643- Global Residency- North America, BUS644- Global Residency- Asia, and BUS645- Global Residency- Europe. Students experience first-hand how business is done in different parts of the world. During each residency, students attend class, visit local and multinational firms, interact with leaders from business, government, and non-government agencies. And students meet, network and interact with their cohort, and global team members, face-to-face. Miami Herbert students join with students from OneMBA schools in other countries to build lasting relationships through formal learning experiences and cultural exchanges. This global residency course will include multiple activities, which address the institutional environment (economic, political social and cultural aspects), the business arena and the entrepreneurial ecosystem of Europe – through the vantage point of visits to The Netherlands and Poland. Students should expect a balance between faculty and executive presentations, covering the challenges and opportunities of doing business in Europe.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 650. Introduction to the Miami EMBA for the Americas. 1 Credit Hour.
This course provides incoming Executive MBA students an orientation to program tools and resources central to program success. Students will receive training in Blackboard, learn to access e-materials and navigate the business fundamental virtual modules, and increase their knowledge of business networking and influence. Students will also be introduced to business information resources and research strategies that they will use throughout the program. They will partake in Case Study preparation and receive an overview of the Integrated Project from Global Management, Global Enterprise, and Global Strategic Marketing perspectives. Students will also receive guidance on operating in teams both virtually and during the residency components of the program. Students will also participate in a corporate visit. This orientation also helps build a sense of affiliation among students and with the University.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BUS 651. Global Strategic Marketing. 4 Credit Hours.
The purpose of this course is to acquaint the student with the theories and practice of strategic marketing management in the Americas. This course will enable the student to understand markets, develop strategies to capture value, and develop marketing plans based on the nature of national as well as international markets. Specifically, the issues of strategic marketing in the context of firm level strategy will be addressed, as well as issues of value capture and delivery, customer life-time value, pricing, distribution, branding and communication in markets.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 652. Global Strategy. 2-4 Credit Hours.
The purpose of this course is to change how the strategic environment is viewed, how students think about their own organizations and other others, and how strategy and its execution is viewed. This course will help the student: understand organizations as complex systems embedded in a set of evolving cooperative and competitive economic relationships; identify the distinct resources and capabilities that form the foundation of an organization's competitive advantage; formulate business strategies that anticipate imitation and competitor response; evaluate the relationship between a firm's competitive advantage and its growth opportunities; understand the role of the corporate center in supporting and enhancing the competitive success of operating divisions; and see the interplay of organizational structures, systems, networks, and influence centers that form the basis of effective strategy implementation.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 653. Global Institutions and Economy. 2-4 Credit Hours.
This course considers how a country's legal and economic institutional arrangements influence managerial strategy involving goods, services and financial flows across nations. The course addresses how economic problems are dealt with by institutional arrangements in different ways around the world. Discussions will emphasize the influence that these institutional arrangements have on managerial project strategy when firms operate across borders. Specific emphasis will be placed on legal, economic and financial institutions in the Americas.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BUS 654. Corporate Financing and Investing. 4 Credit Hours.
This course considers financing and investing within the corporation. As such, it will consider the theoretical structure of the problem, the boundaries that management faces and how these decisions are made by management. The inter-residency portion will focus on the theoretical development and computational aspects of solving the problems. The residency portion will emphasize case discussion and simulation to demonstrate the practical implementation as well as integrating these concepts into the overall management picture. The objective of the course is to develop your understanding of the principles that define financial decision making in the firm. These topics are an important component of the strategic planning and top-level management of the firm. The course will guide you through the theory and computational aspects applying the theory, then through application to situations that will enhance and cement your understanding. Finance theory is universal and therefore does not apply to any given country or system. All of the applications will be international, multinational, or global in context. A central theme of the course is decision making. Specifically we will focus on the financial aspects of major strategic decisions. We will build on previous courses to understand how institutions, accounting, legal structures and more, affect these decisions.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 655. Public Policy and Health. 3 Credit Hours.
Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
BUS 656. Integrated Business Project. 1-6 Credit Hours.
The Integrated Project course (IP) requires students to formulate, develop and implement three business projects that address pressing organizational challenge, over the 17-month duration of the EMBA for the Americas. Students may work in teams or individually to develop actionable and valuable recommendations for their chosen organization and present project outcomes to faculty advisors during the February, June and October residencies. For students, IP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. IP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 657. Optimizing Human Capital. 2-4 Credit Hours.
The 21st century workplace has often been characterized as the "Age of Intellectual Capital," a time in which competitive advantage is linked intricately to optimizing human resources in distinctive ways. In this dynamic, global marketplace, Darwin rules. To survive, organizations must provide the best products, the best services with the best labor or risk extinction. Contextual factors including changing demographics; global social, economic, and regulatory issues; and technological innovations have created major challenges for organizational sustainability. In a recent publication based on survey results from 94 countries, talent acquisition, retention, management, and engagement were viewed as "urgent" global trends for the 21st century. Utilizing a variety of pedagogical approaches, this course will focus on the ways in which human capital can be leveraged to create sustainability as well as work environments that engage the minds and hearts of participants to achieve strategic initiatives.

Components: LEC.
Grading: SUS.
Typically Offered: Spring.

BUS 658. Business Analytics. 2-4 Credit Hours.
One of the strengths of Business Analytics is its broad applicability. The skills learned in this module can be used in virtually any context of business, including but not limited to: finance, marketing, strategy, operations, logistics, transportation, health care, real estate, sports, manufacturing, etc. For that reason, rather than focusing on a single central theme, as do other modules in the MEMBAA program, the Business Analytics module touches on a variety of themes that illustrate its potential.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 660. High Performance Leadership. 4 Credit Hours.
The High Performance Leadership course was developed to help executives build a high-performance work environment and effectively operate in the multicultural environment of the Americas and the World. The course is divided into two parts. The first part, the inter-residency will concentrate on the facets of high-performance leadership. It will explore the fundamentals of leadership; investigate the major leadership theoretical concepts; explore a wide-range of leadership research; convey practical leadership implications; and share lessons in conquering self-leadership. This section will be taught online through readings, discussion boards, and case and leader analyses. The emphasis will be on building a sound grasp of good practice, and on developing the ability to apply such knowledge to actual business problems. The theories will be applied to specific situations. The second part of the course, the residency concentrates on the cross-cultural environment of the Americas (and global markets) and addresses four main topics. The first session focuses on Cross-Cultural Communication in Business and allows executives to understand culturally-specific communication patterns, negotiation styles, expectations, cues, and norms. The second session addresses Leadership Issues in Organizational Control and participants will explore ethical and moral dilemmas, and external communications by senior executives. The third session focuses on Cross Cultural Issues in Leadership and examines effective leadership across cultures. The final session addresses Guanxi and Doing Business in China. China is currently or will soon become the world’s largest economy (PPP basis) and is increasingly becoming important to the Americas. This session addresses critical thinking, cultural understanding, solutions to problems, and evaluating different options when doing business with China.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 661. Enhancing Global Operations. 4 Credit Hours.
This course focuses on how to manage more complicated global networks; how to optimize service and quality levels of performance; and, how to minimize risks yet maintain required capacities. Operational transformation requires commitment and expertise in strategy and execution to achieve lasting improvements. This course draws on research and real world issues confronting manufacturing and service companies today, providing strategic frameworks to enable executives to make smart choices so that their firms can deliver the products and services they are committed to providing their customers.

Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
BUS 662. Decision Making in Global Environment. 4 Credit Hours.
This course provides students with a systematic way to carefully think about decisions to arrive at more informed choices while doing business globally and specifically in the Americas. The course covers structuring decisions, creating alternatives, making tradeoffs among conflicting objectives, accounting for uncertainties and risk tolerance, and analyzing and evaluating alternatives. The course is intended to make participants aware of decision making issues surrounding global business, the dynamic issues surrounding their context, and how these affect managerial strategy. An objective of the course is to increase participants’ competence in managerial decision making related to globalization, institutions, incentives, corporate governance, regulation, business law, international finance and accounting, organizations and management (including culture), and international trade.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 663. Entrepreneurship and Innovation. 2-4 Credit Hours.
This course considers entrepreneurship and innovation within the Americas, together with a special emphasis on the Latin American context. The course covers the building blocks of the entrepreneurial process and pays special attention to the family business model where ownership is closely held. The objective of the course is to develop an understanding of the venture formulation process within the Americas and the processes that surround this. The topics of innovation; venture capital; venture formulation; human capital; market dynamics; technological readiness; role of government, regulation, and culture will be assessed. An objective of the course is to consider new models for venture design such as the agile model of development and the creation of the business canvases, a lean version of the traditional business plan.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BUS 698. Selected Topics. 1-6 Credit Hours.
Topics in selected areas of business.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BUS 801. Introduction to Commercial Real Estate: Analysis and Field Experience. 3 Credit Hours.
Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a one-week, four module, on-campus class followed by a full-time internship at a local Commercial Real Estate Institution during the first summer of the program. Module I: Students are introduced to the complexities of commercial construction techniques used in South Florida and the important links between architectural plans and economic value to owners and tenants. Module II: Students are introduced to the terminology and financial analysis of commercial real estate. Module III: Students are introduced to the application of real estate finance and valuation principles using ARGUS Valuation – DCF. Module IV: Students participate in a required internship at a local Commercial Real Estate Institution. Regarded as a full-time student.
Components: THI.
Grading: GRD.
Typically Offered: Summer.

BUS 802. Commercial Real Estate Field Experience. 3 Credit Hours.
Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a full-time internship at a local Commercial Real Estate Institution during the first fall semester of the program. This internship is subsequent to their previous summer internship (BUS 700). Regarded as a full-time student.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

Business Law (BSL)

BSL 212. Introduction to Business Law. 3 Credit Hours.
Introduction to business law and ethics for the undergraduate student. Topics include business ethics, contracts (the nature and requisites, formation, interpretation, performance and breach, and remedies), and sales (Uniform Commercial Code, Convention on the International Sale of Goods, transfer of title, warranties, and rights and remedies of buyers and sellers).
Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BSL 304. Corporate Law. 3 Credit Hours.
Introduction to the law and regulation of corporations and other business entities. Topics include: tort and other business liabilities, agency and fiduciary duty, partnerships, limited liability companies, corporations (including the legal relationships underpinning their financial structure, director and officer liability, and laws relative to change of control), securities regulation, and antitrust law.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 305. Legal and Social Aspects of Business Regulation. 3 Credit Hours.
An introduction to the legal and ethical issues arising out of business and the regulatory environment. Topics include business ethics and subjects as environmental law antitrust, securities, administrative process, consumer protection, and employment regulation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 306. Introduction to Corporate Sustainability. 3 Credit Hours.
This course introduces students to issues associated with business and sustainability, through the lens of corporate governance and corporate citizenship. Readings, lectures, class discussion, and student projects are designed to instill in students a practical understanding of key corporate sustainability frameworks, challenges and opportunities, institutions, and actors in the global corporate context. Students will learn to apply alternative decision making models to current business activities. BSL 304 recommended as a prerequisite, but not required.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 324. Negotiation. 3 Credit Hours.
This experiential course is designed to introduce undergraduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.
Requisite: Business School or Business Law minor AND Prerequisite: BSL 212 or equivalent or BUS 202 AND Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 333. Legal Aspects of Real Estate Transactions. 3 Credit Hours.
Legal principles controlling the acquisition, ownership, financing, and development of real property. Topics include nature and acquisition of rights in real property, theory of estates, co-ownership, fixtures, easements, legal descriptions, evidence of title, title insurance, deeds, mortgages, closing the sales and mortgage transactions, condominiums and cooperatives, brokers, and land use.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 401. The Law of Financial Transactions. 3 Credit Hours.
Overview of the law of commercial finance as it relates to existing and emergent payment systems, secured credit, and bankruptcy. Topics include: negotiable instruments, bank deposits and collections, secured transactions, personal and commercial bankruptcies, and accountant liability.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 412. International Business Law. 3 Credit Hours.
International law and organizations, international sales, credits and commercial transactions, U.S. trade law, and the regulation of the international market place are discussed.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BSL 424. Intellectual Property Law. 3 Credit Hours.
This course is designed to acquaint the business student with the general framework of laws that regulate innovation, marketing, competition, and business development in the U.S. Special emphasis will be placed on discussion of ethical issues in information property, unfair competition, and management of intellectual property across various industries.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 435. Law of Entrepreneurship. 3 Credit Hours.
Overview of the legal aspects of entrepreneurship and business management. Special emphasis on entity formation, intellectual property protection, capital formation, securities, tax planning, and risk management.
Prerequisite: BSL 212 or equivalent or BUS 202 or Entrepreneurship Minor for Non-Business Students AND Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 460. Health Care Law and Ethics. 3 Credit Hours.
This course is designed to offer students an appreciation of the legal foundations and ethical considerations in healthcare administration in the U.S. The readings and classroom discussion assist the student in (1) understanding the legal framework of relationships and institutions in healthcare, and (2) appreciating some of the particularly delicate ethical implications of decision-making in this field. Case study will promote the ability to analyze both. Special emphasis is placed on discussion of ethical issues in healthcare administration, including access to care, allocation of scarce resources and privacy.
Prerequisite: BSL 212 or equivalent or BUS 202 AND Business School or Business Law minor AND Sophomore Standing or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 476. The Law of Risk. 3 Credit Hours.
This course offering will analyze risk in business and examine the tools that the law offers to identify danger and risk in the workplace and shift and minimize potential losses. This highly interactive course will first examine the various sources of legal risk, from criminal liability to employment discrimination to personal injury claims and toxic tort exposures. It will then examine the ways business and law pool, shift, and minimize risk. This seminar-style course will also include a significant experiential, hands-on component. Students will also practice contract construction and interpretation in a workshop environment.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 485. Managing the Legal Factor. 3 Credit Hours.
This course offers the business manager a frank and analytical view of law and legal practice as they affect business decision-making. It addresses both the issues of cost containment and relationships between counsel and the company with the objective of achieving a more effective management of the legal function in business.
Prerequisite: BSL 212 or equivalent AND Requisite: Senior Status and Legal Studies major or Business Law minor. For Business Students only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 496. Directed Studies in Business Law. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 497. Directed Studies in Business Law. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BSL 498. Special Topics in Business Law. 3 Credit Hours.
Special topics in selected non-STEM areas of Business Law.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 499. Special Topics in Business Law. 3 Credit Hours.
Special topics in selected STEM areas of Business Law.
Prerequisite: BSL 212 or equivalent or BUS 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 555. Business Law Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business Law.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BSL 612. Legal Aspects of International Business. 3 Credit Hours.
International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 624. Negotiation: Theory and Practice. 2-3 Credit Hours.
This experiential course is designed to introduce graduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BSL 675. Advanced Business Law. 2 Credit Hours.
Advanced Business Law focuses on the following substantive subject areas commonly encountered by Certified Public Accountants and tested on the Uniform Certified Public Accountancy Examination: business ethics, contracts (including formation, performance, breach, and remedies), commercial transactions under UCC Article 2, commercial paper, agency principles, and secured transactions. Special attention is given to the areas tested on Regulation section of the Uniform CPA Exam.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BSL 685. Legal Aspects of Health Administration. 2-3 Credit Hours.
Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 690. Responsible Business. 2 Credit Hours.
BSL 690 explores the law's role in regulating responsible business and the impact of law on managerial decision-making. Students will evaluate whether the law engineers responsible, sustainable business, focusing on tort, compliance, and criminal law as examples of the law as regulator. Critical to this analysis is the degree to which ethics and corporate social responsibility are vital gap fillers. Students will achieve a firm grasp on and will practice using ethical decision-making models. Other topics include, for example, contract law as a means to achieve mutually agreed-upon responsible conduct in business.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BSL 691. The Public Corporation: Legal Perspectives. 2 Credit Hours.
The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the development of and investment in a private enterprise.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 692. Legal Implications of International Business Transactions. 2 Credit Hours.
International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 694. Real Estate Law. 2 Credit Hours.
Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property, contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides a problem-solving experience, which is intended to develop graduate students' critical thinking process as well as their skills in oral and written communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BSL 695. Legal Implications in Executive Decision Making. 3 Credit Hours.
Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the executive decision-making process.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 696. Legal and Ethical Implications in Executive Decision Making. 3 Credit Hours.
Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BSL 698. Selected Topics. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

Business Technology (BTE)

BTE 120. Introduction to Business Technology and Programming. 3 Credit Hours.
This Course covers the fundamentals of technology focusing on programming logic and structured programming principles including problem solving, algorithm design, and program development using Python. The course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development, and coding and testing using a modern software development environment. Students learn how to write programs in an object-oriented high-level programming language (Python). Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, data structures and object oriented programming. Throughout the semester, problem-solving skills will be stressed and applied to solving computing problems. Weekly assignments will provide hands-on experience in topics covered in this course.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 210. Fundamentals of Business Technology and Innovation. 3 Credit Hours.
This course covers the fundamental technologies used in business today. Topics include information technology platforms; enterprise technology concepts; network infrastructure; enterprise resource planning; information security; technology architectures; internet; cloud, mobile, and web platforms; analytical technologies; business intelligence; expert systems, and Big Data. Students work on an innovation project to create a specification/business canvas for a new technology product.
Requisite: Business School.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 320. Introduction to Programming. 3 Credit Hours.
This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development—using a high level programming language. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, pointers, and data structures.
Requisite: Miami Business School or BTE Minor or CSC Major or Minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BTE 324. Object-Oriented Programming. 3 Credit Hours.
This course introduces the concepts and fundamental techniques of object-oriented programming. Topics include: data abstraction, encapsulation, inheritance, polymorphism, class library, graphics/GUI, exception handling, multithreading, multimedia, files and streams, Internet applets, application development, integrated development environment, interactive program debugging and the eXtensible Markup Language (XML).
Prerequisite: BTE 320 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 360. Systems Analysis and Design. 3 Credit Hours.
This course introduces the techniques of systems analysis and design. Topics include: the Software Development Life Cycle (SDLC), Agile Programming, Extreme Programming, lean software development, Universal Modeling Language (UML), requirements modeling, data modeling, user interface design, data design, normalization, systems architectures, implementation methods, and testing methodologies.
Prerequisite: BTE 320 or CSC 120 or ECE 118 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 361. Design of Information Systems. 3 Credit Hours.
Continuation of BTE 360. Topics include concepts, tools, and techniques of systems design, prototyping, file/database design, and physical process modeling. Students work in groups to design an application system for a business related problem.
Prerequisite: BTE 360.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 389. Launching HighTechnology Ventures. 3 Credit Hours.
This course develops an understanding of the entrepreneurial processes as they apply to new technology ventures. Topics include: venture formation, venture and angel investments, innovation and creativity, business plan creation, human capital, ethics, and intellectual property.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 400. Web-Mobile-Cloud. 3 Credit Hours.
This course introduces the basics of the cloud computing paradigm and examines how to implement different algorithms for different web and mobile applications in the cloud. The course covers the principles, systems, and applications of cloud computing that integrate web applications, smart phones, and tablets with cloud computing infrastructure. The student will be introduced to the basics of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), as well as to cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services (AWS).
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BTE 401. Computers in an Inter-Networked Society. 3 Credit Hours.
This course provides students with fundamental knowledge of the technology and tools that integrate big data, cloud, and mobile computing within a business and social context. Students will study these technologies and their impact on socioeconomic, political, organizational, and personal environments. The course covers the cultural components of a social media society and examines the systems and processes that need to be developed for effective management of that environment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 412. Foundations of Business Enterprise Technologies. 3 Credit Hours.
This course provides an understanding of the foundations of enterprise technologies. Topics include: making the business case for technology, distributed architectures, customer relationship management systems (CRM), enterprise resource planning systems (ERP), requirements modeling and design for enterprise systems, software development and outsourcing for the enterprise, enterprise productivity technologies (RFID, internet of things, machine data), 3D-design technologies, cloud technologies, and technologies for the global enterprise.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 413. Big Data Strategy. 3 Credit Hours.
This course provides an introduction to the area of business intelligence termed Big Data. The concepts of high volume, velocity, and variety data are examined. The course examines how big data can be used to create business intelligence strategies in the areas of marketing, product development, systems deployment, and innovation. The course utilizes business intelligence software and Structured Query Languages (SQL) to analyze data. Other Big Data topics covered include the ethics, security, streaming data, sourcing, emergent technologies, and international data regulations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 417. Fundamentals of Tech Project Management. 3 Credit Hours.
This course is designed to provide the fundamental project management knowledge necessary for a business manager, consultant, project manager, IT professional, and/or team member to successfully initiate and plan IT and other business projects. It is structured to provide principles, methodology, and practical information through a combination of lectures, group collaboration and hands-on exercises. Emphasis is placed on the importance of standardization and best practices as defined by the PMI's Project Management Body-of-Knowledge (PMBOK®).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 420. Python Programming for Fintech. 3 Credit Hours.
The course covers the fundamentals of object-oriented programming, logic and structured programming principles including problem solving, algorithm design, and program development using Python with focus on financial programming applications. Topics covered include fundamentals of algorithms, flowcharts, problem-solving, programming concepts and methodologies, control structures, arrays, and strings, classes and class-methods, data structures and object oriented programming concepts including classes, methods, inheritance and polymorphism.
Requisite: Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 421. Design of Information Systems. 3 Credit Hours.
Continuation of BTE 420. Topics include concepts, tools, and techniques of systems design; prototyping; file/database design; and physical process modeling. Students will work in groups to design an application system for a business related problem.
Prerequisite: BTE 420.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 422. Tech Foundations of Fintech. 3 Credit Hours.
The course covers multiple disciplines of technology and how they are individually and collectively applied in financial systems, transactions, payments, and data lifecycles. The course aims to develop a student’s understanding of key technological components such as cloud computing, Internet of Things(IoT), Big Data and Machine Learning, Artificial Intelligence, Blockchain technologies, data security, privacy and technology regulations as they relate to financial transactions, financial institutions, public and private business entities, governments, regulations and an overall monetary system.
Requisite: Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
**BTE 423. Database Management Systems. 3 Credit Hours.**
This course covers the foundations of database management systems (DBMS). Topics include: database systems design, SQL, the relational model, entity-relationship modeling, distributed DBMS, object DBMS, web technology and DBMS, semi-structured data, XML, business intelligence, data warehousing, data warehousing design, introduction to OLAP and a brief overview of data mining. Students will engage in hands-on exercises for the design and implementation of database business applications.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BTE 430. Business Networks. 3 Credit Hours.**
In this course, students will learn the underlying concepts and technologies in the field of business networks with specific focus on their applications in businesses. Topics covered include: network types, networking standards, protocols, and architectures; the characteristics of physical and logical networking components and technologies; the security issues that affect network systems and their implications on business applications; the technical and organizational issues concerning wireless networks; emerging networking technologies and software tools for designing and troubleshooting various aspects of networks.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BTE 450. Introduction to Health Informatics. 3 Credit Hours.**
The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**BTE 465. Web Application Development. 3 Credit Hours.**
This course will explore Internet and mobile application development methodologies. Topics include: HTML 5, CSS3, scripting languages (JavaScript); jQuery, AJAX, web services, Web Servers (IIS and Apache) and relational databases (MySQL/Apache Derby/Java DB)—all the skills and tools needed to create dynamic Web-based and mobile applications. The coverage will be both on the client side and the server side of Web-based applications, and the course will provide instruction on building rich Internet applications that enhance the presentation of online content and give web applications the look and feel of desktop applications. Students in the course will build Web-based, client/server, database-intensive, multi-tier, and mobile business applications.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BTE 496. Directed Studies in Business Technology. 1-3 Credit Hours.**
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BTE 497. Directed Studies in Business Technology. 1-3 Credit Hours.**
Supervised readings, individual research project, or independent investigation of selected STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BTE 498. Special Topics in Business Technology. 3 Credit Hours.**
Special topics in selected non-STEM areas of Business Technology.
Prerequisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 499. Special Topics in Business Technology. 3 Credit Hours.
Special topics in selected STEM areas of Business Technology.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 523. Big Data Development. 3 Credit Hours.
This course covers foundational techniques and tools required for data science and big data analytics. The course delivers a thorough overview of and hands-on experience with Big Data technologies, including: Hadoop, Mapreduce, Association rules, Large scale supervised machine learning, Data streams, Clustering, NoSQL systems (Casadenra, Pig, Hive), and applications, including recommendation systems, Web, and security. Students will also examine current research and publications in Data Science/Big Data Analytics, with emphasis on systems and algorithms for large-scale advanced data analysis.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 524. Mobile Apps Development. 3 Credit Hours.
This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development for mobile environments—with a focus the Android Platform. The course introduces the requirements and methodologies for developing dedicated and client-server applications that target smartphones, tablet computers, and other mobile devices. Topics include: memory management, communications, power systems, APIs, and among others. The techniques studied are applicable to and can be transitioned to the iOS or Windows 8 platforms.
Prerequisite: BTE 320 and BTE 324.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 535. Information Security. 3 Credit Hours.
This course introduces the principles of computer security. Information is an important strategic and operational corporate asset that needs to be protected from data breaches. This course investigates some of the security measures that can be employed to safeguard information and explores some of the tools and techniques used in designing these measures. Students will examine how system designs, network protocols, and software engineering practices can result in vulnerabilities. They will also explore how to detect and mitigate vulnerabilities in existing systems and, so, how to design and implement better future systems. Additional topics include ethical hacking, social engineering strategies, and other approaches to managing vulnerabilities.
Prerequisite: BTE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 550. Business Technology Internship. 1-3 Credit Hours.
Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BTE 555. Business Technology Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Business Technology.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BTE 565. Mobile to Cloud: Developing Distributed Applications. 3 Credit Hours.
This course introduces students to the basics of the emerging cloud computing paradigm. It also examines how to implement different algorithms for different applications in the cloud and how to deploy mobile applications in the cloud. The course covers the principles, systems, and applications of mobile cloud computing that integrates smart phones and tablets with virtualized distributed computing infrastructure. Students will learn the fundamentals of a variety of systems such as virtual machines, the principles and practices of client/server architectures, the concepts and practices of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services(AWS), as well as security issues.
Prerequisite: BTE 320 and BTE 324.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 571. AI Programming for Business Management. 3 Credit Hours.
Overview of AI programming languages and technologies. Topics include: Functional Programming, Logical Programming, Software methodologies for development of AI systems and software.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 601. Programming for Distributed Systems. 2 Credit Hours.
This course covers the fundamentals of programming logic and structured programming principles including problem solving, algorithm design, and program development using Python. The course introduces the student to object-oriented programming through a study of the concepts of program specification and design, algorithm development, and coding and testing using a modern software development environment. Students learn how to write programs in an object-oriented high-level programming language Python. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, strings, and data structures. Throughout the semester, problem solving skills will be stressed and applied to solving computing problems. Weekly assignments will provide hands-on experience in topics covered in this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 608. Technology and Innovation. 1 Credit Hour.
The focus of this course is two-fold. First, it deals with some of the digital innovations shaping our businesses. We look into some of the core technologies such as blockchain and machine learning. We examine closely the way by which such technologies become the basis for innovation processes with the potential to change companies and even industries. In doing this, platforms and platform architectures are covered. Second, the course covers the strategic management of technology innovation. It deals with the industry dynamics of technological innovation as it is expressed in terms of standards battles, modularity, and platform competition. It furthermore deals with how to formulate and implement technological innovation strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 609. Artificial Intelligence for Business. 1 Credit Hour.
The unprecedented improvement in the performance-price ratio of computer processing technology and data storage and management, as well as the use of more advanced algorithms, has moved machine learning from IBM’s Pughkeepsie Laboratory in the 1950s to the heart of today’s most successful platform businesses. Examples such as GE Healthcare’s Edison, Skype’s recommendation engine, and IBM Watson witness of new interesting applications of artificial intelligence, promising to shape our future businesses. We are indeed increasingly recognizing how this potential is turning into a new business reality. The pervasive use of artificial intelligence as reflected in, for instance, self-driving cars, robotic technology, and language technology is impressive in itself. It promises to challenge what we know about transportation, service work, intellectual activity, and so on. In this regard, digital technology is no longer merely a way of more efficiently supporting business processes, but also something that will strategically shape the core of what companies do. At the same time, for the individual firm, turning the promise of artificial intelligence into successful business application can be challenging. The firm needs to develop its AI capability and use that capability to improve its products and services. This course deals with the factors that facilitate business use of artificial intelligence including AI capability, data management, user-centered design, and platform governance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 610. Digital Transformation. 2 Credit Hours.
Course is designed to give prospective managers and line employees an understanding of how technology can be used to transform business and how organizational change occurs in that context. Topics include technology platforms and solutions, design thinking, technology-business models, technology leadership issues, managing technology change, and innovation through technology.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 612. Enterprise Technologies. 2 Credit Hours.
Course addresses the needs of business students who wish to expand their understanding of information technology fundamentals. Focusing upon their use in today’s enterprises, the course aims to provide students with knowledge of a variety of technological concepts commonly used in the IT Organization’s systems development initiatives and enables students to understand the implications of deploying such technologies within the enterprise.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 613. Business Intelligence Technologies. 2 Credit Hours.
Course facilitates business decision makers in their understanding of data analysis tools that operate over data warehouses and 'data marts' more commonly referred to as Business Intelligence. Course focuses upon using technologies to drive effective data driven decision making through effective mining of corporate data warehouses, thus improving operational efficiency and ultimately increasing profitability. Students are exposed to the concepts, analysis techniques, data cubes, and manipulation of information extracted from a data warehouse that enables the formulation and execution of business strategies. Data analysis case studies are used to reinforce students' understanding and strategic use of results to accomplish business objectives.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 617. Information Technology Project Management. 2 Credit Hours.
Course covers the identification and development of information technology plans for projects supporting the organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. Course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on a wide variety of IT enterprise projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 620. Database Development for High Performance Computing. 2 Credit Hours.
Course enables software developers to understand the fundamental database concepts, practice, and emerging trends in relational database design and implementation for high performance computing. Formal query languages are covered including SQL, No SQL and relational object-orientated databases are examined. Other topics include database performance tuning and query optimization, distributed database systems, administration and security.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 621. Management of Digital Transformation. 3 Credit Hours.
Course is designed to give prospective senior managers an understanding of how technology can be used to transform business. Topics include technology platforms and solutions, design thinking, technology-business models, technology leadership issues, managing technology change, and innovation through technology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 622. High Performance Computing. 2 Credit Hours.
The course is designed to introduce HPC and Big Data Compute environments. Topics include: Cloud concepts, container concepts, distributed file systems, dockers, fundamentals of the ETL process, introduction to the Hadoop environment, Pig, Hive and JAQL, BigSQL, and SQL.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 623. Database Management Systems. 3 Credit Hours.
Course covers the fundamental concepts of database management systems using the Oracle DBMS. Topics include database theory and terminology, logical modeling, normalization, SQL language, database design and implementation, database administration, data security, database transaction/concurrency, and data backup.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BTE 624. Mobile Apps Development. 3 Credit Hours.
The course covers the programming languages associated with the iPhone application. Topics include the development platform, the libraries used, memory management, communication and power systems, APIs and tools associated with application development for the mobile environment.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BTE 630. Fundamentals of Local and Wide Area Networks. 3 Credit Hours.
Course provides the graduate student the necessary knowledge to understand the design, integration, technologies, and services of local and wide area networks (LANs and WANs) in the business environment. Topics include signal transmission and propagation, standards and protocols, data communications media and devices, layered/encapsulated communications based on the hybrid TCP/IP-OSI standards, small and large-site PC LANs, Frame Relay, ATM, Virtual Private Networking (VPN), Telephony, Internet technologies, and network security.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 631. Computer and Network Security. 3 Credit Hours.
Protection of computers and networks against unauthorized access, access control, encryption, firewalls, proxy, digital certificates, and software security are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 635. Comp Communication Security. 3 Credit Hours.
The course covers technical and managerial aspects associated with the deployment of mobile communication platforms such as phones and tablets. The course investigates and introduces some of the security measures that can be employed to safeguard these devices and explores some of the tools used in designing these measures. Topics includes: Ethical Hacking, social engineering strategies, and other approaches to managing these vulnerabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 640. Data Communications and Networking. 3 Credit Hours.
Course addresses advanced topics in computer networks from the perspective of a business decision-maker. The course begins with a focus on signal propagation, media characteristics, and digital and analog encoding techniques. It continues with a study of datalink, network, and transport layer functions as defined by the OSI and TCP/IP models. The architecture of the Internet is explored and routing algorithms for wired, wireless, and peer-to-peer networks are introduced. Course concludes with a high-level overview of the top OSI layers. After taking the class the students should be able to critically evaluate network solutions based on the capabilities and limitations of the equipment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 646. IT Planning and Project Management. 3 Credit Hours.
Course covers the development of information technology strategic and tactical plans for projects supporting the organization’s business objectives and project management as applied to planning, implementing, controlling networking, information systems and e-commerce projects. Course is intended to provide a body of knowledge necessary for a new Consultant or Project Manager to successfully initiate, plan, manage, control, and report on a variety of project types. People skills required in the areas of team selection, structure, conflict resolution, and leadership is also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 650. Introduction to Health Informatics. 3 Credit Hours.
The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BTE 665. Applied Software Project Development. 3 Credit Hours.
Advanced concepts and techniques in application project development. Topics include project management, program testing, documentation, application installation, and application maintenance. Students will work on a group project to sharpen their implementation skills. Prerequisite: CIS 223 or 226 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BTE 680. Topics in Business Technology. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BTE 682. Topics in Business Technology. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 684. Topics in Business Technology. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 685. Topics in Business Technology. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 686. Topics in Business Technology. 3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 687. Topics in Business Technology. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 690. Directed Study in Business Technology. 1-3 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 691. Directed Study in Business Technology. 1-3 Credit Hours.
Investigation and research in special areas of interest. Offered by special arrangement.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BTE 699. Directed Study in Business Technology. 1-3 Credit Hours.
Offered by special arrangement.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
Cancer Biology (CAB)

CAB 701. CAB Student Seminar. 1 Credit Hour.
This course (required of 2nd and 3rd year students) offers instruction on the fundamental elements of scientific speaking. The ability to communicate effectively is essential for scientists. All CAB students are required to present their research each year as a 25 min (2nd year students) or 55 min seminar (3rd year and above). Students who are 4th year+ give seminars but are not enrolled.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAB 705. Translational to Clinical Research. 0-1 Credit Hours.
Beginning in the fall of their second year, students participate in "Translational to Clinical Research", which spans years two through four of the program. Students are introduced to clinical trials, pathology reviews, tumor boards, the protocol review process and have an opportunity to interact with physicians who care for cancer patients and conduct clinical trials. The student's Physician Mentor advises and directs the student in the most relevant activities to attend and discusses the student's experience with them every semester. Students are required to attend 2 meetings each semester for a total of 12 meetings in addition to discussion with their Physician Mentors. A short written report of each review meeting of the student's experience is required. Didactic seminars are not accepted.

Components: DIS.
Grading: SUS.
Typically Offered: Fall.

CAB 710. Cancer Biochemistry and Molecular Biology. 3 Credit Hours.
This is an entry-level lecture course designed to introduce students to the major concepts and principles of cell growth deregulation in cancer with a major emphasis on molecular mechanisms. Topics include: oncogenes, tumor suppressors, mechanisms of uncontrolled cell growth, receptors and intracellular signal transduction pathways.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAB 712. Special Topics in Cancer Research - Viral Oncology and Tumor Immunology Module. 2 Credit Hours.
This module emphasized state of the art knowledge of each discipline, student participation in a problem based learning context. Topics include viral carcinogenesis and epidemiology, Hepatitis, Herpes, Epstein Barr and Human Papilloma Viruses, Kaposi's Sarcoma, viral induced lymphomas, viral oncolysis, and mechanisms of anti-tumor immunity.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAB 713. Special Topics in Cancer Research - Molecular Cancer Therapeutics Module. 2 Credit Hours.
This module explores the signal transduction pathways critical for cancer cell proliferation and survival that may provide new therapeutic targets, approaches for identification and validation of molecular targets within these pathways. Students are introduced to the strategies used in the discovery and design of biological and drug based therapies, and the implementation of clinical trials.

Components: LEC.
Grading: SUS.
Typically Offered: Spring.

CAB 714. Integrated Cancer Epidemiology and Prevention and Biobehavioral Oncology. 2 Credit Hours.
2 credits, Spring I (7-week module) (Offered alternate years 2018, 2020, 2022) Tuesday/Thursday 3:30 – 5:00 p.m. The overall philosophy of this module is to introduce students to the basic principles of biobehavioral oncology and integrated cancer epidemiology and cancer prevention. The course will explore cancer epidemiology approaches used to identify the molecular and genetic mechanisms of cancer risk and progression and how these are used to develop predictive models in treatment response. It is necessary to integrate modern and rapidly evolving multi-omic technologies to study, develop predictive models of disease etiology, treatment and prevention. Lectures will take into context, feasibility, quality control and practical limitations of integration of data types. Methods for identifying social, environmental, and biological reasons for cancer disparities among different populations will also be covered. Sections on biobehavioral oncology include: health behavior change processes in persons at risk for and diagnosed with cancer; methods to improve adaptation to cancer diagnosis and treatment, psychosocial intervention research techniques and bio-behavioral processes explaining their effects on health and quality of life (QOL), translation of behavioral and psychosocial intervention to the community, symptom/treatment side effects management approaches, predictors of late effects of cancer treatment and development of preventative interventions.

Components: LEC.
Grading: SUS.
Typically Offered: Spring.
CAB 715. Special Topics in Cancer Research - Breast and Genitourinary Cancers Module. 2 Credit Hours.
This module highlights key aspects of the cellular and molecular mechanisms of breast, prostate, renal and bladder cancers as well as providing an overview of cancer detection, diagnosis, and therapy. Emerging research opportunities are identified. Topics include estrogen receptor and androgen receptor signaling, cancer progression, endocrine therapies and resistance. Key signaling pathways and the biology of metastasis will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAB 716. Special Topics in Cancer Research: Design and Management of Cancer Clinical Trials. 1 Credit Hour.
Modeled after the AACR-ASCO Methods in Clinical Cancer Research Workshop, this course includes 20 hours of lectures and discussion over five weeks. Participants complete homework assignments leading to the development of a clinical trial protocol ready for IRB submission by the end of the series. Lectures teach basic research concepts and principles that underlie the design and actual day-to-day conduct of clinical trials, using examples primarily from cancer clinical trials.
Components: DIS.
Grading: SUS.
Typically Offered: Fall.

CAB 720. Dialogues with Cancer Clinicians (PIBS Module). 1 Credit Hour.
This module features physician mentors of the Cancer Biology Graduate Program who will discuss clinical aspects of cancer treatment with an emphasis on continuity of care of newly diagnosed patients between disciplines and will articulate unmet clinical needs and research. Mentors will provide clinical perspectives on their areas of specialization as it relates to patient care including diagnosis, staging, therapy, and outcomes.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAB 731. Special Work. 1-3 Credit Hours.
Independent, faculty assigned study.
Components: IND.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAB 750. Logic and Reasoning in Translational Cancer Research: Bench to Bedside Part 1. 3 Credit Hours.
An important facet of the Cancer Biology Ph.D. Program is the training of students in the interrelationships between basic research and clinical medicine, i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course is designed to help students integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. Students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis, and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic are emphasized. Students also learn the key role of clinical observation in identifying basic research problems.
Components: LEC.
Grading: SUS.
Typically Offered: Spring.

CAB 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her Master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAB 820. Master's Research in Residence. 1 Credit Hour.
Students must be registered in the semester they plan to defend. Used to establish research in residence for the Master's degree, after the student has been enrolled for the permissible cumulative total in appropriate Master's research. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAB 830. Dissertation Research - Pre Candidacy. 2 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credits as determined by the Office of Graduate Studies but not less than a total of 24. Not more than six in the summer. If a student has a) passed qualifying exam(s) and b) is engaged in an assistantship, he/she may still take the maximum allowable credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
CAB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required for all Ph.D. candidates. Grade will remain IP until student dissertation is accepted by Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAB 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit is not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Chemistry (CHM)

CHM 101. Chemistry and Society. 3 Credit Hours.
The basic principles of chemistry for the non-science major with an emphasis on understanding the chemistry of the world around us, especially as it pertains to the choices we make as consumers and as a society. Integrated themes include energy, the environment, food and nutrition, health and personal care, and other contemporary societal issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 103. Chemistry for the Health Sciences I. 3 Credit Hours.
Essentials of chemistry as they apply to biological systems
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 104. Chemistry for the Health Sciences II. 3 Credit Hours.
A continuation of CHM 103, with emphasis on organic and biological chemistry, including biochemical processes and metabolism. Lecture, 3 hours. Prerequisite: CHM 103 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 105. Chemistry for the Health Sciences I (Laboratory). 1 Credit Hour.
Designed for those students in CHM 103 requiring a laboratory course. Laboratory, 3 hours. Pre/Corequisite: CHM 103 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

CHM 106. Chemistry for the Health Sciences II (Laboratory). 1 Credit Hour.
Designed for those students in CHM 104 requiring a laboratory course. Laboratory, 3 hours. Pre/Corequisite: CHM 104 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CHM 110. Chemical Problem Solving. 3 Credit Hours.
Chemical problem solving strategies to prepare students for more advanced studies in the sciences. Focusing on basic concepts in chemistry, chemical problem solving, and mathematical preparation for future studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 111. Principles of Chemistry I. 3 Credit Hours.
Fundamental principles of chemical science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CHM 112. Principles of Chemistry II. 3 Credit Hours.
Continuation of CHM 111. Lecture, 3 hours.
Prerequisite: CHM 111 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 113. Chemistry Laboratory I. 1 Credit Hour.
Basic laboratory techniques in chemistry.
Corequisite: CHM 121 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 114. Chemistry Laboratory II. 1 Credit Hour.
Continuation of CHM 113. Intermediate laboratory techniques and quantitative analysis. To accompany CHM 112. Laboratory, 3 hours.
Corequisite: CHM 112 Or CHM 221 And with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 121. Principles of Chemistry. 4 Credit Hours.
Fundamental principles of chemical science for studies in the discipline.
Pre or Corequisite: MTH 140 or higher Or Prerequisite: CHM 110 with a grade of C- or higher Or Prerequisite: SAT Math Score >/= 730 Or ACT Math Score >/= 31 Or AP Calc AB score = 4 Or AP Calc BC score = 3 Or ALEKS score >/= 76.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 151. Chemistry for Engineers. 3 Credit Hours.
Fundamental principles of chemistry for engineering students. Not recommended for students that plan to enter Medical School. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 153. Chemistry Laboratory for Engineers. 1 Credit Hour.
An introductory laboratory course to accompany CHM 151. The techniques of chemistry for engineering students.
Pre/Corequisite: CHM 151 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 201. Organic Chemistry I (Lecture). 3-4 Credit Hours.
The chemistry of carbon compounds. Required of chemistry majors, and premedical students; recommended for majors in life sciences. Lecture, 3 hours.
Prerequisite: CHM 112 Or CHM 221 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 202. Organic Chemistry II (Lecture). 3 Credit Hours.
Continuation of CHM 201. Lecture, 3 hours.
Prerequisite: CHM 201 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 205. Chemical Dynamics Laboratory. 1 Credit Hour.
Introduction to techniques of chemistry.
Corequisite: CHM 221 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CHM 206. Organic Reactions and Synthesis Laboratory. 1-2 Credit Hours.
Continuation of CHM 205
Prerequisite: CHM 205. And Corequisite: CHM 202 or CHM 222. And with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 207. Chemical Dynamics and Organic Synthesis Laboratory. 2 Credit Hours.
Introduction to techniques in Chemistry. For students in the HHMI program only.
Prerequisite: CHM 205 And Corequisite: CHM 222.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

CHM 214. Quantitative Analytical Chemistry. 3 Credit Hours.
An introduction to quantitative chemical analysis. Topics will include statistical analysis of analytical data, a review of stoichiometry, analytical separation processes, chemical and acid-base equilibria, and an introduction to potentiometric, titrimetric, gravimetric, and spectrophotometric methods of analysis.
Prerequisite: CHM 202 with a grade of C- or higher. And MTH 162. or MTH 172.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 221. Introduction to Structure and Dynamics. 4 Credit Hours.
The chemistry of carbon compounds.
Prerequisite: CHM 112 or CHM 121 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 222. Organic Reactions and Synthesis. 4 Credit Hours.
Continuation of CHM 221.
Prerequisite: CHM 201 or 221 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 304. Structural Identification of Organic Compounds. 3 Credit Hours.
The fundamental principles of ultraviolet/visible, infrared, nuclear magnetic resonance and mass spectrometry. How the combination of these sophisticated analytical techniques can be used to elucidate the structures of organic compounds.
Prerequisite: CHM 202 and CHM 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 316. Instrumental Analytical Chemistry. 3 Credit Hours.
Modern methods of quantitative analysis. Lecture, 3 hours.
Prerequisite: CHM 360 and CHM 214 Or CHM 360 and CHM 304. And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 317. The Chemistry of Food and Taste. 3 Credit Hours.
The chemical compositions of the raw materials and end products, and a survey of the changes that these undergo when exposed to human manipulations.
Prerequisite: CHM 202 or CHM 222.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CHM 320. Instrumental Methods in Chemistry and Biochemistry. 2 Credit Hours.
Instrumental methods in modern chemistry and biochemistry, including spectrometric, electrochemical, and chromatographic (separation) Laboratory, 8 hours. Satisfies writing requirement.
Prerequisite: CHM 214 or CHM 304 And Corequisite: CHM 316. And with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CHM 331. Physical Chemistry for Premedical Students. 3 Credit Hours.
Fundamentals of thermodynamics as applied to gases, liquids and solutions; chemical kinetics and other selected topics. Lecture, 3 hours.
Prerequisite: CHM 112 with a grade of C- or higher And MTH 161 And PHY 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 360. Physical Chemistry I (Lecture). 3 Credit Hours.
Introduction to physical chemistry including thermodynamics, gaseous and liquid states, solutions, homogeneous and heterogeneous equilibrium. Lecture, 3 hours.
Prerequisite: CHM 112 with a grade of C- or higher And MTH 162 or MTH 172. Requisite: One Semester of Physics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 364. Physical Chemistry (Laboratory I). 1 Credit Hour.
Representative experiments in physical chemistry. Laboratory, 4 hours.
Pre/Corequisite: CHM 360 or CHM 331 And with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 365. Physical Chemistry II (Lecture). 3 Credit Hours.
Chemical kinetics, introductory quantum chemistry, molecular spectroscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 381. Workshop Leaders in Chemistry I. 1 Credit Hour.
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 382. Workshop Leaders in Chemistry II. 1 Credit Hour.
Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 391. Chemistry Internship for Credit. 1-3 Credit Hours.
Provides chemistry majors with an opportunity to apply skills learned in coursework within settings outside the university. For example students can work in local schools, assisting instructors and mentoring students. They can also work in companies or government agencies for a defined period of time with clearly delineated goals to expand their expertise and practical knowledge of chemistry. Each enrolled student will be closely mentored by a faculty member.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 401. Environmental Chemistry. 3 Credit Hours.
Major environmental features of the earth; Role of natural and synthetic chemicals in the environment; Atmospheric and aquatic pollution; Application of acid-base theory and oxidation reduction to environmental problems.
Prerequisite: CHM 201 or CHM 222. And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CHM 441. Inorganic Chemistry (Lecture). 3 Credit Hours.
The relation of atomic and molecular structure to chemical and physical properties; introduction to nonaqueous solvents, coordination compounds, solid state chemistry and nuclear reactions. Lecture, 3 hours. Prerequisite: CHM 365.
Prerequisite: CHM 365 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 442. Inorganic Chemistry (Laboratory). 1 Credit Hour.
Synthesis of inorganic compounds and determination of their physical and chemical properties. CHM 541 is a co-requisite for ACS chemistry majors. Laboratory, 3 hours.
Prerequisite: CHM 365 and CHM 541 And with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CHM 464. Physical Chemistry (Laboratory II). 1 Credit Hour.
Continuation of CHM 364. Laboratory, 4 hours.
Prerequisite: CHM 365 with a grade of C- or higher.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

CHM 488. Undergraduate Research. 1-3 Credit Hours.
Laboratory research under the direction of a member of the chemistry faculty. Thesis optional. Course may be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 490. Honors Research. 1-3 Credit Hours.
Laboratory research under the direction of a member of the Chemistry faculty. Thesis required. Course may be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 515. Makings of a Scientist. 3 Credit Hours.
By analyzing achievements and advise of few successful scientists, chemists in particular will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to be successful researchers in science, particularly in chemistry.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 520. Physical Organic Chemistry. 3 Credit Hours.
Aspects of chemical bonding, acids and bases, steeocochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.
Prerequisite: CHM 202 and CHM 360 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 522. Synthetic Organic Chemistry. 3 Credit Hours.
Functional group transformations, Synthon approach. Retro-synthetic analyses, multistep syntheses.
Prerequisite: CHM 202 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CHM 524. Supramolecular Chemistry. 3 Credit Hours.
Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophillic interactions as well as proximity effects in the
design of synthetic enzyme mimics, cationic transport species, etc.
Prerequisite: CHM 365 and CHM 520 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 525. Structural Organic Chemistry. 3 Credit Hours.
Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electropsray mass
spectrometry. Assignment of absolute configuration of chiral centers.
Prerequisite: CHM 202 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 526. CHM523 Medicinal Chemistry. 3 Credit Hours.
Medicinal chemistry is primarily concerned with the development of drug molecules, and the interpretation of their mode of action at the molecular
level, with an emphasis on chemical synthesis.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 530. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.
The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence
spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and
medicine.
Prerequisite: CHM 304 and CHM 360 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 535. Molecular and Supramolecular Photochemistry. 3 Credit Hours.
Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be
given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.
Prerequisite: CHM 201 and CHM 202 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 541. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.
Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic
compounds.
Prerequisite: CHM 365 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 553. Modern Quantum Chemistry. 3 Credit Hours.
Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body
perturbation theory.
Prerequisite: CHM 365 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 565. Principles of Spectroscopic Techniques. 3 Credit Hours.
Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other
specialized spectroscopic techniques.
Prerequisite: CHM 365 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CHM 575. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.
Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time-domain versus frequency domain spectrosopies, and principles of multidimensional spectroscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 581. Advanced Analytical Chemistry. 3 Credit Hours.
Provides a strong foundation in the most important concepts in advanced analytical chemistry, including electrochemistry, chemical separations, and bioanalytical chemistry, and in the different classes of instrumental analytical techniques available to current chemists.
Prerequisite: CHM 214 and CHM 316 And with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 591. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 592. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 593. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 594. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 615. Makings of a Scientist. 3 Credit Hours.
By analyzing achievements and advise of few successful scientists, chemists in particular, will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to become successful researchers in science, particularly in chemistry.
Prerequisite: CHM 202 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 620. Physical Organic Chemistry. 3 Credit Hours.
Aspects of chemical bonding, acids and bases, steeoochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 622. Synthetic Organic Chemistry. 3 Credit Hours.
Functional group transformations, Synthon approach. Retro-synthetic analyses, multistep syntheses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CHM 624. Supramolecular Chemistry. 3 Credit Hours.
Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 625. Structural Organic Chemistry. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 626. Structural Organic Chemistry. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 630. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.
The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 635. Molecular and Supramolecular Photochemistry. 3 Credit Hours.
Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 641. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.
Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 653. Modern Quantum Chemistry. 3 Credit Hours.
Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 655. Electrochemistry. 3 Credit Hours.
Modern electrochemical techniques including voltammetry, chronocoulometry, rotating disk electrode, and ultramicroelectrodes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 665. Principles of Spectroscopic Techniques. 3 Credit Hours.
Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CHM 675. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.
Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time-domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 681. Advanced Analytical Chemistry. 3 Credit Hours.
Provides a strong foundation in the most important concepts in advanced analytical chemistry, including electrochemistry, chemical separations, and bioanalytical chemistry, and in the different classes of instrumental analytical techniques available to current chemists.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 691. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 692. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 693. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 694. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 779. Chemistry Seminar. 1 Credit Hour.
Participation in the departmental seminar program. Required each semester the student is in residence and not enrolled in CHM 680 (excluding summer sessions).
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 780. Chemistry Seminar. 1 Credit Hour.
Participation in the chemistry department seminar program, including an oral presentation of special topics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 785. Introduction to Research. 2 Credit Hours.
Research principles and practices, independent study in selected subject areas, and/or oral presentation of a proposed research topic. Open only to graduate students working toward the M.S. or Ph.D. in chemistry.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 788. Problems in Research Planning. 2 Credit Hours.
Formulation of a research program for investigating an original problem not related to the candidate's major laboratory research. A brief written summary and an oral defense of the plan will be required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CHM 805. Research Practices. 1-3 Credit Hours.
Research experiences in special techniques. For students electing the non-thesis M.S. option. May be repeated for a total not to exceed six credits.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in CHM 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 840. Post-candidacy Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 880. Doctoral Dissertation Seminar. 1 Credit Hour.
Required of all candidates for the Ph.D. degree when defending their doctoral dissertation during their final term. A written dissertation and an oral defense of the Ph.D. dissertation will be required.
Prerequisite: CHM 830 and CHM 840.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Chinese (CHI)

CHI 101. Elementary Chinese (Mandarin). 3 Credit Hours.
Conversation, grammar, reading, elementary composition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHI 102. Elementary Chinese (Mandarin). 3 Credit Hours.
Continuation of CHI 101, conversation, grammar, reading, elementary composition.
Prerequisite: CHI 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CHI 195. Transfer Credit. 1-3 Credit Hours.
Awarded for 100-level course work at another institution for which UM has no direct equivalent.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

CHI 201. Intermediate Chinese I. 3 Credit Hours.
Expanding further on language skills (grammar, composition and reading) while introducing students to aspects of Chinese customs, history and culture. Closed to native speakers.
Prerequisite: CHI 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHI 202. Intermediate Chinese II. 3 Credit Hours.
Continuation of CHI 201. Further development of reading, writing, speaking and listening skills in Mandarin Chinese. CLOSED TO NATIVE SPEAKERS.
Prerequisite: CHI 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHI 203. Advanced Chinese. 3 Credit Hours.
This course is designed to develop students’ ability to use Chinese in a more advanced way. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.
Prerequisite: CHI 202.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHI 204. Advanced Chinese II. 3 Credit Hours.
The course aims to develop students’ ability to use Chinese in a more advanced way by continuing Chinese 203’s emphasis on accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.
Prerequisite: CHI 203.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 210. Experiencing Chinese Culture through Art and Design. 3 Credit Hours.
A broad exposure on both traditional and modern Chinese arts, crafts, designs, architectures, and other cultural elements. Through discussions, hands on art projects, and cultural excursions, students will examine how traditional and contemporary Chinese values and beliefs are expressed in Chinese arts, crafts, designs, and architecture. An opportunity to truly immerse in Chinese culture. Students will visit historical and cultural sites. Local Chinese artists and scholars will co-teach certain sessions. Students will be guided to conduct cultural interviews and presentations to develop their own understanding on Chinese values and perspectives. This course takes place in Beijing during summer term. And it will be taught primarily in English.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CHI 295. Transfer Credit. 1-3 Credit Hours.
Awarded for 200-level course work at another institution for which UM has no direct equivalent.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

CHI 301. Advanced Reading and Diction Chinese. 3 Credit Hours.
Use of Chinese in a more advanced way to achieve greater fluency in a variety of written and spoken genres. Course materials incorporate authentic Chinese materials in genres including formal speech, short story, debate, op-ed essay, and newspaper. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures, in particular, formal speech and written language. In addition to improving their language abilities, course materials are also geared towards deepening students understanding of many different areas of Chinese culture.
Prerequisite: CHI 204.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CHI 310. Topics in Chinese Literature and Culture in Translation. 3 Credit Hours.
Specific topics within the literature and cultures of the Chinese-speaking world, including literary, cinematic, and artistic representations of central themes or issues, and the cultural production of particular historical periods or national or immigrant groups. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHI 311. Comparative Literature in East Asia. 3 Credit Hours.
An introduction to the East Asian literary tradition (in China, Japan, and Korea) while introducing the methods of and issues surrounding comparative literary study. The course is structured thematically, according to particular motifs and themes that become central in Chinese, Japanese, and Korean literature. Themes to be studied include the non-human bride; romantic ideals and the romance narrative; the otherworldly journey; the dream; and the modern nation. It also seeks to challenge pre-conceived notions about East Asian literature and culture to instill a nuanced understanding of East Asian literary traditions.
Prerequisite: ENG 106.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHI 312. The Esoteric and the Mundane in the Chinese Literary Tradition. 3 Credit Hours.
A variety of important genres and themes in the Chinese literary tradition through the close reading of texts spanning three millennia. Particular attention is paid to notions of humanity, divinity, and monstrosity. The course is taught in English.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHI 315. The Powerful Women of Medieval China in History, Fiction, and Modern Media. 3 Credit Hours.
An interdisciplinary examination of the portrayals of ruling-class women who lived during the medieval period in China and who have become a part of the Chinese literary-historical tradition. Works to be examined include short stories, novels, plays, films, and television. This course is taught in English.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHI 322. Cultural Topics. 3 Credit Hours.
A variety of important genres, issues, and themes related to Chinese culture through the close reading and analysis of texts. Topics may include film, religion, gender, epistemology, visual arts, immigration, travels, the preternatural. Note: Students will complete all readings and written assignments in Chinese. Course is open only to students with native or native-level fluency in Chinese.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHI 394. Chinese Internship. 1-3 Credit Hours.
The internship is an opportunity to apply analytical, interpretative, and creative skills developed in coursework. Internships ordinarily take place outside the University and they involve UM faculty supervision, as well as supervised on-site experience in an Chinese-speaking cultural, business, or not-for-profit organization. Students need to fill out the Internship Application Form. Normally 27 internship hours are required per credit earned. A maximum of three semester hours of internship credit may be counted toward the student’s degree program. Permission of MLL faculty member is required (the host will apply documentary evidence of the hours worked).
Prerequisite: CHI 204.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 395. Transfer Credit. 1-3 Credit Hours.
Awarded for 300-level course work at another institution for which UM has no direct equivalent.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

CHI 495. Transfer Credit. 1-3 Credit Hours.
Awarded for 400-level course work at another institution for which UM has no direct equivalent.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.
CHI 591. Directed Readings. 1-3 Credit Hours.
Provides Directed Readings in Chinese.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHI 641. Elementary CHI I for Graduate Students. 0 Credit Hours.
Designed to develop graduate students' communicative abilities in speaking, reading, writing, and comprehending Chinese, as well as to provide an introduction to Chinese Studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 642. Elementary CHI II for Graduate Students. 0 Credit Hours.
Continuation of CHI 641. Designed to develop graduate students' communicative abilities in speaking, reading, writing, comprehending Chinese, and continued engagement in Chinese Studies.
Prerequisite: CHI 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 651. Intermediate CHI I for Graduate Research. 0 Credit Hours.
For graduate students with previous study of elementary-level Chinese. Designed to enhance graduate students' communication skills in the Chinese language at the intermediate level. Intended principally for students who will carry out research in Chinese Studies.
Prerequisite: CHI 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 652. Intermediate Chinese II for Graduate Research. 0 Credit Hours.
For student with previous study of Chinese at the intermediate level. Designed to enhance graduate students' communication skills in the Chinese language at the high-intermediate level. Intended principally for students who will carry out research in Chinese Studies.
Prerequisite: CHI 651.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 653. Advanced Chinese I for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in the Chinese language at the advanced-low level. Intended principally for students who will carry out research in Chinese Studies.
Prerequisite: CHI 652.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 654. Advanced Chinese II for Graduate Research. 0 Credit Hours.
Designed to enhance graduate students' communication skills in Chinese language at the advanced-intermediate level. Intended principally for students who will carry out research in Chinese Studies.
Prerequisite: CHI 653.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHI 692. Directed Readings. 1-3 Credit Hours.
Directed Readings at the graduate level.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
Cinematic Arts (CCA)

CCA 103. Survey of Motion Pictures. 3 Credit Hours.
Examination of the aesthetic, social, and economic aspects of the motion picture industry. Concentration on the present state of the medium with particular emphasis on future trends.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 113. Documentary Approaches. 3 Credit Hours.
Students will explore the varied forms and narrative approaches used in contemporary documentary filmmaking to understand the position of the filmmaker as a storyteller.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 126. Introduction to Screenwriting. 3 Credit Hours.
Creation and formatting of narrative material for motion pictures. Emphasis on writing the short film.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 151. Introduction to Digital Filmmaking. 3 Credit Hours.
Lectures and laboratory work to acquaint the student with the basic techniques of motion pictures. Students make short films using digital equipment to develop an understanding of the motion picture as a creative tool of communication and expression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 206. History of International Cinema. 3 Credit Hours.
This course is an examination of the origin and history of the motion picture. Narrative and non-fiction genres, in the American and World Cinemas, from 1890 to the present are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 251. Motion Picture Workshop: Storytelling. 3 Credit Hours.
The practice of the grammar of cinematic language including shot selection, composition, pacing, story clarity, performance, pre-visualization and pre-planning for the creation of short narrative projects. Through critiques, students encounter and interact with an audience of their peers. This course requires students to master contemporary technology in use in the profession.
Prerequisite: CCA 103 and CCA 151.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 294. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 326. Intermediate Screenwriting. 3 Credit Hours.
Study of, and practice in, writing feature length, narrative motion pictures. Development of story line in treatment form, attention to cinematic structure, the development of character, and its presentation on screen is discussed.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 329. Writing for Series Television. 3 Credit Hours.
An introduction to the structures and techniques of writing situation-comedy and dramatic series television.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 351. Intermediate Filmmaking. 3 Credit Hours.
This course is an introduction to intermediate level techniques and methodologies for digital production of all contemporary media genres including narrative, documentary, experimental and music performance. Students will work in crews, collaboratively, with specific assigned roles throughout the production work flow.
Prerequisite: CCA 206 and CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 353. Post Production Sound Editing and Design. 3 Credit Hours.
Post production sound editing and design is a seminar/workshop that provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course explores the process from production recording through the final mix.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 355. Essentials of Documentary Film. 3 Credit Hours.
This course is designed to teach students how to tell compelling cinematic documentary stories with a clear and effective point-of-view. We will compare and analyze various styles of documentary storytelling and use these methods in creating effective documentaries films. An emphasis will be put on the various styles of documentary filmmaking.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 356. Cinematography. 3 Credit Hours.
An overview of the cinematographer's process from script to screen. Working with camera, lighting, and grip equipment on exercises and projects is discussed.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 357. Editing. 3 Credit Hours.
Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 364. Business of Motion Pictures. 3 Credit Hours.
Students will get an overview of how content is created and who the players are. They will practice synthesizing information and translating it into a strategic plan for a business or individual career path in the entertainment industry.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 386. Online Screenwriting. 3 Credit Hours.
This is an online course on screenwriting. Students will learn to analyze films through the lens of genres, including Drama, Comedy, Horror, Romance, Sci-Fi, and Coming of Age, to write scripts, and to critique genre conceits of assigned films.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 394. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CCA 395. Directing Techniques I. 3 Credit Hours.
To teach the craft of directing through exercises, screen work, and readings.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 401. Nonfiction Film and Digital Media. 3 Credit Hours.
An examination of American and world nonfiction films and media.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 402. Global Issues and Filmmaking: An Interdisciplinary Approach. 3 Credit Hours.
A trans-disciplinary approach to study and analyze a variety of complex global issues such as climate change, human security, globalization, and rise of nationalism while gaining hands-on experience to develop short analytical documentary films about such topics. Prior film-making experience is NOT required
Requisite: Permission of Instructor.
Components: HRK.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 403. Film Directors. 3 Credit Hours.
The study of the film authorship through a focus on specific directors.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 404. Aspects of Contemporary Cinema. 3 Credit Hours.
Study of contemporary movements in American and world cinemas.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 405. Representations of Sport in Popular Culture. 3 Credit Hours.
This course presents approaches to understanding and contextualizing representations of sports in cinema, television, and digital media. Students gain valuable skills in critical thinking, analysis, and evaluation as they learn to reflect on the various ways sports are portrayed in selected media and popular culture.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 406. Genres. 3 Credit Hours.
Study of selected genres from a variety of critical perspectives. Issues pertaining to methodologies of defining and categorizing film are discussed.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 407. National Cinemas. 3 Credit Hours.
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social, political and cultural contexts.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CCA 408. Women, Media, and Popular Culture. 3 Credit Hours.
Examination of film, media, and gender representation from the perspective of feminist theory and cultural studies. Students explore the many ways that women have been portrayed, and how they have portrayed themselves, within popular culture.
Requisite: Junior Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 409. Legal Aspects of Motion Pictures. 3 Credit Hours.
The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 426. Advanced Screenwriting. 3 Credit Hours.
A continuation of CIM 326. Study of, and practice in, writing feature length, narrative motion picture scripts. Attention is given to cinematic structure, the development of character, and its presentation on screen. Emphasis is placed on bringing the script to a completed draft.
Prerequisite: CCA 326.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 429. Advanced Television Writing. 3 Credit Hours.
This course explores how to create, format, and write the original Television Pilot and treatment. The class will cover TV pilot format, length, structure as well as techniques in creating TV characters and situations for both comedy and dramatic episodic TV.
Prerequisite: CCA 329.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 451. Advanced Filmmaking Workshop. 3 Credit Hours.
The theory and practice of motion pictures production from script to screen. Lecture and laboratory. Students will develop and produce a narrative, a documentary, or an experimental work of their choice.
Prerequisite: CCA 351.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 455. Science Documentary: Autism. 3 Credit Hours.
This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 456. Advanced Cinematography. 3 Credit Hours.
Advanced work with camera, lighting, and grip equipment on exercises and projects.
Prerequisite: CCA 356.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 457. Advanced Editing. 3 Credit Hours.
Advanced concepts in aesthetics and theories of picture and sound editing, mixing, color correction, and finishing techniques.
Prerequisite: CCA 357.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 458. Documentary Production. 3 Credit Hours.
Students produce two short digital documentaries and explore various approaches to the documentary film.
Prerequisite: CCA 151.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 462. Motion Picture Marketing and Distribution. 3 Credit Hours.
Economic and marketing considerations in the production and distribution of motion pictures.
Prerequisite: CCA 364.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 465. Creative Producing. 3 Credit Hours.
Students will discover what their creative voice is as a producer; sharpen their communication skills (networking, pitching, coverage & notes); and will learn the nuts and bolts of what a producer does.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 469. Motion Picture Internship. 1-3 Credit Hours.
The internship is designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 489. Projects in Screenwriting. 1-3 Credit Hours.
Individual study. This course and CIM 499 cannot count for more than three credits towards a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 494. Special Topics in Cinematic Arts. 3 Credit Hours.
Prescribed study and supervised work with practitioners in motion pictures.
Requisite: Sophomore Status And Cumulative GPA 2.5.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 499. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 501. Principles of Aesthetics and Analysis. 3 Credit Hours.
Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 510. Foundation of Screenwriting. 3 Credit Hours.
This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.
Prerequisite: CCA 126.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 511. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character. Prerequisite: CCA 510.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 514. Motion Picture Studio. 3 Credit Hours.
This course allows students the time to enhance and exhibit their knowledge and skills in Motion Picture. Students will fine-tune their final film projects, polishing their final cuts for film festival submission to film festivals and professional consideration. Motion Picture Major and Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 518. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.
The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 519. Seminar in Documentary Production. 3 Credit Hours.
The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project. Prerequisite: CCA 458 Or JMM 541.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 523. Advanced 3D Character Design and Motion Capture. 3 Credit Hours.
This course covers the 3D game art development pipeline from modeling, texturing, rigging and animation to motion capture, and special effects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 526. Adaptation. 3 Credit Hours.
This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles, comic books, Shakespeare to the screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 529. Nonfiction Film. 3 Credit Hours.
An examination of American and world nonfiction films.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 550. Motion Graphics and Compositing. 3 Credit Hours.
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen. Prerequisite: CCA 206.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 551. Advanced Motion Graphics and Compositing. 3 Credit Hours.
Extend the 2D skills of students who have taken CIM 550 to 3D motion graphics and animation. Emphasis on title design and animation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 553. Advanced Motion Picture Marketing and Distribution. 3 Credit Hours.
Advanced marketing considerations in the distribution of motion pictures.
Prerequisite: CCA 462.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 560. Directing the Actor. 3 Credit Hours.
The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 566. Character and Dialogue. 3 Credit Hours.
An examination of the craft and techniques of creating original characters and dialogue.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 594. Special Topics in Cinematic Arts. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Requisite: Junior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 595. Directing Techniques II. 3 Credit Hours.
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
Prerequisite: CCA 251.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 601. Principles of Aesthetics and Analysis. 3 Credit Hours.
Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 602. Global Issues and Filmmaking. 3 Credit Hours.
A trans-disciplinary approach to study and analyze a variety of complex global Issues such as climate change, human security, globalization, and rise of nationalism while gaining hands-on experience to develop short analytical documentary films about such topics. Prior film-making experience is NOT required.
Components: HRK.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 603. Film Directors. 3 Credit Hours.
This course will address the conditions of authorship in film through an intensive study of the films of two or more directors, whose careers will serve as case studies. These directors will be historically important and their work will represent significant achievements in the art of film.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 604. Aspects of Contemporary Cinema. 3 Credit Hours.
The study of the ways in which film communicates. Intensive analysis and criticism of cinematic techniques exemplified through particular films.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 606. Genres. 3 Credit Hours.
A study of selected movie genres from a variety of critical perspectives. Issues pertaining to selfhood, sexual difference, and other concerns of present-day film criticism will be examined.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 608. National Cinemas. 3 Credit Hours.
Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social/political and cultural contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 609. Legal Aspects of Motion Pictures. 3 Credit Hours.
The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 610. Foundation of Screenwriting. 3 Credit Hours.
This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 611. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 612. Writing for Episodic Television. 3 Credit Hours.
The course will explore the art and craft required to write a "spec" Television episode. The course will explore how TV writing differs from feature writing and how the TV writer/producer business model works. By the end of the course the student will have finished an hour-long "spec" script for an existing TV show or a two-part sitcom teleplay.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 618. Seminar in Documentary Film History: Cinéma-vérité. 3 Credit Hours.
The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 619. Seminar in Documentary Production. 3 Credit Hours.
The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 620. Cinematography. 3 Credit Hours.
This hands-on course provides students with the aesthetic and technical aspects of professional concepts and techniques in film and digital media cinematography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 621. Narrative Production. 3 Credit Hours.
An introduction to film and digital production techniques on narrative projects. Emphasis on collaboration, group process and social purpose. Students will be expected to produce a short film abroad as part of this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CCA 623. Advanced 3D Character Design. 3 Credit Hours.
This course covers the 3D game art development pipeline from modeling, texturing, rigging and animation to motion capture, and special effects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 626. Adaptation. 3 Credit Hours.
This course will examine the craft and techniques of adapting sources such as novels, short stories, plays, articles comic books, and public domain material such as Shakespeare to the screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 629. Nonfiction Film. 3 Credit Hours.
An examination of American and world nonfiction films.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 630. Introduction to Editing. 3 Credit Hours.
Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students’ understanding of aesthetic, and technical considerations in the art of dramatic editing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 651. Motion Graphics and Compositing. 3 Credit Hours.
Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design, and green screen.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 654. Advanced Motion Graphics and Compositing. 3 Credit Hours.
Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.
Prerequisite: CCA 651.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 655. Science Documentary: Autism. 3 Credit Hours.
This course brings together student citizens across science, communication, and education to collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder. In addition to learning the neuroscience and genetics that underlie autism spectrum disorders, students will connect with people in the local community - to lend these issues a face and context. Students will gather information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 658. Documentary Production. 3 Credit Hours.
An introduction to the documentary genre including the production of a documentary from start to finish.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 660. Directing the Actor. 3 Credit Hours.
The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 666. Character and Dialogue. 3 Credit Hours.
An examination of the craft and techniques of creating original characters and dialogue.
Prerequisite: CCA 610.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 670. The Independent Producer. 3 Credit Hours.
Beyond covering the role of the producer, this hands-on class offers students a place to workshop their thesis projects. Students will brand themselves or their company and leave with a packaged project ready to take to market.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 686. Online Screenwriting. 3 Credit Hours.
The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 694. Motion Picture Marketing and Distribution. 3 Credit Hours.
Economic and marketing considerations in the production and distribution of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 695. Advanced Motion Picture Marketing and Distribution. 3 Credit Hours.
Advanced marketing considerations in the distribution of motion pictures.
Prerequisite: CCA 694.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 696. Directing Techniques II. 3 Credit Hours.
To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 697. Topics in Film Analysis. 3 Credit Hours.
Content varies by semester. Topics such as Film Directors, National Cinemas, Silent Film, Contemporary Cinema. Course may be repeated for credit if content varies.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 705. Production Management. 3 Credit Hours.
A comprehensive examination of the skills and techniques employed by line producers and production managers in the preproduction, production, and post-production of motion pictures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 707. Pedagogy and Film. 3 Credit Hours.
This course covers a range of traditions in pedagogy, including history, theory, and practical applications. Intended for those who are currently teaching—or who intend to teach—at the college level, the course provides grounding in foundational approaches as well as a familiarity with recent research advancements in pedagogy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 710. Writing the Feature-Length Screenplay. 3 Credit Hours.
Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character. Classes will generally be conducted as follows: a discussion of screenplay craft, an in-depth analysis of various films from the writer’s POV, and a critique of the various stages of your fellow student screenplays as they evolve throughout the semester.
Prerequisite: CCA 510.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 727. Scriptwriting. 3 Credit Hours.
Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CCA 730. Advanced Editing. 3 Credit Hours.
An examination of the art and techniques of post-production designed for students completing advanced motion picture projects. Lectures, group discussions and screenings. Emphasis on rhythm, dramatic moments, character arcs, symbolic vs. thematic editing, elements of sound editing, sound design, and professional mastering standards. This class is designed to develop editorial skills that will prepare students for professional careers in editing. In-depth examination of effects and sound palettes of the Avid Media Composer, as well as a discussion of how to integrate visual effects from external applications. Finishing and mastering techniques for a variety of mediums as well as a reel building will be covered.
Prerequisite: CCA 630.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 738. Writing the Short Film. 3 Credit Hours.
A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 740. Sound Design. 3 Credit Hours.
Sound Design through seminar and workshop provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course utilizes professional environments to instruct in the basics of sound editing, studio recording and mixing as it is practiced in the film industry. It will also present the aesthetic use of sound and its integral part in the moving image narrative process.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 750. From Script to Screen. 3 Credit Hours.
Advanced production concepts and techniques explored in a variety of media. Students will produce an approved film or script. The class will explore the language of motion picture and how this language is utilized in the story telling process. Knowledge of both the practical and aesthetic aspects of film will be stressed at all times.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CCA 752. Advanced Cinematography. 3 Credit Hours.
Advanced technical and photographic principles begun in CMP 651. Preparation for the filming of the MFA project film.
Prerequisite: CCA 620.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 756. Motion Picture Post-Production Procedures. 3 Credit Hours.
An examination of the esthetics of editing, recording, re-recording, and laboratory procedures following completion of principal photography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CCA 761. Directing the Camera. 3 Credit Hours.
An introduction to directing actors in low budget, independent films utilizing traditional, modern and evolving directorial techniques used by independent and traditional film makers: analyzing and orchestrating scripted material, developing a directorial concept, creating indelible characterizations, building a visual image, auditioning and casting the talent, blocking and directing the untrained amateur or highly skilled professional actor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CCA 794. Motion Picture Internship. 1-3 Credit Hours.
Prescribed study and supervised work with practitioners in motion pictures.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CCA 795. Special Topics in Motion Pictures. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 799. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CCA 815. MFA Thesis. 1-6 Credit Hours.
The focus is on completing the culminating thesis project, in consultation with the student’s selected committee and thesis chair.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Civil, Architectural, and Environmental Engineering (CAE)

CAE 100. Introduction to Civil, Architectural, and Environmental Engineering. 3 Credit Hours.
This introductory course is designed to expose high school students to a variety of specific disciplines within the civil engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on civil engineering, environmental engineering, and architectural engineering. The students will be provided with an understanding and some hands-on experience on topics relative to the disciplines of civil, architectural, and environmental engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design and construction and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with bridge building, material testing, water purification, and building systems.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CAE 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools for problem solving. Computer techniques for data acquisition, analysis and presentation, software design, and computer aided drafting are covered. Development of design skills is achieved through several design and building competitions. Introduction to professional ethics and intellectual property rights, MATLAB, AutoCAD, and programming in C++ is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 112. Introduction to Engineering II. 2 Credit Hours.
Hands-on applications of various surveying instruments for leveling, angles and distance measurements, and other engineering applications. Hands on application of Geographic Information Systems, including ArcView and extensions.
Prerequisite: CAE 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 115. Introduction to Engineering II (Surveying). 1 Credit Hour.
Hands on application of various surveying instruments. Leveling, angles and distance measurements.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 210. Mechanics of Solids I. 3 Credit Hours.
Vectors, force systems, equilibrium, analysis of frames, machines, trusses for internal forces, friction, centroids, moment of inertia, and shear and bending moment diagrams are discussed. This course may be offered in the Flipped Classroom format, which emphasizes discussion-based learning.
Prerequisite: Engineering Program - PHY 221 And MTH 151 Or 161 Or 171. Non-Engineering Program - PHY 101 Or 103 Or 160 Or 201 And MTH 130 Or 141 Or 161 Or 171.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 211. Mechanics of Solids II. 3 Credit Hours.
Fundamental material behavior including stresses, strains, and deformations associated with axial, bearing, flexural, shear, thermal, and torsional loading. Composite beams, elastic buckling of columns, combined loading, Mohr’s Circle, and statically indeterminate analysis of axial members is also included.
Prerequisite: CAE 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 212. Structural Laboratory. 1 Credit Hour.
Laboratory techniques, tests for tension, compression, shear, bending, and torsion are discussed. Models, similitudes, buckling of columns, and review of current research are also included. Laboratory 3 hours.
Pre or Corequisite: CAE 211 and IEN 311.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 213. Behavior of Structural Systems I. 3 Credit Hours.
The course begins with a review of basic structural principles. From this basis, analysis and design of simple axial loaded structural systems and members is covered. Through the use of project based learning the students are introduced to the principles of statics using both graphical and calculated methods. Concurrent and non-concurrent systems are defined and analysis of concurrent systems is covered in this course. Structural systems based on concurrent forces are covered including cable suspension structures, concrete shells, trusses, fan like structures and membrane structures. The requirements of building codes are included in the lectures. The class concludes with discussion of structural materials and failure modes accompanied with a visit to the Civil/Architectural Engineering Laboratory.
Prerequisite: ARC 231.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 240. Environmental Pollution. 3 Credit Hours.
Exploration of contemporary environmental issues. Introduction to engineering approaches for protecting and cleaning up the environment, techniques for assessing the impact of human activity on the environment, strategies for pollution control and implementation of environmental mitigation measures.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 310. Structural Analysis. 3 Credit Hours.
Analysis of statically determinate and indeterminate structures for internal forces, external reactions, displacements, including influence lines.
Prerequisite: CAE 211.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CAE 313. Behavior of Structural Systems II. 3 Credit Hours.
Upon completion the students will understand the application of fundamental methods of structural frame systems and their place in architectural
design. The bending action of beams, including shear and moment diagrams and shear and bending stress calculations are covered. Structural
material design for steel, concrete, wood and masonry are covered as separate topics. They will also understand the integration of basic elements into
structural systems that resist both gravity and lateral loads. The course allows students to develop foundation and framing systems.
Prerequisite: CAE 213.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 320. Concrete Structures. 3 Credit Hours.
Course topics include design of concrete beams, columns, structural systems one-way slabs, and isolated footings by ultimate design methods.
Pre or Corequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 321. Steel Structures. 3 Credit Hours.
Design of tension, compression, flexural members, and beam columns using load and resistance factor design are discussed. Introduction to design
and detailing of welded and bolted connections is also included.
Pre or Corequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 330. Fluid Mechanics. 3 Credit Hours.
Properties of fluids, gas systems, pressure distribution in static fluids, and hydrostatic forces on plane and curved surfaces are discussed. Kinematics
and dynamics of fluid motion, dimensional analysis and similitude, flow in closed conduits, pumps, design of water distribution systems, and an
introduction to flow in open channels is also included.
Prerequisite: CAE 211. And PHY 222.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 340. Introduction to Environmental Engineering. 3 Credit Hours.
Environmental mass and energy balances, introduction to environmental chemistry, air pollution, water pollution, sustainable solid waste management,
risk assessment, and global atmospheric change are discussed.
Prerequisite: MTH 162, and CHM 121 or CHM 151.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 345. Environmental Laboratory and Analysis. 3 Credit Hours.
Laboratory-based course focusing on the analysis of environmental samples including water, wastewater, air, and solids. Basic analytical techniques
and quality control are also included as well as an introduction to advanced analytical measurements.
Prerequisite: CHM 112 And CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 350. Transportation Engineering I. 3 Credit Hours.
Transportation systems and organizations. Characteristics of driver, vehicles and roads. Basic probability and statistics. Traffic studies and data
collection. Signal timing design, basic capacity and analysis. Basic geometric design and route surveying. Highway safety. Sustainable transportation
systems.
Prerequisite: MTH 211 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CAE 361. Building Information Modeling I. 3 Credit Hours.
The course prepares students to utilize AutoCAD and Building Information Modeling (BIM) in a coordinated, integrated and consistent approach for the Architecture, Engineering and Construction (AEC) Industry. The basics of AutoCAD drafting and usage are covered in the first five weeks of the course. The remaining time is dedicated to high-quality 4 dimensional BIM modeling, including 3D modeling of buildings and building components, embedded cost-estimating and scheduling for the construction process. Basics of REVIT Structure and MEP are also covered.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

CAE 370. Geotechnical Engineering I. 3 Credit Hours.
Soil composition and classification, excavation, grading, fill compaction, stress distribution in soils, one-dimensional flow of water through soil, laboratory, and field permeability, effective stress concept, calculation of consolidation, field settlement, bearing capacity, and design and analysis of shallow foundations are discussed.
Prerequisite: CAE 211. And Corequisite: CAE 371.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 371. Geotechnical Laboratory. 1 Credit Hour.
Evaluation of physical and mechanical properties of soils, and preparation of reports. Three hours.
Prerequisite: ENG 107. And IEN 311. And Corequisite: CAE 370.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 380. Electrical and Illumination Systems for Buildings. 3 Credit Hours.
Typical electrical systems for buildings including electrical circuits, protective devices and code requirements. Illumination and lighting design.
Prerequisite: PHY 223.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 381. Building Mechanical Systems I: Hvac Fundamentals. 3 Credit Hours.
Prerequisite: MAE 303 and Corequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 395. Undergraduate Research. 1-3 Credit Hours.
Designed for the undergraduate student who wishes to engage in research. Subject and credit to be arranged with the instructor.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

CAE 399. Internship. 1 Credit Hour.
Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Courses may be repeated.
Components: IND.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 400. Preparation for FE Exam. 1 Credit Hour.
Review of material in preparation for the Fundamentals of Engineering (FE) exam ination. For credit only.
Prerequisite: Senior Status.
Components: LEC.
Grading: CNC.
Typically Offered: Offered by Announcement Only.
CAE 402. Professional Engineering Practice. 3 Credit Hours.
Principles of engineering economics and economic evaluation of engineering projects. A discussion of professional practice issues including the philosophy and methodology of engineering, professional licensure and ethics. Discussion of the business aspects of engineering including business organization, management, contracts and legal issues. Engineering leadership in the formulation of public policy.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 403. Senior Design Project I - Engineering Design. 3 Credit Hours.
A two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporate interdisciplinary design skills, engineering standards and realistic constraints. The faculty coordinator working with practicing design professionals provide consultation, guidance and recommendations on aspects such as problem definition, evaluation of design alternatives and approaches. The course progresses along the customary design sequence of pre-design, schematic design and design development phases established in Civil, Architectural and Environmental Engineering practice.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 404. Senior Design Project II - Construction Documents. 3 Credit Hours.
The second semester of a two semester comprehensive design project applying the knowledge acquired during earlier coursework and implementing the pedagogy of life-long learning. Team projects incorporating interdisciplinary design skills, engineering standards and realistic constraints. The faculty coordinator working with several practicing design professionals provide consultation, guidance, and recommendations on aspects of preparing the construction documents required for project procurement and construction. Using the designs produced in CAE 403 the course develops the drawings, specifications and calculations required for a comprehensive construction documents package.
Prerequisite: CAE 403.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 421. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 430. Water-Resources Engineering I. 3 Credit Hours.
Basic principles of open channel flow. Computation of water surface profiles. Design of hydraulic structures, design of lined and unlined open channels, and design of sanitary sewer systems. Introduction to hydrology and analysis of hydrologic data. Rainfall characteristics and peak runoff models.
Prerequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 440. Water Quality Control Systems. 3 Credit Hours.
Physical, Chemical and Biological Transformations; Water and Wastewater Treatment Processes; Water Treatment Plant Design; Wastewater Treatment Plant Design; Case Studies
Prerequisite: CAE 330. And CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 450. Transportation Engineering II. 3 Credit Hours.
Transportation system planning and design. Advanced geometric design for highway and railway/transit. Human, vehicle, and environmental factors affecting the design, operation, and safety of transportation systems. Planning and design of both landside/airside aspects of airport facilities. Water port and multi-modal facilities design.
Prerequisite: CAE 350.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 460. Construction Management. 3 Credit Hours.
An introduction to the management of construction projects including legal considerations as well as the techniques of management science applied to construction. The course includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, network planning techniques, including CPM and PERT are introduced. The management principles of time and cost control are also explored. Computer application of project management tools are included.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 470. Foundations and Earth Retaining Systems. 3 Credit Hours.
Natural soil deposits and subsoil exploration. Geotechnical analysis and design of shallow and deep foundations. Theories of lateral earth pressure.
Design and analysis of earth-filled retaining systems.
Prerequisite: CAE 330. And CAE 370. And CAE 371.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 480. Plumbing and Life Safety for Buildings. 3 Credit Hours.
Design of Building environmental systems including domestic cold and hot water systems, sanitary storm and special waste systems, fuel gas systems, building life safety systems and architectural acoustics.
Prerequisite: CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 481. Building Mechanical Systems II: HVAC Systems. 3 Credit Hours.
Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers air distribution systems, air handling units, coils and heat exchangers, water distribution systems, and primary systems.
Prerequisite: CAE 381. And CAE 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 510. Structural Mechanics. 3 Credit Hours.
Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 511. Advanced Structural Analysis. 3 Credit Hours.
General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 520. Advanced Design of Concrete Structures. 3 Credit Hours.
Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included.
Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 521. Advanced Design of Steel Structures. 3 Credit Hours.
Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.
Prerequisite: CAE 310. And CAE 321.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CAE 522. Design of Prestressed Concrete Structures. 3 Credit Hours.
Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 523. Design of Masonry Structures. 3 Credit Hours.
Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 525. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 530. Water Resources Engineering II. 3 Credit Hours.
Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 531. Surface-Water Hydrology. 3 Credit Hours.
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 532. Ground-Water Hydrology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 533. Water-Quality Control in Natural Systems. 3 Credit Hours.
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water. Pre or Corequisite: CAE 430. And CAE 440.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 540. Environmental Chemistry. 3 Credit Hours.
Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering. Prerequisite: CHM 112.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 541. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.  
Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

CAE 542. Solid and Hazardous Waste Engineering. 3 Credit Hours.  
Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.  
Prerequisite: CAE 340.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

CAE 543. Air Pollution Control Engineering. 3 Credit Hours.  
Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.  
Prerequisite: MAE 303. And CAE 330. Or MAE 309.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.

CAE 560. Sustainable Construction. 3 Credit Hours.  
Pre or Corequisite: CAE 403. Or CAE 404.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

CAE 561. Computer Aided Architectural Engineering Design. 3 Credit Hours.  
The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are covering including 3D modeling of buildings and building components, imbedded cost-estimating and the phasing the construction process. Basics of REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation analysis and whole building energy analysis. Upon completion student will receive a PBA certification from Autodesk.  
Requisite: Junior Status or Permission of Instructor.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.

CAE 570. Advanced Foundation Engineering. 3 Credit Hours.  
Prerequisite: CAE 470.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

CAE 581. Energy-Efficient Building Design. 3 Credit Hours.  
Concepts and methods of energy-efficient building design and sustainable performance. Topics cover building envelope, mechanical, power and lighting, and service water heating systems. Computer-based energy simulation methods and building energy standards are emphasized.  
Prerequisite: CAE 481.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.
CAE 582. Building Energy Modeling and Simulation. 3 Credit Hours.
Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and building loads.
Pre-Co-requisite: CAE 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 590. Special Topics. 1-3 Credit Hours.
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 595. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 604. Master's Design Project. 3 Credit Hours.
Course is taken in place of CAE 404 for students accepted to the Bachelor to Master (4+1) degree program in the CAE Department. A project elaborating on a topic from the students Senior Design course is the basis of the course. See CAE 403 and CAE 404 for the description of the Senior Design Project.
Prerequisite: CAE 403.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 610. Structural Mechanics. 3 Credit Hours.
Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 611. Advanced Structural Analysis. 3 Credit Hours.
General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.
Prerequisite: CAE 211. And CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 620. Advanced Design of Concrete Structures. 3 Credit Hours.
Analysis and design of reinforced concrete elements in the context of the current ACI Building Code; beams subjected to combined loading, flat plates, flat slabs, slender columns, connections, and concrete building systems are included.
Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 621. Advanced Design of Steel Structures. 3 Credit Hours.
Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.
Prerequisite: CAE 310. And CAE 321.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CAE 622. Design of Prestressed Concrete Structures. 3 Credit Hours.
Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 623. Design of Masonry Structures. 3 Credit Hours.
Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included. Prerequisite: CAE 310. And CAE 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 625. Timber Structural Systems. 3 Credit Hours.
Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 630. Water Resources Engineering II. 3 Credit Hours.
Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 631. Surface-Water Hydrology. 3 Credit Hours.
Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies. Prerequisite: CAE 430.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 632. Ground-Water Hydrology. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 633. Water-Quality Control in Natural Systems. 3 Credit Hours.
Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water. Pre or Corequisite: CAE 430. And CAE 440.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 640. Environmental Chemistry. 3 Credit Hours.
Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering. Prerequisite: CHM 112.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 641. Engineering Systems for Disease Control and Bioremediation. 3 Credit Hours.
Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water
and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 642. Solid and Hazardous Waste Engineering. 3 Credit Hours.
Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered.
Design projects are also included.
Prerequisite: CAE 340.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 660. Sustainable Construction. 3 Credit Hours.
Drivers and foundations of sustainable construction. Principles of sustainable construction: integrated planning and design, life-cycle view of projects,
resource selection and optimization, protection of the natural environment, toxics and pollutants elimination, durability and quality. Green building
assessment initiatives, green building policies, and code impacts. Evaluation of the environmental impacts of construction operations. Innovative
Pre or Corequisite: CAE 403. Or CAE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 661. Computer Aided Architecture Engineering Design. 3 Credit Hours.
The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated
and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are
covering including 3D modeling of buildings and building components, embedded cost-estimating and the phasing the construction process. Basics of
REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation
analysis and whole building energy analysis. Upon completion student can receive a PBA certification from Autodesk.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 665. Facilities Operation and Management. 1-3 Credit Hours.
Facilities management topics based on core concepts of International Facility Management Association (IFMA) involving management of corporate
needs, health, safety, security, operation and maintenance of physical facilities. This course will focus on development and understanding of
sustainable facilities management responsibilities involving the building envelope, preventative maintenance, system operational efficiencies, data
analytics and intelligent building systems, building security, maintenance staffing, infrastructure utility requirements as well as holistically integrated
assets, people, corporate strategic planning and technology. Additionally development of skills to engage in facilities management functions
which include EPA environmental / waste disposal, fleet management and statutory regulations as well as emergency management planning will be
emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 669. Construction Management Seminars. 1 Credit Hour.
Seminar series on construction management required for all students in the construction Management MS program. The faculty coordinator will set
up a series of weekly Seminars on topics such as risk management, construction safety, environmental conservation and policy, conflict resolution,
ethics, quality control and construction permitting. Speakers will include leading researchers and specialists from the construction industry. Grades
will be based on reports submitted by the students on the seminar topics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 670. Advanced Foundation Engineering. 3 Credit Hours.
Prerequisite: CAE 470.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 681. Energy-Efficient Building Design. 3 Credit Hours.
Concepts and methods of energy-efficient and environmentally-friendly building design. Topics include energy and sustainable design strategies, climate, passive and active solar design, passive cooling systems, day lighting, and computer simulation of energy flows in buildings. A quantitative understanding of energy fundamentals, examples from practice, and design exercises using computer simulation programs are emphasized.
Prerequisite: CAE 481.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 682. Building Energy Modeling and Simulation. 3 Credit Hours.
Modeling and analysis of building energy performance using state-of-art whole building energy simulation programs. Topics include dynamic simulation of heating and cooling loads in buildings, modeling of building equipment and control system, and integrated simulation of equipment and building loads.
Pre-Co-requisite: CAE 581.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CAE 690. Special Topics. 1-3 Credit Hours.
Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 691. Special Topics in Construction Management. 1-3 Credit Hours.
Sub-titles describing the topics to be offered in Construction Management’s Special Topics will be shown in parenthesis, in the printed class schedule following the title, "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 695. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 702. Finite Element Methods. 3 Credit Hours.
Variational principles and their application to finite element methods. Applications to: plane stress and plane strain, three-dimensional stress analysis, bending of plates, and axi-symmetric shells. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 711. Theory of Elasticity. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 712. Structural Reliability. 3 Credit Hours.
Basic theory and tools of structural reliability including theory of probability, statistical assessments as well as inference and model building. Topics include: review probability theory; descriptive statistics; uncertainty modeling; estimation and model building; structural reliability theory; first and second order reliability methods; Level I methods/code calibration; load combinations; Bayesian decision analysis and reliability updating.
Prerequisite: IEN 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CAE 714. Structural Dynamics. 3 Credit Hours.
Elementary structural dynamic analysis covering single degree-of-freedom and multiple degree-of-freedom systems. Topics include: free, damped and forced vibrations; transmissibility and ground motion; arbitrary, step and pulse excitation; numerical evaluation; rigid and flexible bodies; natural frequencies and modes; tuned-mass dampers; responses and spectrum; practical indications as well as an introduction to wind and earthquake engineering.
Prerequisite: CAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 716. Fracture Mechanics. 3 Credit Hours.
Theory of fracture mechanics for linear elastic and nonlinear material behavior, energy release rate, stress intensity factor, and J-integral with practical application to brittle fracture and fatigue. Case studies involving civil infrastructure such as bridges, buildings, pipelines and ships. Metallurgical aspects of fatigue and fracture.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 730. Environmental Hydrology. 3 Credit Hours.
Principles of ecohydrology, agricultural hydrology, impacts of climate change, fundamentals of remote sensing and geographic information systems for hydrologic applications, statistical applications in hydrology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 735. Water and Wastewater Engineering: Treatment and Reuse. 3 Credit Hours.
Physical treatment processes; Chemical unit processes; Advanced biological treatment processes; Sludge treatment and disposal; Industrial water supply and wastewater treatment; Membrane systems for wastewater treatment and case studies; Advanced wastewater treatment and reuse; Environmental nanotechnology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 743. Risk Analysis. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 744. Risk Management and Resilience. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 761. Building Information Modeling II. 3 Credit Hours.
The course prepares students to utilize the predictive capabilities Building Information Modeling (BIM) technology in the Architecture, Engineering, and Construction (AEC) Industry. Continuing from the fundamental lessons of CAE 361 BIM I, this course prepares students for in depth modeling of engineering systems within AEC projects. Modeling of Structural, Mechanical, Electrical and Plumbing systems will be covered. Using the BIM of these systems to predict the system performance will be covered in the form of analytical modeling and detailed energy modeling.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CAE 762. Construction Project Management. 3 Credit Hours.
This course is designed to provide a practical background and working knowledge of how Construction Projects are developed and managed through professional Program Management. Elements consisting of Program Organization, Program and Project conception, Project planning, Scoping, effective project communication strategies, budgeting, scheduling, controls, resource and cost management and behaviors of the Program Manager to lead. The Project Management Body of Knowledge (PM BoK) guide relating to scope, time, cost, quality and other knowledge areas for planning and control of projects throughout their entire lifecycle. This course will also explore various applications that use construction project management software such as Primavera, eBuilder, etc. as interactive platform tools. Key leadership skills and managerial styles needed to effectively build, manage, and lead a successful project team.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CAE 765. Construction Accounting and Finance. 3 Credit Hours.
This course will investigate the theory and practice of financing large projects. Insights into the logic of capital structure decisions – the mix of debt and equity, the choices among debt alternatives, private/public partnerships - will require an understanding of financial theory and an investigation of the relevant literature will be conducted. Accounting techniques will be reviewed that will provide students with a toolset for performing financial analyses in the construction industry. Finally, case projects will be evaluated by the class and decisions made regarding project viability using the tools presented during the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 766. Forensic Engineering. 3 Credit Hours.
OBJECTIVE OF THE COURSE IS TO INTRODUCE STUDENTS INTO THE FIELD OF FORENSIC ENGINEERING. THIS COURSE IS DESIGNED TO PROVIDE BACKGROUND AND WORKING KNOWLEDGE OF HOW FORENSIC ENGINEERING PROJECTS ARE INITIATED AND MANAGED FROM THE ENGINEER'S AND ATTORNEY'S PERSPECTIVES. VARIOUS ELEMENTS REQUIRED IN A FORENSIC INVESTIGATION PROJECT FROM CONDITION ASSESSMENT TO EXPERT REPORT PREPARATION AND EXPERT TESTIMONY WILL BE COVERED. THE ROLE OF THE FORENSIC ENGINEERING EXPERT WILL BE EXPLAINED FROM THE VIEW OF THE ENGINEER AND FROM THE ATTORNEY. BY ENGAGING STUDENT IN THE GROUP PROJECT ASSIGNMENT, IN WHICH HE/SHE IS DEALING WITH THE REAL-LIFE EXAMPLES (DEFECTS), AND BY PARTICIPATING IN A MOCK MEDIATION AND DEPOSITION/ TRIAL BY THE END OF THIS COURSE STUDENT WILL BE EQUIPPED WITH KNOWLEDGE ALLOWING HER/HIM TO BETTER DEAL WITH A REAL LIFE SITUATIONS.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 769. Construction Management Capstone Course. 3 Credit Hours.
The Construction Management Capstone Project is taken during the final semester of study in the MS in construction management program. It is designed to reinforce the knowledge and skills acquired during the program of study via a simulated construction project. The faculty coordinator will pair student teams with industry partners who will guide them through the steps in planning, coordination and execution of a building project. The course will provide students experience in the use of various project management tools in a virtual setting. Site visits and interaction with the project members will also provide experience in solving complex and strategic issues that often arise on actual construction projects. A comprehensive project report will be due at the end of semester which will be graded by the faculty coordinator in consultation with the industry partners.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CAE 780. Indoor Environmental Modeling. 3 Credit Hours.
Prediction of indoor environment using computational fluid dynamics techniques. Advanced topics in thermal comfort and indoor air quality. Basic concepts of turbulence modeling and numerical methods for natural, forced, and mixed convection and jet flows indoors. Simulation of air velocity, temperature, and contaminant concentrations in buildings. Comparison of the simulated results with measured data.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 781. Advanced Building Energy Modeling and Simulation. 3 Credit Hours.
Equation-based object-oriented building energy modeling. Coupling of different building simulation tools. Applications in rapid prototyping of new building systems, model-based design and evaluation of building control, and building performance evaluation.
Prerequisite: CAE 582. Or CAE 682.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CAE 790. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 791. Advanced Topics in Construction Management. 1-3 Credit Hours.
Sub-titles describing the topics to be offered in Construction Management's Special Topics will be shown in parenthesis, in the printed class schedule following the title, "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 795. Special Problems. 1-3 Credit Hours.
Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CAE 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her Master's thesis enrolls for credit as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 820. Research in Residence. 1-6 Credit Hours.
Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in CAE 810. Credit not granted. May be regarded as full-time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to the Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours of CAE 830 may be taken in a regular semester, nor more than 6 credit hours in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken after the Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credit hours in CAE 840 may be taken in a regular semester, nor more than 6 credits in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CAE 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
Classics (CLA)

CLA 101. Greek and Roman Mythology. 3 Credit Hours.
The major political, cultural, and social themes that appear in Greek and Roman mythology, examining literary and material evidence.
Requisite: Not Allow Enrollment in CLA 220 if already Enrolled/Took CLA 219.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 102. Writing on Greek and Roman Mythology. 3 Credit Hours.
A companion writing course for students enrolled in CLA 220, Greek and Roman Mythology.
Requisite: Not Allow Enrollment in CLA 219 if already Enrolled/Took CLA 220.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 105. Greek Civilization. 3 Credit Hours.
This course introduces key concepts, events, and personalities of Greek culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 106. Roman Civilization. 3 Credit Hours.
Introduces key concepts, events, and personalities of ancient Roman culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 210. The Greek and Latin Roots of English. 3 Credit Hours.
Equips students with the tools needed to analyze and understand the meanings of English words with Ancient Greek and Latin roots. Special attention will be paid to legal and medical terminology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CLA 211. Medical Terminology. 3 Credit Hours.
Medical Terminology is an introduction to the international vocabulary of medical science derived from Ancient Greek and Latin. We will approach this topic linguistically, beginning with the roots of ancient words and examining the rules and techniques by which Greek and Latin elements (prefixes, suffixes, and stems) are constructed into medical and scientific vocabularies. We will also look at some of the intellectual contributions of Graeco-Roman civilization to modern science and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CLA 221. Sports and Society in the Ancient World. 3 Credit Hours.
The role of sports in ancient Greek and Roman culture. Topics covered include: Mycenean bull-Jumping; athletic events in Homer; the Olympic games; chariot racing and gladiatorial combat at Rome; and the connection between public athletics and religion. Students learn to interpret literary and iconographic evidence, and study architectural remains such as the stadium at Olympia. the Circus Maximus, and the Colosseum.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 222. Sexuality and Gender in the Ancient World. 3 Credit Hours.
Basic questions of sexuality and gender in ancient Greece and Rome: What does it mean to be male or female? What can we discover about ourselves from the way(s) we have sex? How are all these things related to life, love, power?
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 224. The Heroic Journey. 3 Credit Hours.
The figure of the Hero On a Journey has long captivated the minds of story-tellers and audiences. This motif, known as "The Monomyth," speaks the profoundest hopes and fears of humankind. This course will examine the Monomyth as it occurs particularly in the classical tradition from Gilgamesh to Tolkien.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CLA 225. Magic and the Occult in Antiquity. 3 Credit Hours.
A broad sweep of evidence for magic and the occult in the ancient Mediterranean world. The focus is Graeco-Roman Egypt, renowned in antiquity for occult arts such as divination, daemonology, astrology, and alchemy. The primary sources analyzed are diverse, and include magical formulae, manuals, recipes, curses, philosophical writings, and literary accounts, in particular those by Lucian and Apuleius, purporting to provide true tales of magic.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 226. Greek and Roman Art. 3 Credit Hours.
The course is an introduction to ancient Greek and Roman art within its socio-political and religious context. It includes a survey of stylistic movements, elements of architecture, and a brief historical background for each period outlined in the syllabus.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 231. Sciences in Ancient Greece and Rome. 3 Credit Hours.
The beginnings of scientific investigation in ancient Greece and its development and codification under the Roman Empire.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 232. Ancient Greek and Roman Law. 3 Credit Hours.
This course examines selected trials from ancient Greece and Rome both as a way to understand these legal systems in themselves and as a way to explore the cultures, values, and biases that shaped them.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 233. Ancient Medicine. 3 Credit Hours.
Provides a historical survey of evidence, practices, and ideas from the world of ancient medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 243. The Art of Government in Greece and Rome. 3 Credit Hours.
Introduces key concepts and models of Greek and Roman Statecraft, including the polis democracy, the Republic and the Empire.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 246. Ancient Rhetorical Theory. 3 Credit Hours.
The historical development of, and key topics in, theories of persuasive communication developed by the ancient Greeks and Romans.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 271. Ancient Philosophy. 3 Credit Hours.
What is knowledge, and how can it be known? Why be moral? What is justice? What is the good life? If we really have free will, can there be such a thing as destiny? In what does friendship consist? What exactly is love? What is the meaning of death? These and other questions were addressed powerfully by the ancient Greeks and Romans. This course will explore such crucial philosophical themes, along with the actual method(s) of inquiry that the ancients devised for examining them. Major figures such as Plato and Aristotle will be featured, along with fragments of the Presocratics and selections from other ancient philosophers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 301. Ancient Greece. 3 Credit Hours.
Greek civilization from the Late Bronze Age to the end of Greek independence at the battle of Chaeronea in 338 B.C.E.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CLA 302. The Hellenistic Age. 3 Credit Hours.
Conquests of Alexander the Great and the spread of Greek culture in the Near East under Alexander's successors until the death of Cleopatra in 31 B.C.E.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CLA 303. The Roman Republic. 3 Credit Hours.
Roman civilization from the establishment of the Republic until the Battle of Actium in 31 B.C.E.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CLA 304. The Roman Empire. 3 Credit Hours.
Roman civilization from the reign of Augustus in 37 B.C.E. to the Fall of Rome in 476 C.E.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CLA 305. What is a Classic?. 3 Credit Hours.
An explanation of what it means to designate a work of art as 'a classic', in our own culture as well as in other times and places. In order to arrive at a more sophisticated understanding of the category, readings will be chosen from a variety of texts, selected from the world's treasury of acknowledged 'classics,' beginning from the canon of ancient Greek and Roman literature that for many centuries has been the touchstone of Western civilization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 310. Survey of Ancient Greek Literature and Culture. 3 Credit Hours.
Classical Greek culture, paying special attention to Greek literature from Homer to Aristotle. It is intended to lay a foundation for understanding how Hellenic thought and art influenced the development of all subsequent Western culture. All texts will be read in English translation.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 311. Survey of Classical Latin Literature and Culture. 3 Credit Hours.
A broad introduction (in English translation) to the literature of the Roman Republic and Empire. The Greek heritage behind Latin literature will be highlighted. Readings will be chosen from authors such as Catullus, Cicero, Vergil, Horace, Ovid, Petronius, Juvenal, Tacitus, and Suetonius, and from genres such as epic and lyric poetry, oratory, history and satire.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 315. The Classical Epic Tradition. 3 Credit Hours.
The course treats the rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 322. Monsters and Fantastical Creatures in Western Antiquity and Other Cultures. 3 Credit Hours.
An explanation of the notion of the "monster" and the “fantastic creature” in a range of literary and visual representations from classical antiquity (the Greek and Roman World) and other cultures from various time periods. Starting with Hesiod's "Catalogue of Monsters" we examine the following questions: Whose mental projection is embodied in a given monster? Are there different categories of monsters? What does the monster represent? What fears does the monster crystallize?
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 323. The Ancient World on Screen. 3 Credit Hours.
How do we represent the ancient Greeks and Romans in modern media? What happens to the books the ancients wrote when these are turned into modern films, TV shows or video games?
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CLA 324. Classical Myth and Contemporary Art. 3 Credit Hours.
The use, adaptation, transformation, and re-figuring of Classical myth in contemporary art. The artwork will range from photographs to installations and videos. We will use theories drawn from both art criticism and literary criticism. Female artists and post-feminist theory will figure prominently as a way to bring a broader perspective to a scrutiny of the marked gender imbalance in Classical myth.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 325. The Vampire in Folklore, Fiction, and Film. 3 Credit Hours.
By pondering the role of vampires and other such monsters, in folklore, fiction, and film, this course attempts to ponder such fundamental questions as "What does it mean to be human?" and "What are the implications of death?" The tradition will be traced from its earliest antecedents in the ancient world to its latest manifestations in current fiction and screen media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 326. What Does it Mean to be Human. 3 Credit Hours.
Questions of Artificial Intelligence, the Singularity, Superintelligence, and Robotics capture our imaginations (and sometimes stir profound anxiety and fear). But are these technological developments merely phenomena of the 20th and 21st centuries? Or are the key issues entailed already adumbrated in the literatures and cultures of the ancient Greeks and Romans? This course explores the parameters of that most-fundamental question of the Humanities: What does it mean to be human? Is 'human' a discrete category with well-defined boundaries, or have fuzzy logic and the dizzying pace of technological percentage a human body must be organically/naturally produced (as opposed to mechanically/technologically engineered) in order to be considered human. The course will entail reading assignments from the Greek and Roman classics (in English translation); weekly screenings of movies (including television programs); and in-class discussion.
Components: SEM.
Grading: GRD.

CLA 327. Heroes Ancient and Modern. 3 Credit Hours.
'What is a hero?' Throughout time and across a variety of cultures, beginning with the ancient Greeks various types or categories of 'hero' are considered from these cultures, including the classical model of the aristocratic hêrôs; the Monomyth Hero (most famously formulated by Joseph Campbell); Public & Private Heroes; the Tragic Hero; the Comic Hero; the Antihero; the so-called 'Dark Hero'; and the modern 'Superhero.' Key elements will include the relations between [a] the heroic and the divine, and [b] the notion of the hero and the concepts of social and civic leadership in the 21st century.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CLA 340. Greek Tragedy. 3 Credit Hours.
Readings in English of the tragedies of Aeschylus, Sophocles, and Euripides.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 341. Comedy in Ancient Athens and Rome. 3 Credit Hours.
The comic plays of the ancient Greeks and Romans in English translation. The focus is close reading and analysis of plays by Aristophanes, Menander, Plautus, and Terence, with a view to their socio-political, cultural, and historical milieu. The final weeks are devoted to reception of these works by Shakespeare and Molière.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 360. Women in Greek and Roman Antiquity. 3 Credit Hours.
The lives of women in ancient Greece and Rome. The historical panorama extends from the Mycenaean period ca. 1200 BC to the end of the Roman Empire in the West, 476 AD. The role and influence of Women as mothers and wives in control of the household will be examined in detail. Other themes such as love, death, marriage, divorce, legal and social status, foreign women, spinsters, wise women such as Diotima and Aspasia, Women in the arts and women of power, these will be considered through a close study of historical and literary texts as well as material culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CLA 370. Self and Other in the Ancient World. 3 Credit Hours.
The course examines Greek and Roman depictions of outsiders in a wide range of ancient texts and material sources.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CLA 372. Greek Religion. 3 Credit Hours.
Examines the religious thought and practice of the ancient Greek-speaking world from the Bronze Age to the first century CE. Major topics include ritual, sacrifice, prayer, chthonic and sky deities, oracles, and mystery-cults. Students will learn to interpret primary source material, such as the epic poems of the archaic period, the so-called Homeric Hymns, and objects of material culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 373. Religions of Rome. 3 Credit Hours.
The religious practices of ancient Romans. Major topics include the machinery or state cult, the importation of foreign divinities to Rome, the deification of emperors, and Roman attitudes towards the Christians. Students will learn to interpret primary source material, such as the writings of Varro, Cicero, the historians, and St. Augustine, and archeological evidence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 401. Special Topics in Classics. 3 Credit Hours.
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 402. Special Topics in Classics. 3 Credit Hours.
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 403. Special Topics in Classics. 3 Credit Hours.
This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 404. Special Projects in Classics. 3 Credit Hours.
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 405. Special Projects in Classics. 3 Credit Hours.
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 406. Special Projects in Classics. 3 Credit Hours.
This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 422. Aristophanes. 3 Credit Hours.
Readings from Aristophanes' plays in the original Ancient Greek.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 491. Directed Reading in Classics. 1-3 Credit Hours.
Content to be determined by faculty member and registering student(s).
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
CLA 492. Directed Reading in Classics. 3 Credit Hours.
This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 493. Directed Reading in Classics. 3 Credit Hours.
This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 495. Senior Thesis I. 3 Credit Hours.
Part I of the project or thesis normally completed in the senior year.
Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 496. Senior Thesis II. 3 Credit Hours.
Part II of the project or thesis normally completed in the senior year.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 505. Seminar in Ancient Studies. 3 Credit Hours.
Topics in Greek and Roman studies.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CLA 605. Graduate Seminar in Ancient Studies. 3 Credit Hours.
A graduate-level seminar focused on various topics in Classical history, literature and culture.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CLA 691. Direct Readings in Classical Studies for Graduate Students. 3 Credit Hours.
Graduate students will pursue supervised, directed readings on various classical topics.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

Clinical and Translational Investigation (CTI)

CTI 602. Writing for Translational and Clinical Science. 2 Credit Hours.
This introductory core course will be taught by the Masters of Science in Clinical and Translational Investigation (MSCTI) Program Directors, as well as various guest lecturers. The focus of the course will be on developing grant and manuscript writing skills in the area of clinical and translational science across the translational science spectrum.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CTI 603. Research Ethics. 3 Credit Hours.
Course focuses on topics related to what is sometimes called the "responsible conduct of research" (RCR). It covers the landscape of "scientific integrity" - both the principles and day-to-day practicalities of research ethics. The course is inter-disciplinary in its approach. Readings and other materials used as part of the course draw on the examples from many academic fields, and are intended to have application to any academic or professional area of study in which research is conducted.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CTI 604. Advanced Independent Study. 1-3 Credit Hours.
Individual work on a special project and/or additional coursework under faculty guidance.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CTI 605. Introduction to Team Science and Entrepreneurship. 2 Credit Hours.
This introductory core course will introduce students to fundamental topics in translational science related to team science and entrepreneurship. Through a series of lectures, participatory exercises, and guided discussions, students will learn practical strategies for engaging in team science and for developing a translational research project into an entrepreneurial endeavor.
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

CTI 805. Capstone Project / Master's Thesis. 1-6 Credit Hours.
The Capstone Project is an opportunity for MSCTI students to apply the principles and practices of clinical and translational research, and is a vital component in the training of impactful clinical and translational investigators. Students will engage in research, produce publishable content, and advance their research careers.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Communication (COM)

COM 101. Mass Media Communication in Society. 3 Credit Hours.
A survey of the history, development, structure, and effects of mass communication media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 250. Freedom of Expression and Communication Ethics. 3 Credit Hours.
An examination of the concept of freedom of expression, its philosophical roots, its application of contemporary issues in communication, and of the basics of moral philosophy (ethics) and moral reasoning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 302. Structured Research and Practice at SoC Consultancy. 1-3 Credit Hours.
Students will engage in structured participation in programmatic research and applied practice through the SoC Consultancy. Requisite: Sophomore or Higher and Min Cumulative GPA 2.5.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

COM 395. Honors Seminar in Communication. 3 Credit Hours.
An examination of central issues and topics in the field of Communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COM 401. Honors Communication Colloquium. 3 Credit Hours.
An examination of central issues and topics in the field of Communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COM 406. Special Topics in Communication. 3 Credit Hours.
Course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COM 499. Senior Honors Project/Thesis. 3 Credit Hours.
The focus is on completing the culminating thesis project, in consultation with the student's selected committee and thesis chair.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 601. Theories of Communication. 3 Credit Hours.
Comparison of theories dealing with the processes and effects of communication is discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 602. Methods of Communication Research. 3 Credit Hours.
A comprehensive survey of communication research methods. Qualitative and quantitative approaches will be explained and practiced.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 603. Qualitative Research Methodologies. 3 Credit Hours.
Research methods and theories for participant-observation, phenomenology, symbolic interactionism, ethnomethodology, content analysis, and historical-critical interpretation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COM 604. Advanced Communication Research Methods and Statistics. 3 Credit Hours.
Provides an advanced examination of the problems and methods found in quantitative communication research.
Prerequisites: COM 601, COM 602.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 605. Theories and Methods for Mass Communication Research. 3 Credit Hours.
This course will introduce you to the theoretical concepts and research methodologies that apply to work in, and study of, journalism and mass communication. The curriculum stresses critical thinking skills necessary to evaluate the credibility of research findings offered by various organizations, including government, business and academia.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COM 606. Visual and Narrative Theories. 3 Credit Hours.
This course surveys theories of film, visual communication, design, game and interactive theory, critical analysis, cultural studies.
Prerequisite: COM 601 and Requisite: Doctoral Standing.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

COM 607. Survey of Media Production. 3 Credit Hours.
This course gives students an overview on how to produce compelling media stories. Students will learn key concepts and design principles used in modern media production. Students will develop a website and a short film using learned key concepts in creating and effective multimedia experience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 608. Designing and Producing Messages. 3 Credit Hours.
Drawing on message design theories from areas such as persuasion and discourse studies and using creative and secondary research skills, students design and implement a production such as a public service announcement, short documentary, microsite, game prototype, or data visualization project.
Prerequisite: COM 601 and 602 and 607.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
COM 609. Special Topics in Communication. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 610. Doctoral Colloquium. 1-3 Credit Hours.
This course will introduce students to the nature and scope of doctoral study. The topics of this course include different aspects of engaging productively with the doctoral program, such as developing a research program, publication, grant writing, and job search dynamics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

COM 612. Pedagogy. 3 Credit Hours.
This course focuses on the traditions as well as the recent advances in pedagogy, including its historical, theoretical and practical applications with the aim of preparing students to teach at the University level.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 615. Social Effects of Mass Communication. 3 Credit Hours.
Roles, functions, and consequences of mass communication in American society.
Prerequisite: COM 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COM 620. Structured Research and Practice in SoC Consultancy. 1-3 Credit Hours.
Students engage in programmatic research and applied practice through structured participation at the SoC Consultancy.
Requisite: Graduate and Min Cumulative 3.0 GPA.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

COM 672. Seminar in Persuasive Communication. 3 Credit Hours.
This course is designed to provide students with a basic understanding of the role of communication in the persuasion process. This will be achieved by exploring historical and contemporary theories of persuasion as well as examining research that has focused on persuasion.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COM 695. Directed Readings. 1-3 Credit Hours.
Students work independently with a professor, researching a topic in a selected area. Repeatable up to 6 credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 698. Independent Research. 3 Credit Hours.
An in-depth, hands-on course in which students conduct a research project using the specified research method. May include experimental design, advanced qualitative methods, content analysis, or survey methods. Repeatable up to 6 credits.
Prerequisites: COM 602, COM 603.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
COM 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in
COM 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COM 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral
research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Communication Studies (COS)

COS 112. Interpersonal Communication. 3 Credit Hours.
Overview of current theories of interpersonal communication. Consideration is given to impression formation, relationship between self-concept and
others, function of language in social interaction, and development and maintenance of relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COS 120. Exploring Human Communication. 3 Credit Hours.
Course content focuses on behavioral science research highlighting verbal and nonverbal skills, knowledge, and abilities necessary for effective
communication in a broad range of contexts, including romantic relationships, business interactions, political campaigns, health promotion, and
persuading and influencing people in general.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 210. Writing for Communication Studies. 3 Credit Hours.
Principles of writing, reviewing literature, and synthesizing research for communication studies and the social sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 211. Public Speaking. 3 Credit Hours.
Introduction to effective audience communication including theory and extensive practice in oral presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 212. Interview Skills. 3 Credit Hours.
Study of interview skills, listening techniques, voice and diction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 220. Communication Theory. 3 Credit Hours.
Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
COS 304. Intercollegiate Debate Theory and Practice. 1 Credit Hour.
A course designed to teach students how to compete successfully in intercollegiate debate, and to reinforce training through practice and competition.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

COS 311. Advanced Oral Advocacy. 3 Credit Hours.
Advanced presentational speaking to persuade including theory and extensive practice.
Prerequisite: COS 211.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 314. The Power of Dialogue. 3 Credit Hours.
Students learn how to engage in and lead constructive dialogue about sensitive, emotional, and controversial issues in the public and private spheres.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 316. Small Group Communication. 3 Credit Hours.
Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 318. Nonverbal Communication. 3 Credit Hours.
Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues, and physical appearance is included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 324. Health Communication. 3 Credit Hours.
This course is designed to provide a broad introduction to human communication in a health-care context. Emphasis will be on issues of social support, patient-health professional/caregiver interaction, organizational culture, planning health promotion campaigns, and cultural conceptions of health and illness.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 325. Communication in Health Organization. 3 Credit Hours.
This course looks at the dyadic, small group, and institutional communication patterns that can affect health outcomes within and between health organizations including hospitals and other allied health services.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 328. Sports As Communication. 3 Credit Hours.
This is a course which introduces students to the study of spectator and participation sports as communication and to communication within sports.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 330. Conflict Management. 3 Credit Hours.
This course provides an understanding of conflict dynamics and strategies for constructive conflict management.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 333. Business Communication. 3 Credit Hours.
Study and practice in the major forms of spoken and written communication in the context of businesses and other professional organizational settings.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
COS 336. Political Communication. 3 Credit Hours.
A review of the history, strategies, theories and trends in political campaign communication in the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 343. Introduction to Intercultural Communication. 3 Credit Hours.
Introduction to communication among people from diverse cultures. Application of communication theory to intercultural sensitivity and cultural diversity is emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 351. Qualitative Research Methods. 3 Credit Hours.
Course is designed to introduce students to a sample of qualitative research methods used in communication.
Prerequisites: COM 110, COS 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 352. Critical Research in Communication. 3 Credit Hours.
This is a course in rhetorical criticism. Students will gain an understanding of rhetorical theory as it is applied to the analysis and evaluation of significant public communication events.
Prerequisites: COM 110, COS 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 353. Quantitative Communication Research Methods and Analyses. 3 Credit Hours.
Introduction to communication research methods. Application of quantitative measurement techniques and statistical analyses will be discussed as well as the use of microcomputer statistical programs.
Prerequisites: COM 110, COS 210.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

COS 354. Organizing for Action. 3 Credit Hours.
Students will learn a range of communication strategies and tactics to advocate for and effect social change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 355. Applied Communication Research Methods. 3 Credit Hours.
Students learn to read and interpret quantitative and qualitative research methods. Students develop skills in basic qualitative methods (focus groups, observation) and quantitative methods (surveys, polls, comparisons, basic statistical analysis) for use in daily and professional life.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 360. Speech Writing. 3 Credit Hours.
This is a course on written speeches, speechwriting, and delivering speeches from manuscripts. Students will write, review and edit their own work, and will work in teams engaging peer review and corporate authorship to produce manuscripts for a variety of types and purposes of speeches employing a broad range of strategies for proof, language, and engagement.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 377. Argumentation and Critical Thinking. 3 Credit Hours.
Argumentation theory and practice are discussed. Rhetorical and philosophical foundations of argumentation and their application in various settings including academic debate are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
COS 391. Undergraduate Special Topics in Communication Studies. 3 Credit Hours.
Course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 405. Practicum in Communication Studies. 1-3 Credit Hours.
Structured participation in programmatic research and applied practice in the community.
Requisite: Junior Status.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 418. Organizational Communication. 3 Credit Hours.
Introduction to organizational communication theory. Consideration of structure, function, and effects of communication in organizations are analyzed. Emphasis is placed on principles needed for decision making and effective management of organizational communication processes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 426. Patient-Provider Communication. 3 Credit Hours.
This class focuses on the interpersonal environment of patient-provider interaction. The primary purpose of this course is to describe best practices for coming to shared meaning and decision-making between medical professionals and patients in healthcare settings.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 427. Health Behavior and Risk. 3 Credit Hours.
This course introduces students to different theories and models of health communication that are frequently used to develop persuasive health messages. It draws on health communication messaging theory, as well as literature in public health, psychology, and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 472. Persuasion. 3 Credit Hours.
A review of theory, research, and practice of the intentional use of symbols to influence attitudes, beliefs, and actions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 473. Words that Shaped the World. 3 Credit Hours.
A study of great speakers and speeches in important international settings.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 474. Presidential Debates. 3 Credit Hours.
History, impacts, content and strategies of televised presidential campaign debates.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 477. Engaged Communication. 3 Credit Hours.
Capstone course designed for communication studies majors. Provides students opportunities to apply knowledge of communication theory and associated research skills through their personal engagement in community or organizational service and action research.
Prerequisites: COM 110, COS 210, COS 351, COS 354. Requisite: Senior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 479. Capstone for Communication Studies. 3 Credit Hours.
Capstone course designed for communication studies majors. Provides students with the opportunity to apply knowledge of communication theory and research skills through development of capstone project.
Prerequisites: COM 110 and COS 210 and COS 351 and COS 353. Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
COS 498. Communication Studies Internship. 1-3 Credit Hours.
Prescribed study and supervised work with practitioners in organizations.
Requisite: Junior Status.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 499. Projects and Directed Research. 1-3 Credit Hours.
Individual study. No more than three credits may be counted toward a Communication major or minor.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 545. Intercultural Communication: International Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 546. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 560. The Executive Communicator. 3 Credit Hours.
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.
Prerequisite: COS 211. Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

COS 591. Advanced Special Topics in Communication Studies. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 599. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 616. Small Group Processes. 3 Credit Hours.
Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.
Components: LEC.
Grading: GRD.

COS 618. Seminar in Nonverbal Communication (NVC). 3 Credit Hours.
Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues and physical appearance is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

COS 620. Gender Issues in Leadership. 3 Credit Hours.
This course utilizes case studies of innovative executives to analyze different leadership and communication styles between men and women.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 630. Conflict Management. 3 Credit Hours.
This course provides an understanding of conflict dynamics and strategies for constructive conflict management.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 645. Intercultural Communication: International Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 646. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.
Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 647. Culture and Organizations. 3 Credit Hours.
This course explores the effects of cultural diversity on communication in organizations. Diffusion of innovations, prejudice, discrimination, and equality are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 651. Survey of Health Communication. 3 Credit Hours.
This course is intended to provide a graduate-level introduction to the study of health communication. Accordingly, it covers a wide range of topic areas informed by an equally diverse range of theories, research paradigms, and applied foci.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 652. Culture and Health. 3 Credit Hours.
This class is designed to give participants an overview of the problems, issues, and processes involved with communicating with people of different cultural and subcultural backgrounds about issues of health and illness.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 653. Organizations, Communication, and Health. 3 Credit Hours.
This class focuses on the organizational, interpersonal and intercultural dimensions of communication in health care settings. It draws on material from the communication discipline as well as work from medical sociology, anthropology, medicine, humanities and discourse studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 654. Risk Communication. 3 Credit Hours.
This course will offer a foundational understanding of the psychological and sociological bases of risk perceptions that are necessary for effective risk communication.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 655. Health Communication Interventions. 3 Credit Hours.
This course will focus on the planning, development, and assessment of health communication intervention messages and materials.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 660. The Executive Communicator. 3 Credit Hours.
Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
COS 674. Seminar in Interpersonal Communication. 3 Credit Hours.
This course focuses on theoretical approaches to interpersonal communication. Emphasis is placed on current research including fundamentals of relationships, developmental issues, interaction management, and interpersonal competence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 680. Organizational Training and Development. 3 Credit Hours.
This course is designed to provide an examination of internal organizational communication in order to understand appropriate strategies for training and development of supervisors and employees.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 682. Seminar in Organizational Communication. 3 Credit Hours.
This course explores theoretical perspectives and the impact of communication in organizations. Critical analysis includes management styles, decision-making, group interaction, conflict resolution, and diffusion of innovations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 690. Communication Studies Practicum. 1-3 Credit Hours.
Prescribed graduate study and supervised work with practitioners in organizations.
Prerequisites: COM 601 and COM 602 and COM 603.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

COS 691. Advanced Special Topics in Communication Studies. 3 Credit Hours.
This course subject matter varies according to announced special topic. See class schedule for details.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

COS 699. Advanced Projects and Directed Research. 1-6 Credit Hours.
Individual study. Course may be repeated to a maximum of six credits.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Computer Science (CSC)

CSC 100. Data Science for the World. 3 Credit Hours.
Introduction to the concepts of data science. Basic data analysis skills. The programming language R
Prerequisite: MTH 108.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 110. Social and Ethical Issues in Computing. 3 Credit Hours.
History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 115. Introduction to Python for Arts & Humanities. 3 Credit Hours.
Designed for students from the Arts and Humanities.
Prerequisite: MTH 108 or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 116. Cybersecurity: An Introduction to Security in Cyberspace. 3 Credit Hours.
Components: LEC.
Grading: GRD.

CSC 118. Information Technology and Society. 3 Credit Hours.
A variety of topics on information technology and society through various course activities including research papers, experiments, and by reading articles. The topics covered include but are not limited to: history of computing, hardware mechanisms, algorithms design, software development principles, software tools, security, and artificial intelligence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

CSC 119. Computers and Society. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 120. Computer Programming I. 4 Credit Hours.
Prerequisite: MTH 108. or Corequisite: MTH 140 or Higher or MAS 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 198. Freshman Topics in Computer Science. 1-3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 210. Computing for Scientists. 3 Credit Hours.
Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 220. Computer Programming II. 4 Credit Hours.
Common APIs including list, priority queue, set, and map, and their efficient implementations in an object-oriented language using fundamental data structures. Sorting and other applications of recursion. Combining asymptotic analysis and experiments to extrapolate running times. Using APIs in a software project.
Prerequisites: CSC 120 or BTE 324 or ECE 218 and MTH 108 or MTH 140 or MTH 141 or MTH 161 or MTH 162 or MTH 171 or MTH 172 or MAS 110.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 298. Sophomore Topics in Computer Science. 1-3 Credit Hours.
Sophomore Topics in Computer Science - Content varies by semester.
Requisite: At Least 6 credits of CSC courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 314. Computer Organization and Architecture. 3 Credit Hours.
Digital logic and digital systems. Machine level representation of data. Assembly level machine organization. Memory system organization and architecture. Interfacing and communication. Functional organization. Multiprocessing and alternative architectures
Prerequisite: CSC 220. or BTE 324. or ECE 218. and Corequisite: MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CSC 315. Introduction to Python for Scientists. 3 Credit Hours.
Python programming. Python packages for scientific applications. Data science and machine learning applications. Designed for students from the sciences.
Prerequisite: MTH 161 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 317. Data Structures and Algorithm Analysis. 3 Credit Hours.
Prerequisite: CSC 220 or ECE 318 and MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 322. System Programming. 3 Credit Hours.
Prerequisite: CSC 220 or ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 329. Introduction to Game Programming. 3 Credit Hours.
Fundamental programming issues in game design: Software design; Version control; Basic graphics; GUI programming. Large-scale game project: Team development of a functional game; Graphics and GUI component; Networking component; Core game engine.
Prerequisite: CSC 220 or ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 330. Android Programming. 3 Credit Hours.
Prerequisite: CSC 220.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 398. Junior Topics in Computer Science. 1-3 Credit Hours.
Junior Topics in Computer Science - Content varies by semester.
Requisite: At Least 9 credits of CSC courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 401. Computer Science Practicum I. 1 Credit Hour.
Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 402. Computer Science Practicum II. 1 Credit Hour.
Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 403. Computer Science Practicum III. 1-3 Credit Hours.
Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 405. Computer Science Seminars. 1 Credit Hour.
A range of topics in Computer Science, as embodied in the seminars hosted by the Department.
Requisite: At least 12 credits of CSC courses.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 410. Computer Science Project Planning. 1-3 Credit Hours.
Planning for the implementation of a Computer Science project, including: Problem analysis, System architecture design, Algorithm and data structure selection, User interface design, Verification and validation plan, and Prototyping.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 411. Computer Science Project Implementation. 1-3 Credit Hours.
Implementation of a Computer Science project, including: Hardware preparation, Component implementation, System integration, Verification and validation, and Documentation.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 412. Computer Science Internship. 1-3 Credit Hours.
A commercial computing environment. Normally 50 internship hours are required per credit earned (the host company must supply documentary evidence of hours worked).
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 419. Programming Languages. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 517.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 421. Principles of Computer Operating Systems. 3 Credit Hours.
Prerequisite: CSC 314 and CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 423. Database Systems. 3 Credit Hours.
Prerequisite: CSC 322 or ECE 322.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 424. Computer Networks. 3 Credit Hours.
Prerequisite: CSC 314 and CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 427. Theory of Computing. 3 Credit Hours.
Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.
Prerequisite: CSC 220 or ECE 318 and MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
CSC 431. Introduction to Software Engineering. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 322 or CSC 517.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 481. Teaching Assistant Training in Computer Science. 1-3 Credit Hours.
Training and teaching assistant for a specific course, in computer laboratories. May be taken multiple times, assisting maximally twice for a given course.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 498. Senior Topics in Computer Science. 1-3 Credit Hours.
Senior Topics in Computer Science - content varies by semester.
Requisite: At least 12 credits of CSC courses.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 506. Logic. 3 Credit Hours.
Prerequisite: MTH 230 or PHI 210 or PHI 510.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 507. Data Security and Cryptography. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 427.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CSC 516. Cybersecurity. 3 Credit Hours.
Prerequisite: CSC 317 And MTH 224 And MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 518. Interpreters and Compiler Theory. 3 Credit Hours.
Prerequisite: CSC 419.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 528. Introduction to Parallel Computing. 3 Credit Hours.
Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 529. Introduction to Computer Graphics. 3 Credit Hours.
Prerequisite: CSC 220. or ECE 318. and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 540. Algorithm Design and Analysis. 3 Credit Hours.
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 545. Introduction to Artificial Intelligence. 3 Credit Hours.
Prerequisite: CSC 317 or ECE 318 and MTH 224 or ECE 310 or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 546. Introduction to Machine Learning with Applications. 3 Credit Hours.
Prerequisite: MTH 210 and MTH 224.
Components: LEC.
Grading: GRD.

CSC 547. Computational Geometry. 3 Credit Hours.
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 548. Bioinformatics Algorithms. 3 Credit Hours.
Prerequisite: CSC 120 or CSC 210 and BIL 150 or BIL 104 or BIL 352 or BIL 552 or CSC 552.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 549. Biomedical Data Science. 3 Credit Hours.
The computational skills needed for analysis of genomic and biomedical data sets, including: The basics of a command line interface; programming in (bio-)python; running programs on Pegasus2; writing scripts for downloading, manipulating, and analyzing data; file sharing and version control using github; analyzing a Next Generation Sequencing data set, and interpreting the results; and responsible conduct of Research.
Prerequisite: CSC 120 and BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 550. Computational Neuroscience. 3 Credit Hours.
Prerequisite: MTH 162 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 552. Bioinformatics Tools. 3 Credit Hours.
Databases and tools of bioinformatics, as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, and protein structure-function analysis, and various applications.
Prerequisite: BIL 250 or BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 555. Multimedia Systems. 3 Credit Hours.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 595. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 596. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 597. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 598. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 607. Logic. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 609. Data Security and Cryptography. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 427.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 615. Introduction to Python Programming for Graduate Students. 3 Credit Hours.
Python programming and data structures. Program design and implementation. Python packages for scientific applications, data analysis, and machine learning. Designed for graduate students from the sciences. Not available to Computer Science students.
Prerequisite: MTH 161 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 616. Cybersecurity. 3 Credit Hours.
Prerequisite: CSC 317 And MTH 224 And MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 618. Interpreters and Compiler Theory. 3 Credit Hours.
Prerequisite: CSC 419.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 623. Theory of Relational Databases. 3 Credit Hours.
Prerequisite: CSC 423.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 629. Introduction to Computer Graphics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 632. Introduction to Parallel Computing. 3 Credit Hours.
Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 640. Algorithm Design and Analysis. 3 Credit Hours.
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 645. Introduction to Artificial Intelligence. 3 Credit Hours.
Prerequisite: CSC 317 Or ECE 318 And MTH 224 Or ECE 310 Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 646. Introduction to Machine Learning with Applications. 3 Credit Hours.
Prerequisite: MTH 210 and MTH 224.
Components: LEC.
Grading: GRD.
CSC 647. Computational Geometry. 3 Credit Hours.
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 648. Bioinformatics Algorithms. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 650. Computational Neuroscience. 3 Credit Hours.
Prerequisite: MTH 162 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 656. Multimedia Systems. 3 Credit Hours.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 670. Directed Reading. 2-4 Credit Hours.
Directed reading in Computer Science - content varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 685. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 686. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 687. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 688. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 689. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 690. Seminar for Graduate Students I. 1-3 Credit Hours.
Flexible topics of interest to graduate students.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 692. Seminar for Graduate Students II. 1-3 Credit Hours.
Flexible topics of interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 707. Logic Programming. 3 Credit Hours.
Programming in Prolog, Fix-point semantics, Declarative semantics, Completeness of SLD-resolution, Negation, Implementation of logic programming languages. Deductive databases.
Prerequisite: MTH 506 and CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 711. Theory of Computation. 3 Credit Hours.
Recursive functions, Markov algorithms, Turing machines. Unsolvability.
Prerequisite: CSC 317 or CSC 517.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 712. Complexity Theory. 3 Credit Hours.
Models of computations, Blum's axioms, intractability, NP-completeness.
Prerequisite: CSC 427.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 724. Mobile Wireless Systems. 3 Credit Hours.
Cellular Systems, multiple access techniques, wireless networking, mobile IP, power management, user location information management, TDMA, CDMA, and GSM systems, data broadcasting.
Prerequisite: CSC 424.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 732. Parallel Algorithms. 3 Credit Hours.
Parallel computation models; sorting networks; parallel algorithms for sorting, searching, graph problems, prefix computation, pattern matching, and fast Fourier transforms; theory of P-completeness, the class NC.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 746. Neural Networks and Deep Learning. 3 Credit Hours.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 749. Automated Reasoning. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 645.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 751. Semantic Web. 3 Credit Hours.
An overview of the underlying semantic web technologies. Ontology construction and implementation using tools and APIs (logic, XML, RDF, RDFS). Theoretical and practical aspects of knowledge representation (description logic, RDF, RDFS, SPARQL, SROIQ(D)). Designing and debugging ontologies (ontology engineering, entailment tools, project).
Prerequisite: CSC 317 and MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 752. Autonomous Robotic Systems. 3 Credit Hours.
Prerequisite: CSC 317 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 756. Advanced Multimedia Systems. 3 Credit Hours.
Prerequisite: CSC 656.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 785. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 786. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 793. Research Project. 1-6 Credit Hours.
Supervised research project preceding dissertation research for the Ph.D.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 794. Research Project. 1-6 Credit Hours.
Supervised research project preceding dissertation research for the Ph.D.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
CSC 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for the number of credit s as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

CSC 825. Continuous Registration--Master’s Study. 1 Credit Hour.
To establish residence for non-thesis master’s students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 830. Pre-Candidacy DOCTORAL DISSERTATION. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CSC 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of CSC 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CSC 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for Ph.D. students after the student has enrolled for permissible cumulative total in appropriate doctoral research. Regarded as full-time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Dance (DAN)

DAN 102. Stretching and Body Work. 1 Credit Hour.
Stretching techniques and examination of various body therapy concepts.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 111. Modern Dance, Level One. 2 Credit Hours.
Introduction to the discipline of modern dance designed to develop understanding and skill in the basic vocabulary. Open to all students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 121. Ballet, Level One. 2 Credit Hours.
Introduction to the discipline of classical ballet designed to develop understanding and skill in the basic vocabulary. Open to all students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 130. Orientation to Dance. 2 Credit Hours.
Introduction to dance as an art form for those interested in career opportunities in dance education. Required for prospective dance minors. Open to all students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

DAN 140. Theatre Dance Forms. 2 Credit Hours.
Introduction to movement skills and stylistic elements of theatrical forms of dance. Open to all students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
DAN 190. Improvisation. 2 Credit Hours.
Experience in selective and basic processes of movement involvement both individual and group. Open to all students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

DAN 211. Modern Dance, Level Two. 3 Credit Hours.
Continuing exploration of modern dance basic techniques and theoretical concepts. Open to all students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 221. Ballet, Level Two. 3 Credit Hours.
Study of ballet designed to extend technical skill and prepare student for intermediate level work. Open to students with formal ballet training or permission
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 240. Cultural Dance Forms. 2 Credit Hours.
Introduction to movement skills and stylistic elements of dance forms from various cultures. Open to all students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 250. World History of the Dance. 3 Credit Hours.
Introductory exploration of dance history in relation to life, thought, and culture.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 280. Dance Composition Level 2. 3 Credit Hours.
Introduction to choreography through creative problem solving by exploring and experimenting with the basic elements of dance: space, time, energy, and motion. Emphasis is on compositional studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DAN 285. Creative Dance for Children. 2 Credit Hours.
Introduction to theories and methods of teaching dance to children of elementary school age. Open to all students.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

DAN 286. Teaching Dance to Children. 2 Credit Hours.
Theory and practice of teaching dance to preschool and school age children. Open to all students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

DAN 290. Introduction to Dance-Movement Therapy. 2 Credit Hours.
Introduction to dance-movement therapy theory and practice.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

DAN 291. Dance Movement Therapy. 3 Credit Hours.
This course will provide a continued investigation into the theoretical and experiential techniques and practices of dance therapy as well as career options for students majoring in education and the healing professions.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DAN 311. Modern Dance, Level Three. 3 Credit Hours.
Intermediate study of modern dance techniques and theoretical concepts.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DAN 321. Ballet Level Three. 3 Credit Hours.
Study of classical ballet at intermediate/advanced level. Open to students with formal ballet training.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 380. Dance Composition Level 3. 3 Credit Hours.
Continuation of creative problem solving by exploring, experimenting, and combining the basic elements of dance: space, time, energy and motion. Emphasis is on expansion of ideas for stage productions.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

DAN 385. Methods of Teaching Dance (K-12). 3 Credit Hours.
Content for teaching dance in a variety of settings including public school grades K-12. Required for dance minor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DAN 411. Modern Dance; Level Four. 3 Credit Hours.
Advanced study of modern dance technique and theatrical concepts.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 421. Ballet, Level Four. 3 Credit Hours.
Study of Classical ballet at an advanced level. Permission of Instructor
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 450. History of Modern Dance. 3 Credit Hours.
Study of development, philosophies, and theories of American and European modern dance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

DAN 493. Special Projects in Dance. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 494. Special Topics in Dance. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 550. Women in Theatrical Dance. 3 Credit Hours.
Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

DAN 585. Methods of Teaching Dance K-12 (Advanced). 3 Credit Hours.
An advanced study of the dance curriculum content in a variety of settings including public schools, grades K-12.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 593. Special Projects in Dance. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DAN 594. Special Topics in Dance. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 650. Women in Theatrical Dance. 3 Credit Hours.
Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

DAN 693. Special Projects in Dance. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 694. Special Topics in Dance. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 720. Embodied Movement Practices in the Performing Arts. 2 Credit Hours.
Embodied Movement Practices in the Performing Arts is a course which focuses on the functional and expressive use of movement for graduate music students. This course includes body conditioning (yoga, Pilates), body mechanics, injury awareness and prevention, expressive movement, stage presence, stage movement, and movement pedagogy as basic skills in the crafting of a well-rounded sense of musicianship. In addition, this course will teach music students creative approaches to incorporating movement theories such as Laban theory, Meisner technique, mindfulness, and other somatic practices.
Components: LAB.
Grading: GRD.

DAN 793. Special Projects in Dance. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DAN 794. Special Topics in Dance. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Dermatology (DER)

DER 600. Cutaneous Biochemistry, Cell Biology and Genetics. 3 Credit Hours.
This course will bring students to basic, fundamental and integrated sciences of human skin in biochemistry, cellular and molecular biology, and genetics. The course will cover various topics from skin cellular and molecular structure, function and biology, to their genes, DNA, RNA and protein, biochemical reactions, metabolism, and genetic processes that transmit biological information and regulation. This course will help students to understand the fundamental concepts on and connection between genes, structure and functions of human skin. The course is specifically designed and required for students who do not have strong background in human biochemistry and/or cell biology. Other students may elect this course to prepare for the subsequent vigorous studies in the MS degree program in Skin Biology and Dermatological Sciences. This is a hybrid course therefore students are required to attend campus-based classroom lectures (28 hours) and online sessions of live lectures or pre-recorded presentations (20 hours).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 601. Introduction to Dermatology. 1 Credit Hour.
The aim of the course is to familiarize participants with the basic subject of dermatology and the most common terminology. Students will be introduced to the subject of dermatology, subspecialties in dermatology, structure of the skin (basic anatomy and physiology), terminology (primary and secondary cutaneous lesions), and examples of the most common dermatological conditions.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 602. Skin Anatomy and Histology. 1 Credit Hour.
This course familiarizes students with the structure and morphology of the skin and its appendages. Students will be exposed to the basic aspects of skin anatomy and histology, of skin epidermis, dermis, dermal-epidermal junction and subcutaneous tissue, skin appendages of hair, sebaceous gland, sweat glands, and skin microvasculature and sensitive nerve endings, and to the relationships between structures, functions and diseases.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 603. Skin Biology and Pathophysiology. 3 Credit Hours.
This course helps students to understand the fundamental concepts on and connection between structure and function of the skin. The course will include biology of major skin cell types of keratinocytes, fibroblasts, endothelial cells, melanocytes and Langerhans cells. It will cover biology of skin metabolism, skin appendages, skin matrix, cutaneous vasculature, neuroendocrine system and major processes required for cutaneous barrier function during normal and pathophysiological states. Molecular and cellular mechanisms of cutaneous wound healing, matrix remodeling, tissue regeneration and skin ageing will be also included into coursework.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 604. Microbiology of the Skin. 1 Credit Hour.
This course covers skin microbiota/microbiome in health and disease, and bacterial species that cause most common skin infections such as Staphylococcus aureus (folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. It addresses bacterial biofilms and their importance in skin infections.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 605. Microbiology and Immunology of the Skin. 3 Credit Hours.
This course covers skin microbiota and immune components of the skin in healthy and disordered states. The microbiology will cover bacterial species that cause most common skin infections such as Staphylococcus aureus (folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. The bacterial biofilms and their importance in skin infections will also be addressed. The skin hosts the same immunocompetent cell types found throughout the body - T cells, B cells, macrophages, eosinophils, neutrophils, etc. - as well as its own skin-specific subpopulations-Langerhans cells, keratinocytes, and dermal dendrocytes. The second part of the course will cover the biology of immunology of the skin in normal functioning and underlying both intradermal allergic reactions and skin-specific autoimmune disorders ( alopecia areata, vitiligo, psoriasis), as well as the standard treatments for each. Further, this course addresses unique immune environments within the skin, such as the immune privilege of the hair follicle, and wound infection.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 606. Dermato-epidemiology. 2 Credit Hours.
Students will be introduced to the emerging discipline in skin epidemiology or Dermatooepidemiology, to obtain an overview of incidence rates and time trends of skin disorders in the US and in the world, learn biostatistical tools in data analysis including descriptive statistics, hypothesis testing, analysis of variance, and regression analysis. Students gain an appreciation for disparity in the disease outcomes among populations and various barriers contributing to current disparity. Students will also learn about various state and national registries for skin cancer and some other skin disorders available for database research.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
DER 607. Dermatopharmacology. 2 Credit Hours.
This course familiarizes students with the mechanisms of drug action, FDA-indications, off-label uses, safety and efficacy, side effects and necessary monitoring and important drug interactions relevant to topical and systemic medications used in dermatology. The course covers skin barrier and transdermal drug delivery (structure of the skin barrier, factors affecting the skin barrier, strategies to enhance transdermal drug delivery), major drugs used in dermatology including glucocorticosteroids, retinoids, antimicrobials, immunomodulators, agents used in oncology, hormonal therapy, other systemic medications (antimalarials, colchicine, dapsone, leukotriene inhibitors, antihistamines, thalidomide) and topic medications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 608. Photobiology and Photomedicine. 1 Credit Hour.
This course discusses fundamental concepts on photobiology and phototherapy with Ultraviolet light (UV) B, Excimer Laser, UV A, PUVA (psoralen + UV A), Photopheresis, and Photodynamic therapy. The course will cover photobiology, photochemistry and mechanisms of actions. Treatment protocols with clearing phase and maintenance phase, indications, adverse effects and complications, practice and techniques and future directions will be also included into coursework.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 609. Skin Carcinogenesis. 2 Credit Hours.
This course considers the etiology, pathophysiology, epidemiology, types, prognosis and various treatment of the most common types of skin cancers will be covered. Skin cancer is by far the most common type of cancer affecting the humans. More than 50% of all the cancers combined are skin cancers. The most common skin cancer is Basal Cell Carcinoma (BCC). The second most common type is Squamous Cell Carcinoma. One of the most serious form of skin cancer is Melanoma. There are other types of skin cancers that affect us. One in 5 Americans develop skin cancer during their lifetime.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 610. Clinical Skin Diseases. 2 Credit Hours.
This course gives students a clinical overview of the common skin disorders encountered by society. It discusses the most common skin diseases such as acne, seborrheic dermatitis, and xerosis, with an emphasis on pathogenesis, and current research in these conditions. Older treatments will be compared to newer treatments with respect to efficacy as well as cost to patients.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 611. Visualizing the Skin. 2 Credit Hours.
This course covers basic and advanced techniques of visual examination and digital photography of the skin and hair. Topics include macrophotography of the skin and scalp, dermatoscopy, processing of biopsies for histology, routine and special histological staining, microscopy with regular and special lights, immunohistochemistry and immunofluorescence, and recent advances of non-invasive methods of visualizing the skin in depth such as optical coherence tomography and in vivo confocal microscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 612. Grant Writing. 1 Credit Hour.
The course presents approaches and important aspects of preparation of some major grant applications to including government funding from National Institute of Health (NIH) such as Research grants (R formats) for academia and Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants for industries and grants from Department of Defense. Major sources, tools and policies for grant application and management will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
DER 613. Techniques in Skin Research. 1 Credit Hour.
This course will cover different areas of research techniques employed in studying skin biology/pathophysiology that span from in vitro cell based assays, ex vivo skin or reconstructed skin equivalents to in vivo animal models to study skin biology and skin diseases, and will integrate various molecular, cellular and tissue based methods. The course will balance multiple teaching methods from traditional didactics to individual and group “hands-on” laboratory experience and training. Its main approach will be using skin specimen (human or animal) as a major source and starting point. It will follow progression from simple methods (cell-based) to more complex (organotypic and tissue-based techniques) to in vivo animal models in pre-clinical trials. The course will also cover high throughput approaches in skin genomics, genetics and proteomics, and use and analysis of big data as well.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 614. Innovation in Dermatology. 1 Credit Hour.
The aim of this course is to familiarize the participants with the tools of innovation. It will cover the strategic processes of how to ideate, formulate, innovate and push through new ideas-from concept to implementation. This course will also cover the issues related to patent and how to protect the intellectual property.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 615. Dermatology Health Care Delivery. 1 Credit Hour.
This course prepares students for positions of leadership in skin care and skin health-related industrials and organizations. The course focuses on the educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. The course considers practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the skin care industry, with emphasizes in the development of business; technical, administrative, and leadership concepts as they apply to the clinical practice and skin care industry. TeleHealth, TeleDermatology and Clinical Outreach will also be discussed. This course considers the topics on the development of business, technical, administrative, and leadership concepts as they apply to the health care industry. Students will consider issues pertaining to animal use and protection and human subject in research, regulatory requirements and allied issues.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 622. Introduction to Dermatopathology. 1 Credit Hour.
This course is the continuation of the course DER 602 Skin Anatomy and Histology and or DER 603 Skin Biology and Pathophysiology. The aim of the course is to give students a general introduction to clinical histopathology in common skin disorders. The course will familiarize students with basic terms of histopathological changes in skin tissue, basic characteristic pattern recognitions, clinic-pathologic correlations, and histopathologic features of common skin diseases.
Prerequisite: DER 602 or DER 603.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 623. Techniques in Skin Research- II. 1 Credit Hour.
This course is the continuation of the course DER 613 Techniques in Skin Research-I. It will teach students how to approach and solve research problems with different strategies and methods. Various research models specific to skin research will be discussed including angiogenesis, aging, cancer, endocrinology, hair, itching and sensation, wound repair and tissue regeneration, therapeutic research in drug transdermal and systemic deliveries, and clinical skin disease research and therapeutic trials as well. Students will also consider issues pertaining to animal use and protection and human subject in research and allied issues.
Prerequisite: DER 613.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 631. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up with advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
DER 632. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students keep up to date in advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
 Components: LEC.
 Grading: GRD.
 Typically Offered: Spring.

DER 633. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students keep up to date in advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
 Components: LEC.
 Grading: GRD.
 Typically Offered: Summer.

DER 641. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
 Components: LEC.
 Grading: GRD.
 Typically Offered: Fall.

DER 642. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
 Components: LEC.
 Grading: GRD.
 Typically Offered: Spring.

DER 643. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows, and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
 Components: LEC.
 Grading: GRD.
 Typically Offered: Summer.

DER 661. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.
 Components: LAB.
 Grading: GRD.
 Typically Offered: Fall.
DER 662. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.

Components: LAB.
Grading: GRD.
Typically Offered: Spring.

DER 663. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.

Components: LAB.
Grading: GRD.
Typically Offered: Summer.

DER 670. Dermatology Clinical Shadowing. 1-3 Credit Hours.
This course will consist of shadowing with a clinical faculty dermatologist in clinics in the Department of Dermatology and Cutaneous Surgery at the University of Miami (minimum 2-3 hours per week for each credit hour). This course is for students who are interested in clinical dermatology or medicine. It will give students firsthand experience in clinical dermatology. Students will be rigorously monitored for progress by clinical faculty mentors. Student will be required to write a case report or present a case report at the end of the semester.
Prerequisite: DER 601.
Components: CLN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 700. Thesis. 1-6 Credit Hours.
A 6-credit research thesis course will be required for students who choose M.S. Thesis track. Research work will be performed in fall semester in the second year. For timing reasons, students will choose a mentor's lab by the end of the second semester and select a thesis proposal after rotation through 1-2 prospective mentors' labs. Students will be required to provide a proposal to a thesis committee drawn from members of program faculty. The major(ity) of these mentoring faculty are members of the UM Graduate Faculty with a track record of graduate level teaching, research funding, and/or have (had) graduate students in their labs. The thesis proposal should be written such that the data collection will be completed within one semester. Mentors will provide support for students with necessary reagents, supplies, and equipment, etc. needed for completion of the thesis project. The committee will monitor the student closely and will also identify an alternate lab, should the project did not make satisfactory progress within first two months. The committee will also evaluate by the end of the first year prior to the start of thesis work to determine if students have spent time rotation with prospective mentor's lab, evaluated the prospect of a project, and worked towards defining and completing a thesis project. A thesis requires an oral defense and a written paper evaluated and approved by the thesis committee convened for that purpose. The oral defense is open to the university community and the public. The student should distribute the thesis paper to the thesis committee for preliminary approval at least 10 days prior to the oral defense. The written paper should be of quality to be submitted for publication as first author or a co-author. Students may request to extend the length of thesis work and/or later date of thesis defense with the approval of the thesis committee and the program committee.
Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 808. Research Thesis. 1-6 Credit Hours.
A 6-credit research thesis will be required for students who choose the Thesis Path. For the timing reasons, students will choose a mentor's lab by the end of the first year and select a thesis proposal after rotation through 1-3 research labs (DER 661, DER 662, or DER 663). Students are required to conduct campus-based thesis research in the second year in the research laboratories with faculty mentors in the Department of Dermatology and Cutaneous Surgery. The length of the thesis research, including written thesis paper and oral defense, usually takes 12 months. Students need to discuss with their thesis mentor research topic, thesis committee, duration and expectation.
Prerequisite: DER 661 or DER 662 or DER 663.
Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
Economics (ECO)

ECO 211. Principles of Microeconomics. 3 Credit Hours.
Fundamental course devoted to the development and application of basic analytical tools and principles required for an understanding of major economic problems and policy alternatives available for their solution. A particular emphasis is devoted to microeconomic analysis. Topics include the study of markets under varying conditions of competition, including market deficiencies such as pollution, prices, and resource allocation distribution of income, including poverty problems, the economics of the firm and the government, and international economic relations.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 212. Principles of Macroeconomics. 3 Credit Hours.
Fundamental course devoted to macroeconomic analysis. Topics include national income and employment analysis, money and banking, economic growth, and comparison of different economic systems, including the problems of developing the less developed world.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 213. Principles of Economics. 4 Credit Hours.
This course introduces the study of the economic behavior of individuals, firms, and markets; as well as the analysis of the economy as a whole, both in terms of short-run fluctuations (the business cycle) and long-run determinants of economic growth.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 300. Microeconomic Theory and Applications. 3 Credit Hours.
Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition. It focuses on the process of decision-making by individuals and firms, and the welfare consequences. Special attention is devoted to economic applications.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 301. Macroeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.
Prerequisite: ECO 212, MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 302. Microeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition, as well as in the determination of wages, rent, interest, profits, and public policy.
Prerequisite: ECO 211 or ECO 213 and MTH 141 or higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 303. Macroeconomic Theory. 3 Credit Hours.
Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.
Prerequisite: ECO 212 or ECO 213 and MAS 110 or MTH 130 or MTH 141 or Higher.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ECO 307. Public Economics. 3 Credit Hours.
This course studies the role of governments in the economy by surveying several topics in public finance and public policy; it is designed to be a link between the theory and several policy-relevant applications. Students will acquire the microeconomic tools and techniques to identify, analyze, and solve public policy and political economy problems. Students will also learn to apply the theory to current events such as the policy debates over social security, health care, education, and tax reform. Selected topics: budget analysis and scoring; correction of externalities and provision of public goods; public choice theory and government failure; fiscal federalism and redistribution; role of government in education, social security, and health care; income distribution and welfare programs; optimal taxation and tax inefficiencies; taxes on labor supply, savings, capital gains, and business income; fundamental tax reform and consumption taxation. This is an elective class addressed to economics majors, minors, and any student with an interest in the topics.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 311. Labor Economics (I). 3 Credit Hours.
Course surveys the structure and functioning of labor markets. Topics include determinants of labor supply and labor demand, economics of wage differentials, economic impact of labor unions, discrimination in labor markets, and the labor market effects of various government policies such as payroll and income taxes, educational subsidies, and minimum wage laws. The central goal of the course is to provide the student with a framework for analyzing diverse issues related to the labor sector of the economy.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 333. Industrial Economics and Public Policy. 3 Credit Hours.
This course surveys several topics in industrial economics, regulation, and antitrust; it is designed to be a link between the theory and several applications. Students will acquire the microeconomic tools and techniques to identify, analyze, and solve industrial economics and government competition policy problems, and will learn to apply the theory to many real-world markets and current economic events. Selected topics: price discrimination; product differentiation; advertising; network effects; consumer search and digital markets; auctions; bargaining; vertical restraints and mergers; collusion and cartels; innovation and intellectual property; natural monopolies and regulation; and antitrust policies. This is an elective class addressed to economics majors, minors, and any student with an interest in the topics.
Requisite: ECO 300 OR ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 345. Environmental Economics. 3 Credit Hours.
This course determines the appropriate way to regulate economic activity so as to achieve an optimal balance between competing environmental and economic goals. Economic reasoning is used to evaluate causes and consequences of environmental problems. The course rigorously evaluates various types of environmental regulation, including "cap-and-trade," command and control mandates, and pollution taxes. Other specific topics include public goods, externalities, cost benefit analysis, non-market valuation, and international trade and development and the environment.
Prerequisite: ECO 211 or ECO 213.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 351. Economics of Development. 3 Credit Hours.
This course studies factors underlying economic development, measures of and goals for development, principles applicable to problems of development, the role of markets and planning in development, social, cultural, and political factors affecting economic development, and comparative rates of progress in different countries.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 371. Latin America and the Global Economy. 3 Credit Hours.
An analysis of the historical growth of major Latin American countries, with emphasis on the post World War II period. Topics include industrialization, foreign investment, international trade and regional integration, agrarian reform, inflation, and development strategies and planning within the context of Latin America.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECO 379. The Political Economy of Growth. 3 Credit Hours.
This course studies the causes of economic growth such as geography, culture, institutions, human and physical capital, as well as technology. It examines the role they play in the development process, casting light in their order of importance for growth and into which growth determinants are amenable to policy change.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 386. Health Economics. 3 Credit Hours.
The course applies the tools of microeconomic analysis to the health care sector. It examines how models of demand and supply apply to the health care sector in general, and in particular to the health insurance, the hospital, the physicians, and the pharmaceutical sectors. By examining the actors and issues in this market, students are able to discuss policy issues from an economic perspective.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 403. Monetary Economics. 3 Credit Hours.
Analysis of the role of money in economic affairs. Topics include the determinants of the money supply and interest rates, money and prices, money and stability, and growth. Emphasis is placed on current problems and policies.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 420. Economic Growth. 3 Credit Hours.
Course covers selected topics in economic growth. Topics include stylized facts associated with economic growth, the theoretical study of economic growth, and empirical tests of those theories. Course work is supplemented by case studies of individual countries, particularly developing countries.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 430. Applied Econometrics. 3 Credit Hours.
This course introduces basic econometric techniques for analyzing economic data. The goal is to make students sophisticated consumers and skilled producers of empirical analysis, which will be attained by extensive work on a variety of real-world data like students' test scores, CEO wages, mortgage applications, cigarette demand, stock market capitalization, inflation, GDP and interest rates. Learning how to use econometric analysis software is an integral part of the course.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 441. International Trade Theory. 3 Credit Hours.
Study of the principles of comparative advantage and the gains from international trade. Analysis of tariffs, quotas, and protectionism is included.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 442. International Monetary Economics. 3 Credit Hours.
Analysis of models of the exchange rate, the balance of payments, and monetary policy in an open economy.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 443. Economic Analysis of Energy and Commodity Markets. 3 Credit Hours.
This course explores the principles of energy economics, commodity markets and advanced macroeconomics. It discusses the main trends in energy production and consumption, the methods of analysis in energy and commodity markets, and the main challenges in the energy sector. The analysis of oil prices and the economics of oil exporting countries is emphasized.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECO 444. Game Theory in Economic Applications. 3 Credit Hours.
This course is an introduction to the techniques and questions of modern microeconomics. The course will expose you to the techniques of game theory, the workhorse of modern microeconomics, and will apply those techniques to the analysis of a variety of economics situations and institutions.
Prerequisite: MAS110 or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 445. Global Economics: Trade and Currencies. 3 Credit Hours.
In this course, students are exposed to two fundamental topics which are primordial to the understanding of any economic, political and/or social circumstance in any given country at any given time: (1) The evolution and meaning of the business cycle and capitalism, and (2) The effect of international trade and currencies. These two themes have sparked debates for centuries as they have great implications in the development of countries. Also, this course challenges students' critical thinking and analytical skills with a wide range of controversial readings on these two topics. This course is divided into four sections. The first one introduces students to the idea of the business cycle. The second section aims at explaining how capitalism was born and how it has evolved in the 19th and 20th centuries. Then, the course centers on explaining capitalism today and presents criticisms. And finally, students analyze how the business cycle and capitalism has unfolded and affected certain countries in Latin America.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECO 460. Industrial Organization. 3 Credit Hours.
This course shows how microeconomic theory can be used to understand the diverse practices encountered in real-world markets between the extreme cases of perfect competition and monopoly. Topics to be covered include strategic pricing behavior, collusion, advertising and information, vertical integration, vertical restraints, regulation and a review of empirical literature.
Prerequisite: ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 496. Directed Studies in Economics. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 497. Directed Studies in Economics. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 498. Special Topics in Economics. 3 Credit Hours.
Special topics in selected non-STEM areas of Economics.
Prerequisite: ECO 300. Or ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 499. Special Topics in Economics. 3 Credit Hours.
Special topics in selected STEM areas of Economics.
Prerequisite: ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECO 510. Mathematical Economics and Applications. 3 Credit Hours.
The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 511. Empirical Labor Economics. 3 Credit Hours.
A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.
ECO 430.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 512. Topics in Mathematical Economics. 3 Credit Hours.
This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world economic applications are examined.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 520. Econometrics. 3 Credit Hours.
Statistical methods of estimating and testing mathematical model of economic relationships.
Prerequisite: ECO 211 or ECO 213 and MAS 110, or MTH 130 or MTH 141 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 521. Advanced Macroeconomic Theory. 3 Credit Hours.
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.
Prerequisite: ECO 301 or ECO 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 532. History of Economic Thought. 3 Credit Hours.
Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory.
Prerequisite: ECO 213 or ECO 211 and ECO 212.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 533. Advanced Microeconomic Theory. 3 Credit Hours.
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.
Prerequisite: ECO 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 555. Economics Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Economics.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.
ECO 600. Econometrics. 3 Credit Hours.
Statistical methods for estimating and testing mathematical models of economic relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 601. Graduate Macroeconomic Theory. 3 Credit Hours.
The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 602. Advanced Microeconomic Theory. 3 Credit Hours.
An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 603. Monetary Theory and Policy. 3 Credit Hours.
Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 604. Topics in Applied Macroeconomics. 3 Credit Hours.
Course acquaints students with current substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 610. Mathematical Economics and Applications. 3 Credit Hours.
The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 611. Labor Economics (III). 3 Credit Hours.
The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 612. Economic Strategies for Firms and the Industry. 3 Credit Hours.
This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world applications are examined.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECO 613. Microeconomics of Sustainability. 2 Credit Hours.
The course examines production and costs from a sustainability perspective, emphasizing the tradeoffs associated with reducing energy and other natural resources in production processes. Conditions under which reducing natural resources while using more of other inputs reduces total costs without sacrificing production are derived. Extensions are studied in which the same conditions are derived under a more general definition of costs which includes the costs of natural resource use to society and to brand reputation. The course then examines consumer demand for energy efficient products, emphasizing financing arrangements which allow the household to avoid the up-front fixed costs of energy efficient durable goods. Finally, the course examines externalities: actions by the firm which impose costs or benefits to society in a way which is not accounted for by prices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 614. Valuing Public Goods. 2 Credit Hours.
While the costs of becoming more sustainable are relatively straightforward for the firm to quantify, the benefits to society (social benefits) are more difficult to determine. Nonetheless, assessing how clientele and other external stakeholders value sustainable practices is important if firms are to prioritize their efforts. This course will introduce students to the world of non-market valuation: the valuation of goods and services for which no true market exists with prices to reveal how much consumers are willing to pay. This class will provide a solid foundation for any manager to begin to understand how to appropriately value sustainable practices, enabling the firm to choose projects that provide the most social benefit net of implementation costs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 615. Managing Regulation Compliance. 2 Credit Hours.
Sustainability initiatives must be integrated with a complex set of government regulations. Regulation systems such as standards, tradeable permits, and taxes are analyzed from the firm's point of view. Regulation systems are also studied when compliance costs are uncertain or changing over time. Many modern regulation systems allow firms to earn credits by over-complying, which can be sold or banked for future use. The course will study compliance/credit management, including over the business cycle and when regulation changes over time. The value of compliance/over-compliance to the firm's brand and to society/external stakeholders is integrated into the optimal compliance decision.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 616. Sustainability and Market Dynamics. 2 Credit Hours.
The course studies the impact of sustainability initiatives on the organization of firms in the market. The course derives conditions under which sustainability initiatives favor market entrants over incumbent firms and the reverse. The course studies the use of sustainability initiatives by firms to segment the market. The value of sustainability initiatives in oligopolistic versus competitive markets are also studied. Finally, the value of sustainability initiatives to external stakeholders and to the firm's brand is integrated with the benefits and costs of changes in the competitiveness of the market resulting from the sustainability initiatives.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 617. Enterprise Risk Management. 2 Credit Hours.
Tools for the measurement and mitigation of risk are developed. Measurement tools include value at risk measures, expert opinion, and the use of market prices. Mitigation tools include catastrophe bonds, derivatives such as weather derivatives, and adaptations (building resilience). Risks that are relevant to sustainability, such as fat tailed risk and environmental catastrophes, are emphasized. The value of environmental risk reduction to the firm and society are derived.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 620. Advanced Econometrics. 3 Credit Hours.
Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 621. Advanced Macro Analysis. 3 Credit Hours.
Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECO 625. Applied Econometrics. 3 Credit Hours.
Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable modes, pooling cross section and time series data, model selection, and rational expectations models.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 633. Advanced Micro Analysis. 3 Credit Hours.
Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 634. Advanced Micro Analysis II. 3 Credit Hours.
Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 645. Regulations Economics. 3 Credit Hours.
This course examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 675. Latin America and the Global Economy. 3 Credit Hours.
Analysis of the economic, political, and social forces at work in the changing economies in Latin America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECO 680. Essentials of Economics. 2 Credit Hours.
This course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure. Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 685. Managerial Decisions in a Global Economy. 2 Credit Hours.
Modern techniques of economic analysis and decision science are applied to the management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 690. Essentials of Economic Theory. 3 Credit Hours.
An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 691. Managerial Economics. 3 Credit Hours.
Application of economic analysis to the formulation and solving of management problems and the determination of business policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECO 692. Applied Economics. 3 Credit Hours.
This course is to provide practice in applying economic principles for graduate students with a basic understanding of economic theory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECO 693. Applied Managerial Economics. 1 Credit Hour.
Managerial Economics is the application of economic theory to decisions made by firms and managers. This course approaches managerial economics from the point of view of a data driven manager or firm, seeking to apply economic theory to business decision making. The course starts by teaching students how to use data on costs, sales, and pricing available at any firm to compute key metrics that needed to apply economic theory to business decision making. Students will learn data-driven methods to make key business decisions, such as how much to produce, what price to charge, and advanced pricing strategies such as up-charging and price discrimination. Students will learn how to make these decisions in both competitive and imperfectly competitive industries. Given the explosion of data being collected in many industries, companies are increasingly focused on combining economic theory and data to make better decisions. Indeed, many firms such as Google and Microsoft are now have in-house economics departments (as well as economists who work at investment banks and consulting firms) to advise on such decisions. Because in general these very fundamental decisions are made by higher level executives, economics becomes critically important for CEOs and other senior executives. This is one reason why economics is the most common major among Fortune 500 CEOs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 694. Game Theory and Economic Strategy. 1 Credit Hour.
Game theory is a powerful tool for making strategic decisions. This course teaches students how to use game theory to make better strategic decisions. The setting is a small group of firms (e.g. Apple and Samsung) or managers (e.g. a small team). In such settings, managers must anticipate decisions by others and react accordingly, and anticipate how others will react to their decisions. Game theory teaches students how to anticipate decisions by others, which allows for better strategy. The course will teach game theory tools for cases when managers make decisions simultaneously, when managers make decisions sequentially, and cases where managers have incentives to make their decisions hard to predict. Strategic decisions analyzed include price competition, market segmentation, market entry/exit, flash sales, cartels and collusive behavior, strategic inventory decisions, entry deterrence, and many others.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECO 695. Global Economics. 2 Credit Hours.
This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ECO 698. Selected Topics. 1-3 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECO 699. Directed Study. 1-3 Credit Hours.
Graduate-level supervised readings, individual research project or independent investigation of selected economics problems. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECO 750. Applied Economics: IO. 3 Credit Hours.
The first part of the course will focus on static analysis of market outcomes. The emphasis will be on empirical work, and there will be a number of places where we take digressions into econometric and computational issues. The second part will focus on related fields (bargaining, auctions and market design), and then move on to dynamic analysis in I.O. (both single and multiple agent dynamic models).
PRE-REQUISITE: ECO 602 AND ECO 633.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECO 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECO 860. The Theory of International Trade. 3 Credit Hours.
This course presents rudiments in trade theory and open macroeconomics. International arbitrage as well as determination of the values of currencies and stocks.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

Ecosystem Science and Policy (ECS)

ECS 111. Introduction to the Earth's Ecosystem. 3 Credit Hours.
Earth's ecosystems and the interactions of humans with them. Concepts in ecology, environmental science and policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 112. Field Problems in Ecosystem Science and Policy. 2 Credit Hours.
Problem solving in ecology and environmental management. Class projects and case studies providing experience in identifying problems, quantifying scientific issues and considering management options and outcomes. Extensive field experience.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 113. Introduction to Environmental Policy. 3 Credit Hours.
Theories and case studies from various fields, including anthropology, economics, ethics, geography, political science and psychology, will be used to explore the multiple perspectives that influence group and individual perceptions of environmental issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 195. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 196. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 197. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 198. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 199. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 201. Seminar Series in Contemporary Environmental Issues I. 1 Credit Hour.
Current environmental topics involving interaction of science and policy.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
ECS 202. Seminar Series in Contemporary Environmental Issues II. 1 Credit Hour.
Current environmental topics involving interaction of science and policy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 204. Environmental Statistics. 3 Credit Hours.
An overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 215. Introduction to Private Urban and Suburban Green Spaces. 1 Credit Hour.
Faculty supervised research & application projects in indoor, urban, and suburban green spaces. Topics of focus include green walls, roof gardening, edible gardening, permaculture, sustainable gardening, composting & vermiculture, gardening for wildlife, and backyard ecology. No previous ecology or gardening experience required.
Components: FLD.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 232. Ecological Principles and Environmental Applications. 3 Credit Hours.
Overview of the science of ecology and its basic principles. Covers aspects of organismal ecology (including population genetics, structure, growth and regulation; adaptations and responses to the physical environment and biological communities); community ecology; and ecosystems (including energy flow, biogeochemical cycles, and biomes). Students will learn to apply ecological principles to understand and solve environmental problems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 272. Special Topics in Ecosystem Science and Policy. 1-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 295. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
For courses taken at other institutions that have no equivalents here.
Components: LEC.
Grading: GRD.

ECS 296. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
For courses taken at other institutions that have no equivalents here.
Components: LEC.
Grading: GRD.

ECS 297. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
For courses taken at other institutions that have no equivalents here.
Components: LEC.
Grading: GRD.

ECS 298. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.
For courses taken at other institutions that have no equivalents here.
Components: LEC.
Grading: GRD.

ECS 301. Tools for Environmental Decision-Making: The Quantitative Perspective. 3 Credit Hours.
Quantitative decision-making techniques and methodologies.
Prerequisite: ECS 111 and ECS 112. or Requisite: Plan of ECS.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECS 302. Perspectives on Environmental Decision Making. 3 Credit Hours.
Techniques for assessing human impacts on the environment. Covers approaches from law, ethics, anthropology and includes cases involving local, regional and global environmental management issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 309. Microbes and the Environment. 3 Credit Hours.
This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 310. Sustainable Living. 3 Credit Hours.
Sustainable Living explores ways of living that can be sustained for thousands of years, without further damage to earth, ocean and atmosphere. Topics covered include renewable energy, agricultural practices, water issues, green building, low carbon transportation and healthy living/eating. Students advocate for sustainable practices of their choice in writing and in oral/visual presentations. Frequent field trips.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 312. Environment Assessment. 3 Credit Hours.
Execution of environmental due diligence in the context of property transactions and land and water pollution in a technical, regulatory, and legal framework, including how client advocacy and regulatory detail influence project design.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 323. Population, Sustainability, and the Media. 3 Credit Hours.
Explores opposing views of population growth and environmental sustainability through the media and cinema: contrasts "Doomsters" who believe population growth and resource consumption threaten human survival and pro-growth "Boomsters" who believe human ingenuity and technology will continue to allow humankind to prosper.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 324. You & Your Microbiome. 3 Credit Hours.
Recent advances in immunology, genetic manipulation and the microbiome; consequences on emerging notions of personalized health and medications; the creation of tailored therapies against cancer; implications for cost of healthcare and politics of medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 325. Hazards and Disasters: The Nature-Society Interface. 3 Credit Hours.
Borrows from themes in Geography, Urban Planning, Anthropology and Policy Studies to explore how human-environmental interactions determine the distribution, causes and consequences of natural hazards and disasters.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 332. Ecology and Land Use in the Galapagos. 3 Credit Hours.
Fundamental principles of ecology manifested on Isla Isabela will be employed to evaluate land usages including subsistence and production agriculture, animal husbandry, fuel wood and timber, and conservation with ecotourism. Habitats, flora, and fauna from the vicinity of Puerto Villamil to the rim of Volcán Sierra Negra; analysis of agricultural practices and problems of the mist zone on this volcano’s southeastern flank.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECS 335. Biodiversity in Peru. 3 Credit Hours.
The focus is on developing skills to analyze and value the components of biodiversity, identifying its potentials and the tools to make sustainable use and conservation possible.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 337. Latin America and the Environment. 3 Credit Hours.
Theoretical dimensions of current environmental challenges in Latin America and examines their ecological, social, economic, and political dimensions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 342. Decision-Making and the Environment. 3 Credit Hours.
Provides a comprehensive overview of the art and science of decision modeling in natural resources policy management. Students learn to understand and develop basic decision models, interpret the results and communicate them to non-analytical decision makers.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 345. Economics of Natural Resources and the Environment. 3 Credit Hours.
A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as “maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time”. We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 352. Environmental Ethics. 3 Credit Hours.
Theoretical and practical issues in the field of environmental ethics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 357. Global Food: A Hands-On Approach. 3 Credit Hours.
Application of principles of permaculture via designing and creating a small "global farm" on campus to grow perennial food crops which are unique to the South Florida environment. We learn by doing, cultivating plants that hold the solution to world hunger problems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 360. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 361. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 362. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 363. Readings in Ecosystem Science and Policy. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECS 371. Readings in Ecosystem Science and Policy. 1-2 Credit Hours.
Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 372. Special Topics in Ecosystem Science and Policy. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 373. Topics in Ecosystem Science. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 374. Topics in Environmental Policy. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 375. Topics in Environment and the Humanities. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 376. Topics in Environmental Communication. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 377. Topics in Environmental Economics and Development. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 379. Special Topics in Ecosystem Science and Policy. 1-4 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 380. Field Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 381. Field Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.
Components: FLD.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECS 385. Civic Engagement in the Galapagos. 3 Credit Hours.
This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. This field course offers you a rare chance to examine human interactions in a highly politicized landscape of conservation. You will learn historical development and contemporary issues of Latin America from an interdisciplinary perspective, through the cultural, political and social lens of the Galapagos
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 391. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 392. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 393. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 394. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 395. Studies in Ecosystem Science and Policy. 1-4 Credit Hours.
(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.
Components: LEC.
Grading: GRD.

ECS 401. Internship. 3 Credit Hours.
Students selecting the internship will be required to spend a minimum of 120 contact hours working in an outside firm or agency whose mission is to address environmental issues where science and policy intersect.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 402. Thesis. 3 Credit Hours.
Individual, original research of independent study supervised by a UM faculty member and concluded by formal thesis preparation, public oral defense and submission of the thesis.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 403. Interdisciplinary Approaches. 3 Credit Hours.
Students with diverse disciplinary backgrounds will design an interdisciplinary study focused on an environmental problem with a major science component and significant societal implications. Students will apply quantitative methods, formulate usable policy, and communicate their results.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 405. Applied Research in Ecosystem Science and Policy. 1-3 Credit Hours.
Faculty-mentored applied research in environmental topics. Projects in natural ecosystems, sustainable design and business, and communication of environmental issues.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECS 415. Research in Private Urban and Suburban Green Spaces. 1 Credit Hour.
Faculty supervised research & application projects in indoor, urban, and suburban green spaces. Topics of focus include green walls, roof gardening, edible gardening, permaculture, sustainable gardening, composting & vermiculture, gardening for wildlife, and backyard ecology.
Requisite: ECS Major or ECS Minor or Prerequisite: ECS 215.
Components: FLD.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 432. Ecology in the Galapagos. 3 Credit Hours.
Organisms in relation to their environment, with a focus on interactive hands-on learning experiences that connect empirical nature with abstract thinking. Lectures, discussion and field work will help students begin to understand ecosystem ecology, plant dispersal and colonization, organisms' responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 433. Conservation in Practice. 3 Credit Hours.
Intersection between economic development, science and conservation in one of the world's most pristine and fragile ecosystems. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs, and cultures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 485. Political Ecology of the Galapagos. 3 Credit Hours.
This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. Throughout the term, you will engage in civic activities identified in consultation with the people, government and public health facilities of the small, rural village of Villamil, the sole habitation on Isla Isabella. A major aim is to nurture the mutual respect and understanding across the cultural divide that is necessary to make a difference in the civic life of a community.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 501. Interdisciplinary Environmental Theory. 3 Credit Hours.
Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.
Requisite: Plan of Ecosystem Science and Policy.
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

ECS 503. Interdisciplinary Environmental Methods. 3 Credit Hours.
Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.
Requisite: Plan of Ecosystem Science and Policy.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ECS 507. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.
Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.
Requisite: Plan of Ecosystem Science and Policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECS 515. Private Green Space Management. 3 Credit Hours.
Students plan and manage ongoing and proposed green space projects. Student managers work with supervising faculty; also organize and educate
student volunteers and students concurrently enrolled in ECS 215 and 415.
Prerequisite: ECS 415.
Components: FLD.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 572. Special Topics in ECS. 0-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 580. Field Studies. 1-4 Credit Hours.
This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of
environmental issues and conservation concerns.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECS 601. Interdisciplinary Environmental Research: Introduction to the Why and the How. 3 Credit Hours.
The why and the how of developing and implementing interdisciplinary environmental research; research objectives and design choices informed
by philosophies of knowledge and policy relevance. Assignments include development of research questions, a preliminary literature review, a draft
dissertation proposal, and oral communication of research. Course is structured around peer critique and discussion of work in progress.
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

ECS 603. Interdisciplinary Environmental Methods. 3 Credit Hours.
Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media,
Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and
methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and
quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.
Requisite: Plan of Ecosystem Science and Policy.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ECS 605. Interdisciplinary Environmental Law and Policy. 3 Credit Hours.
Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with
comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies
will cover authorization, appropriations and over-sight functions of Congress and state legislatures; the role of the executive, federal and state, in
initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in
resolving disputes and advancing or thwarting environmental policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 607. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.
Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm.
Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics,
political science, and anthropology.
Requisite: Plan of Ecosystem Science and Policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 608. Interdisciplinary ECS Seminar.. 1-3 Credit Hours.
Seminar centering on research and case studies illustrating cutting edge human- environment research, and including both qualitative and quantitative
methods. Intensive reading and writing related to relevant topics in the field.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
ECS 609. Contemporary Representations of the Environment. 3 Credit Hours.
This course will combine media studies, environmental studies, and critical theory to give students a broad introduction to ways in which screen media are used today to represent both the natural world and also environmental issues such as climate change, animal extinction, and natural resource use. From more conventional media such as feature fiction films (e.g. Wall-e, The Day After Tomorrow, Avatar), documentary films (e.g. An Inconvenient Truth, HBO’s Gasland), and television news coverage, to more niche formats like Google Earth’s global mapping and in-dash monitors that depict mile-per-gallon, screen technology has long been and is increasingly used to mediate our relationship with surrounding ecosystems. Students will look at mainstream television channels (e.g. Discover, National Geographic, and the Weather Channel) alongside the digital campaigns of agencies and institutions directly aimed at conservation efforts, including the ecotourism industry, non-profit environmental groups, and governmental bodies such as the National Parks Service. In addition, this course will investigate the increasing role of interactive media in museums and science centers, as well as the rising power of social media in disseminating news regarding environmental issues.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 610. Technology and Human Behavior. 3 Credit Hours.
This course will explore the social aspects of technology use and cultural adaptation through cross-cultural ethnographic research on science and traditional beliefs. From the adoption of chainsaws in Amazonian forestry to the use of smart watches in Japanese cities, technological choice will be examined through psychological theories of behavior, socio-cultural perspectives, and institutional and economic forces. Reflecting the rising social, cultural, scientific, and political importance of emerging digital culture (e.g. virtual reality, smart devices, artificial intelligence), a key focus of the second half of the course will focus on philosophical notions of post-human cyborgism. Students will be introduced to recent research on the cognitive issues of social media use and consumption, including social media addiction and other neurological impacts of chronic screen use. Coursework will connect historical understandings and larger social analysis of digital media use and encourage students to participate in an ongoing exploration of their own technological choices and media practices. Students will also be exposed to multidisciplinary theories and research on risk perception and the psychology and effectiveness of environmental messaging in order to address how various media technologies impact individual and collective thinking and action.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 611. Nature, the Anthropocene, and Visual Culture. 3 Credit Hours.
Different cultural and historical contexts have conceived of humanity’s relationship to the natural world in vastly different ways, from ‘sacred and part of’ to ‘separate from’ and ‘steward over.’ A culture’s techniques of representation, use of imagery, and ways of seeing are a key part of the shaping of its worldview and cognitive framework of shared ideas and beliefs. This course is an opportunity for students to use an anthropologist’s eye to actively engage with the human production of knowledge about the natural world through visual culture. Rather than approaching visual anthropology with its usual divide between ‘anthropological content’ and ‘aesthetic composition,’ this course will foster both approaches as it examines human perceptions of the environment from prehistoric cave paintings to modern day street art. Key elements of visual anthropology will be introduced, including symbols and symbolism, reflexivity, visual data of everyday life, art analysis, ethics, society-as-text paradigm, urban visual data, and ways of conceiving systems of visual representation. Representations of Other will be analyzed through theories of the exotic, gender, race, post-colonialism, nationalism, and heritage studies.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 612. Environmental Communication, New Media, and Policy. 3 Credit Hours.
Facebook and Twitter to the rhetorical essay documentaries that have waged ideological wars over the past twenty years, screen and new media are an increasingly powerful force in the shaping of policy, political awareness, and popular ideological views of the environment. This course will draw on critical approaches of media theory, rhetoric, and political science to study and interpret the political use of visual media. Just as FDR’s WPA used film to propagandize the agricultural importance of public works, and Hollywood has been harnessed for ecological causes from natural conservation to climate change, today screen and digital media (e.g. television commercials, podcasts, social media blasts) are the driving force of PR campaigns for both governmental bodies and private companies that greatly impact environmental understanding and policy. From information to misinformation, viral content streams constantly onto screens across the world, whose apps are also used for activism and citizen science—students will look at what strategies of circulation and rhetoric are used to wage digital campaigns to communicate and shape ecological values and policy.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 615. Environment, Culture, and Media Internship. 3-6 Credit Hours.
This course is for hands-on experience and research culminating in a final Master’s internship report. Students will enroll in 3-6 credits while completing their internship and researching their final project for the ECM Masters of Professional Science.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
ECS 672. Special Topics in ECS. 0-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 680. Field Studies. 1-4 Credit Hours.
This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ECS 725. Problems in Environmental Science and Policy. 1-6 Credit Hours.
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
Requisite: Plan of Ecosystem Science and Policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 790. Directed Readings. 1-3 Credit Hours.
Individually supervised readings on special topics. Offered by arrangement with the instructor. May be retaken for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 814. Environment, Culture, and Media Thesis. 3-6 Credit Hours.
This course is for research culminating in a Master's thesis. Students will enroll in 3-6 credits while researching and writing their final project for the ECM Masters of Arts.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECS 820. Master's Research. 0-9 Credit Hours.
Individual study for students exiting the doctoral program without a successful dissertation proposal.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ECS 830. Pre-Candidacy Research. 1-9 Credit Hours.
Research for ECS Ph.D. students who have not attained candidacy.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 840. Doctoral Dissertation. 1-12 Credit Hours.
Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 13 credits total. No more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ECS 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
Educational and Psychological Studies (EPS)

EPS 201. Psychosocial Change and Well-being. 3 Credit Hours.
Introduction to personal and interpersonal approaches to well-being. Includes theoretical, historical, philosophical, and psychological bases of well-being. Emphasis will be placed on real-life applications of theory and practice to the promotion of psychosocial change and well-being.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 270. Lifespan Human Development. 3 Credit Hours.
Processes and theories of human development from birth to old age are explored. Areas to be covered include: physical development, cognitive development, social and personality development, moral development, and language development. Emphasis is placed on development as a life-long process and its importance in understanding human behavior.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 280. Introduction to Family Studies: Dating, Coupling, Parenting. 3 Credit Hours.
Theory and practice of romantic relationships and parent-child relationships, including discussion and skills building. Research based information on how to maximize the quality of these interpersonal relationships will be examined.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 291. Community and Character Development. 3 Credit Hours.
The course covers moral and psychological dimensions pertaining to character development as it occurs in communities. Topics include contemporary theory and research regarding perspectives on virtue and morality, states of character, ethical decision making, and character development. The reciprocal relationships between character and community will be a central theme in exploring ethical issues that arise in working with individuals, institutions, and communities. The theory and research will be linked to relevant applications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 306. Insanity and Humanity: Mental Illness, Society, Stigma and Services. 3 Credit Hours.
The genesis for this course was the generally poor, inaccurate and stigmatized understanding of mental illness in society based on portrayals in popular media including Hollywood produced films. However, over the past several years the depth and accuracy of awareness and knowledge has changed, as the depiction of mental illness and treatment services in films has improved and the availability of narrative accounts has increased. This course is designed to allow Human and Social Development majors, with a particular interest in wellness and human services, to explore varying portrayals of mental illnesses in popular media. The course will foster critical analysis of narrative and film depictions of illness, as well as connect these depictions to a broader narrative on stigma, social determinants of illness and wellness, prevention and intervention.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 311. Group Processes and Development. 3 Credit Hours.
Research findings concerning the nature of small groups and patterns of behavior associated with them are explored. Students experience an ongoing group process to which theories and concepts can be applied. Emphasis is placed on learning to be a participant observer of group behavior and processes, learning about one’s own behavior in groups, and developing skills to be a more effective member and leader in task groups.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 321. Understanding Human Service Organizations. 3 Credit Hours.
Focus on unique role of community-based human service organizations in society with an overview and history of community organizations, which provide services, support, advocacy, and organizing in today’s communities. Review of the systems, cultures, structures, and processes of community organizations with a special emphasis on promoting well-being in communities. This course has a 10 hours field research experience requirement. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.
Prerequisite: EPS 201 or Co-requisite: EPS 311.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 340. Psychology and Sociology of Sexual Identity. 3 Credit Hours.
History, psychology, and sociology of gay, lesbian, and transgendered populations.
Prerequisite: PSY 110 or SOC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 351. Introduction to Statistics and Research Design. 3 Credit Hours.
The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 360. Educational Psychology. 3 Credit Hours.
A review of basic educational psychology principles including cognitive and language development, personal, social and moral development, learning theories, and motivation. A review of basic concepts that contribute to effective learning and other aspects of education.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 361. Community Psychology and Development. 3 Credit Hours.
Community psychology is about the prevention of psychosocial problems and the promotion of mental health and well being through the creation of equitable and just social settings, neighborhoods, communities, and societies. Course topics include: stress and social support; oppression and human diversity; primary prevention, social intervention and health promotion; self-help; mediating structures; community mental health; alternative settings; community development and social change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 365. Psychological Study of Children, Families, and the Law. 3 Credit Hours.
This course will introduce students to the psychological research and practice that has a bearing on legal policy and practice. Psychological research (social, clinical, developmental, and community) will be emphasized along with legal rulings, especially from the Supreme Court. Throughout the course, the underlying question will be, "How can psychological research and theory inform the law in matters that relate to children, families, and communities?"
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 371. Applied Social Research Methods. 3 Credit Hours.
The study of the ethics, philosophies, designs, methods and techniques of research in the behavioral and social sciences. This course provides a brief orientation to quantitative, qualitative, mixed-methods, and participatory research designs and approaches used in the collection, analysis and interpretation of social research data. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 411. The Psychology of Diversity. 3 Credit Hours.
This course critically examines how diversity and social justice issues impact everyday life. The focus is on how personal, group, and cultural identities (race, ethnicity, gender, sexual orientation, age, disability, religion, immigration status, and social class), and the intersections of these identities influence individuals' lives and experiences. This is primarily a survey course, designed to introduce major concepts, models, theories, and research that emanate from the literature on diversity and multicultural psychology. This is a critical backdrop to prepare students to be multiculturally responsive in this increasingly global society. Borrowing from history, cultural anthropology, social psychology, indigenous psychology, counseling psychology, and general psychology, the curriculum will engage students in theoretical, research-based, and experiential exercises in order to develop a comprehensive understanding that will lead to culturally responsive and ethical mindsets and practice.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 412. Migration, Well Being, and Human Development. 3 Credit Hours.
This course explores the social and psychological processes involved in migration and issues relevant to well-being of diverse immigrant groups including immigration policies, the psychology of immigration and acculturation, ethnic identities, issues in immigrant families, immigrant communities, educational, health, and mental health issues.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 420. Introduction to Counseling and Psychotherapy. 3 Credit Hours.
This course is a survey of the theories and practical applications of counseling and psychotherapy. Students will acquire an understanding of a variety of theories of psychotherapy, the basic requirements and skills for effective, ethical counseling, and an appreciation for the role of values and human differences in counseling and psychotherapy. This course does not prepare students for practice in mental health professions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 430. Intergroup Dialogues. 3 Credit Hours.
The Intergroup Dialogue course will provide an opportunity for students to engage in dialogue across difference. Students will have the opportunity to learn about and discuss social identities and intersectionality in relation to various social identities, with a focus on social justice. The course will focus on understanding of perspectives and ideas that facilitate intellectual advancement as well as personal development as members of the UM community, and the larger community in which we are situated. Note: the focal social identity varies by class section: please refer to the Class Notes for information on the social identity that will be the main focus of this section.
Components: IDG.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 440. Listening and Helping Skills. 3 Credit Hours.
Listening and Helping Skills is an introductory course to the foundational skills used in helping relationships. Through lectures, discussions and role-plays, students will learn the rationale behind basic helping skills and their application to diverse settings and contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 452. Community Program Development and Evaluation. 3 Credit Hours.
This course addresses the theoretical and practical principles of designing, planning, implementing, and evaluating programs in community-bases settings. The students will learn about prevention, effective program development, program approaches, program components, program evaluation, and cultural proficiency in program development and evaluation. Students will acquire and practice skills for becoming effective workers and leaders in community-based agencies. The course will consist of readings, presentations, and applied knowledge.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 462. Community Consultation and Leadership. 3 Credit Hours.
This course will cover strength based, preventive, empowering approaches to institutional and community change, and will address related skills, stages, processes and outcomes; Conflict resolution, facilitation, strategic planning, visioning, advocacy, change management, and community mobilization will be studied and practiced in class.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 504. Mentored Research Studies. 1-3 Credit Hours.
Under the guidance of EPS faculty and graduate students, undergraduate students, will have an opportunity to get involved in various components of research study; gain valuable knowledge and research experience; and expand their undergraduate academic experience.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 533. Organization and Administration of Higher Education I. 3 Credit Hours.
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 578. Human and Social Development Practicum. 3-6 Credit Hours.
The practicum serves an integrative function: it allows students to apply their academic training, to further develop their career goals, and to hone their skills while gaining experience in real-world settings. Practica are unpaid, supervised experiences. Students choose from a menu of settings that have been approved as HSD practicum sites and spend a minimum of 120 hours (3 credits) or 250 hours (6 credits) at their chose setting over the course of the semester. Must be taken concurrently with EPS 481.

Components: PRA.
Grading: GRD.
Typically Offered: Spring.

EPS 579. Human and Social Development Practicum Seminar. 3 Credit Hours.
The Practicum Seminar brings theory and research to bear on the student's practicum experiences, and provides a forum for further professional skill development and growth. Students will complete a major project integrating their experiences. This course is a designated Upper Level Communication Requirement; advanced written, digital and/or oral communication proficiencies will be emphasized in this course. Credit for ENG 105 and ENG 106 (or equivalent), is required for this course.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 587. Special Topics in Human and Social Development. 1-3 Credit Hours.
This course is designed for students wishing to focus on a specific area of study within the umbrella of Human and Social Development. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support in a structured seminar setting.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 589. Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 592. Workshop in Education. 1-3 Credit Hours.
Study in special interest areas in education.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 593. Workshop in Education. 3 Credit Hours.
Study in special interest areas in education.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 595. Research Project I. 2 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 596. Research Project II. 2 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 597. Research Project - Thesis Writing. 1-3 Credit Hours.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
EPS 598. Research Project - Seminar. 1 Credit Hour.
This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor. Students are required to present at the undergraduate Research, Creativity, and Innovation Forum.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 599. Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 601. Field Studies in Education. 1-6 Credit Hours.
Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 605. Regression Methods. 3 Credit Hours.
The aim of this course is to provide a solid foundation in the basic concepts of multivariate statistics, and its application to practical research questions. This course extends the content of EPS 671 (ANOVA methods) and EPS 672 (regression methods) to cover methods used when there are multiple dependent variables to be modeled simultaneously. This course focuses on the traditional multivariate methods (as opposed to the contemporary models of structure equation modeling) that see wide use in the behavioral sciences. The general topics covered in the course include, but are not limited to: introductory matrix algebra, multivariate analysis of variance (MANOVA), factorial MANOVA, discriminant function analysis, and exploratory factor analysis. In all cases, this course is intended to provide a solid conceptual background of these topics, as well as a thorough description/practice of the application of these topics to real data scenarios.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 620. Workshop in Education. 3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 622. Community Well-being and Change: Theory and Practice. 3 Credit Hours.
This course is designed to promote an understanding of the factors associated with healthy communities. It provides a comprehensive overview of the relevant skills and theories including: ecological/systems theory/models; community theories (sense of community, social capital, environmental psychology); and critical social theory, social justice, and social determinants of well-being.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 623. Development and Change in Community Organizations: Theory and Practice. 3 Credit Hours.
This course focuses on the unique role of non-profit, community-based organizations in promoting human and community development. Students will engage in an analysis of the range of functions that organizations serve and the various organizational strategies used in community settings.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 624. Essentials of Research in Social and Behavioral Sciences. 3 Credit Hours.
Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 625. Program Evaluation. 3 Credit Hours.
Terminology, models, standards, practices, and common problems associated with program evaluation in Educational and Social Service settings. Prerequisite: EPS 670 and 553 or equivalents.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 626. Multicultural Communities in a Globalized Society. 3 Credit Hours.
This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large. Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 627. Community Youth Development. 3 Credit Hours.
This course in community youth development (CYD) will focus on the philosophical, sociological, and educational foundations of a youth development perspective that highlights youth as powerful catalysts for change and positive forces in shaping communities. We reflect on how youth development is inextricably linked with family and community development. After reviewing and critiquing traditional adolescent development theories, students will engage with theories and practices of CYD, youth empowerment, youth civic engagement, youth organizing, social justice youth development, youth activism, and critical youth engagement.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 628. Social Change Praxis. 3 Credit Hours.
In this course, we will explore the meaning of social change and the nature of power, examine past and present social movements, and learn about the strategies and methods groups have used to build community and deploy collective power in their efforts to change minds, systems, institutions, policies, communities, and nations. Together, we will learn more about critical theories of power, collaboration, systems, and social mobilization, and look at real-life cases to see how theory can be applied in practice. The concept of praxis was chosen as the organizing framework because it requires students to develop an intellectual relationship to their activism. Praxis, simply put, means action informed by theory. In addition to reflecting on our own values and assumptions as agents of change, we will develop skills for facilitating engaging discussions, recruiting and motivating community members, developing a shared social analysis, mobilizing resources, and building coalitions for social change. We will identify common strategies used in successful campaigns and analyze the choices groups have made in their pursuit of the collective power necessary to achieve their social change goals.
Prerequisite: EPS 622. And EPS 623. And EPS 624. And EPS 625. And EPS 626.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 629. Seminar in Community and Social Change. 3 Credit Hours.
This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 635. Special Topics in Educational and Psychological Studies. 1-3 Credit Hours.
Review of emerging policy, practice, empirical research and scholarly writing on important educational issues for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allows for experimental instructional formats. This course is designed for students wishing to focus on a specific area of study within the umbrella of Educational and Psychological Studies. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 667. Professional, Legal and Ethical Issues in Counseling. 3 Credit Hours.
Professional, legal, ethical, and licensing issues in the counseling profession.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 668. Social and Cultural Diversity and Counseling. 3 Credit Hours.
Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 669. Psychopathology for Counselors. 3 Credit Hours.
In depth introduction to abnormal human behavior patterns of concern to mental health professionals. Clinical conditions will be examined within the context of currently most viable theory and research relating to etiology, assessment, diagnosis and treatment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 670. Dynamics of Marriage and Family Systems. 3 Credit Hours.
Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 671. Family Therapy. 3 Credit Hours.
Concentrated study of several approaches to family therapy including systemic and psychosocial perspectives. Theory and techniques of family therapy are taught in lecture, videotape, and simulation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 672. Therapy for Couples. 3 Credit Hours.
Theory and technique linked to working with couples, in marriage and in other relationships.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 673. Counseling in Community Settings. 3 Credit Hours.
Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 674. Lifestyle and Career Counseling. 3 Credit Hours.
An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 675. Therapeutic Group Procedures. 3 Credit Hours.
This course examines both the theory and practice of group counseling. The course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 676. Counseling Process and Practice. 3 Credit Hours.
The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 677. Assessment Strategies for Counselors I. 3 Credit Hours.
This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 678. Counseling Theories and Practice. 3 Credit Hours.
Study of theories and concomitant practices in counseling and therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 679. Lifespan Human Development. 3 Credit Hours.
Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 680. Theory and Practice with Children and Adolescents. 3 Credit Hours.
Course prepares students to provide preventive and therapeutic interventions with children and adolescents including theory, research, and practice.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 681. Counseling and Sexuality. 3 Credit Hours.
Emphasis is placed on self-awareness and acceptance of all dimensions of human sexuality. Readings and classroom activities focus on biological aspects of sexuality, an understanding of sexual dysfunctions, and their treatment.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 682. Practicum in Counseling I. 1-4 Credit Hours.
Supervised Practicum at the Institute for Individual and Family counseling and other appropriated clinical settings relating theoretical formulations to intervention strategies appropriate to specialization.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 684. Research and Program Evaluation in Counseling. 3 Credit Hours.
Course focuses on the interpretation and application of research data as applied to clinical practice. Skills in using behavioral research-based literature to identify, evaluate and interpret appropriate interventions are also emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 685. Substance Abuse and Addictions: Theories and Counseling. 3 Credit Hours.
Theories and research on individual, systemic causes, and outcomes of substance abuse, and concomitant practices in counseling and therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 686. Working with Black Clients: Treatment and Assessment Considerations. 3 Credit Hours.
This course presents three core content areas with respect to the treatment and assessment of Black populations. The first content area addresses historical aspects of the development of Black psychology. Additionally, it will review ethnocentrism, the misuse of Western psychology to marginalize African Americans and reasons for scientific abuses against people of color, such as the Tuskegee Syphilis Study. Lastly the first content area will focus on topics such as the Black family, racism, cultural mistrust, stereotype threat, Black/White relations, and Black mental health. Concomitant aspects of Black culture including; racial identity development, spirituality, sexuality, common misconceptions about Black populations, and within group differences related to gender, class, age, and sexual orientation will be peripherally addressed. The second content area presents a culturally-informed perspective on the psychological assessment and treatment of African Americans. It will focus on topics such as ethnic/racial identity models, cultural variables that may affect DSM 5 diagnoses, epidemiological mental health data across ethno-racial groups, biased measures, culturally specific interventions, and important factors to consider during the delivery of treatment. The third module will focus largely on the infusion and integration of the first two modules in therapeutic practice with Black populations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 687. Latino Youth and Families. 3 Credit Hours.
This course will focus on the Latino family with emphasis on the development of Latino youth in the U.S. Latino youth and their families will be described within an ecological context. The following social and cultural contexts and their impact on Latino youth development will be addressed: cultural values; parenting practices; religious belief systems; poverty and chronic stressors; immigration and acculturation; ethnic identity; psychosexual development; bilingualism; suicidality; resiliency; and academic barriers. Recommendations for culturally responsive counseling will be discussed throughout.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 688. Spanish for Mental Health Professionals. 3 Credit Hours.
This course will address the nuances and role of language in the context of counseling, with a focus on the Spanish language. The course will include a dual lens: on the experience of the bilingual counseling client and on the experience of the counselor with varying degrees of proficiency in Spanish. We will address (1) the role of language within the counseling setting with bilingual clients, (2) how cultural values influence language, (3) how cultural values and customs influence the degree of emotion or energy expressed in language and emotion-laden states, (4) the common challenges and experiences of counselors in speaking in Spanish with their clients, and (5) recommended terms and words to use in Spanish in the counseling setting. The course will include assigned readings, lectures, class discussion, videos and role-plays to facilitate assimilation of the material.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 689. Psychological Interventions with Hispanic/Latino Populations. 3 Credit Hours.
Explores the diversity of experiences among Hispanics and their implications for therapy. Topics include: racial diversity among Hispanics, sociopolitical factors in mental health, the impact of immigration on mental health, special psychological treatments: trauma treatment, family interventions and bilingual counseling.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 693. Bereavement and Attachment Factors for Children and Families. 1-3 Credit Hours.
This course will focus on attachment and development of factors as they relate to the bereavement and loss experience of children, adolescents, young adults, and families. Effective methodology in the care of these populations will be explored. Content will include the trajectory of grief in childhood development, manifestation of loss and grief, risk factors in the loss experience, attachment issues, types of loss, popular notions of loss and treatment, and best practice in bereavement work.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPS 698. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 699. Advanced Individual Study I. 1-6 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 700. Quantitative Methods I. 3 Credit Hours.
This course provides an introduction to data analysis and statistical inference. Students learn to describe data (quantitatively and graphically), to select and compute statistical estimates and hypothesis tests, to use computer packages (SPSS) to accomplish these tasks, and to interpret and write about the results of the estimates and tests. Knowledge of basic algebra is needed. Higher mathematics (e.g., trigonometry, calculus) is not used.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 701. Introduction to Research Methods. 3 Credit Hours.
The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students required to complete literature search on a topic of their interest and submit a report of their findings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 702. Quantitative Methods II. 3 Credit Hours.
This course introduces students to techniques of data analysis and statistical inference based on the General Linear Model (GLM). The major topics covered in this class include simple/multiple regression, one- and two-way Analysis of Variance (ANOVA) followed by multiple comparisons, Analysis of Covariance (ANCOVA), and Repeated Measures ANOVA. This course aims to provide a solid conceptual background of these topics, as well as the analytic skills for conducting educational and psychological research in practice. Knowledge of basic algebra and SPSS is required, as is an understanding of the fundamental principles of descriptive statistics and hypothesis testing (as taught, for example, in EPS 700 or equivalent). Knowledge of calculus is not required. Students will conduct statistical analyses using real datasets.
Prerequisite: EPS 700 or Equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 703. Applied Multivariate Statistics. 3 Credit Hours.
This course will provide: (1) a conceptually-oriented introduction to regression methods and (2) opportunities to learn related data-analytic techniques.
Prerequisite: EPS 700 or Equivalent and EPS 702 or Equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 704. Computer Applications in Educational and Behavioral Science Research. 3 Credit Hours.
This course introduces the use of statistical software packages R for acquiring, managing, and preparing datasets that are required to produce reliable and valid statistical inferences. With a special focus on R, the course will cover a broad range of hands-on activities in the data analytic process including data coding, file manipulation tasks, data screening, and statistical analysis, and also provide a brief introduction to R programming.
Components: LSN.
Grading: GRD.
Typically Offered: Summer.

EPS 705. Measurement and Psychometric Theory. 3 Credit Hours.
EPS 705 (Measurement and Psychometric Theory) is a first component of a sequence of classes in order to acquaint students with cutting edge models in test theory and with the application of computer software with which to implement those theories. This sequence of classes provides an introduction to contemporary measurement principles implicated in the design and analysis of scales, tests, and psychological inventories. EPS 705 covers the essentials of classical test theory, factor models of test items, generalizability theory, and a brief introduction of item response theory. After completing the course, students should be provided foundations for further study of measurement theory and be prepared to take a course for item response theory.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 706. Categorical Data Analysis. 3 Credit Hours.
Categorical data is abundant in many different fields such as education, psychology, and marketing. The use of statistical methods for categorical data has increased dramatically in recent years. Categorical data can be numeric or character, but it is always a discrete number of levels. Virtually every research project categorizes some of its observations: male or female, marital status, political or religious affiliation, race of patient, and so on.
Prerequisite: EPS 553 and EPS 671.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 707. Item Response Theory. 3 Credit Hours.
The purpose of the course is to provide training in the theory and application of item response theory (IRT) as it pertains to educational and psychological measurements. Focus will be given to discussing IRT as a measurement model used to measure the properties of items and individuals. Particular attention will be given to contrasting the properties of the IRT model to the classical test theory, and the application of IRT to actual data sets.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 708. An Introduction to Structural Equation Modeling for Multivariable Data. 3 Credit Hours.
This course will provide (1) a conceptually-oriented introduction to Structural Equation Modeling for multivariate data and (2) opportunities to learn related data-analytic techniques.
Prerequisite: EPS 703 or Equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 709. Introduction to Multilevel Modeling. 3 Credit Hours.
This course will provide: (1) a conceptually-oriented introduction to multilevel modeling and (2) opportunities to learn related data-analytic techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 710. Meta-Analytic Methods for Research Synthesis. 3 Credit Hours.
Meta-analysis is the general practice of combining, comparing, and interpreting statistics across a set of studies that investigate the same (or similar) phenomena using a properly motivated theoretical framework. Meta-analysis has become a popular tool in a variety of research disciplines, including the social sciences, education, medicine, and business. This course provides a thorough introduction to the theoretical foundations of meta-analysis, discusses commonly used statistical techniques, and analyzes several examples of the existing meta-analysis. Emphasis is placed on application, so that students are trained to independently perform a meta-analysis, from start to finish, in whatever substantive area interests students the most.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 711. Advanced Topics in Research, Measurement, and Evaluation. 3 Credit Hours.
Review of emerging quantitative methodological advances relevant to educational research for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allow for experimental instructional formats. See Course Notes for specific topic.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 712. Field Experience in Educational Research. 2-6 Credit Hours.
A total of 125 hours of supervised practical experiences in educational research. Emphasis is placed on actual participation in a wide variety of ongoing research projects through associations with an approved educational R & D center. Normally taken in two or three credit blocks.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 714. Qualitative Methods I. 3 Credit Hours.
An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 715. Qualitative Methods II: Case Studies and Grounded Theory. 3 Credit Hours.
Types and designs of case studies, development of protocol, field work, data analysis, and report writing. Practical procedures and techniques for conducting grounded theory studies, including data coding and analysis, and reporting of results.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 716. Qualitative Methods II: Interviews and Content Analysis. 3 Credit Hours.
Sociological and oral history interview methods, including methodological issues, computer-based coding, decoding, and interpreting data. Visual and text based content analysis, scoring schemas, and inter-rated reliability are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 717. Survey Research Methods. 3 Credit Hours.
Focus on standards and practical strategies for designing different types of survey instruments and conducting survey research. Students are required to develop a proposal for survey research, develop a survey instrument, and conduct a small pilot study by collecting, analyzing, and reporting survey data.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 725. Seminar in Community Well-Being. 1-6 Credit Hours.
This course provides an overview of the field of community psychology. We will examine the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference (the ‘birthplace’ of community psychology) through reading primary sources—articles, monographs, and book chapters—by those who have shaped the field. The readings will include some empirical research studies, but our key focus is the conceptual writings. The goal of this course is to understand and critique different theoretical perspectives in the field of community psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 731. Theories of Community Research and Action. 3 Credit Hours.
This course provides an overview of theoretical perspectives and how they are applied to social and psychological issues in the field of community psychology. The course examines the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference (the ‘birthplace’ of the field) through reading primary sources—articles, monographs, and book chapters—by those who have shaped the field. Readings also include empirical articles that illustrate the application of these concepts to research. Class discussions are central to this course. In addition, course assignments include the following: (1) brief reflections on readings 3 times during the course of the semester; (2) an interview with a community psychologist and a short essay based on the interview; (3) the final paper is a systematic critical literature review on the topic of interest to students. In this paper, students critique a body of empirical work using theoretical perspectives in community psychology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 732. Community Based Participatory Action Research. 3 Credit Hours.
The purpose of this course is to introduce students to several traditions of community based participatory action research (CBP AR). CBP AR is carried out in collaboration between academic researchers and members of communities, and involves an iterative process of developing research questions, designing methods, implementing data collection, interpreting results, and often developing interventions. Students will begin by reviewing different intellectual traditions in participatory research including Community Based Participatory Research (CBPR), Participatory Action Research (PAR), Critical PAR and others. We will also stress the ways that participatory research has developed within the traditions of Community Psychology, such as Ecological Inquiry and Participatory Evaluation. While all these three traditions are related and overlapping, students will be encouraged to critique and contrast these approaches.
Prerequisite: EPS 670.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 737. Organization and Administration of Higher Education I. 3 Credit Hours.
Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 738. Effective Teaching, Learning, Assessment, and Curriculum in Higher Education. 3 Credit Hours.
Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

EPS 739. The Community College. 3 Credit Hours.
An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 740. Administration of Student Affairs. 3 Credit Hours.
History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPS 741. Basic Skills in Counseling and Interviewing. 3 Credit Hours.
Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 742. Higher Education in the United States: From Harvard to Present. 3 Credit Hours.
Broad view of issues and problems in higher education. Fundamental ideas and significant literature are analyzed from historical, philosophical, and societal perspectives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 743. Psychological Bases of Education. 3 Credit Hours.
Review and extension of basic principles of psychology underlying educational practice. Basic concepts of educational psychology which contribute to effective education will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 744. Student Diversity in American Higher Education. 3 Credit Hours.
Emphasis on the diversity of today's undergraduate students. An examination of the sociological context and philosophical orientation of contemporary college students is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 745. Organization & Administration of Higher Ed II: Governance, Leadership and Finance. 3 Credit Hours.
Provides an overview of selected topics in governance, administrative leadership and finance in higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 746. College Student Development: Theory, Research and Practice. 3 Credit Hours.
Emphasis on student growth and development during college and an analysis of the factors which affect development along cognitive and affective dimensions. An in-depth examination of college student development theories is included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 747. Critical Issues in Student Affairs: The Law and Higher Education. 3 Credit Hours.
Emphasis on the most pressing issues facing the profession of student affairs today including diversity, funding, staff retention and the law and student affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 748. Enrollment Management: Theory and Practice. 3 Credit Hours.
Comprehensive overview of principles and practices of a strategic process that begins with recruitment and continues through graduation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 749. Advanced Seminar in Enrollment Management. 3 Credit Hours.
In-depth exploration of topics in enrollment management, including market research, market testing, pricing strategies, strategic planning, and development of a future vision.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 751. Seminar in Higher Education Administration: Contemporary Issues. 3 Credit Hours.
A review of recent developments, research findings, changing issues, and problems in contemporary American higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPS 752. Dissertation Seminar. 3 Credit Hours.
The development and analysis of dissertation proposals will be required. Detailed coverage of the research process, proposal elements, dissertation writing and all aspects of doctoral research will be emphasized. Extensive feedback on research ideas and writing is involved.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 753. Internship in College Teaching. 3 Credit Hours.
A program in observation and supervised teaching in the community junior or liberal arts college. The student spends 15-20 hours per week. Included is a seminar held with the college supervisor which meets several times during the semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 754. Practicum: Administration of Higher Education. 1-6 Credit Hours.
This course is designed to provide students with an opportunity to develop professional competencies while they apply theory to practice. Opportunities can be pursued in enrollment management or student affairs related offices either on campus or at other higher education institutions. Students will contract for the type of experience desired and a formal research paper and presentation will culminate this activity.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 755. Group Dynamics and Communication Skills. 3 Credit Hours.
Emphasis on group dynamics, group procedures and communication skills.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 764. Workshop in Education: Selected Topics. 1-3 Credit Hours.
Study in special interest areas in education.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 765. Workshop in Education: Selected Topics in Higher Education. 1-3 Credit Hours.
Study in special interest areas in higher education.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

EPS 770. Psychological Appraisal I. 3 Credit Hours.
Orientation to psychological appraisal with emphasis on development of skill in assessment of intellectual functioning.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
EPS 771. Psychological Appraisal II. 3 Credit Hours.
Orientation to psychological appraisal with emphasis on use of procedures which facilitate preparation for, and evaluation of, intervention efforts in the personality and social-behavioral areas.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 772. Vocational Psychology and Career Development. 3 Credit Hours.
This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to integrate research, theory, practice, public policy, and social justice.
Academic Plan Equal Counseling.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 775. Doctoral Practicum I. 1-9 Credit Hours.
Supervised counseling experiences with clients at the Institute for Individual and Family Counseling. Individual and small group supervision by program faculty.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 776. Doctoral Practicum II. 1-9 Credit Hours.
This course is a combination of self-directed and guided elements aiming to build your skills as a reflective, theory and science-based practitioner. To this end, the course provides in-depth exploration and application of core readings and theories in community and social change. The purpose of this course is to apply these core concepts to your practicum and provide a space for critical reflection on your practicum experience (student placement in an organization or a foreign culture). Thus, the course includes both didactic and practicum elements throughout the semester. The didactic aspect focuses on intervention theory and method from a community psychology perspective; the student placement represents a structured opportunity to learn about intervention theory as applied to a particular setting.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 777. Advanced Practicum in Counseling Psychology. 1-9 Credit Hours.
Supervised experience appropriate to the work of the counseling psychologist.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 779. Vocational Psychology and Career Development. 3 Credit Hours.
This course is a doctoral level seminar on vocational psychology and career counseling. This course will consist of a critical review of the major approaches to understanding traditional career behavior and development and the empirical support for prevailing theoretical constructs. We will also explore how various aspects of identity may affect career development, including race, ethnicity, age, gender, sexual orientation, disability, religion, and social class. Considerable attention will be devoted as well to the application of work-related issues in psychological practice. The course seeks to integrate research, theory, practice, public policy, and social justice.
Requisite: Restricted to Doctoral Students in the Counseling Psychology program.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 780. Cultural Diversity and Mental Health. 3 Credit Hours.
This seminar course provides advanced training in conceptualizing the individual within cultural and sociopolitical contexts. Emphasis is placed on the 'state of the science' on multicultural empirical research as well as on the 'state of the art' in translating scientific findings to applied clinical contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPS 781. The Social Bases of Human Activity and Flourishing. 3 Credit Hours.
Human beings are the most intensely social animals, and this course explores the evolutionary, developmental, and social domains in which that social nature is expressed. Topics include attachment processes, imitation learning, identity formation, social norms, intergroup processes, aggression, and social hierarchy. The course has an evolutionary framework, and explores developmental and social domains of human behavior. These domains point to what makes it possible for humans to flourish as the social creatures we are
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPS 782. Supervision in Counseling Psychology. 3 Credit Hours.
This seminar course provides an overview and discussion of theories, research, and practice of supervision and consultation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPS 785. Preparing Future Faculty Seminar. 1-3 Credit Hours.
The goal of this course is to introduce you to the larger role of university professor. The class is designed to give you some general sense of university structure and of the breadth of opportunities in higher education, to think through your own vision of "being a professor" particularly the part of that role that focuses on teaching, and to help you on the job search by preparing a professional portfolio that will help you get that first job and, hopefully, set you on a smooth career path. The PFF seminar will provide you with contextual and interdisciplinary knowledge of professoriate. Each seminar will be designed to aid you in your goal to become an outstanding faculty member. PFF will give you an overview of life on the academic job market and the pre-tenure years. It is your responsibility to tailor that information to fit your needs. It is expected that you take the information you learn in PFF and speak with mentors in your discipline to glean further insights into faculty life.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

EPS 789. Special Topics in Counseling Psychology. 3 Credit Hours.
This graduate course will examine research and practice in a specialty area within counseling psychology. Content may vary from term to term. Probable topics include psychopathology and consultation. Readings will include articles, books, and/or book chapters by key scholars who have shaped and/or are shaping the field. A focus will be placed both on empirical research studies and conceptual writings. The goal of this course is for students to gain key counseling psychology competencies in a specialty area within the field.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

EPS 798. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 799. Advanced Individual Study II. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 802. Practicum Laboratory I. 1-4 Credit Hours.
Individual, dyad, and small group supervision at approved Practicum sites.
Corequisite: EPS 682 and Prerequisites: EPS 667 and EPS 669 and EPS 676 and EPS 678.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 803. Internship in Counseling Psychology. 1-6 Credit Hours.
Supervised internship in Counseling Psychology in an approved facility.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
EPS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her adviser. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 820. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EPS 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 825. Continuous Registration Master's Study. 1 Credit Hour.
Master thesis Research. 1-12 Credit Hours. Master students enrolled for credit as determined by advisor. This course will be graded each term.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 835. Doctor of Education Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.
Post-Candidacy Dissertation Research. 1-12 Credit Hours. Doctoral students enrolled for credit as determined by advisor. This course will be graded each term.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPS 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and Ed.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Electrical & Computer Engineering (ECE)

ECE 100. Introduction to Electrical and Computer Engineering. 3 Credit Hours.
Introduction to Electrical and Computer Engineering (ECE) for high school students interested in science and technology. The course covers important thematic units of the discipline: electronics, digital design, computer programming and signal processing. Emphasis on hands-on experience in the use of laboratory instrumentation, circuit construction and computer simulation.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ECE 101. Introduction to Mobile Computing. 3 Credit Hours.
Introduction to Mobile Computing for high school students interested in application development for mobile systems. The course provides a hands-on approach to the design, development and testing of mobile applications using the latest modern tools. Students start with the basic components used to build applications and continue to more advanced features of mobile devices such as digital cameras, location services, multimedia and more. A strong emphasis is placed on hands-on experience to demonstrate the concepts, culminating in a working mobile application.
Requisite: Summer Scholars Program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 110. Introduction to Innovation: Learning About Innovation by Innovating. 3 Credit Hours.
Introduction to diverse methods and tools that promote and nurture student creativity, entrepreneurship, team-work, and skills for creating business plans that consider ethical, global and financial issues. Students will learn to use the Maker Space facility to implement their design ideas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 111. Introduction to Engineering I. 3 Credit Hours.
Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions is included as well as an introduction to professional ethics, intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 112. Introduction to Engineering II. 2 Credit Hours.
Course is designed to provide first-year undergraduate students with an introduction to some key electrical and computer engineering concepts and topics by discussing their roles in some of the commonly used electrical and computer engineering systems. Numerical examples, circuit simulations, and computer programming are introduced through the use of MATLAB, microcontroller programming languages, and PSpice. Hands-on experience are provided through a project where the students design, assemble, program, and test a microcontroller-based mobile robot with a variety of sensing devices. Should be taken as a freshman only; otherwise to be replaced by a technical elective.
Prerequisite: ECE 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 118. Introduction to Programming. 3 Credit Hours.
Introduction to computing, problem solving, program design, C++ language fundamentals, and software engineering principles. Software design projects are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 123. Explorations in Engineering. 3 Credit Hours.
Introduction to engineering for non-engineers with emphasis on real-world engineering systems and services which are changing the way we live, communicate, learn, play, and care for ourselves, our communities and our planet. Students will learn how to use modern tools to observe and design simple engineering systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 201. Electrical Circuit Theory. 3 Credit Hours.
Fundamentals of DC-AC circuit laws, including steady state and transient analysis. Lecture, 3 hours.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 202. Electronics I. 3 Credit Hours.
Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ECE 203. Electrical Circuits Laboratory. 1 Credit Hour.
Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.
Prerequisite: ECE 201.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 204. Electrical Circuits Laboratory. 1 Credit Hour.
Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.
Prerequisite: ECE 201.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 205. Principles of Electrical Engineering--I. 3 Credit Hours.
Fundamentals of DC and AC Circuits and a survey of Electrical Machinery and Electronics. Not open to students with credits in ECE 201. Lecture, 3 hours.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 206. Circuits, Signals, and Systems. 3 Credit Hours.
This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.
Pre-requisite: ECE 201 And MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 211. Logic Design. 3 Credit Hours.
Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 212. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.
Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.
Prerequisite: ECE 118 and ECE 211/304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 218. Data Structures. 3 Credit Hours.
Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.
Prerequisite: ECE 118.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 301. Electromagnetic Field Theory. 3 Credit Hours.
Vector analysis, static and time-varying fields, Maxwell's equations, propagation of electromagnetic waves, and transmission line theory and applications are discussed.
Prerequisite: PHY 223 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 302. Electronics II. 3 Credit Hours.
Prerequisite: ECE 305 Or ECE 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 303. Electronics Laboratory. 1 Credit Hour.
Laboratory course in conjunction with courses ECE 202 and 302.
Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 304. Logic Design. 3 Credit Hours.
Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 305. Electronics I. 3 Credit Hours.
Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.
Prerequisite: ECE 201.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 306. Electronics II. 3 Credit Hours.
Prerequisite: ECE 202 or 305.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 307. Circuits, Signals, and Systems. 3 Credit Hours.
This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.
Prerequisite: ECE 201 and MTH 311.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 308. Linear Control Systems. 3 Credit Hours.
Introduction to system theory, transfer function and state variable modeling of linear continuous time systems, root locus, Bode plot, Nyquist criterion, analysis and controller design using root locus and frequency domain techniques, proportional-integral-derivative controllers.
Prerequisite: ECE 206/307 and ECE 303/311 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 310. Introduction to Engineering Probability. 3 Credit Hours.
Axioms of probability, discrete and continuous random variables, probability density functions. Expectation, conditioning, independence, functions of random variables, characteristic functions, multiple random variables. Sums of random variables, limit theorems, probability bounds, convergence concepts. Introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with IEN 310.
Prerequisite: MTH 162 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ECE 311. Electronics Laboratory. 1 Credit Hour.
Laboratory course in conjunction with courses ECE 305 and 306.
Prerequisite: ECE 203 or 204. Or Pre/Corequisite: ECE 302 or 306.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 312. Processors: Hardware, Software, and Interfacing. 3 Credit Hours.
Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.
Prerequisite: ECE 118 and ECE 211/304.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 315. Digital Design Laboratory. 1 Credit Hour.
Familiarization with properties and use of logic gates, flip-flops, digital standard components, and programmable logic devices. Design and implementation of combinational and synchronous digital systems and Computer Aided Engineering (CAE) tools for design and simulation of digital systems are also included.
Prerequisite: ECE 304 Or ECE 211.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 316. Structured Digital Design. 1 Credit Hour.
VHDL (VHIC (very high speed integrated circuits) hardware description language) introduction and syntax. Functional and behavioral models of VHDL for design, testing, and simulation of digital circuits and programmable logic devices. Design and implementation of combinational and sequential digital systems using VHDL is also included.
Prerequisite: ECE 315.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 318. Algorithms. 3 Credit Hours.
Continuation of the programming sequence. Object oriented programming with C++, emphasizing the skills required of a professional programmer. Essential data structures and algorithms: trees, graphs, hash tables, parsing and text processing. Advanced sorting and data management algorithms. Advanced features of C++; effective programming with C.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 322. Systems Programming. 3 Credit Hours.
Practical hands-on experience with UNIX systems programming and administration. Programming using C and shell scripting languages. File systems features, multiprocessing, inter-process communication, and systems programming fundamentals are discussed.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 336. Discrete-Time Signals and Systems. 3 Credit Hours.
This course provides the basics connecting continuous-time (CT) and discrete-time (DT) signal processing, and an introduction to discrete-time signals and systems and applications. Topics include communication, sampling, discrete-time linear time-invariant (LTI) signals and systems, difference equations, z Transform, transform domain analysis of DT systems, DT Fourier transform (DTFT), digital filters, applications to audio, and image processing.
Prerequisite: ECE 307 Or ECE 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 368. Internet Computing I. 3 Credit Hours.
Principles and practices used in creating interactive Internet sites. Extensive object oriented programming in Java is taught. Use of eXtensible Markup Language (XML) to provide content description. Use of GUI components and graphics to create web based applications.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 395. Undergraduate Research in Electrical and Computer Engineering. 1-3 Credit Hours.
Research and/or design projects consisting of an individual investigation of real-world contemporary problems. Offered by special arrangement and under the supervision of a faculty member.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 399. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student’s field of study. Course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 404. Communication Systems. 3 Credit Hours.
Introduction to digital communication, including binary and M-ary baseband and bandpass modulation over additive white Gaussian noise channels. Optimal receivers, pulse shaping for bandlimited channels, synchronization, multiple access.
Prerequisite: ECE 336 and ECE 310 or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 405. Solid-State Electronics. 3 Credit Hours.
Principles of semiconductor electronics, energy bands of semiconductors, Fermi level, carrier distribution, and transport mechanisms are discussed. Application of semiconductor theory to various junction and field effect devices are included.
Prerequisite: ECE 301 and PHY 223.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 412. Software Engineering and Architecture. 3 Credit Hours.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 413. Software Design and Verification. 3 Credit Hours.
Prerequisite: ECE 412/512.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 414. Computer Organization and Design. 3 Credit Hours.
Hardware structure, organization and design of computers. Design of computer arithmetic and control units, data, and instruction paths. Modern hardware description language (HDL) based design methodology. Register transfer level design of computers and digital systems. Algorithmic state machine (ASM) charts, instruction set architecture, control unit implementation, microprogramming, memory organization, pipelining, I/O system organization and high speed arithmetic units are discussed.
Prerequisite: ECE 312 or ECE 212.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 415. Senior Project I. 1 Credit Hour.
Topics cover tasks in project planning including scheduling, documentation, communication (written and oral), financial constraints, and ethics. Students are required to present project proposals to serve as the basis for the follow-up course, ECE 416.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 416. Senior Project II. 2 Credit Hours.
The capstone design course for Electrical Engineering majors. An electrical system is designed, implemented, and documented.
Prerequisite: ECE 415.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 417. Embedded Microprocessor System Design. 3 Credit Hours.
Study of microcomputer system design, scientific methods for quantifying system performance, embedded controller applications using high level languages, and debugging strategies. Lecture, 1 hour; laboratory, 3 hours.
Prerequisite: ECE 218. And ECE 315. And ECE 414.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 418. Senior Project Planning. 1 Credit Hour.
The creative process of devising a product to meet customers needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 419. Senior Project. 2 Credit Hours.
The purpose of this course is to integrate the student’s knowledge in hardware, software, and project management. A major digital system is designed, implemented, debugged, and documented.
Prerequisite: ECE 418.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 421. Computer Operating Systems. 3 Credit Hours.
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 436. Digital Signal Processing. 3 Credit Hours.
Topics include finite length transforms (e.g., discrete Fourier transform, discrete sine and cosine transforms) and their fast computation, finite impulse response (FIR) and infinite impulse response (IIR) digital filter design, digital filter structures, finite wordlength effects on filter performance, and multirate signal processing fundamentals.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 437. Real-Time Digital Signal Processing Laboratory. 1 Credit Hour.
Digital signal processing hardware for real-time operation, software development tools, instruction set, and DSP experiments with audio and speech application are discussed.
Prerequisite: ECE 436. Or Corequisite: ECE 436.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.
ECE 454. Digital System Design and Testing. 3 Credit Hours.
Functional building blocks and concepts of control and timing in digital design. Descriptive techniques for digital systems and design for testability. Prerequisite: ECE 315 and 316. Corequisite: ECE 455.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 455. Design-for-Testability Laboratory. 1 Credit Hour.
Project laboratory demonstrating the techniques necessary to design, implement, and debug and test a large system. The process is carried through from conceptual design, implementation, integration, simulation, and synthesis on a FPGA chip. Prerequisite: ECE 454. Or Corequisite: ECE 454.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 467. Database Design and Management. 3 Credit Hours.
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included. Prerequisite: ECE 322 or CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 470. Network Client-Server Programming. 3 Credit Hours.
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX. Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 481. Senior Project I. 1 Credit Hour.
The creative process of devising a product to meet customers' needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project. Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 482. Senior Project II. 2 Credit Hours.
The capstone design course for Electrical Engineering and Computer Engineering majors. A major electrical and/or computer engineering system is designed, implemented, and documented. Pre-requisite: ECE 481.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 499. Senior-Junior Cooperative Education. 1-3 Credit Hours.
Analysis and design experience obtained in industry or government. Approved project jointly supervised and assessed by department faculty and external partner. Note: A maximum of three credits could be used to satisfy degree requirement as Technical Elective. See Bulletin for more information.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECE 500. Engineering Analytical Techniques. 3 Credit Hours.
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. Singular value decomposition, vector, and matrix norms are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 502. Engineering Acoustics. 3 Credit Hours.
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered. Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 503. Laser Communications. 3 Credit Hours.
Principles of optics, optical fibers, electro-optics, light wave propagation in free space and anisotropic media, and waveguides are discussed. Communication devices including lasers, detectors, electro-optic modulators, optical fiber communication links are covered. The course includes seven hands-on experiments. Prerequisite: PHY 222 and PHY 223 and ECE 301 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 504. Fundamentals of Optical Imaging. 3 Credit Hours.
Introduction to optical imaging, optical coherence tomography imaging, fiber endoscope imaging, and spectral imaging. Learn grating diffraction, interferometer, and optical spectrometer. The course includes ten hands-on experiments. Gain system level understanding of optical coherence tomography and spectral imaging. Prerequisites: ECE 301 or BME 545.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 505. Semiconductor Photonic Devices. 3 Credit Hours.
Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices. Prerequisite: ECE 302, 306, 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 506. Microfabrication. 3 Credit Hours.
Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered. Prerequisite: ECE 505.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 511. Computability, Complexity, and Algorithms. 3 Credit Hours.
Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and models of computation, complexity analysis. Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 512. Software Engineering and Architecture. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 513. Software Design and Verification. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 514. Computer Architecture. 3 Credit Hours.
Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.
Prerequisite: ECE 414.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ECE 519. Design of Computing Languages. 3 Credit Hours.
Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 521. Computer Operating Systems. 3 Credit Hours.
The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.
Prerequisite: ECE 318.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 532. VLSI Systems. 3 Credit Hours.
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.
Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 533. Random Signals and Noise. 3 Credit Hours.
Probability models, Bayes’ theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
Prerequisite: ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 534. Communication Networks. 3 Credit Hours.
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed.
Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 537. Principles of Artificial Intelligence. 3 Credit Hours.
Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 538. Introduction to Digital Image Processing. 3 Credit Hours.
Prerequisite: ECE 206. Or ECE 307. And MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 539. Digital Communications. 3 Credit Hours.
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 540. Digital Speech and Audio Processing. 3 Credit Hours.
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.

Typically Offered: Spring.

ECE 542. MEMS: Sensors and Electronics. 3 Credit Hours.
This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.
Prerequisite: Permission of Instructor OR ECE 532.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 543. BioNanotechnology. 3 Credit Hours.
Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 548. Machine Learning. 3 Credit Hours.
Fundamentals approaches to classifier induction, probabilistic and instance-based approaches, linear and polynomial classifiers, neural networks, decision trees, boosting techniques, performance evaluation, cluster analysis, reinforcement learning, fundamentals of computational learning theory.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 553. Neural Networks. 3 Credit Hours.
Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 562. Wireless and Cellular Communication. 3 Credit Hours.
Wireless Channel Characterization: path loss, shadowing, fading, frequency- selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 563. Wireless Communication Lab. 1 Credit Hour.
Computer simulation of path loss, shadowing and fading in wireless channels, performance of various digital modulation methods in both Gaussian and wireless channels, diversity methods, equalization methods including zero-forcing, minimum mean-square error (MMSE) and decision-feedback equalization (DFE), co-channel interfacing in cellular systems, space-time coding. Orthogonal Frequency Division Multiplexing (OFDM) systems, spreading codes for Code Division Multiple Access (CDMA) systems, and matched-filter receiver and multiuser detector for CDMA systems.
Measurement of wireless signals in various environments.
Prerequisite: ECE 562.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 564. Wireless Networks. 3 Credit Hours.
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks. IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.
Pre or Corequisite: ECE 534.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 567. Database Design and Management. 3 Credit Hours.
Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.
Prerequisite: ECE 322 or CSC 322.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 570. Network Client-Server Programming. 3 Credit Hours.
Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 572. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 574. Agent Technology. 3 Credit Hours.
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.
Prerequisite: ECE 537 or ECE 637.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 576. Internet and Intranet Security. 3 Credit Hours.
Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.
Prerequisite: ECE 218 or CSC 322 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 577. Data Mining. 3 Credit Hours.
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 579. Mobile Computing. 3 Credit Hours.
Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.
Prerequisite: ECE 368.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 581. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 582. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 583. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 584. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 590. Special Topics in Information Technology. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Information Technology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 594. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 595. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 596. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 597. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 598. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 599. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 600. Engineering Analytical Techniques. 3 Credit Hours.
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 602. Engineering Acoustics. 3 Credit Hours.
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered. Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 603. Laser Communications. 3 Credit Hours.
Principles of optics, optical fibers, electro-optics, light wave propagation in free space and anisotropic media, and waveguides are discussed. Communication devices including lasers, detectors, electro-optic modulators, optical fiber communication links are covered. The course includes seven hands-on experiments. Prerequisite: PHY 222 and PHY 223 and ECE 301 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 604. Fundamentals of Optical Imaging. 3 Credit Hours.
Introduction to optical imaging, optical coherence tomography imaging, fiber endoscope imaging, and spectral imaging. Learn grating diffraction, interferometer, and optical spectrometer. The course includes ten hands-on experiments. Gain system level understanding of optical coherence tomography and spectral imaging. Prerequisites: ECE 301 or BME 545.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 605. Semiconductor Photonic Devices. 3 Credit Hours.
Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices. Prerequisite: ECE 302, 306, 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 606. Microfabrication. 3 Credit Hours.
Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 632. VLSI Systems. 3 Credit Hours.
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered. * For students who are taking it as ECE 632 there will be a separate advanced final project that will include the use of all digital circuit library that will be developed in the lab exercises and in addition include an analog component to achieve a mixed signal system integration. This will require additional research study as well as comprehension of more advanced topics in VLSI. Supplemental material and additional project instruction will be delivered in the lab.
Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 633. Random Signals and Noise. 3 Credit Hours.
Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
Prerequisite: ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 634. Communication Networks. 3 Credit Hours.
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed. * For students who are taking it as ECE 634 there will be a separate requirement.
Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 635. Adaptive Filters and Signal Processing. 3 Credit Hours.
Topics include linear models and estimation, orthogonality principle, Wiener filters, stochastic gradient methods, LMS and RLS algorithms, mean square error and tracking performance and applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 636. Principles of Artificial Intelligence. 3 Credit Hours.
Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 637. Introduction to Digital Image Processing. 3 Credit Hours.
Prerequisite: ECE 206. Or ECE 307. And MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 638. Digital Communications. 3 Credit Hours.
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.

ECE 639. Digital Speech and Audio Processing. 3 Credit Hours.
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 642. MEMS: Sensors and Electronics. 3 Credit Hours.
This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.
Prerequisite: Permission of Instructor OR ECE 532.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 643. BioNanotechnology. 3 Credit Hours.
Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoeengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 646. Reliable Digital System Design. 3 Credit Hours.
Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in ECE 454. Offered only for Graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 648. Machine Learning. 3 Credit Hours.
Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 653. Neural Networks. 3 Credit Hours.
Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 662. Wireless and Cellular Communication. 3 Credit Hours.
Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 664. Wireless Networks. 3 Credit Hours.
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks: IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.
Pre or Corequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ECE 672. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 673. Information Assurance. 3 Credit Hours.
Assurance as the basis for believing an information system will behave as expected. Security design fundamentals that help create systems that are fit for their purpose and worthy of being trusted. The concepts of information assurance fundamentals. Vulnerabilities and Risk Management assessment. Security Life-Cycle, Mechanisms, Frameworks and Emerging Threats.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 674. Agent Technology. 3 Credit Hours.
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information age nts, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.
Prerequisite: ECE 537 Or ECE 637.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 675. Digital Forensics. 3 Credit Hours.
The techniques and skills to apply forensics techniques throughout an investigation life cycle while complying with legal requirements. Preservation, identification, extraction and documentation of computer evidence stored on a computer. Application of forensics techniques to investigate and analyze a host in a network, devices including mobile, and techniques to investigate and analyze network traffic.
Prerequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 676. Internet and Intranet Security. 3 Credit Hours.
Security issues and applications for securing internet and Intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.
Prerequisite: ECE 218 or CSC 322 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 677. Data Mining. 3 Credit Hours.
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 678. Network Security. 3 Credit Hours.
Information about the threats that may be present in the cyber realm and the techniques that can be taken to protect a network and communication assets from cyber threats. Threat examination and application of security measures. Implementation of network defense measures and adjustments for cloud and hybrid applications.
Prerequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 680. Electrical and Computer Engineering Internship. 1-3 Credit Hours.
Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
ECE 681. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 682. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

ECE 683. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 684. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 694. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 695. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 696. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 697. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 698. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 699. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 715. M.S. Design Project I. 3 Credit Hours.
Comprehensive M.S. design project in electrical or computer engineering. Open only to students in the BS/MS dual-degree program.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
ECE 716. M.S. Design Project II. 3 Credit Hours.
Continuation of ECE 715. Open only to students in the BS/MS dual-degree program.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 720. Convex Optimization. 3 Credit Hours.
This course aims to give students the tools and training to recognize convex optimization problems that arise in scientific and engineering applications, presenting the basic theory, and concentrating on modeling aspects and results that are useful in applications. Topics include convex sets, convex functions, optimization problems, optimality condition and duality, and algorithms. Applications to signal processing, machine learning and wireless communications are presented.
Prerequisite: MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 725. Statistical Signal Processing. 3 Credit Hours.
Fundamentals of statistical signal processing, focusing on detection and estimation. Detection: hypothesis testing, Neyman-Pearson criterion, Bayes risk, generalized likelihood ratio tests. Estimation: minimum variance, maximum likelihood, maximum a-posteriori, and minimum mean squared error methods, Cramer-Rao and Bayesian bounds, expectation maximization, least squares, Kalman filter, sparse solutions, applications. Students should have completed basic courses on linear algebra and probability prior to taking this course.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 730. Statistical Learning. 3 Credit Hours.
Statistical learning theory, high-dimensional data models, regression, classification, sparse kernel machines, mixture models, graphical models, Markov chain Monte Carlo simulation, model assessment and selection, model inference and combining.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 735. Fundamentals of Network Science. 3 Credit Hours.
Mathematics of networks; network measures and metrics; power laws and scale-free networks; Erdos-Renyi random networks; random networks with general degree distributions; models of network formation, including preferential attachment models.
Prerequisite: MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 738. Computer Vision. 3 Credit Hours.
Principles of computer vision. Segmentation, shape and texture analysis, 3D scene analysis, polyhedral scenes, time-varying image analysis, parallel processing algorithms, matching, and recognition are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 753. Pattern Recognition and Neural Networks. 3 Credit Hours.
Statistical pattern classification, feature extraction, cluster analysis, neural net models, Hopfield net, competitive learning, multi-layer perceptron, and the Boltzmann machine are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 756. Information Theory. 3 Credit Hours.
Measure of uncertainty and entropy, two dimensional sources, noisy channels, mutual and transinformation, equivocation, efficiency and channel capacity, minimum redundancy coding, error-detecting, error-correcting codes, continuous channel without memory. Gaussian additive noise, sampling theorem, and vector space are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 781. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 782. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 783. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 784. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 785. Advanced Problems in CyberSecurity. 3 Credit Hours.
Comprehensive M.S. capstone project in CyberSecurity.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

ECE 792. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.
This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.
Components: MOD.
Grading: SUS.
Typically Offered: Fall & Spring.

ECE 795. Advanced Topics in Computer Engineering. 1-3 Credit Hours.
Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 796. Advanced Topics in Computer Engineering. 1-3 Credit Hours.
Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 797. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 798. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 799. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ECE 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ECE 810 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 hours of ECE 830 may be taken in a regular semester; no more than six in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 credits in ECE 840 may be taken in a regular semester; no more than six credits in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECE 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

English (ENG)

ENG 101. Writing Lab. 1 Credit Hour.
ENG 101 will provide students with consistent and sustained support for their reading and writing needs in ENG 105. Students will schedule one-hour per week standing appointments with Writing Center tutors. These standing appointments will be used exclusively to support the work of the ENG 105 course and must be kept throughout the entire semester.
Corequisite: ENG 105. and Requisite: (ACT English >=18 and <=31) or (SAT Evidence-Based Reading and Writing =>430 and <=690) or (SAT Critical Reading =>430 and <=690) or (TOEFL iBT Writing =>18).

Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
ENG 103. Basic Academic Writing. 3 Credit Hours.
Intensive approach to the basics of academic writing with emphasis on building written fluency, using conventions of standard written English, and editing for precision and correctness. Intended for students who need extra preparation before entering ENG 105. Not for credit toward graduation. Requisite: ACT English score below 18; or SAT Evidence-Based Reading and Writing or Critical Reading score below 430; or TOEFL iBT Writing score below 18.
Components: LEC.
Grading: CNC.
Typically Offered: Fall & Spring.

ENG 105. English Composition I. 3 Credit Hours.
Introduction to written academic argument and inquiry. Not for major or minor. Cannot be taken on credit-only option. Requisite: ACT English score 18-31; or SAT Evidence-Based Reading and Writing or Critical Reading score 430-690; or TOEFL iBT Writing score 18 or above.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 106. English Composition II. 3 Credit Hours.
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporation of secondary sources. Not for major or minor. Cannot be taken on credit-only option. Requisite: ENG 105 OR ACT English score 32 or above; or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above or Foote Fellow designation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 107. English Composition II: Science and Technology. 3 Credit Hours.
Advanced approaches to written academic argument, with emphasis on textual analysis and incorporating source material using readings and approaches connected to science and technology. Alternative to ENG 106. Not for major or minor. Cannot be taken on credit-only option. Prerequisite: ENG 105 or Requisite: ACT English score 32 or above; or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 201. World Literary Masterpieces I. 3 Credit Hours.
Comparative study of literary masterpieces from ancient times through the Renaissance. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 202. World Literary Masterpieces II. 3 Credit Hours.
Comparative study of literary masterpieces from the Renaissance to the present. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 205. Jewish Literature. 3 Credit Hours.
Selections from the Bible, the Talmud, the Kabbalah, medieval poetry and prose, Yiddish and Sephardic literature, and contemporary American and Israeli writers.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 208. Advanced Academic Writing for Transfer Students. 3 Credit Hours.
Review of research techniques and revision strategies. Completes the university composition requirement for those students who transfer into UM with credit for one composition course from another institution. Open only to transfer students who have received transfer credit for either English 105 or English 106. Not open to students who have taken either English 105 and/or 106 at UM.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 209. Creative Writing. 3 Credit Hours.
Analysis and writing of Short stories and poems. Cannot be taken for credit only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ENG 210. Literary Themes and Topics. 3 Credit Hours.
Literary analysis and practice in critical writing through the study of selected works; themes and topics vary by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 211. English Literature I. 3 Credit Hours.
Selected readings from the middle ages to the late 18th century. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 212. English Literature II. 3 Credit Hours.
Selected readings from the late 18th century to the present. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 213. American Literature I. 3 Credit Hours.
Selected American authors prior to the Civil War. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 214. American Literature II. 3 Credit Hours.
Selected American authors from the Civil War to the present. Satisfies writing requirement.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 215. English and American Literature by Women. 3 Credit Hours.
A survey of women writers from the Middle Ages to the present; explores the female literary tradition and women’s relationship to culture and society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 219. CW Beginning Mixed Genre Workshop. 3 Credit Hours.
A multi-genre workshop that will focus on developing practical issues of craft and technique presented in ENG 209 with an emphasis on form and narrative. Classes feature writing exercises and discussions of both student work and readings from contemporary fiction, poetry and a third genre (e.g., playwriting, nonfiction or screenplay).
ENG 209 may not be taken in the same term with another creative writing course (i.e., ENG 209, ENG 290, ENG 292, ENG 390, ENG 391, ENG 392, ENG 404, ENG 406 or ENG 408.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 220. Introduction to Poetry. 3 Credit Hours.
Introduction to the forms of poetry through the analysis of representative poems.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 221. Introduction to Fiction. 3 Credit Hours.
Forms of prose fiction and the analysis of representative short stories and novels.
Pre/Corequisite: ENG 106.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 230. Advanced Professional Communication. 3 Credit Hours.
Professional writing with critical attention to complex rhetorical situations. Practice in formal and informal written communication styles.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ENG 231. Advanced Writing for Arts and Humanities. 3 Credit Hours.
Advanced instruction in writing for specialist and non-specialist audiences on topics in the Arts and Humanities disciplines, with an emphasis on
essay and multimodal forms of communication.
Prerequisite: ENG 106 or ENG 107 or ENG 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 232. Advanced Writing for People and Society. 3 Credit Hours.
Advanced instruction in writing for specialist and non-specialist audiences on topics in the People and Society disciplines, with an emphasis on essay
and multimodal forms of communication.
Prerequisite: ENG 106 or ENG 107 or ENG 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 233. Advanced Writing for STEM. 3 Credit Hours.
Advanced instruction in writing for specialist and non-specialist audiences on topics in the STEM disciplines, with an emphasis on essay and
multimodal forms of communication.
Prerequisite: ENG 106 or ENG 107 or ENG 208.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 240. Literature and Medicine. 3 Credit Hours.
Patients, doctors, and disease itself offer writers avenues to explore ultimate questions. In this course we will examine medicine—and these ultimate
questions—as represented in fiction, drama, poetry, and non-fiction. We will consider the works in terms of both the implications for medicine and the
literary uses to which medicine can be put.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 241. Art of the Con: Con Artists, Tricksters, and Card Sharks in U.S. Literature and Culture. 3 Credit Hours.
Students will read novels, examine archival materials, review graphic novels, and watch films and TV shows about con artists and tricksters in
American culture. In addition to writing essays, this course will provide students with the opportunity to learn how to annotate films in multimedia
formats. Students will also learn about actual confidence games and frauds that rely upon narrative structures.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 242. Literature and Law. 3 Credit Hours.
In this course we will study literary works, from a number of different historical periods, that focus on law and legal systems as a major theme. We will
examine the ways in which authors represent the nature of law, the actual workings of law, and the relationship between law and ideals of justice. We
will also consider other intersections between literature and law, such as legal efforts to censor literary works on political or moral grounds, and the
connection between legal and literary interpretation. Authors to be studied will include writers such as Sophocles, Plato, Shakespeare, Balzac, Melville,
Kafka, and Ginsberg.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 243. Contemporary American Migrations. 3 Credit Hours.
What does it mean to say "America is a nation of immigrants?" As a literary form, the American immigrant narrative describes the process of migration,
Americanization and (un)settlement. How do authors portray immigrant experiences? Which stories are privileged and which silenced? Centering
Miami and the state of Florida, we will read and watch narratives of American immigration, attending to how race, gender, class and sexuality as well
as the changing character and policies of place have shaped immigrant experiences. In addition, we will explore the following questions: Is ethnicity in
opposition to Americanness? How is identity transformed by migration? How and why is home remembered? Finally, what are the constitutive tropes
of American immigrant fiction, and what narrative strategies are deployed to tell these stories?
Components: LEC.
Grading: GRD.
ENG 244. Contemporary Disaster Fiction. 3 Credit Hours.
It seems we are confronted almost daily with some new disaster. From natural disasters spurred on by climate change to global pandemics, from war and genocide to never-ending recessions, poverty, and racism – living in the twenty-first century means living with the effects of daily catastrophe. While the outlines of these disasters as they are reported in the media and represented by Hollywood are predictable, the explorations of disaster in literature are less familiar. This course will explore how contemporary literature imagines catastrophe, focusing on the social, political, and historical contexts of disaster fiction. How does contemporary literature question, rewrite, or challenge what a disaster means? How does it encourage us to think about disaster differently, and, most importantly, to change our responses to it?

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 245. The Circle of Knowledge: Science and the Humanities. 3 Credit Hours.
Major works in the debate over the arts and sciences from the classical Greeks and the humanistic Renaissance to the Scientific Revolution, the impact of Darwin, the cognitive revolution in science, and postmodern indierdisciplinarity.

Components: LEC.
Grading: CNC.
Typically Offered: Fall.

ENG 246. The Harlem Renaissance and Its Afterparties. 3 Credit Hours.
In order to fully appreciate the interdisciplinary nature of the Harlem Renaissance, we will grapple with music and visual culture as well as literary texts. In other words, this is a multimedia course! Students will be asked to consider the ways in which film, music, dance, and literature conceptualize race in America. Together, we will use these various modes of artistic production to question the distinctions between spontaneity and performance, between music and literature, and between the Black arts of the present and the Black arts of the past. Students will be responsible for two 4-6 page close readings, reading quizzes, and a final project entitled Afterparties of the Harlem Renaissance in which they will connect the work of a Harlem Renaissance artist with the work of a contemporary artist.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 247. Afrofuturism. 3 Credit Hours.
The massive success of the film Black Panther and Janelle Monae's album Dirty Computer suggests that African American artists are providing broadly resonant solutions to our most urgent political concerns, constructing alternative models of liberation and self-governance through art. These works are often described as Afrofuturist, an outlook that blends science fiction tropes like space exploration, post-apocalyptic landscapes, and technological advancement with Afrocentric themes and aesthetics. In this course, we will turn a critical eye on contemporary works by Afrofuturist thinkers like Sun Ra, Nnedi Okorafor, and Octavia Butler. Through a variety of different mediums (political theory, literature, film, music, and visual culture), we will seek to answer why so many Black thinkers have turned to speculative and science fiction to imagine social and political change. This is a reading and writing intensive class. In some weeks, students are expected to read entire novels, so make sure to get a head start on reading-heavy weeks. By studying films and music released within the past several years alongside works of literature, it is my hope that students will turn the same critical lens that they use on literature to the media they consume every day.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 248. Curiosity: Vice and Virtue in Science and Literature. 3 Credit Hours.
Though we now recognize curiosity as a mostly positive character trait, most western Europeans from antiquity through the middle ages considered curiosity a dangerous vice. This perspective has lived on in sayings like curiosity killed the cat, in stories about both mad scientists and nosy children, and in our society's frequent anxieties about the unknown effects of new technologies, like cloning. What happened to bring about such a dramatic change in how curiosity was valued? What might make this desire to know either good or evil, hopeful or dangerous? To explore this question, this seminar will direct our own curiosity to a range of examples from both science and literature about characters who display exceptional curiosity, along with the consequences brought about by their desire to know. We will explore the lives of historical scientists alongside literature's myriad stories of men and women who knew too much, from Adam and Eve to Alice in Wonderland, from Doctor Faustus to Doctor Frankenstein and Sherlock Holmes. We will examine theological arguments that depicted curiosity as a vice; the biblical account of the Fall; stories of mad scientists; fairy tales; and depictions of detectives and spies on television and film. Together, we will think carefully about what might have seemed dangerous about knowledge in the past, and what might remain dangerous about it (and our own pursuits in the classroom) today.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 250. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.

Components: LEC.
Grading: GRD.
ENG 251. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 253. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 254. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 255. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 257. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 258. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 259. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 260. African-American Literature. 3 Credit Hours.
Selected readings of the eighteenth century to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 261. Literature of the Americas. 3 Credit Hours.
Selected readings from North, Central, and South American, and Caribbean literature from their origins to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 290. Beginning Fiction Workshop. 3 Credit Hours.
Frequent exercises in workshop environment, with readings in contemporary fiction. Attention to tense and points of view; reviews of grammar and punctuation. 30-40 pages of creative writing, including development and revision of one full-length short story (12-20 pages).
Prerequisite: ENG 209 or Requisite: Creative Writing Majors.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 292. Beginning Poetry Workshop. 3 Credit Hours.
Emphasis of creation and critique of new student poetry in workshop setting; continued reading in genre. Variety of styles and techniques presented, including line, image and metaphor. 12-15 new poems, plus revisions, required.
Prerequisite: ENG 209. or Requisite: Creative Writing Majors.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
ENG 301. The Study of Language. 3 Credit Hours.
Language itself as an object of study; broad linguistic issues of language types, processes of language change, and language variation. Emphasis on language in "real world" applications such as law, folk culture, poetry, education, and computers.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 306. Advanced Composition. 3 Credit Hours.
Composition and analysis of English prose. Topics vary. May be repeated if topics are different.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 310. Literature and Culture in Classical Greece and Rome, I. 3 Credit Hours.
Major pre-classical and classical Greek writers, including Homer, Sappho, Pindar, Aeschylus, Herodotus, and Sophocles, treated by close analysis, and attention to connecting themes; Greek art and archeology in reference to specific texts.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 311. Literature and Culture in Classical Greece and Rome, II. 3 Credit Hours.
Thucydides on the Peloponnesian War; the drama of Euripides and Aristophanes; the dialogues of Plato on Socrates' trial and death; Aristotle's Poetics. Early Roman tradition; Rome and its relation to Greek culture; Livy on Roman history; Cicero, Virgil's Aeneid, Marcus Aurelius.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 312. The European Middle Ages. 3 Credit Hours.
British and continental literature and thought from the 5th through the 15th centuries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 313. The European Renaissance. 3 Credit Hours.
Major writers of the European Renaissance, such as Petrarch, Machiavelli, Castiglione, Erasmus, More, Rabelais, Montaigne, Marguerite de Navarre. Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 314. The European Enlightenment. 3 Credit Hours.
Major writers of the European Enlightenment, such as Locke, Montesquieu, Vico, Hume, Voltaire, Rousseau, Diderot, Lessing, Smith, and Kant.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 315. The Classical Epic Tradition. 3 Credit Hours.
The rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 316. Early Celtic Literature. 3 Credit Hours.
Study in translation of literary, hagiographic, and historiographic sources, principally from Irish, Welsh, and Latin, dating from 800 to 1800, with an introduction to source languages and to Celtic cultures beginning in the prehistoric era.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 319. Shakespeare. 3 Credit Hours.
Representative comedies, histories, tragedies and romances. Not for students who have taken ENG 430 or 431; may not be taken concurrently with ENG 430 or 431.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 321. Major American Novelists. 3 Credit Hours.
Works by selected American novelists.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 323. Major British Novelists. 3 Credit Hours.
Works by selected British novelists.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 325. Major European Novelists. 3 Credit Hours.
Works by selected European novelists.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 331. Legal Writing. 3 Credit Hours.
A study of the composition of legal arguments in court opinions, legal briefs, oral arguments before the Supreme Court, and social-legal documents. Emphasis on analysis of issues, structure and style of legal writing, and the function of logic in persuasion.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 332. Writing for Civic Engagement. 3 Credit Hours.
This class will deeply and critically engage with a variety of texts while focusing on the value of our first-amendment rights, giving particular attention to the freedom of expression and freedom of the press including analysis of prison-writing exchange facilitated by the prison-education nonprofit Exchange for Change.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 333. Writing the Research Paper. 3 Credit Hours.
Advanced techniques in conducting research and writing the research paper. Use of traditional library resources, on-line searches, the Internet, and other research methods. Strategies for effective presentation of research findings. Students not in the Bachelor of General Studies program need permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 334. Legal Rhetoric. 3 Credit Hours.
Legal texts and the rhetoric of legal discourse.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 340. Forms of the Novel. 3 Credit Hours.
Techniques and esthetics of the novel form; emphasis on major tendencies in the evolution of long prose fiction rather than on chronological development.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 341. Modern British and American Poetry. 3 Credit Hours.
Representative poets and critics of poetry since 1900; attention to the basic principles of poetics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 342. Lyric Voices and Traditions. 3 Credit Hours.
Major figures and trends in the history of lyric poetry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 344. Data and Contemporary Culture. 3 Credit Hours.
Data is often considered the domain of scientists and statisticians. But the proliferation of data and databases across nearly all aspects of daily life – powering everything from the targeted advertisements you see when you go online to the fake news circulating on Facebook to the next financial recession – has made the study and understanding of the concept of data a vital everyday concern. This course provides an introduction to the meaning, uses, and politics of data today. Readings are drawn from literary and cultural studies, media studies, science and technology studies, sociology, information science, and the digital humanities. No prior technical experience is required.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 345. Edgar Allan Poe and the U.S. Gothic. 3 Credit Hours.
In this course, we will read most of Edgar Allan Poe’s short stories, his only novel, and many of his poems. We will also watch TV shows and films inspired by his gothic vision.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 348. Modern African Literature and Film. 3 Credit Hours.
This class will give students an introduction to the amazing range of African literature and film from the era of independence from colonialism in the late 1950s, through the postcolonial Cold War era, into the post-apartheid, post-Arab Spring present. African writers and film-makers have been unusually politically engaged, but they are also often aesthetically experimental, and their works tell stories that often challenge preconceived notions about the continent. We will look at some of the most historically important writers and film-makers, and examine a few of the big debates in African literary studies, such as the question of why and how writers use the languages of the former colonizers; but the class will also emphasize questions of gender and sexuality in African cultural production, and highlight the vibrant work of female and queer writers and film-makers.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 350. Studies in English. 3 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 351. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 352. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 353. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 354. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 355. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 356. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 357. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.
ENG 358. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 359. Studies in English. 1-5 Credit Hours.
Courses taken at other institutions with no direct equivalents.
Components: LEC.
Grading: GRD.

ENG 360. Comparative Literature of the Black World. 3 Credit Hours.
Oral and written Black literature in Africa, the United States, the Caribbean, and South America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 361. Caribbean Literature. 3 Credit Hours.
Introduction to twentieth-century literature with special emphasis on the regional preoccupation with a distinctly Caribbean aesthetic.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 363. Jewish American Literature. 3 Credit Hours.
Twentieth-century Jewish writers in the United States such as Singer, Bellow, Roth, Ozick, and Malamud.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 364. Sephardic Literature. 3 Credit Hours.
Judeo-Spanish culture and literature from medieval times to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 365. Literature of the Holocaust. 3 Credit Hours.
Literature relating to the Nazi genocide and its aftermath.
Components: LEC.
Grading: GRD.

ENG 366. Asian American Literature. 3 Credit Hours.
Literature by Asian immigrants and exiles in the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 368. Representations of Arabs and Jews in Israeli and Palestinian Literature and Film. 3 Credit Hours.
Literary narratives and films, by both Arabs and Jews, discussing the relationship between the portrayal of Arabs and Jews within Israeli and Palestinian society. The core question we will address concerns the writer’s emphatic response to the identity and history of the other. Other Issues to be examined include the influence of the literary imagination on empathy and the role of dissent and protest in society.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 372. Women Writing: Theory and Practice. 3 Credit Hours.
Women writers, emphasizing the role of gender in literary creation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 373. Literary Representations of Women. 3 Credit Hours.
The portrayal of women in literature from ancient times to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 374. Women Writers. 3 Credit Hours.
A study of women's writings and feminist criticism from 1930 to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 375. Modern Drama. 3 Credit Hours.
The major dramatists of the modern world: Ibsen, Chekhov, Strindberg, Shaw, Pirandello, and O'Neill.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 376. Contemporary Drama. 3 Credit Hours.
The dramatists of our time: Albee, Miller, Williams, Becket, Sartre, Genet, Pinter, Osborne, Stoppard, Durenmatt, and others.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 378. Animals and Humans in Literature, Art, and Philosophy. 3 Credit Hours.
Investigates the representation of animals and humans from ancient to contemporary times in literature, philosophy, and art, primarily in the West.
Topics may include: the human treatment of animals (as subjects of experimentation, as companions, as food, as entertainment); evidence of animal subjectivity and morality; and continuities between humans and other animals.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 379. Modern Literature. 3 Credit Hours.
Western literature of the modern era. emphasizing roots, traditions, practices.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 380. Contemporary Literature. 3 Credit Hours.
Fiction, drama, and poetry from World War II to the present.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 382. Studies in Medievalism: Tolkien, Martin, and Sources of Modern Fantasy. 3 Credit Hours.
Study of select works demonstrating how the Middle Ages are reimagined in post medieval fiction and film. Sources include works by the Inklings, J. R. R. Tolkien, George R. R. Martin, J. K. Rowling, Monty Python, and others, along with selections from medieval literary and documentary sources, and critical readings in medievalism.
Components: DIS.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 383. The Literature of Science Fiction. 3 Credit Hours.
A general survey of the literature of science fiction, with emphasis on writings of the twentieth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 384. The Bible as Literature. 3 Credit Hours.
Selected readings from the Bible.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 385. Myth and Literature. 3 Credit Hours.
A study of myth and ritual and their relation to literary works, from the early epic to contemporary literature.
Prerequisite: ENG 106 or ENG 107.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 386. King Arthur in Literature. 3 Credit Hours.
King Arthur in literature from the fifteenth to the twentieth century in England and America.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 387. Literature and Imperialism. 3 Credit Hours.
Relationships between empire and literary expression. Works by authors such as Shakespeare, Behn, Defoe, Bronte, Conrad, Kipling, Melville, Yeats, Twain, and Forster.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 388. Literature and Popular Culture. 3 Credit Hours.
Literary forms of popular expression, considered in relation to politics, ideology, gender, or race; comparison to other forms of popular culture in print, music, or the visual media.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 389. The Sixties: Literature, History, and Culture of the 1960s. 3 Credit Hours.
1960s culture in the United States through literature, film, and oral accounts of experience of the period.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 390. Intermediate Fiction Workshop. 3 Credit Hours.
Review of craft issues presented in 290, with emphasis on development of structure and contemporary use of point of view.
Prerequisite: ENG 219 or ENG 290.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 391. CW Intermediate Mixed-Genre Workshop. 3 Credit Hours.
A multi-genre workshop that will focus on developing practical issues of craft and technique presented in ENG 219 with an emphasis on exploring point of view in fiction, poetry and nonfiction. 12-30 pages of original work will be submitted and revised in workshop. In addition, the student will submit a final craft essay (10-12 pages) on a topic relevant to student's writing interests and challenges.
Prerequisite: ENG 219.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 392. Intermediate Poetry Workshop. 3 Credit Hours.
Review of craft issues presented in 292, integrating formal strategies with research topics.
ENG 219 Or ENG 292.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 395. Special Topics. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 396. Special Topics. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 397. Special Topics. 3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 398. Directed Readings/Directed Research. 3 Credit Hours.
By arrangement with instructor. Content varies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 401. Senior Seminar in Literature. 3 Credit Hours.
An intensive study of a literary topic or figure.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

ENG 402. Independent Study. 3 Credit Hours.
An intensive study of a literary topic or figure.
Components: IND.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

ENG 404. Creative Writing (Prose Fiction). 3 Credit Hours.
Work toward professional standards primarily in prose fiction. Student fiction is considered in workshop sessions with comment by members of the class and instructors.
ENG 390.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 406. Creative Writing (Poetry). 3 Credit Hours.
Work toward professional standards in poetry. Student poetry is considered in workshop sessions with comment by members of the class and by instructor.
ENG 392.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 407. Creative Writing Special Topics. 3 Credit Hours.
Advanced skills and processes essential to producing compelling fiction, poetry, or nonfiction in designated genre and form. A portfolio of writing in specified genre and form to result from broad readings and research.
Prerequisite: ENG 105 or 106.
Components: WKS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 408. Writing Autobiography. 3 Credit Hours.
Literary style and method using student autobiography as a resource.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 410. Old English Language and Literature. 3 Credit Hours.
The grammar, syntax, and phonology of Old English language; readings in Old English poetry and prose.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 411. Old English Literature. 3 Credit Hours.
Translation and Close analysis of Beowulf or other major poetic texts of Old English literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 420. Chaucer. 3 Credit Hours.
Chaucer’s major works.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 430. Shakespeare: The Early Plays. 3 Credit Hours.
Shakespeare's plays from the period 1583-1600. May not be taken concurrently with ENG 319.
MAY NOT BE TAKEN IN THE SAME TERM WITH ENG 319.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 431. Shakespeare: The Later Plays. 3 Credit Hours.
A study of the second half of Shakespeare's canon, read in chronological sequence. The plays will be selected from those composed in the period 1600-1611. May not be taken concurrently with ENG 319.
MAY NOT BE TAKEN IN THE SAME TERM WITH ENG 319.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 432. English Renaissance Poetry and Prose. 3 Credit Hours.
A study of such figures as Wyatt, Sidney, Spenser, Nashe, Marlowe, Shakespeare, Jonson, Donne, Bacon, Milton.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 433. English Renaissance Drama. 3 Credit Hours.
English drama during the sixteenth and seventeenth centuries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 434. Seventeenth-Century Poetry and Prose. 3 Credit Hours.
Seventeenth-century writers and forms, including work by major and minor writers such as James I, Jonson, Donne, Bacon, Lovelace, Carew, Herrick, Andrewes, Herbert, Milton, Marvell, Clarendon, Dryden, Rochester, Behn, and Bunyan.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 435. Milton. 3 Credit Hours.
Selected readings in the poetry and prose of John Milton.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 440. Restoration and Eighteenth-Century Literature. 3 Credit Hours.
English poetry and prose, exclusive of the novel, from Dryden to Burns.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 441. 18th-Century British Novel. 3 Credit Hours.
The British novel through the late eighteenth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 442. Politics and Literature. 3 Credit Hours.
Relations between political theories and forms of literary expression.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 450. The Early Romantic Period. 3 Credit Hours.
The rise of Romanticism in England and the first generation of writers, Blake, Wordsworth, Coleridge, and their contemporaries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 451. The Late Romantic Period. 3 Credit Hours.
The second generation of English Romantic writers: Byron, Shelley, Keats, and their contemporaries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 452. Jane Austen and Literary Criticism. 3 Credit Hours.
Jane Austen is both an influential, critically celebrated novelist and a cult figure. In this discussion course we will read five of Austen’s six novels, employing some of the most illuminating criticism and responses to develop our understanding of Austen’s work, her place in literature, and her place in popular culture. We will also consider the assumptions and purposes of the criticism and theory we read.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 455. Victorian Poetry and Prose. 3 Credit Hours.
Selected English poetry and prose of the period, exclusive of the novel.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 456. Nineteenth-Century English Novel. 3 Credit Hours.
Studies in the development of the English novel from Scott to Conrad.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 460. Modern British Literature. 3 Credit Hours.
Studies in Edwardian and Modern literature. Modernist theory and techniques will be illustrated by reference to the work of selected major figures since 1900.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 461. Contemporary British Literature. 3 Credit Hours.
British literature from World War II to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 465. Irish Literature. 3 Credit Hours.
Twentieth-century Irish writers such as Yeats, Synge, Joyce, Stephens, O’Casey, Beckett, and Lavin. Consideration of Irish history, mythology, politics, and culture.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 466. Joyce. 3 Credit Hours.
The major works of James Joyce.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 470. Contemporary British and American Poetry. 3 Credit Hours.
The poetry of the contemporary period, 1945 to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 472. Literature and Psychoanalytic Theory. 3 Credit Hours.
A study of the ways in which Literature, Literary Criticism, and Psychoanalytic Theory interact.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 473. Twentieth-Century Literary Theory. 3 Credit Hours.
An introduction to the major theories of the past century (e.g., psychoanalytic, formalist, materialist, feminist, new historicist).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 479. Storied Pasts: Nineteenth-Century U.S. History and Literature. 3 Credit Hours.
This interdisciplinary course explores 19th-century American intellectual and cultural history through the lens of literature. Analyzing key works of fiction, poetry, and philosophy as both literary texts and historical sources, we will seek to discover how the changing themes and forms of nineteenth-century literature shaped and/or reflected larger intellectual, political, and social currents. Students will read novels by authors such as Hawthorne, Melville, Twain, Jewett, Gilman, James, Wharton, and Crane alongside historical material.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 480. Early American Literature. 3 Credit Hours.
American writing before 1800. Topics such as colonialism, ethnicity, nationalism, and the ideology of individualism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 482. American Literature: 1800-1865. 3 Credit Hours.
Topics such as individualism, slavery, class and gender relations. Works by Emerson, Poe, Hawthorne, Melville, Douglass, Stowe, and others.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 483. American Literature: 1865-1915. 3 Credit Hours.
The works of such writers as Twain, Howells, James, Dickinson, Robinson, Crane, Norris, London, and Dreiser.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 484. American Literature: 1915 to 1945. 3 Credit Hours.
The works of such writers as Pound, Eliot, H.D., Stein, Frost, Stevens, e.e. cummings, Ransom, Tate, Fitzgerald, Hemingway, Djuna Barnes, Faulkner, O'Neill.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 485. American Literature: 1945 to the Present. 3 Credit Hours.
An intensive inquiry into the works of such writers as Albee, Bellow, Ferlinghetti, Ginsberg, Kerouac, Mailer, Miller, O'Connor, Plath, Welty.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 486. Early African-American Literature. 3 Credit Hours.
African-American literature from the beginnings to the Harlem Renaissance of the nineteen twenties.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 487. Modern African-American Literature. 3 Credit Hours.
African-American literature from the Harlem Renaissance to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 488. Race, Ethnicity, and Literature. 3 Credit Hours.
Topic varies by semester. The Construction of racial and ethnic difference in literature, focusing on the politics of group affiliation and identity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 489. Queer Sexualities: Literature and Theory. 3 Credit Hours.
This class will examine a wide variety of texts in order to think about how sexuality has been represented in different historical periods, from different cultural locations, and through different literary genres and forms. We will start with the contemporary coming-out narrative of modern Western lesbian and gay identity, and then look at a series of texts that challenge us to think about desire, gender, bodies, family, and language in new ways.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 490. Studies in Women and Literature. 3 Credit Hours.
Content varies by semester. Topics such as women in classical antiquity, women in the middle ages, women in the Renaissance, women in the Restoration and eighteenth century, women in the Romantic and Victorian period.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 491. Russian and Soviet Classics in English. 3 Credit Hours.
Survey of Russian literature in translation from the late 19th century to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 492. Postcolonial Literature and Theory. 3 Credit Hours.
The legacy of colonialism as expressed in the works of Gordimer, Rushdie, Achebe, Walcott, Cesaire, Naipaul, Mukherjee, Crow Dog, Menchu, and others. Readings will address theoretical issues such as national formation, cultural hybridity, and globalization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 493. History of Literary Criticism. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 494. Feminist Literary Theory. 3 Credit Hours.
Examination of women's contributions to literary theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 495. Special Topics. 3 Credit Hours.
Content varies by semester and is indicated parenthetically following the title in the class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 496. Independent Study. 3 Credit Hours.
By arrangement with instructor. Content varies by semester. May be used for single semester thesis.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 497. Senior Thesis I. 3 Credit Hours.
Partial requirement for Departmental Honors in English Literature or Creative Writing. Research and preparation for writing senior thesis or creative project. To complete thesis, student must register for ENG 498 in following semester. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 498. Senior Thesis II. 3 Credit Hours.
Partial requirement for Departmental Honors in English Literature or Creative Writing. Writing of either a documented essay on a literary subject or project in prose fiction or poetry, to be written under the direction of a member of the faculty. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 499. Senior Creative Writing Project. 3 Credit Hours.
Partial requirement for Departmental Honors in Creative Writing. Project, in prose fiction or poetry, to be written under the direction of a member of the creative writing faculty.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 504. Form in Poetry. 3 Credit Hours.
Poetic works as literary objects, with attention to poetic trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 505. Form in Fiction. 3 Credit Hours.
Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 595. Special Topics. 3 Credit Hours.
Content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 601. Creative Writing: Fiction III. 3-6 Credit Hours.
Advanced M.F.A. workshop in the techniques of writing fiction.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 602. Creative Writing: Poetry II. 3-6 Credit Hours.
Advanced M.F.A. workshop in the techniques of writing poetry.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 604. Form in Poetry. 3 Credit Hours.
Poetic works as literary objects, with attention to poetic trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 605. Form in Fiction. 3 Credit Hours.
Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 607. Studies in Renaissance Drama. 3 Credit Hours.
Studies in Renaissance Drama.
Components: LEC.
Grading: GRD.

ENG 610. Studies in Old English Language and Literature. 3 Credit Hours.
Content varies by semester.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 611. Introduction to Digital Humanities. 3 Credit Hours.
An introduction to the theory and practice of the digital humanities from a literary and cultural studies perspective. It introduces major types of digital humanities work and central debates and concerns in the field. The course is taught in English and is open to graduate students from all humanities departments. No experience in the digital humanities or with digital tools or methods is required.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
ENG 612. Topics in Digital Humanities and Media Studies. 3 Credit Hours.
A survey of Media Studies. Students will approach a broad range of texts in the field, and outline both its historical development and present state, with a particular focus on emerging theories and practices within Media Studies and Digital Humanities in the academy. The course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 613. Practicum in Digital Humanities. 3 Credit Hours.
Offers students the possibility to apply their learning in the field of Digital Humanities and move forward on their personal Digital Humanities research project. Students will carry out many practical exercises with programming languages and digital tools, and work towards a final digital project. This course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 614. Stu Neocl Poet Prose. 3 Credit Hours.
Studies in Neoclassical Poetry and Prose.
Components: LEC.
Grading: GRD.

ENG 615. Studies in Chaucer. 3 Credit Hours.
Studies in Chaucer.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 616. Studies in Middle English Language and Literature. 3 Credit Hours.
Studies in Middle English Language & Literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 620. Studies in Shakespeare. 3 Credit Hours.
Studies in Shakespeare.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 621. Studies in Elizabethan and Jacobean Drama. 3 Credit Hours.
Studies in Elizabethan and Jacobean Drama.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 622. Studies in 16th Century Literature. 3 Credit Hours.
A survey of predominantly non-dramatic Renaissance literature, with an emphasis on the Sixteenth Century.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 623. Studies in Spenser. 3 Credit Hours.
Studies in Spenser.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 624. Studies in 17th Century Literature. 3 Credit Hours.
Studies in 17th century literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 625. Studies in Milton. 3 Credit Hours.
Studies in Milton.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 630. Restoration and 18th-Century Drama. 3 Credit Hours.
Studies in Restoration and 18th Century Drama.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 631. Studies in Restoration and 18th Century Literature. 3 Credit Hours.
Special topics in British Literature from 1660-1800.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 633. The Eighteenth-Century British Novel. 3 Credit Hours.
Survey of the British novel from Defoe to Austen.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 640. Studies in Romanticism. 3 Credit Hours.
A study of writers and genres between the late eighteenth and the mid-nineteenth century, through an investigation of questions of canonicity, epistemological orientation, colonialism, and the revolutionary context.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 645. Studies in Victorian Poetry and Prose. 3 Credit Hours.
Victorian poetry and prose exclusive of the novel. Poems by Tennyson, Browning, Arnold, Rossetti, and others. Prose works by writers such as Carlyle, Newman, Mill, Ruskin, and Pater.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 646. Nineteenth-Century British Novel. 3 Credit Hours.
Survey of the British novel from Austen to Conrad.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 648. Studies in the Novel. 3 Credit Hours.
Topics in eighteenth-, nineteenth-, and twentieth-century fiction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 650. Studies in Modern British Literature. 3 Credit Hours.
Intensive coverage of a limited topic in twentieth-century British or Irish literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 651. Studies in Joyce. 3 Credit Hours.
Close readings of Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and Finnegans Wake; extensive review of Joyce criticism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 652. Studies in Irish Literature. 3 Credit Hours.
Intensive coverage of a selected topic in Irish Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 654. Contemporary British Literature. 3 Credit Hours.
Studies in British prose, poetry, and drama since 1939.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 655. Contemporary American Poetry and Poetics. 3 Credit Hours.
Poetry and poetics from 1945 to present, focusing on Black Mountain Poetics, the New York School, the Black Arts Movement, Language Poetry and more recent writers and movements.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 658. Studies in Transatlantic Literature. 3 Credit Hours.
Literature on transatlantic themes and/or by transatlantic writers. Border crossing; ships; sailors; and other travelers; movement of people, things, and ideas in the Atlantic world.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 660. Studies in American Literature: Beginnings to 1800. 3 Credit Hours.
Studies in American Literature: Beginnings to 1800.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 661. Studies in American Literature: 1800-1865. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 662. Studies in American Literature: 1865-1914. 3 Credit Hours.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 663. Studies in American Literature: 1914 to 1950. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 664. Studies in American Literature: 1950 to the present. 3 Credit Hours.
Studies in American Literature: 1950 to the present.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 665. Studies in African-American Literature. 3 Credit Hours.
Studies in African-American Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 666. Caribbean Literature. 3 Credit Hours.
Caribbean literature and cultural theory; Caribbean aesthetic.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 667. Caribbean Popular Culture. 3 Credit Hours.
Special topics on the relations among politics, popular culture, and literature in the Caribbean region.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 668. Studies in Race and Diasporic Literatures. 3 Credit Hours.
Analysis of race, ethnicity, immigration, and transnationalism in literature and cultural theory.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 669. Studies in Women's Literature. 3 Credit Hours.
Topic varies by semester. Analysis of gender issues and literary production by women.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 670. The Classical Tradition and English Literature. 3 Credit Hours.
A study of classical authors such as Homer, Aeschylus, Sophocles, Euripides, Virgil, Ovid, Horace, and Catullus, who have been seminal for English writers from the Middle Ages to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 672. Comparative Studies in Renaissance and Baroque Literature. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 673. Eighteenth-Century European Literature. 3 Credit Hours.
Major literary and aesthetic works of the European Enlightenment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 674. The Romantic Movement in Europe. 3 Credit Hours.
A study of the forces and influences of the Romantic Movement in Europe as these intersect English Romanticism.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 675. European Novel. 3 Credit Hours.
Major authors and trends in the development of the European novel as a unified literary tradition.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 677. Studies in Modern Literature. 3 Credit Hours.
Studies in Modern Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 678. Studies in Contemporary Literature. 3 Credit Hours.
Studies in Contemporary Literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 680. History of Literary Criticism. 3 Credit Hours.
A survey of literary criticism and theory from the ancient Greeks to the early twentieth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 681. Introduction to Literary Theory. 3 Credit Hours.
Twentieth-century literary theory beginning with the New Criticism and including topics such as semiotics, hermeneutics, deconstruction, feminism, and neopragmatism.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 682. Contemporary Criticism and Theory. 3 Credit Hours.
Topics in recent criticism and theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 683. Literature and Psychoanalysis. 3 Credit Hours.
The interrelations between literary theory, textual analysis, and psychoanalytic theory.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 684. Theory of Narrative. 3 Credit Hours.
Analysis of narrative theories, ancient to contemporary.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 685. Feminist Theory. 3 Credit Hours.
Feminist writing and criticism from the nineteenth century to the present. Supplementary readings in anthropological, psychoanalytic, and socio-political criticism, as well as in theories of poetic tradition and the poetic process.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 686. Theories of Gender and Sexuality. 3 Credit Hours.
Queer theory and its relationship with gender studies, critical race studies, and emerging directions in the field.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 687. Studies in Literature and Culture since 1950. 3 Credit Hours.
Studies in Literature and Culture since 1950.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 688. Studies in Latino/a Literatures and Cultures. 3 Credit Hours.
Comparative and interdisciplinary approaches to art, film, music and literature. Topics may include: borderlands, postcolonial and "Americas" methodologies; ethnicity, race and mestizaje; immigration and the "Latiniazation" of the U.S.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 689. Comparative Americas Studies. 3 Credit Hours.
Comparative, interdisciplinary and transnational approaches to literature and cultures of the Americas.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 691. Graduate Practicum I: Teaching College Writing. 0 Credit Hours.
Methods and problems in teaching English composition and college writing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 692. Graduate Practicum II: Teaching College Literature. 0 Credit Hours.
Methods and problems in teaching introductory literature courses.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 693. Teaching College Composition. 3 Credit Hours.
Rhetorical and literary theory related to composition instruction. Designed primarily for Teaching Assistants in the English Department, but open to all students planning to teach writing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 695. Special Topics. 3 Credit Hours.
Varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 696. Directed Readings. 1-3 Credit Hours.
Varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 697. Readings for the Qualifying Examination. 1-3 Credit Hours.
Varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 699. Academic Jobs in English. 1 Credit Hour.
In this course, advanced doctoral candidates will develop and refine the materials required to apply successfully for academic positions in English. They will practice interview techniques and participate in a mock interview. They will design and deliver a presentation on their teaching and research. The course's aim is for students to complete their written job materials (e.g. CV, job letter, writing sample, teaching portfolio, and online profile) and to master the skills required to give effective interviews and job presentations.
Components: PRA.
Grading: SUS.

ENG 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ENG 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of ENG 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

Epidemiology and Public Health (EPH)

EPH 600. Introduction to the Science & Practice of Public Health. 3 Credit Hours.
This introductory course will provide students with the opportunity to explore and analyse contemporary public health issues and provide a history and a context that will allow students to better understand the field of public health, its core disciplines and their role as future public health professionals. Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
EPH 601. Medical Biostatistics I. 4 Credit Hours.
Introduction to probability and statistics including descriptive statistics, tests of hypothesis, regression analysis, contingency tables, nonparametric tests, and life tables. Students gain hands-on experience in the analysis of medical data using several computer systems and at least one of the different statistical packages such as: BMDP, SAS, PSTAT, SYSTAT, and Minitab.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 602. Biostatistics II. 3 Credit Hours.
Continuation and elaboration of EPH601. Topics include design of factorial experiments, analysis of variance and variance components, multiple linear regression, and life tables.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 603. Medical Biostatistics. 3 Credit Hours.
This course is a hands-on introduction to biomedical research with a focus on collecting and analyzing patient data. Topics covered include: data security, visualization and analysis. Statistical topics include: probability, frequentist and Bayesian thinking, and both parametric and non-parametric statistical methods. Methods covered include: regression, contingency tables, and survival analysis techniques.
Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 604. Clinical Trials. 3 Credit Hours.
The Clinical Trials course is directed specifically at providing an overview of the broad area of clinical trials. Specifically, this course presents principles that underlie the design and conduct of clinical trials, statistical methods used in clinical trials, and ethical considerations in clinical trials and research. The course uses lectures, case studies, board discussions, written assignments, and applied exercises. The course is designed to focus on practical aspects of designing and conducting randomized clinical trials in a real-world public health settings.
Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 607. Interdisciplinary Health Communication. 3 Credit Hours.
Health communication is a critical tool for protecting and improving the health of people and their communities and is most effective when developed collaboratively using expertise from many disciplines. The focus of this course is the development of written, oral, and multimedia communication skills that will enable you to effectively communicate concepts and evidence-based scientific findings to diverse communities and professionals in health and other fields. Class time will largely be devoted to the development of these skills in the context of working effectively in interprofessional teams of approximately 5-6 students. Working collaboratively, students will develop teamwork skills and an awareness for the diversity of expertise that underpins effective interprofessional communication teams.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 608. Professional Development. 2 Credit Hours.
This 2-credit seminar will be dedicated to providing students with opportunities to gain experiences with professional skills such as job interviewing, public speaking, preparing budgets, grant proposal writing, and working with community organizations. The course will be interactive, where I will talk about skills that are important in the public health workforce and students will then practice the skills in pairs or groups. There will be no exams or quizzes; rather, students will be graded on public speaking, performance in a mock job interview, ability to write a mock grant application, developing a grant proposal budget, preparation of a CV/resume, and disseminating research findings to community stakeholders. Class will meet every Tuesday from 1 to 3:30 in CRB 989. Students should come ready to participate and to give constructive feedback to their peers. Each topic will be covered across 2 (and sometimes 3) class sessions, so that everyone has sufficient time to practice their skills and receive feedback.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
EPH 611. Mindfulness in Public Health and Medicine. 3 Credit Hours.

The stress of modern life can adversely impact physical and mental health functioning which may be ameliorated by the practice of mindfulness. Mindfulness is a mental state achieved by focusing one’s awareness on the present moment, while calmly acknowledging and accepting one's feelings, thoughts, and bodily sensations. This practice is derived from Buddhist traditions more than 2,500 years old. In recent decades these practices have been adopted for use in United States and elsewhere and evidence is growing that these practices can reduce psychological symptomatology (e.g., symptoms of depression and anxiety), enhance resiliency in response to stressors, enhanced pain coping ability, and enhanced attentional regulation, among other benefits. The first half of this course will be devoted to the completion of an 8-week Mindfulness-Based Stress Reduction Course (MBSR) that will involve in-class activities and daily at-home mindfulness practice assignments. Students will maintain a journal documenting their "first-person" encounter with the practice of mindfulness. The second half of the course will be organized around a lecture format with weekly brief quizzes. Anonymous questionnaire data will be collected before, during and after completion of the MBSR course. These data will be used by student teams to evaluate the impact of MBSR on multiple outcomes. Groups will prepare a written report and present their findings to the class at the end of the semester.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 612. Global Health. 3 Credit Hours.

This seminar examines current global public health issues, governance and decision-making challenges for the 21st Century across developing, transitioning, and developed countries. Topics of discussion include new actors for world health in the era of globalization; linking human development, poverty and health inequities; social, cultural and ethical considerations for health planning; role of industry, trade and public health; evidence based research for improved global health initiatives; foreign policy and health security challenges associated with emergence and re-emergence of infectious diseases and public and private partnerships in global health. Open only to EPH majors.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 613. Emerging Challenges in Global Health Systems. 2-3 Credit Hours.

Health systems around the world must respond to an evolving landscape of health risk and disease burden that is increasingly dominated by complex, chronic illness. Contrary to what is often espoused, chronic and non-communicable diseases affect both poor and rich. Yet, access to health services is highly inequitable creating immense divides and equity imperatives that have largely been ignored in global health. This course examines how global and national health systems - particularly in low and middle-incomes countries – can better face the changing burden of disease with a focus on equity and universal coverage.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 614. Global Outbreak. 3 Credit Hours.

This seminar examines current global public health issues and provides an overview of global outbreak investigations and disease surveillance. Participating in epidemiological/outbreak investigations in international settings provides unique opportunities to learn about health challenges in different ecologic, cultural and resource limited settings. This seminar will also allow students to gather insight into public health surveillance and understand the utility of the ongoing systematic collection, analysis and interpretation of data for use in planning and evaluation of public health intervention programs.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 616. Global Health and Global Justice. 3 Credit Hours.

Global health has emerged as a field distinct from older visions of international health, by focusing on macro-level problems caused by globalization whose origin and solution must transcend national boundaries. Yet global health has also challenged ethics to develop new accounts of justice in this changing world. This course will analyze global health from the lens of ethics. The course will introduce core theories of public health ethics (e.g. utilitarianism, statism and cosmopolitanism) to make sense of the rise of global justice as a distinct field of ethical inquiry. Armed with this conceptual foundation, we will then examine some of the central problems of global health, as well as proposed solutions to those problems. Such skills in argumentation will be increasingly critical for future public health leaders, yet too few public health students are exposed to ethical analysis. By applying ethical frameworks to analyze global health problems, students will gain critical skills in how to integrate distinct forms of knowledge, how to develop cogent normative arguments, and how to articulate and defend an account of fair decision-making and just policies in global health.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPH 617. Disease Prevention and Health Promotion. 3 Credit Hours.
This course will introduce students to the science of prevention and health promotion. More specifically, through didactic presentations, group discussions, article readings and critiques, and a term project, this course will focus on providing students with an overview of: the top preventable causes of disease in the U.S., the etiology of disease (with a focus on the top preventable causes of disease in the U.S.) across the lifespan, the role of prevention theories in the development of preventive interventions, and the role of methodology in prevention science. The course will also provide an overview of efficacious/effective preventive interventions, including (but not limited to): family community, and school level interventions. Examples from the fields of obesity, drug use, smoking, and HIV will be used to illustrate the course learning objectives detailed below.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 620. Health Education and Behavior. 3 Credit Hours.
Educational processes with special emphasis on the social and cultural determinants of health behavior, health education as a process of social change, and community based health education organizations. Open only to EPH majors.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 621. Fundamentals of Epidemiology. 3 Credit Hours.
Principles and methods of epidemiology. Descriptive epidemiology, environmental and other risk factors, detection of outbreaks, basic demography, and etiologic studies.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 622. Obesity and Public Health. 3 Credit Hours.
Nearly two thirds of the United States is now considered overweight or obese and the associated medical costs are placing an unsustainable burden on our health care system. However, the issue of overweight/obesity extends beyond behavioral choices and medical costs. This course will take a deeper look at the complex interactions between our environment, behaviors, and policies, and how they jointly contribute to the obesity epidemic. This course will provide an interdisciplinary perspective of the biological, psychosocial, ecological, and economic determinants that contribute to obesity and the resulting pathways to chronic disease and disability. Finally, current evidence-based public health programs currently will be discussed to stimulate critical thinking necessary to implement effective obesity prevention and control programs.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 623. Determinants of Health and Health Disparities Across the Life Course. 3 Credit Hours.
This course builds on the concepts and methods examined in EPH 614, delving further into risk and protective processes related to health outcomes across the life course, from the prenatal period to older adulthood. Class readings and discussions will examine examples of common risk pathways contributing to various diseases, including pathways hypothesized to be related to health inequities and disparities, such as: economic and educational disadvantage, stress, sedentary behavior and poor behavioral regulation, social isolation. Common protective pathways that promote health are also reviewed, such as: positive parenting and family relations, and social support.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 624. Applied Epidemiology: Theory and Practice. 3 Credit Hours.
This course will demonstrate how to apply traditional epidemiological methods for determining disease etiology to real life problems in public health and health services research. It will introduce students to the field of applied epidemiology, the division of epidemiology that involves the detection, response, control, and prevention of public health issues in the population. It will focus on the practice of epidemiology in government agencies and community settings, providing a contrast to epidemiologic work conducted in research settings and academic institutions. Upon completion of this course, students will understand the role and methodologies of applied epidemiologists and learn skills that will prepare them for future work as public health practitioners.
Prerequisite: EPH 621.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPH 625. Research Ethics in Public Health. 3 Credit Hours.
The course identifies and analyzes ethical issues in epidemiologic practice and research. Issues include data acquisition and management, confidentiality, valid consent, advocacy, public policy, subgroup stigma, research sponsorship, conflicts of interest, communication of risk, and international and intercultural difference.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 626. Health Equity. 3 Credit Hours.
The goal of this course is to cover health disparities from multiple perspectives and levels of analysis. We know that the same ethnic, social, and cultural groups are characterized by disparities in many different health outcomes—including "voluntary" behaviors such as crime, violence, sexual risk taking, and substance abuse as well as "involuntary" outcomes such as diabetes, cancer and heart disease. These disparities are rooted in the same structure of how groups relate to each other, in the physical built environment, in the quality of education provided to children, and in access to quality health care. We will cover all of these (and other) determinants in this course.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 631. Public Health Administration. 3 Credit Hours.
An overview of the historical background, philosophy, and purpose of public health. Relationship between government, law, and public health. Organization, management, and intergovernmental relationships of public health agencies in the United States at the federal, state, and local level. Basic principles of management, decision making, and prioritizing in public health are discussed. Overview of programs and services provided by public health organizations with emphasis on current public health issues and problems are also included. Open only to EPH majors.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 632. U.S. Health Systems. 3 Credit Hours.
This course provides an introduction to the multiple systems that define, describe, and shape the delivery of health care in the United States. Using case studies and presentations of major issues, this course will give the learner an appreciation of the dilemma confronting policy makers, providers, and patients: how to balance cost, quality, and access.

Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 633. Policy & Management of the Health Effects of Climate. 3 Credit Hours.
Using a health-centered approach, the course will provide critical review of the existing policies aimed at managing the health effects of climate/weather, identify potential gaps in the policies needed to improve and protect health effects of short- and long-term trends of climate and weather and extreme weather. Students will be exposed to real-world preparation and adaption strategies to manage health effects of climate, and develop understanding of and skills in the cost-benefit analysis of evidence-based policies. As a part of the course, students will develop and evaluate (evidence-based) policies to manage a selected health outcome with respect to a selected (in)direct climate/weather related condition(s).

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 639. Ecology and Control of Vector-Borne Diseases. 3 Credit Hours.
The course will provide students with an overview of the epidemiology of major vector-borne diseases in the U.S. (e.g., Lyme Disease, West Nile Virus) and globally (e.g., malaria, dengue, filariasis, leishmaniasis, and other arboviruses), field and lab-based methodologies for vector studies to incriminate vector species and assess transmission dynamics, vector and disease surveillance, and "cutting-edge" vector control technology. A major focus will be on the ecology of vectors in their local environments and how transmission dynamics are affected by changes in land use, urbanization, and climate. Students will learn about new WHO-approved strategies for integrated Vector Management (IVM) and how they are applicable for the prevention and control of all vector-borne diseases.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 640. Urban Environment and Public Health. 3 Credit Hours.
Where we live, where we work, where we go, and how we get there may all impact our behaviors and ultimately our health and well-being. This course examines the urban environment - in particular, those aspects of urban/suburban/semi-rural environments created by humans. This includes how homes, neighborhoods, cities and regions impact public health challenges such as obesity, chronic disease, mental health, infectious disease, and injuries. This course will teach students to translate scientific findings to design healthy communities, and develop interventions to promote urban health. Students will learn how to map neighborhood characteristics such as food outlets, parks and walkability, and to develop recommendations for policymakers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 641. Environmental Health. 3 Credit Hours.
Interdisciplinary scope of environmental health problems. Development of a practical, dynamic model for integrating fundamental concepts from a variety of environmental disciplines. Open only to EPH majors.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 643. Introduction to Occupational Health. 3 Credit Hours.
This course offers a general introduction to major concepts and issues in occupational health and safety from local to global, addressing fundamental topics and current controversies. The course covers core topics that prepare students to more fully understand and address occupational health issues: toxicology, exposure assessment, occupational epidemiology, risk assessment/risk management, prevention of workplace injury and disease, health promotion of adults and protection of worker populations from environmental hazards.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 644. Fundamentals of Program Evaluation. 3 Credit Hours.
Fundamentals of Program Evaluation was developed as a survey course directed specifically at providing an overview of the broad area of program evaluation. At its base, program evaluation is the investigator of a program's characteristics and merits. In context of health care, the purpose of program evaluation is to provide information in the effectiveness of programs or interventions so as to optimize the outcomes, efficiency and quality of health care. Evaluation of a program is an essential part of the successful implementation and conduct of any health care project or intervention, and should ideally be designed along with the project itself. Program evaluation activities can use a wide range of methodologies (e.g., qualitative, quantitative), analyze different aspects of a program (e.g., structure, activities, organization), and have a large number of intended outcomes (e.g., achievement or program's goals objectives, extent of program impact, program cost).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 646. Climate and Health. 3 Credit Hours.
There is an intricate relationship between climate and health. Climate changes directly affect health and well-being but also mediate the effects of socio-physical and biochemical changes in the environment on health and well-being. This course will help students unravel this intricate relationship between climate and health. A range of topics will be covered including: a) the etiology of disease with respect to climate change, b) shifting burden of disease and disability with respect to changing climate and climate-mediated changes in the environment, and c) application areas of climate-health linkages: unintentional injuries and climate change, vector-borne disease and climate change, heat-related mortality, disease of metabolic syndrome and climate change, cardiopulmonary, allergy and immunology disease due to bioaerosols and air pollution.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 647. Community Based Participatory Research. 3 Credit Hours.
Community-based participatory research (CBPR) is methodology, increasingly popular in public health and other disciplines, which invites community collaboration throughout the research process from conceptualization of study focus to dissemination of findings. This course will provide an opportunity for medical and graduate students to better understand the process by which community members and academic researchers work collectively to address health disparities and influence social change.
Prerequisite: EPH 621 and EPH 617 or EPH 620. And Requisite: Must be in a Plan of BSTS or EPID or PREV or MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 648. Climate, Cool Cities, Healthy Communities. 3 Credit Hours.
In the current era of climate change and rapid urbanization, an understanding of the impacts of urban design, planning and policies on climate and human health in urban and suburban areas is critical. Drawing on diverse disciplinary perspectives, including public health, architecture, planning, and public policy and government and non-profit sectors, the course provides students with the ability to comprehend, synthesize, communicate, and apply evidence-based urban design principles in relation to current and future challenges of climate and health. Additionally, in accordance with the adage, “Think globally, act locally,” students will have the opportunity to interact with local experts who will share their knowledge of national and international policies and programs in the area of urban design, climate and health – while applying their learning to measure current challenges and inform policies of climate and health in the urban/suburban localities of the South Florida region.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 650. Health Economics for Evaluation and Policy. 3 Credit Hours.
This course centers on a discussion of the criteria used to evaluate the allocation of resources and analyze the behavior of two of the principal actors—consumers and firms. The principles of microeconomics are presented in the context of health care systems and markets. Numerous real-world issues and case studies are used to demonstrate economic decision-making techniques, especially for health care organizations and consumers.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 651. Research Methods. 3 Credit Hours.
Purpose of the course is to provide students with a sound understanding of the fundamental concepts and methods for conducting public health research. After a brief introduction to the philosophy of science, the major emphasis in the early portion of the course is on research conceptualization, design and measurement, with a particular focus on the logic of minimizing rival alternative explanations of finding for experimental and quasi-experimental studies.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 652. Health Policy. 3 Credit Hours.
Part I will examine seven models encompassing different perspectives on public health: philosophy, political theory and politics, law, economic, science and information culture and religion, and organization and management, including how they relate and their relevance in formulating, implementing, and evaluating public policy. Part II will examine the policy making process including how issues reach the government agenda, how laws are formulated, and how the process affects substance. Part III describes the core elements of policy analysis including: problem definition; background; political, economic, and social landscape; development of policy options; and recommendation. It will also include discussions of how to find and analyze documents and data as well as discuss the financing of health care.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 653. Leading Change in Population Health—Moving From Talk to Action. 3 Credit Hours.
Addressing the public health challenges of the 21st century will require public health leaders to be facile in leading change efforts (on the individual, organizational and system levels) and multi-stakeholder collaborations for measurable results. This transition course at the end of the MD/MPH second year will prepare MD/MPH students for their more advanced experiences in community and public health in the third and fourth years. The objective of this course is to provide students with an opportunity to develop essential skills in leading change in public health while linking their academic work in epidemiology and public health for real world application in public health practice. Students will receive didactic presentations on topics such as leading change, mobilizing multi-stakeholder leaders for aligned action, interest-based negotiation, leading from the middle, leveraging conflict to advance adaptive challenges, communicating /framing your message(s), systems change, as well as lectures on health disparities and the social determinants of health. These lectures will be integrated with interactive discussions and hands-on small group exercises to explore how practitioners can translate public health and community knowledge into sustainable solutions. Leading Change in Population Health—Moving From Talk to Action will provide students with 21st-century leadership skills that prepare them to tackle public health issues in our society from the most simple to very complex. Participants will be challenged to think differently on many levels (systems thinking, interplay between relationships and results, etc.) and prepare them to be agents of change for future generations.

Requisite: Academic Plan: BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 655. Health Economics and Financing. 3 Credit Hours.
Health economics studies economic principles, methods of decision making, and the allocation of resources within health care systems and markets. This course will provide students with an understanding of the flow of funds and services throughout the U.S. health care system and how the structure and financing of health care impacts population health status. We will use numerous real-world issues and case studies to demonstrate economic decision-making techniques, especially for health care organizations and consumers (patients, providers). Students are not expected to have familiarity with economic concepts and principles prior to taking this course. In addition, students are not expected to use calculus in this course. However, students are expected to have an understanding of basic algebra, and graphical analysis will be used often throughout the class. Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 656. Qualitative Research Methods. 3 Credit Hours.
The purpose of this course is to introduce students to the philosophical underpinnings of qualitative research and its practical application to the field of public health. Students will 1) develop an understanding of the significance and use of qualitative research methods in public health; 2) differentiate between numerous qualitative research approaches, including phenomenology, grounded theory, and ethnography; 3) describe different methods for collecting qualitative data, including interviews and focus groups; 4) develop skills in the collection, analysis and reporting of qualitative data; and 5) develop a basic understanding of how qualitative and quantitative research may be combined in mixed methodological approaches. The course will include a combination of lectures, presentations of applied qualitative research studies by guest experts, student presentations, and assignments designed to foster students’ skills in formulating appropriate qualitative research questions, designing qualitative studies, collecting and analyzing qualitative data, and summarizing findings for publication. More specific details on the topics to be covered in this course are provided below.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 657. Toxicology: Climate and Health. 3 Credit Hours.
The course will train students in developing an understanding of and skills in assessing the mechanism of the effects of climate, weather and climate and weather mediated effects of environment on biophysiological responses. For example, changes in levels of bronchoconstriction due to change in temperature is a direct effect of weather, and increase in allergies and asthma due to increase in bioaerosols in response to increase in precipitation and temperature is an indirect effect. Students will be exposed to general principles of toxicology and toxicological experimental design, including in-vitro and in-vivo experiments, designs needed to understand and investigate the health effects of climate, weather and climate mediated environmental conditions. The course objectives are to (1) understand general principles of toxicology, (2) understand biophysiological responses to climate, weather and weather anomalies, (3) develop an understanding of and skills in in-vitro and in-vivo experimental designs to assess toxicity of climate, and (4) characterize and quantify biophysiological responses in response to the trends and anomalies of weather and climate. Prerequisite: BIL 150 or BMB 401 or CHM 111 or CHM 112 or CHM 201 or CHM 202.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 658. Analysis of the Health Effects of Climate. 3 Credit Hours.
The course will train students in analytical skills needed to quantify the health risks associated with climate, weather and weather anomalies (or extreme weather) adjusting for confounding factors and time-space hierarchical structures. The course will include quantification of time-space lagged exposure estimation, spatial, temporal and spatiotemporal analyses, exposure and risk uncertainty analyses.
Prerequisite: EPH 727.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 659. Public Health Seminar I. 1 Credit Hour.
The EPH 659-02 Public Health Seminar Series is designed to explore contemporary issues, problems, and controversies in public health through an interdisciplinary perspective. This course is designed to help you develop and sharpen the skills which are the primary building blocks of a successful career in consulting (as well as many other areas of business), namely (1) analysis, (2) presentation, and (3) teamwork. This class will help you to develop rigorous skills in each of these areas through (i) discussion of the principles underlying best practices and (ii) application and feedback in a series of exercises and cases. Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
EPH 660. Public Health Seminar II. 2 Credit Hours.  
The Public Health Seminar is designed to explore contemporary issues, problems, and controversies in public health through an interdisciplinary perspective. Upon the completion of the course students will be able to: 1) understand key public health problems, their distribution, and prevention strategies, 2) examine the complex tapestry of social, economic, political, and environmental factors that affect public health outcomes, 3) understand the complexities inherent in improving health locally and on a global scale, 4) examine the major determinants of, and responses to, poverty and health, 5) analyze public health disparities through a social justice perspective, 6) understand and analyze the roles and agendas of major stakeholders in local, state, national, and global public health, 7) understand the link between global and local health issues, 8) discuss selected interdisciplinary, cross-cutting issues in public health, 9) explain the interrelationships among the five core areas of public health. This course is only open to MD/MPH students.  
Requisite: MD/MPH Four Year/Regional Med Camp and EPH 659.  
Components: SEM.  
Grading: GRD.  
Typically Offered: Spring.

EPH 661. Public Health Nutrition. 3 Credit Hours.  
This course provides a dynamic, interactive approach to public health designed to prepare students in basic policy, epidemiology, and health education related to nutrition. Recognizing the multiple social, cultural, environmental, and physiological factors leading to nutritional disease. The course includes experts from a variety of disciplines. Public health nutrition addresses issues germane to the public’s health by elucidating their extent, determinants and consequences, and the policies and programs to address them. Open only to EPH majors.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

EPH 662. Child Policy. 3 Credit Hours.  
This course will focus on U.S. federal child policy. This course has been designed to provide a comprehensive, multi-disciplinary (e.g., public health, public policy and social work), and cross-sector perspective (e.g., government, private and philanthropic sectors) on child and family policies. Sessions will cover varying approaches and include presentations from a wide range of experts.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

EPH 663. Hospital Health Care Services and Access: An Interdisciplinary Inquiry. 3 Credit Hours.  
Hospitals play a vital role in the health of the communities they serve. Yet, their accessibility and availability to those communities is often unequal, and significant racial and ethnic disparities exist in the utilization of hospital services, quality of care provided, health outcomes and patient experiences. Attention has been increasingly focused on creating sustainable solutions to attenuating these disparities. Initial steps include the examination of community and hospital data to identify inequalities in disease distribution, as well as utilization of care. Such data provides evidence to define critical areas of concern and provides a starting point for engagement with the community. The real work begins when hospitals work with community partners to engage in authentic and collaborative partnerships to address the needs and the health of the local citizens. This process, known as Community-Based Participatory Research (CBPR), can harness resources and build capacity to address health issues relevant to the community. This course will discuss the change that hospitals can achieve when they facilitate community-academic partnerships that bring together knowledge, expertise and interest of community partners with the research and training of clinicians and academic researchers.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

EPH 671. Maternal and Child Health. 3 Credit Hours.  
Preventative and therapeutic concepts pertinent to the reduction of morbidity and mortality among mothers and their children.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

EPH 678. CAPSTONE PRACTICUM EXPERIENCE AND PROJECT PREPARATION. 1 Credit Hour.  
This course is available only for MD/MPH students. This is the first of two courses required to complete the MPH capstone project. Students will spend the summer between their first and second year of medical school identifying a community health issue of interest and developing a proposal using evidence-based methodology to address the issue. They will obtain practical field experience in a public health setting related to their capstone project area of interest. They will also identify relevant stakeholders who would benefit from the capstone project and can serve as mentors in completion of the project.  
Requisite: Plan Code MDRP_MD.  
Components: PRA.  
Grading: GRD.  
Typically Offered: Spring.
EPH 679. Learning Collaboratory. 3 Credit Hours.
This course is the first semester of a 4-semester program titled the "Public Health Learning Collaboratory". The mission of this Department of Public Health Sciences (DPHS) program is to transform the learning experience of master of public health students by providing opportunities to develop core skills necessary for effective public health practice, while completing their capstone or thesis in the community. Organized in small groups around 4 thematic areas, students learn about substantive areas (e.g., prevention with children and families, access to health care, urban health, health in Latin America), while building competencies to successfully develop and implement projects in collaboration with community health organizations (e.g., community engagement, needs and capacity assessments, researching evidence based practices, teamwork and problem-solving skills, project planning, development and implementation skills).

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

EPH 680. Practical Field Experience. 3 Credit Hours.
Practical field experience requirement for MPH students. Students are placed in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student.

Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 681. Capstone Experience Project. 3 Credit Hours.
The capstone project is intended to build upon EPH 680 field work and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems.

Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 682. Generalist Capstone Project. 2 Credit Hours.
The Capstone Experience Project Special is intended to build upon EPH 680 field-work (or equivalent course) and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems. As part of the project, the student will generate a 10-15 page written report using evidence-based practice (EBP) that clearly addresses a public health problem. Capstone Projects may be: • Continued collaborations with the same community partner as the field experience addressing public health needs identified at the site; or • Collaborations with a different community partner but with similar population or public health topic from the field experience; or • Collaborations with a different community partner and with different population and/or public health topic from the field experience.

Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 684. Special Topics. 1-3 Credit Hours.
This course is designed to allow the listing of special topics withing the Department of Epidemiology and Public Health and cross-list topics with other departments' offerings.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPH 691. Transdisciplinary Environmental Health Seminar. 1 Credit Hour.
Environmental health is concerned with how both the natural and built environment affect human health by looking at the impact of physical, chemical and biological factors external to humans. Individuals working in environmental health fields are concerned with preventing diseases or other illnesses by assessing and controlling environmental factors that pose a threat to human health whether it involves air quality, natural disasters, radiation, water quality, UV exposure, indoor air pollutants, climate change, healthy communities and work environments, or the effects of toxic substances. The purpose of this transdisciplinary environmental health seminar course is to promote critical thinking and expose public health students to a broad range of environmental and occupational research, practice, and policy issues. The student will attend a weekly seminar that is presented by an invited speaker in the field of environmental and occupational health sciences. Meetings will include critical review of topics from the literature, student presentations, and presentations by UM faculty and outside speakers related to environmental health sciences. The content of the seminar will advance public health students’ analytic assessment, communication, leadership, and systems thinking skills. Enrolled students will prepare and co-lead discussions following the speaker presentation about current environmental and occupational health practice or policy related research, a national, state, or local program or issue. Further, the seminar will provide networking opportunities for prospective employers, colleagues, students and faculty.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 698. MSPH Thesis Proposal. 3 Credit Hours.
This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and the Faculty Advisor. The purpose of this course is to develop the MSPH Thesis Proposal, form a thesis committee with at least two members: 1st reader (an expert in the field) and 2nd reader (the faculty advisor) and obtain proposal approval from the committee members. This MHPS Thesis Proposal is required and must be approved prior to start data collection and analysis.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 699. MSPH Thesis. 3 Credit Hours.
This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and faculty advisor. The purpose of this course is to collect and analyze the data per thesis proposal, to prepare and write the thesis and deliver an oral presentation.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 700. Professional Development Seminar. 1 Credit Hour.
This course covers fundamental topic areas in professional development for PhD students in the public health sciences. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and getting a job in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary skills, including effective communication (oral and written), conflict resolution, and developing collaborations.
Requisite: Academic Program Plan: BSTS, EPID, PREV.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

EPH 701. Innovations in Prevention Science Methodology. 1 Credit Hour.
This course is a part of series "Innovations in Prevention Science Methodology" which covers specialized topics in prevention science that have been identified as moving the field forward.
Prerequisite: PSY 633 with a B or Higher. and Requisite: Plan BSTS or EPID or EPID1 or PREV or MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 703. Advanced Statistical Methods I. 4 Credit Hours.
Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Mantel-Haenszel chi-square, interaction, standardization of rates, incidence density, logistics regression, and other special topics.
Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 705. Advanced Statistical Methods II. 3 Credit Hours.
Continuation and elaboration of EPH 703. Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Kappa statistics, life tables, survival analyses, logistic regression, Poisson regression, log linear models, clusters, meta-analysis, and other special topics.
Prerequisite: EPH 703.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 711. Cancer Epidemiology. 3 Credit Hours.
This course covers the basic epidemiology of cancer. Major sites and exposures are stressed, highlighting descriptive, etiologic and preventive aspects. A major course project and one final exam are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPH 717. Integrating Behavior Health Theories and Models. 3 Credit Hours.
This course is designed to provide an opportunity for synthesis and integration of knowledge regarding the phenomenon of health behavior. The focus is on critical examination of theoretical and empirical work in the area of health behavior from a public health perspective.
Prerequisite: EPH 617 or EPH 620.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 720. Cardiovascular Disease Epidemiology and Prevention. 3 Credit Hours.
Course aims to teach and train MPH students in the epidemiology and prevention of cardiovascular and cerebrovascular diseases which are the leading causes of morbidity and mortality among the adult U.S. population. Essential knowledge for those working in the area of public health is emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 722. Infectious Diseases Epidemiology and Control. 3 Credit Hours.
This course emphasizes surveillance, investigation, and control of infectious diseases that constitute important national and global health problems. Each class will use one or more specific infectious diseases to illustrate core principles of infectious diseases epidemiology. A major organizing principle of the course will be how to determine whether a disease should be controlled, eliminated, or eradicated, and how those determinations can change over time.
Prerequisite: EPH 621.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 723. Epidemiology and Public Health Aspects of Diabetes Mellitus. 3 Credit Hours.
This course presents an overview of the epidemiology and public health impact of an important chronic disease, diabetes mellitus (DM). Topics include the classification and descriptive epidemiology of DM and associated health complications, disease screening, evaluation of risk factors, methodological issues associated with DM research, DM among special populations, and the public health impact of DM in the U.S.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 724. Molecular and Genetic Epidemiology. 3 Credit Hours.
This course covers the theoretical concepts and practical issues involved in conducting molecular and genetic epidemiology research involving human populations. Specifically, students will learn about: molecular and genetic technology; evaluating disease-associated genes, and their interaction with environmental factors; clinical research; and data mining techniques. Ultimately, students will develop a framework for study design, statistical power and sample consideration, assay evaluation and validation, and data interpretation using molecular and genetic epidemiology tools in their research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 727. Climate, Environment, and Health: Data Integration and Management. 3 Credit Hours.
The course will introduce: a) different research designs needed to understand the linkages between climate/weather and health, and b) sources and types of data needed for different research designs. The course will train students in: a) the integration and management of weather/climate, environment and health data sets that have different spatiotemporal scales, b) assessment of errors and uncertainty in the collocation of these data sets, and c) visualization, interpretation and presentation of these data sets, including covariance structure in these data sets.
Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 728. Social Epidemiology. 3 Credit Hours.
This course provides an overview and understanding of key concepts and theoretical frameworks relevant to the study of social determinants of population health and health disparities. The interdisciplinary course will cover methodological considerations and methods relevant to the field of social epidemiology, such as lifecourse epidemiology and multilevel determinants of health. A major emphasis will be on biological pathways by which social factors “get under the skin”, and the role of social policies in improving population health. The course will involve lectures, presentation of epidemiologic research by faculty researchers, class discussions, and class projects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 731. Developing, Adapting and Evaluating Interventions. 3 Credit Hours.
This course builds on the substantive and methodological competencies acquired in preceding prevention science courses by preparing students to develop and adapt preventive interventions.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall.

EPH 732. Introduction to Dissemination and Implementation Science. 3 Credit Hours.
This course provides an introduction to the theory and practice of Dissemination and Implementation (D&I) Sciences. Topics include the importance and language of D&I science; designs, methods and measures; differences and similarities across clinical, public health, and policy settings; selected tools for D&I research and practice; and future issues. The focus of this course will be on implementing prevention programs, strategies and policies that are ready for application, testing and scale up, rather than developing interventions from scratch.
Components: LEC.
Grading: GRD.
 Typically Offered: Spring.

EPH 740. Basic Pathology and Patho-physiology. 3 Credit Hours.
The course emphasizes basic patho-physiological mechanisms and diseases of particular interest to students of public health. Students obtain an understanding of basic pathological processes, nomenclature of pathological findings, and common natural and unnatural diseases affecting various body systems. Observations of autopsies and the gross pathology of selected organs are also incorporated in the course.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall & Spring.

EPH 751. Survival Analysis in Clinical Trials. 3 Credit Hours.
Statistical methods for analysis and interpretation of survival data arising from clinical trials. Topics include survival curves, estimation of sample size, survival curves, proportional-hazard models, time dependent variables, and prognostic indices.
Components: LEC.
Grading: GRD.
 Typically Offered: Spring.

EPH 752. Advanced Research Methods. 3 Credit Hours.
This is a survey course in advanced quantitative methods for research and evaluation in prevention science. The course will provide students with an introduction to research methodology, matching research questions to specific methods, applying methods to real world data, and presenting the application of a method to a broader audience.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall.

EPH 772. Design & Implementation of Epidemiologic Studies. 3 Credit Hours.
This is the second epidemiology course after completion of the Fundamentals of Epidemiology. This course will assume knowledge of basic study designs and the basic principles of internal validity (random error, systematic error, and confounding). The concepts, principles, and methods of epidemiologic study designs (beyond basic designs) and the practical issues in the design and conduct of epidemiologic studies will be discussed. The emphasis will also include the application of the epidemiologic methods in the forms of journal article critique of epidemiologic study designs, study design project and/or research proposal development. The course has two intended audiences. PhD students or early career researchers and advanced master's students who wish to add depth to their understanding of some of the fundamental issues in epidemiology. Doctoral students in epidemiology may take this course to fulfill one of the "research method courses" for the PhD in Epidemiology degree. Students who are not in the PhD in Epidemiology program and who wish to take this course require instructor's evaluations (pre-test) and permission.
Prerequisite: EPH 621 and must have already taken or be currently enrolled in EPH 601.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall.

EPH 774. Epidemiologic Methods and Reasonings. 3 Credit Hours.
This course will discuss epidemiological methods (e.g., study designs) and concepts (e.g., confounding, bias, interaction, random error) required to evaluate the totality of evidence in etiologic research. It will also discuss theoretical models of etiologic research and techniques for quantifying the magnitude of disease or other health indicators as well as the magnitude of study errors specific to study designs.
Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall.
EPH 776. Methods in Epidemiology. 3 Credit Hours.
This course will discuss principles of epidemiologic methods. Introduction to causal inference and advanced epidemiologic topics will be covered. This course will be theoretical and quantitative and will include, when applicable, illustrative data examples using various statistical softwares. Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 782. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPH 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for MPH students who are preparing for project presentation. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Estate Planning (EPL)

EPL 901. Elderlaw. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 903. Ethical and Practical Aspects of Estate Planning. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 904. Fiduciary Administration. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 905. Asset Protection. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 908. Marital Deduction Planning. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.
EPL 909. INTERNATIONAL ESTATE PLANNING. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 910. Federal Income Tax, Trusts, and Estates. 3 Credit Hours.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 911. Corporate Tax. 2 Credit Hours.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 912. Charitable Gifts and Foundations. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 913. Tax Procedure. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 915. Chapter 14. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 920. Valuation. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 924. Planning for the Family Business. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 925. Drafting for Estate Planners. 1-2 Credit Hours.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 926. Generation-Skipping Transfer Tax. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 928. INTRODUCTION TO ESTATE PLANNING AND PROBATE. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 929. Life Insurance. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 930. DISTRIBUTIONS FROM QUALIFIED PLANS. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.

EPL 931. Investment Planning. 1 Credit Hour.
Requisite: Plan of Estate Planning or JD/LLM EP.
Components: LEC.
Grading: GRD.
EPL 936. Partnership Tax. 3 Credit Hours.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 939. Income Tax for Estate Planning. 2 Credit Hours.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

EPL 946. Federal Wealth Transfer Tax. 3 Credit Hours.
Requisite: Plan of Estate Planning or JD/ LLM EP.
Components: LEC.
Grading: GRD.

Executive and Special Programs (ESP)

ESP 500. Review Module. 0 Credit Hours.
A non-credit review session to provide students with the skills necessary to prepare for the successful completion of the common body of knowledge courses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ESP 560. Fundamentals of Marketing. 3 Credit Hours.
Marketing problems experienced by top executives are examined. Fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

Finance Business Administration (FIN)

FIN 144. Investing in Real Estate. 3 Credit Hours.
This course covers the fundamentals of commercial real estate. The aim of the course is to give you broad exposure to the landscape of commercial real estate markets. After a discussion of the relation between property prices and rents, the first part of the course is focused on property-level analysis of real estate equity as an investment, especially property valuation. This portion will culminate in a valuation case, based on a proposed development project in downtown Miami. After this, we will look at the fundamentals of real estate debt (mortgages) and equity markets (REITs).
Requisite: Summer Scholars Program.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

FIN 300. Fundamentals of Finance for Non-Finance Majors. 3 Credit Hours.
This course provides an overview of modern finance for non-business majors. Top ics include: how financial markets work, understanding financial pages in newspapers and the Internet, how stock and bond prices are determined, how investment t portfolios are structured, concepts of risk and return, how companies manage their cash and investments and international finance. Not for credit for business students.
Requisite: Non Business Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 302. Fundamentals of Finance. 3 Credit Hours.
Introduction to the basic tools and concepts in finance. This is the core class in finance for our undergraduate program. Topics include the financial framework of a business entity, taxes, the time value of money, capital market theory, financial risk measures, and capital budgeting. Note: to be eligible to major in finance, a student must earn a grade of B or higher in this class ( a grade of B- does not qualify).
Prerequisite: MAS 201 or MAS 311 or MTH 224 or IEN 311 or IEN 310 or PSY 292 and ACC 211 or ACC 221 or Pre/Corequisite ACC 223.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
### FIN 303. Intermediate Financial Management. 3 Credit Hours.
This course provides an overview of financial decision-making by corporations. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to corporate financial decision-making including capital structure, capital budgeting, dividend policy, leasing, securities issuance and the role of investment banks, and mergers and acquisitions. Note: a student must have obtained a B or higher grade in FIN 302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate that requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

### FIN 308. Intermediate Financial Management for Entrepreneurs. 3 Credit Hours.
This course is primarily for students majoring in entrepreneurship. It provides an overview of financial decision-making by entrepreneurs. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to entrepreneurial financial decision-making involved with such things as capital structure, working capital budgeting, leasing, hedging and risk management, securities issuance and the role of investment banks, and mergers and acquisitions. Note: Students cannot take both FIN 308 and FIN 303, so this class is not open to students who have taken FIN 303.
Prerequisite: FIN 302 and Requisite: Entrepreneurship Major.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

### FIN 320. Investment and Security Markets. 3 Credit Hours.
This course introduces students to both practical and theoretical aspects of investment with an emphasis on financial markets. Topics include valuation of financial securities such as stocks, bonds and options; modern portfolio theory; the process and institutional characteristics of investing. Note that this course does not address the details of individual security valuation and selection, i.e., this course is not about stock picking or about how to get rich by investing in the markets. Instead, this course attempts to help you develop a lasting conceptual framework in which to view the investment process and to analyze future ideas and changes in investment environment. This class is essential to any student considering a finance concentration. Note: A student must have obtained a B or higher in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate this requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

### FIN 330. International Finance. 3 Credit Hours.
This course applies the principles of finance to international business decisions. Topics include the analysis of foreign exchange rates, balance of payments, characteristics and use of international financial institutions and instruments, the analysis and management of financial risk in the international environment, and financing multinational corporations. Note: a student must have a B or higher in FIN 302 to major in International Finance and Marketing (or Finance). Earning an A in this class or any other class or classes does not eliminate this requirement.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

### FIN 340. Real Estate Principles. 3 Credit Hours.
This course provides an introduction to basic principles and fundamental practices in the real estate industry. Students learn how to apply the principles of finance to the real estate industry. Topics include common institutional aspects, brokerage, contracting, financing, ownership, management, valuation, appraisal, and investment analysis.
Prerequisites: FIN 302 or FIN 300.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

### FIN 344. Real Estate Investment Analysis. 3 Credit Hours.
This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.
Prerequisite: FIN 302 and FIN 320 or FIN 303 OR Co-requisite: FIN 320 or FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FIN 347. Introduction to ARGUS. 1 Credit Hour.
ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.
Prerequisite: FIN 302.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 348. Advanced ARGUS. 1 Credit Hour.
At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.
Prerequisites: FIN 302 and FIN 347.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 355. Smif Fund Analyst I. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.
Prerequisite or Co-requisite FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 356. Smif Fund Analyst II. 1 Credit Hour.
This course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester. Enrollment in the course is limited.
Prerequisite: FIN 355.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 404. Applications in Corporate Finance. 3 Credit Hours.
An application of the concepts and tools of corporate finance. Primary emphasis on analyzing real-world cases dealing with liquidity issues, capital budgeting, firm valuation, advanced corporate financing, hedging with options and futures, corporate financial strategy, and other current issues in corporate finance.
Prerequisites: FIN 302, FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 405. Financial Modeling. 3 Credit Hours.
This course takes a variety of finance topics, which have been covered in the prerequisite courses, and implements them using practical spreadsheet models. Students will use the internet and financial databases to obtain input data for their models. Students will use Visual Basic for Applications (VBA) and design functions and macros to enhance their models. Students must have a solid working knowledge of Windows and Excel, as well as a good understanding of the material taught in the prerequisite finance classes. Students must have a mobile (lap-top) computer with the capability to run Windows-based software.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 408. Introduction to Mergers and Acquisitions. 3 Credit Hours.
This course introduces students to the world of mergers and acquisitions (M&A). More specifically, the course is designed to develop an understanding of (i) the economic, financial, and strategic issues involved in the acquisition of a (public or private) company; (ii) the analytical tools used to value an acquisition target; and (iii) academic research that reports results from large samples of M&A deals. Students will apply their understanding of these issues by analyzing various actual and potential acquisitions.
Prerequisites: FIN 302, FIN 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FIN 409. Introduction to Private Equity and Venture Capital. 3 Credit Hours.
In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. This course has several goals. First, the course will deepen your current understanding of corporate finance by applying key concepts and tools to a new and increasingly important industry. Second, the course seeks to introduce you to the institutions of the PE industry. This involves examining, for example, how funds are raised and how term sheets are structured. Finally, a goal is to understand the valuation process used by PE investors.
Prerequisites: FIN 302 and FIN 303 or FIN 308.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 410. Financial Institutions and Markets. 3 Credit Hours.
This course examines financial institutions, such as banks (commercial, investment, mortgage, savings), credit unions, insurance companies, pension funds, and mutual funds and the money markets in which they operate, and focuses on why they exist and how to manage them. Topics include financial intermediation and transmutation, monetary theory and policy, Federal Reserve management of the money supply, velocity of money, fiscal theory and policy, interest rates, and immunization.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 411. Commercial Bank Management. 3 Credit Hours.
This course introduces the theory and practice of asset-liability management by large publicly traded commercial banks, including the fundamental principles of structuring loans into balance sheets. A major objective of this class is to provide students sufficient background to enter the credit department in the executive development program of major money center bank.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 412. Financial Planning and Wealth Management. 3 Credit Hours.
This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 415. Trading and Markets. 3 Credit Hours.
This course provides an introduction to the functioning of financial markets and the fast changing field of market microstructure. On the equity trading side, the course covers major exchanges such as NYSE Euronext and Nasdaq OMX, and new players such as BATS and Direct Edge/ISE. Students also learn about dark pools, options and futures exchanges, electronic bond trading platforms, and currency trading systems. In addition, the course provides a summary of different market structures, the role of market participants, different order types, trading strategies, and trading externalities. The course draws on theories and tools from economics and behavioral finance, current institutional practices and market regulation.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 418. Fundamentals of Fintech. 3 Credit Hours.
This course introduces students to Fintech, the emerging world of applications, concepts, developments, business models, and companies at the interface of Finance and Technology. The course format is a mixture of introductory topical lectures, class discussions, and interactive seminar-style student presentations. It covers the main Fintech areas like Peer-to-Peer-Lending, Crowdfunding, Mobile Payment Systems, Cryptocurrencies and ICOs, Robo Advising, Insurtech (insurance technology), and RegTech (regulatory technology). A special emphasis is given to how and by whom these emerging technologies are currently used, and how they may potentially change the landscape of finance and financial services in the future.
Prerequisites: FIN 302 and FIN 303 or FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FIN 421. Investment Portfolio Management. 3 Credit Hours.
This course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion on the sources of stock market inefficiencies. The course then covers the five key dimensions of the quantitative portfolio management process: forecasting relative stock returns using quantitative signals, measuring portfolio risk relative to a benchmark, portfolio optimization, controlling transaction costs, and measuring and evaluating portfolio returns. The course focuses on practical application and relies heavily on experiential learning and Excel spreadsheets.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 422. Speculative Markets and Derivatives. 3 Credit Hours.
This course is an introduction to derivative securities, and examines the nature of derivatives and applications of such instruments in investment and corporate settings. The emphasis is on derivatives of equity-based securities (such as stocks and stock indices), but coverage includes derivatives of debt-based securities (such as Treasury and Eurodollar securities). Topics include options, futures, forwards, and other derivatives, such as options on futures, foreign currency derivatives, swaps, exotic options, real options, as well as financial engineering using derivatives.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 423. Introduction to Alternative Investment. 3 Credit Hours.
The objective of this course is to provide an introduction to alternative financial instruments and how capital market participants utilize them. The course covers a large set of investment choices, with a specific focus on fixed income and alternative instruments, such as commodities, interest rates and currency. While covering each instrument, the course also examines with how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 425. Business and Security Valuation. 3 Credit Hours.
Applications of finance theory to the problem of valuing public and non-public companies. Multiplier models, discounted cash flow analysis, and the strengths and weaknesses of traditional security valuation methods are addressed in detail. Financial spreadsheet programs and data sources are an integral part of the course.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 427. Fixed Income Markets and Analysis. 3 Credit Hours.
This course examines financial markets that trade fixed income securities. A fixed income security is based primarily on a debt contract, such as a bond, debenture, note or Treasury bill. Topics include the valuation, computation of return, and computation of various measures of risk for fixed income securities, as well as the analysis of the term structure of interest rates and various option features commonly included in debt contracts and fixed income securities. Students must have a solid working knowledge of Excel to take this class.
Prerequisites: FIN 302 and FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 431. International Financial Management. 3 Credit Hours.
This is an advanced class in international finance from the viewpoint of multi-national organizations, including corporations, investment banks, and commercial banks. Topics include managing the various sources of risk, such as economic, political, and currency; cash receivables, inventory, and payables management; financing; transfer pricing; taxation; currency netting; capital budgeting; and hedging.
Prerequisites: FIN 302, FIN 320, FIN 330.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 433. Case Studies for Financial Professionals. 1 Credit Hour.
This one-credit course explores key concepts at the interface of Corporate Finance and Accounting, using carefully selected case studies. Each case study is designed to serve as the basis for in-depth class discussion and to reinforce fundamental concepts with numerical examples. The course relies on interactive, discussion-based learning that engages students in critical analysis, while developing confidence to apply their knowledge to specific real world examples.
Prerequisites: FIN 303 and FIN 320 and ACC 311 and ACC 312 and Requisite: BSAF degree.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 445. Real Estate Finance. 3 Credit Hours.
This course introduces the theoretical concepts and analytical techniques used to make a decision to finance the purchase or development of a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Students are also encouraged to use their semester projects to apply for one of the numerous case competitions.
Prerequisite: FIN 344.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 446. Real Estate Market Analysis. 3 Credit Hours.
This course is an introduction to the fundamental concepts of real estate market analysis. The major topics to be covered include site analysis, economic-demographic, supply and demand analyses. This course shall also include a global prospective of real estate market analysis. This shall be accomplished by means of conducting portions of a market analysis for foreign cities of your individual choosing.
Requisite: Pre/Corequisite: FIN 344.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 456. Behavioral Finance. 3 Credit Hours.
The goal of this course is to expose you to selected topics from the upcoming field of behavioral finance. This will include a discussion of prospect theory and different types of behavioral biases such as representativeness, disposition effect, overconfidence, narrow framing, familiarity bias, and the house-money effect. In addition, the course will cover the implications of behavioral biases for asset pricing, corporate finance, and the overall macro-economy. Simple experiments will be conducted in class to illustrate some key behavioral concepts.
Prerequisites: FIN 302, FIN 303, FIN 320.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 457. SMIF Fund Portfolio Manager 1. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including the tools used to compose a diversified portfolio that covers each of the major industrial sectors. The course is one credit and meets once a week each semester. Enrollment in the course is limited.
Prerequisite: FIN 356.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 458. Smif Fund Portfolio Manager II. 1 Credit Hour.
The course is designed to introduce the student to the investment management process, including the management of an investment organization and the evaluation of portfolio performance. The course is one credit and meets once a week. Enrollment in the course is limited.
Prerequisite: FIN 457.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 496. Directed Studies in Finance. 1-3 Credit Hours.
Supervised readings, individual research project, or independent investigation of selected non-STEM related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FIN 497. Directed Studies in Finance. 1-3 Credit Hours.
Supervised readings, individual research project or independent investigation of selected STEM-related problems in the discipline. Offered only by special arrangement with supervising faculty member, who approves topic and evaluation process at time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 498. Special Topics in Finance. 3 Credit Hours.
Special topics in selected non-STEM areas of Finance.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 499. Special Topics in Finance. 3 Credit Hours.
Special topics in selected STEM areas of Finance.
Requisite: Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 555. Finance Departmental Honors Research Project. 3 Credit Hours.
Research project to fulfill requirements for Departmental Honors in Finance.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

FIN 602. Fundamentals of Finance. 3 Credit Hours.
This is an integrated business course that focuses on the fundamental principles needed for better financial decision-making. First, the course will expose students to the fundamental concepts of investment theory and financial markets. The second part of the course provides students with the tools necessary to answer a key question facing corporate managers: What are good investments? Beyond these traditional topics in finance, the course exposes students to the emerging field of behavioral finance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 603. Advanced Corporate Finance. 3 Credit Hours.
Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 613. Intermediate Corporate Finance and Investments. 4 Credit Hours.
This course builds on the fundamentals of financial accounting and finance and provides an in-depth exploration of investments and corporate finance. Topics such as capital structure, the cost of capital, advanced capital budgeting, security valuation, and portfolio theory are covered. Prerequisite: BUS 640.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 614. International Finance, Valuation, and Financial Statement Analysis. 4 Credit Hours.
This course uses an interdisciplinary approach combining international and corporate finance to build knowledge of international investment and valuation. This course teaches global financial decision making through student collaboration and real-world applications. Prerequisite: FIN 613.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 615. Financial Decision Making. 4 Credit Hours.
This course explores decision-making theory to better understand why investors, money managers, and corporate managers make suboptimal economic and financial decisions. Specifically, the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. A variety of behavioral "biases" are examined as well as the impact of those biases on security prices, corporate policies, and aggregate economic outcomes. In addition, the course investigates whether the mistakes generate market inefficiencies that can potentially be exploited.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 616. Advanced Corporate Finance. 4 Credit Hours.
This course introduces students to advanced corporate finance topics, and builds directly on established concepts from prerequisite finance courses. The course integrates conceptual and applied case methodologies to develop practical solutions to real-world problems. Topics typically covered include working capital management, financial planning, optionality in decision making and hedging, agency theory, long-term debt management, leasing, and leveraged buy outs.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 617. Derivatives and Financial Modeling. 4 Credit Hours.
This course explores modelling applications for corporate finance and investments topics. Modelling financial problems in Excel is the standard way to approach in-depth analysis and understanding of complex problems. This course will look at several different types of models and financial applications. In addition, the class will explore financial options, futures, swaps, and financial engineering. It includes descriptive information, theory and applications. The goal of the descriptive information is for students to gain familiarity with the instruments and the markets where they trade. Theory is covered to understand the instruments, their pricing and behavior under different market conditions. Finally, applications of the use of derivative securities will be investigated in equity, fixed income, foreign currency, commodity, and credit markets.
Prerequisite: FIN 614.
Components: DIL.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 618. Quantitative Finance and Microstructure. 4 Credit Hours.
This course provides a cross-disciplinary coverage of statistics and market microstructure. Students will learn how to use Excel to organize and present data sets to visualize the general characteristics, and how to identify and understand the use of specific measures of location and dispersion. We will cover the most important discrete and continuous probability distributions, and apply and understand the Central Limit Theorem. Furthermore, we will calculate, use and interpret confidence intervals and hypothesis testing about the population mean and population variance. On the microstructure part, we will learn about the market structures used to trade securities, analyze the basic types of orders available to investors, and evaluate the risks and benefits of high-frequency trading and dark pools in financial settings.
Prerequisite: BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 619. Advanced Portfolio Management and Alternative Investments. 4 Credit Hours.
The objective of this course is to provide an advanced theoretical and practical understanding of various investment choices. The first half focuses on stock portfolios. It covers the five key dimensions of the quantitative portfolio management process: using signals ("factors") to forecast returns; measuring risk; portfolio optimization; controlling costs; and performance evaluation. The second half focuses on fixed income and alternative instruments, such as currencies, commodities, credit derivatives, and asset-backed securities. While covering each instrument, the course also addresses how macroeconomic, technological, labor market, taxation, and regulatory issues affect specific investment decisions.
Prerequisite: FIN 613.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 620. Investment Analysis. 3 Credit Hours.
This course deals with theory and application of investment analysis. Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FIN 621. Portfolio Construction and Management. 3 Credit Hours.
The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 622. Financial Options and Futures. 3 Credit Hours.
Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 630. International Finance. 3 Credit Hours.
The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms is discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 631. International Financial Management. 3 Credit Hours.
Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 635. Quantitative and Analytical Fundamentals for Finance. 1-4 Credit Hours.
This four-credit course provides graduate students with an intensive review of the fundamentals of financial accounting and finance, and as well as microeconomic concepts and quantitative skills, needed as appropriate foundation to pursue the Master of Science in Finance degree or other master degrees that entail taking an elective course in finance. Topics include: Math concept review (functions, exponents, notation, weighted average, derivatives as applied to maximization/minimization); Measures of central location, variability, and association; Supply and demand curves, elasticity; Profit maximization; Markets: perfect competition, monopoly, oligopoly; Economic role of Government (monetary and fiscal policy, regulation, taxation); Basic financial statements (income statement, balance sheet, statement of cash flow, statement of changes in shareholders’ equity); Working capital, noncurrent liabilities and owners’ equity, investments and long-lived assets; Common size and ratio analysis; Principles in finance; Time value of money; Valuation (including bonds and stocks); Fixed income securities; Term structure of interest rates; Interest rate risk and duration; Capital markets, how securities trade, intermediaries; Capital market efficiency, arbitrage; Risk and return, portfolio math; Diversifiable vs. non-diversifiable risk; Asset Pricing Models (CAPM, beta, Fama-French); Capital structure; Capital budgeting; Cost of capital; Foreign exchange and global investing; Introduction to derivatives. The course will be taught over taught over a two-week period, primarily in lecture, homework, and test format.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 640. Nobel Prize Winning Ideas in Financial Economics & Current Topics. 1-3 Credit Hours.
The objective of this course is to introduce Nobel Prize Winning Ideas in Financial Economics. These ideas are key in defining “the language of Finance” and should be part of the intellectual toolkit of any financial professional. Research of more than ten Nobel Prize winners will be covered (Akerlof, Engle, Fama, Hart, Heckman, Holmstrom, Markowitz, Merton, Miller, Mirrlees, Modigliani, Scholes, Spence, Sharpe, Shiller, Thaler). The course also includes discussions of current topics in Finance. These discussions show how the Nobel Prize Winning Ideas in Financial Economics help frame the debate on current industry topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 641. Valuation and Financial Decision Making. 2 Credit Hours.
Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 642. The Financial Environment. 2 Credit Hours.
A continuation of FIN641, with an emphasis on important issues faced by corporate financial managers responsible for financing and investment decisions. Core topics include capital structure, payout policy, advanced capital budgeting, basic derivative and real option valuation, leasing, and investment banking. Specialized topics, such as behavioral finance, international finance, mergers and acquisitions, and risk management may also be introduced as the course progresses.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 643. Quantitative Finance and Market Microstructure. 2 Credit Hours.
This course aims to give simple yet useful quantitative finance tools, and a broad overview of the functioning of modern financial markets, to students wishing to broaden their knowledge of finance. The first part of the course exposes students to the microstructure of financial markets. We will learn about different trading mechanisms encountered in financial markets today, how information affects prices and liquidity, what algorithms practitioners use to implement their trading strategies, and some basic models of how dealers react to information. The second part of the course introduces students to statistical models commonly encountered in quantitative finance. We’ll have a hands-on approach, and learn how to estimate the models with real financial data using Excel and the statistical software R.
Prerequisite: FIN 642 or FIN 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 644. Real Estate Investment and Appraisal. 2 Credit Hours.
This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the ARGUS software that is a standard resource in the commercial real estate market.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 645. Real Estate Finance. 2-3 Credit Hours.
This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project. Students will complete projects that require them to evaluate the financing and investment potential of a small commercial site of their choice and to evaluate a lease vs. buy decision using a plot of land in Miami-Dade County from the perspective of a publicly-traded corporation.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 646. Real Estate Market Analysis. 2 Credit Hours.
The course aims to provide students with an understanding of the functioning of markets for urban space, and their role in real estate investment decisions. The course first treats urban-economic processes involved in the determination of prices for space, in a theoretical and empirical context. This economic understanding is then put to use on several case studies of market- and site- analysis for various land uses.
Prerequisite: FIN 641.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 647. Introduction to ARGUS. 1 Credit Hour.
ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.
Requisite: Limited to Accelerated Real Estate MBA Students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 648. Advanced ARGUS. 1 Credit Hour.
At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.
Prerequisite: FIN 647.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 649. Non-Profit Consulting Project. 1-4 Credit Hours.
This course is designed for students completing the Accelerated MBA in Real Estate. The course allows graduate students in real estate to synthesize and apply the concepts learned in real estate coursework to a real-life problem where the results will benefit a local organization in the non-profit sector. The supervising professor guides the students' efforts but the course topics and resources are driven by client needs and students skills.
Requisite: Limited to Accelerated Real Estate MBA Students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 650. Financial Investment. 2 Credit Hours.
This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly important statistical concepts for investments, portfolio construction, asset pricing, and behavioral biases affecting financial decisions. The course is quantitative and introduces students to Excel as a tool to form and rebalance portfolios.
Prerequisite: FIN 642 or FIN 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 651. Advanced Topics in Investments. 2 Credit Hours.
The course provides an introduction to quantitative active management of equity portfolios. The course begins with a discussion of market (in)efficiency, then covers the five key dimensions of the quantitative portfolio management process: using signals ("factors") to forecast returns; measuring risk; portfolio optimization; controlling costs; and performance evaluation.
Prerequisite: FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 652. Fixed Income Securities. 2 Credit Hours.
This course builds on FIN641/642 (or BUS640) and FIN650 and covers trading and valuation of a wide variety of fixed income securities including corporate, municipal, and Treasury pure discount bonds, coupon bonds, floating rate notes, bond embedded options, mortgages, interest rate swaps, currency swaps, equity swaps, and interest rate options. The course focuses on analytic tools used in bond portfolio management and interest rate risk management. These tools include spot rates, forward rates, credit spreads, duration and convexity, yield curve construction, and term structure models.
Prerequisite: FIN 642 or FIN 602 or FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 653. Alternative Investments. 2 Credit Hours.
The course provides an advanced theoretical and practical understanding of various alternative investment strategies, with a specific focus on currency markets, derivatives (e.g., interest rate and credit derivatives), venture capital and private equity investments, and real estate investments. The course also examines how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions. In addition, the students learn about valuation, investment and risk management strategies of sophisticated investors and recent chronology of events that affect market participants.
Prerequisites: FIN 641 and FIN 642 and FIN 650.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
FIN 654. Impact Investing. 2 Credit Hours.
The course provides an introduction to the emerging field of impact investing, where traditional investment objectives are modified to include social and environmental considerations. The first part of the course exposes students to portfolio theory, asset pricing, and the analytics tools of portfolio management. Subsequently, using these traditional tools of financial investments, students learn to identify and evaluate the impact of social factors on portfolio decisions, financial risk, asset prices, and performance evaluation. Students also learn about the psychology of impact investing that influences the tradeoffs between financial and social returns.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 655. Smif Fund Analyst I. 1 Credit Hour.
This is the entry level class for the Category 5 Student Managed Investment Fund (Cat 5 SMIF) track. The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 656. Smif Fund Analyst II. 1 Credit Hour.
This is the second course in the Cat 5 SMIF track. In this course students will continue to learn about security analysis and improve their skills. These students will have some responsibility for overseeing students in the Analyst I class.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 657. Smif Fund Portfolio Manager I. 1 Credit Hour.
This is the third course in the Cat 5 SMIF track. This course broadens the focus of the students to the overall portfolio. Students will learn more about strategy, asset allocation, portfolio optimization, and related topics to managing an investment portfolio.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 658. Smif Fund Manager II. 1 Credit Hour.
This is the fourth course in the Cat 5 SMIF track. Members of this course will function as the senior officers of the fund. They will oversee students in the Portfolio Manager I class. They will be responsible for all administrative functions, performance measurement, and all reporting to the Academic Advisors, Advisory Board, and the University Treasurer. They may also be responsible to presentations to groups inside and outside the University for the purpose of publicizing the Cat 5 SMIF.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 660. International Finance. 2 Credit Hours.
This course builds on FIN 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and influence international trade and cross-border investment; the foreign exchange market structure and instruments; and the international debt and equity markets.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 661. Advanced Topics in International Finance. 2 Credit Hours.
This course builds directly on FIN 660 using a variety of techniques, including group projects and class discussion. A number of special topics are covered such as financing the multinational firm, currency swaps, international portfolio investment, international asset pricing, multinational capital budgeting and cross-border investment, and measuring and managing the many additional risk exposures faced by a multinational enterprise.
Prerequisite: FIN 660.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 662. Chinese Financial Markets. 2 Credit Hours.
Chinese financial markets has been one of the world’s largest and most vital economies. This course examines market history, structure, regulations, practices, conventions, and current issues in major financial markets in China. Like other emerging financial markets, Chinese financial markets are less researched and not well understood. Due to cultural and economic differences between Chinese financial markets and developed financial markets, Chinese markets have their own unique ways of operation and evaluation that may not be obviously intuitive to foreign investors. Additionally, China and Chinese markets are in continuous transformation at a high speed, which creates strong challenges and valuable opportunities for investors, both individual and instructional, to explore and extend their investment universe in terms of geopolitical location, currency, and asset classes. Learning Objectives: This course introduces students to China’s financial markets, explores current issues related to the future development of those markets, provides students specific and useful knowledge about investments in China and helps prepare them for careers related to these dynamic markets. It includes the following topics in Chinese financial system: 1. Money and foreign exchange markets 2. Bond markets 3. Equity markets 4. Futures and derivatives markets 5. Real estate markets 6. Mortgage, insurance, and the funds industry 7. Private equity markets 8. Private banking and wealth management 9. Qualified Foreign Institutional Investors (QFII) 10. Development of RMB as an international currency
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 663. Latin American Financial Markets. 2 Credit Hours.
This course analyzes the main financial markets in Latin America across asset classes and countries. In the first part of the course we present the stylized facts of financial markets and the main securities traded by financial intermediaries and firms in Latin America, including those traded in global markets (corporate and sovereign bonds, CDS, FX and interest rate products, CDS, FX and rate swaps, and OTC and exchange-traded derivatives). We describe the main products, exchanges, institutional and regulatory practices for the largest and most liquid local markets (Argentina, Brazil, Chile, Colombia, and Mexico). We discuss the main type of trades in LatAm markets, such as long only, long and short, arbitrage, relative value trades, FX and carry trades, rates trades (payer, receiver, curve trades), hedged trades, swaps and vol trades. The second part of the course will be based on case studies, which will teach how to blend Global Economics, Corporate Finance, and Investment Management to trade in Latin American markets. The student will be able anticipate the effects of changes in key macroeconomic policies and political events on asset prices, including FX, interest rates, sovereign bonds, CDS, and equities. The third part of the course teaches how to apply this knowledge into investment decisions ahead of actual data releases and policy decisions by the Fed and the main central banks in Latin America. Grading will be based on a midterm and a final exam; and brief reports in which the students defend their trade and portfolio recommendations before the aforementioned policy events that will occur during the course. This course will make intensive use of Bloomberg inside and outside the classroom.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 668. Wealth Management and Financial Planning. 1-4 Credit Hours.
This course examines the investment and financial issues arising from financial planning and personal wealth management activities. It covers various topics required for the construction of a comprehensive financial plan including the identification of client financial status and goals, asset allocation, securities trading, managed funds, tax planning, risk management and insurance, and estate planning.
Prerequisite: FIN 641 and FIN 642.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 669. Household Finance and Investment. 2 Credit Hours.
This is a course focusing on Household Finance with two main objectives. First, the course covers what we know about household investment decision making. This discussion includes the decision of U.S. households to participate in the financial markets, their asset allocation decisions and their overall portfolio construction. What households do is contrasted with what canonical financial models prescribe. The course covers what the reasons might be for any deviation of observed decisions from theoretical predictions. Second, the course introduces students to portfolio optimization algorithms that take into account real-life risks. Specifically, we discuss portfolio optimization with labor, real-estate, and climate risk. Collectively, the aim of the course is to provide students with the necessary tools that would improve financial decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 670. Corporate Finance. 2 Credit Hours.
The course serves as a complement and supplement to 641 and 642 and builds up to more advanced topics in corporate finance. The course will quickly review some basic concepts like net present value and build up to special topics like real options, valuation, mergers and acquisitions and corporate governance. The main objective of the class is that students understand basic corporate finance concepts as well as develop a good understanding of how complicated firm level decisions are made.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 671. Advanced Topics in Corporate Finance. 2 Credit Hours.
This course builds directly on FIN 670 and on the MBA core classes, FIN 641 and FIN 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short- and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, IPOs, environmental considerations, and other current issues in corporate finance.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 672. Sustainable Finance. 2 Credit Hours.
Businesses of today are increasingly dealing with the risks and opportunities of environmental, social, and governance (ESG) issues due to the scarcity of resources, labor relations, and climate change. This course couples established and emerging corporate theory to study these sustainability challenges. It covers diverse aspects of sustainable finance, including ESG measurement, socially responsible and impact investing. After establishing the benchmarks in understanding the core corporate finance principles, the course quickly moves on to understanding responsible investing from the shareholder perspective and how that affects firm performance and how that can be then used as a tool to establish a comparative advantage in the product market. The course also explores the meaning and importance of sustainable business practices that respect and adhere to ethical social responsibility standards through several case studies and simple econometric analyses.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 674. Financial Analysis of Mergers and Acquisitions. 2 Credit Hours.
This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 679. Private Equity and Venture Capital. 2 Credit Hours.
This course will cover the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The course will provide students with an understanding of corporate finance by applying central concepts and tools to a new and increasingly important industry. The course will also introduce students to the institutions of the PE industry and the valuation process used by PE investors.
Prerequisite: FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

FIN 680. FinTech. 2-3 Credit Hours.
This course introduces students to Fintech, the emerging world of applications, concepts, developments, business models, and companies at the interface of Finance and Technology. The course format is a mixture of lecture and seminar-style student presentations. It covers the main Fintech areas like Peer-to-Peer-Lending, Crowdfunding, Mobile Payment Systems, Cryptocurrencies and ICOs, Robo Advising, Insurtech (insurance technology), and RegTech (regulatory technology). A special emphasis is given to how and by whom these emerging technologies are currently used, and how they may potentially change the landscape of finance and financial services in the future.
Prerequisite: BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 681. Financial Institutions. 2 Credit Hours.
This course focuses on the management of financial institutions, such as mutual funds, banks, hedge funds, and finance office oflarge corporations. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.
Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
FIN 683. Financial Modeling. 2 Credit Hours.
This course takes a variety of finance topics and implements them using practical spreadsheet models. Students are presumed to have a working knowledge of Windows and Excel, as well as a good understanding the material taught in the core finance classes. Topics include Time Value of Money, Capital Budgeting, Pro-Forma Financial Statements, Bond Analysis, and Portfolio Construction and Optimization. This course will meet in a "computer lab" (a classroom) for hands-on instruction. The course is structured as a "flipped" classroom, so lectures and learning materials are online and practice an application are done in the classroom. It is therefore extremely important that students are prepared for class each meeting day. Prerequisite: FIN 642 or FIN 602 or BUS 630.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 684. Advanced Financial Modeling. 2 Credit Hours.
The objective of this course is to introduce the new tools from artificial intelligence (AI) and machine learning (ML) to finance. The course will explain what the AI and ML tools are and then explain whether they are useful for common financial decisions (e.g., portfolio choice, managerial decisions, bankruptcy prediction, etc.). Prerequisite: FIN 683.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 685. Mathematics of Financial Derivatives. 2 Credit Hours.
This course builds on Finance 650 and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments. Prerequisite: FIN 650. and FIN 670.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

The goal of this course is to use decision-making theory to better understand why investors, money managers, and corporate managers often make suboptimal economic and financial decisions. The first part of the course focuses on the basic techniques and models that a manager or an investor can use to make effective financial decisions. The second part of the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. In addition, the course examines the impact of those mistakes for financial markets (e.g., price bubbles) and the overall economy. The course should be useful to individuals who work in a corporate setting or at a money management firm (mutual funds, hedge funds, pension funds, etc.). Prerequisite: FIN 602 or FIN 642 or BUS 640.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FIN 687. Advance Mathematical Finance. 2 Credit Hours.
This course is the financial mathematics course of the Master of Science in Finance program. The purpose of this course is to equip students with the mathematical tools and techniques essential for being a successful portfolio or wealth manager. This course is also designed to provide a foundation for concurrent/subsequent coursework in investments and derivatives.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 689. Applied Numerical Methods in Finance. 2 Credit Hours.
This course aims to give a rigorous overview of the numerical methods and techniques used in modern finance. The course will cover topics such as linear and nonlinear equations, interpolation, optimization, binomial and trinomial methods, finite difference methods, Monte-Carlo simulation, random number generators, option pricing and hedging. We will take a "hands-on" approach and implement all methods either using Python and/or Microsoft Excel.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FIN 690. Risk Management & Insurance. 2 Credit Hours.
This course explores the field or risk management and insurance. Students learn about the fundamental nature and measurement of risk, the principal
techniques used to manage risk for both corporations and individuals, and the major aspects of various insurance areas such as life, and property and
casualty. The course includes foundational concepts important to the risk management industry, an exposure to risk modeling, and a broad overview
of various types of insurance and their major concepts and terminology
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 695. Finance Internship. 1-3 Credit Hours.
Students are individually assigned to an operating business firm or other organization to gain insight into applied financial decision making and
quantitative analysis in their area of career interest. Periodic reports and in-person meetings are required. Permission of program faculty directors is
required prior to registration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FIN 696. Finance Capstone Project. 1-3 Credit Hours.
The purpose of this course is to provide students the opportunity to apply financial models and quantitative skills to a client's, real-life business
challenge or opportunity. In the process of helping the client solve its problem or address an opportunity, students will simultaneously deepen their
understanding of financial concepts, develop consulting skills, and practice teamwork and communication skills. The course is structured around
the principles of experiential learning, and as such, will include iterative, explicit opportunities for students to think, do, and reflect on the lessons learned.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 698. Selected Topics in Finance. 1-4 Credit Hours.
Topics in selected areas of specialization.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 699. Directed Readings and Study. 1-3 Credit Hours.
Individually supervised research or reading projects in selected fields. Evaluation of project and subject by the supervising professor is required at the
time of registration.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 705. Financial Economics I. 3 Credit Hours.
This course is an introductory Ph.D. level course on the fundamental theories of asset pricing. Specifically, it consists of three parts. The first part
focuses on individual choice under uncertainty. The second part develops equilibrium asset pricing theories, which include mean variance efficiency
and the Capital Asset Pricing Model (CAPM), as well as the Arbitrage Pricing Theory (APT). The third part reviews recent development in asset pricing
by introducing some stylized facts and new theories.
Requisite: Limited to Business PhD Students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 706. Theory of Corporate Finance. 3 Credit Hours.
The aim of this course is to expose students to some of the important papers that constitute the theoretical foundations of corporate finance. The
course will try to give students a working understanding of the key papers and give them a flavor of the techniques for setting up and solving models,
which they could possibly apply in their own research. The course will cover classic Corporate Finance papers and recent contributions in the areas of
financial contracting control and corporate governance. The later part of the course leans more towards empirical work and discusses the connections
and gaps between theoretical and empirical corporate literature.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
FIN 707. Empirical Methods in Finance. 3 Credit Hours.
The objective of this course is to give you an introduction to empirical research in finance. This class is not designed like an econometrics class where the emphasis is the statistical specification of tests and the derivation of underlying asymptotics. The focus in this class is the understanding of the technique and the actual implementation in finance. The goal is to provide you with a toolbox of techniques that you can use to answer empirical questions in corporate finance and asset pricing.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 708. Financial Economics II. 3 Credit Hours.
This is a second course on asset pricing. The class is divided in two independent modules. The first module covers discrete time asset pricing models with frictions. These frictions include, among others, asymmetric information, slow-moving capital, delegated portfolio management, and short-sale constraints. The second module is an introduction to continuous time finance. Topics include introduction to stochastic calculus, derivative pricing and hedging, optimal portfolio choice, and equilibrium asset pricing.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 709. Behavioral Finance. 3 Credit Hours.
This course will cover selected topics from the field of behavioral finance. Issues related to both asset pricing and corporate finance will be discussed. The main objective of the course is to help students identify a few interesting research ideas and execute one of these ideas into a completed paper, which could be part of the student's dissertation.
Prerequisite: FIN 705.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FIN 715. Pe-Seminar Doctoral Students Workshop in Finance. 1 Credit Hour.
This course provides Finance PhD students an opportunity to i) discuss influential and well-cited research papers in financial economics, ii) incorporate contemporary finance research into their knowledge base, and iii) improve their research presentation skills.
Prerequisite: FIN 705.
Components: RSC.
Grading: GRD.
Typically Offered: Fall & Spring.

FIN 825. Comprehensive Test Preparation. 1-3 Credit Hours.
Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

FIN 830. Pre-Dissertation Research. 1-6 Credit Hours.
For Finance PhD students currently writing their dissertation.
Requisite: Finance PhD Student.
Components: RSC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

First-Year Seminar Fine Arts (FFA)

FFA 190. First-Year Seminars in Arts. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FFA 191. First-Year Seminars in Arts. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FFA 192. First-Year Seminars in Arts. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

First-Year Seminar Literature (FLT)

FLT 190. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 191. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 192. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 193. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 194. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 195. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 196. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FLT 199. First-Year Seminars in Literature. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Literature. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

First-Year Seminar Natural Science (FNS)

FNS 190. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FNS 191. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 192. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 193. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 194. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 195. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 196. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 197. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FNS 199. First-Year Seminars in Natural Science. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Natural Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

First-Year Seminar Philosophy and Religion (FPR)

FPR 190. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FPR 191. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FPR 192. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FPR 199. First-Year Seminars in Philosophy/Religion. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to Philosophy and/or Religion. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

First-Year Seminars Social Science (FSS)

FSS 190. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FSS 191. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FSS 192. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FSS 193. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FSS 195. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

FSS 197. First-Year Seminars in Social Sciences. 3 Credit Hours.
Seminars designed to introduce up to 25 freshmen to the Social Sciences. Topics will vary from year to year, as will faculty teaching the seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
FSS 199. First-Year Seminars in Social Sciences. 3 Credit Hours.
Especially designed for Foote Fellows, the BOOKS THAT MATTER seminar offers an opportunity to study major works of non-fiction in a seminar-style setting, under the guidance of faculty members from across the University. We examine important works which, by means of their strong, connected argumentation, challenge the way we respond to, interpret, and shape reality. Emphasis in the course falls mainly on the logical structure embedded deep within the text, and less on content per se, so that a student's effort is not directed towards a reading of "great books" but rather the discovery of "significant arguments." Our rationale is to address a fundamental need in education too often lost in the midst of other demands, interests, and requirements: by learning to read, question, and enjoy important intellectual studies of the past and present, students will be able to read, question, and enjoy what will be the influential books of non-fiction published in their lifetime, whether in public affairs, science, social science, economics, history, film and media studies, philosophy, psychology, etc. The course provides standards of measurement and value by which students can gauge how and why books succeed or fail on hard logical grounds.
Requisite: Hammond or Foote Fellow.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

French (FRE)

FRE 101. Elementary French I. 3 Credit Hours.
For students with no background or previous study of French. The focus of FRE 101 is the development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: university life, family, leisure activities, home and community. Includes both oral and written assessment of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French. Not open to students who have completed 2 or more years of high school French. Closed to heritage or native speakers of French.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 102. Elementary French II. 3 Credit Hours.
Continuation of FRE 101. The development of communicative abilities in speaking, reading, writing and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 105. Accelerated Elementary French. 3 Credit Hours.
For students with previous study of French desiring to review material covered in FRE 101 and 102 in preparation for continued study of French at the intermediate level. The focus of FRE 105 is the continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: family, leisure activities, home, and community, childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

FRE 195. Transfer Credit. 1-3 Credit Hours.
Awarded for 100-level course work at another institution for which UM has no direct equivalent.
Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

FRE 201. Intermediate French I. 3 Credit Hours.
For students with previous study of elementary-level French. The continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: travel, technological innovations, the evolution of family values, and social and environmental issues. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
FRE 202. Intermediate French II. 3 Credit Hours.
For students with some previous study of French at the intermediate level, who are familiar with all the tenses and with vocabulary related to the topics covered in FRE 101-201. FRE 202 is the first semester of a two-semester sequence ending with FRE 203. The continued development of skills in reading, writing, speaking, and listening in French, with an additional emphasis on cultural competence in the French-speaking world. Themes on: relationships, cultural values, different historical perspectives, and current politics. These themes will be explored through articles, films and literary texts. The course will develop writing and reading strategies, providing them with the tools to think, read, and write critically and analytically in papers of 1-3 pages. Progress will also be assessed through quizzes and exams. Course conducted entirely in French.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 203. Advanced French. 3 Credit Hours.
Continuation of FRE 202. This course will prepare students for advanced literature, linguistic, and culture courses. The class will use films, literary works, and other cultural texts. Students will write analytic essays of 3-5 pages to develop style, vocabulary, and syntax. Course conducted entirely in French.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 280. French Culture and Conservation. 3 Credit Hours.
The major social, historical and political factors that have shaped contemporary and traditional French culture and society. This cultural approach to language-learning is set in the small towns and villages of the Sete region, rich and vibrant with a centuries-old history of intellectual advances and social tolerance. The historical and social evolution of French culture will be studied through film, literature and art with visits to relevant historical sites and museums.
Prerequisite: FRE 102 or FRE 105.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 295. Transfer Credit. 1-3 Credit Hours.
Awarded for 200-level course work at another institution for which UM has no direct equivalent.

Components: LEC.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

FRE 301. Introduction to French and Francophone Studies. 3 Credit Hours.
Tools for the interpretation and analysis of cultural materials from the French-speaking world. Acquisition of terminology and methodology for advanced study in French and Francophone Studies. Emphasis on historical, literary, and geographical breadth of French-speaking cultures as well as on critical writing skills.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

FRE 302. The Cultures of France. 3 Credit Hours.
Historical survey of French intellectual, artistic, and popular culture.
Prerequisite: FRE 301.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

FRE 303. The Cultures of Francophone Africa, Canada, and/or the Caribbean. 3 Credit Hours.
Historical survey of the intellectual, artistic, and popular culture of the French-speaking communities in Africa, Canada and the Caribbean.
Prerequisite: FRE 301.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
