The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Program Educational Objectives
We expect that our alumni will exhibit the following:
1. Successful careers in dynamic and multidisciplinary fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including successful admission and completion of graduate studies of the highest standard.

Student Learning Outcomes
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S. in Computer Engineering - Software Engineering Option
Software Engineering is concerned primarily with the systematic and disciplined approach to developing software systems. It requires the application of both computer engineering and computer science principles and practices to the creation, operation, and maintenance of software systems and applications. The Software Engineering Option of the Bachelor of Science in Computer Engineering degree at the University of Miami is a unique interdisciplinary program developed and administered collaboratively by the Department of Electrical and Computer Engineering and the Department of Computer Science.

This Option prepares students for successful careers in software engineering. Software systems are becoming increasingly complex, and emerging technologies are pushing the boundaries of reusable components and software quality assurance. To prepare students to meet these challenges, this Option establishes a solid foundation of software system fundamentals, coupled with strong hands-on experience and an understanding of professional practice and conduct.

In addition to the core curriculum in software engineering, students are introduced to the paradigms of real-time, adaptive, and collaborative software systems, through a wide range of technical elective courses from both the Department of Electrical and Computer Engineering and the Department of Computer Science. Students may also use courses from other departments with academic advisor approval. The technical electives allow students to apply the knowledge they have gained to different application areas. This provides valuable hands-on experience in contemporary application areas, which enhances the students’ potential career development opportunities.
Students pursuing the Software Engineering Option of the Bachelor of Science in Computer Engineering degree must earn at least 15 credit hours in Computer Science as part of their degree requirements.

** Students must have at least 32 credit hours of Math and Science

Mission

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Program Educational Objectives

We expect that our alumni will exhibit the following:
1. Successful careers in dynamic and multidisciplinary fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including successful admission and completion of graduate studies of the highest standard.

Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Engineering - Pre-Med Option

Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in computer engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences or the development and/or use of new hardware and software tools to better serve both medical professionals and patients. With the rapid advancement and application of technology in the medical field, the pre-med option ensures that students learn and understand the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

1. See description of electives under the Departmental Electives Section.
2. CE Core Elective is selected from ECE 302 (http://bulletin.miami.edu/search/?P=ECE%20302), ECE 454 (http://bulletin.miami.edu/search/?P=ECE%20454)/ECE 455 (http://bulletin.miami.edu/search/?P=ECE%20455), ECE 412 (http://bulletin.miami.edu/search/?P=ECE%20412)
3. Advanced Bioscience Elective is to be chosen from BMB 260 (http://bulletin.miami.edu/search/?P=BMB%20260), BIL 250 (http://bulletin.miami.edu/search/?P=BIL%20250), BIL 255 (http://bulletin.miami.edu/search/?P=BIL%20255), BIL 268 (http://bulletin.miami.edu/search/?P=BIL%20268), or BMB 401 (http://bulletin.miami.edu/search/?P=BMB%20401), in consultation with their academic advisor. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements.
4. Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 (http://bulletin.miami.edu/search/?P=PSY%20110) and SOC 101 (http://bulletin.miami.edu/search/?P=SOC%20101)
5. Offered only in the Fall semester.

Mission

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

B.S./M.S. in Computer Engineering

This is a structured and integrated program of 154 credit hours. Students may pursue this program from either of the undergraduate options available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.

The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 1050).

¹ See description of electives under the Departmental Electives Section.
² Offered only in the Fall semester.
³ Should be taken as Graduate (G) courses.

**B.S./M.S. in Computer Engineering - Software Engineering Option**

This is a structured and integrated program of 155 credit hours. Students may pursue this program from either of the undergraduate options available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.
• At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be at 700 level. More specifically, in addition to ECE 715 (M.S. Design Project I) and ECE 716 (M.S. Design Project II), at least 6 credit hours must be in courses open to graduate students only (700 level).

• Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.

• A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.

• All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.

• To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.

• The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

For more information about the BS/MS Program please refer to the College of Engineering Section (p. 1050).

1. See description of electives under the Departmental Electives Section.
2. Offered only in the Fall semester.
3. Should be taken as Graduate (G) courses.

**Minor in Computer Engineering**

**Requirements**

Students must follow these guidelines in order to qualify for this minor:

- No more than 6 credits hours may be taken outside the ECE department.
- Students must maintain a minimum 2.0 grade point average in all ECE courses taken.
- Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take 6 Computer Engineering course credit hours in addition to those needed to satisfy their degree requirements.

**Curriculum Requirements**

Students wishing to minor in Computer Engineering must satisfy 18 credits hours specified as follows:

**Engineering Science**

**Introduction**

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of
the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and BIL 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

**Mission Statement**

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Societies changing needs and aspirations.

**Educational Objectives**

The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

**Credit Hours**

- Junior Year: 17
- Senior Year: 13
- Total Credit Hours: 124

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).
2. Applied electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.
3. Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

**Industrial Engineering**

https://ien.coe.miami.edu/index.html

Dept. Code: IEN
Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics
- a Ph.D. in Industrial Engineering.

For further information, see the Bulletin of the Graduate School (p. 2283).

Bachelor of Science in Industrial Engineering

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students' four years of study.

- Starting with IEN 111 Introduction to Engineering I and IEN 112 Introduction to Engineering II, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 Methods Analysis and Work Measurement where they perform work measurement projects in industry, write reports, and make oral presentations to management. In the Spring of their Junior year, the students take IEN 363 Project Management for Engineers and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take IEN 361 Industrial Cost Analysis and IEN 380 Engineering Economy where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 Computer-Aided Manufacturing introduces the students to product design in manufacturing and modern concepts of CAD/CAM/ Automation.
- IEN 441 Deterministic Models in Operations Research focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 Stochastic Models in Operations Research focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queueing models, and reliability.
- IEN 465 Production and Inventory Control provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
- Theory and applications of decision support systems in industrial engineering are covered in IEN 524 Decision Support Systems in IE. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In IEN 557 Ergonomics and Human Factors Engineering both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as IEN 512 Statistical Quality Control and Quality Management, IEN 547 Computer Simulation Systems, and IEN 568 Materials Handling and Facilities Planning.
- IEN 494 Senior Project is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.
Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

**Advanced Writing and Communication Skills:** Industrial Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Industrial Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- IEN 111 Introduction to Engineering I
- IEN 201 Methods Analysis and Work Measurement
- IEN 351 Industrial Safety Engineering
- IEN 363 Project Management for Engineers
- IEN 380 Engineering Economy
- IEN 494 Senior Project
- IEN 512 Statistical Quality Control and Quality Management
- IEN 547 Computer Simulation Systems
- IEN 557 Ergonomics and Human Factors Engineering
- IEN 568 Materials Handling and Facilities Planning

**Industrial Engineering Concentrations**

- Engineering Management Concentration
- Manufacturing Engineering Concentration
- Pre-Medical Concentration

**Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering (Five-Year BSIE/MSIE Program)**

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.
3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

**Dual B.S./M.S. Degrees in Industrial Engineering**

- B.S./M.S. in Industrial Engineering - Five Year Dual Degree (p. 1179)
- Industrial Engineering - Engineering Management Concentration - Five Year Program (p. 1182)Program

**IEN 111. Introduction to Engineering I. 3 Credit Hours.**

Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions. Introduction to professional ethics, intellectual property, ethics, intellectual property rights, and an introduction to use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
IEN 112. Introduction to Engineering II. 2 Credit Hours.
Continuation of IEN 111. An overview of Industrial Engineering concepts and issues important to the design and operation of industrial and service systems. Students will learn the use of software tools developed to enhance the Industrial Engineer's ability such as database management, high level programming languages, electronic spreadsheets, and computer graphics.
Prerequisite: IEN 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 201. Methods Analysis and Work Measurement. 3 Credit Hours.
Design of improved methods for doing work based on effective human effort. Time standardization of productive operations by work measurement, predetermined time systems, and activity sampling are discussed. Tools and charts for methods analysis are discussed and use of Microsoft Vision is emphasized and reviewed.
Prerequisite: IEN 112.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 306. Manufacturing Processes. 3 Credit Hours.
Basic and applied sciences in processing of materials. Effects of processing on the manufactured parts, selection of processing methods, and their relation with material properties. Contemporary and non-traditional processes used in manufacturing are also covered.
Prerequisite: CHM 121 or CHM 151 and PHY 221.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 310. Introduction to Engineering Probability. 3 Credit Hours.
Axioms of probability, discrete and continuous random variables, probability density functions, cumulative distribution function, expectation, conditioning, independence, functions of random variables, sums of random variables, introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with EEN 310.
Prerequisite: MTH 162 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 311. Applied Probability and Statistics. 3 Credit Hours.
This course covers fundamental probability concepts, random variables, mathematical expectation, discrete and continuous probability distributions, sampling distributions, point and interval estimation, hypothesis testing, and simple linear regression and correlation. The use of Minitab, a statistical software application, is emphasized. Examples are drawn from various disciplines.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 312. Applied Statistical Methods. 3 Credit Hours.
Linear regression, multiple regression, analysis of variance, and design of experiments are discussed. Cross-listed with MAS 312.
Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 351. Industrial Safety Engineering. 3 Credit Hours.
Basic principles of accident prevention and safety engineering approach to the design of mechanical equipment, facilities, and manufacturing processes. Analysis and design of fire prevention procedures and accident control procedures in industry are included.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
IEN 360. Productivity Engineering. 3 Credit Hours.
Definitions and scope of productivity engineering and management. The productivity cycle. Productivity measurement, evaluation, improvement--
discussion and examples. Productivity planning and improvement through the application of industrial and systems engineering techniques.
Discussion of individual techniques with examples. Application potential of the course in real life situations.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 361. Industrial Cost Analysis. 3 Credit Hours.
Analysis of financial statements and cost factors in manufacturing and service systems. Cost accounting methods, job order costing and process
costing approaches. Deterministic and probabilistic estimates of cost.
Prerequisite: MTH 162. And IEN 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 363. Project Management for Engineers. 3 Credit Hours.
This course will help students develop a basic understanding of the key concepts, theories, tools, and methodologies of project management.
Students will be introduced to the different phases of managing projects from conception to termination with particular emphasis on planning,
scheduling, resource allocation, monitoring and control. The course will utilize a case-study-based approach in analyzing the techniques and methods
of project management.
Requisite: Junior Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 372. Emerging Technologies and the Creation of Technological Innovations. 3 Credit Hours.
A variety of emerging technologies will be discussed (nanotechnology, energy technologies, information technologies, biotechnologies, etc). The
process of utilization in innovations will be covered.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 380. Engineering Economy. 3 Credit Hours.
Engineering Economy Fundamentals. Interest and money-time relationship, methods of making economic decisions, risk and uncertainty, sensitivity
analysis, selections among multiple alternatives, depreciation, benefit-cost analysis, replacement studies, minimum cost analysis, and related topics.
Prerequisite: MTH 162.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 399. Internship. 1 Credit Hour.
Practical application of classroom theory through employment with firms offering positions consistent with the student’s field of study. Course may
be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

IEN 406. Computer-Aided Manufacturing. 3 Credit Hours.
A comprehensive view of manufacturing with a focus on design, automation, and the use of computers in manufacturing. The topics include
computer-aided design, communications, programmable logic controllers, CNC machining, industrial robots, process planning, and computer-
integrated manufacturing. Laboratory projects are an integral part of the course.
Prerequisite: CHM 121 or CHM 151 and PHY 221.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 407. Product Design for Manufacturing. 3 Credit Hours.
The different phases of engineering design process. Guided Iteration Methodology for product design. Topics include design for manufacturing (DFM),
best practices of product realization, solid modeling using SolidWorks, quality in design, issues in patents, liability and ethics. Engineering design
specifications, evaluation methods for design alternatives.
Prerequisite: IEN 406.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 441. Deterministic Models in Operations Research. 3 Credit Hours.
Introduction to deterministic mathematical models with applications to operational problems. Topics include the methodology of operations research, mathematical programming, game theory, network flow-theory, and dynamic programming. Cross-listed with MAS 441.
Prerequisite: MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 442. Stochastic Models in Operations Research. 3 Credit Hours.
Probabilistic models in operations research. Topics include probabilistic inventory models, queuing theory, Markov chains, and probabilistic dynamic programming. Cross-listed with MAS 442.
Prerequisites: IEN 310 or ECE 310 or IEN 311 or MAS 311 and IEN 441 or MAS 441.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 465. Production and Inventory Control. 3 Credit Hours.
Production and inventory management techniques such as forecasting methods, inventory control subject to both known and uncertain demand, aggregate planning, introduction to scheduling, materials requirement planning (MRP), just-in-time (JIT) manufacturing, and introduction to scheduling are covered.
Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 494. Senior Project. 3 Credit Hours.
Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems. Course includes preparation of project proposal, data collection, analysis, reporting, and formal presentations.
Prerequisite: IEN 547. And Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 501. Manufacturing Analysis and Design I. 3 Credit Hours.
Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 502. Manufacturing Analysis and Design II. 3 Credit Hours.
Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 505. Robotics. 3 Credit Hours.
Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab controltoolbox and image analysis toolbox will be extensively used for design and analysis.
Prerequisite: IEN 406.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 507. Design of Manufacturing Systems. 3 Credit Hours.
State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.
Prerequisite: IEN 465.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 509. Automated Assembly. 3 Credit Hours.
Fundamentals of automated assembly including parts transfer systems and feeders, parts orientation and grasping techniques, product design for automated assembly (DFA), assembly robots, and performance and economics of assembly systems.
Prerequisite: IEN 406.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 512. Statistical Quality Control and Quality Management. 3 Credit Hours.
This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.
Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

IEN 513. Quality Management in Service Organizations. 3 Credit Hours.
Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 516. Introduction to Applied Data Analytics. 3 Credit Hours.
This course focuses on some of the most commonly-used data analytics models and covers the basics of data analytics using the open source software R (which is one of the fastest growing open source software platforms). Specific course topics include Data Preprocessing and Cleaning, Fundamentals of R (for basic data analytics tasks), Regression Analysis, Discriminant Analysis & Classification, Segmentation/Clustering, Model Tuning/Selection, Performance Measurement in Data Analytics, and Decision Making with Data. This course provides hands-on skills to engineering graduate students with performing statistical data analysis and decision-making utilizing common types of data sets.
Prerequisite: IEN 442 And IEN 312.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 524. Decision Support Systems in Industrial Engineering. 3 Credit Hours.
Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 547. Computer Simulation Systems. 3 Credit Hours.
Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.
Prerequisites: IEN 442 or MAS 442.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 548. Games and Decision Making. 3 Credit Hours.
This course covers fundamentals of decision theory and game theory. The course is research oriented and a significant part of the grading will be based on students’ research. Topics include optimization with multiple variables, constrained optimization, Lagrange relaxation, utility theory, decision making under uncertainty, simultaneous move (Nash) games, sequential decision making, sequential (Stackelberg) games, games with imperfect information, contracting and coordination, and bargaining. This course is composed of lectures, in-class discussions and problem solving, homework assignments, and research paper assignments.
Prerequisite: IEN 310. And IEN 441.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 554. Applied Computational Biomechanics. 3 Credit Hours.
Students will become familiarized with current tools in the field of computational biomechanics for applications in ergonomics, sports performance, simulations of occupational activities and human movement in general. Through the presentation of case studies and the completion of assignments, students will gain hands-on experience on full-body simulation environments (e.g., OpenSim), biomechanically oriented finite elements packages (e.g., FEBio), and software for reconstruction of human anatomy from medical images (Seg3D).
Prerequisite: IEN 557. Or BME 375.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 557. Ergonomics and Human Factors Engineering. 3 Credit Hours.
The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.
Prerequisite: IEN 312 or MAS 312.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Summer.

IEN 568. Materials Handling and Facilities Planning. 3 Credit Hours.
Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 570. Engineering Management. 3 Credit Hours.
Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.
Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 571. Engineering Entrepreneurship. 3 Credit Hours.
The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 572. Management of Technological Innovation. 3 Credit Hours.
Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

IEN 590. Special Topics in Industrial Engineering. 1-3 Credit Hours.
Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
IEN 594. Master’s Capstone Design Project. 0-3 Credit Hours.
A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.
Prerequisite: IEN 547. Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 595. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 596. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 599. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student’s field of study. Course may be repeated. Periodic reports and conferences are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MISSION

The Department of Industrial Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

GOALS

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
   - Service
   - Government
   - Consulting
   - Retail
   - Manufacturing

2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

STUDENT LEARNING OUTCOMES

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Credit Hours**

15

**Total Credit Hours**

141-142

---

1 To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

2 Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 268, MIC 301, CHM 202, or BMB 402. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

3 Technical or Science Elective Lab is selected from a science lab complementing the Adv Bioscience Elective (e.g., CHM or BIL lab).

* Students planning on taking the MCAT should take BMB 401 (http://bulletin.miami.edu/search/?P=BMB%20401) Biochemistry for the Biomedical Sciences as their first Adv. Bioscience Elective.

---

Choose one of the following:

---

1. To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

2. The Technical Elective is selected from courses at the 300 level or above, offered by one of the following departments: MTH, BME (except BME 320), CAE, ECO, EEN, IEN, MEN, ACC, FIN, MGT (except MGT 303), MAS, MKT.

3. IEN Electives are selected from courses at the 300 level or above, offered by the Department of Industrial Engineering.

4. IEN Electives are selected from courses at the 600 or 700 level, offered by the Department of Industrial Engineering.

1. HA Elective
2. PS Elective
Minor in Industrial Engineering

A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credit hours of coursework consisting of the courses listed below. A minimum of 12 credits must be taken at the University of Miami and IEN 201 must be taken at the University of Miami. In addition, you must achieve a minimum GPA of 2.5 for the courses in the minor.

Substitutions may be accepted with the permission of the Department Chairman except for IEN 201.

Mechanical and Aerospace Engineering

https://mae.coe.miami.edu/index.html

Dept. Code: MAE

Introduction

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design, development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today’s advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. Computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.
In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees:

• Bachelor of Science in Mechanical Engineering and
• Bachelor of Science in Aerospace Engineering.

Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, solid mechanics, fluid mechanics, and materials science. There are concentrations in:

• Aerospace Engineering and
• Internal Combustion Engines.

**Advanced Writing and Communication Skills**

Mechanical & Aerospace Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Mechanical & Aerospace Engineering students acquire Advanced Writing and Communication skills in the following core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

**Graduate Studies**

Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School (p. 2295).

**Dual B.S./M.S. Degrees in Mechanical and Aerospace Engineering**

• B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree (p. 1207)
• B.S. and M.S. in Mechanical Engineering (p. 1204)

**MAE 100. Introduction to Mechanical and Aerospace Engineering. 3 Credit Hours.**

Basic principles of automobile engines and engine efficiency. Introduction to robots and controls. Basic concepts of solar engineering and solar energy utilization. Principles of fuel cells and hydrogen energy. Introduction to aerospace engineering excluding the aspects of aerodynamics, propulsion and flight dynamics. Introduction to Aerodynamics of air planes and rockets.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Summer.

**MAE 111. Introduction to Engineering I. 3 Credit Hours.**

Use of engineering tools and computer techniques for problem solving. Data acquisition, analysis, presentation, software design, and computer aided drafting are covered. Development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights. Introduction to use of MATLAB, AutoCAD, and programming in C++.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.
MAE 112. Introduction to Engineering II. 2 Credit Hours.
Introduction to engineering design and the design process. Course topics include safety, reliability, human and environmental factors, economic analysis, and cost estimation. Professional ethics, product liability, solid modeling, machine shop orientation, and practice are also included. Group design projects.
Prerequisite: MAE 111.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 202. Dynamics. 3 Credit Hours.
Discussion of motion description and analysis, application of Newton’s laws, energy, and momentum principles to mechanical systems. Introduction to mechanical vibrations. Corequisite: PHY 205.
Prerequisite: CAE 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 207. Mechanics of Solids II. 3 Credit Hours.
Discussion of displacements, instability, flexural, shear, torsional, and principle stresses. Introduction to statically indeterminate analysis.
Prerequisite: CAE 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 241. Measurements Laboratory. 3 Credit Hours.
Introduction to experimental mechanical engineering. Basic principles of measurement, data interpretation, and uncertainty analysis are covered. Laboratory exercises in mechanical engineering areas are included.
Prerequisite: IEN 311 And ENG 107 Or Corequisite: MAE 207.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 301. Engineering Materials Science. 3 Credit Hours.
Introduction to the physics and chemistry of the solid state including the structure and properties of metals, polymers, and ceramics. Corequisite: PHY 207.
Prerequisite: PHY 223 (207).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 302. Mechanical Behavior of Materials. 3 Credit Hours.
Application of metallurgy and mechanics to the study of the plastic deformation and fracture of metals, ceramics, and plastics.
Prerequisite: MAE 207.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 303. Thermodynamics. 3 Credit Hours.
Thermodynamic properties of materials; the first and second laws of thermodynamics; application to thermodynamic processes; introduction to heat transfer.
Prerequisite: PHY 222 (206) and MTH 162 or MTH 172.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 309. Fluid Mechanics. 3 Credit Hours.
Course topics include fluid statics, fluid flow concepts, dynamics of inviscid and viscous fluids, closed and open channel flow, and compressibility effects.
Prerequisite: CAE 210 and PHY 222 (206).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MAE 310. Heat Transfer. 3 Credit Hours.
Application of elementary methods of solution to heat transfer problems involving steady and unsteady state conduction, radiation, and convection. Introduction of meaningful experimental data is also included.
Prerequisite: MAE 303.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 341. Mechanical Design I. 3 Credit Hours.
Concepts and software for kinematics, solid modeling, and project management. Fundamentals of mechanical design: stresses in and failure of mechanical elements. Individual and group design projects.
Prerequisite: MAE 202 and MAE 207.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 342. Mechanical Design II. 3 Credit Hours.
Review of the design process and creativity in design. Topics include design and reliability of gears, shafts, etc. Individual and group design projects are included.
Prerequisite: MAE 341.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 351. Mechanics Laboratory. 0-2 Credit Hours.
Exercises in the experimental determination of the mechanical properties of materials and the static and dynamic characteristics of mechanical and structural elements. Lecture, 1 hour; laboratory, 3 hours.
Prerequisite: MAE 302.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 362. Computer Analysis of Mechanical and Aerospace Engineering Problems. 3 Credit Hours.
Exploration of physical systems behavior using discrete models. Topics include numerical analysis, solid modeling, and software evaluation. Students solve engineering problems using student-developed and existing software.
Prerequisite: MAE 111, MAE 341 and MTH 211. Corequisite: MAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 371. Aerodynamics. 3 Credit Hours.
Course discusses the history of flight. Topics include fundamental variables, the atmosphere, basic equations, their approximations, compressibility, viscosity, flow regimes potential flow, and aerodynamics of airfoil and wing.
Prerequisite: MAE 309.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 399. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 404. Experimental Engineering Laboratory. 0-2 Credit Hours.
Experimental analysis of problems in fluid mechanics, thermodynamics, and other areas of engineering. Lecture, 1 hour; laboratory, 3 hours.
Prerequisite: MAE 303 and MAE 309 and MAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAE 408. Heating, Ventilating, and Air Conditioning. 3 Credit Hours.
Principles and procedures for the analysis and design of heating, ventilating and air conditioning (HVAC) systems, including moist air properties and conditioning processes, heating and cooling load calculations, building energy consumption, thermal comfort, and indoor air quality. Not available for students having taken MAE 405.
Prerequisite: MAE 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 412. System Dynamics. 3 Credit Hours.
Course topics include dynamic modeling of mechanical and thermo-fluid systems. Laplace transforms, transfer functions, energy concepts, causality, linearity, linear graph models, energy transducing system elements, frequency domain methods.
Prerequisite: ECE 201 or ECE 205 and MAE 202 and MAE 309.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 415. Automatic Control. 3 Credit Hours.
Introduction to system theory, transfer functions, and state space modeling of physical systems. Course topics include stability, analysis and design of PID, Lead/Lag, other forms of controllers in time and frequency domains, root locus Bode diagrams, gain and phase margins, Nichols chart, Nyquist criterion, and systems with time delay.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 420. Applied Thermodynamics. 3 Credit Hours.
Prerequisite: MAE 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 440. Introduction to Capstone Design. 3 Credit Hours.
Lectures and classroom discussion of the design process including product safety and manufacturability. Students are required to initiate the process of designing, fabricating, testing and analyzing the data from a design project chosen by the students. The students are required to form groups to accomplish the desired objectives of the design project.
Prerequisite: MAE 303 and MAE 309.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 441. Design of Fluid and Thermal Systems. 3 Credit Hours.
Course topics include thermal and fluid systems design fundamentals, piping systems, selection of pumps, piping system design practices, classification of heat exchanges. Basic design methods of heat exchange equipment is also included.
Prerequisite: MAE 309 and MAE 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 442. Capstone Design Project-I. 1 Credit Hour.
Lectures and classroom discussions cover (i) legal, ethical, and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs, and manufacturability, and (iii) other aspects such as global market, contemporary issues, and continuous learning process. Students are required to select group design projects from the breadth of mechanical engineering activity and present project to serve as the basis for MAE 443.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 443. Capstone Design Project-II. 2 Credit Hours.
Continuation of the Capstone Design Project-I course. A mechanical system is designed, implemented, documented, and presented.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MAE 444. Capstone Aerospace Design Project-I. 3 Credit Hours.
Lectures and classroom discussions cover (i) legal, ethical and societal responsibilities of engineers, (ii) design factors such as product safety, reliability, life cycle costs and manufacturability, and (iii) other aspects such as global market, contemporary issues and continuous learning process. Students are required to select group design projects from the breadth of aerospace engineering activity and present project proposals to serve as the basis for MAE 445.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 445. Capstone Aerospace Design Project-II. 3 Credit Hours.
Continuation of the Capstone Aerospace Design Project-I course. An aerospace system/subsystem is designed, implemented, documented and presented.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 446. Aircraft Design. 3 Credit Hours.
Concepts of aircraft design emphasizing on design layout including the airfoil geometry selection, propulsion integration, configuration layout, payload and landing gear system. Corequisite: MAE 471.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 470. Introduction to Aerospace Structures. 3 Credit Hours.
Course topics include mechanics of thin-walled aerospace structures, load analysis, virtual work, energy principles, stability of aerostructures, and finite element methods.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 471. Flight Dynamics. 3 Credit Hours.
Course topics include aerodynamic performance, stability, control, propulsion systems, and structures. Case Studies of Aerospace Systems are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 472. Design of Aerospace Structures. 3 Credit Hours.
Design Philosophy and principles of aerospace structures. Detailed design of wing box structure, fuselage, landing gear mechanism, fasteners and structural joints. Application of composite materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 490. Undergraduate Research. 1-3 Credit Hours.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 501. Methods of Engineering Analysis. 3 Credit Hours.
Analysis of engineering systems in equilibrium and motion. Examples considered from mechanical, electrical, thermal and fluids engineering. Mathematical theory and computer methods for obtaining numerical solutions are developed for various cases involving discrete and continuous systems. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 502. Vibrations. 3 Credit Hours.
Basic theory of free and forced vibrations of mechanical systems with and without damping. Applications to systems with one and several degrees of freedom are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAE 503. Internal Combustion Engines. 3 Credit Hours.
Course discusses engine types, characteristics, and operation. Topics include performance factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions, fuel metering, compressors, and turbines.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 505. Design for Manufacturability. 3 Credit Hours.
Manufacturing concerns at design stage. Design theory and methodology. Statistical considerations in geometric dimensioning, tolerances, reliability-based design, and quality control. Producibility, design for assembly, and value engineering. Life cycle costs and optimum design using nonlinear programming and Taguchi approaches. Hands on projects on machine tools.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 506. Nuclear Engineering. 3 Credit Hours.
Course topics include a review of neutron physics, chain reactions, reactor theory, steady state operation, and reactor kinetics. Control, long term reactivity changes, materials, heat transfer, and shielding are also included. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 507. Advanced Mechanics of Solids. 3 Credit Hours.
Courses discusses the basic elements of elasticity, plasticity, and viscoelasticity. Application to mechanical systems at rest and in motion are included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 508. Intermediate Heat Transfer. 3 Credit Hours.
Course discusses steady and unsteady heat transfer by conduction, convective heat transfer in laminar and turbulent fluid flow, natural convection, and heat transfer by radiation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 509. Turbomachinery Aero-thermodynamics. 3 Credit Hours.
Basic concepts of turbo machinery principle and thermo aerodynamic design, including gas-turbine engine cycles, compressor and turbine cascade, energy transfer in turbomachines, velocity diagrams, design and prediction of axial-flow compressors and turbines, radial-flow turbomachines, etc. Prerequisite: MAE 371 And MAE 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 510. Fundamentals of Solar Energy Utilization. 3 Credit Hours.
Fundamentals basic to the design and performance analysis of thermal systems for the capture and utilization of Solar Energy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 512. Intermediate Fluid Mechanics. 3 Credit Hours.
Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 514. Advanced Internal Combustion Engines Experimental Studies. 3 Credit Hours.
Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAE 516. Introduction to Composite Materials. 3 Credit Hours.
Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment’s impact on composite materials’ performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 521. Exhaust Emission Control. 3 Credit Hours.
Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 528. Fuel Cells. 3 Credit Hours.
Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 539. Heating, Ventilating and Air Conditioning System Design. 3 Credit Hours.
Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 540. Energy Conversion. 3 Credit Hours.
Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternative energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 551. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 552. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 570. Aero Propulsion. 3 Credit Hours.
Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 590. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the “Special Topics.”
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAE 591. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 592. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 599. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Mission

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society’s changing needs and aspirations.

The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society's changing needs and aspirations.

Goals

The educational objectives of the undergraduate Mechanical Engineering (B.S.M.E.) Program are to prepare graduates, within a few years after graduation, to be:

• working as a professional or as an entrepreneur in an area related to mechanical engineering, and/or
• exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.
Student Learning Outcomes

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Mechanical Engineering - Aerospace Engineering Concentration

http://www.coe.miami.edu/dept-mac/

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

### Mechanical Engineering - Internal Combustion Engines Concentration

http://www.coe.miami.edu/dept-mac/

This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

### Plan of Study

#### Freshman Year

**Fall**  
- MAE 111: Introduction to Engineering I  
- ENG 105: English Composition I  
- MTH 151: Calculus I for Engineers  
- PHY 221: University Physics I  

Credit Hours: 14

**Spring**  
- MAE 112: Introduction to Engineering II  
- CAE 210: Mechanics of Solids I  
- ENG 107: English Composition II: Science and Technology  
- MTH 162: Calculus II  
- PHY 222: University Physics II  
- PHY 224: University Physics II Lab  

Credit Hours: 16

#### Sophomore Year

**Fall**  
- MAE 207: Mechanics of Solids II  
- IEN 311: Applied Probability and Statistics  
- MTH 211: Calculus III  
- PHY 223: University Physics III  
- PHY 225: University Physics III Lab  
- HA Cognate (HA Elective) \(^1\)  

Credit Hours: 16

**Spring**  
- MAE 202: Dynamics  
- MAE 241: Measurements Laboratory  
- CHM 151: Chemistry for Engineers  
- CHM 153: Chemistry Laboratory for Engineers  

Credit Hours: 16

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).
2. Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.

### Mission

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society’s changing needs and aspirations.

The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society’s changing needs and aspirations.

### Goals

The educational objectives of the undergraduate Aerospace Engineering (B.S.A.S.E.) Program are to prepare graduates, within a few years after graduation, to be:
• working as a professional or as an entrepreneur in an area related to aerospace engineering, and/or
• exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

**Student Learning Outcomes**

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

### B.S./M.S. - Mechanical Engineering

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

1. You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

2. Technical Electives are advanced courses in mathematics, science or engineering, approved by the Faculty Advisor, as appropriate for individual objectives.
Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation’s leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School’s present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of over 80 who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science, Master of Professional Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School.
Mission
The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere, and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training and to be a strong force towards improved environmental understanding and management.

Academic Policies

Admission
Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the RSMAS Undergraduate Program is selective and highly competitive. Admission decisions are based on the secondary school record, SAT/ACT score, counselor’s evaluation and the applicant’s essay.

Student Responsibilities
Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student’s responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress
The Rosenstiel School will review each student’s record at the end of each semester. All students in the RSMAS Undergraduate Program must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

Honors
Honors may be earned by students who have an overall 3.5 GPA, have successfully completed MSC/GSC/ATM 412 with a written senior thesis, and have presented a poster or oral presentation of their research at a public forum such as the RSMAS Undergraduate Research Forum. MSC/GSC/ATM 412 requires completion of a minimum of 3 credits in MSC/GSC/ATM 411 or equivalent research experience approved by the program director.

Degree Programs
The Rosenstiel School of Marine and Atmospheric Science offers degree programs at both the undergraduate and graduate levels for students interested in marine and/or atmospheric and/or geological sciences as a career.

Undergraduate Degree Programs
The Rosenstiel School of Marine and Atmospheric Science offers both Bachelor of Science/Bachelor of Science in Marine and Atmospheric Science and Bachelor of Arts/Bachelor of Arts in Marine Affairs undergraduate degree options. Bachelor of Science options include Geological Sciences, Marine Biology and Ecology, Marine Science (double major), Meteorology, and Oceanography. Bachelor of Arts options include Geological Sciences and Marine Affairs.

The Bachelor of Science degree programs are meant for students planning to continue with graduate and professional studies or for those who will pursue a technical career in government, research, or private industry. The Bachelor of Arts degree programs are designed for students planning either non-technical careers with government agencies or private industries or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program, courses of study culminating in a Master of Science or Master of Professional Science are also available.

Graduate Degree Programs
Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and Atmospheric Science and are listed under the Rosenstiel School graduate program entries in the Bulletin.

Courses at the 500-level may be taken for undergraduate credit with junior standing and departmental consent. These courses are listed in the course section of the undergraduate bulletin.

Requirements for Graduation
In addition to satisfying the course requirements for the different undergraduate majors, students are expected to satisfy the School’s General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major and minor may also be used to satisfy the General Education Requirements.

Areas of Proficiency

A) English Composition
Students must complete ENG 105 and either ENG 106 or ENG 107, or their approved equivalents, typically in the first year of residence. Students with an appropriate score on the Advanced Placement [AP] language or literature examinations, or with an appropriate score on the International
Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT/V or ACT/E exams may be exempted from English 105.

**B) Communication across the Curriculum**

Students in the Rosenstiel School will, as part of their major curriculum, take courses designed to provide students with the skills required for effective communication, both written and oral, within the discipline.

**C) Mathematics**

**Bachelor of Arts:**

¹ Students must earn a letter grade of C- or higher in Calculus I for all B.S. and B.S.M.A.S majors excluding RSMI, RSMP, and RSMX+MATH which require a letter grade of C- or higher in Calculus I and II. Meteorology majors must earn a letter grade of C or higher in both Calculus I and Calculus II.

² Students must earn a letter grade of C- or higher in Calculus I and II. Meteorology majors must earn a letter grade of C or higher in both Calculus I and Calculus II.

² For specific Statistics and Computer Science requirements review each major.

**Areas of Knowledge**

As described under the section General Education Requirements under General University Information, students must complete one cognate in each of three the Areas of Knowledge:

1. Arts and Humanities,
2. People and Society (Social Sciences) and

All undergraduate students in the Rosenstiel School will fulfill their STEM cognate requirement through their major requirements. Students in Marine Affairs will fulfill their People and Society cognate requirement through their minor. Students in Marine Science may elect to fulfill the People and
Society cognate requirement with a Marine Policy cognate. Students in Meteorology may elect to fulfill the People and Society cognate requirement with a Broadcast Meteorology cognate. Cognates integrating Study Abroad courses are also available. See program advisors for details.

**Foote Fellow Requirements**

**Cognates**
Foote Fellows are exempt from cognate requirements.

**English**
Foote Fellows with (ACT English score 18-31; or SAT Evidence-Based Reading and Writing or Critical Reading score 430-690; or TOEFL iBT Writing score 18 or above) will be required to take English Composition I and II. Foote Fellows with (ACT English score 32 or above; or SAT Evidence-Based Reading and Writing or Critical Reading score 700 or above) will be required to take English Composition II (ENG 107). Only those Foote Fellows with sufficient scores on AP/IB examinations are exempt from the English composition requirement.

**Mathematics**
All Foote Fellows must complete math requirements as specified by their program.

**Exempt courses must be replaced by courses at the 200-level or higher.**

### Atmospheric Science - Meteorology

**Dept. Code:** ATM

**Meteorology**
Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology. The major includes a minor in Mathematics with an adequate MTH GPA.

Although Meteorology is a single major program, students often combine Meteorology with a second major in such diverse fields as Mathematics, Marine Science, or Broadcast Journalism. Interested students should read the information below and contact the Rosenstiel Undergraduate office (Ungar 210A or 305-284-2180) for details.

**Double Major Options**

**Mathematics**
The double major in Meteorology and Mathematics is intended for students who anticipate graduate study in Atmospheric Science and require a strong background in Mathematics. Interested students may find more information on the B.S.M.A.S. in Meteorology and Mathematics here (p. 1224).

**Marine Science**
The double major in Meteorology and Marine Science is intended for those students who wish to have a truly interdisciplinary career in atmospheric and marine science. Interested students may find more information on the B.S.M.A.S. in Meteorology and Marine Science here (p. 1294).

**Broadcast Journalism**
The double major in Meteorology and Broadcast Journalism is designed for Meteorology majors interested in Broadcast Meteorology. Students interested in adding Broadcast Journalism as a second major should review the School of Communication (p. 932) page for additional requirements.

**ATM 102. Introduction to Weather and Climate. 3 Credit Hours.**
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.
ATM 103. Survey of Modern Meteorology. 3 Credit Hours.
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to all RSMAS majors and minors.
Requisite: Major or Minor in the Rosenstiel School of Marine and Atmospheric Science and Pre/Corequisite: MTH 108 or higher (MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 243. Weather Forecasting. 3 Credit Hours.
Application of physical principals to weather forecasting. Use interpretation of computer-generated forecast guidance products of the U.S. Weather Service.
Prerequisite: ATM 103 or MSC 103 and MTH 108 or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 244. Tropical Weather and Forecasting. 3 Credit Hours.
Introduction to tropical weather systems, with an emphasis on hurricanes, and syntheses of observational data and numerical model predictions to create forecasts
Prerequisite: ATM 103 and ATM 243.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 265. Atmospheric Chemistry. 3 Credit Hours.
ATM 265 is focused on those aspects of environmental chemistry of most relevance to meteorology students. The class fulfills the American Meteorological Society (AMS) chemistry expectations for a Bachelor’s Degree in Meteorology, and in addition, addresses further recommendations from the AMS. AMS expects knowledge of atomic structure and chemical bonding, and, of the properties of gases. Recommended ‘beyond the basics’ goals include air quality and environmental science applications.
Prerequisite: ATM 103.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 303. Meteorological Instrumentation and Observation. 3 Credit Hours.
Techniques for measuring meteorological variables at the ground and in the free atmosphere.
Prerequisite: ATM 103, and PHY 101 or PHY 205 or PHY 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 305. Atmospheric Thermodynamics. 3 Credit Hours.
Equation of state; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams.
Prerequisite: PHY 201 or PHY 205.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 306. Advanced Principles in Broadcasting Meteorology. 3 Credit Hours.
Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.
Prerequisite: ATM 103 and ATM 243.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 307. Introduction to the Physics of Climate. 3 Credit Hours.
The Physical mechanisms which govern the earth’s climate and climate variability.
Prerequisite: ATM 305 or MSC 305.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.
An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.  
Prerequisites: CSC 120.  
Prerequisite: CSC 120 or MSC 203.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

ATM 371. Readings in Atmospheric Science. 1-3 Credit Hours.  
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from ATM371, ATM411, and ATM412 can be counted towards any of the RSMAS major or minor requirements with no more than 3 credits from each course.)  
Components: DIS.  
Grading: GRD.  
Typically Offered: Fall & Spring.

ATM 405. Atmospheric Dynamics I. 3 Credit Hours.  
Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.  
Prerequisite: ATM 305 (or MSC 305) and MTH 310 or MTH 211.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

ATM 406. Atmospheric Dynamics II. 3 Credit Hours.  
Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.  
Prerequisite: MSC 405 or ATM 405.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.

ATM 407. Weather Analysis. 4 Credit Hours.  
Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.  
Prerequisite: ATM 305 or MSC 305.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.

ATM 409. Cloud Physics, Radiation, and Remote Sensing. 3 Credit Hours.  
Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.  
Prerequisite: ATM 305.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.

ATM 411. Research in Atmospheric Science. 1-3 Credit Hours.  
Individual, independent research projects with faculty supervision. A formal written report is required that satisfies signed contract with faculty supervisor.  
Requisite: Junior or Senior Standing.  
Components: THI.  
Grading: SUS.  
Typically Offered: Fall, Spring, & Summer.

ATM 412. Undergraduate Thesis in Atmospheric Science. 1 Credit Hour.  
Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision. ATM 411 AND Senior Standing.  
Components: THI.  
Grading: GRD.  
Typically Offered: Fall, Spring, & Summer.
ATM 511. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 532. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 533. Atmospheric Boundary Layer. 3 Credit Hours.
The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 534. Introduction to Atmospheric Chemistry. 3 Credit Hours.
This course covers the basic principles of atmospheric chemistry. Concepts taught will include gas phase reactions, the production and destruction of ozone, aerosol size and composition.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 536. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 537. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer terms effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 553. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
1 year of Calculus 1 year Physics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 554. Climate Variability. 3 Credit Hours.
This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 562. Advanced Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor’easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.
Prerequisite: ATM 243 and ATM 305 and ATM 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 563. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storms forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 581. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 582. Special Topics. 3 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 583. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 584. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 585. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

B.S.M.A.S. in Meteorology
Meteorology
The Bachelor of Science degree program prepares students for further graduate studies as well as for non-academic professional applications. The program follows standards established by the American Meteorological Society (AMS), emphasizing a math and physics background for understanding the physical processes governing the motion and composition of the atmosphere.
Undergraduate students are encouraged to work with the faculty and are able to earn course credit and senior theses by conducting research under the supervision of leading scientists in their field. Research encompasses atmospheric dynamics, climate science, boundary-layer processes, cloud processes, and remote sensing. Focus areas include hurricanes (modeling, data assimilation and field observations), tropical meteorology, atmosphere-ocean coupling, climate, and climate change. Many faculty are active in fieldwork.
The Bachelor of Science degree program is meant for students planning to continue with graduate studies in atmospheric science, or for those who will pursue a technical career in this area in government or private industry.

- ATM 407 Weather Analysis 4
- Elective #10 3
- Elective #11 3

**Credit Hours** 13

**Spring**
- ATM 409 Cloud Physics, Radiation, and Remote Sensing 3
- Elective #12 3
- Elective #13 3
- Elective #14 3

**Credit Hours** 12

**Total Credit Hours** 120

*14 elective courses include:
  - 3 Arts and Humanities Cognate courses
  - 3 People and Society Cognate courses

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Meteorology at the University of Miami is to graduate students with the ability and desire to integrate knowledge of meteorology into their future careers.

**Goals**

This program strives to provide the rigor, flexibility, depth and integration to enable students to:

- Pursue a course of study that provides both depth and breadth in Meteorology and related science courses.
- Prepare themselves for public and private sector employment, graduate school, and successful careers.

**Student Learning Outcomes**

- Meteorology students will be able to apply concepts from physics to the atmosphere of a rotating planet, to solve basic problems.
- Students will be able to apply the basic concepts of thermodynamics to the atmosphere.
- Students will learn the structure and chemistry of the troposphere and stratosphere and apply this to air quality and environmental science applications.

**B.S.M.A.S. in Meteorology and Marine Science**

**Marine Science/Meteorology**

The Marine Science/Meteorology degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in the physical aspects of climate, as well as the interaction of the ocean and the atmosphere. The Meteorology curriculum follows the program guidelines established by the American Meteorological Society.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research encompasses atmospheric dynamics, climate science, boundary-layer processes, cloud processes, and remote sensing. Focus areas include hurricanes (modeling, data assimilation and field observations), tropical meteorology, atmosphere-ocean coupling, climate, and climate change. Many faculty are active in fieldwork.

The Bachelor of Science double major in Marine Science/Meteorology prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

Mission
The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

Goals
Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Meteorology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of changing climate and increasing stress on Earth’s resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

• Design and pursue their course of study that meets requirements of a double major in Marine Science and Meteorology
• Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs
• Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills
• Prepare themselves for graduate school and for successful careers in public and private industries.

Student Learning Outcomes
• Students will demonstrate an ability to communicate effectively.
• Students will develop analytical and quantitative skills to allow critical data analysis.
• Students will be able to do carry out supervised research in the field of marine science.
• Meteorology students will be able to apply concepts from physics to the atmosphere of a rotating planet, to solve basic problems.
• Students will be able to apply the basic concepts of thermodynamics to the atmosphere.

* 6 elective courses must include:
  • 3 Arts and Humanities Cognate courses
  • 3 People and Society Cognate courses
Students will learn the structure and chemistry of the troposphere and stratosphere and apply this to air quality and environmental science applications.

Mission

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Meteorology at the University of Miami is to graduate students with the ability and desire to integrate knowledge of meteorology into their future careers.

Goals

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Meteorology and Mathematics, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of changing climate and increasing stress on Earth’s resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Pursue a course of study that provides both depth and breadth in Meteorology and Mathematic courses.
- Prepare themselves for public and private sector employment, graduate school, and successful careers.
Students should gain substantial problem solving and critical reasoning skills, and they should develop an understanding of the conceptual underpinnings of mathematics and meteorology.

### Student Learning Outcomes

- Meteorology students will be able to apply concepts from physics to the atmosphere of a rotating planet, to solve basic problems.
- Students will be able to apply the basic concepts of thermodynamics to the atmosphere.
- Students will learn the structure and chemistry of the troposphere and stratosphere and apply this to air quality and environmental science applications.
- Students will acquire a solid understanding of advanced material within a mathematics "specialty path" which synthesizes and extends their lower-division work. The path is selected by the individual student depending on his/her particular interests.

### Minor in Climate Science and Policy

* Students with a Meteorology or Oceanography major should replace ATM 102/ATM 103 from List A with an additional course from list B.

** Students with a Meteorology major cannot use ATM 307 towards the minor.

*** Students from a program without a statistics requirement must also take an approved course in statistics increasing this to an 18 credit hour minor.

**** Only those courses passed with a grade of “C-” or higher may be applied to the minor. Courses used towards a minor must be above and beyond those used for the major. The Climate Science and Policy minor fulfills the requirements of the People and Society or STEM cognate.

**Total Credit Hours**

15
* Students with an Oceanography major should replace ATM 103 with one additional elective, for a total of 15 credits.
** All electives must be above and beyond those used for the major. Only those courses passed with a grade of "C-" or higher may be applied to the minor. The Meteorology minor fulfills the requirements of the STEM cognate.

**Geological Sciences**

**Dept. Code: GSC**

Geological Sciences

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

**Major Options**

There are three undergraduate degree options pertaining to the Geological Sciences: 1) the double major Bachelor of Science in Marine Science and Geological Sciences, 2) the Bachelor of Science in Geological Sciences, and 3) the Bachelor of Arts in Geological Sciences. Students often combine majors in the Geological Sciences with a second major or minor in diverse fields such as Anthropology, Mathematics, or Ecosystem Science and Policy. Interested students should read the information below and contact the Rosenstiel Undergraduate office (Ungar 210A or 305-284-2180) for details.

- Bachelor of Science (B.S.) in Geological Science
- Bachelor of Science (B.S.M.A.S.) Marine Science/Geological Sciences
- Bachelor of Arts (B.A.) in Geological Sciences
- Five-year Master of Science Program (M.S.)

**5 Year B.S./M.S. Program in Geological Sciences and Marine Geosciences**

A 5-year B.S. /M.S. in Geological Sciences and Marine Geosciences allows qualified students to complete a master's degree in one year of study beyond the B.S. By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Applicants must be high school seniors in the top 10% of their class, have a minimum SATI composite score of 1420 or ACT score of 31 and an unweighted GPA of 3.75. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form. The application form and supporting materials must be submitted no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November.

For further information and application forms please visit this website (https://admissions.miami.edu/undergraduate/academics/dual-degree-program/).

**GSC 101. Origin and Evolution of Planet Earth. 3 Credit Hours.**
The origin of the elements and the evolution of the universe. The formation and early evolution of the solar system. The differentiation of the earth into core, mantle, and crust. Origin of the oceans and atmosphere.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**GSC 102. Evolution of the Biosphere. 3 Credit Hours.**
The physical basis of life. The origin, early evolution, history of life on Earth. Emphasis on major crises and innovations, including the evolution of modern man.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.
GSC 103. Evolution of the Modern Earth's Environment. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GSC 105. The Global Environment. 3 Credit Hours.
Anthropogenic effects on the Earth's environment compared to analogous natural events.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GSC 106. Geological Influences on Society. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 107. Natural Disasters: Hollywood vs. Reality. 3 Credit Hours.
This course will explore the causes, effects and societal responses to disasters. We will look at a variety of natural hazards and related disasters including flooding, volcanoes, landslides, earthquakes, hurricanes, tsunami and drought. Using excerpted segments of "disaster films" in conjunction with scientific treatments, we can identify the causes, frequency, consequences, risks, and public perceptions of natural hazards.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 108. The Geologic Record. 3 Credit Hours.
Analysis of the rock record to determine the geologic history using knowledge of rocks, minerals, fossils, and stratigraphy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GSC 109. Our Geoheritage: Geology of America’s National Parks. 3 Credit Hours.
This course is designed to introduce the student to the geologic setting and geological processes that have contributed to the formation and evolution of America's national parks. The concept of a national park, an American concept, provides a sense of place, and as such contributes to our collective geoheritage. For international students, this course will introduce them to diverse environmental settings, physiography, and tectonic forces that have similarly affected all the landmasses of Earth. This course will focus on the fundamental geological processes that have collaborated to form the U.S. national parks.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

GSC 110. The Earth System. 4 Credit Hours.
Interactions among the major components of the Earth System - the geosphere, the hydrosphere, the atmosphere, and the biosphere.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

GSC 111. Earth System History. 4 Credit Hours.
Earth History, beginning with earliest origins and surveying major steps in the evolution of the geosphere, atmosphere, hydrosphere, and biosphere.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

GSC 222. Earth’s Climate Past and Future. 3 Credit Hours.
This course will provide undergraduate students majoring in geological sciences, as well as enthusiastic non-majors, with the foundation to better understand climate change on geological to human timescales. The natural processes that control the earth's climate will be discussed, with special attention to the climate of the Holocene, and the potential influence climate may have played on human civilizations. Finally, the expected climate shifts and feedbacks will be discussed based on the outcome of climate models for the next century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
GSC 230. Reef Systems Through Time. 3 Credit Hours.
Interacting geological, physical, chemical, biological, and climatic processes that define a reeval setting and system. Field trips included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 231. Field Studies in Earth Systems. 2 Credit Hours.
Field Study of Earth systems through geologic time. Hands-on investigation of the geologic record to reveal Earth's past environments, climates, and life.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 240. Introduction to Marine Geology. 3 Credit Hours.
Learn about the origin, structure and evolution of the ocean basins and their margins, including interpretation of the paleo-archives hidden on the seafloor. The course material is necessarily broad, covering marine geography, plate tectonics, active and passive margins, coastal and ocean processes, sediment processes, continental margin and seafloor resources, and climate and ocean history and interactions. Our approach will be interdisciplinary, requiring integration of chemical, physical and biological systems, as well as geologic processes. A special emphasis will be placed on learning to read the sediment record as an archive of information on biologic and climate evolution.
Prerequisite: GSC 110 or GSC 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 260. Earth Materials. 4 Credit Hours.
Physical and optical properties of common rock-forming minerals and their occurrence in igneous, metamorphic, sedimentary rocks, and ore deposits. Lecture, 3 hours; laboratory, 4 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 309. Microbes and the Environment. 3 Credit Hours.
This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GSC 311. Field Studies in Geologically Active Landscapes. 2 Credit Hours.
Field studies in volcanic and other tectonically active areas, with attention to driving processes and human impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 360. Depositional and Diagenetic Systems. 4 Credit Hours.
Sedimentary processes, sedimentology, and sedimentary diagenesis. Physical, biological and chemical sedimentation in Earth’s surficial environments. Paleoenvironmental and diagenetic history reconstruction using petrologic, hand specimen, and field methods. Cyclicity in sedimentary systems. Lecture, 3 hours; field/ laboratory, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GSC 371. Readings in Geological Sciences. 1-3 Credit Hours.
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from GSC371, GSC411, and GSC412 can be counted towards any of the RSMAS major or minor requirements with no more than 3 credits from each course.)
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.
GSC 380. Paleontology and Stratigraphy. 4 Credit Hours.
Biostratigraphy, paleoecology, taphonomy, micro- and macro-evolutionary processes, and physical and chemical methods used for stratigraphic
correlation. Major groups of invertebrate phyla comprising the bulk of the fossil record. Lecture, 3 hours; laboratory, 2 hours.

Components: LEC.
Grading: GRD.
 Typically Offered: Spring.

GSC 401. Senior Internship. 3 Credit Hours.
Field and laboratory studies conducted in conjunction with an approved academic environmental or industrial research laboratory or agency.

Components: THI.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

GSC 410. Environmental Geochemistry. 3 Credit Hours.
Natural distribution of the elements on earth, and how this is being changed. Radioactivity and energy, greenhouse warming and ozone depletion,
water and waste and other environmental problems.

Components: LEC.
Grading: GRD.
 Typically Offered: Fall & Spring.

GSC 411. Research in Geological Sciences. 1-3 Credit Hours.
Individual, independent research projects with faculty supervision. A formal written report is required.

Components: THI.
Grading: SUS.
 Typically Offered: Fall, Spring, & Summer.

GSC 412. Thesis in Geological Sciences. 1 Credit Hour.
Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.

Components: THI.
Grading: GRD.
 Typically Offered: Fall, Spring, & Summer.

GSC 420. Geophysics. 3 Credit Hours.

Components: LEC.
Grading: GRD.
 Typically Offered: Spring.

GSC 424. Origin and Geology of the Galapagos Islands. 3 Credit Hours.
This course explores the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a
common origin in, plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and
hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be
to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and to explore through daily field
excursions a wide suite of volcanic features displayed on Isabela Island.
Prerequisite: GSC 110.

Components: LEC.
Grading: GRD.
 Typically Offered: Fall & Spring.

GSC 440. Petrology. 4 Credit Hours.
Genesis and classification of igneous and metamorphic and sedimentary rocks, field relationships of rock assemblages and results of recent
laboratory investigations. Identification of common rock types in hand specimens and by thin-section and X-ray diffraction techniques. Lecture, 3
hours; laboratory, 3 hours.
Prerequisite: GSC 260.

Components: LEC.
Grading: GRD.
 Typically Offered: Spring.

GSC 462. Earth's Ancient Atmospheres, Climates, and Sea Levels. 3 Credit Hours.
The Earth's atmospheres, climates, and sea level from the early Pre-Cambrian to present. Focus is placed on how the study of Earth's past is relevant
to both modern and future climate change.
Prerequisite: GSC 110 and GSC 111.

Components: LEC.
Grading: GRD.
 Typically Offered: Spring.
GSC 480. Structural Geology. 4 Credit Hours.
Behavior of rock materials; analysis, description and classification of geologic folds, faults, joints; analysis of rock fabrics; tectonic and geologic history of continents and continental margins. Lecture, 2 hours; laboratory, 2 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GSC 482. Field Methods. 2 Credit Hours.
Field and laboratory exercises in mapping; interpretation of aerial and satellite imagery, coring, rock description, and stratigraphic interpretation. Course meets most Saturdays.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

GSC 550. Hydrogeology. 3 Credit Hours.
Explore the cycling of water in the Earth’s hydrosphere with a focus on geological, physical and chemical aspects of surface and sub-surface reservoirs and processes. Topics include climate change and other challenges facing the hydrologist in ensuring adequate availability and quality of water through exploring and developing new resources and managing and protecting existing ones.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GSC 561. Communicating Geoscience. 2 Credit Hours.
Evaluate the scientific works of others, both oral and written, and work on developing the skills to clearly and concisely present your own work and ideas as a geoscientist. Discuss career opportunities and prepare to move forward toward a career in the Earth sciences.
Components: DIS.
Grading: GRD.
Typically Offered: Spring.

GSC 580. Summer Field Geology. 4 Credit Hours.
An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required. Touring course. Travel fee required.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

GSC 581. Summer Field Environmental Geology. 2 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

GSC 582. Field Studies. 1-4 Credit Hours.
Conducted field trips to selected geological sites in the United States and abroad. Report required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.A. in Geological Sciences

BA in Geological Sciences
This major program prepares students for the study of the Earth and its ocean, and the ongoing processes of geophysical and geochemical change. Research at UM focuses on carbonate sedimentology and corals reefs’ geochemistry, paleoclimatology, tectonic processes (volcanoes and earthquakes), and the impact of rising sea level on coastal systems. This major is designed for careers in education, business, law, or science journalism.

¹ Recommended elective to take for the Geological Science B.A. major.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.
The educational mission of the BS degree in Geological Sciences at the University of Miami is to graduate students with the ability and desire to integrate knowledge of geological science into their future careers.

Goals
In a time of increasing stress on Earth’s resources, land, oceans and environment, we strive to train our students in both the fundamentals of the Geological Sciences and natural systems and also the global environmental stresses facing Earth and society. In addition to the basic classroom and hands-on education in the various aspects of the Geological Sciences, we focus on preparing our undergraduate students in three critical areas: extensive field training and research to give students competence in dealing with the complexities of the real world; training in written and oral communication to give them competence in sharing their accumulating knowledge with their peers and also with the public; and an understanding of how increased human population and resource use is affecting Earth’s climate, environment and future character.

Student Learning Outcomes
- Students will demonstrate a strong knowledge base in the basics of geological sciences materials, history and processes (as provided in our GSC 110, 111, and 260 courses).
- Students will demonstrate a competent knowledge base in the following advanced sub-disciplines of geological sciences: sedimentology, stratigraphy, structural geology, paleontology/paleoecology, geochemistry, geophysics, and petrology.
- Students will demonstrate research competence in supervised research projects through course, employment, and/or a Senior Thesis.
- Students will demonstrate a competence in application of their geological sciences knowledge to field research applications, including mapping, sequence analysis, paleo-environmental reconstruction, structural/tectonic history, and process reconstruction.
- Students will demonstrate the ability to communicate their scientific knowledge and findings orally and in writing both at the professional scientific level and in lay terms.

B.S. in Geological Sciences

BS in Geological Sciences
This major program prepares students for the study of the Earth and its ocean, and the ongoing processes of geophysical and geochemical change. Research at UM focuses on carbonate sedimentology and corals reefs’ geochemistry, paleoclimate, tectonic processes (volcanoes and earthquakes), and the impact of rising sea level on coastal systems. This major is designed for students preparing for graduate study and professional careers.

1. Recommended elective to take for the Geological Sciences B.S. major.
Mission
The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Geological Sciences at the University of Miami is to graduate students with the ability and desire to integrate knowledge of geological science into their future careers.

Goals
In a time of increasing stress on Earth’s resources, land, oceans and environment, we strive to train our students in both the fundamentals of the Geological Sciences and natural systems and also the global environmental stresses facing Earth and society. In addition to the basic classroom and hands-on education in the various aspects of the Geological Sciences, we focus on preparing our undergraduate students in three critical areas: extensive field training and research to give students competence in dealing with the complexities of the real world; training in written and oral communication to give them competence in sharing their accumulating knowledge with their peers and also with the public; and an understanding of how increased human population and resource use is affecting Earth’s climate, environment and future character.

Student Learning Outcomes
• Students will demonstrate a strong knowledge base in the basics of geological sciences materials, history and processes (as provided in our GSC 110, 111, and 260 courses).
• Students will demonstrate a competent knowledge base in the following advanced sub-disciplines of geological sciences: sedimentology, stratigraphy, structural geology, paleontology/paleoecology, geochemistry, geophysics, and petrology.
• Students will demonstrate research competence in supervised research projects through course, employment, and/or a Senior Thesis.
• Students will demonstrate a competence in application of their geological sciences knowledge to field research applications, including mapping, sequence analysis, paleo-environmental reconstruction, structural/tectonic history, and process reconstruction.
• Students will demonstrate the ability to communicate their scientific knowledge and findings orally and in writing both at the professional scientific level and in lay terms.

B.S.M.A.S. in Marine Science / Geological Sciences

Marine Science/Geological Sciences
The Marine Science/Geological Sciences degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in the study of the origin of the Earth and its oceans, and the ongoing processes of geophysical and geochemical change.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research at UM focuses on carbonate sedimentology of the Florida reef tract, stable isotope geochemistry and micropaleontology of deep ocean cores to reconstruct paleoclimate, tectonic processes (volcanoes and earthquakes), and the impact of rising sea level on coastal systems.

The Bachelor of Science double major in Marine Science/Geological Sciences prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

One course in Geological Sciences may fulfill requirements in both Marine Science and Geological Sciences.

Principles of Chemistry must be passed with a grade of "C-" or higher.

Calculus I must be passed with a grade of "C-" or higher.

Option 1 is recommended for Physics.

Credit Hours: 124

* 6 elective courses must include:
  - 3 Arts and Humanities Cognate courses
  - 3 People and Society Cognate courses

1 Students must take one laboratory from MSC 232 or MSC 302.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

**Goals**

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Geology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of increasing stress on Earth’s resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Design and pursue their course of study that meets requirements of a double major in Marine Science and Geology.
- Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
- Prepare themselves for graduate school and for successful careers in public and private industries.

**Student Learning Outcomes**

- Students will demonstrate an ability to communicate effectively.
- Students will develop analytical and quantitative skills to allow critical data analysis.
- Students will be able to do carry out supervised research in the field of marine science.
Minor in Geological Sciences

Overview
The Geological Sciences minor introduces student to the study of the Earth and its ocean, and the ongoing processes of geophysical and geochemical change.

* The minor in Geological Sciences consists of 17 credit hours in courses numbered 110 or higher.
** A minimum grade of "C-" must be earned in each course with an overall GPA of 2.0.

Marine Affairs

Dept. Code: MSC

Marine Affairs
The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the social, cultural, economic, and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a required minor or additional major in Anthropology, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, an approved field within the Miami Herbert Business School, or approved field within the School of Education and Human Development. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

5 Year BA/MPS Program in Marine Ecosystems and Society
The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Ecosystems and Society. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Ecosystems and Society in one additional year. Conditional acceptance to the graduate Marine Ecosystems and Society program is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

MSC 101. Survey of Oceanography. 3 Credit Hours.
Introduction to the oceans and their significance to mankind, encompassing geological, physical, chemical, and biological processes; man's role in and on the sea, including fisheries, pollution, and ocean management. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSC 102. Introduction to Weather and Climate. 3 Credit Hours.
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MSC 103. Survey of Modern Meteorology. 3 Credit Hours.
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to all RSMAS majors and minors.
Requisite: Major or Minor in the Rosenstiel School of Marine and Atmospheric Science and Pre/Corequisite: MTH 108 or higher (MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 104. Molecules of Life. 3 Credit Hours.
Molecules of Life explores the modern science of biological molecules, which occurs at the intersection of chemistry, biology, and medicine. We examine the major molecular components of the cell--proteins, nucleic acids, lipids, etc.--and illustrate the role of chemical principles in understanding their structure and function. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 105. Shark Behavioral Ecology & Conservation Semester. 3 Credit Hours.
SUMMER SCHOLARS PROGRAM ONLY. In this course, students will learn core concepts in shark behavioral ecology and key aspects of shark biology needed for the holistic understanding and study of shark behavioral ecology and conservation. NOT FOR MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MSC 106. Marine Mammal Biology and Conservation. 3 Credit Hours.
SUMMER SCHOLARS PROGRAM ONLY. The purpose of this class is to provide an introductory overview of basic biological concepts relevant to marine mammal taxonomy, physiology, natural history, behavior, and threats/conservation. This class will be dynamic, involving lectures, discussions, review of primary literature, career guidance, guest lectures, videos/movies, and field trips. NOT FOR MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MSC 107. Life in the Sea. 3 Credit Hours.
Lectures provide an introduction to the plants and animals of the sea, including plankton, nekton and the benthos, with anthropogenic impacts. Not for major or minors.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 108. Environmental Oceanography. 3 Credit Hours.
This course will focus on environmental issues facing the oceans today, including global climate destabilization, the impact of population growth on coastal environments, marine pollution, and the state of marine fisheries. An active learning approach will be adopted, with emphasis on case studies and critical analysis. Marine environmental issues will be presented in self-contained analytical exercises. Basic math needed to quantify environmental issues will be introduced. Information and questions on sustainability will be integrated throughout the course and students will be asked to think critically about these pressing concerns. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 111. Introduction to Marine Science. 3 Credit Hours.
Geological, physical, chemical and biological processes of the world’s oceans. The role of the oceans in global dynamics and man's role in and on the sea, including fisheries, pollution and ocean management. Enrollment limited to Marine Science/Marine Affairs majors and minors. Lecture and discussion, 3 hours. Field trips.
Requisite: Marine Science Major or Minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MSC 112. Introduction to Marine Science Lab. 1 Credit Hour.
Laboratory and field exercises to accompany Marine Science.
Pre/Corequisite: MSC 111. And Marine Science Major or Minor.
Components: LAB.
Grading: GRD.
 Typically Offered: Fall.

MSC 115. Tropical Marine Biology. 3 Credit Hours.
A field and lecture study of selected marine environments around South Florida, with emphasis on the interaction between organisms and the geological, physical, and chemical environment. Summer Scholars Program Only.
Components: LEC.
Grading: GRD.
 Typically Offered: Summer.

MSC 121. Ocean Currents. 3 Credit Hours.
Ocean Currents will be a comprehensive, multi-disciplinary course on the history, geography, socio-economics, and physics of ocean currents. The importance of ocean currents to socioeconomics, weather, climate, transport of fish larvae and pollutants, distribution of plankton and fish, military operations, and shipping will be illustrated using many examples. The history of ocean current observations, detailed maps of ocean circulation and its variability, and the evolution of instruments, and theories from ancient to modern times will be detailed. The discovery and the most important observations of the major ocean currents will be discussed. There will be also lectures on modern ocean circulation theory. NON-MSC MAJORS ONLY For non- MSC majors.
Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

MSC 172. Special Topics in Marine Science. 2-6 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

MSC 180. Seminar in Marine Science. 1 Credit Hour.
Seminar in current research as conducted by Marine Science faculty and graduate students. This course is intended as an introduction for first year students to contemporary research topics.
Pre/Corequisite: MSC 111.
Components: LEC.
Grading: SUS.
 Typically Offered: Offered by Announcement Only.

MSC 190. Studies in Marine Science. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM
Components: LEC.
Grading: GRD.

MSC 191. Studies in Marine Policy. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
Components: LEC.
Grading: GRD.

MSC 203. Foundations of Computational Marine Science. 4 Credit Hours.
The course provides a basic introduction to Computational Marine Science. The course will use Python as a programming language and will illustrate its use in problem solving and exploratory data analysis in the Marine Sciences. Programming topics covered include the language syntax and construct, variables, flow control, functions, software design and object-oriented programming.
Components: LEC.
Grading: GRD.
 Typically Offered: Fall.

MSC 204. Environmental Statistics. 3 Credit Hours.
This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data. (Not open to students with credit in BIL311 or equivalent).
Components: LEC.
Grading: GRD.
 Typically Offered: Fall & Spring.
MSC 205. Mathematical Methods for Marine Science. 3 Credit Hours.
This course is meant to provide students with the mathematical tools required to pursue advanced topics in Marine Science. Not available for credit for students with major or minor in Mathematics.
Prerequisite: MTH 162 Or MTH 172 And MSC 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 215. Chemical Oceanography. 3 Credit Hours.
An introduction to the chemistry of the oceans. Descriptive chemical oceanography of the components of ocean waters (metals, gases, organic compounds and nutrients). Biogeochemical cycles in oceanic systems.
Prerequisite: MSC 111 and (CHM 112 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 216. Chemical Oceanography Laboratory. 1 Credit Hour.
Chemical and physical methods in chemical oceanography. Analytical and instrumental techniques used to determine density, salinity, chlorinity, dissolved oxygen, nutrients and components of the carbonate system. Corequisite: MSC 215.
Pre/Corequisite: MSC 215 and Prerequisite: CHM 113.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 217. Physical and Chemical Processes in Coastal Ecosystems. 3 Credit Hours.
This course is primarily intended for students enrolled in the Marine Affairs program to serve as an introduction to the role of physical and chemical processes in estuarine and coastal ecosystems in the context of the management of estuarine and coastal waters. Students will provide reviews of case studies in preparation for future management decisions that will require knowledge of coastal physical and chemical processes. Prerequisites: MSC 111 AND MSC 230.
Prerequisite: MSC 111 and MSC 230 and (CHM 111 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 218. Biological Oceanography. 3 Credit Hours.
This course will examine energy flow in marine ecosystems, the biogeochemical cycles that control them, the wide variety of types of communities and ecosystems in different parts of the ocean, and the changes they have undergone over geological timescales.
Prerequisite: MSC 111.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 220. Climate and Global Change. 3 Credit Hours.
The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 222. The Earth's Climate: Past and Future. 3 Credit Hours.
This course will provide undergraduate students majoring in geological sciences, as well as enthusiastic non-majors, with the foundation to better understand climate change on geological to human timescales. The natural processes that control the earth's climate will be discussed, with special attention to the climate of the Holocene, and the potential influence climate may have played on human civilizations. Finally, the expected climate shifts and feedbacks will be discussed based on the outcome of climate models for the next century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 230. Introduction to Marine Biology. 3 Credit Hours.
Prerequisite: (BIL 150 or BIL 160) and (CHM 111 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MSC 232. Introduction to Marine Biology Laboratory. 1 Credit Hour.
Ecology, physiology, and behavior of marine organisms in south Florida marine habitats.
Pre/Corequisite: MSC 230. or BIL 230. and Prerequisite: BIL 151 or BIL 161.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 240. Introduction to Marine Geology. 3 Credit Hours.
The principal marine geological environments of the world, their substrate, their sediments, their flora and fauna, and their evolution through time.
Prerequisite: GSC 110 Or GSC 111 Or permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 300. Water Resources: History, Management, and Policy. 3 Credit Hours.
An overview of the issues and problems surrounding the management of aquatic resources in the broadest sense including water quality of natural waters, drinking water, water pollution, water quantity and supply issues, watershed management, wetland protection, and coastal management.
We will explore the available strategies to wisely manage the various aquatic resources, policy options and their socio-economic aspects, legal frameworks, and institutional arrangements.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 301. Introduction to Physical Oceanography. 3 Credit Hours.
Application of the laws of physics to the study of the properties and circulation of the world's oceans and atmosphere.
Prerequisite: MSC 111. And MTH 162. Or MTH 172.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 302. Introduction to Physical Oceanography Lab. 1 Credit Hour.
Laboratory exercises and field work on basic fluid mechanics applicable to the ocean. These include buoyant convection and double diffusion, methods for measuring flows, gravity wave experiments in the lab and field, diffusion studies and rotating tank investigations as an analog for planetary flows.
Prerequisite: MSC 301 or ATM 405. Or Co-requisite: MSC 301 or ATM 405.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MSC 310. Living Resources of the Ocean. 3 Credit Hours.
Marine fish and shellfish of major commercial and recreational value: biology, techniques of harvesting, and resource management.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 313. Coastal Law. 3 Credit Hours.
Basic doctrines and public policy related to the use and regulation of the United States coastal zone and seabed.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 314. Ocean Law. 3 Credit Hours.
The principles of international ocean law regarding ocean management; ocean delimitation and issues of environmental ocean regulation within international legal framework.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MSC 316. Global Primary Production. 3 Credit Hours.
Photosynthesis supports the vast majority of life on planet earth. This course reviews the magnitude and the processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
Prerequisite: BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 317. Earth’s Biogeochemistry. 3 Credit Hours.
Outstanding features of planet Earth, including its vast oceans, climate and atmosphere, are strongly impacted by life. Scientists investigate these impacts, such as ocean acidification, variable atmospheric CO2 concentrations, coastal anoxia, and permafrost melting, through their biogeochemical dynamics. The first part of the course covers the relevant microbial and chemical reactions that occur in the atmosphere, on land, in freshwaters and in the oceans. The second part links this mechanistic understanding to a large-scale, synthetic view of global biogeochemical cycles. These are considered in the context of global change.
Prerequisite: CHM 112 or CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 318. Ecological Genetics. 3 Credit Hours.
This course will provide a thorough understanding of genetics (allele frequencies, heritability, recombination, QTL, the effect of migration and demography). Pre-requisites: BIL150/151 AND BIL160/161
Prerequisite: BIL 150 and BIL 160 and BIL 151 or BIL 152 or BIL 153 and BIL 161 or BIL 162.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 319. Research Fundamentals. 1 Credit Hour.
Research Fundamentals will provide an introduction to academic research methods including basic laboratory techniques, data analysis, and scientific communication. Students will read the primary literature and both analyze data and communicate results using multiple formats. The course emphasizes active learning (discussions, working with peers, writing, etc.) and is directed toward early stage undergraduate students interested in pursuing research.
Pre/Corequisite: MSC 111.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

MSC 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.
An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.
Prerequisite: CSC 120.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 323. Invertebrate Zoology. 4 Credit Hours.
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 324. Biology of Fishes. 3 Credit Hours.
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 325. Biological Oceanographic Techniques. 3 Credit Hours.
Field sampling for plankton biomass and productivity; benthic biomass, and of selected physical parameters. Applications of molecular techniques and remote sensing to oceanographic problems.
Prerequisite: MSC 230.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MSC 326. Marine Genomics. 4 Credit Hours.
This course integrates lectures, discussions and research on genomics to understand the demography and evolutionary processes affecting populations. This research intensive course uses genomic data to better understand the health of species and ecological communities. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 150 and BIL 160 And MSC 230 Or BIL 230 And Corequisite: MSC 463 and MSC 466 and MSC 467.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 328. Introduction to Aquaculture. 3 Credit Hours.
This course will provide an introduction to the field of aquaculture, which represents one of the fastest growing industries in food production in the worlds and is a field that offers exciting job opportunities in science, business, marketing, resource management, and socioeconomics. This course will provide students with a sound background in aquaculture prior to engaging in higher-level courses in this field.
Prerequisites: MSC 111 and MSC 230 or Co-requisite: MSC 230.
Components: LEC.
Grading: GRD.

MSC 329. Marine Vertebrate Zoology. 3 Credit Hours.
The course will be a comprehensive examination of the form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Specifically, the course will cover the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. We will examine critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.

MSC 333. Ocean Human Health. 3 Credit Hours.
The focus of this course is on the present, future, and potential effects of oceanic processes and marine organisms on human health and wellbeing and on human impacts on the marine environment.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 340. Ocean Policy. 3 Credit Hours.
Analysis of ocean policy issues in US fisheries, marine conservation and marine protected areas, marine pollution, coastal management and regulation of offshore oil and gas activities.
Prerequisite: MSC 111 and MSC 313 or MSC 314 and Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 341. Sunken Ships and Submerged Sites: An Introduction to Underwater Archaeology. 3 Credit Hours.
The course serves to provide an overview of underwater archaeology, covering general concepts, methods, field techniques, time periods and their associated unique sites and discoveries, as well as an introduction to professional application in preservation, management, and how popular media plays a role in public education and outreach. Note: There is no SCUBA diving component to this class.
Prerequisite: MSC 111 AND Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 342. Decision Making and the Environment. 3 Credit Hours.
A basic, critical appreciation of interdisciplinary decision theory as applied to natural resources management. Specific goals include comprehension of: decision making under uncertainty, evolutionary social science, managing common pool resources, and behavioral economics.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MSC 345. Economics of Natural Resources and the Environment. 3 Credit Hours.
A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as "maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time". We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.
Prerequisite: ECO 211.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 346. Climate Science and Policy. 3 Credit Hours.
The scientific evidence for, and the projected consequences of, climate change. The political and geo-engineering responses to the problem.
Prerequisite: MSC 111. Or ATM 103. Or ECS 111. And Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 347. Polar Science and Policy. 3 Credit Hours.
The course will address the physical, chemical, and biological properties of the polar oceans, atmosphere, and coastal regions. The interactions between ocean, ice, atmosphere, and land will be discussed in detail, not only in terms of local relationships, with cross-disciplinary linkages, but also with emphasis on the influence the Polar Regions exert on the global climate, biogeochemical cycles, ecosystems and local human populations.
Prerequisite: MSC 111 and MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 350. Survey of Marine Mammals. 3 Credit Hours.
The biology, physiology, natural history, behavior, and conservation of marine mammals.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 351. Climate, Oceanography, and Biogeography of the Galapagos. 3 Credit Hours.
This course and its companion describe the climate, oceanography of the Galapagos Islands, and explore the ways the physical environment has influenced biodiversity on the islands. This field intensive course sequence is part of the Galapagos semester abroad program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 352. Biophysical Dynamics in the Ocean: Biogeography and Evolution of the Galapagos. 3 Credit Hours.
Course expands aspects of bio-physical description of the Galapagos in comparison with other systems. Emphasis on identification of flow regimes in various settings based on winds and buoyancy forcing and characterization of the resulting biological niches. Analysis focuses on scales and components of the resulting biogeography. Biological aspects covered include bioenergetics and reproduction in relation to their role in evolution. This field intensive course sequence is part of the Galapagos semester abroad program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 355. Limnology. 3 Credit Hours.
This course is an introduction to the physical, chemical, and biological properties of freshwater ecosystems. It is intended as an upper level course for juniors and seniors. It emphasizes the ecological process of lakes, rivers, and to less extent, streams. The role of watershed processes is considered in the context of management of rivers and estuaries. Case studies integrate the scientific understanding of freshwater ecosystem function with management decisions. Applied aspects of freshwater systems are included.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MSC 364. Life in Moving Fluids. 3 Credit Hours.
The physical characteristics of air and water are described in relation to various flow phenomena that play a part in life functions. Adaptations of form and function reflect the very different properties of the media (air and water) of terrestrial and aquatic life. Energy conversion and transfer limit form and function and enable a wide variety of survival strategies.
Prerequisite: MSC 230 Or BIL 360.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 365. Tropical Coastal Ecosystems: Lab and Field Methods. 1 Credit Hour.
This course will provide students with the theory and application of field sampling methods used to document status and trends in the health of coral reef, seagrass, and mangrove ecosystems. Students will learn about sampling theory, sampling methods, sampling equipment, and species identifications using a combination of classroom and field activities. This 1-credit course is designed as a companion to MSC 366 where theory detailed in this class is put to practice to design and execute a targeted, small-scale sampling program for the coastal ecosystems found in South Florida. Lectures will be complemented with field activities to be carried out at sites around Key Biscayne and at the UM Broad Key station.
Pre/Corequisite: MSC 366.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 366. Tropical Coastal Ecosystems. 3 Credit Hours.
This course will provide a comprehensive background on the ecology, conservation, and restoration of the three main tropical coastal ecosystems: Mangroves, Seagrasses, and Coral Reefs. The first part of the course will consist of a review of ecological theory, followed by lectures on the dynamics of the three ecosystems, including diversity, community structure, stress ecology, management tools, and novel restoration paradigms. Classes will be complemented by student presentations, in-class activities, and media-outreach projects. Readings for this class will include a required textbook and papers from the primary literature. Grades will be based on exams, quizzes, in-class projects, and student presentations.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 370. Current Research in Marine Biology: Seminars and Discussion. 2 Credit Hours.
These discussions and seminars comprising a 2 cr course provide well-prepared undergraduate students interested in marine research with an introduction to graduate student-presented science in the specialization of marine biology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 371. Readings in Marine Science. 1-3 Credit Hours.
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards any of the RSMAS major or minor requirements with no more than 3 credits from each course.)
Permission of Instructor.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 372. Special Topics in Marine Science. 1-6 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MSC 373. Writing the GRFP and Graduate School Applications. 1 Credit Hour.
Writing the GRFP (graduate research fellow proposal) and Graduate School Applications is a practical course for undergraduate students interested in applying to graduate school next year or in the future. We will review NSF guidelines for the GRFP and both discuss and implement the steps for this proposal and graduate school applications. Basic tips on writing will be covered. Students will write a two page research statement and three page personal statement for the GRFP and then will modify these statements to use in graduate school applications. Students will be involved in reading and providing constructive criticisms to their fellow classmates. (No more than 3 credits in total from MSC370-level courses can be counted towards the MSC major or minor requirements).
Requisite: Junior or Senior Standing.
Components: DIS.
Grading: SUS.
Typically Offered: Fall.
MSC 380. Field Studies in Marine and Aquatic Science. 1-4 Credit Hours.
Field course to selected marine, estuarine and/or aquatic sites in the United States and abroad. Travel fee may be required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 381. Marine Field Ornithology. 1-4 Credit Hours.
Waterbirds such as seabirds, shorebirds, and wading birds are key components of the marine ecosystem, including pelagic, coastal, and estuarine communities. As ecological indicators waterbird abundance provides a proxy for the health of these environments. Waterbirds have also served as important model systems for studies of behavior, evolutionary biology, and ecological theory. This course will provide an introduction to waterbird biology and conservation, including a variety of different field trips to waterbird communities.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 390. Advanced Studies in Marine Science. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
Components: LEC.
Grading: GRD.

MSC 391. Advanced Studies in Marine Policy. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSC 401. Ocean Dynamics. 3 Credit Hours.
This course provides an introduction to the mathematical description of fluid flows in the ocean. Topics covered include a review of vector calculus, conservation equations, the Euler and Navier-Stokes equations, flow kinematics, Eulerian and Lagrangian descriptions of fluid flows, vorticity dynamics, rotation effects including the Coriolis force and geostrophy, wind forcing, an introduction to turbulence, surface gravity waves, stratification and internal waves.
Prerequisite: MTH 162 and PHY 202 or PHY 221 or equivalent and Pre/Corequisite: MSC 301 and MTH 211 or MTH 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 402. Ocean Acidification. 3 Credit Hours.
Ocean Acidification is the ongoing decrease in the pH of the Earth's oceans, caused by the uptake of carbon dioxide (CO2) from the atmosphere. In this course students will learn about its impacts on important biogeochemical and biological processes.
Prerequisites: MSC 215 and MSC 216 and Pre or Corequisite: MSC 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 403. Marine Environmental Toxicology. 3 Credit Hours.
This course will provide an introduction to the principles of environmental toxicology with an emphasis on marine ecosystems, considering a variety of different classes of toxicants, how they can impact marine organisms, the scientific methods used to assess impacts, and the regulatory frameworks used to monitor and manage their release to the environment.
Prerequisite: BIL 255 and (CHM 112 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 404. Marine Organismal and Environmental Health. 1 Credit Hour.
This 1-credit course will complement salt water semester courses. (Must have taken MSC403 or MSC333 and either MSC466 or MSC326 and MSC463). Students will be required to collect and analyze samples, interpret their findings and present them in a formal laboratory report due two weeks after the trip. Students will also be required to give a presentation they have prepared before the trip and attend two seminars on Marine Organismal and Environmental Health topics.
Pre/Corequisite: MSC 327 or MSC 333 or MSC 403 or MSC 466 or MSC 326 and MSC 463.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.
MSC 405. Observational Oceanography. 3 Credit Hours.
This course provides an introduction to measurement systems and data analysis techniques that are commonly used by oceanographers. Sensors and data types to be discussed include shipboard observations (CTD [conductivity-temperature-depth], ADCP [acoustic Doppler current profiler] and others), moored instrumentation, gliders, submerged floats, surface drifters, and satellite measurements. The use of most types of instrumentation that are discussed will be demonstrated in a laboratory setting and/or at sea. (Several one-day instructional cruises on the R/V Walton Smith are anticipated during the semesters that this course is offered. Students enrolled in this course are expected to participate on one of those cruises.) Basic oceanographic data analysis is also discussed, including use of computational tools to access archived oceanographic data sets. Prerequisite: MSC 204 and MSC 215 or Pre/Corequisite: MSC 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 406. Tropical Marine Ecology: Sampling, Monitoring, and Restoration Methods. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on the ecology, conservation, and restoration of the three main tropical coastal ecosystems found in South Florida: Mangroves, Seagrasses, and Coral Reefs. This research intensive course focuses on the application of field sampling methods and integrate ecological theory to define the health and success of coastal ecosystems. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus. Prerequisite: MSC 230 Or BIL 230 And MSC 232 And Corequisite: MSC 407 and MSC 408 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 407. Molecular Ecology and Physiology of Reef Coral Symbioses. 4 Credit Hours.
Reef corals require an intracellular symbiont to succeed. This course integrates lectures and molecular genetic research to quantify this symbiotic relationship. Students will be involved in research to define and quantify coral-symbionts interactions and how these interactions influence coral physiology and success. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus. Prerequisite: MSC 230 Or BIL 230 And Corequisite: MSC 406 and MSC 408 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 408. Climate Change: Limits of Marine invertebrate Adaptability. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on the effect of global climate change on the success of marine invertebrates. Students will be involved in research to understand how the predicted changes in the ocean environment (temperature, oxygen, and pH) affects the ability for marine organisms to acclimatize and adapt to these environments. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus. Prerequisite: MSC 230 Or BIL 230 And MSC 232 And BIL 255 And Corequisite: MSC 406 and MSC 407 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 409. Coral Immunology and Microbiology. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on coral immunology and microbiology for students to learn how the coral immune response and the coral associated microbes affect coral success. This research-intensive course integrates coral microbiome analysis with immunology assays to generate data on coral wellbeing. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus. Prerequisite: MSC 230 Or BIL 230 And MSC 232 And Corequisite: MSC 406 and MSC 407 and MSC 408.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 410. Marine Conservation Science. 3 Credit Hours.
Nature of marine biodiversity, what threatens it, and what can be done to recover the biological integrity of estuaries, coastal seas, and oceans. Topics include: distinctive aspects of marine populations and ecosystems; threats to marine biological diversity, singly and in combination; place-based management of marine ecosystems; and the human dimensions of marine conservation. Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MSC 411. Research in Marine Science. 1-3 Credit Hours.
Individual, independent research projects with faculty supervision. A formal written report is required. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards the MSC major or minor requirements.)
Requisite: Junior or Senior Standing.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSC 412. Undergraduate Thesis in Marine Science. 1 Credit Hour.
Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.
MSC 411 AND Senior Standing.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSC 415. Coral Reef Science and Management. 3 Credit Hours.
The interdisciplinary nature of coral reef science and management: biological, environmental, ecological and socioeconomic aspects of coral reef science, coral reef management problems and approaches at local to global scales, and the implications of climate change for coral reef science and management.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 417. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.
The distribution of dissolved particulate materials in the sea is not uniform in time or space. Variability in these reflects the diverse biological sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling, with particular emphasis on the marine carbon and the nutrients. We visualize and query the ocean system using publicly available global ocean data sets and the application Ocean Data View. The material is presented as a capstone bringing together the physical, chemical and biological dynamics of the ocean as a single system.
Prerequisite: MSC 215.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 418. Climate Law. 3 Credit Hours.
Climate Law evaluates the interactions between climate and the law, with an emphasis on existing laws and the gaps in current legislation related to the climate environment. The course will analyze court cases, domestic and foreign laws, treaties, and international conventions. In addition, the course will examine how climate manipulation requires an international model for the future.
Prerequisite: ATM 220 or MSC 220 and Requisite: Junior or Senior Standing.
Components: LEC.
Grading: GRD.

MSC 419. Microbial Geochemistry of the Ocean. 3 Credit Hours.
An overview of how microbes respond to and modify the chemistry of the ocean, focusing on the geochemical consequences and signatures of microbial activity in the ocean. Microbes form the base of the food chain and are responsible for essential chemical transformations that control important processes on Earth, including the production of atmospheric oxygen, and the consumption of carbon dioxide and transformation to organic carbon which fuels the rest of life in the ocean. This course will build a quantitative framework for understanding the chemical inputs and outputs of microbial metabolism, and the role these microbial processes play in controlling chemical fluxes in the ocean. This will address how biological origins, metabolic reworking, and physical phase influence the distribution and fluxes of organic matter in the marine carbon cycle on both short and long timescales.
Prerequisite: MSC 111 and MSC 215 and BIL 150 or BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 420. Political Ecology of the Galapagos. 3 Credit Hours.
This field course in the Galapagos National Park offers a rare chance to examine the human interactions in this highly politicized landscape of conservation. Students practice the political ecology approach for doing ethnographic field work and explore how it can lead to wiser resource management. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MSC 421. Terrestrial Biology and Adaptations of the Galapagos. 3 Credit Hours.
This course will examine the terrestrial plant and animal life of Isabela Island, discuss the biology and how it adapted to life on Isabela. Through field and laboratory exercises we will explore the power of organisms’ DNA in shaping life into unique forms like those famously present in today's Galapagos. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 422. Marine Ecology of the Galapagos. 3 Credit Hours.
This course focuses on marine ecosystems of the Galapagos, emphasizing near-shore environments. Topics will include how the unique location and oceanography of the Galapagos have shaped the species composition of resident and migrant marine animals. The role of genetic drift, local habitat characteristics and natural selection on marine ecosystems will be examined. This is a field intensive course with time spent in intertidal, near-shore and off-shore island environments. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 423. Marine Conservation Biology and Fisheries of the Galapagos. 3 Credit Hours.
The Galápagos are located in a uniquely productive area of the sea, which has allowed the development of rich and unique marine biota. The first week of the course will carry the students through the dynamic, climatic, and oceanographic circumstances that determine the unique character of the Galapagos. The second week will cover scientific evaluation of the threats to the marine biodiversity of the Galapagos, focusing on sharks, penguins, sea turtles and other at-risk species and habitats. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 424. Origin and Geology of the Galapagos Islands. 3 Credit Hours.
This course will explore the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a common origin in plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and then to explore the ways the physical environment has influenced adaptation and biodiversity. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 425. Galapagos Community-Based Research and Service. 2 Credit Hours.
Individual, civic engagement activities identified in consultation with the people, national park and local government of Puerto Villamil, Isla Isabela, as part of the marine science semester program in the Galapagos Islands. Student research and service is faculty supervised and concluded by submission of a formal written report. This course may not be counted towards the MSC elective requirement for majors or minors.
Components: PRA.
Grading: CNC.
Typically Offered: Fall & Spring.

MSC 426. Research in Microbial Genomics. 4 Credit Hours.
This course integrates lecture and laboratory studies to focus on the structure, function, evolution, mapping and editing of microbial genomes belonging to the three domains of life; Archaea, Bacteria and Eukarya. Prerequisites: BIL 150 and BIL 151 and BIL160 and BIL161 and BIL 250.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 427. Field experience in the Galapagos. 2 Credit Hours.
Three week Summer I field course explores the flora, fauna, geology, and society of the Galapagos Islands. Prerequisite: MSC 111 or ECS 111 or Permission of Instructor.
Components: PRA.
Grading: GRD.
Typically Offered: Summer.
MSC 432. Comparative Ecology of Terrestrial and Marine Systems. 3 Credit Hours.
A comparison of various biotic and abiotic controls on terrestrial and marine ecosystems is undertaken. The course stresses proximate mechanisms and underlying evolutionary processes. Analysis methods and models of various ecosystems are compared and critiqued. Issues involved in sustainability and conservation of resources are discussed in relation to agriculture, fisheries and forestry. The importance of biodiversity and climate change in the future of ecosystems is stressed.
Prerequisite: MTH 162. And BIL 330. Or ECS 232.
Components: LEC.
Grading: GRD.

MSC 460. Spatial Applications in Marine Science. 3 Credit Hours.
The concepts and marine applications of Geographic Information Systems. Every class period will entail short class lectures and hands on computer based GIS exercise on marine science related issues. Students will learn how to use ArcGIS Desktop or Arc Pro.
Prerequisite: MSC 111 and MSC 112 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 462. Marine Biomedicine. 3 Credit Hours.
The course will cover diverse bioactive molecules that are derived from marine sources ranging from sponges to sharks. The isolation and characterization of these compounds as well as their potential application in clinical medicine and human health will be reviewed. The class will also cover marine-derived factors used in biotechnology and marine animal models used in biomedical research with an emphasis on marine immunology.
Prerequisite: BIL 255 and (CHM 112 or CHM 121).
Components: LEC.
Grading: GRD.

MSC 463. Conservation Genomics. 4 Credit Hours.
This course integrates lectures, discussions and research on genetics and genomics to understand population biology, conservation, and susceptibility of endangered species to extinction and the effect of invasive species on natural communities. This research intensive course sequences genomes and uses the data to better understand the health of species and ecological communities. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 150 and BIL 160 And MSC 230 Or BIL 230 And Corequisite: MSC 326 and MSC 466 and MSC 467.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 464. Marine Comparative Immunology Lab. 1 Credit Hour.
The laboratory course will cover immunology techniques used in the assessment of immune function and immune reactivity in diverse marine taxa from sponges to fish to mammals.
Prerequisite or Co-requisite: MSC 465.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 465. Marine Comparative Immunology. 3 Credit Hours.
The course will cover immune function in diverse marine taxa from sponges to fish and the evolution of innate and adaptive immune mechanisms from a comparative point of view, with an emphasis on shark and fish immunology. Adaptations related to living in a microbe-rich marine environment will be highlighted. Potential applications of research findings will be addressed with respect to conservation and aquaculture. The role of invertebrate and vertebrate models in the study of the evolution of the immune system and applications for human health and medicine will be discussed.
Prerequisite: BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 466. Experimental Physiology. 4 Credit Hours.
This course integrates lectures, discussions and research. Topics will include homeostasis, interactions with the external environment, and life with limited oxygen and water. Lectures will be highly discussion-based; students will be expected to read primary research articles as suggested by the professor before lecture to foster participation in those discussions and form hypotheses about accompanying laboratory. Each lab will be written up as a formal laboratory report (i.e., Introduction, Materials and Methods, Results and Discussion). This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 255 And Corequisite: MSC 326 and MSC 463 and MSC 467.
Components: HRK.
Grading: GRD.
Typically Offered: Fall.
MSC 467. Marine Animal Neurophysiology and Behavior. 4 Credit Hours.
This course integrates lectures, discussions and research on neural and endocrine systems in marine animal models, and how these systems work
together to control elements of physiology, sensation and perception of the environment and behavior. This course is part of Saltwater Semester so
that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit
Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 230 Or MSC 230 And BIL 255 And Corequisite: MSC 326 and MSC 463 and MSC 466.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

B.A. in Marine Affairs

Marine Affairs
Marine Affairs prepares students to contribute to the policy development and management of marine resources through integration of scientific,
economic and social perspectives. Research at UM focuses on aquaculture, fisheries management, political ecology, natural resource economics,
coastal zone management, marine spatial planning and marine protected areas, coastal and ocean law, and marine cultural resources.

This program is designed for students who wish to prepare themselves for graduate studies and careers in marine policy, political ecology, marine
resource economics, management and conservation of marine resources, environmental impact analysis, marine cultural resources, marine
anthropology, spatial planning, ocean and coastal law and policy.

Courses in approved minor: 15

**Electives**

**Arts and Humanities Cognate Courses** 9

**Additional Electives** 32

Total Credit Hours: 120-123

---

1. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2. General Biology BIL 150 and Evolution and Biodiversity BIL 160 must be passed with a grade of "C-" or higher.
3. Chemical Problem Solving and Principles of Chemistry must be passed with a grade of "C-" or higher.
4. Students placed into CHM 121 should replace the requirement of CHM 110 with 3 credits of electives.

* 500-level courses offered through the graduate Marine Ecosystems and Society program at the Rosenstiel School may be taken by Junior or Senior students with permission.

**Total Credit Hours:** 121

1. Students who meet the requirements for CHM 121 should take it their first semester instead of CHM 110.
2. Students who are placed directly into CHM 121 their first term should take 3 credits of electives instead.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BA degree in Marine Affairs at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine affairs into their future careers.

**Goals**

This program strives to provide the rigor, flexibility, depth and integration to enable students to:

- Pursue a course of study that provides both depth and breadth in marine affairs and related science and policy courses.
- Prepare themselves for public and private sector employment, graduate school, and successful careers.

**Student Learning Outcomes**

- Students will demonstrate an ability to communicate effectively.
- Students will demonstrate an overall knowledge and understanding of the core concepts in Marine Affairs.
- Students will be able to successfully integrate important concepts in marine affairs to address a real-world issue in marine policy and marine resource management.
Minor in Marine Policy

Overview

The Marine Policy minor introduces the student to the field of marine policy, which includes coastal and ocean law and policy, conservation, and natural resource economics.

Total Credit Hours: 16

* Students majoring in the RSMAS Undergraduate Program should replace MSC 111 and MSC 112 with one additional elective, and all electives must be above and beyond those used for the major.

** Courses within this minor require at least one requisite. Students should review all courses and requirements before planning your studies and declaring the minor. Plan your courses accordingly as requisites must be met for enrollment and completion of minor.

*** Only those courses passed with a grade of “C-” or higher may be applied to the minor. The Marine Policy minor fulfills the requirements of the People and Society or STEM cognate.

Marine Biology and Ecology

Dept. Code: MBE

Marine Biology and Ecology

The Bachelor of Science in Marine Biology and Ecology teaches fundamental concepts and precepts in ecology, physiology and organismal-environmental interactions. The educational goals are to understand the range of significant biological concepts from the molecular biology of DNA to how species interactions are affected by environmental change. These educational goals are enhanced by active research experiences that catalyze a student’s understanding of the scientific process. This program is designed for students with a strong interest in academic research, graduate school,
and professional careers that require critical thinking skills. For these high performing students, this program will develop competencies with which to successfully advance their careers.

While it is not required, there is enough flexibility in the Bachelor of Science in Marine Biology and Ecology program to allow students to do a minor or even a second major in the College of Arts and Sciences or other Schools. Students wishing to do a second major should review these disciplines for additional requirements.

**MBE 504. Biology of Marine Mammals. 3 Credit Hours.**
The purpose of this class is to introduce students to the biology, evolution, taxonomy, physiology, natural history, behavior, conservation, and management of marine mammals.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MBE 505. Marine Mammal Disease and Medicine. 3 Credit Hours.**
This course will cover the basics (theory and application) of marine mammal disease and medicine. Applications will focus on the medical management of managed care and wild populations.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MBE 506. Procedures in Marine Mammal Health and Disease. 1 Credit Hour.**
The aim of this course is to provide the student with more in-depth exposure and study of various practical health related techniques/skills that are integral to marine mammal health and disease assessment. While the procedures are most applicable to marine mammals in managed care, several of the procedures can be adapted and/or are used in study of wild marine mammals. Health and disease assessment procedures will be divided into the following five categories/areas: physical examination and behavioral assessment; multimodal and advanced diagnostics (eg., electrocardiogram, ultrasound, etc.); sample collection (types, procedures); clinical pathologic (eg., hematology, biochemistry, serology) interpretation; gross and histopathologic necropsy techniques and interpretation.

Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MBE 507. Marine Mammal Applied Behavior Analysis and Managed Care. 3 Credit Hours.**
This course involves a thorough examination of specific aspects of marine mammal managed care and conservation programs, with an emphasis on behavior management, analysis, and modification as a basis for adaptive response to changing environments both in-situ and ex-situ. Coursework will also focus on health management and assessment, emergency handling and transportation, government regulations, and wildlife conservation.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MBE 514. Tropical Marine Biology. 3 Credit Hours.**
In this intensive one-week field course, students are introduced to the ecology, biology, and interconnections of all of South Florida's major marine habitats through a combination of lectures and field excursions from UM's remote private island research station in the Florida Keys.

Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

**MBE 515. Tropical Marine Ecology. 3 Credit Hours.**
Marine ecology with emphasis on tropical ecosystems and local habitats. Physical environmental and biotic adaptations, population, and community ecology are discussed. Field exercises in mangrove, sea grass, and coral reef ecosystems are also included.

Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MBE 518. Reef Coral Biology, Ecology, and Conservation. 3 Credit Hours.
Scleractinian (stony) corals are the principal builders of contemporary coral reefs and their unique biology underpins the ecological success of reef ecosystems in the world's shallow tropical seas. This class covers the physiology and ecology of these critical organisms, the environmental factors governing their health, and their biotic interactions with other species. Examples of topics covered include algal symbiosis, calcification, reproduction, taxonomy, microbial ecology, competition with macroalgae, and herbivory, with insights at all levels from molecules to ecosystems. A special focus is on the decline of coral reefs due to anthropogenic stressors including climate change and coral bleaching, diseases, nutrient pollution, overfishing, and ocean acidification.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 521. Field Techniques and Instrumentation in Tropical Marine Ecology. 3 Credit Hours.
This course covers the instrumentation and field techniques commonly used to characterize the structure and function of the three dominant ecosystems in the tropics and subtropics, i.e. coral reefs, seagrass beds and mangroves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 522. Marine Microbial Dynamics. 3 Credit Hours.
An overview of the function of microbes in the ocean from a chemical perspective, building a quantitative understanding of cellular needs and metabolic functions, and the role these microbial processes play in controlling chemical fluxes and biogeochemical cycles in the ocean.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 529. Population Genetics and Genomics. 3 Credit Hours.
This course provides an introduction to population genetics, which examine the evolutionary processes that affect genomes of natural populations: mutation, genetic drift, natural selection, and gene flow.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 532. Marine Mammal Research Techniques. 3 Credit Hours.
The goal of this course is to provide an overview of the field of marine mammal research (historic, current, and future), hands-on training in applied research skills relevant to the field of marine mammalogy, as well as an understanding of the biological and ecological significance of captive and wild research and contributions to management and conservation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 535. Practical Computing for Biologists. 3 Credit Hours.
Practical Computing for Biologists is a problem-centric course that provides resources for biologists to analyze the increasingly complex data sets generated by new technologies. Flexible, scalable tools will be covered to accomplish a diversity of tasks using open source software. Topics will include: regular expressions, command line operations, Python programming, and bioinformatics pipelines. Exercises relevant to the students’ needs will be used to illustrate and develop new skills. After doing several assigned homework problems, students will have an opportunity to develop a bioinformatic analysis on their own data set.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 539. Oceanic Productivity. 3 Credit Hours.
History, methods, and current topics relevant to studies of marine primary production. Magnitude and fate of primary production in the sea is essential to understand secondary production, the success of fisheries recruitment, and global climate.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MBE 542. Oceans and Human Health. 3 Credit Hours.
The objective of this interdisciplinary course is to provide students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and aquatic organisms on human health, and vice versa. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine and social sciences. The course covers harmful algal blooms, marine microbes, and global climate change as well as an overview of coastal impacts and remedies (e.g., drugs from the sea and marine models) through a series of coordinated lectures and case studies on human health, physical environment, and oceanographic processes. Prerequisite: Permission of instructor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 550. Analytical Techniques in Marine Biology. 2 Credit Hours.
Theory and applications of selected analytical techniques necessary to conduct quantitative research in marine biology (e.g., electrophoresis, metabolite assays, enzyme assays, radioisotope methodology). One hour lecture followed by three hour laboratory per week.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 570. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 571. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 572. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 574. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 576. Diseases of Marine Organisms. 3 Credit Hours.
Infectious, genetic, and environmentally induced diseases of marine fishes and invertebrates as well as diagnostic methods, cellular, and molecular pathology. Lecture, 3 hours.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 578. Evolutionary Genetics. 3 Credit Hours.
A Graduate course that presents an overview from "New Evolutionary Synthesis" (1900) to Evolutionary Genomics. The critical points to emphasize is the importance of standing genetic variation, the role of neutral evolutionary process versus evolution by natural selection and how a evolution perspective provides meaning insights into the biology.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 586. Fish Physiology. 3 Credit Hours.
Ecology, dispersal, and modes of life of fishes. Adaptations by larvae and adults to various habitats are covered as well as the effects of man on fish faunas and the importance of fishes to various ecological systems. Lecture, 3 hours.

Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
B.S.M.A.S. in Marine Biology and Ecology

Marine Biology and Ecology

The Marine Biology & Ecology degree is a Bachelor of Science degree (BSMAS) and is designed to give students a strong background in biology and quantitative skills, as well as research experience in biomedicine, genomics, evolution, physiology, microbiology, immunology, and ecology. The strength of the Marine Biology & Ecology program is the opportunity for undergraduates to fully participate in the research with Marine Biology and Ecology diverse faculty. These research opportunities provide skills to excel in medicine, graduate school, and other diverse fields.

Select one of the following options: 4 8-12

Option #1

- MTH 161 Calculus I
| or MTH 171 | Calculus I |
| MTH 162 | Calculus II |
| or MTH 172 | Calculus II |

**Option #2**

| MTH 140 | Calculus Concepts with Foundations A |
| MTH 141 | Calculus Concepts with Foundations B |
| MTH 162 | Calculus II |

Select one of the following:

- MSC 204  Environmental Statistics
- MTH 224  Introduction to Probability and Statistics

Select one of the following options: 5

**Option 1:**

- PHY 201  University Physics I for the Sciences
- PHY 106  College Physics Laboratory I
- PHY 202  University Physics II for the Sciences
- PHY 108  College Physics Laboratory II

**Option 2:**

- PHY 221  University Physics I
- PHY 222  University Physics II
- PHY 223  University Physics III
- PHY 224  University Physics II Lab
  or PHY 225  University Physics III Lab

**Option 3:**

- PHY 101  College Physics I
- PHY 106  College Physics Laboratory I
- PHY 102  College Physics II
- PHY 108  College Physics Laboratory II

**Electives**

- Arts and Humanities Cognate Courses 9
- People and Society Cognate Courses 9
- 300+ Level Elective 3
- Additional Electives 6

**Total Credit Hours** 121-127

1. Must be at the 300-level or higher. MSC 204 (http://bulletin.miami.edu/search/?P=MSC%20204) does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

2. Biological Science electives include but are not limited to BIL, BMB, MBE, MIC, MSC, and NEU. For the Biology dual major, at least one BIL elective must be a CAPSTONE course.

3. Principles of Chemistry must be passed with a grade of "C-" or higher.

4. Calculus I must be passed with a grade of "C-" or higher.

5. Option 1 is recommended for Physics.

* 9 elective courses must include:
  - 3 Arts and Humanities Cognate courses
  - 3 People and Society Cognate courses
  - 1 Course (3 credits) at the 300+ level

1 Recommended electives to take for the Marine Biology and Ecology major.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

**Goals**

The MBE departmental major curriculum will provide the rigor, flexibility, depth and integration to enable students to:

- Design their course of study that provides both depth and breadth in marine biology and ecology and science related courses.
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process.
- Learn from the diverse and outstanding group of professors, researchers, and classmates.
- Prepare themselves for the public and private sector employment, graduate school, and successful careers.

**Student Learning Outcomes**

Students completing the MBE departmental major will be able to:

- Master a broad set of fundamental biological knowledge including how to search for, understand, and synthesize primary scientific literature, and understand how fundamental biological principles relate to the marine environment.
- Solve problems competently by identifying the relevant features of the problem and developing a strategy to solve the problem.
- Use computers and computational approaches to acquire and process data as well as use software to analyze data.
- Understand and synthesize the objectives of research experiments, properly conduct experiments, and appropriately record, analyze, and communicate the results.
- Effectively communicate the concepts, results, and implications of their laboratory experiments and independent research both orally and in the written form to experts in the field, scientists in other disciplines, and the general public.

**Marine Science**

**Dept. Code: MSC**

**Marine Science**

Marine Science is an interdisciplinary program dealing with the study of the world's oceans, their biological, chemical and physical constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources in changing Earth's climate.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences, RSMAS, or the College of Engineering. Common second majors are Biology, Chemistry, Computer Science, Geological Sciences, Meteorology, Microbiology & Immunology, and Physics. Required courses for these combinations are listed within the major tab.

Second majors in Applied Physics, Biochemistry, Engineering (all disciplines), and Mathematics may be taken. Students interested in adding a second major in one of these disciplines should review the Applied Physics (p. 558), Biochemistry (p. 189), Engineering (all disciplines) (p. 1044), or
Mathematics (p. 462) pages for additional requirements. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

**MSC 101. Survey of Oceanography. 3 Credit Hours.**
Introduction to the oceans and their significance to mankind, encompassing geological, physical, chemical, and biological processes; man's role in and on the sea, including fisheries, pollution, and ocean management. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall, Spring, & Summer.

**MSC 102. Introduction to Weather and Climate. 3 Credit Hours.**
The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**MSC 103. Survey of Modern Meteorology. 3 Credit Hours.**
Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to all RSMAS majors and minors.
Requisite: Major or Minor in the Rosenstiel School of Marine and Atmospheric Science and Pre/Corequisite: MTH 108 or higher (MTH 108. Or MTH 113. Or MTH 140. Or MTH 141. Or MTH 161. Or MTH 171).
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**MSC 104. Molecules of Life. 3 Credit Hours.**
Molecules of Life explores the modern science of biological molecules, which occurs at the intersection of chemistry, biology, and medicine. We examine the major molecular components of the cell--proteins, nucleic acids, lipids, etc.--and illustrate the role of chemical principles in understanding their structure and function. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**MSC 105. Shark Behavioral Ecology & Conservation Semester. 3 Credit Hours.**
SUMMER SCHOLARS PROGRAM ONLY. In this course, students will learn core concepts in shark behavioral ecology and key aspects of shark biology needed for the holistic understanding and study of shark behavioral ecology and conservation. NOT FOR MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

**MSC 106. Marine Mammal Biology and Conservation. 3 Credit Hours.**
SUMMER SCHOLARS PROGRAM ONLY. In this course, students will learn core concepts in shark behavioral ecology and key aspects of shark biology needed for the holistic understanding and study of shark behavioral ecology and conservation. NOT FOR MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

**MSC 107. Life in the Sea. 3 Credit Hours.**
Lectures provide an introduction to the plants and animals of the sea, including plankton, nekton and the benthos, with anthropogenic impacts. Not for major or minor.
NOT FOR ANY MSC STUDENT MAJOR OR MINOR.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.
MSC 108. Environmental Oceanography. 3 Credit Hours.
This course will focus on environmental issues facing the oceans today, including global climate destabilization, the impact of population growth on coastal environments, marine pollution, and the state of marine fisheries. An active learning approach will be adopted, with emphasis on case studies and critical analysis. Marine environmental issues will be presented in self-contained analytical exercises. Basic math needed to quantify environmental issues will be introduced. Information and questions on sustainability will be integrated throughout the course and students will be asked to think critically about these pressing concerns. Not for major or minor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 111. Introduction to Marine Science. 3 Credit Hours.
Geological, physical, chemical and biological processes of the world's oceans. The role of the oceans in global dynamics and man's role in and on the sea, including fisheries, pollution and ocean management. Enrollment limited to Marine Science/Marine Affairs majors and minors. Lecture and discussion, 3 hours. Field trips. Requisite: Marine Science Major or Minor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 112. Introduction to Marine Science Lab. 1 Credit Hour.
Laboratory and field exercises to accompany Marine Science. Pre/Corequisite: MSC 111. And Marine Science Major or Minor.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 115. Tropical Marine Biology. 3 Credit Hours.
A field and lecture study of selected marine environments around South Florida, with emphasis on the interaction between organisms and the geological, physical, and chemical environment. Summer Scholars Program Only.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MSC 121. Ocean Currents. 3 Credit Hours.
Ocean Currents will be a comprehensive, multi-disciplinary course on the history, geography, socio-economics, and physics of ocean currents. The importance of ocean currents to socioeconomics, weather, climate, transport of fish larvae and pollutants, distribution of plankton and fish, military operations, and shipping will be illustrated using many examples. The history of ocean current observations, detailed maps of ocean circulation and its variability, and the evolution of instruments, and theories from ancient to modern times will be detailed. The discovery and the most important observations of the major ocean currents will be discussed. There will be also lectures on modern ocean circulation theory. NON-MSC MAJORS ONLY

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 172. Special Topics in Marine Science. 2-6 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 180. Seminar in Marine Science. 1 Credit Hour.
Seminar in current research as conducted by Marine Science faculty and graduate students. This course is intended as an introduction for first year students to contemporary research topics. Pre/Corequisite: MSC 111.

Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MSC 190. Studies in Marine Science. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM

Components: LEC.
Grading: GRD.
MSC 191. Studies in Marine Policy. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
**Components:** LEC.
**Grading:** GRD.

MSC 203. Foundations of Computational Marine Science. 4 Credit Hours.
The course provides a basic introduction to Computational Marine Science. The course will use Python as a programming language and will illustrate its use in problem solving and exploratory data analysis in the Marine Sciences. Programming topics covered include the language syntax and construct, variables, flow control, functions, software design and object-oriented programming.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

MSC 204. Environmental Statistics. 3 Credit Hours.
This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data. (Not open to students with credit in BIL311 or equivalent).
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSC 205. Mathematical Methods for Marine Science. 3 Credit Hours.
This course is meant to provide students with the mathematical tools required to pursue advanced topics in Marine Science. Not available for credit for students with major or minor in Mathematics.
**Prerequisite:** MTH 162 Or MTH 172 And MSC 111.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

MSC 215. Chemical Oceanography. 3 Credit Hours.
An introduction to the chemistry of the oceans. Descriptive chemical oceanography of the components of ocean waters (metals, gases, organic compounds and nutrients). Biogeochemical cycles in oceanic systems.
**Prerequisite:** MSC 111 and (CHM 112 or CHM 121).
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSC 216. Chemical Oceanography Laboratory. 1 Credit Hour.
Chemical and physical methods in chemical oceanography. Analytical and instrumental techniques used to determine density, salinity, chlorinity, dissolved oxygen, nutrients and components of the carbonate system. Corequisite: MSC 215.
**Pre/Corequisite:** MSC 215 and **Prerequisite:** CHM 113.
**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSC 217. Physical and Chemical Processes in Coastal Ecosystems. 3 Credit Hours.
This course is primarily intended for students enrolled in the Marine Affairs program to serve as an introduction to the role of physical and chemical processes in estuarine and coastal ecosystems in the context of the management of estuarine and coastal waters. Students will provide reviews of case studies in preparation for future management decisions that will require knowledge of coastal physical and chemical processes. **Prerequisites:** MSC 111 AND MSC 230.
**Prerequisite:** MSC 111 and MSC 230 and (CHM 111 or CHM 121).
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

MSC 218. Biological Oceanography. 3 Credit Hours.
This course will examine energy flow in marine ecosystems, the biogeochemical cycles that control them, the wide variety of types of communities and ecosystems in different parts of the ocean, and the changes they have undergone over geological timescales.
**Prerequisite:** MSC 111.
**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.
MSC 220. Climate and Global Change. 3 Credit Hours.
The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 222. The Earth's Climate: Past and Future. 3 Credit Hours.
This course will provide undergraduate students majoring in geological sciences, as well as enthusiastic non-majors, with the foundation to better understand climate change on geological to human timescales. The natural processes that control the earth's climate will be discussed, with special attention to the climate of the Holocene, and the potential influence climate may have played on human civilizations. Finally, the expected climate shifts and feedbacks will be discussed based on the outcome of climate models for the next century.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 230. Introduction to Marine Biology. 3 Credit Hours.
Prerequisite: (BIL 150 or BIL 160) and (CHM 111 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 232. Introduction to Marine Biology Laboratory. 1 Credit Hour.
Ecology, physiology, and behavior of marine organisms in south Florida marine habitats.
Pre/Corequisite: MSC 230. or BIL 230. and Prerequisite: BIL 151 or BIL 161.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 240. Introduction to Marine Geology. 3 Credit Hours.
The principal marine geological environments of the world, their substrate, their sediments, their flora and fauna, and their evolution through time.
Prerequisite: GSC 110 Or GSC 111 Or permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 300. Water Resources: History, Management, and Policy. 3 Credit Hours.
An overview of the issues and problems surrounding the management of aquatic resources in the broadest sense including water quality of natural waters, drinking water, water pollution, water quantity and supply issues, watershed management, wetland protection, and coastal management. We will explore the available strategies to wisely manage the various aquatic resources, policy options and their socio-economic aspects, legal frameworks, and institutional arrangements.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 301. Introduction to Physical Oceanography. 3 Credit Hours.
Application of the laws of physics to the study of the properties and circulation of the world's oceans and atmosphere.
Prerequisite: MSC 111. And MTH 162. Or MTH 172.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 302. Introduction to Physical Oceanography Lab. 1 Credit Hour.
Laboratory exercises and field work on basic fluid mechanics applicable to the ocean. These include buoyant convection and double diffusion, methods for measuring flows, gravity wave experiments in the lab and field, diffusion studies and rotating tank investigations as an analog for planetary flows.
Prerequisite: MSC 301 or ATM 405. Or Co-requisite: MSC 301 or ATM 405.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
MSC 310. Living Resources of the Ocean. 3 Credit Hours.
Marine fish and shellfish of major commercial and recreational value: biology, techniques of harvesting, and resource management.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 313. Coastal Law. 3 Credit Hours.
Basic doctrines and public policy related to the use and regulation of the United States coastal zone and seabed.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 314. Ocean Law. 3 Credit Hours.
The principles of international ocean law regarding ocean management; ocean delimitation and issues of environmental ocean regulation within international legal framework.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 316. Global Primary Production. 3 Credit Hours.
Photosynthesis supports the vast majority of life on planet earth. This course reviews the magnitude and the processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.
Prerequisite: BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 317. Earth's Biogeochemistry. 3 Credit Hours.
Outstanding features of planet Earth, including its vast oceans, climate and atmosphere, are strongly impacted by life. Scientists investigate these impacts, such as ocean acidification, variable atmospheric CO2 concentrations, coastal anoxia, and permafrost melting, through their biogeochemical dynamics. The first part of the course covers the relevant microbial and chemical reactions that occur in the atmosphere, on land, in freshwaters and in the oceans. The second part links this mechanistic understanding to a large-scale, synthetic view of global biogeochemical cycles. These are considered in the context of global change.
Prerequisite: CHM 112 or CHM 121.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 318. Ecological Genetics. 3 Credit Hours.
This course will provide a thorough understanding of genetics (allele frequencies, heritability, recombination, QTL, the effect of migration and demography). Pre-requisites: BIL150/151 AND BIL160/161
Prerequisite: BIL 150 and BIL 160 and BIL 151 or BIL 152 or BIL 153 and BIL 161 or BIL 162.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 319. Research Fundamentals. 1 Credit Hour.
Research Fundamentals will provide an introduction to academic research methods including basic laboratory techniques, data analysis, and scientific communication. Students will read the primary literature and both analyze data and communicate results using multiple formats. The course emphasizes active learning (discussions, working with peers, writing, etc.) and is directed toward early stage undergraduate students interested in pursuing research.
Pre/Corequisite: MSC 111.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

MSC 321. Scientific Programming in the Atmospheric Sciences. 3 Credit Hours.
An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.
Prerequisite: CSC 120.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MSC 323. Invertebrate Zoology. 4 Credit Hours.
Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 324. Biology of Fishes. 3 Credit Hours.
Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 325. Biological Oceanographic Techniques. 3 Credit Hours.
Field sampling for plankton biomass and productivity; benthic biomass, and of selected physical parameters. Applications of molecular techniques and remote sensing to oceanographic problems.
Prerequisite: MSC 230.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 326. Marine Genomics. 4 Credit Hours.
This course integrates lectures, discussions and research on genomics to understand the demography and evolutionary processes affecting populations. This research intensive course uses genomic data to better understand the health of species and ecological communities. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 150 and BIL 160 And MSC 230 Or BIL 230 And Corequisite: MSC 463 and MSC 466 and MSC 467.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 328. Introduction to Aquaculture. 3 Credit Hours.
This course will provide an introduction to the field of aquaculture, which represents one of the fastest growing industries in food production in the world and is a field that offers exciting job opportunities in science, business, marketing, resource management, and socioeconomics. This course will provide students with a sound background in aquaculture prior to engaging in higher-level courses in this field.
Prerequisites: MSC 111 and MSC 230 or Co-requisite: MSC 230.
Components: LEC.
Grading: GRD.

MSC 329. Marine Vertebrate Zoology. 3 Credit Hours.
The course will be a comprehensive examination of the form and function of the vertebrate lineage of marine animals from early chordates to the evolution of cartilaginous and bony fish and the emergence of tetrapods, those that evolved from marine ancestors and have since returned to the seas. A comparative point of view will be used to assess the anatomy and physiology of each taxonomic group as well as behavioral and ecological adaptations related to their life history. Specifically, the course will cover the emergence of the vertebrate body plan and the evolution of fish from agnathans through modern teleosts, as well as the tetrapod lineage of marine reptiles, marine birds, and marine mammals. We will examine critical points in vertebrate evolution where genome-wide duplication events occurred as well as instances of convergent evolution in various lineages.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.

MSC 333. Ocean Human Health. 3 Credit Hours.
The focus of this course is on the present, future, and potential effects of oceanic processes and marine organisms on human health and wellbeing and on human impacts on the marine environment.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 340. Ocean Policy. 3 Credit Hours.
Analysis of ocean policy issues in US fisheries, marine conservation and marine protected areas, marine pollution, coastal management and regulation of offshore oil and gas activities.
Prerequisite: MSC 111 and MSC 313 Or MSC 314 and Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
**MSC 341. Sunken Ships and Submerged Sites: An Introduction to Underwater Archaeology. 3 Credit Hours.**
The course serves to provide an overview of underwater archaeology, covering general concepts, methods, field techniques, time periods and their associated unique sites and discoveries, as well as an introduction to professional application in preservation, management, and how popular media plays a role in public education and outreach. Note: There is no SCUBA diving component to this class.
Requisite: MSC 111 AND Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 342. Decision Making and the Environment. 3 Credit Hours.**
A basic, critical appreciation of interdisciplinary decision theory as applied to natural resources management. Specific goals include comprehension of: decision making under uncertainty, evolutionary social science, managing common pool resources, and behavioral economics.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 345. Economics of Natural Resources and the Environment. 3 Credit Hours.**
A comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout is sustainable development defined as "maximizing the net benefits of economic development while maintaining the services and quality of natural resources over time". We will use economic reasoning to examine causes and consequences of environmental and resource problems, and measures for dealing with them.
Prerequisite: ECO 211.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 346. Climate Science and Policy. 3 Credit Hours.**
The scientific evidence for, and the projected consequences of, climate change. The political and geo-engineering responses to the problem.
Prerequisite: MSC 111. Or ATM 103. Or ECS 111. And Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 347. Polar Science and Policy. 3 Credit Hours.**
The course will address the physical, chemical, and biological properties of the polar oceans, atmosphere, and coastal regions. The interactions between ocean, ice, atmosphere, and land will be discussed in detail, not only in terms of local relationships, with cross-disciplinary linkages, but also with emphasis on the influence the Polar Regions exert on the global climate, biogeochemical cycles, ecosystems and local human populations.
Prerequisite: MSC 111 and MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 350. Survey of Marine Mammals. 3 Credit Hours.**
The biology, physiology, natural history, behavior, and conservation of marine mammals.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSC 351. Climate, Oceanography, and Biogeography of the Galapagos. 3 Credit Hours.**
This course and its companion describe the climate, oceanography of the Galapagos Islands, and explore the ways the physical environment has influenced biodiversity on the islands. This field intensive course sequence is part of the Galapagos semester abroad program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MSC 352. Biophysical Dynamics in the Ocean: Biogeography and Evolution of the Galapagos. 3 Credit Hours.**
Course expands aspects of bio-physical description of the Galapagos in comparison with other systems. Emphasis on identification of flow regimes in various settings based on winds and buoyancy forcing and characterization of the resulting biological niches. Analysis focuses on scales and components of the resulting biogeography. Biological aspects covered include bioenergetics and reproduction in relation to their role in evolution. This field intensive course sequence is part of the Galapagos semester abroad program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MSC 355. Limnology. 3 Credit Hours.
This course is an introduction to the physical, chemical, and biological properties of freshwater ecosystems. It is intended as an upper level course for juniors and seniors. It emphasizes the ecological process of lakes, rivers, and to less extent, streams. The role of watershed processes is considered in the context of management of rivers and estuaries. Case studies integrate the scientific understanding of freshwater ecosystem function with management decisions. Applied aspects of freshwater systems are included.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 364. Life in Moving Fluids. 3 Credit Hours.
The physical characteristics of air and water are described in relation to various flow phenomena that play a part in life functions. Adaptations of form and function reflect the very different properties of the media (air and water) of terrestrial and aquatic life. Energy conversion and transfer limit form and function and enable a wide variety of survival strategies.
Prerequisite: MSC 230 Or BIL 360.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 365. Tropical Coastal Ecosystems: Lab and Field Methods. 1 Credit Hour.
This course will provide students with the theory and application of field sampling methods used to document status and trends in the health of coral reef, seagrass, and mangrove ecosystems. Students will learn about sampling theory, sampling methods, sampling equipment, and species identifications using a combination of classroom and field activities. This 1-credit course is designed as a companion to MSC 366 where theory detailed in this class is put to practice to design and execute a targeted, small-scale sampling program for the coastal ecosystems found in South Florida. Lectures will be complemented with field activities to be carried out at sites around Key Biscayne and at the UM Broad Key station.
Pre/Corequisite: MSC 366.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 366. Tropical Coastal Ecosystems. 3 Credit Hours.
This course will provide a comprehensive background on the ecology, conservation, and restoration of the three main tropical coastal ecosystems: Mangroves, Seagrasses, and Coral Reefs. The first part of the course will consist of a review of ecological theory, followed by lectures on the dynamics of the three ecosystems, including diversity, community structure, stress ecology, management tools, and novel restoration paradigms. Classes will complemented by student presentations, in-class activities, and media-outreach projects. Readings for this class will include a required textbook and papers from the primary literature. Grades will be based on exams, quizzes, in-class projects, and student presentations.
Prerequisite: MSC 230 or BIL 230.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 370. Current Research in Marine Biology: Seminars and Discussion. 2 Credit Hours.
These discussions and seminars comprising a 2 cr course provide well-prepared undergraduate students interested in marine research with an introduction to graduate student-presented science in the specialization of marine biology.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 371. Readings in Marine Science. 1-3 Credit Hours.
Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards any of the RSMAS major or minor requirements with no more than 3 credits from each course.)
Permission of Instructor.
Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 372. Special Topics in Marine Science. 1-6 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.
MSC 373. Writing the GRFP and Graduate School Applications. 1 Credit Hour.
Writing the GRFP (graduate research fellow proposal) and Graduate School Applications is a practical course for undergraduate students interested in applying to graduate school next year or in the future. We will review NSF guidelines for the GRFP and both discuss and implement the steps for this proposal and graduate school applications. Basic tips on writing will be covered. Students will write a two page research statement and three page personal statement for the GRFP and then will modify these statements to use in graduate school applications. Students will be involved in reading and providing constructive criticisms to their fellow classmates. (No more than 3 credits in total from MSC370-level courses can be counted towards the MSC major or minor requirements).
Required: Junior or Senior Standing.
Components: DIS.
Grading: SUS.
Typically Offered: Fall.

MSC 380. Field Studies in Marine and Aquatic Science. 1-4 Credit Hours.
Field course to selected marine, estuarine and/or aquatic sites in the United States and abroad. Travel fee may be required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 381. Marine Field Ornithology. 1-4 Credit Hours.
Waterbirds such as seabirds, shorebirds, and wading birds are key components of the marine ecosystem, including pelagic, coastal, and estuarine communities. As ecological indicators waterbird abundance provides a proxy for the health of these environments. Waterbirds have also served as important model systems for studies of behavior, evolutionary biology, and ecological theory. This course will provide an introduction to waterbird biology and conservation, including a variety of different field trips to waterbird communities.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSC 390. Advanced Studies in Marine Science. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
Components: LEC.
Grading: GRD.

MSC 391. Advanced Studies in Marine Policy. 1-5 Credit Hours.
For transfer courses taken at other institutions that have no direct equivalents at UM.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSC 401. Ocean Dynamics. 3 Credit Hours.
This course provides an introduction to the mathematical description of fluid flows in the ocean. Topics covered include a review of vector calculus, conservation equations, the Euler and Navier-Stokes equations, flow kinematics, Eulerian and Lagrangian descriptions of fluid flows, vorticity dynamics, rotation effects including the Coriolis force and geostrophy, wind forcing, an introduction to turbulence, surface gravity waves, stratification and internal waves.
Prerequisite: MTH 162 and PHY 202 or PHY 221 or equivalent and Pre/Corequisite: MSC 301 and MTH 211 or MTH 310.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 402. Ocean Acidification. 3 Credit Hours.
Ocean Acidification is the ongoing decrease in the pH of the Earth's oceans, caused by the uptake of carbon dioxide (CO2) from the atmosphere. In this course students will learn about its impacts on important biogeochemical and biological processes.
Prerequisite: MSC 215 and MSC 216 and Pre or Corequisite: MSC 218.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 403. Marine Environmental Toxicology. 3 Credit Hours.
This course will provide an introduction to the principles of environmental toxicology with an emphasis on marine ecosystems, considering a variety of different classes of toxicants, how they can impact marine organisms, the scientific methods used to assess impacts, and the regulatory frameworks used to monitor and manage their release to the environment.
Prerequisite: BIL 255 and (CHM 112 or CHM 121).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MSC 404. Marine Organismal and Environmental Health. 1 Credit Hour.
This 1-credit course will complement salt water semester courses. (Must have taken MSC403 or MSC333 and either MSC466 or MSC326 and MSC463). Students will be required to collect and analyze samples, interpret their findings and present them in a formal laboratory report due two weeks after the trip. Students will also be required to give a presentation they have prepared before the trip and attend two seminars on Marine Organismal and Environmental Health topics.
Pre/Corequisite: MSC 327 or MSC 333 or MSC 403 or MSC 466 or MSC 326 and MSC 463.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 405. Observational Oceanography. 3 Credit Hours.
This course provides an introduction to measurement systems and data analysis techniques that are commonly used by oceanographers. Sensors and data types to be discussed include shipboard observations (CTD [conductivity-temperature-depth], ADCP [acoustic Doppler current profiler] and others), moored instrumentation, gliders, submerged floats, surface drifters, and satellite measurements. The use of most types of instrumentation that are discussed will be demonstrated in a laboratory setting and/or at sea. (Several one-day instructional cruises on the R/V Walton Smith are anticipated during the semesters that this course is offered. Students enrolled in this course are expected to participate on one of those cruises.) Basic oceanographic data analysis is also discussed, including use of computational tools to access archived oceanographic data sets.
Prerequisite: MSC 204 and MSC 215 or Pre/Corequisite: MSC 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 406. Tropical Marine Ecology: Sampling, Monitoring, and Restoration Methods. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on the ecology, conservation, and restoration of the three main tropical coastal ecosystems found in South Florida: Mangroves, Seagrasses, and Coral Reefs. This research intensive course focuses on the application of field sampling methods and integrate ecological theory to define the health and success of coastal ecosystems. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: MSC 230 Or BIL 230 And MSC 232 And Corequisite: MSC 407 and MSC 408 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 407. Molecular Ecology and Physiology of Reef Coral Symbioses. 4 Credit Hours.
Reef corals requires an intracellular symbiont to succeed. This course integrates lectures and molecular genetic research to quantify this symbiotic relationship. Students will be involved in research to define and quantify coral-symbionts interactions and how these interactions influences coral physiology and success. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: MSC 230 Or BIL 230 And Corequisite: MSC 406 and MSC 408 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 408. Climate Change: Limits of Marine invertebrate Adaptability. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on the effect of global climate change on the success of marine invertebrates. Students will be involved in research to understand how the predicted changes in the ocean environment (temperature, oxygen, and pH) affects the ability for marine organisms to acclimatize and adapt to these environments. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: MSC 230 Or BIL 230 And MSC 232 And BIL 255 And Corequisite: MSC 406 and MSC 407 and MSC 409.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 409. Coral Immunology and Microbiology. 4 Credit Hours.
This course integrates lectures, discussions and authentic research on coral immunology and microbiology for students to learn how the coral immune response and the coral associated microbes affect coral success. This research-intensive course integrates coral microbiome analysis with immunology assays to generate data on coral wellbeing. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: MSC 230 Or BIL 230 And MSC 232 And Corequisite: MSC 406 and MSC 407 and MSC 408.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MSC 410. Marine Conservation Science. 3 Credit Hours.
Nature of marine biodiversity, what threatens it, and what can be done to recover the biological integrity of estuaries, coastal seas, and oceans. Topics include: distinctive aspects of marine populations and ecosystems; threats to marine biological diversity, singly and in combination; place-based management of marine ecosystems; and the human dimensions of marine conservation.
Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 411. Research in Marine Science. 1-3 Credit Hours.
Individual, independent research projects with faculty supervision. A formal written report is required. (No more than 6 credits in total from MSC371, MSC411, and MSC412 can be counted towards the MSC major or minor requirements.)
Requisite: Junior or Senior Standing.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MSC 412. Undergraduate Thesis in Marine Science. 1 Credit Hour.
Students will write a formal thesis summarizing the results of independent research carried out under faculty supervision.
MSC 411 AND Senior Standing.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSC 415. Coral Reef Science and Management. 3 Credit Hours.
The interdisciplinary nature of coral reef science and management: biological, environmental, ecological and socioeconomic aspects of coral reef science, coral reef management problems and approaches at local to global scales, and the implications of climate change for coral reef science and management.
Prerequisite: MSC 230.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 417. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.
The distribution of dissolved particulate materials in the sea is not uniform in time or space. Variability in these reflects the diverse biological sources, transformations, and sinks of chemical constituents in the sea. This course focuses on the role of marine organisms in marine biogeochemical cycling, with particular emphasis on the marine carbon and the nutrients. We visualize and query the ocean system using publicly available global ocean data sets and the application Ocean Data View. The material is presented as a capstone bringing together the physical, chemical and biological dynamics of the ocean as a single system.
Prerequisite: MSC 215.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 418. Climate Law. 3 Credit Hours.
Climate Law evaluates the interactions between climate and the law, with an emphasis on existing laws and the gaps in current legislation related to the climate environment. The course will analyze court cases, domestic and foreign laws, treaties, and international conventions. In addition, the course will examine how climate manipulation requires an international model for the future.
Prerequisite: ATM 220 or MSC 220 and Requisite: Junior or Senior Standing.
Components: LEC.
Grading: GRD.

MSC 419. Microbial Geochemistry of the Ocean. 3 Credit Hours.
An overview of how microbes respond to and modify the chemistry of the ocean, focusing on the geochemical consequences and signatures of microbial activity in the ocean. Microbes form the base of the food chain and are responsible for essential chemical transformations that control important processes on Earth, including the production of atmospheric oxygen, and the consumption of carbon dioxide and transformation to organic carbon which fuels the rest of life in the ocean. This course will build a quantitative framework for understanding the chemical inputs and outputs of microbial metabolism, and the role these microbial processes play in controlling chemical fluxes in the ocean. This will address how biological origins, metabolic reworking, and physical phase influence the distribution and fluxes of organic matter in the marine carbon cycle on both short and long timescales.
Prerequisite: MSC 111 and MSC 215 and BIL 150 or BIL 160.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MSC 420. Political Ecology of the Galapagos. 3 Credit Hours.
This field course in the Galapagos National Park offers a rare chance to examine the human interactions in this highly politicized landscape of conservation. Students practice the political ecology approach for doing ethnographic field work and explore how it can lead to wiser resource management. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 421. Terrestrial Biology and Adaptations of the Galapagos. 3 Credit Hours.
This course will examine the terrestrial plant and animal life of Isabela Island, discuss the biology and how it adapted to life on Isabela. Through field and laboratory exercises we will explore the power of organisms' DNA in shaping life into unique forms like those famously present in today's Galapagos. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 422. Marine Ecology of the Galapagos. 3 Credit Hours.
This course focuses on marine ecosystems of the Galapagos, emphasizing near-shore environments. Topics will include how the unique location and oceanography of the Galapagos have shaped the species composition of resident and migrant marine animals. The role of genetic drift, local habitat characteristics and natural selection on marine ecosystems will be examined. This is a field intensive course with time spent in intertidal, near-shore and off-shore island environments. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 423. Marine Conservation Biology and Fisheries of the Galapagos. 3 Credit Hours.
The Galápagos are located in a uniquely productive area of the sea, which has allowed the development of rich and unique marine biota. The first week of the course will carry the students through the dynamic, climatic, and oceanographic circumstances that determine the unique character of the Galapagos. The second week will cover scientific evaluation of the threats to the marine biodiversity of the Galapagos, focusing on sharks, penguins, sea turtles and other at-risk species and habitats. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 424. Origin and Geology of the Galapagos Islands. 3 Credit Hours.
This course will explore the origin and geology of volcanic oceanic islands, using the Galapagos Islands as a natural laboratory. Though all share a common origin in plate tectonic theory, each island presents a host of environments that originate in the processes of volcanic action, erosion and hydrology. Individual islands therefore develop distinctive ecosystems within which organisms interact and evolve. The emphasis of this course will be to lay out the underlying geological processes that have led to the formation of the islands and to their present state, and then to explore the ways the physical environment has influenced adaptation and biodiversity. Part of UGalapagos semester.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 425. Galapagos Community-Based Research and Service. 2 Credit Hours.
Individual, civic engagement activities identified in consultation with the people, national park and local government of Puerto Villamil, Isla Isabela, as part of the marine science semester program in the Galapagos Islands. Student research and service is faculty supervised and concluded by submission of a formal written report. This course may not be counted towards the MSC elective requirement for majors or minors.
Components: PRA.
Grading: CNC.
Typically Offered: Fall & Spring.

MSC 426. Research in Microbial Genomics. 4 Credit Hours.
This course integrates lecture and laboratory studies to focus on the structure, function, evolution, mapping and editing of microbial genomes belonging to the three domains of life: Archaea, Bacteria and Eukarya.
Prerequisites: BIL 150 and BIL 151 and BIL 160 and BIL 161 and BIL 250.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSC 427. Field experience in the Galapagos. 2 Credit Hours.
Three week Summer I field course explores the flora, fauna, geology, and society of the Galapagos Islands.
Prerequisite: MSC 111 or ECS 111 or Permission of Instructor.
Components: PRA.
Grading: GRD.
Typically Offered: Summer.
MSC 432. Comparative Ecology of Terrestrial and Marine Systems. 3 Credit Hours.
A comparison of various biotic and abiotic controls on terrestrial and marine ecosystems is undertaken. The course stresses proximate mechanisms and underlying evolutionary processes. Analysis methods and models of various ecosystems are compared and critiqued. Issues involved in sustainability and conservation of resources are discussed in relation to agriculture, fisheries and forestry. The importance of biodiversity and climate change in the future of ecosystems is stressed.
Prerequisite: MTH 162. And BIL 330. Or ECS 232.
Components: LEC.
Grading: GRD.

MSC 460. Spatial Applications in Marine Science. 3 Credit Hours.
The concepts and marine applications of Geographic Information Systems. Every class period will entail short class lectures and hands on computer based GIS exercise on marine science related issues. Students will learn how to use ArcGIS Desktop or Arc Pro.
Prerequisite: MSC 111 and MSC 112 and Requisite: Junior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSC 462. Marine Biomedicine. 3 Credit Hours.
The course will cover diverse bioactive molecules that are derived from marine sources ranging from sponges to sharks. The isolation and characterization of these compounds as well as their potential application in clinical medicine and human health will be reviewed. The class will also cover marine-derived factors used in biotechnology and marine animal models used in biomedical research with an emphasis on marine immunology.
Prerequisite: BIL 255 and (CHM 112 or CHM 121).
Components: LEC.
Grading: GRD.

MSC 463. Conservation Genomics. 4 Credit Hours.
This course integrates lectures, discussions and research on genetics and genomics to understand population biology, conservation, and susceptibility of endangered species to extinction and the effect of invasive species on natural communities. This research intensive course sequences genomes and uses the data to better understand the health of species and ecological communities. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 150 and BIL 160 And MSC 230 Or BIL 230 And Corequisite: MSC 326 and MSC 466 and MSC 467.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 464. Marine Comparative Immunology Lab. 1 Credit Hour.
The laboratory course will cover immunology techniques used in the assessment of immune function and immune reactivity in diverse marine taxa from sponges to fish to mammals.
Prerequisite or Co-requisite: MSC 465.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSC 465. Marine Comparative Immunology. 3 Credit Hours.
The course will cover immune function in diverse marine taxa from sponges to fish and the evolution of innate and adaptive immune mechanisms from a comparative point of view, with an emphasis on shark and fish immunology. Adaptations related to living in a microbe-rich marine environment will be highlighted. Potential applications of research findings will be addressed with respect to conservation and aquaculture. The role of invertebrate and vertebrate models in the study of the evolution of the immune system and applications for human health and medicine will be discussed.
Prerequisite: BIL 255.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSC 466. Experimental Physiology. 4 Credit Hours.
This course integrates lectures, discussions and research. Topics will include homeostasis, interactions with the external environment, and life with limited oxygen and water. Lectures will be highly discussion-based; students will be expected to read primary research articles as suggested by the professor before lecture to foster participation in those discussions and form hypotheses about accompanying laboratory. Each lab will be written up as a formal laboratory report (i.e., Introduction, Materials and Methods, Results and Discussion). This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 255 And Corequisite: MSC 326 and MSC 463 and MSC 467.
Components: HRK.
Grading: GRD.
Typically Offered: Fall.
MSC 467. Marine Animal Neurophysiology and Behavior. 4 Credit Hours.
This course integrates lectures, discussions and research on neural and endocrine systems in marine animal models, and how these systems work together to control elements of physiology, sensation and perception of the environment and behavior. This course is part of Saltwater Semester so that students can be actively involved in intensive research. As part of the Saltwater Semester, students are required to enroll in four of the 4-credit Saltwater Semester courses (16 credits) where each course meets for 3 weeks at the Marine campus.
Prerequisite: BIL 230 Or MSC 230 And BIL 255 And Corequisite: MSC 326 and MSC 463 and MSC 466.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

- **People and Society Cognate Courses** 9

**Total Credit Hours** 122-123

1. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2. The electives must include at least one lab or field based course. One advanced biology course may fulfill requirements in both Biology and Marine Science.
3. Principles of Chemistry must be passed with a grade of “C-” or higher.
4. Calculus I must be passed with a grade of “C-” or higher.
5. Option 1 is recommended for Physics.

* 6 elective courses must include:
  * 3 Arts and Humanities Cognate courses
  * 3 People and Society Cognate courses

1 Students must take one laboratory from MSC 216, MSC 302.
2 Recommended elective to take for the Marine Science/Biology major.
3 Student will need to take 2 additional elective credits in MSC if the course can be counted for Biology only and not also Marine Science.
Mission
The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

Goals
Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Biology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of increasing stress on marine environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Design and pursue their course of study that meets requirements of a double major in Marine Science and Biology.
- Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
- Prepare themselves for graduate school and for successful careers in public and private industries.

Student Learning Outcomes

- Students will demonstrate an ability to communicate effectively.
- Students will develop analytical and quantitative skills to allow critical data analysis.
- Students will be able to do carry out supervised research in the field of marine science.

* 6 elective courses must include:
  • 3 Arts and Humanities Cognate courses
  • 3 People and Society Cognate courses

1 Students must take one laboratory from MSC 232 or MSC 302.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

**Goals**

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Computer Science, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of rapidly increasing use of computational resources and methods in science and industry. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Design and pursue their course of study that meets requirements of a double major in Marine Science and Computer Science.
- Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
- Prepare themselves for graduate school and for successful careers in public and private industries.

**Student Learning Outcomes**

- Students will demonstrate an ability to communicate effectively.
- Students will develop analytical and quantitative skills to allow critical data analysis.
- Students will be able to do carry out supervised research in the field of marine science.

**B.S.M.A.S. in Marine Science / Chemistry**

**Marine Science/Chemistry**

The Marine Science/Chemistry degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in biogeochemical cycling of nutrients, the impact and fate of marine pollutants, marine geochemistry and ocean/atmosphere interactions.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research at UM focuses on the role of ocean processes in carbon cycling and global climate change.

The Bachelor of Science double major in Marine Science/Chemistry prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

B.S.M.A.S. in Marine Science / Geological Sciences

Marine Science/Geological Sciences

The Marine Science/Geological Sciences degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in the study of the origin of the Earth and its oceans, and the ongoing processes of geophysical and geochemical change.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research at UM focuses on carbonate sedimentology of the Florida reef tract, stable isotope geochemistry and micropaleontology of deep ocean cores to reconstruct paleoclimate, tectonic processes (volcanoes and earthquakes), and the impact of rising sea level on coastal systems.

The Bachelor of Science double major in Marine Science/Geological Sciences prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

6 elective courses must include:

- 3 Arts and Humanities Cognate courses
- 3 People and Society Cognate courses

1. Students must take one laboratory from MSC 232 or MSC 302.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

**Goals**

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Geology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of increasing stress on Earth’s resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Design and pursue their course of study that meets requirements of a double major in Marine Science and Geology.
- Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
- Prepare themselves for graduate school and for successful careers in public and private industries.

**Student Learning Outcomes**

- Students will demonstrate an ability to communicate effectively.
- Students will develop analytical and quantitative skills to allow critical data analysis.
- Students will be able to do carry out supervised research in the field of marine science.

**B.S.M.A.S. in Marine Science / Meteorology**

**Marine Science/Meteorology**

The Marine Science/Meteorology degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in the physical aspects of climate, as well as the interaction of the ocean and the atmosphere. The Meteorology curriculum follows the program guidelines established by the American Meteorological Society.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research encompasses atmospheric dynamics, climate science, boundary-layer processes, cloud processes, and remote sensing. Focus areas include hurricanes (modeling, data assimilation and field observations), tropical meteorology, atmosphere-ocean coupling, climate, and climate change. Many faculty are active in fieldwork.

The Bachelor of Science double major in Marine Science/Meteorology prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

### Mission

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

### Goals

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Meteorology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of changing climate and increasing stress on Earth's resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

- Design and pursue their course of study that meets requirements of a double major in Marine Science and Meteorology
- Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs
- Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills
- Prepare themselves for graduate school and for successful careers in public and private industries.

### Student Learning Outcomes

- Students will demonstrate an ability to communicate effectively.
- Students will develop analytical and quantitative skills to allow critical data analysis.
- Students will be able to do carry out supervised research in the field of marine science.
- Meteorology students will be able to apply concepts from physics to the atmosphere of a rotating planet, to solve basic problems.
- Students will be able to apply the basic concepts of thermodynamics to the atmosphere.
- Students will learn the structure and chemistry of the troposphere and stratosphere and apply this to air quality and environmental science applications.

### B.S.M.A.S. in Marine Science / Microbiology and Immunology

**Marine Science/Microbiology and Immunology**

The Marine Science/Microbiology and Immunology degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in molecular and cellular aspects of microbial pathogenesis and immune defenses. The ocean, which is teeming with microbes, is explored to highlight the complex biological interactions between microbes and their hosts and the environmental factors that influence these relationships. This program is ideal for students interested in the relationship between the ocean and human health and medicine as well as those interested in pursuing a pre-medical or pre-veterinary track.
Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research encompasses ocean and human health, medicine, and molecular and cellular aspects of microbial pathogenesis and immune defenses.

The Bachelor of Science double major in Marine Science/Microbiology and Immunology prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

1. At least 6 of which must be at the 300-level or higher. MSC204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.
2. MSC 465 may double count as both MSC and MIC upper electives.
3. Principles of Chemistry must be passed with a grade of "C-" or higher.
Calculus I must be passed with a grade of "C-" or higher.
Option 1 is recommended for Physics.

* 6 elective courses must include:
  • 3 Arts and Humanities Cognate courses
  • 3 People and Society Cognate Courses

¹ MSC 465 may double count as both MSC and MIC upper electives.
² Students must take one laboratory from MSC 216 or MSC 302.

Mission

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

Goals

Students completing this double major will be able to master a broad set of fundamental scientific knowledge in Marine Science and Microbiology and Immunology, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in light of increasing stress on environment and human health. The program will provide the rigor, flexibility, depth and integration to enable students to:

• Design and pursue their course of study that meets requirements of a double major in Marine Science and Microbiology and Immunology.
• Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
• Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
• Prepare themselves for graduate school and for successful careers in public and private industries.

Student Learning Outcomes

• Students will demonstrate an ability to communicate effectively.
• Students will develop analytical and quantitative skills to allow critical data analysis.
• Students will be able to do carry out supervised research in the field of marine science.
B.S.M.A.S. in Marine Science / Physics

Marine Science/Physics

The Marine Science/Physics degree is a Bachelor of Science degree (BSMAS) that is designed to give students a strong background in the study of the spatial and temporal variability in the ocean. Measurements from current meters, profilers and satellites are used to develop models of ocean circulation, water and heat transport, and effects of circulation patterns on the biology and chemistry of the ocean.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research at UM focuses on ocean/atmosphere interactions, remote sensing, biophysical interactions, and the ocean's effect on weather and climate.

The Bachelor of Science double major in Marine Science/Physics prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans.

B.S.M.A.S. in Marine Science with a Second Major

Marine Science with a Second Major

Marine Science is an interdisciplinary program dealing with the study of the world’s oceans, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences. Approved second majors in Applied Physics, Biochemistry, Engineering (all disciplines), and Mathematics may be taken. Students interested in adding a second major in one of these disciplines should review the Applied Physics (http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/physics/physics-applied-physics-bs/), Biochemistry (http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/biochemistry-molecular-biology/biochemistry-molecular-biology-nutrition-bs/), Engineering (all disciplines) (http://bulletin.miami.edu/undergraduate-academic-programs/engineering/), or Mathematics (http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/mathematics/mathematics-ba-bs/) pages for additional requirements. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

1. Required for Biochemistry double majors.
3. At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement. Three credits may double count for both MSC and the second major if approved by advisor.
4. Principles of Chemistry must be passed with a grade of "C-" or higher.
5. Calculus I must be passed with a grade of "C-" or higher.
6. Option 1 or 2 is recommended for Physics. Option 2 (University Physics) is required for Engineering and Applied Physics.
7. MSC 203 or RSM 521 is required for Applied Physics, Engineering, and Mathematics.
8. Students should review the Applied Physics (p. 558), Biochemistry (p. 189), Engineering (all disciplines) (p. 1044), or Mathematics (p. 462) page for the second major requirements and credits needed.

Total Credit Hours: 127-128

* 7 elective courses must include:
  • 3 Arts and Humanities Cognate courses
  • 3 People and Society Cognate courses

1 A total of 6 elective credits in BMB, including at least 2 elective credits in a BMB lab course, must be taken per the Biochemistry Requirements from the following: BMB 145, BMB 245, BMB 402, or BMB 545. BMB 402 is a sample BMB lab course.

** Students interested in adding a second major in Biochemistry should review the Biochemistry (p. 189) page for the official requirements needed. This is a suggested plan of study only.

* 7 elective courses must include:
  • 3 Arts and Humanities Cognate courses
  • 3 People and Society Cognate courses
  • MSC 203 or RSM 521 is required for Applied Physics, Engineering, and Mathematics.

** Students interested in adding a second major in Mathematics should review the Mathematics (http://bulletin.miami.edu/undergraduate-academic-programs/arts-sciences/mathematics/mathematics-ba-bs/) page for the official requirements needed. This is a suggested plan of study only.

Mission

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Marine Science at the University of Miami is to graduate students with the ability and desire to integrate knowledge of marine science into their future careers.

Goals

Students completing this double major will be able to master a broad set of fundamental scientific knowledge, acquire valuable technical skills and learn how to apply this knowledge to real-world problems, in a time of increasing stress on Earth’s resources and environment. The program will provide the rigor, flexibility, depth and integration to enable students to:

• Design and pursue their course of study that meets requirements of a double major.
• Learn from the diverse and outstanding group of professors and researchers who are experts in their fields and have active research programs.
• Undertake active research experiences, which will allow them to gain a strong understanding of the scientific process and provide them with a set of valuable experimental and computational skills.
• Prepare themselves for graduate school and for successful careers in public and private industries.

Student Learning Outcomes
Students will demonstrate an ability to communicate effectively.
Students will develop analytical and quantitative skills to allow critical data analysis.
Students will be able to carry out supervised research in the field of marine science.

Minor in Marine Science

Overview
The Marine Science minor introduces the student to the study of the world's oceans: their physical and biological constituents, the influence of oceanic resources on human society and the conservation and future development of those resources.

Total Credit Hours 16

* Students majoring in the RSMAS Undergraduate Program should replace MSC 111 and MSC 112 with an additional elective, and all electives must be above and beyond those used for the major.

** Most courses within this minor require at least one Science requisite. Students should review all courses and requirements before planning your studies and declaring the minor.

*** At least 6 of which must be at the 300-level or higher.

**** Only those courses passed with a grade of “C-” or higher may be applied to the major or minor. The Marine Science minor fulfills the requirements of the STEM cognate.

Oceanography

Dept. Code: OCE

Oceanography

The BSMAS in Oceanography is designed to give students a broad overview of the ocean sciences (physical, chemical, biological and geological oceanography, and ocean-atmosphere interactions as they relate to weather and climate) and specialized knowledge in one or more subdisciplines. Students are encouraged, but not required, to complete a second major in Chemistry, Physics, Biology, Geological Sciences, Meteorology, Mathematics, Computer Science or Engineering.

OCE 503. Physical Oceanography. 3 Credit Hours.

Introduction to properties of seawater, instruments and methods, heat budget, general ocean circulation, formation of water masses, dynamics of circulation, regional oceanography, waves, tides, and sea level. A mathematical and problem solving course for majors in MPO.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 508. Introduction to Ocean Systems Engineering. 3 Credit Hours.

This course will provide a survey introduction to various aspects of ocean systems engineering. This is a required course for all students enrolled in the Master of Science (non-thesis) in Ocean Engineering Program. It is intended to be taught in the first term of their studies, before they have fully refined their courses. It could also be of interest to graduate students in OCE and upper level undergraduate engineering, marine science or mathematics majors who are seeking to inform themselves on the breadth of study in ocean engineering.

Prerequisite: Senior Standing and Prerequisites: MTH 211 and MTH 311 and PHY 102 or PHY 202 or PHY 206.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
OCE 509. Coastal Physics and Engineering. 3 Credit Hours.
Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, nearshore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include longshore and cross-shore transport, equilibrium beach profiles, coastal processes models, Pelnard-Considere model for shoreline change, and Escoufier model for inlet stability.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 511. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 512. Marine Organic Geochemistry. 3 Credit Hours.
Broad introduction to the chemical constituents comprising organic matter in marine environments. This course will address how biological origins, dietary and detrital reworking, and physical phase influence the distribution and fluxes of organic matter in the marine carbon cycle, on both short and long timescales. Topics will address both the water column and sediments, in open-ocean and coastal environments. Students may choose topics of specific interest to their research for presentations and writing assignments (subject to instructor approval). The first half of the course will focus on the chemistry and physical phases of organic matter; the second half will focus on discussing the application of organic geochemical tools to environmental questions via the primary literature.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 522. Marine Microbial Dynamics. 3 Credit Hours.
An overview of the function of microbes in the ocean from a chemical perspective, building a quantitative understanding of cellular needs and metabolic functions, and the role these microbial processes play in controlling chemical fluxes and biogeochemical cycles in the ocean.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 531. Ocean Data Analysis. 3 Credit Hours.
Useful and widely used ocean data analysis techniques are discussed. Topics covered include: a review of statistical concepts and linear algebra; time series analysis; least squares and regression techniques; principal component analysis; optimization and inverse methods; and simple models of ocean processes. Computational methods are emphasized. Choice of the material covered is dictated in part by student interests.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 536. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 537. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer terms effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
OCE 542. Physics of Remote Sensing I - Passive Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on optical and passive systems. Topics include orbital dynamics, sampling issues, fundamental laws of electromagnetic waves, passive remote sensing in the visible, infrared and microwave parts of the electromagnetic spectrum, a survey of satellite sensors and summary of the derived geophysical variables.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 543. Physics of Remote Sensing II - Active Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on active and radar systems. Topics include electromagnetic theory, radar equation, antenna theory and pulse compression, radar scattering physics; sea surface processes relevant to radar imaging, scatterometry, synthetic aperture radar (SAR), altimetry, HF Doppler radar, marine radar, satellite orbits, brief overview of passive remote sensing techniques.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 551. Applied Ocean Acoustics and Marine Mammals. 3 Credit Hours.
The objective of this course is to provide a basis in the fundamental of sound in the sea and on the effects of sound on marine mammals.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 575. Fluid Mechanics. 3 Credit Hours.
The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 576. Wave Propagation in the Ocean Environment. 3 Credit Hours.
Review of vector analysis, basic principles of fluid mechanics, equations of surface gravity waves, linear dispersion relation, phase and group velocity, wave dispersion, orbital motions, wave refraction, diffraction, reflection, ray tracing, frequency and wavenumber spectra, fundamentals of wave modeling, action balance equation, wave generation, wave dissipation, wave-wave interaction, wave-current interaction, Stokes drift, internal waves.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 582. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 583. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 584. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics of Marine and Atmospheric Chemistry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
OCE 586. Applied Remote Sensing. 3 Credit Hours.
Provides a detailed overview of applications of passive remote sensing using visible, infrared and microwave radiometers. Orbit and satellite characteristics are discussed. Hands-on data processing and analysis using readily accessible image processing software is included. Access to satellite data archives is explained. Students are also expected to attend Physics of Remote Sensing I - Passive Systems, and Physics of Remote Sensing II - Active Systems, which focus on the theory of remote sensing. The companion course, Applied Radar Remote Sensing, is offered in the spring semesters.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 587. Applied Radar Remote Sensing. 3 Credit Hours.
This course complements Physics of Remote Sensing II with additional lectures and exercises tailored specifically to the needs of MPS students. Topics covered: Active vs. passive remote sensing, satellite station operations, how to work with satellite radar images, imaging geometry and sampling characteristics, introduction to IDL, hands-on SAR data analysis examples, hands-on marine radar data analysis.
Requisite: Senior Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

B.S.M.A.S. in Oceanography

Oceanography

The BSMAS in Oceanography is designed to give students a broad overview of the ocean sciences (physical, chemical, biological and geological oceanography, and ocean-atmosphere interactions as they relate to weather and climate) and specialized knowledge in one or more subdisciplines. Students are encouraged, but not required, to complete a second major in chemistry, physics, biology, geological sciences, meteorology, mathematics, computer science or engineering.

Undergraduate students are encouraged to work with the faculty and are able to earn course credit by conducting independent research under the supervision of leading scientists in their field. Research foci include air-sea interaction and remote sensing, biogeochemical cycles in the ocean, large-scale ocean dynamics, and biophysical interactions.

The Bachelor of Science degree program is meant for students planning to continue with graduate studies in ocean science, as preparation for professional school or as preparation for a technical career in government or private industry.

**Mission**

The mission of the Rosenstiel School of Marine and Atmospheric Science is to deepen our collective knowledge of our planet through cutting-edge scientific research on the oceans, atmosphere, geology, biota, and the human dimension, while training the next generation of scientists. We transfer the knowledge gained to our students, the national and international scientific community, and to policymakers and the public.

The educational mission of the BS degree in Oceanography at the University of Miami is to graduate students with the ability and desire to integrate knowledge of oceanography into their future careers.

**Goals**

Students completing the BSMAS in Oceanography will have acquired a broad overview of physical, chemical and biological oceanography, meteorology and earth history. In addition students will have a firm foundation in basic sciences including mathematics, physics, chemistry and biology, and will have familiarity with modern scientific computational and data analysis tools. Integration and mastery of these tools gives students the skills to:

- Have a firm understanding of the scientific process.
- Contribute to active research projects led by professors and researchers who are experts in their fields.
- Prepare students for graduate school or for successful careers in industry or public workplaces.
Student Learning Outcomes

- Students will demonstrate an ability to communicate effectively, both verbally and in writing.
- Students will acquire analytical and quantitative skills that will provide a basis for both critical thinking and quantitative data analysis.
- Students will have the skills to perform supervised research in oceanography.

Music

https://www.frost.miami.edu/index.html

Phillip and Patricia Frost School of Music

Introduction
The University of Miami Frost School of Music awards three types of undergraduate degrees within fourteen major programs.

- Bachelor of Music
  - Instrumental Performance (MIP) (p. 1337)
  - Keyboard Performance (MKP) (p. 1366)
  - Vocal Performance (MVP) (p. 1490)
  - Studio Jazz Instrumental (MSJI) (p. 1460)
  - Studio Jazz Vocal (MSJV) (p. 1460)
  - Music Education (MED) (p. 1377)
  - Music Therapy (MTY) (p. 1377)
  - Theory and Composition (MTC) (p. 1451)
  - Media Writing and Production (MWP) (p. 1410)
  - Music Business and Entertainment Industries (MBEI) (p. 1418)
  - Musicianship, Artistry Development, and Entrepreneurship (MADE) (p. 1425)
  - B.M. in Professional Studies (MPRO) (p. 1431)

- Bachelor of Science
  - Music Engineering (MUE) (p. 1435)

- Bachelor of Arts
  - Music (MUS) (p. 1327)

Mission
The Frost School of Music seeks to transform lives through the study and performance of music, and to enhance music’s future as the result of the most innovative and relevant curricula in higher education. The Frost School of Music is devoted to excellence and a culture of collegiality, in which a diversity of people, musical styles, and careers are valued. The Frost School of Music is a community of musicians committed to advanced musicianship for all Frost students across a broad array of majors and programs. The Frost School of Music seeks to elevate the community through intensive, sustained outreach to under-served populations. The Frost School of music strives to enhance the cultural richness of the University of Miami, South Florida and throughout the world as the result of world class performance, scholarship and research.

Accreditation
The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this bulletin are in accordance with the principles of this association.

Goals
The primary goals are:

1. to provide music majors with a high quality education,
2. to provide opportunities for other university students to increase their musical skill, understanding, and appreciation,
3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and
4. to serve as an educational and cultural resource for the university, South Florida, and global communities.

Admissions

Admission to the Frost School of Music

Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:
1. Submit a Frost School of Music Application to the Frost School of Music Admission Office.
2. Submit an Application for Undergraduate Study to the University Office of Undergraduate Admission.
3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. Appropriate faculty committees will evaluate the audition.
4. After being admitted to the university each student will be required to participate in placement auditions and exams in theory and music performance. These examinations will be given immediately prior to the fall semester.
5. Transfer students who are admitted to the university will receive a tentative evaluation of their previous work from the office of Admission. Validation of credit hours in music will be based on the results of auditions and placement examinations discussed above. The Associate Dean for Undergraduate Studies of the Frost School of Music determines which transferred courses will meet specific requirements for graduation.
6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

Admission to the University (Undergraduate Students)

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site (http://www.miami.edu). The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the university’s selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. The University Office of Admission and the Frost School of Music determine admission to the university. Prospective students should make formal application for admission in the fall of the senior year in high school.

New Student Placement

New students will participate in an ensemble placement audition and music theory placement assessment during Frost Orientation. These auditions and assessments will determine the student’s appropriate ensemble and music theory placement. Further information on placement materials and procedures will be communicated before Frost Orientation.

Attendance

Regular and punctual class attendance is vital for all students. Each instructor will announce during the first meeting of a class the penalties for non-attendance and for missed quizzes and examinations, since these vary. Any student may be dropped from a course or receive a lowered grade for unauthorized absences which are exceed those permitted without penalty by the instructor. It is the student’s responsibility to know the instructor’s policies regarding examinations, penalties for absences, or late or missed work. See the UM Academic Bulletin for detailed policy. A student who is ill should sign a release at the UM Health Service Clinic authorizing the doctor to discuss with the faculty that the student was indeed ill and visited the clinic. The student must request that the faculty contact the Health Center. No notes are given to students. If a student needs to miss more than two consecutive class days due to illness or other emergency, the Dean’s Office should be notified and faculty will be sent a memo.

Preparation and Class Participation

The School of Music values the presence and participation in class of the student as essential elements of the learning experience. Courses are experiential and participatory. The value of the course lies in preparing for, listening to, and participating in all class experiences. It is impossible for a student to make up a missed class with outside resources. Therefore, it is expected that students attend every class, arriving on time. Please see the grading policy for attendance.

80% Attendance Rule

The School of Music maintains a firm 80% policy regarding attendance. That is, a student who fails to attend at least 80% of class sessions does not qualify as having completed the course and will not receive a passing grade. Instructors determine the attendance and grading policy for their course as stated in the syllabus. The individual course attendance requirements may exceed the minimum 80% attendance rule.

Academic Probation and Failed Course Policies

Students Who Fail to Successfully Complete a Music Course

Students who fail to successfully complete any music course, including zero credit forums, after the second enrollment will be dismissed from the Frost School of Music. Courses required for the degree must be taken at the next available opportunity and may not be dropped during the second enrollment.

Grading Criteria:

1. Experiential Music Curriculum Core Courses (48 credits) must be passed with a grade of a “C” or higher ("C-" = failing), Program forums must be passed with a grade of CR ("NC"=failing).
2. MED courses must be passed with a grade of "C" or higher for Music Education and Music Therapy majors;
3. Primary lessons must be passed with a grade of "B-" or higher; and
4. All other music courses will be failing with a grade of "F"
**Academic Probation**

In addition to the University of Miami academic probation guidelines, a Frost School of Music student is subject to Academic Probation if she/he:

1. Fails to make satisfactory progress towards completion of degree; or
2. Earns an overall Term GPA below a 2.7.

A student who remains on probationary status after two consecutive semesters shall be subject to dismissal:

- Semester One = Probation One;
- Semester Two = Probation Two; and
- Semester Three = Dismissal

The decision to dismiss shall be made by the Academic Standards Committee (ASC) of FSOM. If the decision is made not to dismiss, the student shall remain on Academic Probation. Dismissal Procedures are outlined in the Frost School of Music Undergraduate Student Handbook.

---

**Lessons**

**Primary Lessons**

Primary lessons are for two (2) credit hours and must be taken on the student’s primary instrument, unless otherwise approved. Students enrolled in primary lessons are required to perform a jury at the end of each semester. If a student wishes to take lessons on a secondary instrument, they must follow the procedures in the ‘secondary lesson’ section below.

There are two levels of undergraduate private lessons:

- Level 1 (VO1) - Undergraduate freshman and sophomores, typically four semesters.
- Level 3 (VO3) - Undergraduate juniors and seniors, typically four semesters.

The number of lessons required for graduation is outlined in the curriculum of each degree program found in the UM Academic Bulletin. Transfer students enrolled in Level 1 for their first semester will be placed at the appropriate level of study after their first jury.

Students earning a grade of "C+" or lower in lessons will be placed on probation for one semester. Following probation, an additional grade of "C+" or lower in lessons will result in dismissal from the Frost School of Music.

**Secondary Lessons**

Secondary lessons are available to FSOM and non-music students, pending studio approval, for one (1) credit hour. Students who wish to enroll in a secondary lesson must first receive approval from the applicable department and submit the Private Lessons Form, located on the FSOM Undergraduate Forms webpage.

There is a non-refundable $300 secondary lesson fee required for each semester in which a secondary lesson is taken. This fee must be paid in full before enrollment. For further instructions please contact the Office of Undergraduate Studies.

**Summer Lessons**

Should a summer lesson be available, it will not fulfill degree requirements for FSOM academic programs.

**Juries**

A jury is designed to evaluate a student’s musicianship and technical progress in their principal lesson. Juries are typically evaluated by a panel of performance faculty at the end of each semester. Repertoire and technical requirements are assigned by the student’s private instructor. A portion of the final grade may be determined by studio class participation, recital attendance, or other requirements specific to the student’s program of study.

**Ensembles**

**Performing Ensembles**

Ensembles provide music learning and performing experience for all students on the University of Miami campus through rehearsals and public concerts. Membership in each of these performing ensembles is based on auditions. Not all ensembles meet degree requirements. Please refer to the FSOM Undergraduate Student Handbook for detailed information regarding ensembles. Please see the course catalog for a complete list of all ensembles.

**Instrumental Ensembles**

- Accompanying
- American Music Ensemble (Songwriters)
- Avant Garde Ensemble
• “Band of the Hour” Marching Band
• Bluegrass Ensemble
• Blues Ensemble
• Brass Chamber Music
• Brass Choir
• Clarinet Choir
• Classical Guitar Ensemble
• Concert Jazz Band
• Contemporary Music Ensemble
• E.C.M. Ensemble
• Electronic Music Ensemble
• Flute Choir
• Funk/Fusion Ensemble
• Horace Silver Ensemble
• Ibis Ensemble
• Jazz Band III
• Jazz Bass Ensemble
• Jazz Guitar Ensemble
• Jazz Keyboard Ensemble
• Jazz Saxophone Ensemble
• Laptop Ensemble
• Mallet Ensemble
• Monk/Mingus Ensemble
• Percussion Chamber Music
• Salsa Ensemble
• Saxophone Ensemble
• Small Contemporary Ensemble
• Small Jazz Ensembles
• String-Keyboard Chamber Music
• Studio Jazz Band
• Studio Rhythm Section
• Symphonic Winds
• Symphony Orchestra
• Trombone Choir
• Tuba Ensemble
• University Band
• Wind Ensemble
• Woodwind Chamber Music

Vocal Ensembles
• Frost Chorale
• Jazz Vocal I-III
• Musical Theatre Workshop
• Opera Theater
• Symphonic Choir
• Women's Choir

Enrollment

Forums
Students must successfully complete a program forum each semester in residence. Program forums must be passed with a “CR” in order to be approved for graduation. The grade of a “NC” is considered failing. Please refer to the FSOM Undergraduate Student Handbook for detailed information regarding forums and studio classes.
Auditing
Students are not permitted to audit music courses.

Graduation Requirements
The general requirements for graduation from the University of Miami are described in the General Information section of the Academic Bulletin. These general requirements are included in the list of requirements for majors in the Frost School of Music. Students must satisfy all degree requirements in order to graduate. The student should consult his/her advisor regularly and review the Degree Progress Report available in CaneLink under Academic Requirements to ensure that these requirements are met. The Dean must approve changes or deviations from the printed requirements in writing. Degree requirements may be satisfied by successfully completing a course, an approved substitution for the course, an approved transfer course, or waiver from the course as a result of demonstrating the required competency through testing.

Candidates for degrees must complete all requirements of the University and the Frost School of Music with a minimum “C” average (2.0) or better and at least 120 credits. Students may not graduate with an "I" or "NG" in any course.

Transfer Credits
Transfer Student Credit Evaluation
FSOM music course transfer equivalencies will be determined prior to Frost Orientation. Transfer Students will receive a pre-registration advising via email before enrolling in courses. If official transcripts are not received by the University, or if transfer credits are not correctly labeled, this process may be delayed. Please contact Eva Alonso at fsomundergrad@miami.edu (eva.alonso@miami.edu) for further information.

Other Music Transfer Credits
If you have previously earned music credit at another institution and wish to receive transfer equivalencies, please complete the Transfer Credit Equivalency Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/) and return it to Eva Alonso in PLF 108 N.

Non-UM Programs (Summer, Study Abroad, and Term)
Students currently enrolled in the Frost School of Music who wish to Study Abroad must complete the Non-UM Program Request Form (https://registrar.miami.edu/_assets/pdf/new-site/Forms-1/Non-UM%20Program%20Application.0.1.pdf) through the Registrar’s Office. If you wish to take summer courses away and earn college credit, please bring a completed Transfer Credit Equivalency Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/), along with the course description from the Non-UM Program, to the Undergraduate Studies Office. If you wish to transfer in a non-music course you must get the equivalency approved by the department in which the course lives (i.e. ENG 105 equivalency will need to be approved by the English Department). After the form is complete, please bring the form to the Office of Undergraduate Studies for final approval and processing.

If you have earned 56 credits or more, courses must be taken at a NASM or regionally accredited institution (four-year college or university). The last 45 credits prior to graduation must be in residence at the University of Miami.

Dual Degrees
Dual degrees have more stringent requirements than "double majors." The only courses that may count for both degrees are the general education requirements (ENG 105 (http://bulletin.miami.edu/search/?P=ENG%20105) and ENG 106 (http://bulletin.miami.edu/search/?P=ENG%20106), Math, People and Society cognate, and STEM cognate). For each degree a student must have a different major and minor, if a minor is required. The major for one degree may not be a minor for the other degree.

Music Opportunities for Non-Music Majors
Select music courses are available to students not enrolled in a music degree program. A list of courses is available on the music website (forms), https://admissions.frost.miami.edu/undergraduate/current-students/

Minors for Non-Music Students
- General Music Minor (p. 1501) (Satisfies the Arts and Humanities Area of Knowledge) - Audition Required
- Dance Minor (p. 1501) (Satisfies the Arts and Humanities Area of Knowledge) - Audition Required
- Music Business and Entertainment Industries Minor (p. 1450) (Satisfies the People and Society Area of Knowledge) - No Audition Required

Students interested in the Minor in General Music must successfully pass an ensemble placement (if participating in an ensemble) or primary instrument audition (if enrolling in private lessons). Please contact the appropriate faculty member listed on the Ensemble Contact List or the...
Secondary Lesson Audition Contact List (located on the Undergraduate Forms Webpage (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/)) to inquire about audition materials and to schedule your audition.

Once you have received confirmation that you have passed the audition, request that the designated faculty member sign the bottom of the Declaration of Music Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/) or the Declaration of Dance Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/). For students declaring the General Music Minor, submit your completed Declaration of Music Minor Form to the Undergraduate Studies Office and declare your chosen music minor through your primary school. For students declaring the Minor in Dance, submit your completed Declaration of Dance Minor Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/) to Prof. Carol Kaminsky, c.kaminsky@miami.edu and declare your chosen music and/or dance minor through your primary college or school.

Cognates
All cognates that include courses offered by FSOM satisfy the Arts & Humanities Area of Knowledge. Please see a list of all applicable cognates below:

- World of Music (https://cognates.miami.edu/AT_0001/) (AT_0001)
- Creative Arts in Therapy: Integrating Music and Dance into Counseling and Healthcare (https://cognates.miami.edu/AT_0099/) (AT_0099)
- The Arts in Education: Contextual Connections (https://cognates.miami.edu/AT_0010/) (AT_0010)
- Western Civilization: Historical Approaches (https://cognates.miami.edu/AT_0011/) (AT_0011)
- Music Performance and Understanding (https://cognates.miami.edu/AT_0102/) (AT_0102)
- Music and Movement (https://cognates.miami.edu/AT_0101/) (AT_0101)

Secondary Lessons
Secondary lessons are available to FSOM and non-music students, pending studio approval, for one (1) credit hour per semester. Students who wish to enroll in a secondary lesson must first receive approval from the applicable department and submit the Private Lessons Form, located on the FSOM Undergraduate Forms (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/) webpage, to the Office of Undergraduate Studies. There is a $300 secondary lesson fee required for each semester in which a secondary lesson is taken. This fee must be paid in full (cash or check payable to the University of Miami) before enrollment. For further instructions, please visit the Office of Undergraduate Studies. The Secondary Lesson Contact List is located on the Undergraduate Forms Webpage (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/).

Ensembles
Non-music students may request to audition for any ensemble in the Frost School of Music. Students may enroll in ensembles upon approval of applicable faculty and ensemble instructor. If course is restricted to majors only in CaneLink, please send proof of faculty approval to the Office of Undergraduate Studies and a registration permission code will be created.

General Education
General Education Requirements
Music students are expected to meet the university general education requirements, detailed in the academic bulletin, in order to ensure that they have acquired essential intellectual skills. Music students are encouraged to engage in a range of academic disciplines.

English and Mathematics Requirements
Students requiring ENG 105, ENG 106, or MTH 101 must enroll in these classes during the first year in residence and are not permitted to drop the courses.

Areas of Knowledge

To discover cognates offered by UM, please visit the Cognate Search Engine (https://cognates.miami.edu/). To declare a cognate and/or minor, students must submit a Minor and/or Cognate Declaration Form (http://www.miami.edu/frost/index.php/frost/programs/undergraduate_studies/undergraduate_forms/) to the Office of Undergraduate Studies.

Arts and Humanities
All Frost School of Music students satisfy the Arts and Humanities Area of Knowledge, upon successful completion of the BM, BS, or BA music degree requirements.

People and Society
Students enrolled in the following degree programs must satisfy their People and Society Area of Knowledge with a cognate, minor, or major: MIP, MKP, MVP, MSJI, MSJV, MTC, MWP, MUE, and MPRO.

The following degree programs satisfy the People and Society Area of Knowledge upon successful completion of the required minor:

- MED Music Education with required minor in Education;
- MTY Music Therapy with required minor in Psychology;
- MBEI Music Business and Entertainment Industries with required minor in Business, Communication or Entertainment, if the minor is designated as People and Society; and
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the People and Society Area of Knowledge.

Please note that a minor in Music Business and Entertainment Industries satisfies the People and Society Area of Knowledge.

Science, Technology, Engineering, and Math (STEM)
Students enrolled in the following degree programs must satisfy their STEM Area of Knowledge through a cognate, minor, or major: MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MTC, MWP, MBEI, MADE, and MPRO.

The following degree programs satisfy the STEM cognate upon successful completion of the required minor:

- MUE Music Engineering with required minor in Electrical Engineering or Computer Engineering;
- MBEI Music Business and Entertainment Industries with required minor in Business, Communication or Entertainment, if the minor is designated as STEM;
- MUS Bachelor of Arts in Music required minor outside of music may fulfill this requirement if the minor is in the STEM area of knowledge.

Advanced Writing and Communication Skills
All students are required to successfully complete 3 Advanced Communications and Writing courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. A required musicology course, which will include substantial evaluated and revised writing components.
2. A Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. One required course in their major which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Experiential Music Core Requirement (EMC)
The EMC Core courses are common to all Frost School of Music students regardless of degree program. The EMC core courses empower students to become internal musicians as they develop deep knowledge in music and a high level of musical skills. As a community of musicians, all students interact with their peers whose diverse interests strengthen their music making abilities.
Additional courses for Principal Instrument Lesson & Studio Class and Ensembles may be required for the major.

All EMC core courses must be successfully completed with a grade of "C" or higher. A grade of a "C-" is considered failing. Program forums must be successfully completed with a grade of "CR" A grade of "NC" is considered failing.

Foote Fellow General Education Requirements

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Within the curricular framework of their school or college, Foote Fellows enjoy maximum freedom to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities and educational guidance, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

In addition, Foote Fellows have access to opportunities outside their school. Special Foote Fellow lectures are held throughout the academic year. “Books That Matter,” a rigorous, multidisciplinary seminar in reading and analyzing significant works of nonfiction, is offered to Foote Fellows. In their junior and senior years, Foote Fellows are invited to join advanced, interdisciplinary, and integrative seminars taught by leading faculty members from across the University. Foote Fellows also benefit from focused advising regarding post-baccalaureate distinguished fellowships and awards, support and information about co-curricular opportunities from a dedicated program manager, and networking events with other Foote Fellows from all disciplines.

To graduate with the Foote Fellows Honors Program distinction, Foote Fellow students must achieve a minimum GPA of 3.5 by the completion of the final semester.

Eligibility for the Foote Fellows Honors Program transcript distinction for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the Frost School of Music have freedom within the General Education requirements as described below. However, Foote Fellow students are still required to accumulate twenty seven (27) total credit hours in non-music coursework to meet graduation requirements.

Bachelor of Arts in Music (MUS)

Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. There is no undergraduate degree in musicology.

MCY 101. The World of Music. 1-3 Credit Hours.
For all new music majors, a novel introduction to music now and then, here and there; its ideas, its relations to other arts, and its role in human life.
...

Typically Offered: Spring.
MCY 121. Hip-Hop History, Culture, and Globalization. 3 Credit Hours.
A critical history and analysis of the hip-hop culture in the U.S. and beyond. The course will cover major historical periods hip-hop in the U.S. beginning in the 1970's through its global impact in the 21st century. The course will also include analysis of technology, gender, race, sexuality, religion and politics related to hip-hop culture.
Requisite: Must not be in School of Music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 124. The Evolution of Jazz. 3 Credit Hours.
A study of the origin, development, and styles of jazz music and its exponents. This course is not for music majors. Music majors should enroll in MSJ 113 and MSJ 213.
Requisite: Must not be in School of Music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 125. African-American Gospel Music. 3 Credit Hours.
This course surveys the stylistic evolution of African-American gospel music from the nineteenth-century folk spiritual to twenty-first century commercial genres. The focus is on the contributions of some of gospel music’s most influential figures, including Thomas Dorsey, Sallie Martin, William Herbert Brewster, Mahalia Jackson, James Cleveland, Shirley Caesar, Andraé Crouch, Fred Hammond, Kirk Franklin, and others.
Requisite: Must not be in School of Music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 127. Evolution of Rock. 3 Credit Hours.
Rock music from its sources to the present. Aural recognition of rock styles and selected performing artists are included. This course is not for music majors. Music majors should enroll in MCY 311.
Requisite: Must not be in School of Music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 131. Understanding Music. 3 Credit Hours.
A general introduction to the musical elements and the history of music from antiquity to the present. Primarily focuses on classical music, but also includes exposure to pop, jazz, and music traditions. This course is not for music majors. Music majors should enroll in MCY 140 and MCY 141.
Requisite: Must not be in School of Music.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MCY 140. Experiencing Music. 3 Credit Hours.
A broad introduction to musical elements, genres, periods, styles, and composers in the jazz, folk, popular, and world music traditions.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 141. European Musical Traditions. 3 Credit Hours.
A broad introduction to musical elements, genres, periods, styles, and composers in the classical music tradition.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 221. Anglo-American Song Traditions. 3 Credit Hours.
A study of the origins, development, and styles of Anglo-American song traditions from English and Irish folk ballads, to shape-note and Sacred Harp hymnody, to early folk, country and bluegrass. Areas to be explored include the development of an American cultural identity and the political and socio-economic influences on the content and musical styles.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MCY 222. African-American Song Traditions. 3 Credit Hours.
A study of the origins, development, and styles of African American song traditions from early plantation songs, shouts, hollers, and spirituals, to the development of blues traditions, to gospel. Areas to be explored include the development of an African American cultural consciousness and the political and socio-economic influences on the content and musical styles.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 311. Modern American Pop Music. 3 Credit Hours.
A study of the development of popular music in the United States from the 1950s to the early 21st century. Explores influential songwriters and performers, as well as the emergence of new technologies and musical styles in their social and cultural contexts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 313. Music of Latin America. 3 Credit Hours.
An introduction to the music of Latin America, with special emphasis on Mexico, Brazil, Argentina, the Andes, and the Caribbean. Covers folk, popular, and classical music traditions. Open to non-music majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MCY 324. Music in Hebrew Culture. 3 Credit Hours.
A study of the folk, traditional, liturgical, and art music of the Jews. Particular attention is given to music on Jewish subjects, music employing traditional Jewish resources, and music by contemporary Jewish and Israeli composers.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 333. Introduction to Cuban Music. 3 Credit Hours.
A survey of Cuban Music from the early European settlement to the present. Course addresses African and Caribbean influences and the amalgamation into new national styles, as well as current musical activity on the island and in expatriate communities.
Prerequisite: MCY 131 or equivalent music course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MCY 335. Music and Peacebuilding: Local and Global Perspectives. 3 Credit Hours.
Introduction to the role of music in conflict prevention and resolution, as well as violence in Miami and across the globe. This is a CIVIC service learning course. Students will work with a local service partner to gain hands on experience in peacebuilding.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 341. Music of the Mediaeval, Renaissance, and Baroque Periods. 3 Credit Hours.
A comprehensive, in-depth study of the musical styles and genres of the Mediaeval, Renaissance, and Baroque Eras., Important musical figures of these periods and analytical studies of important pieces of music from these periods are addressed.
Prerequisites: MTC 140 + 141 + 240 + 241 or Equivalents.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

MCY 342. Music of the Classical, Romantic, and Modern Periods. 3 Credit Hours.
A comprehensive, in-depth study of the musical styles and genres of the Classical, Romantic, and Modern Eras of important musical figures of these periods, and analytical studies of important pieces of music from these periods.
Prerequisites: MTC 140 + 141 + 240 + 241 or Equivalents.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

MCY 493. Special Projects in Musicology. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MCY 494. Special Topics in Musicology. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 520. History and Literature of the Wind Band. 3 Credit Hours.
An historical survey of wind band literature, the evolution of the military band, the wind band, and the wind orchestra.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 521. Symphonic Literature. 3 Credit Hours.
A survey of orchestral music from the end of the seventeenth century to the present.
Requisite: Frost School of Music only Requisite: upperclassmen or permission of instructor Prerequisite: MCY 141 or MCY 342.
Components: LEC.
Grading: GRD.

MCY 522. Operatic Literature. 3 Credit Hours.
The history and literature of opera from the end of the sixteenth century to the present.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 524. Classical Music of the Twentieth and Twenty-First Centuries. 3 Credit Hours.
Music of the 20th and 21st centuries in the Western Art Music tradition, with emphasis on developments since 1945 in Europe and the Americas focusing on modernist, avant-garde, and postmodernist composers and works.
Requisite: Music Majors And Upperclass Status And MCY 141 or MCY 342.
Components: LEC.
Grading: GRD.

MCY 525. Art Song Literature. 3 Credit Hours.
A survey of the solo vocal literature from the 16th century to the present, with particular emphasis on the 19th-century French and German repertoire.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 526. Keyboard Literature I. 3 Credit Hours.
A survey of keyboard literature from its beginning to approximately 1750 emphasizing changes in styles of writing and expression, development of techniques suited to the primary instruments in use (including the early organ, clavichord, harpsichord and fortepiano), ornamentation both specified and improvised, forms, and ideas for interpretation based on historical sources.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 527. Keyboard Literature II. 3 Credit Hours.
A survey of solo keyboard literature from approximately 1750 to the present emphasizing changes in styles of writing and expression, development of technique suited to the primary instruments in use (including the clavichord, harpsichord, fortepiano and modern piano), embellishment both specified and improvised, forms, and ideas for interpretation based on historical sources (including facsimiles, printed scores, written records and sound recordings, particularly those by the composers themselves).
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCY 529. Music of the Baroque Period. 3 Credit Hours.
Literature and history of music from the end of the sixteenth to the middle of the eighteenth centuries.
CRS: Music Majors Only, Upper Class Standing or Permission of Instructor. and Prerequisite: MCY 141 or MCY 342.
Components: LEC.
Grading: GRD.
MCY 530. Music of the Classical Period. 3 Credit Hours.
The musical styles which developed between the mid-eighteenth century and the nineteenth century. 
CRS: Music Majors Only, Upper Class Standing or Permission of Instructor. and Prerequisite: MCY 141 or MCY 342.  
Components: LEC.  
Grading: GRD.  

MCY 532. History of Chamber Music. 3 Credit Hours. 
Styles and forms in chamber music literature from the seventeenth century to the present. 
Requisite: Music Majors Only.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall & Spring.  

MCY 533. Music of the Romantic Period. 3 Credit Hours. 
The musical styles which developed during the nineteenth century.  
CRS: Music Majors Only, Upper Class Standing or Permission of Instructor. and Prerequisite: MCY 141 or MCY 342.  
Components: LEC.  
Grading: GRD.  

MCY 537. Music in the United States. 3 Credit Hours. 
A survey of music in the United States from the 19th century through the 20th century. The course explores some of the diverse ways that peoples from differing backgrounds have created and used music to express notions of themselves, their cultures, and this country.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.  

MCY 538. Music, Gender, and Sexuality. 3 Credit Hours. 
An exploration of music from around the world from the perspective of women. We will examine the roles women have played, and still play, as creators and performers in art music and popular music traditions. Representations of women and gender ideologies will also be discussed.  
Requisite: Upperclass Status or Permission from Instructor.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.  

MCY 540. Music and Religion. 3 Credit Hours. 
Music and Religion are fundamental aspects of human existence, evidence of which goes back some 30,000 years. This seminar course will explore musical and religious experiences in human history and the use of music within major religious traditions. It will include specific study of some of the major monuments of sacred music of the western classical tradition.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.  

MCY 553. Miami's Musical Heritage. 3 Credit Hours. 
A study of the musical traditions and practices of the various cultures that are part of Miami's unique multi-ethnic society.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring & Summer.  

MCY 554. Music Cultures of the World. 3 Credit Hours. 
A study of music culture of the region including the music of folk societies, popular artists, and classical musicians. Open to non-majors.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Offered by Announcement Only.  

MCY 562. Music of Argentina and Brazil.. 3 Credit Hours. 
An in-depth study of Argentine and Brazilian musical cultures covering folk, popular, and classical traditions. Open to non-majors.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Spring.  

MCY 564. Seminar in Latin American Music Collections. 3 Credit Hours. 
Examines Latin American music materials at the Cuban Heritage Collection and Special Collections at the Richter Library. Focuses on interpreting original documents and acquiring archival techniques.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.
MCY 583. History of the American Musical Theatre. 3 Credit Hours.
An examination of the development of musical theatre from its European opera and operetta background to an indigenous American art form. The areas to be explored include the rise and fall of various genre of musical shows, integration of story, song and dance, important producers, directors, lyricists, composers, and new fields such as director-choreographer. The development of an American cultural consciousness and political and socio-economic trends of various decades that greatly influenced the content and form of musical shows is also examined.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCY 593. Special Projects in Musicology. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 594. Special Topics in Musicology. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCY 7. B.A. in Music Forum. 0 Credit Hours.
Forum for this major will provide programs on and discussion of the role of the musical arts in society for people in a wide range of careers.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

B.A.M. Bachelor of Arts in Music

Introduction
The Bachelor of Arts in Music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and pre-legal. A minor outside the Frost School of Music is required. Students in the BA in Music program must earn a minimum 2.5 GPA each semester to remain in the program.

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, a broad education in the liberal arts, and in-depth study in an academic area outside of the Frost School of Music.

Educational Objectives
• Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
• They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
• The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:
1. MCY 341, which will include substantial evaluated and revised writing components.
2. MCY or MTC 300+, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in General Music

Mission

The mission of the Bachelor of Music Degree (BAM) in Music at the Frost School of Music is to 1) provide students the highest quality of education available in their principal academic program as instrumentalists and Vocalists within the areas of Instrumental and Vocal Performance, Commercial Music, Studio Music and Jazz, Composition, Music Education, Music Therapy though the diversity of programs offered at the Frost School of Music; 2) The objective of BAM is to enhance the development of musicianship that could serve as the foundation for graduate degree auditions, national/international competitions, and entry-level careers as musicians; 3) The Bachelor of Arts in Music program also aims to stimulate student awareness and artistic creativity within the fields of music composition as well as music ensemble performance, while providing students public performance opportunities in a supportive and encouraging environment. In addition, the requirement that students acquire a Minor Degree or a second Major within the University of Miami system enables them to present as a musician who excels in another academic area as well. The discipline and academic rigor endemic to achieving excellence in diverse fields equips FROST BAM students to better confront the challenges when entering the competitive professional world of employment as well.

Goals

• Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
• They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
• The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

Student Learning Outcomes

• Students will demonstrate intellectual/scholarly aptitude and oral skills in interdisciplinary discussions.
• Students will demonstrate mastery of their secondary area of study (minor, double major, or dual degree) outside of music and connectivity to their music studies. This includes writing proficiency through PowerPoint and musical aptitude through performance on their primary or secondary instrument.
• Students will be able to improvise and sight-read music in styles outside their normal performance practice. For example, a classical violist improvising over jazz chord charts, or a guitarist in the contemporary program sight reading orchestrated parts to support a soloist. Some students also arrange music for each “jam” session on a volunteer basis (assessed informally).

Minor in General Music

(Audition Required)

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form is available here (https://my.frost.miami.edu/undergraduate/forms/) or in the Office of Undergraduate Studies.

A $350 fee per semester is assessed for private instrument and/or vocal instruction and must be paid prior to enrolling. Please note that private lessons may not be available on all instruments. Studio space varies from year to year.

A music minor requires 15 credit hours, 12 of which must be earned at the University of Miami.

Total Credit Hours: 15

1. Students who receive AP credit for MTC 109 and MTC 110 must complete a minimum of 12 credits towards the Music minor.
2. Lessons are not mandatory for the minor; however, Music electives for the General Music minor are limited to courses for non-majors only unless approved by the FSOM Associate Dean of Undergraduate Studies.

Instrumental Performance (MIP)

Dept. Code: MIP

The Department of Instrumental Performance offers a bachelor of music performance degree and a performer’s certificate in 17 traditional instruments: flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, violin, viola, violoncello, double bass, guitar, and harp.

Bachelor of Music: Instrumental Performance (MIP)

The purpose of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

Educational Objectives

- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

Certificates

- Instrumental Performance (p. 1365)

MIP OB1. Oboe. 2 Credit Hours.

Requisite: Frost School of Music only.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.
MIP 0B3. Oboe. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 1. Brass Forum. 0 Credit Hours.
An informal recital setting and performance class for brass principals and majors with guest and faculty presentations.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MIP 101. Classical Large Ensemble Placeholder. 1 Credit Hour.
Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from your studio professor or Dr. Rob Carnochan.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MIP 102. Classical Chamber Ensemble Placeholder. 1 Credit Hour.
Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from your studio professor.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MIP 120. Class Guitar I for Non-Music Majors. 1 Credit Hour.
Classical Guitar I is a hands-on, introductory course designed to understand the foundations of classical and acoustic guitar music and its different techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 121. Class Guitar I for Jazz Majors. 1 Credit Hour.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 130. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. This class is taught in a workshop format.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 131. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 135. Percussion Contemporary Chamber Music. 1 Credit Hour.
Mandatory for all classical percussionists, this course focuses on the contemporary unconduted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students’ capabilities in contemporary music interpretation and performance.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 138. Trombone Choir. 1 Credit Hour.
The study and performance of literature for small and large trombone ensembles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 140. Flute Choir. 1 Credit Hour.
Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 141. Saxophone Ensemble. 1 Credit Hour.
The study and performance of classical and jazz literature for small saxophone ensembles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 142. Chamber Music Placeholder. 1 Credit Hour.
Temporary placeholder course for student ensemble assignments process. Please note, once you have received your assignment, you will need to drop this course and enroll within the designated course section provided to you.
Requisite: Frost School of Music Students Only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 143. Chamber Music. 1 Credit Hour.
Exploring the chamber music repertoire as represented by various combinations of instruments.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 169. Band of the Hour Pep Band. 1 Credit Hour.
To attain the highest possible performance standard with a diverse and eclectic repertoire of music in the Athletic Band medium. To perform at UM Basketball games, volleyball games, and various community and charity events. Instrumentation will include piccolos, all types of saxophones, Trumpets, F Horns, Trombones, Euphoniums, Tubas, Drum Set, and Electric Bass.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 170. Marching Band. 1 Credit Hour.
The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MIP 171. Symphonic Winds. 2 Credit Hours.
Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 172. University Band. 1 Credit Hour.
University Band is a large ensemble offering students the opportunity to play standard repertoire of the wind band. This group is open to all wind and percussion players throughout the university, regardless of major.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MIP 174. Brass Choir. 1 Credit Hour.
Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 176. Wind Ensemble. 2 Credit Hours.
This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 180. Symphony Orchestra. 2 Credit Hours.
The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified undergraduate students by audition.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 181. Instrumental Conducting I. 2 Credit Hours.
This course provides practical procedures and materials for beginning instrumental conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 182. Instrumental Conducting II. 2 Credit Hours.
This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 190. Symphony Orchestra, Wind Ensemble and Ensemble Ibis. 2 Credit Hours.
Frost Symphony Orchestra (FSO), Frost Wind Ensemble (FWE), and Ensemble Ibis (EI) are the premiere large ensembles that perform significant repertoire for strings, winds, and percussion. They are open to all qualified undergraduate and graduate students at the Frost School of Music and University of Miami by way of a successful audition. Following placement auditions, decisions will be made by the faculty to determine which ensembles each student will be assigned. These decisions will be based on the student's ability and educational need, as well as the need of the specific repertoire programmed for each ensemble throughout the season.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 191. Tuba Ensemble. 1 Credit Hour.
The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 192. Classical Guitar Ensemble. 1 Credit Hour.
This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercises, scales, and diverse repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 2. Guitar Forum. 0 Credit Hours.
An informal recital setting and performance class for guitar principals and majors with guest and faculty presentations.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MIP 220. Class Guitar II for Non-music Majors. 1 Credit Hour.
Classical Guitar II is a hands-on course for students with previous guitar playing experience designed to further explore and understand the guitar, its repertoire, and techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 270. Leadership and Instructional Strategies for Marching Band. 1 Credit Hour.
This one-credit elective course is designed to give practical teaching experience to those undergraduates who are interested in an instructional/leadership position within a Marching Band program. The students learn of the roles and responsibilities of the positions of Drum Major (student conductor), wind and percussion section leaders, and Auxiliary Captain (choreography instructors with the dance line and flag corps). This course involves an extensive series of interactive workshops in which the student leaders/instructors will have the opportunity to teach a vast amount of physical and musical skills.
Prerequisite: MIP 170.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 281. Instrumental Conducting III. 1 Credit Hour.
This course provides a synthesis of the skills demonstrated in Instrumental Conducting I and II while developing error detection skills in common performance errors.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 282. Instrumental Conducting IV. 1 Credit Hour.
Students demonstrate knowledge of instruments, instrumentation of the wind band and orchestra, and analyze scores for conception, interpretation, rehearsal, and performance.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 307. Classical Improvisation. 2 Credit Hours.
Introduce students to the process of improvisation in all styles of classical music.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 308. Skills Lab VI: Composition as Applied Improvisation. 2 Credit Hours.
Moving from the world of improvisation to composition, this course re-focuses musical expression into written form encompassing pre-tonal, tonal and post-tonal techniques through analysis, written improvisation, and model-composition.
Prerequisite: MTC 211 or MTC 240.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MIP 399. Junior Recital. 1 Credit Hour.
A public recital of one half-hour or more. Course is required of all instrumental performance majors.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 407. Basic Conducting and Arranging. 2 Credit Hours.
This course in basic conducting and arranging is designed to acquaint the student by application, with the basic beat, patterns (symmetrical and asymmetrical), preparatory beats, releases, dynamics, fermati, tempo changes, elementary score study and rehearsal techniques. Elements of practical arranging will be explored as students arrange excerpts for their specific skills ensemble that address areas of conducting technique.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 408. Skills Lab VIII: Culminating Project. 2 Credit Hours.
In this class students will create, perform, and produce a culminating concert event that will incorporate all the various skills they have acquired over the course of the Experiential Music Curriculum. The music for this performance will be written (or arranged), played, and conducted by the students in the skills ensemble, and it will require skills in improvisation, technology, and promotion that have been learned in the previous Skills Ensemble classes. The instructor will work in a consultative and guidance role to help the students develop and produce this performance.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
MIP 493. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 494. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 499. Senior Recital. 1 Credit Hour.
A public recital of one hour or more. Required of all performance majors.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 5. Percussion Forum. 0 Credit Hours.
An informal recital setting and performance class for Percussion principals and majors with guest and faculty presentations.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MIP 540. Reed Making and Maintenance for Oboe and Bassoon. 0 Credit Hours.
One Hour weekly class detailing and experiencing the processing of cane and making if reeds for oboe and bassoon, and the maintenance of those instruments.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 541. Bassoon Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the bassoon since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 542. Clarinet Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the clarinet since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 543. Flute Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the flute since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 544. Oboe Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the oboe since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 545. Brass Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of brass instruments since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MIP 546. Percussion Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of percussion instruments since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 547. Saxophone Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the saxophone since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 548. Guitar Repertoire and Pedagogy. 2 Credit Hours.
Solo and small ensemble literature of the guitar since 1600.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIP 549. String Repertoire and Pedagogy. 2 Credit Hours.
An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.
Requisite: Music Majors, Upperclass Status or Permission of Instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 550. Bach Cello Suites. 1 Credit Hour.
The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 580. Orchestral Audition Preparation. 1 Credit Hour.
The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 593. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 594. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 7. String Forum. 0 Credit Hours.
An informal recital setting and performance class for string principals and majors with guest and faculty presentations.
Components: FOR.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 9. Woodwind Forum. 0 Credit Hours.
An informal recital setting and performance class for woodwind principals and majors with guest and faculty presentations.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.
MIP BA1. Bassoon. 2 Credit Hours.
1-hour lesson and 50 minute studio class for bassoon students. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1).
Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BA3. Bassoon. 2 Credit Hours.
Repertoire: Bach, Bozza, Eigar, Jean Jean, Hindemith, Mozart, Flament.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BAD. Bassoon. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierne, Telemann, Vivaldi.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BAS. Secondary Bassoon. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CD1. Conducting. 2 Credit Hours.
1-hour lesson and 50 minute studio class for conducting students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CD3. Conducting. 2 Credit Hours.
1-hour lesson and 50 minute studio class for conducting students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CDC. Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CDD. Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CDF. Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP CDG. Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CDH. Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CDS. Secondary Conducting. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CL1. Clarinet. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CL2. Clarinet. 2 Credit Hours.
1-hour lesson and 50 minute studio class for clarinet students. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18 Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLC. Clarinet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLD. Clarinet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLF. Clarinet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18 Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP CLG. Clarinet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLH. Clarinet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLS. Secondary Clarinet. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DB1. Double Bass. 2 Credit Hours.
1-hour lesson and 50 minute studio class for double bass students. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DB3. Double Bass. 2 Credit Hours.
1-hour lesson and 50 minute studio class for double bass students. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBC. Double Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBD. Double Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBF. Double Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBG. Double Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP DBH. Double Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBS. Secondary Double Bass. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU1. Euphonium. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU2. Euphonium. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU3. Euphonium. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU4. Euphonium. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU5. Euphonium. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU6. Euphonium. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP EUS. Secondary Euphonium. 1 Credit Hour.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FH1. French Horn. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FH3. French Horn. 2 Credit Hours.
1-hour lesson and 50 minute studio class for French horn students. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHC. French Horn. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHD. French Horn. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Continue transposition study. Further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Rachmaninoff, Glazounov.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHF. French Horn. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHG. French Horn. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP FHH. French Horn. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHS. Secondary French Horn. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FL1. Flute. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FL3. Flute. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLC. Flute. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Andersen, Op. 41; Moyse - De la Sonorite, Tone Development through Interpretation. Repertoire: Telemann Fantasies, CPE Bach Sonata, Faure Fantasie Chaminade Concertino.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLD. Flute. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLF. Flute. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP FLG. Flute. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLH. Flute. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLS. Secondary Flute. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUJ. Guitar. 2 Credit Hours.
1-hour lesson and 50 minute studio class for guitar students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GU3. Guitar. 2 Credit Hours.
1-hour lesson and 50 minute studio class for guitar students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUC. Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUD. Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUF. Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP GUG. Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUH. Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUS. Secondary Guitar. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HA1. Harp. 2 Credit Hours.
1-hour lesson and 50 minute studio class for harp students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HA3. Harp. 2 Credit Hours.
1-hour lesson and 50 minute studio class for harp students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAC. Harp. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAD. Harp. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAF. Harp. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAG. Harp. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP HAH. Harp. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAS. Secondary Harp. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBC. Oboe. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBF. Oboe. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBG. Oboe. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBH. Oboe. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBS. Secondary Oboe. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP PE1. Percussion. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PE2. Percussion. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PE3. Percussion. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PEC. Percussion. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PED. Percussion. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PEG. Percussion. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced technical etudes and repertory on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final recital has to be a concerto-like composition performed with piano or percussion ensemble.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PEH. Percussion. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced technical etudes and repertory on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final recital has to be a concerto-like composition performed with piano or percussion ensemble.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP PES. Secondary Percussion. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SA1. Saxophone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for saxophone students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SA3. Saxophone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for saxophone students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAC. Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAD. Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAF. Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAG. Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAH. Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAS. Secondary Saxophone. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP TB1. Trombone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for trombone students. Technical Requirements: Development of embouchure, breathing, articulation, sound, and slide technique. Appropriate major and minor scales. Works by Arban, Blazhevich, Pares, Rochut, Tyrell, and others. Solo literature as appropriate for the student's abilities.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TB3. Trombone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for trombone students. Technical Requirements: Continuation of technical development including upper register, advanced slide technique, and refined articulation. Works as previously listed, followed by Masson and Bitsch. Solo literature as appropriate for the student's abilities, and continuation of selected orchestral excerpts.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TBC. Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of previous aspects of technical development. Works as previously listed, followed by Blume, and solo literature as appropriate for the student's abilities. Introduction of orchestral excerpts as both literature and as an aid to technical and musical development.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TBF. Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of technical development including upper register, advanced slide technique, and refined articulation. Works as previously listed, followed by Masson and Bitsch. Solo literature as appropriate for the student's abilities, and continuation of selected orchestral excerpts.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TBG. Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of all technical aspects of performance. Works by Masson and Bitsch, and solo literature geared towards recital performance.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP TBS. Secondary Trombone. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, articulation, sound, and slide technique. Appropriate major and minor scales. Works by Arban, Blazhevich, Pares, Rochut, Tyrell, and others. Solo literature as appropriate for the student's abilities.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TP1. Trumpet. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TP3. Trumpet. 2 Credit Hours.
1-hour lesson and 50 minute studio class for trumpet students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPC. Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPD. Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPF. Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPG. Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPH. Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TPS. Secondary Trumpet. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Clarke, Hering, Schlossberg; orchestral excerpts.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP TUA. Tuba. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUB. Tuba. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUC. Tuba. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Vasiliev, Kopprash, Gallay, Frankenpohl, Nelhybel, Bernstein. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUD. Tuba. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Vasiliev, Kopprash, Gallay, Frankenpohl, Nelhybel, Bernstein. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUE. Tuba. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Cimera, Maenz, Broughton, Persichetti, orchestral excerpts. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUG. Tuba. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Cimera, Maenz, Broughton, Persichetti, orchestral excerpts. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUA. Secondary Tuba. 1 Credit Hour.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP VA1. Viola. 2 Credit Hours.
1-hour lesson and 50 minute studio class for viola students. Technical Requirements: Right hand and left hand position evaluation and adjustment if necessary. Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VA3. Viola. 2 Credit Hours.
1-hour lesson for students enrolled for 2-4 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAC. Viola. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAD. Viola. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAF. Viola. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAG. Viola. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAH. Viola. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major. Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAS. Secondary Viola. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Right hand and left hand position evaluation and adjustment if necessary. Scales and etudes as assigned. Repertoire: Solo literature appropriate for level and major.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP VC1. Violoncello. 2 Credit Hours.
1-hour lesson and 50 minute studio class for violoncello students. Technical Requirements: Development of basic bow strokes, vibrato, and position changes. Appropriate major scales and arpeggios. Etudes as needed. Repertoire: Vivaldi Sonatas, Saint-Saens Concerto, Hayden C Major Concerto, Beethoven Sonata 1 or 2, Bach Suite 1 or 2.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VC3. Violoncello. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VCC. Violoncello. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: All major and minor scales and arpeggios. Etudes as needed. Repertoire: Lalo Concerto, Boccherini B-flat, Beethoven or Brahms Sonatas, Bach Suite No. 3.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VCD. Violoncello. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: All major and minor scales and arpeggios. Etudes as needed. Repertoire: Lalo Concerto, Boccherini B-flat, Beethoven or Brahms Sonatas, Bach Suite No. 3.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VCF. Violoncello. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of basic bow strokes, vibrato, and position changes. Appropriate major scales and arpeggios. Etudes as needed. Repertoire: Vivaldi Sonatas, Saint-Saens Concerto, Hayden C Major Concerto, Beethoven Sonata 1 or 2, Bach Suite 1 or 2.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VN1. Violin. 2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP VN3. Violin. 2 Credit Hours.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNC. Violin. 1-2 Credit Hours.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VND. Violin. 1-2 Credit Hours.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNF. Violin. 1-2 Credit Hours.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNG. Violin. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Schradieck School of Technic, Sevcik Shifting Studies, Sevcik Trill Studies. Repertoire: J. S. Bach, Beethoven, Ysaye, Franck, Faure, Paganini, Brahms, Bartok.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNH. Violin. 1-2 Credit Hours.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNS. Secondary Violin. 1 Credit Hour.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

B.M. in Instrumental Performance
Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.
All Instrumental Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MIP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MIP 541-549 Pedagogy and Repertoire, which will include discipline specific communication skills.

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Curriculum Requirements**

Advanced Writing and Communication Skills (3 courses) see description below

Total General Education credits = 27

**Experiential Music Curriculum Core Courses MIP**

Complete 8 semesters of one of the following:

MIP 1    Brass Forum          0
MIP 2    Guitar Forum          0
MIP 5    Percussion Forum      0
MIP 7    String Forum          0
MIP 9    Woodwind Forum        0
MIP XX1 (Level 1) Principal Instrument Lesson & Studio Class (semesters 1-4, 2 credit hours) 8
MIP XX3 (Level 3) Principal Instrument Lesson & Studio Class (semesters 5-6, 2 credit hours) 4
MTC 140 & MTC 107 Experiential Musicianship I and Skills Lab I 4
MTC 141 & MTC 108 Experiential Musicianship II and Skills Lab II 4
MTC 240 & MTC 207 Experiential Musicianship III and Skills Lab III 4
MTC 241 & MTC 208 Experiential Musicianship IV and Skills Lab IV 4
MKP 140   Keyboard Studies I      1
MKP 141   Keyboard Studies II     1
MCY 140   Experiencing Music      3
MCY 341   Music of the Mediaeval, Renaissance, and Baroque Periods (AWC) 3
MMI 250   Essential Technologies for Musicians 3
MMI 310   Music Business and Entrepreneurship for Musicians 3
MIP XXX   Large Ensembles (3 semesters of 1 credit hour) 3
MIP XXX   Chamber Ensembles (3 semesters of 1 credit hour) 3

**Courses in the MIP Major**

MIP XX3 (Level 3) Principal Instrument Lesson & Studio Class (semesters 7-8, 2 credit hours) 4
MIP XXX    Large Ensembles (5 semesters of 1 credit hour) 5
MIP XXX  Chamber Ensembles (5 semesters of 1 credit hour)  5
MIP 307  Skills Lab V: Classical Improvisation  2
MIP 308  Skills Lab VI: Composition as Applied Improvisation  2
MIP 407  Skills Lab VII: Basic Conducting/Arranging  2
MIP 408  Skills Lab VIII: Culminating Project  2
MKP 240  Keyboard Studies III  2
MKP 241  Keyboard Studies IV  2
MTC 311  Analysis and Experience  3
MTC 312  20th and 21st Century Techniques  3
MTC 313  18th Century Counterpoint  3
MTC 416  Orchestration  3
MCY 342  Music of the Classical, Romantic, and Modern Periods  3
Complete exactly one of the following:  2
MIP 541  Bassoon Repertoire and Pedagogy (AWC)
MIP 542  Clarinet Repertoire and Pedagogy (AWC)
MIP 543  Flute Repertoire and Pedagogy (AWC)
MIP 544  Oboe Repertoire and Pedagogy (AWC)
MIP 545  Brass Repertoire and Pedagogy (AWC)
MIP 546  Percussion Repertoire and Pedagogy (AWC)
MIP 547  Saxophone Repertoire and Pedagogy (AWC)
MIP 548  Guitar Repertoire and Pedagogy (AWC)
MIP 549  String Repertoire and Pedagogy (AWC)
Non-Music Elective  3
Total Credit Hours  121

1  EMC core courses require a grade of "C" or higher. Lessons require a grade of "B-" or higher.

### B.M. in Instrumental Performance
Mission
The mission of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

Goals
- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

Student Learning Outcomes
- Students will develop instrumental Technique necessary for acceptance into elite level graduate study institutions and for fostering a professional career as classical instrumentalists.
- Students will develop instrumental Expression necessary for acceptance into elite level graduate study institutions and for fostering a professional career as classical instrumentalists.
- Students will develop effective Communication skills related to performance and pedagogy through effective writing or presentation. These skills are necessary for acceptance into elite level graduate study institutions and for fostering a professional career as classical instrumentalists.

Certificate in Instrumental Performance
Audition Required—Music Majors Only
Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV.

Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty.

The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

** This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

The Department of Keyboard Performance offers a bachelor of music performance degree and a performer's certificate in piano. It is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study.

**Bachelor of Music: Keyboard Performance (MKP)**

The purpose of the Bachelor of Music in Keyboard Performance Degree: A degree from the Frost School of Music in Keyboard Performance will ensure a broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers.

**Educational Objectives**

Private lessons are taught with individual student goals in mind, and direction in academics and career pursuits are a priority for the entire faculty. We take pride in the reputation of our keyboard faculty for not only their distinguished concert careers, but also their dedication as inspiring teachers and mentors.

**Certificates**

- Keyboard Performance (p. 1376)

**MKP 0R1. Organ. 2 Credit Hours.**

Requisite: Frost School of Music only.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

**MKP 0R3. Organ. 2 Credit Hours.**

Requisite: Frost School of Music only.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

**MKP 111. Non-Major Class Piano I. 1 Credit Hour.**

This course is designed for the adult beginner who has an interest in playing keyboard instruments for pleasure. Students with no previous musical or keyboard experience learn the fundamentals of music theory and apply them to playing the keyboard at the beginning level.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

**MKP 112. Non-Major Class Piano II. 1 Credit Hour.**

Designed for the adult beginner who has an interest in playing keyboard instruments for pleasure, this course builds on the concepts introduced in MKP 111. Students continue to learn the fundamentals of music theory and apply them to playing the keyboard.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.
MKP 140. Keyboard Studies I. 1 Credit Hour.
Major and minor five finger patterns, beginning repertoire, major scales and arpeggios, basic chord progressions, for types of triads, dominant seventh chords, beginning sight reading, harmonization, transposition, and improvisation skills.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MKP 141. Keyboard Studies II. 1 Credit Hour.
Minor scales and arpeggios, modal scales, five types of seventh chords and inversions, and more extensive chord progressions. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MKP 185. Musical Theatre Accompanying. 1 Credit Hour.
A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 186. Vocal Accompanying I. 1 Credit Hour.
Pianists will attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 187. Vocal Accompanying II. 1 Credit Hour.
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 189. Accompanying, Level I. 1 Credit Hour.
Development of sightreading skills and score preparation.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 190. Accompanying, Level II. 1 Credit Hour.
Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 191. Accompanying, Level III. 1 Credit Hour.
Progressive development of all types of accompaniment skills including; clef and score reading, transposition; possible recital, opera theater, choral ensemble, and/or orchestral accompanying.
Prerequisite: MKP 190.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP 220. Computers, Keyboards, and Music. 2 Credit Hours.
An introduction to basic computing skills for the musician that explores computers, keyboards, and other MIDI- (Musical Instrument Digital Interface) related instruments as tools for the musician. Topics include electronic keyboards, computer hardware and software, MIDI sequencing, computer-assisted musical notation, and teaching strategies using new technologies. Students gain hands-on experience while completing projects in each of the above areas.
Prerequisite: MKP 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 240. Keyboard Studies III. 2 Credit Hours.
Dominant seventh arpeggios, secondary dominates, and work more extensively with chord progressions. Students also learn Theme and Variation form, Sonata form, and characteristics of the musical style periods. Study of repertoire and the development of sight-reading, harmonization, and the improvisation skills are continued. Transposition of instrumental music to concert pitch, and beginning choral and instrumental score reading are introduced. Students will continue playing major and minor scales at an increased level of difficulty.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MKP 241. Keyboard Studies IV. 2 Credit Hours.
Diminished seventh arpeggios, augmented, and Neapolitan sixth chords, Three-Part Rondo forms, extended chord structures, and a variety of chord Progressions that modulate. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued. Choral and instrumental score reading, modal scales, and major and minor scales are performed at an increased level of difficulty.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MKP 399. Junior Recital. 1 Credit Hour.
A public recital of one half-hour or more. Course is required of all performance majors.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 493. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 494. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 499. Senior Recital. 1 Credit Hour.
A public recital of one hour or more. Course is required of all performance majors.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 547. Keyboard Pedagogy. 3 Credit Hours.
Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MKP 548. Intermediate to Advanced Repertoire. 3 Credit Hours.
A class dedicated to a survey and discussion of a wide range of teaching materials including teaching exercises, etudes, and performance literature, both well-known and underappreciated. Topics include reference literature and web resources, piece assigning considerations and leveling, and detailed discussion of selected materials with specific teaching and remedial strategies. Annotated bibliography with MIDI-file attachments of incipits to be submitted at the end of the semester for a grade.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKP 549. Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics. 3 Credit Hours.
1st class of each week: round-table discussion of private teaching strategies using video taped performance excerpts of students at various levels.
2nd class of each week: a focus on a wide range of teaching repertoire covering intermediate to advanced levels with an emphasis on problem prevention and solving.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 550. Keyboard Pedagogy III: Practice Strategies. 3 Credit Hours.
Focus on practice strategy at the keyboard using Philip Johnston’s Practice Revolution as a springboard for discussion. Topics also include recent findings and leading researchers in cognitive neuroscience and “brain-based learning,” as well as resources available for musician wellness and injury prevention.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 589. Keyboard Accompanying Program in Salzburg, Austria. 0 Credit Hours.
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).
Requisite: Frost School of Music only.
Components: LEC.
Grading: AUD.
Typically Offered: Spring.

MKP 593. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 594. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 6. Piano Forum. 0 Credit Hours.
A non-credit performance class for all piano majors and principals. Majors are required to perform once each semester with the approval of the applied teacher.
Requisite: Frost School of Music only.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MKP HC1. Harpsichord. 2 Credit Hours.
1-hour lesson and 50 minute studio class for harpsichord students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP HC3. Harpsichord. 2 Credit Hours.
1-hour lesson and 50 minute studio class for harpsichord students
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCC. Harpsichord. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCD. Harpsichord. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCF. Harpsichord. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCG. Harpsichord. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCH. Harpsichord. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCS. Secondary Harpsichord. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORC. Organ. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORD. Organ. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique, Pedal Exercises and Scales. Repertoire: Gleason, Method of Organ Playing: selected Compositions for Manuals and Pedals; intermediate-level works by Bach, Mendelssohn, Franck, and others; Additional hymn playing techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP ORF. Organ. 1-2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORG. Organ. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORH. Organ. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Nilson, A System of Technical Studies in Pedal Playing for the Organ; selected exercises. Repertoire: Selected works by composers from all style periods, with an emphasis on the French Romantic and Modern French schools. Advanced service-playing techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORS. Secondary Organ. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PI1. Piano. 2 Credit Hours.
1-hour lesson and 50 minute studio class for piano students. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PI3. Piano. 2 Credit Hours.
1-hour lesson and 50 minute studio class for piano students. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIC. Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP PID. Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIF. Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Junior Recital as required. Repertoire: Appropriate repertoire as required. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIG. Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIH. Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Complete Senior Recital as required. Repertoire: Appropriate repertoire as required. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIS. Secondary Piano. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: To show a comprehensive foundation in basic/advanced keyboard skills. Repertoire: Appropriate repertoire as required. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

B.M. in Keyboard Performance
Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All keyboard performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MKP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MKP 547 Keyboard Pedagogy, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### Mission

The mission of the Bachelor of Music degree in Keyboard Performance is to:

- Provide students the highest quality of education available in the areas of piano performance and musicianship that will provide the foundation for a successful teaching career at an institution or private studio, and which could also lead toward a professional performance career as a classical pianist
- Stimulate the student’s awareness and artistic creativity in the field of piano performance
- Provide students public performance opportunities in a supportive and encouraging environment
- Provide students performance skills necessary for careers in teaching, success at national/international piano competitions, and to further their skills in performance
- Provide students a learning environment for developing as performing musicians
- Instruct students in developing their playing technique, musical knowledge, and performing personalities in order for them to share these insights with their future students
- Introduce and educate students in the vast amount of literature available for the classical piano

### Goals

#### Student Learning Outcomes

- Students will develop solid memorization skills necessary to achieve a higher success rate at graduate auditions and other important performance settings. By acquiring such skills, students will develop greater freedom in performance and interpretive expression as well as a deeper understanding of the pianistic repertoire.
- Students will develop technical pianistic skills necessary for acceptance into a variety of graduate study institutions offering a MM in performance and for fostering a professional career as solo pianists.
- Students will develop musicianship skills and knowledge of a large selection of the piano repertory necessary for acceptance into a variety of graduate study institutions offering a MM in performance and for fostering a professional career as solo pianists.

### Certificate in Keyboard Performance

#### Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV.

Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty.

The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.
* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

** This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

### Music Education and Music Therapy (MED) & (MTY)

Dept. Code: MED

The Department of Music Education and Music Therapy offers two degree programs,

- Music Education (MED)
- Music Therapy (MTY).

**MED 10. Mus Therapy Forum. 0 Credit Hours.**
The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music therapy as a field of study and as a profession.

Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

**MED 149. Functional Techniques in Music Therapy I. 2 Credit Hours.**
Students acquire functional guitar skills while learning repertoire and techniques for leading and accompanying music therapy experiences.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**MED 15. Mus Edu Forum. 0 Credit Hours.**
The course provides a weekly forum for sharing information about issues, current developments, and other matters related to music education as a field of study and as a profession. The course is required for all undergraduate MED majors during each semester, except during the semester of the internship. Components: FOR.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

**MED 159. Introduction to Music Therapy. 3 Credit Hours.**
An overview of the field of music therapy, including history, theory and clinical practice. Includes field observations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MED 240. Woodwind Techniques. 1 Credit Hour.**
Course provides group instruction in woodwind instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MED 241. Brass Techniques. 1 Credit Hour.
Group instruction in brass instruments with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 242. Percussion Techniques. 1 Credit Hour.
Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 243. String Techniques. 1 Credit Hour.
Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drum set, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 244. Vocal Techniques. 1 Credit Hour.
Class instruction in fundamentals of singing, breath control, tone production, and solo singing for music majors.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 245. Folk and Modern Instrumental Techniques. 1 Credit Hour.
Group instruction in folk and modern instruments, including but not limited to guitar, ukulele, recorder, and drums, with emphasis on basic skills of performance and classroom uses, as well as the appropriate teaching techniques, methods, and materials.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 249. Functional Techniques in Music Therapy II. 2 Credit Hours.
Students acquire functional piano skills while learning repertoire and techniques for leading and accompanying music therapy experiences. Vocal skills are also emphasized.
Prerequisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MED 259. Music Therapy Pre-Practicum. 2 Credit Hours.
Students will learn a treatment-planning model for clinical practice. Topics include: assessment, goal setting, intervention design and data collection.
Prerequisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 340. Marching Band Fundamentals. 1 Credit Hour.
A study of all types of marching band activities and methods of presentation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 359. Music Therapy Practicum 1A. 2 Credit Hours.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 1A practicum is to observe and assist the on-site music therapist and to engage in limited co-leading.
Prerequisite: MED 259.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
MED 360. Music Therapy Practicum 1B. 2 Credit Hours.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 1B practicum is to observe and assist the on-site music therapist and to co-lead for half of all sessions.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall.

MED 361. Music Therapy Practicum 2A. 2 Credit Hours.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 2A practicum is to observe and assist the on-site music therapist and to co-lead for 60% of all sessions.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 362. Music Therapy Practicum 2B. 2 Credit Hours.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 2B practicum is to observe and assist the on-site music therapist and to co-lead for 75% of all sessions.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 363. Music Therapy Practicum 3A. 2 Credit Hours.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 3A practicum is to independently design and lead all sessions.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 364. Music Therapy Practicum 3B. 1 Credit Hour.
Structured clinical experience in music therapy under supervision of a music therapist in varying health-related settings. Focus of the 3B practicum is to independently design and lead all sessions.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 430. Teaching Jazz/Popular Music in Secondary Schools. 2 Credit Hours.
A survey of materials, methods, and techniques for instructing jazz and popular music in secondary schools. Review of standard literature, program organization, and in-class performance is emphasized. Designed specifically for music education majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 433. Seminar for Teaching Associates.. 2 Credit Hours.
Discussion of teaching, rehearsal techniques, and the organization and presentation of music materials related to the internship experiences. Course is required of all Music Education majors. To be taken in conjunction with Internship, MED 471.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 471. Internship in Music Education (Elementary School). 6 Credit Hours.
A comprehensive program in observation and supervised teaching in an elementary school music setting for a full semester under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 473. Internship in Music Education (Secondary School). 6 Credit Hours.
A comprehensive program in observation and supervised teaching in an elementary school music setting for a full semester under the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
MED 475. Internship in Music Education. 12 Credit Hours.
A comprehensive program in observation and supervised teaching in elementary, middle, or secondary school music settings for a full semester under
the guidance of school and university personnel.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 493. Special Projects in Music Education and music therapy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating
project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MED 494. Special Topics in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MED 542. Teaching General Music (K-5). 3 Credit Hours.
Curriculum, methods, and materials designed for elementary music, K-6. Observation, planning, and teaching experience are emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 543. Teaching Instrumental Music. 3 Credit Hours.
A study of elementary and secondary instrumental music instruction including program organization, teaching techniques, materials, and field
experiences of music instruction in schools.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 544. Teaching Modern Music (7-12). 3 Credit Hours.
This course will provide students with fundamentals of teaching vocal music at the secondary (middle and high school) level. Focus will be placed
on presenting effective and ethical instruction to all learners; developing a foundation of appropriate pedagogy and practice; building strategies for
classroom management; and working in diverse populations. Students will be guided through activities and materials necessary for a successful
student teaching experience in vocal music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 545. Music in Rehabilitation. 3 Credit Hours.
Review of development and functioning for neurologically-based sensorimotor behavior. Survey of disabilities and diseases that typically result in
sensorimotor deficits is deficits is included. Demonstration and practice of therapeutic techniques for sensorimotor deficits are also covered.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 546. Music in Psychotherapy. 3 Credit Hours.
Survey and practical application of music as therapy in the treatment of psychiatric disorders and in promoting mental health.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 548. Music for Special Learners. 3 Credit Hours.
This course is designed for music educators who will be working in schools with children and youth who have various disabilities. The purpose of this
course is to acquaint students with the characteristics of children and youth with disabilities, and introduce adaptive strategies in music education,
K-12, for instructing children and youth with disabilities.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MED 549. Teaching Vocal Music. 3 Credit Hours.
This course will provide students with fundamentals of teaching general music at the secondary (middle and high school) level. Focus will be placed on developing 21st Century musical curricula across a variety of musical disciplines; engaging students through several instructional paradigms; and for presenting instruction using conventional educational strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 551. Music Therapy Research Methods. 3 Credit Hours.
This course is designed to help music therapy students: 1) integrate research findings into their clinical and/or educational practice, 2) implement research techniques into their work (e.g., through data collection or scholarly writing), and 3) become familiar with research procedures.
Components: LEC.
Grading: GRD.

MED 559. Internship in Music Therapy. 3 Credit Hours.
Course provides students with a six month opportunity as a music therapy intern in an approved training facility.
Components: PRA.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

MED 560. Internship in Music Therapy II. 0 Credit Hours.
This Course provides students with a six month opportunity as a music therapy intern in an approved training facility.
Components: PRA.
Grading: CNC.
Typically Offered: Fall, Spring, & Summer.

MED 562. Psychology of Music I. 3 Credit Hours.
Psychological foundations of music with an emphasis on problems of perception, experimental esthetics, functional music, and measurement and diagnosis of musical ability and achievement. Related literature of experimental investigation is reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 575. Preschool Music Workshop. 1-3 Credit Hours.
Workshop is designed to prepare class members to initiate, administer, and teach music programs for preschool children. Materials which address the teacher, the child, and the parent are used. The daily schedule includes demonstration classes with children, lectures, and active participation of and discussion with class members. Emphasis is placed on working with a planning guide for teachers which offers articles on the major areas of the curriculum and clear, succinct statements focusing on the central issues of each lesson.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 576. Music and Development. 3 Credit Hours.
Review of development in cognitive, communication, and musical domains. Survey of developmental disabilities most commonly found in child populations is included as well as demonstration and practice of therapeutic techniques for cognitive and communication deficits.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 581. Teaching Classroom Guitar I. 2 Credit Hours.
This class is designed for students and teachers, guitarist or non-guitarist, who wish to initiate, enhance, and teach guitar in a multi-level classroom setting. The course includes demonstration classes with elementary and secondary students. Topics include organization and teaching performance materials in a hands-on setting.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MED 593. Special Projects in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
B.M. in Music Education with Minor in Education

Introduction

The Bachelor of Music in Music Education with Minor in Education degree program prepares undergraduate music students to become outstanding music educators who are certified by the Florida Department of Education (FL-DOE) to teach music in the schools of Florida and, through reciprocity agreements with other state DOEs, throughout the United States. A basic premise of the Bachelor of Music Education degree program is that music teachers must be both strong musicians and skilled educators; thus, competency as a performing and creating musician is as important as having strong foundations in pedagogy (both theory and practice).

We believe our series of music education techniques and methods courses provide students with a broad foundation in teaching music through the lifespan (childhood through adulthood), as well as across a wide array of educational settings and musical contexts. This sequence incorporates ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. We also believe that students must be able to build themselves to meet their professional goals by developing a specialization in an area of music teaching through music education emphasis area electives.

Program Goals

• Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
• Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
• Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
• Help students develop skills in integrating information from the diverse professional literature into their teaching.

Educational Objectives

• Students must demonstrate generic competencies required by the university in general education courses.
• Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
• Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree.
• Students must demonstrate teaching competencies related to the core courses in the music education.

The Music Education curriculum is designed to prepare students to teach music in a wide array of contexts, including (K-12) public & private schools. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and to graduate.

All students must develop knowledge of and performance ability on wind, string, and percussion instruments as well as, vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

MED 594. Special Topics in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
Admission to Teacher Candidacy

1. Acceptance as a major in the music education program.
3. Completion of 45 credit hours. (Transfer students must have at least 12 credit hours earned at the University of Miami.)
4. Successful completion of TAL 305 and TAL 404 (C or higher).
5. No grade less than a C in TAL & MED courses.
6. 2.5 minimum GPA in music courses.
7. Required Background Check completed through Miami-Dade Public Schools Office.
8. Completion of a successful Field Experience Requirement.

Admission to Student Teaching

1. Approval of MED faculty members.
2. Completion of 90 credit hours.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Admission to Teacher Candidacy through the Undergraduate Associate Dean’s Office in the School of Education & Human Development.
5. Completion of a C or better in all MED & TAL courses
6. 2.5 minimum GPA in TAL and music courses.
7. Completion of pre-internship field experiences with above-average evaluations.

**Total Credit Hours** 127-128

---

1. **MED, TAL and EMC courses require a grade of “C” or higher. Lessons require a grade of “B-” or higher.**

2. **MED 475 Internship in Music Education (12 credits) can be substituted for MED 471 & MED 473**
Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Education students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MED 471 & MED 473 Internship in Music Education (Elementary & Secondary) or MED 475 Internship in Music Education, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 542 Teaching General Music, one required course in their major which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Mission

The mission of the Bachelor of Music degree program in Music Education at the Frost School of Music is to:

- Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
- Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
- Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
- Help students develop skills in integrating information from the diverse professional literature into their teaching.

Goals

- Students must demonstrate generic competencies required by the university in general education courses.
- Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
- Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree.
- Students must demonstrate teaching competencies related to the core courses in the music education.

Student Learning Outcomes

- Students in the Bachelor of Music Education program will demonstrate the ability to plan effective instruction.
- Students in the Bachelor of Music Education program will demonstrate the ability to deliver effective instruction.
- Students in the Bachelor of Music Education program will demonstrate effective communication and writing skills.
B.M. in Music Therapy with Minor in Psychology

Introduction

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

Educational Objectives

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.
- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.
- Knowledge of Music Therapy: students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practice in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from music therapy faculty member.

The Music Therapy Equivalency Program

The equivalency program is designed for the individual who has already completed a bachelor's degree in a related discipline, including the following courses:

- Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (6 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA). For students wishing to pursue graduate studies in music therapy, the equivalency program can be combined with the master's degree in music therapy.

Total credits for courses in the major = 58

Total Credit Hours: 124-125

1. EMC and MED courses require a grade of "C" or higher. Lessons require a grade of "B-" or higher.

2. Students enrolling in MED 560 Music Therapy Internship II are considered full-time. Health insurance is mandatory. International students must apply for CPT (Curricula Practical Training). This course confers full-time status for undergraduate students and fulfills a degree requirement for the Bachelor of Music Therapy degree program.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Therapy students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MED 363 Senior Practicum, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 551 Music Therapy Research Methods, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

---

*Students enrolling in MED 560 Music Therapy Internship II are considered full-time. Health insurance is mandatory but can be waived depending on visa status. International students must apply for CPT (Curricula Practical Training). This course confers full-time status for undergraduate students and fulfills a degree requirement for the Bachelor of Music Therapy degree program.*
Mission

The mission of the Bachelor of Music degree program in Music Therapy at the Frost School of Music is to prepare students to develop: a) advanced and functional musicianship, b) music therapy clinical knowledge, and c) music therapy clinical skill. The preparation of students’ academic, professional, and interpersonal therapeutic abilities will satisfy the required standards of practice of an entry level practitioner as required by the American Music Therapy Association. The Frost program seeks to recruit and retain highly qualified students to study and gain entry-level clinical skill for music therapy practice and employment and to prepare them for graduate study.

Goals

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.
- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.
- Knowledge of Music Therapy: students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context. Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practica in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from music therapy faculty member.

Student Learning Outcomes

- Students will demonstrate functional music skills for clinical practice.
- Students will demonstrate effective treatment planning to include assessment of various diagnoses, setting of goals and objectives, designing therapeutic music experiences, accurate data collection of behavior, and ability to articulate client progress through both verbal and written means.
- Students will demonstrate effective clinical practice skills including the ability to facilitate client response through appropriate music interventions.

Music Media and Industry (MMI)

Department code: MMI.

The Department of Music Media and Industry offers degree programs in the following areas:

- B.M. in Music Business Entertainment Industries with a Business, Communications, or Entertainment-Related Minor.
- B.M. in Musicianship, Artistry Development, and Entrepreneurship with a Minor in Music Business and Entertainment Industries.
- B.M. in Professional Studies
- B.S. in Music Engineering Technology with a Minor in Computer or Electrical Engineering
- B.M. in Media Writing and Production

Minors

- Creative American Music Minor (p. 1449)
- Media Writing and Production Minor (p. 1450)
- Music Business and Entertainment Industries Minor (p. 1450)

MMI 102. Record Company Practicum. 1 Credit Hour.
The course focuses on practical techniques and procedures employed by record companies.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 107. Skills Lab I. 1 Credit Hour.
A Contemporary Performance musical skills ensemble focusing on ear training, transcription, notation, and interactive musicianship for songwriters.
Co-Requisite: MMI 140 must pass with a 2.0.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.
MMI 108. Skills Lab II. 1 Credit Hour.
A Contemporary Performance musical skills ensemble focusing on ear training, transcription, notation, and interactive musicianship for songwriters.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 13. Music Engineering Forum. 0 Credit Hours.
A weekly forum for all Music Engineering Technology and Audio Engineering majors, both undergraduate and graduate. Presentations include faculty lectures, guest lectures by industry professionals, as well as dissemination of information pertaining to audio studios and laboratories.
Requisite: Plan of Music Engineering.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MMI 139. Small Contemporary Ensemble. 1 Credit Hour.
A performing ensemble of student-generated contemporary musical repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 14. Music Industry Forum. 0 Credit Hours.
A weekly forum for all Music Industry majors, both graduate and undergraduate, for the purpose of updating current teaching material with the latest developments, presentations of guest speakers from the industry, lectures, and reports from faculty on current employment opportunities.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MMI 140. Experiential Musicianship I. 3 Credit Hours.
The first of a two-course sequence in music theory, with an overall focus on musicianship for the Contemporary Music student. The course emphasizes theoretical and analytical skills, as well as the connection between analysis and other musical experiences in listening and performance. The student will display a written understanding of the basic building blocks of music, through its more advanced constructions and functions.
Corequisite: MMI 107.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 141. Experiential Musicianship II. 3 Credit Hours.
MMI 141 is the second in a two-course sequence in music theory and musicianship for the Contemporary Music Student. As with MMI 140, the course emphasizes analytical skills and the connections between analysis and other musical experiences in listening and performance.
Pre-requisite: MMI 140 And Co-requisite: MMI 108 must pass with 2.0.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 15. Made Forum. 0 Credit Hours.
The course provides a weekly forum for sharing information about issues, current developments, and other matters related to the contemporary music industry as a field of study and as a profession. The course is required for all undergraduate MADE majors during each semester.
Requisite: Must have a Plan of MADE.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MMI 151. Desktop Audio Production. 3 Credit Hours.
Introduction to MIDI technology and computer based tools for music production.
Requisite: Plan of MUE or MEC.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 160. Ensemble Recording Workshop I. 3 Credit Hours.
Assisting recording and sound reinforcement engineers in the assigned performance ensemble in both rehearsal and performance. Students also perform in a studio ensemble where they act as both recording engineer and musician.
Requisite: Plan of MUE or MEC.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 161. Ensemble Recording Workshop II. 3 Credit Hours.
Students are responsible for the audio needs of an assigned ensemble in both rehearsal and performance. Lectures address audio equipment and practices. Students also perform in a studio ensemble where they act as the recording engineer and musician. Open to MUE majors only.
Prerequisite: MMI 160. Requisite: Plan of MUE or MEC.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 17. Media Writing and Production Forum. 0 Credit Hours.
This course provides a weekly forum for sharing information about issues, current developments, and other matters related to commercial music composition and production as a field of study and as a profession. The course is required for all undergraduate MWP majors during each semester.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MMI 171. Music Engineering Laboratory. 1 Credit Hour.
Requisite: MBEI Or MBEI Majors Or MBEI Minors only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 172. Audio Design Workshop III. 1 Credit Hour.
Digital audio system design and architecture including analog-digital conversion, digital I/O hardware specifications, audio effects processors and digital audio recorder alignment techniques. Students design and troubleshoot audio projects including A/D converters, S/PDIF I/O, and DAT recorders. Open to MUE and EAN Majors only.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 173. Introduction to the Music Business. 3 Credit Hours.
This course provides students with an overview of the music business and related entrepreneurial fundamentals. Music business topics explored include copyright, publishing, the record business, licensing, the live music industry, and arts administration. Entrepreneurial topics explored include starting a business, accounting and marketing basics, and securing funding.
Requisite: MBEI Major or MBEI Minors only and Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 178. Entertainment Industry Survey. 3 Credit Hours.
An overview of the entertainment industry. Concentration on the legal, marketing and financial aspects of different areas of the industry including film, television, music, broadcasting, cable, publishing, video games, sports, performing arts, and theme parks.
Requisite: MBEI Or MBEC Majors Or MBEI Minors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 201. Introduction to Music Recording. 3 Credit Hours.
An overview study of the theory and practice of music recording, with emphasis on modern recording studio practices. Topics include physics of sound, psychoacoustics, studio design, microphones, loudspeakers, consoles, signal processing, digital audio, MIDI, and synchronization.
Requisite: Must have a plan of MUE or MEC or EAN.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 207. Skills Lab III: American Song Traditions. 1 Credit Hour.
A learning ensemble focusing on the various Anglo-American song traditions from English and Irish folk ballads, through Hymnodies, Old-Time, Bluegrass, Western Swing and Newgrass.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 208. Skills Lab IV: American Song Traditions. 1 Credit Hour.
A learning ensemble focusing on the various African-American song traditions from early plantation songs, shouts, hollers, and spirituals, to the development of blues traditions, to gospel.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 240. Experiential Musicianship III. 3 Credit Hours.
The study of melodic, harmonic and rhythmic language in jazz and contemporary music using analysis and aural dictation. MMI 207 Skills Lab III, keyboard lab accompanies this course.
Corequisite: MMI 207 SKILLS LAB III.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 241. Experiential Musicianship IV. 3 Credit Hours.
The continuation of MSJ 140/MMI 240 focused on the study of the diminished chord, extensions, modes and upper structure triads. A keyboard lab accompanies this course.
Corequisite: MMI 208 SKILLS LAB IV.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 250. Essential Technologies for Musicians. 3 Credit Hours.
Basic MIDI and digital audio principles from set-up to final mix, recording of live Instruments using basic microphone techniques, MIDI sequencing, software synthesizers, basic editing, and audio looping.
Requisite: Frost School of Music only.
Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 259. Digital Audio and MIDI Production. 3 Credit Hours.
Weekly lab focused on Pro Tools proficiency and the intricacies of audio technology relating to a modern producer/film composer. Topics include Digital Audio definitions and uses, Pro Tools understanding, shortcuts, and proficiency, and MIDI.
Requisite: MADE_BM or MWPD_BM majors only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 260. Virtual Orchestration. 3 Credit Hours.
Weekly lab focused on the creation of sample-based orchestral mock-ups. Particular emphasis is placed on technical considerations as they apply to MIDI programming, sample selection, and mixing.
Requisite: MADE_BM or MWPD_BM majors only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MMI 261. Media Writing I: Music for Media. 3 Credit Hours.
Project-based lecture course designed to provide students the opportunity to compose and realize a varied array of music projects for media applications including music branding "logos" radio/television ID packages, and 30-second television ads. Particular emphasis is placed on thechnical considerations, aesthetic issues and the psychology of music as they relate to advertising on radio and television.
Prerequisite: MMI 282 (or MTC 204).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 262. Media Writing II: Video Game Scoring. 3 Credit Hours.
Project based seminar/workshop designed to provide students the opportunity to gain the skills, knowledge and experience necessary to produce a variety of musical works for use in video games. Students will also be instructed in the concepts and subtleties of using a DAW (Digital Audio Workstation) specifically designed for video games.
Prerequisite: MMI 282 (or MTC 204).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 273. Artist Development and the Live Entertainment Industry. 3 Credit Hours.
Views of the live entertainment industry from the perspective of the performing artist, artist manager, talent agent, attorney, and concert promoter. Consideration is given to the interpersonal, business, and contractual relationships and their impact on the performing artist's career. Strategies for career development are addressed and the ground rules of publicity, public relations, and promotion explored and applied in practical situations through special individual and team projects.
Prerequisites: MMI 173 or MMI 178 or MMI 310. Requisite: MBEI and MBEC majors and MBEI minors only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 274. Introduction to Music Copyright Law. 3 Credit Hours.
This course provides a study of the current U.S. copyright law as it applies to musical compositions and sound recordings. This course includes analysis of the modern practices of music licensing for both digital and physical uses as well as copyright acquisition. Students will study the various rights of the copyright owner, what can be protected by copyright, and the duration of copyright. They will learn the formalities of music copyright including registration and notice. Current music copyright infringement cases are reviewed along with defenses to infringement and remedies for infringement. The course also covers international copyright protection and music copyright as it applies to digital technologies and distribution.
Prerequisite: MMI 173 or MMI 310 And Requisite: MBEI or MBEC Majors Or MBEI Minors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 280. Synthestration. 3 Credit Hours.
Weekly lab focused on Sound Design/synthesis as it applies to the modern producer. Topics include different synthesis techniques, different waves, modulation controls, signal flow as it applies to modular synthesis, hardware synths vs "softsynths," and FX processing common to synth instruments.
Requisite: MADE_BM or MWPD_BM majors only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 281. Production I: Recording and Production Techniques. 3 Credit Hours.
Project based seminar/workshop designed to provide students the opportunity to gain the skills and knowledge to properly record acoustic audio into a DAW (Digital Audio Workstation). Particular emphasis will be placed on the proper use and implementation of microphones, microphone cables, direct boxes, microphone pre-amplifiers and consoles. In addition, students will be versed in the basics of acoustics, signal flow and basic mixing techniques within a DAW.
Pre/Corequisite: MMI 141 Or MTC 141.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 282. Production II: Audio Processing and Critical Listening. 3 Credit Hours.
Project-based practicum course designed to provide students the opportunity to explore, discover and articulate the elements needed to successfully model and emulate music of any genre by examining popular music of selected decades. Particular emphasis is placed on critical listening, the understanding of signal flow and processing, and the skills required to properly apply each of these concepts in order to enhance the commercial viability of their final projects.
Prerequisite: MMI 281 (or MTC 203).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 307. Skills Lab V: American Pop. 1 Credit Hour.
A learning ensemble focusing on American Popular Music from the late-1950s to the late-1970s. Students will develop a portfolio of original songs in modern American styles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.
MMI 308. Skills Lab VI: American Pop. 1 Credit Hour.
A learning ensemble focusing on American Popular Music from the 1980s to the present. Students will develop a portfolio of original songs in modern American styles.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.

MMI 310. Music Business and Entrepreneurship for Musicians. 3 Credit Hours.
This course provides students with an overview of the music business and related entrepreneurial fundamentals. Music business topics explored include copyright, publishing, the record business, licensing, the live music industry, and arts administration. Entrepreneurial topics explored include starting a business, accounting and marketing basics, and securing funding.
Requisite: Frost School of Music and Prerequisite: MMI 141 or MSJ 141 or MTC 141.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 315. Contemporary Songwriting I. 3 Credit Hours.
Explores modern songwriting techniques, song lyric theory, song form, melodic development, pop harmony and rhythm & grooves. Students will analyze a variety of recordings by top modern songwriters. Students will compose and record a number of original songs for the course.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 320. Contemporary Lyric Writing. 3 Credit Hours.
This course explores modern lyric writing techniques, song lyric theory, and song form. Students will analyze a variety of lyrics by top modern songwriters, focusing on their use of literary devices, imagery and metaphors. Students will compose a number of original lyrics for the course.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 361. Acoustics. 3 Credit Hours.
A study of the theoretical principles of acoustics. Principle topics include basic properties, acoustical phenomena, superposition, Fourier Theorem, symmetry, vibrating strings and columns, and musical instruments; a study of architectural acoustics such as growth and decay, absorption coefficients, normal modes, diffusion, isolation, and mass law; design applications such as structural techniques and materials, live end-dead end, room geometry, tuning, TDS and other measurement techniques.
Prerequisites: MTH 112, PHY 102 or PHY 205. Requisite: Plan of MUE and MEC.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 363. Media Writing III: Film Scoring Foundations. 3 Credit Hours.
Seminar in the aesthetics and psychology of mood music, sound-film synchronization, timing techniques, and scoring procedures. Analysis and performance of student projects is included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 364. Media Writing IV: Film Scoring Extensions. 3 Credit Hours.
Adaptation of previous semester's techniques to television scripts and performed music. Pre-recording, direct recording, and dubbing procedures are included as well as preparation and performance of complete film cues. Each student is required to conduct his/her project.
Prerequisite: MMI 363 (or MTC 511).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 378. Music Business Agreements. 3 Credit Hours.
This course explores the legal agreements between different parties in the music business, such as record companies, recording artists, music producers, and licensees. Emphasis is placed on the different ways of contractually addressing intellectual property ownership and usage, compensation, and exclusive services.
Prerequisite: MMI 173 or MMI 178 or MMI 310 and MMI 274. Requisite: MBEI and MBEC Majors and MBEI Minors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MMI 383. Production III: Audio Editing. 3 Credit Hours.
Project-based practicum course designed to provide students the opportunity to compose, record and reproduce a wide variety of music projects that combine the use of pre-existing as well as new musical elements. Particular emphasis is placed on technical considerations, aesthetic issues, and the commercial viability of the end product.
Prerequisite: MMI 262 (or MTC 304).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 384. Production IV: Mixing and Mastering. 3 Credit Hours.
Weekly lab focused on mixing and mastering music for commercial release. Topics include psychoacoustics, a variety of audio effects and their uses in a mix, how rooms and equipment affect your ability to listen critically, and loudness requirements for commercial releases. Students will be mixing 1 song a week, with increased level of difficulty as new subjects are introduced.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MMI 401. Audio Electronics. 3 Credit Hours.
An introductory course in audio electronics theory and professional audio applications such as recording studio equipment and audio effects design. Coursework includes basic electronic components and theories, passive filtering, transformers, operational amplifiers, vacuum tubes, non-linear elements including diodes and JFETs, graphic, parametric and shelving equalizers, compressors, limiters, gates, microphone preamps, analog effects including reverb, flanging, and chorusing. Students will design custom audio circuits and use computer simulations to understand theory of operation. Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 410. Music Engineering Capstone Project. 3 Credit Hours.
Students in MMI 410 propose and execute a project that represents the Culmination of their learning experiences in the Music Engineering Program. Students meet as a group with a faculty member of record each week to Discuss project topics and assess progress. The course concludes with a public Presentation of the final project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 420. Music Industry Capstone Project. 3 Credit Hours.
Students will apply the knowledge and skills acquired in their courses to develop a Business Plan for a Music Business venture. Students will identify a segment of the industry, analyze aspects associated with a SWOT analysis, income, cost, expenses, and develop a marketing plan for the venture. The course will provide students an inside view of the business operations while enhancing their conceptual understanding of the structures and interrelationships of the diverse music ventures in the music business ecosystem. Requisite: Senior Status And MBEI Majors Only.
Components: THI.
Grading: SUS.
Typically Offered: Spring.

MMI 436. Audio Postproduction. 3 Credit Hours.
Basic audio for video and film postproduction, including the study of time code, synchronization, electronic editing, video and film transports, dolby stereo, equipment interfacing, and future developments. Prerequisite: MMI 201 and Requisite: MUE and EAN Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 445. Senior Project/Portfolio. 1 Credit Hour.
This course is the capstone of the Creative American Music Program. Students will develop a portfolio of recordings of original songs. Students will also be required a public performance of their original songs. Requisite: Senior Status and MWP majors or MADE majors or CAM minors only.
Components: THI.
Grading: GRD.
Typically Offered: Spring.
MMI 454. Entertainment Industry Practicum. 1 Credit Hour.
Practical experience in an entertainment industry organization.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 455. Music Business Internship. 3 Credit Hours.
Practical experience in different areas of the music business under the supervision of professional firms and the university.
Requisite: MBEI Majors Only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 456. Internship in Entertainment Industries II. 0 Credit Hours.
Continuation of MMI 455.
Requisite: Frost School of Music only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 460. Recital Recording and Sound Reinforcement (Recording Services). 1 Credit Hour.
Practical experience in live concert recording, editing and mastering, and sound reinforcement, under supervision of professional on-campus engineers.
Requisite: MUEE_BS Plan Code Only. Permission of Instructor for other Plan Codes.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 465. Internship in Music Engineering. 1-3 Credit Hours.
Practical experience in the music engineering industry such as work in a recording studio, broadcast company, hardware or software manufacturer, under professional supervision.
Requisite: Plan of MUE or MEC.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 493. Special Projects in Music Media and Industry. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 494. Special Topics in Music Media and Industry. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 501. Transducer Theory. 3 Credit Hours.
Course covers the fundamentals of electromagnetism and audio transducer theory including loudspeaker and microphone systems. Classical electro-acoustical analysis of transducers including acoustic suspension, bass-reflex, transmission line, electrostatic and horn loudspeakers, dynamic, ribbon and condenser pressure, and pressure-gradient microphones. Students use computer-aided design programs and Thiele-Small parameterization to model loudspeakers and measure loudspeaker responses. Open to MUE and EAN Majors only.
Prerequisite: MMI 501. Requisite: Plan of MUE and EAN.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MMI 502. Audio Signal Processing I. 3 Credit Hours.
A study of the theory and practice of digital audio topics including discrete time sampling, quantization, dithering, PCM, A/D and D/A conversion, digital filtering, oversampling, modulation codes, timebase, error correction codes, magnetic storage, DAT, and optical storage. Requisite: MUE and EAN majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 503. Audio Signal Processing II. 3 Credit Hours.
A study of the theory and practice of digital audio topics including fiber optics and networks, compact disc, interconnection, psychoacoustics, low bit-rate perceptual coding, MPEG, digital audio broadcasting, sigma-delta conversion, noise shaping, digital video, and emerging technologies. Open to MUE and EAN Majors only. Prerequisite: MMI 502. Requisite: Plan of MUE and EAN.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 504. Audio Signal Processing III. 3 Credit Hours.
Theory, design, and development of computer audio synthesizers and analyzers. Students implement software synthesizers including analog and physical modeling, wave-table, wave-shaping, and FM designs. Classical and modern theories of timbre and time-frequency analysis are included. Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 505. Current Trends in Music Engineering I. 3 Credit Hours.
Theory, design and development of audio signal processing techniques. Topics include DSP architectures, systems design, algorithm development, and applications. DSP development tools used to write, debug, and test programs including time-domain based effects such as reverb, chorus, flanging, and digital delay as well as frequency-domain projects such as FIR, IIR, and FFT filters and vocoders. Prerequisite: MMI 504. Requisite: Plan of MAU and EAN.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 506. Current Trends in Music Engineering II. 3 Credit Hours.
MMI 506 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 508. Current Trends in Music Engineering III. 3 Credit Hours.
MMI 508 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 510. Computational Psychoacoustics. 3 Credit Hours.
This course deals with the fundamentals of audition in human biological systems, including auditory sensory transduction, cochlear processes, neural pathways, cortical organization, and auditory illusions, with specific applications to perceptual data reduction techniques and auditory displays.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 511. Current Trends in Music Engineering IV. 3 Credit Hours.
MMI 511 addresses current technologies, skills, and techniques employed in a specific aspect of the audio technology and/or music technology fields. Prerequisite: ECE 118.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MMI 520. Audio Technology for Musicians. 3 Credit Hours.
Introduction and overview of audio technology with emphasis on music recording, production equipment, and techniques. Topics include microphones, loudspeakers, mixing consoles, interconnection, amplifiers, digital processing, time code, and surround sound. Open to non-MUE majors. 
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 521. Timbral Ear Training. 3 Credit Hours.
Students in this course will accomplish four primary goals: 1) instantaneous discernment of ISO frequency regions and critical bands; 2) aural identification of audio-processing techniques, artifacts, and problems; 3) development of critical thinking skills and competence in current audio listening test methodologies; and 4) successful completion of a comprehensive bank of critical listening “golden ears” tests
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 530. Entrepreneurship for Musicians. 3 Credit Hours.
Course explores a wide range of options for musicians who want to pursue music business careers in their regional music markets. Students examine opportunities in performance, recording, composition, education, and more. Emphasis is placed on the packaging of musical skills in the marketplace and on the financial management of a small proprietary music business. As a result, the student musician will be prepared to make career decisions with foresight and planning.
Requisite: Frost School of Music only.
Components: DIL.
Grading: GRD.
Typically Offered: Spring.

MMI 531. Recording Engineering Seminar. 3 Credit Hours.
Students in MMI 531 will accomplish three primary goals: 1) understanding historical trends in the audio recording industry, particularly those involving key technological advances; 2) understanding and appreciating recent advances in sound recording technologies and methods; and 3) development of critical thinking, research, writing, and presentation skills.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MMI 532. Arts Leadership. 3 Credit Hours.
Course explores critical concepts of leadership, decision-making, and teamwork in wide-ranging arts presentation settings. Through experiential learning, students practice and acquire the knowledge and skills vital for effective navigation through the dynamic arts industry.
Requisite: MBEI Or MBEC Or MADE Majors Or MBEI Minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI 537. Recorded Music Operations. 3 Credit Hours.
This course provides a study of the activities involved in commercially exploiting recorded music. The course includes an analysis of activities involved in the production, manufacturing, distribution, and marketing of a recorded music product; as well as related royalty accounting, mechanical licensing and master-use licensing activities.
Prerequisite: MMI 173 or MMI 310 and MMI 274 and Requisite: MBEI or MBEC or MADE Majors or MBEI Minor only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MMI 543. Music Marketing. 3 Credit Hours.
Students learn how to fulfill demand and influence consumer behavior through effective marketing techniques. The course provides the students with information on the latest technologies being employed to reach and communicate with target consumers.
Requisite: MBEI or MBEC or MADE Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI 545. Music Placement and Exploitation. 3 Credit Hours.
This course provides an in-depth study of the creative and business aspects involved with the discovery, placement and exploitation of music in the current entertainment business. Students explore the processes of how music is placed in television, film, commercials, video games, with new media and recording artists. This course covers the roles of the various players in the music placement business and studies creative approaches, negotiation techniques and licensing practices. The DIY music creator, both the songwriter and recording artist, and their music representative will learn how to prepare, package, present, place and exploit their music as well as how to build a fan base. Students will learn how to locate resources for licensable music, offer creative options, select and license appropriate music, combine music with a variety of media, negotiate with a variety of rights holders, and generate license requests, agreements, and cue sheets.
Prerequisite: MMI 173 or MMI 310 and MMI 274 and MMI 573 or Requisite: MBEI or MBEC or MADE Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 573. Music Publishing. 3 Credit Hours.
This course provides an in-depth study of the creative and business aspects, concepts and practices of the music publishing industry. The course covers the acquisition, exploitation, administration and protection of songs in the contemporary music publishing business. Students will also study the income sources, royalty rates and payment procedures currently used in the music industry as they apply to musical compositions. Music publishing agreements currently used for the acquisition and administration of songs are reviewed in-depth. Foreign music publishing issues are explored and reviewed as related to domestic music publishing.
Prerequisite: MMI 173 or MMI 310 and MMI 274.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 580. Advanced Analysis of Current Topics in the Music Business. 3 Credit Hours.
This course provides students with in-depth study of advanced topics in the music business, including recent developments in the areas of music licensing, copyright, international markets, live music, artist development, data management, and others. Particular focus is placed on ways to meet the current challenges facing the industry.
Prerequisite: MBEI Or MBEC Or MADE Majors Or MBEI Minor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MMI 593. Special Projects in Music Media and Industry. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI 594. Special Topics in Music Media and Industry. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MMI CB1. Contemporary Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits; 1/2 hour lesson for students enrolled for 1 credit. Technical Requirements: Basic grooves and bassline construction. Analysis of different styles of rock, pop, rhythm & blues, and funk music. Introduction to acoustic, six-string electric, and fretless electric basses. Knowledge of beginning functional harmony and sight-reading skills will also be addressed.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CB3. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits; 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of classic rhythm sections recorded throughout the last 50 years, including concentration on important and influential drummers in different styles of rock, pop, R&B, funk, latin, and jazz idioms. Live performance skills and studio techniques. Studies in jazz and modal harmony. Introduction to improvisation.
Prerequisite: MMI CBD.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CBB. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Basic grooves and bassline construction. Analysis of different styles of rock, pop, rhythm & blues, and funk music. Introduction to acoustic, six-string electric and fretless electric basses. Knowledge of beginning functional harmony and sight-reading skills will also be addressed.
Prerequisite: MMI CBA.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CBC. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of important bass players and styles, including Carol Kaye, James Jamerson, Larry Graham, Jack Bruce and others. Studies in intermediate harmony and introduction to standard American popular repertoire. Sight-reading, chart reading, and basic rhythm section arranging.
Prerequisite: MMI CBB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CBD. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of important bass players and styles, including Carol Kaye, James Jamerson, Larry Graham, Jack Bruce and others. Studies in intermediate harmony and introduction to standard American popular repertoire. Sight-reading, chart reading, and basic rhythm section arranging.
Prerequisite: MMI CBC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CBF. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Analysis of classic rhythm sections recorded throughout the last 50 years, including concentration on important and influential drummers in different styles of rock, pop, R&B, funk, latin, and jazz idioms. Live performance skills and studio techniques. Studies in jazz and modal harmony. Introduction to improvisation.
Prerequisite: MMI CBE.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CBG. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Advanced jazz harmony and improvisation. World music and odd meter studies, including non-traditional styles and grooves. Advanced concepts of recording and performance, including starting and working within the context of an original band project. Elements of professionalism in the music business.
Prerequisite: MMI CBF.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CBH. Contemporary Bass. 1-2 Credit Hours.
One hour lesson for students enrolled for 2 credits, 1/2 hour less for students enrolled for 1 credit. Technical requirements: Advanced jazz harmony and improvisation. World music and odd meter studies, including non-traditional styles and grooves. Advanced concepts of recording and performance, including starting and working within the context of an original band project. Elements of professionalism in the music business.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CD1. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking techniques, basic hand/foot patterns. Analysis of rock, pop, rhythm and blues, Latin and jazz styles. Basic chart reading.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CD3. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques, and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
Prerequisite: MMI CDD.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDB. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking techniques, basic hand/foot patterns. Analysis of rock, pop, rhythm and blues, Latin and jazz styles. Basic chart reading.
Prerequisite: MMI CDA.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDC. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced sticking techniques, advanced hand/food patterns. Transcription/analysis of important drumset artists in major styles. Advanced chart reading.
Prerequisite: MMI CDB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDD. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced sticking techniques, advanced hand/food patterns. Transcription/analysis of important drumset artists in major styles. Advanced chart reading.
Prerequisite: MMI CDC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDF. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques, and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
Prerequisite: MMI CDE.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDG. Contemporary Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Tools to enhance soloing and executing grooves. Transcription/analysis of important drumset artists in major styles. Basic studio performance techniques, and relationship to singer/songwriter. Basic jazz performance elements. Basic world music rhythms.
Prerequisite: MMI CDF.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CDH. Contemporary Drumset. 1-2 Credit Hours.
Prerequisite: MMI CDG.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CG1. Contemporary Guitar. 1-2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CG3. Contemporary Guitar. 1-2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CGB. Contemporary Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning pop harmony. Beginning accompanying. Rock/pop Improvisation. Analysis of rock, pop, rhythm and blues, Latin and jazz styles. Basic chart reading. Basic acoustic and electric guitar techniques. Prerequisite: MMI CGA.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CGC. Contemporary Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced harmony. Advanced accompanying. Transcription/analysis of important guitar artists in major styles. Advanced chart reading and capoing techniques. Beginning alternate tunings. Prerequisite: MMI CGB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CGD. Contemporary Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced harmony. Advanced accompanying. Transcription/analysis of important guitar artists in major styles. Advanced chart reading and capoing techniques. Beginning alternate tunings. Successful completion of Level D to move to Level E. Prerequisite: MMI CGC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CGF. Contemporary Guitar. 1-2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CGG. Contemporary Guitar. 1-2 Credit Hours.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CGH. Contemporary Guitar. 1-2 Credit Hours.
Prerequisite: MMI CGG.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CK1. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning Gospel harmony (triads in all inversions), basic add-nine pop harmony. Beginning accompanying. Analysis of rock, pop, rhythm and blues, Latin, and jazz styles. Basic chart reading.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CK3. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning pop improv. Beginning functional jazz harmony (thirds and sevenths). Basic jazz performance elements. Transcription/analysis of important keyboard artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Keyboard equipment, maintenance, patch libraries and sound editors.
Prerequisite: MMI CKD.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CKB. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning Gospel harmony (triads in all inversions), basic add-nine pop harmony. Beginning accompanying. Analysis of rock, pop, rhythm and blues, Latin, and jazz styles. Basic chart reading.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CKC. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced Gospel harmony. Advanced accompanying. Transcription/analysis of important keyboard artists in major styles. Advanced chart reading.
Prerequisite: MMI CKB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CKD. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced Gospel harmony. Advanced accompanying. Transcription/analysis of important keyboard artists in major styles. Advanced chart reading.
Prerequisite: MMI CKC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CKF. Contemporary Keyboard. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Beginning pop improv. Beginning functional jazz harmony (thirds and sevenths). Basic jazz performance elements. Transcription/analysis of important keyboard artists in major styles. Basic studio performance techniques and relationship to singer/songwriter. Keyboard equipment, maintenance, patch libraries and sound editors.
Prerequisite: MMI CKE.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CKG. Contemporary Keyboard. 1-2 Credit Hours.
Prerequisite: MMI CKF.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CKH. Contemporary Keyboard. 1-2 Credit Hours.
Prerequisite: MMI CKG.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CM3. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMD.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMB. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMA.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMC. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMD. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMF. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CME.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMG. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMF.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CMH. Contemporary Media. 1-2 Credit Hours.
Prerequisite: MMI CMG.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CV1. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Beginning chart writing. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CV3. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to self-prepare a song, advance knowledge of music styles and historical periods of contemporary music, effective communication of original songs. Advanced chart writing. Intermediate improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVD.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CVB. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Warm-ups, Cool downs and introductory exercises for breath management. Attack in phonation, registration, resonance, articulation, coordination, microphone technique, key selection and vocal hygiene and maintenance. Beginning chart writing. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVA.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CVC. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic knowledge of musical styles and historical periods of contemporary music, effective communication of songs in a variety of contemporary styles. Intermediate chart writing. Beginning improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVB.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CVD. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic knowledge of musical styles and historical periods of contemporary music, effective communication of songs in a variety of contemporary styles. Intermediate chart writing. Beginning improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVC.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CVF. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to self-prepare a song, advance knowledge of music styles and historical periods of contemporary music, effective communication of original songs. Advanced chart writing. Intermediate improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVE.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MMI CVG. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required contemporary styles, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performance with accuracy in pitch, rhythm, good posture, breath management, phonation, resonance, and microphone technique. Advanced chart writing and studio vocal arranging techniques. Advanced improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVF.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CVH. Contemporary Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits, 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required contemporary styles, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performance with accuracy in pitch, rhythm, good posture breath management, phonation, resonance, and microphone technique. Advanced chart writing and studio vocal arranging techniques. Advanced improvisation and ornamentation. Repertoire of original and contemporary songs in various styles as prescribed by the voice teacher.
Prerequisite: MMI CVG.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CX1. Contemporary Performance Instruction. 2 Credit Hours.
1-Hour Lesson for students enrolled for 2 credits, ½ hour lesson for students enrolled for 1 credit. Applied instrument/ voice instruction in contemporary, popular music performance. Freshman/Sophomore level.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CX3. Contemporary Performance Instruction. 2 Credit Hours.
1-Hour Lesson for students enrolled for 2 credits, ½ hour lesson for students enrolled for 1 credit. Applied advanced instrument/ voice instruction in contemporary, popular music performance. Junior/Senior level.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MMI CXS. Secondary Contemporary Performance Instruction. 1 Credit Hour.
Secondary lessons. Additional lessons on an instrument that is not a principal instrument of the student. No juries or auditions needed. Taken in addition to the required 2 credit lessons. Does not count towards required lessons. Must be approved by private instructor.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

B.M. in Media Writing and Production

The Bachelor of Music in Media Writing and Production (MWP) is a program designed to provide the highest level of preparation for qualified composers and producers for media. Successful students will complete diverse writing (composing, scoring, producing) assignments, as well as develop technical and practical skills in the recording studio. In addition, students will increase their knowledge of current trends in the music industry.

Prospective students should furnish evidence of outstanding writing and production creativity, as well as basic digital audio workstation (DAW) and music notation skills.

Students must maintain a minimum GPA of 2.70 to remain in the MWP Program.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.
All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components (MWP Majors will take this or another equivalent course depending on their area of emphasis)
2. MCY XXX (200 level or higher), which will include discipline specific communication skills.

3. MMI 445 Senior Project/Portfolio/Business Plan, This course is the capstone for both the MWP programs. Students will develop and compile a portfolio of creative works that showcase their individual artistry, including but not limited to recordings, videos, songs, scores, and/or other applicable media elements.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Total credits for courses in the major = 48

Total Credit Hours = 121

---

1. EMC core courses require a grade of "C" or higher. Lessons require a grade of "B" or higher.
2. Students in conjunction with an advisor, can construct a MWP major with a Media Writing emphasis or Production emphasis. These areas of emphasis are notated on the UM transcript as a Media Writing and Production major.
3. MWP majors with a Media Writing emphasis are strongly encouraged to add a minor in Music Composition with the approval of the MTC Department Chair: [http://bulletin.miami.edu/undergraduate-academic-programs/music/music-theory-composition/music-composition-minor/](http://bulletin.miami.edu/undergraduate-academic-programs/music/music-theory-composition/music-composition-minor/).

# Mission

The Commercial Music & Production (MWP) degree program is designed to prepare undergraduate students for the many issues facing today’s commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry.

# Goals

## Student Learning Outcomes

- Students will demonstrate the ability to plan, prepare, produce, and execute a live performance of original contemporary commercial music and arrangements.
- Students will demonstrate the ability to compose, record, edit, and prepare for distribution original contemporary/commercial music and arrangements.
- Students will demonstrate the ability to compose, score, orchestrate, record, and edit, original music for visual media such as film, video, and games.

# B.M. in Music Business Entertainment Industries

## Introduction

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum, which includes a minor in Marketing, Business Law, Management, Finance, Business Technology, Public Relations, or other approved business-related area. For curriculum requirements see Minors for Non-Business Students. (p. 689)
Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

Please see below for additional goals and degree requirements.

**Educational Objectives**

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.
- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

Total credits for courses in the major = 54

Total Credit Hours 123

---

1. **EMC core courses require a grade of "C" or higher. Lessons require a grade of "B-" or higher.**

**Advanced Writing and Communication Skills**

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 537 Recorded Music Operations, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. ENG 230 Advanced Business Communications, COS 333 Business Communication, or ENG 331 Legal Writing which will include discipline specific communication skills.
Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

### Notes:

1. Required for Music Business Agreements.
Mission
The mission of the Music Business and Entertainment Industries Program is to prepare students for careers in the music business profession, specifically in the areas involving music publishing, and the record business. This is accomplished through courses in music business, music, and business, as well as the general education areas of English and STEM.

Goals
• Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
• Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
• Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
• Students will know how to promote and sell a music industry product.
• Students will have an understanding of the performing artist as a major economic factor in the marketplace.
• Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

Student Learning Outcomes
• Students will demonstrate knowledge of the fundamentals of the music publishing industry, including licensing, royalties, publishing agreements, and how a song catalog is commercially exploited.
• Students will demonstrate knowledge of the fundamentals of the recorded music industry, including how content is created, distributed, and marketed, and how recording agreements are structured.
• Students will demonstrate knowledge of the fundamentals of music copyright, including how it applies to musical works and sound recordings, copyright infringement, the length of copyright protection, and international treatment of music copyrights.

B.M. in Musicianship, Artistry Development, and Entrepreneurship
The MADE major allows the freedom and flexibility for students to focus on their preferred areas of emphasis, with outcomes that lead toward a viable career of their own choosing.

Educational Objectives
Upon graduation, students will have:
• a highly competitive skill set in musicianship, artistry, and entrepreneurship, including performing, writing, arranging/orchestration, recording, musical direction, marketing and promotion, copyright management and administration, as well as the ability to write basic agreements and licenses;
• a diverse and applied understanding of the music industry;
• the ability to create and execute a sound business plan, as well as a portfolio/EPK that best showcases their brand identity.
• a minor in Music Business and Entertainment Industry.

---

1. **EMC core courses require a grade of “C” or higher. Lessons require a grade of “B-” or higher**

### Advanced Writing and Communication Skills

**Courses**

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.
All music students will successfully complete:

- MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
- MMI 445 Senior Project/Portfolio, this course is the capstone for both the CAM and MADE programs. Students will develop and compile a portfolio of creative works that showcase their individual artistry, including but not limited to recordings, videos, songs, scores, and/or other applicable media elements. Students will also be required to organize a public performance/showcase their works. Requisite: MADE Major or CAM Minor
- COS 333 Business Communication or ENG 200+ course (recommended courses ENG 230 or ENG 331)

**Assessment**

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Plan of Study with Music Business and Entertainment Industry Minor**

Mission

The Bachelor of Music in Musicianship, Artistry Development & Entrepreneurship is a professional degree program designed to provide the highest level of preparation for qualified performers and creatives to thrive in all aspects of the contemporary music industry.

Goals

Upon graduation, students will have:

- A highly competitive skill set in musicianship, artistry, and entrepreneurship, including performing, writing, arranging/orchestration, recording, musical direction, marketing and promotion, copyright management and administration, as well as the ability to write basic agreements and licenses;
- A diverse and applied understanding of the music industry;
- The ability to create and execute a sound business plan, as well as a portfolio/EPK that best showcases their brand identity.
- A minor in Music Business and Entertainment Industry.

Student Learning Outcomes

B.M. in Professional Studies

The Bachelor of Music in Professional Studies will allow students to work closely with an advisor to develop individual goals and design a personalized program of study. While most music degree programs are highly prescriptive, the MPRO will allow students to tailor the curriculum to match their diverse personal and professional goals, as well as adjust to the rapidly changing music industry.

Students will select approved electives with the assistance of a guidance committee consisting of their assigned Faculty Advisor(s), Senior Academic Advisor, and the Associate Dean for Undergraduate Studies.

Mission

Goals

Student Learning Outcomes

• Students will demonstrate and develop advanced competence in Music Performance on their instrument.
• Students will develop proficiency in ensemble performance skills necessary for participation and functionality as a professional.
• Students will develop the technological proficiency necessary for an entry-level career in the music profession.

B.S. in Music Engineering Technology

Introduction

The mission of the Music Engineering Technology program is to:

1. Provide the highest quality education in the field of music engineering.
2. Promote advancements in the fidelity and creativity of music recording, production and reproduction.
3. Promote advancements in the invention, design and implementation of audio hardware and software.

The goals of the Music Engineering Technology program are to:

1. Further enhance the program’s national and international stature.
2. Obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology.
3. Ensure that curricular offerings are current and able to educate students in new and future theory and practice.
4. To help graduates find professional career positions.

Educational Objectives

• Understanding the theoretical basis of sound recording, processing and reproduction.
• Understanding the practice techniques used in sound recording, processing and reproduction.
• Designing and implementing original audio hardware and/or software.
• Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

Total credits for courses in the major = 60

**Total Credit Hours** 127

1. EMC core courses require a grade of "C" or higher. Lessons require a grade of "B-" or higher.
2. MMI 460 Recital Recording and Sound Reinforcement must be taken a minimum of 3 times to satisfy the Advanced MUE elective requirement.
3. Must complete calculus by end of sophomore year.

* A minimum 2.7 GPA is required to remain in the Music Engineering Technology program.
** A minimum 2.0 GPA is required in all Engineering courses taken.
Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
   MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
   MMI 401 Audio Electronics, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

**Mission**

The mission of the Music Engineering Technology program is to:

- Provide the highest quality education in the field of music engineering.
- Promote advancements in the fidelity and creativity of music recording, production and reproduction.
- Promote advancements in the invention, design and implementation of audio hardware and software.

**Goals**

- Understanding the theoretical basis of sound recording, processing and reproduction.
- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

**Student Learning Outcomes**

- Students will use problem solving skills to find a solution to a music engineering problem.
- Students will demonstrate theoretical understanding and practical techniques utilized in sound recording, processing and reproduction.
- Students will demonstrate understanding of electrical and computer engineering concepts and applications.

**Minor in Creative American Music**

*(Audition required, music majors only)*

**The Bruce Hornsby Creative American Music Program**

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

**Contemporary Performance as Primary Instrument or Voice**

Contemporary Performance accommodates talented songwriters, singers, and instrumentalists who are not classical or jazz musicians. Contemporary instruments include Guitar (Electric and Acoustic), Voice, Electric Bass, Keyboard, Media (Alternate Controllers/Electronic Producers), Strings (Fiddle, Electric Violin, etc.) and Percussion (incl. Drums). Songwriters may apply to the Creative American Music Program. Contemporary Performance is available to students in the following majors: Musicianship, Artistry Development, and Entrepreneurship; Music Business and Entertainment Industries; Music Engineering Technology; Media Writing and Production; Music Education; Music Composition; Music Therapy; Professional Studies; and the Bachelor of Arts in Music. Pre-screening and audition are required.

MBEI with CAM minor plan of study (p. 1421)
A minor in Media Writing and Production is intended for students who are pursuing majors in other fields within the Frost School of Music. The curriculum in Media Writing and Production is designed for those students intending to pursue a career as a writer and/or producer, as well as pursuing a graduate degree in Media Writing and Production. Students interested in this minor are required to submit a writing/production portfolio to the program director for approval before declaring the minor. This minor fulfills the Arts & Humanities Area of Knowledge.

### Curriculum Requirements

<td>Production I: Recording and Production Techniques</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose either a Media Writing Emphasis or a Production Emphasis (9 credits)

#### Media Writing Emphasis

Choose 9 credits from the following:

- MMI 260 Virtual Orchestration
- MMI 262 Media Writing II: Video Game Scoring
- MMI 363 Media Writing III: Film Scoring Foundations
- MMI 364 Media Writing IV: Film Scoring Extensions

#### Production Emphasis

Choose 9 credits from the following:

- MMI 280 Synthestration
- MMI 282 Production II: Audio Processing and Critical Listening
- MMI 383 Production III: Audio Editing
- MMI 384 Production IV: Mixing and Mastering

Total Credit Hours 15

### Minor in Music Business and Entertainment Industries

**Music Theory and Composition (MTC)**

Dept. Code: MTC

The Department of Music Theory-Composition

- Music Theory-Composition (MTC)

**MTC 101. Composition I. 2 Credit Hours.**
Course covers elementary principles of composition; class performance of composition projects is also included. Required of theory-composition majors.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MTC 102. Composition II. 2 Credit Hours.**
Continuation of MTC 101.
Prerequisite: MTC 101.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MTC 107. Skills Lab I. 1 Credit Hour.**
Chamber-music ensemble (vocal or instrumental) for intensive work on aural skills (transcription, sight-singing, etc.), analysis of literature in and through performance, and improvisation, with focus on music of the Baroque and Classical periods.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

**MTC 108. Skills Lab II. 1 Credit Hour.**
Chamber-music ensemble (vocal or instrumental) for intensive work on aural skills (transcription, sight-singing, etc.), analysis of literature in and through performance, and improvisation, with focus on music of the Baroque and Classical periods.
Pre or Corequisite: MTC 141.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

**MTC 109. Music Theory Skills I. 3 Credit Hours.**
A first course in music theory and musicianship for non-music majors; covers basic literacy, fundamentals, tonal harmony, and elements of musical form in a wide variety of traditional and contemporary styles and genres. Includes intensive training in aural and singing skills.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**MTC 110. Music Theory Skills II. 3 Credit Hours.**
Course is designed for students deficient in the knowledge of the basic fundamentals of music. Includes the study of notation, keys, scales, and chord construction. Credits do not count toward music degree requirements.
Prerequisite: MTC 109.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MTC 111. Music Theory I. 1-3 Credit Hours.**
Introduction to basic concepts of melody, harmony, rhythm, and formal structure through analysis and writing. Topics include intervals, scales, elementary melodic and four-part writing, phrase structure and cadences, and diatonic harmony. Laboratory. MTC 121.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MTC 12. Composition Forum. 0 Credit Hours.
A weekly forum for all Music Theory/Composition majors, both undergraduate and graduate. Course involves guest lectures by visiting composers and performers, presentations of faculty compositions, and group discussions of important compositional and theoretical issues.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MTC 140. Experiential Musicianship I. 3 Credit Hours.
Study of tonal harmony, voice leading, and elements of musical form, covering diatonic procedures and basic modulation, using the chorales of J.S. Bach, with other repertoire, as models for composition.
Corequisite: Must Pass MTC 107 with a C or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 141. Experiential Musicianship II. 3 Credit Hours.
Continuation of MTC 140, enlarging the study of tonal harmony and voice leading, covering harmony of the Classical period and sectional musical forms through small rondo and compound ternary, culminating in a large independent model-composition project for each student.
Corequisite: MTC 108.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 148. Electronic Music Ensemble. 1 Credit Hour.
An in-depth study and performance of electroacoustic music compositions.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 182. Composition Workshop. 1 Credit Hour.
A variety of composition concepts and problems are dealt with through assignments and projects with special emphasis on practical considerations.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 197. Studio Rhythm Section. 1 Credit Hour.
A performing ensemble of student-generated contemporary musical repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 199. Ensemble Ibis for New Music. 1 Credit Hour.
Ensemble Ibis is the new music ensemble at the Frost School of Music which performs music of the late 20th and 21st centuries and performs 3 to 4 concerts per year.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 201. Composition III. 2 Credit Hours.
Principles of composition with special emphasis on stylistic considerations.
Prerequisite: MTC 102.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 202. Composition IV. 2 Credit Hours.
Continuation of MTC 201.
Prerequisite: MTC 201.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MTC 207. Skills Lab III. 1 Credit Hour.
Chamber-music ensemble for intensive work on aural skills (transcription, sight-singing, sight-reading, etc.), analysis of literature excerpts in performance, and improvisation, with focus on tonal music of the Classical period and the nineteenth century.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MTC 208. Skills Lab IV. 1 Credit Hour.
Chamber-music ensemble for intensive work on aural skills (transcription, sight-singing, sight-reading, etc.), analysis of literature excerpts in performance, and improvisation, with focus on selected music of the twentieth century.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MTC 240. Experiential Musicianship III. 3 Credit Hours.
Continuation of MTC 141; study of advanced tonal harmony, voice leading, and larger musical forms, based primarily on music of the Classical period and the nineteenth century.
Pre or Corequisite: MTC 141.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 241. Experiential Musicianship IV. 3 Credit Hours.
Continuation of MTC 240; study of materials and techniques in composition of music from the early and middle twentieth century, based on works by Debussy, Stravinsky, Schoenberg, Bartok, and other models.
Prerequisite: MTC 240.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 301. Composition V. 2 Credit Hours.
Individual compositional projects with an emphasis on smaller formal structure.
Prerequisite: MTC 202.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 302. Composition VI. 2 Credit Hours.
Individual compositional projects including all media with an emphasis on extended formal structures.
Prerequisite: MTC 301.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 311. Analysis and Experience. 3 Credit Hours.
Musical analysis and its relationship to listening and performance. An introduction to musical aesthetics is also included.
Prerequisite: MTC 241.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 312. 20th and 21st Century Techniques. 3 Credit Hours.
Analysis of twentieth century compositional resources. Topics include Impressionism, expanded tonal resources, Neo-classicism, serialism, post-serialism, aleatoric procedures, minimalism, and other recent trends.
Prerequisite: MTC 241.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 313. 18th Century Counterpoint. 3 Credit Hours.
Two-part keyboard counterpoint in the style of J. S. Bach, beginning with a modified species approach and including composition of dance-suite movements and inventions. Introduction to three-part writing is also included.
Prerequisite: MTC 240.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MTC 401. Composition VII. 2 Credit Hours.
Individual compositional projects including all media with an emphasis on advanced problems in composition.
Prerequisite: MTC 302.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 402. Composition VIII. 1 Credit Hour.
Advanced Composition. Continuation of MTC 401.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 404. Live Performance Musical Direction. 3 Credit Hours.
Project-based practicum course in collaboration with other Performance department, designed to provide students the opportunity to prepare music for a live concert and serve as Musical Director (MD) thereof. Particular emphasis is placed on musical material (repertoire, arrangements, score/parts preparation), rehearsal techniques, and real-time/live performance direction/conducting.
Prerequisite: MTC 403.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 416. Orchestration. 3 Credit Hours.
The uses and possibilities of orchestral instruments as well as scoring for various instrumental groups, including the symphony orchestra.
Prerequisite: MTC 240, or MSJ 240, or MMI 240.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 452. Media Production Project Lab. 2 Credit Hours.
Laboratory component to MTC 404. Course can only be taken concurrently with MTC 404.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MTC 493. Special Projects in Music Theory and Composition. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Requisites: Undergrad Music Students Only and Dean’s Approval and Signature.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 494. Special Topics in Music Theory and Composition. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 499. Senior Recital. 1 Credit Hour.
A public recital of original compositions required of all Music Composition majors.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 501. The Aesthetics of Music. 3 Credit Hours.
Survey of thought and discourse about the nature, roles, values, experiences, and meanings of music. Variety of perspectives, including those of the listener, performer, and composer are addressed. Application to musical interpretation and criticism is included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MTC 505. Analysis and History of Electroacoustic and Acousmatic Music. 2 Credit Hours.
Course examines electroacoustic and acousmatic music from both a historical/literature and analytical perspective. Analytical techniques with a focus on an ecological analysis approach will be conducted as well as a survey of electroacoustic, acousmatic, and digital music.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MTC 506. Digital Editing and Sequencing. 3 Credit Hours.
Computers as control devices for music synthesis and digital manipulation of pre-recorded sounds. Topics include interfacing sequencing software with software synthesizers, performance techniques, and sound design using samples.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 507. Studio Licensing. 2 Credit Hours.
Licensing for access to Digital Arts and Media Writing Studios. Topics covered include digital audio recording and editing, sound synthesis/design, audio signal processing, sound analysis and spatial placement of sound. Course includes studio-use qualifying exams.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MTC 515. Choral Arranging. 3 Credit Hours.
Arranging for choir and vocal groups with and without instrumental accompaniment in all styles.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 516. Advanced Orchestration. 3 Credit Hours.
Scoring for the symphonic orchestra with an emphasis on recent techniques.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 517. Analysis of Popular Music Since 1950. 3 Credit Hours.
Course examines popular music in the second half of the Twentieth Century from a music analytical perspective. Critical skills needed for this analysis are identified and developed. Analytical techniques for understanding the determination and utilization of musical elements and structures in contemporary popular music are applied. Various contemporary genres and some precursors are examined and particular stylistic determinants of their compositional and performance models are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTC 518. Advanced Counterpoint. 3 Credit Hours.
Three-voice fugal writing in Bach's style, followed by compositional projects in a variety of twentieth-century contrapuntal styles.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MTC 521. Multimedia for Musicians. 3 Credit Hours.
Presents an overview and introduction to the creation of multimedia projects for presentation on the Web. Focus is placed on building websites, and the creation of multimedia content for online delivery. Software tools for the manipulation of digital media, including audio and video, are utilized in the realization of course projects.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MTC 567. Electronic and Computer Music Seminar. 1-3 Credit Hours.
Advanced techniques and applications in electronic and computer music. Topics may include electronic projects in composition, performance, research, programming, or other as approved by instructor.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MTC 593. Special Projects in Music Theory and Composition. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MTC 594. Special Topics in Music Theory and Composition. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

B.M. in Music Theory and Composition

Introduction
The Bachelor of Music in Composition is designed to:

1. Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition and performance.
2. To provide student access to varied composition communities.
3. To continue to build upon the Frost School of Music’s reputation as an innovative, forward-thinking, and first-rate center for advanced study.
4. To maintain the highest educational, professional, and ethical standards.

Goals of the program are:

1. To provide students with training to be fluent in basic compositional skills.
2. To help students understand various directions that are available to composers in the 21st century.
3. To help students perform and realize their music.

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Composition. Prospective students are expected to furnish evidence of compositional ability.

Educational Objectives
- Students develop basic compositional skills of varying lengths and genres.
- Students compose works utilizing various compositional techniques and styles.
- Students compose works for varied instrumentation and/or media.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Minor in Music Composition

The mission of the Bachelor of Music in Composition program is to:

- Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition and performance.
- To provide student access to varied composition communities.
- To continue to build upon the Frost School of Music’s reputation as an innovative, forward-thinking, and first-rate center for advanced study.
- To maintain the highest educational, professional, and ethical standards.

Goals

- To provide students with training to be fluent in basic compositional skills.
- To help students understand various directions that are available to composers in the 21st century.
- To help students perform and realize their music.

Student Learning Outcomes

- Students will develop basic compositional skills of varying lengths and genres.
- Students will have works performed in concerts, recitals, and reading sessions.
- Students will demonstrate the ability to compose for a variety of instruments.

Minor in Music Composition

A minor in music composition is primarily intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. Students interested in this minor are required to submit a portfolio to the chair of the department for approval before declaring the minor. The minor consists of 15 credit hours.

Studio Music and Jazz (MSJI) & (MSJV)

Dept. Code: MSJ

The Department of Studio Music and Jazz includes two programs, instrumental and vocal.

Introduction

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
• Foster faculty creativity and performance which serves as a role model for students.
• Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
• Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
• Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Educational Objectives
• Students will develop musical performance skills necessary to make them competitive in the jazz world.
• Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
• Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
• Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
• Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
• Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Certificates
• Jazz Performance (p. 1489)

MSJ 101. Large Jazz Ensemble Placeholder. 1 Credit Hour.
Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from your studio professor.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MSJ 103. Jazz Piano I. 1 Credit Hour.
First level of four jazz piano courses that cover the rudiments of jazz piano, consisting of group instruction covering basic piano voicings, voice leading, and functional harmony at the keyboard. This series of courses will cover typical jazz chord progressions such as II V I in major and minor, as well as learning jazz standards using various approaches on the piano.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 104. Jazz Piano II. 1 Credit Hour.
Second level of four jazz piano courses that cover the rudiments of jazz piano, consisting of group instruction covering basic piano voicings, voice leading, and functional harmony at the keyboard. This series of courses will cover typical jazz chord progressions such as II V I in major and minor, as well as learning basic jazz standard using various approaches on the piano.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MSJ 107. Skills Lab I. 1 Credit Hour.
Chamber music performance of selected repertoire with a concentration in Bebop and the music of Charlie Parker, Dizzy Gillespie, and Thelonius Monk, along with secondary figures from the Bebop era, 1945-1955. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.), and Jazz arranging for small ensembles.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSJ 108. Skills Lab II. 1 Credit Hour.
Chamber music performance of selected repertoire with a concentration in Jazz and popular music in America in the 1950's, including the repertoire of prominent popular music composers such as George Gershwin, Cole Porter, Richard Rodgers, and others. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.), and Jazz arranging for small ensembles.
Corequisite: MSJ 141.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
**MSJ 111. Jazz Vocal Techniques I. 1 Credit Hour.**
Analysis and application of singing styles and attendant skills, techniques and repertoire required in performance and recording of jazz, popular music, and other current idioms.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

**MSJ 113. Analysis and Evolution of Jazz Styles I. 3 Credit Hours.**
An overview of the musical styles and genres of the late nineteenth and early twentieth century leading to the development of Jazz music. Then an in-depth study of early Jazz in America and its innovators, including Louis Armstrong, Jelly Roll Morton, and Duke Ellington. Also, a survey of the major style periods of Modern Jazz from 1945 to the present, including prominent artists from each style period.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSJ 124. Introduction to Jazz Improvisation. 3 Credit Hours.**
Introduction to the harmonic, melodic, and rhythmic techniques of Jazz Improvisation.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

**MSJ 125. Introduction to Jazz Vocal Improvisation. 3 Credit Hours.**
Introduction to the harmonic, melodic, and rhythmic techniques of Jazz Improvisation.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

**MSJ 134. E.C.M. Ensemble. 1 Credit Hour.**
This ensemble performs music typical of the contemporary European jazz styles such as those characterized by the Edition of Contemporary Music (E.C.M.) Recording Company.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

**MSJ 136. Small Jazz Ensemble. 1 Credit Hour.**
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

**MSJ 137. Small Jazz Ensemble I. 1 Credit Hour.**
This course is a continuation of MSJ136: Small Jazz Ensemble. Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

**MSJ 139. Small Jazz Vocal Ensemble. 2 Credit Hours.**
A group consisting of 1 to 6 vocalists and 3 to 6 instrumentalists to gain experience in jazz solo and ensemble performance in a small group setting. Exploration of traditional and contemporary jazz literature will be emphasized. Performance of original music by ensemble members is also encouraged.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 140. Experiential Musicianship I. 3 Credit Hours.
Experiential Musicianship I covers the fundamentals of jazz theory and performance. The class is keyboard based. Material includes the basics of melody, harmony and rhythm in the tradition of the jazz art form. Specific topics include chord construction, chord voicings, progressions, voice leading, rhythmic interpretation and aural recognition.
Co-requisite: MSJ 107 and must pass with a C or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 141. Experiential Musicianship II. 3 Credit Hours.
Experiential Musicianship II is a continuation of Exp. Mus. I. Material includes a more in depth study of chord/scale theory, polyrhythmic studies, expansion of keyboard skills via increasingly longer or complicated progressions, aural recognition and transcription.
Co-requisite: MSJ 108.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 142. Small Jazz Ensemble II. 1 Credit Hour.
This ensemble focuses on sectional playing, blend, and musical interpretation. Students will be required to perform in sections of four to eight trombones with a rhythms section. The literature also requires the student to improvise. Students are encouraged to write for the ensemble.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 143. Small Jazz Ensemble III. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 144. Small Jazz Ensemble IV. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 145. Small Jazz Ensemble V. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 146. Small Jazz Ensemble VI. 1 Credit Hour.
Freshmen level group that focuses on the music of Charlie Parker, Dizzy Gillespie, and Thelonius Monk. Issues of modern jazz harmony and rhythm as well as cultivating Bebop vocabulary for improvisation are discussed.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 147. Small Jazz Ensemble VII. 1 Credit Hour.
Group instruction in the various styles of contemporary jazz. Students will acquire improvisational skills while learning repertoire and performance techniques, and strengthen compositional and arranging skills by contributing original compositions and arrangements to the ensemble's repertoire.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 150. Studio Jazz Band. 2 Credit Hours.
This ensemble performs music in the recent big band tradition, from leaders such as Duke Ellington, Count Basie, Buddy Rich, Bob Brookmeyer, and Thad Jones. The group performs on campus with an emphasis on studio recording.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 151. Concert Jazz Band. 2 Credit Hours.
The Concert Jazz Band is the premiere big band at the Frost School of Music. Students are required to perform at an advanced level, and work with a variety of guest artists. Requirements include the ability to sight read difficult material, and to improvise in various styles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 153. Jazz Band III. 1 Credit Hour.
Big Band designed for freshmen and sophomores to gain experience with classic Big Band repertoire.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 155. Monk/Mingus Ensemble. 1 Credit Hour.
This ensemble is dedicated to the study and performance of the music of the influential jazz composers Charles Mingus and Thelonius Monk.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MSJ 156. Funk/Fusion Ensemble. 1 Credit Hour.
Small jazz ensemble focusing on contemporary electric jazz/rock/fusion/Latin styles. Emphasis is placed on original compositions by the members of the ensemble. The most common instrumentation is bass, drums, piano/synthesizer, guitar, and saxophone.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 158. Frost Sextet. 1 Credit Hour.
An advanced ensemble dedicated to the performance of original and standard repertoire in the jazz idiom.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 159. Rhythm and Blues Ensemble. 1 Credit Hour.
Mid-level ensemble for both instrumentalists and vocalists designed to familiarize students with classic Rhythm and Blues material from the 50's, 60's, and 70s, while preparing for a series of concerts throughout the semester. Students are guided through the process of putting a working band together and preparing it for performances and recordings, including what is expected of and from instruments, vocalists, producers, promoters, and other industry personnel.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 160. Avant Garde Ensemble. 1 Credit Hour.
This ensemble offers students the opportunity to develop the "free form" improvisation in either the bebop based style of Ornette Coleman or the fusion oriented style as typified by Bill Laswell.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.
MSJ 162. Jazz Saxophone Ensemble. 1 Credit Hour.
An ensemble dedicated to the study of jazz and contemporary repertoire for the saxophone Quartet/quintet. Skills addressed include sight-reading, intonation and blend, phrasing, rhythmic accuracy, may include rhythm section accompaniment depending on availability. 
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MSJ 164. Contemporary Rhythm Section Techniques I. 1 Credit Hour.
Introduces students to various styles of rhythm section playing—from swing and modern Jazz through Rock, Funk, R&B, and other commercial styles of music. Concepts of sound, groove, balance and blend, repertory, and accompaniment are also discussed.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 165. Contemporary Rhythm Section Techniques II. 1 Credit Hour.
Fundamentals of rhythm section playing for guitarists, pianists, bassists, and drummers. It covers a variety of contemporary styles within the rock, jazz, Latin, and pop idioms. Students are grouped into ensembles which perform in class weekly.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 166. Small Jazz Ensemble Lab. 0 Credit Hours.
Performance Lab designed to work in conjunction with all of the 140 level ensembles. Provides and environment in which students are required to perform on a regular rotating schedule throughout the semester. These performances are critiqued by the institution and other faculty, as well as students, in order to nurture a critical but positive atmosphere.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 167. Salsa Ensemble. 1 Credit Hour.
An ensemble of instrumentalists and singers performing a wide variety of Salsa and Latin jazz styles with emphasis on improvisation.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.

MSJ 169. Jazz Guitar Ensemble I. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 170. Jazz Guitar Ensemble II. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 171. Jazz Guitar Ensemble III. 1 Credit Hour.
A small instrumental ensemble comprised of five electric guitars which perform with bass and drums in a wide variety of contemporary jazz styles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ 172. Jazz Guitar Ensemble (Workshop I). 1 Credit Hour.
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles. Requires: Frost School of Music only.
**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Fall.

MSJ 173. Jazz Guitar Ensemble (Workshop II). 1 Credit Hour.
A small instrumental reading ensemble, comprised of four to eight electric guitars, which studies a variety of contemporary jazz styles. Requires: Frost School of Music only.
**Components:** SEM.
**Grading:** GRD.
**Typically Offered:** Spring.

MSJ 195. Jazz Vocal Ensemble I. 2 Credit Hours.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles. Requires: Frost School of Music only.
**Components:** ENS.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSJ 196. Jazz Vocal Ensemble II. 2 Credit Hours.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles. Requires: Frost School of Music only.
**Components:** ENS.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSJ 197. Jazz Vocal Ensemble III. 1 Credit Hour.
A choir of 12 to 16 voices, with rhythm section, which perform a wide variety of jazz and pop styles. Requires: Frost School of Music only.
**Components:** ENS.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

MSJ 203. Jazz Piano III. 1 Credit Hour.
Third level of four jazz piano courses that cover the rudiments of jazz piano, consisting of group instruction covering basic piano voicings, voice leading, and functional harmony at the keyboard. This series of courses will cover typical jazz chord progressions such as II V I in major and minor, as well as learning basic jazz standard using various approaches on the piano.
**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Fall.

MSJ 204. Jazz Piano IV. 1 Credit Hour.
Fourth level of four jazz piano courses that cover the rudiments of jazz piano, consisting of group instruction covering basic piano voicings, voice leading, and functional harmony at the keyboard. This series of courses will cover typical jazz chord progressions such as II V I in major and minor, as well as learning basic jazz standard using various approaches on the piano.
**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Spring.

MSJ 207. Skills Lab III. 1 Credit Hour.
Chamber music performance of selected repertoire with a concentration in the music of Miles Davis in the 1950’s. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles. Requires: Frost School of Music only.
**Components:** LAB.
**Grading:** GRD.
**Typically Offered:** Fall.
MSJ 208. Skills Lab IV. 1 Credit Hour.
Chamber music performance of selected repertoire from the Hard Bop period (1955-1962) including Blue Note artists. Additional repertoire from a list of American standards will also be assigned. Class sessions will cover historical/stylistic performance practice, aural skills (transcription, analysis, sight-reading, etc.) and Jazz arranging for small ensembles.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MSJ 211. Jazz Vocal Techniques III. 1 Credit Hour.
Course provides performance experience in the Rock/Funk and Rock Ballad idioms that require strong vocal projection and presentation.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSJ 212. Jazz Vocal Techniques IV. 1 Credit Hour.
Advanced techniques for the Jazz/Pop Vocalist in live performance.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MSJ 213. Analysis and Evolution of Jazz Styles II. 3 Credit Hours.
An overview of the musical styles and genres of the middle and late twentieth century encompassing the evolution of Modern Jazz music including an in-depth study of each period of Modern Jazz and its innovators. Also included is a survey of the major style periods of Rock music from 1945 to the present with prominent artists from each style period.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 220. Basic Drumset Styles and Techniques (Part 1). 3 Credit Hours.
This course explores the basic sticking, swing, backbeat drumset techniques, basic world drumset styles, and chart reading.
Requisites: Undergrad Music Students Only and Dean's Approval and Signature.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSJ 240. Experiential Musicianship III. 3 Credit Hours.
Experiential Musicianship III continues to build on skills acquired in the previous two semesters. Material includes continued development of keyboard skills and aural recognition through expansion of repertoire, modal and non-dominant/tonic harmonic schemes, basslines and counterpoint, harmonization of melodies, and re-harmonization of basic progressions and transcription.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 241. Experiential Musicianship IV. 3 Credit Hours.
Experiential Musicianship IV culmination of the four level sequence. Students are expected to understand and aurally recognize advanced harmonic, melodic, and rhythmic material. New material may include Latin and other straight-eight rhythms, multi-voice counterpoint, advanced re-harmonization, and improvising at the keyboard. Keyboard skills run concurrent with Jazz Arranging II techniques (MSJ520).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 242. Jazz Percussion Techniques. 1 Credit Hour.
Group instruction in jazz, contemporary, and ethnic drumset/percussion techniques with emphasis on basic skills for performance and recording. Additionally, appropriate teaching techniques, methods, and materials necessary for public school pedagogy will be covered. Course may be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 3. Jazz Forum. 0 Credit Hours.
A weekly meeting of jazz students and faculty for performance, master classes, clinics presented by students, faculty and guest artists.
Requisite: Frost School of Music only.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.
MSJ 320. Basic Drumset Styles and Techniques (Part 2). 1 Credit Hour.
This course is a continuation of MSJ 220. It explores advanced sticking, swing, backbeat drum set techniques, advanced world drum set styles, and chart reading.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MSJ 340. Jazz Skills III. 3 Credit Hours.
Jazz Skills III continues to build on skills acquired in the previous two semesters. Material includes continued development of keyboard skills and aural recognition through expansion of repertoire, modal and non-dominant/tonic harmonic schemes, bass lines and counterpoint, harmonization of melodies, and re-harmonization of basic progressions and transcription.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MSJ 341. Jazz Skills IV. 3 Credit Hours.
Jazz Skills IV is the culmination of the four-level Jazz Skills sequence. Students are expected to understand and aurally recognize advanced harmonic, melodic, and rhythmic material. New material may include Latin and other straight-eighth rhythms, multi-voice counterpoint, advanced re-harmonization, and improvising at the keyboard. Keyboard skills run concurrent with Jazz Arranging II techniques (MSJ 520).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 342. Technology Skills. 3 Credit Hours.
Recording projects combining acoustic instruments with software based instruments in a Digital Audio Workstation. Studio recording techniques including microphone placement will be demonstrated in a lab environment. Projects will be based on student compositions and/or arrangements. Post production will include mixing, mastering and CD manufacturing.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 371. Jazz Improvisation I. 3 Credit Hours.
Fundamentals of jazz harmony with emphasis on simple chord progressions, altered scales, and modes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 372. Jazz Vocal Improvisation I. 3 Credit Hours.
Fundamentals of jazz harmony with emphasis on complex harmonic progressions and tunes.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 381. Jazz Rehearsal Techniques. 2 Credit Hours.
This course provides practical procedures and materials for beginning instrumental conducting students with an emphasis on the direction of large jazz ensembles.
Prerequisite: MSJ 241 And Requisite: MSJI or MSJV Majors.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 430. Applied Jazz Instruction. 1-2 Credit Hours.
Advanced private study in the jazz idiom. Topics may include improvisation, theory, and composition, at the discretion of the teacher. Students must have completed five semesters on the principal instrument. Permission of both course instructor and principal instrument teacher/advisor required.
Components: LSN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 431. Applied Jazz Instruction 2. 1-2 Credit Hours.
Advanced private study in the jazz idiom. Topics may include improvisation, theory, and composition, at the discretion of the teacher. Students must have completed five semesters on the principal instrument. Permission of both course instructor and principal instrument teacher/advisor required.
Prerequisite: MSJ 430.
Components: LSN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MSJ 493. Special Projects in Studio Music and Jazz. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 494. Special Topics in Studio Music and Jazz. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 499. Senior Recital. 1 Credit Hour.
A public recital of one hour or more. Course is required of all performance majors.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 509. Jazz Composition I. 3 Credit Hours.
Study of advanced composition techniques as applied to the Jazz idiom, making extensive use of analysis of established compositions and compositional methods. Both the individual and interactive characteristics of melody, harmony, rhythm, and form will be stressed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 510. Jazz Composition II. 2 Credit Hours.
This course is a continuation of MSJ 500 with an emphasis on melody writing, reharmonization techniques, pentatonic/blues composition, and an introduction to advanced harmonic materials.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 516. Jazz Vocal Arranging. 3 Credit Hours.
Analysis and techniques of jazz vocal writing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 519. Advanced Modern Arranging I. 3 Credit Hours.
Advanced arranging and composition for the Jazz and studio ensemble.
Prerequisite: MSJ 241.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MSJ 520. Advanced Modern Arranging II. 3 Credit Hours.
Advanced arranging and composition for the Jazz and studio ensemble.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MSJ 522. Introduction to Midi Sequencing and Digital Workstations. 2 Credit Hours.
An introduction to Midi Sequencing with hands-on experience working with a computer sequencing workstation. Topics include sequencing, quantizing, editing, mixing, and effects processing.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 560. Advanced Jazz Improvisation Theory. 3 Credit Hours.
Review of fundamentals and introduction of advanced topics in jazz harmony and scale resources for improvisation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MSJ 565. Advanced Improvisation I. 3 Credit Hours.
Exploration of advanced Jazz improvisation performance and practice techniques. Utilization of non-traditional harmonic motion, advanced chord scale relationships, and motivic development will be stressed, with the goal of musicality in improvisation. Enrollment open to seniors or graduate MSJ majors (or permission of instructor).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 566. Advanced Improvisation II. 3 Credit Hours.
Refinement of improvisation concepts leading towards the establishment of a personal style of playing. Open only to senior or graduate majors in Studio Music and Jazz.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ 593. Special Projects in Studio Music and Jazz. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ 594. Special Topics in Studio Music and Jazz. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MSJ JAR. Applied Jazz Arranging. 1 Credit Hour.
Applied Jazz Arranging level R is the sixth level of DMA private jazz arranging lessons. Applied Jazz Arranging level R is the sixth level of DMA private jazz arranging lessons. Emphasis is placed on developing an individual approach to arranging and orchestration and more exploration of small and large jazz ensembles and writing for strings in a jazz setting. Contemporary models are examined from both the classical and jazz repertoire.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JB1. Jazz Bass. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Basic techniques, sight-reading. Major, minor, diminished, and whole tone scales. Chord structure and analysis. Bass line construction, basis of walking lines. Voice leading for bass lines and improvisation. Etudes and studies in all styles. Repertoire: Standards and Jazz.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JB3. Jazz Bass. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to advanced harmonic applications. Expanding traditional improvisational vocabulary. Creating original vocabulary.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBC. Jazz Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to solo bass techniques. Advanced arpeggios and scales. Pentatonic theory and applications. Improvisational vocabulary (traditional).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JBD. Jazz Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to solo bass techniques. Advanced arpeggios and scales. Pentatonic theory and applications. Improvisational vocabulary (traditional). Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBF. Jazz Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to advanced harmonic applications. Expanding traditional improvisational vocabulary. Creating original vocabulary. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBG. Jazz Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to recital preparation. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBH. Jazz Bass. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous materials in addition to recital preparation. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JBS. Secondary Jazz Bass. 1 Credit Hour.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JD1. Jazz Drumset. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Sticking technique, basic hand/foot patterns. Analysis of styles, history of drum set. Rhythm section interaction. Basic transcription, chart reading. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JD3. Jazz Drumset. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced jazz styles and comping, odd note groupings, advanced chart reading, advanced hand/foot patterns. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JDC. Jazz Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced analysis or major drum set artists. Advanced transcription. Soloing over form using motives, dynamics, and subdivision, comping patterns. Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JDD. Jazz Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced analysis or major drum set artists. Advanced transcription.Soloing over form using motives, dynamics, and subdivision, comping patterns.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JDF. Jazz Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced jazz styles and comping, odd note groupings, advanced chart reading, advanced hand/foot patterns.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JDG. Jazz Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Displacement, metric modulation, preparation for recital, developing an individual voice.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JDH. Jazz Drumset. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Displacement, metric modulation, preparation for recital, developing an individual voice.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JDS. Secondary Jazz Drumset. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JG1. Jazz Guitar. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Left and right hand development. Basic fretboard theory including arpeggios, voice leading (2 string studies), blues and bebop scales. Accompanying: 3-note voicings. Introduction to transcription. Application of the concepts studied to basic repertoire.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JG3. Jazz Guitar. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Works by Bach, Galbraith and others. Building of standard/jazz repertoire including works by Arlen, Porter, Kern, Parker, Ellington, etc. Improvisation and harmonic studies based on the foregoing. Eartraining as required. Use of Jamey Aebersold play-along series.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JGC. Jazz Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of repertoire and continuation of technical studies. Improvisation using arpeggios with tension substitutions. Application of major and melodic minor modes. More advanced transcriptions and refinement of time feel.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JGD. Jazz Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further development of repertoire and continuation of technical studies. Improvisation using arpeggios with tension substitutions. Application of major and melodic minor modes. More advanced transcriptions and refinement of time feel. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JGF. Jazz Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Works by Bach, Galbraith and others. Building of standard/jazz repertoire including works by Arlen, Porter, Kern, Parker, Ellington, etc. Improvisation and harmonic studies based on the foregoing. Eartraining as required. Use of Jamey Aebersold play-along series. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JGG. Jazz Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. More advanced repertoire (works by Corea, Hancock, etc.). Continued expansion of harmonic concepts and exploration of chord voicings and applications. Use of Aebersold series. Assistance with senior recital preparation. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JGH. Jazz Guitar. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. More advanced repertoire (works by Corea, Hancock, etc.). Continued expansion of harmonic concepts and exploration of chord voicings and applications. Use of Aebersold series. Assistance with senior recital preparation. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JGS. Secondary Jazz Guitar. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Left and right hand development. Basic fretboard theory including arpeggios, voice leading (2 string studies), blues and bebop scales. Accompanying: 3-note voicings. Introduction to transcription. Application of the concepts studied to basic repertoire. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JP1. Jazz Piano. 2 Credit Hours.
Students will expand and refine application of fundamental chord voicings, chord-scale relationships, be-bop and blues vocabulary, and develop a strong rhythmic base. Solo piano and ensemble/accompaniment formats will be addressed. Technique will be evaluated to identify areas in need of improvement. Methods will include: transcription, analysis, composition of single lines and arrangements, tune learning, and various improvisation exercises. 
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JP3. Jazz Piano. 2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Selected exercises from the Dohnanyi or Pishna exercise books. Augmented scales and modes of major in all keys, in both hands and in at least two octaves with a swing (triplet) subdivision. Introduction to modal harmony and sideslipping through study of plateau modal compositions (tunes with long sections of the same modality.) Pentatonic scales in all keys. Literature: Blues in the stride solo piano format. Analysis and transcription of artists who played in this style such as Tatum, Johnson, Smith, and Peterson. Memorization of at least two tunes per lesson in at least three key centers, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of the above to be performed both with bass accompaniment and in solo piano format with sections in stride style. Introduction to the Bill Evans piano style through performance of his transcribed piano pieces.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPC. Jazz Piano. 1-2 Credit Hours.
Students will expand and refine knowledge of chord voicings, chord scale relationships, and rhythmic integrity in swing and other styles. Modal, chromatic, and non-traditional harmonic concepts will be introduced. Advanced rhythmic approaches to improvisation and accompaniment will be explored. Expressive aspects of performance will be addressed. Technique will be evaluated to identify areas in need of improvement. Methods will include: transcription, analysis, composition of single lines and arrangements, tune learning, and various improvisation exercises.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPD. Jazz Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Arpeggiation of major, minor, diminished and augmented seventh chords, in both hands and in at least two octaves with a swing (triplet) subdivision. Introduction to melodic harmonization through practice of "Shearing Style" and "Drop Two" scaler exercises. Introduction of the ii-V7-I chord progression in all keys as applied to tunes which have a harmonic rhythm of two changes per bar such as Confirmation (Parker) and in Your Own Sweet Way (Brubeck). Literature: Study of the "I Got Rhythm" chord progression. Memorization of at least two tunes per lesson in their original key, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of above to be performed with bass accompaniment, or in solo piano format. Study, performance and analysis of transcribed solos such as those found in the Omnibook (Parker). Introduction to solo piano format through study of transcribed pieces.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPF. Jazz Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Selected exercises from the Dohnanyi or Pishna exercise books. Augmented scales and modes of major in all keys, in both hands and in at least two octaves with a swing (triplet) subdivision. Introduction to modal harmony and sideslipping through study of plateau modal compositions (tunes with long sections of the same modality.) Pentatonic scales in all keys. Literature: Blues in the stride solo piano format. Analysis and transcription of artists who played in this style such as Tatum, Johnson, Smith, and Peterson. Memorization of at least two tunes per lesson in at least three key centers, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of the above to be performed both with bass accompaniment and in solo piano format with sections in stride style. Introduction to the Bill Evans piano style through performance of his transcribed piano pieces.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JPG. Jazz Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Selected exercises from the Dohnanyi or Pishna exercise books. Augmented scales and modes of major in all keys, in both hands and in at least two octaves with a swing (triplet) subdivision. Introduction to modal harmony and sideslipping through study of plateau modal compositions (tunes with long sections of the same modality.) Pentatonic scales in all keys. Literature: Blues in the stride solo piano format. Analysis and transcription of artists who played in this style such as Tatum, Johnson, Smith, and Peterson. Memorization of at least two tunes per lesson in at least three key centers, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of the above to be performed both with bass accompaniment and in solo piano format with sections in stride style. Introduction to the Bill Evans piano style through performance of his transcribed piano pieces.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPH. Jazz Piano. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technique: Selected exercises from the Dohnanyi or Pishna exercise books. Augmented scales and modes of major in all keys, in both hands and in at least two octaves with a swing (triplet) subdivision. Pentatonic scales in all keys. Literature: Blues in the stride solo piano format. Analysis and transcription of artists who played in this style such as Tatum, Johnson, Smith, and Peterson. Memorization of at least two tunes per lesson in at least three key centers, at least 75% of which should be tunes in the "American standard" format featuring composers such as Berlin, Porter, Kahn, Gershwin, etc. All of the above to be performed both with bass accompaniment and in solo piano format with sections in stride style. Introduction to the Bill Evans piano style through performance of his transcribed piano pieces.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JPS. Secondary Jazz Piano. 1 Credit Hour.
Students enroll in 1 credit and receive one 30-min lesson per week. Students will expand and refine application of fundamental chord voicings, chord-scale relationships, be-bop and blues vocabulary, and develop a strong rhythmic base. Solo piano and ensemble/accompaniment formats will be addressed. Technique will be evaluated to identify areas in need of improvement. Methods will include: transcription, analysis, composition of single lines and arrangements, tune learning, and various improvisation exercises.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JS1. Jazz Saxophone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz saxophone students. Technical Requirements: Introduction to principals of saxophone acoustics; introduction to tone production, intonation, tonal color, and blend; basic technique, chords and scale studies; jazz phrasing; establishment of a "tune list" (repertoire); study of improvised Solos through transcription; major scales full range, thirds, diatonic seventh chords in level A and in level B, melodic minor scales full range, thirds, diatonic seventh chords.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JS3. Jazz Saxophone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz saxophone students. Technical Requirements: Continuation of tone and technique as needed; augmented scale; rhythmic exercises from drum methods; continue extended range studies; a cappella improvisation; studies in melodic/rhythmic development.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JSC. Jazz Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of earlier levels as needed; diminished scales; pentatonic scales/patterns; extended range exercises; application of melodic minor/pentatonic scales; chromatic scale extensions; tritone substitutions.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ JSD. Jazz Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of earlier levels as needed; diminished scales; pentatonic scales/patterns; extended range exercises; application of melodic minor/pentatonic scales; chromatic scale extensions; tritone substitutions.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JSF. Jazz Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of tone and technique as needed; augmented scale; rhythmic exercises from drum methods; continue extended range studies; a cappella improvisation; studies in melodic/rhythmic development.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JSG. Jazz Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Recital Preparation. Building of repertoire; concentration on selected influential composers: Ellington, Shorter, Hancock, Miller, Silver, Jobim, Golson, Lieberman, etc. Review of teaching methods, materials. Advanced technique studies: Bozza Etudes Caprices, Lacour 8 Difficult studies. Topics of interest as decided by student in consultation w/ teacher. Total 80 tunes (minimum) by end of H level.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JSH. Jazz Saxophone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Recital Preparation. Building of repertoire; concentration on selected influential composers: Ellington, Shorter, Hancock, Miller, Silver, Jobim, Golson, Lieberman, etc. Review of teaching methods, materials. Advanced technique studies: Bozza Etudes Caprices, Lacour 8 Difficult studies. Topics of interest as decided by student in consultation w/ teacher. Total 80 tunes (minimum) by end of H level.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ JSS. Secondary Jazz Saxophone. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Introduction to principals of saxophone acoustics; introduction to tone production, intonation, tonal color, and blend; basic technique, chords and scale studies; jazz phrasing; establishment of a "tune list" (repertoire); study of improvised Solos through transcription; major scales full range
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TB1. Jazz Trombone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz trombone students. Technical Requirements: Daily routine/classical etudes. Major, melodic minor, diminished scales, Dorian and Mixolydian modes, dominant 7th arpeggios, minor 7th arpeggios. All major and minor 3rds followed by respective dominant 7ths.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TB3. Jazz Trombone. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz trombone students. Technical Requirements: Previous material, in addition to standard tunes (2 per week). 251 licks in major and minor. Diminished patterns.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ TBC. Jazz Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to blues and rhythm changes in 12 keys. Voice Leading (3rds and 7ths). Transcription techniques/assigned transcriptions. Standard tunes (1 per week).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TBD. Jazz Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to blues and rhythm changes in 12 keys. Voice Leading (3rds and 7ths). Transcription techniques/assigned transcriptions. Standard tunes (1 per week).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TBF. Jazz Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material, in addition to standard tunes (2 per week). 251 licks in major and minor. Diminished patterns.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TBG. Jazz Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to augmented scales and patterns. Pentatonic scales and patterns. Recital preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TBH. Jazz Trombone. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Previous material in addition to augmented scales and patterns. Pentatonic scales and patterns. Recital preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TBS. Secondary Jazz Trombone. 1 Credit Hour.
1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Daily routine/classical etudes. Major, melodic minor, diminished scales, Dorian and Mixolydian modes, dominant 7th arpeggios, minor 7th arpeggios. All major and minor 3rds followed by respective dominant 7ths.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TP1. Jazz Trumpet. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TP3. Jazz Trumpet. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz trumpet students. Technical Requirements: Continuation of range studies in addition to advanced etudes such as Bitsch and Charlier. Advanced jazz repertoire. Diminished and augments scales. Studio techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ TPC. Jazz Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of basic skills in addition to range studies utilizing the Wedge breath. Transcribing jazz trumpet solos. A cappella blues in all keys.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TPD. Jazz Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of basic skills in addition to range studies utilizing the Wedge breath. Transcribing jazz trumpet solos. A cappella blues in all keys.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TPF. Jazz Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Study of advanced jazz repertoire. Diminished and augments scales. Studio techniques.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TPG. Jazz Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Study of advanced jazz repertoire. Recital preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TPH. Jazz Trumpet. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Study of advanced jazz repertoire. Recital preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ TPS. Secondary Jazz Trumpet. 1 Credit Hour.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VB1. Jazz Vibraphone. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VB3. Jazz Vibraphone. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VBS. Secondary Jazz Vibraphone. 1 Credit Hour.
Secondary lessons at the undergraduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MSJ VO1. Jazz Voice. 2 Credit Hours.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VO3. Jazz Voice. 2 Credit Hours.
1-hour lesson and 50 minute studio class for jazz voice students. Repertoire: 15 Songs, continuation of standard repertoire at more advance and complex level, including bebop, original material, modal tunes and selections of harmonic and melodic complexity with improvisation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VOC. Jazz Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 24 Songs: 16 selections from Swing, Ballad, Jazz Waltz and Latin idioms. 4 Rock/Funk/R&B arrangements in coordination with MSJ 301. Mini-Concert (4 song set) Note: Sophomore proficiency.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VOD. Jazz Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 24 Songs: 16 selections from Swing, Ballad, Jazz Waltz and Latin idioms. 4 Rock/Funk/R&B arrangements in coordination with MSJ 301. Mini-Concert (4 song set) Note: Sophomore proficiency.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VOF. Jazz Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, continuation of standard repertoire at more advance and complex level, including bebop, original material, modal tunes and selections of harmonic and melodic complexity with improvisation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VOG. Jazz Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, same styles as above, Recital preparation, review of repertoire list and audition preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MSJ VOH. Jazz Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Repertoire: 15 Songs, same styles as above, Recital preparation, review of repertoire list and audition preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
B.M. in Studio Music and Jazz Instrumental

Dept. Code: MSJ

The instrumental curriculum in Studio Music and Jazz is designed for interested and qualified students who desire to continue to develop to the highest degree their background and skills in the performance of studio music and jazz. Admission to this major pre-supposes musical training in jazz on the principal instrument.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Instrumental students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.

2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MSJ 213 Analysis & Evolution of Jazz Styles II, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Mission
The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Goals
- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Student Learning Outcomes
- Students will develop proficiency in instrumental performance skills necessary to be competitive in the jazz and contemporary music professions.
- Students will develop proficiency in ensemble performance skills necessary for participation and functionality in the jazz and contemporary music professions.
- Students will develop proficiency in improvisation, composition, arranging, and interaction skills necessary for successful performance within the jazz idiom and a variety of styles appropriate to the jazz and contemporary music profession.
- Students will develop the technological proficiency necessary for a career in the jazz and contemporary music profession.

B.M. in Studio Music and Jazz Voice
Dept Code: MSJ
The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major presupposes music training in jazz.
Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Vocal students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.

2. MSJ VO3 Private Lesson Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MSJ 213 Analysis & Evolution of Jazz Styles II, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Mission

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Goals

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Student Learning Outcomes

- Jazz Vocal students will demonstrate an exceptional level of fluidity, fluency and facility in their vocal technique by the time they graduate.
- Jazz Vocal students will demonstrate an exceptional level in their improvisational structure by indicating the harmonic scheme, phrasing of melodic musical statement and creative use of compositional and stylistic components.
- Jazz Vocal students will demonstrate an exceptional level in their interpretation of jazz literature. Interpretation will be appropriate, relevant, and complimentary beyond the expectations of the musical task.

Certificate in Jazz Performance

Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

Students may enroll in the MSJ or Performer’s Certificate in Jazz Studies. Students may not earn both credentials.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Vocal Performance (MVP)

Dept. Code: MVP

The Department of Vocal Performance offers a bachelor of music degree in vocal performance.

Certificates

- Vocal Performance (p. 1500)

**MVP 101. Choir Ensemble Placeholder. 1 Credit Hour.**

Ensemble placeholder course for new students to enroll in before ensemble placement auditions during Frost Orientation. Please note, you will have to drop this course and enroll in your correct ensemble when receive your official ensemble placement from Dr. Karen Kennedy.

Components: ENS.
Grading: GRD.
Typically Offered: Fall.

**MVP 144. Vocal Techniques for Non-Majors. 1 Credit Hour.**

Class instruction in fundamentals of singing, breath control, tone production, diction, and solo singing for non-music majors. Basic music reading skills are taught.

Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

**MVP 147. Men's Chorale. 1 Credit Hour.**

This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.

Components: ENS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**MVP 148. Bella Voce. 1 Credit Hour.**

This ensemble is open to the entire university community. Students will work on all aspects of choral singing, including skills in basic musicianship. This ensemble presents two or three concerts per semester.

Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MVP 167. Music Theatre Workshop. 1 Credit Hour.
Participation in a fully-staged production or supervised classwork and projects which integrate the skills of the musical theatre singer/actor.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 180. Symphonic Choir. 1 Credit Hour.
Study and performance of choral literature appropriate for large choir, including choral orchestral masterworks.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 181. Choral Conducting I. 2 Credit Hours.
This course provides practical procedures and materials for beginning conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 182. Choral Conducting II. 2 Credit Hours.
This course provides practical procedures and materials for advanced conducting students. Students demonstrate refined skills in conducting musical styles and independence of gesture. A strong emphasis is placed on conducting of mixed meters.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 184. Chamber Singers. 1 Credit Hour.
An ensemble of eighteen to twenty undergraduate and graduate students, the ensemble performs challenging chamber choir repertoire from the Renaissance through the Twentieth Century.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 185. Frost Chorale. 2 Credit Hours.
This ensemble performs significant choral literature with an emphasis on music of the Twentieth-Century and on choral/orchestral works including opera. Open to all qualified undergraduate students, regardless of major.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 188. Opera Theater I. 1 Credit Hour.
Typically taken in the first semester of freshman year by vocal performance majors. Basic stage techniques will be studied and mastered. The learning process repertoire, basic acting and performance techniques will be addressed. Methods of communication of text and emotion will be studied and applied. Emphasis will be on solo repertoire with possible participation in fall opera production.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MVP 189. Opera Theater II. 1 Credit Hour.
Typically taken in the second semester of the first year by vocal performance majors. Further research, development and application of stage deportment, character development, acting skills, communication of emotion and text. Repertoire will include solo songs, arias and small ensembles and possible participation in spring opera production.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.

MVP 196. Singing for the Stage I-A. 1 Credit Hour.
The selection, learning process, and performance of Musical Theatre Songs with emphasis on tone production and style.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.
MVP 197. Singing for the Stage I-B. 1 Credit Hour.
Continuation of MVP 196.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 205. Acting for Opera. 2 Credit Hours.
This course is designed to combine acting techniques with singing, dealing specifically with challenges presented to the singing actor and including musical styles and periods, period fashion and props, movement, and stage techniques for recitative, aria and ensemble performance.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 206. Acting for Opera - Intermediate. 2 Credit Hours.
Course designed to continue to develop acting and character development skills for operatic performance.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MVP 250. Lyric Diction for Singers - English and Italian. 2 Credit Hours.
Designed for voice majors and principals, focus on pronunciation skills for singing in English and Italian. International Phonetic alphabet and rules for singers Italian languages will be applied to Art Song, Opera, and Oratorio.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 252. Lyric Diction for Singers - German and French. 2 Credit Hours.
Designed for voice majors and principals, focus on pronunciation skills for singing in German and French. International Phonetic Alphabet and rules for singers. Italian languages will be applied to Art Song, Opera, and Oratorio.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MVP 288. Stagecraft & Acting for Opera. 1 Credit Hour.
This course is designed to equip students with the fundamental stagecraft and acting skills unique to operatic performing. Physical release and expression, coordination, mental agility, individual artistry, creativity and emotional availability are all critical to the successful singing actor in opera, and the work of this course is to build a solid foundation in these areas.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 289. Opera Theater IV. 1 Credit Hour.
Typically taken in the 2nd semester, sophomore year by vocal performance majors. Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I, II, and III.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.

MVP 294. Singing for Actors. 1 Credit Hour.
The preparation of song literature and audition material for actors (can be repeated for credit).
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MVP 296. Singing for the Stage II-A. 1 Credit Hour.
Instruction in auditioning methods and materials for American musical theatre.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 297. Singing for the Stage II-B. 1 Credit Hour.
Instruction in preparing vocal material for musical scenes drawn from American musical theatre.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 388. Stagecraft & Acting for Opera. 1 Credit Hour.
This course is designed to equip students with the fundamental stagecraft and acting skills unique to operatic performing. Physical release and expression, coordination, mental agility, individual artistry, creativity and emotional availability are all critical to the successful singing actor in opera, and the work of this course is to build a solid foundation in these areas.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 389. Opera Theater VI. 1 Credit Hour.
Typically taken in the 2nd semester, junior year by vocal performance majors. Course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I-V.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MVP 399. Junior Recital. 1 Credit Hour.
A public recital of one half-hour or more. Course required of all Vocal Performance majors.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 415. Auditioning I. 2 Credit Hours.
Students prepare three to five audition pieces, photos, and resumes. Income tax, unions, opportunity, and methods of searching for and obtaining work is included. Course culminates in a seven to ten day trip to New York attending auditions.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 416. Auditioning II. 2 Credit Hours.
Continuation of MVP 415.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MVP 431. Musical Theatre Styles I. 3 Credit Hours.
Course topics include creating a character through song and dialogue, making transition from songs in to and out of scenes, and becoming comfortable and familiar with the style and performance unique to musical theatre.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.
MVP 488. Stagecraft & Acting for Opera. 1 Credit Hour.
This course is designed to equip students with the fundamental stagecraft and acting skills unique to operatic performing. Physical release and expression, coordination, mental agility, individual artistry, creativity and emotional availability are all critical to the successful singing actor in opera, and the work of this course is to build a solid foundation in these areas.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MVP 489. Opera Theater VIII. 1 Credit Hour.
Typically taken by Vocal Performance majors in the 2nd semester, senior year. course designed to continue to develop acting and character development skills and apply techniques learned in Opera Theater I-VIII.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.

MVP 493. Special Projects in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 494. Special Topics in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 499. Senior Recital. 1 Credit Hour.
A public recital of one hour or more. Course is required of all performance majors.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 508. Choral Score Study. 2 Credit Hours.
In depth study of selected choral or choral/orchestral works related to literature being performed by university ensembles during the academic year.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 538. Vocal Pedagogy. 2-3 Credit Hours.
Course covers methods and concepts in the teaching of singing. Emphasis is placed on psychological, physiological, and acoustical principles involved in voice production with practical application, observing and teaching individual and class voice in a supervised environment.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MVP 552. Vocal Performance Preparation. 1 Credit Hour.
Musical preparation of a wide range of assigned vocal literature from all periods for performance in forums, juries, and recitals. Special emphasis is on musical values, styles, translations of texts, diction, pronunciation of Italian, German, French, and English, and memorization.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MVP 580. Opera Production. 1 Credit Hour.
Operatic production for main stage production, scenes, and other productions. Open only to students that are cast in productions, as determined by audition and faculty decision. Typically taken by vocal performance majors.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP 588. Voice Performance in Salzburg, Austria. 0 Credit Hours.
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive vocal training from University of Miami faculty as well as distinguished guest artists. A class in vocal repertoire is also included.
Requisite: Must be in Salzburg Program.
Components: LEC.
Grading: AUD.
Typically Offered: Summer.

MVP 593. Special Projects in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area expertise and student's area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 594. Special Topics in Vocal Performance or Choral Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MVP 8. Voice Forum. 0 Credit Hours.
A weekly informal recital setting and performance class for voice principals and majors with guest artists, master classes, and faculty presentations. Required for all two, three, and four credit applied voice students.
Requisite: Frost School of Music only.
Components: FOR.
Grading: CNC.
Typically Offered: Fall & Spring.

MVP VO1. Voice. 2 Credit Hours.
1-hour lesson and 50 minute studio class for voice students. Technical Requirements: Demonstrate a beginning concept of breath management, legato connection for moderate length phrases, clear articulation and projection of vowels and consonants in English, emotional connection to and communication of text, release of vibrato in sustained singing, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VO3. Voice. 2 Credit Hours.
1-hour lesson and 50 minute studio class for voice students. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to self-prepare a song, knowledge of musical styles and historical periods of music, effective communication of song literature, an established warm-up regimen and technical exercises as prescribed by the voice teacher, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOC. Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate consistent breath support, firmly established legato line, evidence of musical phrasing, consistent vibrato, ability to execute technical exercises evenly throughout the range, and jury repertoire, language, and performing (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MVP VOD. Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate consistent breath support, firmly established legato line, evidence of musical phrasing, consistent vibrato, ability to execute technical exercises evenly throughout the range, and jury repertoire, language, and performing (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOF. Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate evidence of upper range extension with fully supported sound and appropriate modification of resonators, ability to selfPrepare a song, knowledge of musical styles and historical periods of music, effective communication of song literature, an established warm-up regimen and technical exercises as prescribed by the voice teacher, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOG. Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required lyric languages, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performing with accuracy in pitch, rhythm, good posture, breath management, phonation, and resonance in addition to jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOH. Voice. 1-2 Credit Hours.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate perfect facility in required lyric languages, ability to evaluate performances critically and coherently, facility with register changes in upper range, polished and artistic performing with accuracy in pitch, rhythm, good posture, breath management, phonation, and resonance in addition to jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MVP VOS. Secondary Voice. 1 Credit Hour.
1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Demonstrate a beginning concept of breath management, legato connection for moderate length phrases, clear articulation and projection of vowels and consonants in English, emotional connection to and communication of text, release of vibrato in sustained singing, and jury repertoire, language, and performance requirements (See Guidelines for Voice Study).
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

B.M. in Vocal Performance

Dept Code: MVP

The Department of Vocal Performance offers a bachelor of music degree in vocal performance.

Advanced Writing and Communication Skills

Courses
All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Vocal Performance students will successfully complete:
1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods which will include substantial evaluated and revised writing components.
2. MVP VO3 Private Lesson (Level 3) Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MVP 538 Vocal Pedagogy, which will include discipline specific communication skills.

Assessment
There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Certificate in Vocal Performance

Mission
The mission of the Bachelor of Music Degree in Vocal Performance is:

• To provide students the highest quality of education available in the areas of vocal performance and musicianship that will provide the foundation for continued academic work and which could also lead toward a professional performance career as a classical singer
• To stimulate the student’s awareness and artistic creativity in the field of vocal performance
• To provide students public performance opportunities in a supportive and encouraging environment
• To provide students performance skills necessary for graduate degree auditions, vocal competitions and chamber music careers.

Goals
Student Learning Outcomes

• Students will be able to sing solo, classical, vocal repertoire in at least four languages in their senior solo recital.
• Students will demonstrate breath management and tension release skills in singing for one jury performance at the end of each semester.
• Students will demonstrate proper alignment for singing classical repertoire.

Certificate in Vocal Performance
Audition Required-Music Majors Only

Performance Certificates may be awarded to music majors, in non-performance degrees: MED, MTY, MTC, MWP, MBEI, MUE, and MUS, who meet the achievement level and standards of a music performance major on a single instrument as offered by the following degree programs: MIP, MVP, MKP, MSJI, and MSJV. Any student wishing to declare a Performance Certificate must audition on an instrument or voice and be approved by the appropriate department. In addition to the Experiential Music Curriculum Core Courses, the following requirements must be met in one of the following tracks: MIP, MVP, MKP, or MSJ. The Music Performance Certificate requires approval by designated departmental faculty. The appropriate performance level must be achieved as determined by the designated departmental faculty or the certificate will not have been earned, even if all courses have been successfully completed. The Music Performance Certificate will be awarded upon successful completion of all coursework and final approval of the designated departmental faculty.

* Students who will enroll in a required internship (i.e. student teaching) in their 8th semester may petition the department to perform the senior recital and satisfy the Principal Instrument Lesson & Studio Class degree requirements in their 7th semester.

* This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Minor in Dance
https://dance.frost.miami.edu/

Students intending to minor in dance are required to write a statement (150-300 words) explaining their motivation to minor in dance or submit a resume of their dance experience or video of themselves in dance performance or class for consideration. Send your statement, video or resume to Carol Kaminsky at c.kaminsky@miami.edu and approval from your advisor. All dance minors must maintain a grade point average of 3.0 in dance courses. There is no undergraduate major in dance.

Total Credit Hours 15

Nursing and Health Studies
http://www.miami.edu/sonhs

The School of Nursing and Health Studies (SONHS) is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are available for students to study and earn course credit in a variety of local and international settings.

Mission
The mission of the SONHS is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Baccalaureate Degrees
The SONHS offers three baccalaureate degrees:
1. Bachelor of Science in Health Science (BSHS)
2. Bachelor of Science in Nursing (BSN)
3. Bachelor of Science in Public Health (BSPH)

Student Responsibilities

Students in the SONHS are responsible for fulfilling their degree requirements. Students are also responsible for complying with all provisions outlined in the Academic Bulletin and the Student Handbook.

Academic Bulletin and Student Handbook

In addition to the material listed in the Academic Bulletin, all SONHS students are held to the policies, procedures, and requirements listed in the most current Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for their respective degree program. Please note the material included in the Student Handbook is subject to change throughout the academic year and may not be reflected in the Academic Bulletin. The Student Handbook contains the most current information. Consult an academic advisor in the Office of Student Services (OSS) (http://oss.sonhs.miami.edu/) for questions related to academic requirements and opportunities.

Accommodations Policy for Students with Disabilities

The SONHS adheres to standards of the Americans with Disabilities Act. Any student needing special accommodations should seek assistance through the Office of Disability Services (ODS) (http://umarc.miami.edu/arc/ODS.html), which is the primary on-campus resource responsible for the coordination of services for students with disabilities. Students must follow ODS’ policies, procedures, and timelines to request assistance. Please note ODS has strict deadlines to apply for accommodations; only students who are officially registered with ODS may be granted accommodations.

Financial Assistance

Students interested in obtaining financial assistance in the form of student loans, grants, etc. should contact the Office of Financial Assistance (http://www.miami.edu/admission/index.php/ofas/).

The SONHS also offers limited merit-based and need-based scholarships to continuing students. The types of scholarships available and the qualifications for them vary by semester. Continuing students who wish to be considered for the SONHS scholarships must apply for such scholarships through the SONHS General Scholarship Application. Calls for applications are e-mailed to continuing students once each semester to prompt students to apply who wish to be considered for a scholarship for the next term. Additional information on the SONHS scholarships as well as health science-, nursing-, and public health-related outside scholarships can be found on the SONHS Scholarships website (http://www.sonhs.miami.edu/admissions-and-financial-aid/financial-aid-and-community-scholarships/).

Facilities

The SONHS is located on the Coral Gables Campus. The four-story, Jerusalem-stone and stucco M. Christine Schwartz Center for Nursing and Health Studies opened in Fall 2006. The building features classrooms and clinical practice labs, conference rooms, a computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000 square foot facility supports the work of more than 40 nurse-scientists and clinical educators, as well as approximately 1,100 undergraduate and graduate students enrolled in the SONHS’ health science, nursing, and public health programs.

In Fall 2017, the SONHS opened the new, state-of-the-art, 41,000 square foot, 5 story Simulation Hospital (http://www.miami.edu/sonhs/index.php/simulation_hospital/). The Simulation Hospital is a one-of-a-kind facility, as it is one of the first education-dedicated simulation facilities located on a college campus. This new facility uses the latest simulation technology to provide SONHS students with the highest-quality healthcare education through a variety of simulated clinical environments. It also provides opportunities for public health-related simulation experiences and creates ample opportunities for inter-professional education (IPE).

Library resources for SONHS students are available at the Otto G. Richter Library (http://library.miami.edu/) on the Coral Gables Campus and the Louis Calder Memorial Library (http://calder.med.miami.edu/) on the Medical Campus.

Clinical experiences are offered in a variety of hospitals and health-related agencies in the community, including the University of Miami Hospital, Jackson Health System, Sylvester Comprehensive Cancer Center, Nicklaus Children's Hospital, and approximately 170 other community partners.

The Foote Fellows Honors Program (https://admissions.miami.edu/undergraduate/academics/honors-and-scholars-programs/foote-fellows/) at the University of Miami (UM) recognizes the most educationally accomplished incoming students. Throughout high school, Foote Fellows distinguished themselves both in and out of the classroom as self-motivated, independent-thinking individuals dedicated to the pursuit of knowledge. This program was built to reflect these ideals and to embody the educational vision of former University of Miami President, Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Program Benefits and Opportunities

Foote Fellows in the School of Nursing and Health Studies (SONHS) are exempt from the Areas of Proficiency (e.g., English and mathematics), Areas of Knowledge (i.e., cognates), and Advanced Writing and Communication requirements. These exemptions provide Foote Fellows with unmatched
freedom and flexibility to explore a multitude of educational endeavors within the curricular framework of the SONHS. Many Foote Fellows leverage this opportunity to complete additional majors, minors, and/or cognates, study abroad, participate in research, etc.

SONHS Foote Fellows may be eligible to participate in various global initiatives (https://www.sonhs.miami.edu/academics/hemispheric-and-global-initiatives/), research experiences, civically-engaged or clinically-based courses, and academic lectures. They will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University (e.g., "Books That Matter"). Furthermore, Foote Fellows receive focused advising by the Foote Fellow program coordinator on post-baccalaureate prestigious awards and fellowships. SONHS Foote Fellows should speak with the academic advisors located in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/office-of-student-services/contact-oss/) to learn more about their academic and extracurricular opportunities.

**Admission Criteria**

Admission to the SONHS Foote Fellows program is by invitation only. To be considered for this program, health science, nursing, and public health students must have a weighted high school GPA of 4.5 or higher and a SAT score of 1300 or higher (verbal and math) or an ACT score of 30 or higher. Students must also submit a portfolio consisting of (a) an essay on their desire to contribute to decreasing health disparities, including a description of at least one health disparity and a plan for addressing it, (b) a historical account of their community service, volunteer, and leadership experience, and (c) a discussion of their short-term and long-term goals.

**Outcome Criteria**

Foote Fellows in the SONHS will maintain an undergraduate GPA of 3.5 or higher. The GPA used to make this determination is the UM-specific GPA or the Combined GPA (i.e., UM-specific and Transfer GPA combined), whichever is lower. Foote Fellows must also create a capstone portfolio that includes examples of (a) how they have addressed a health disparity throughout their program of study and of (b) the community service, volunteer, and leadership experiences they have participated in throughout their time at the University of Miami.

**Health Science**

**Academic Programs**

The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Health Science (BSHS). Baccalaureate education provides the foundation for further education in specialized health professional fields. All students who pursue the BSHS degree graduate with a health science major and one of the following pre-professional tracks:

1. General Track
2. Health Management and Policy Track
3. Pre-Medical Track
4. Pre-Occupational Therapy Track
5. Pre-Pharmacy Track
6. Pre-Physical Therapy Track

Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements they must complete above and beyond those included in their chosen pre-professional track.

**Admission**

Admission as a new freshman or transfer student to the BSHS program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

In accepting students into the BSHS program, the UM does not in any way ensure admittance into professional graduate programs. Admission to professional graduate programs is dependent upon strong undergraduate academic performance and appropriate, well-rounded extracurricular experiences. Admission to these programs is determined independently by the school or program to which the student applies.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

**Academic Policies**

**Grades**

Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate BSHS students must earn a C- or higher in each course for the major to progress.
When a course must be repeated, progression in the BSHS program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSHS program.

**Grade Point Averages (GPAs)**

Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS’ policies related to GPAs, progression, and dismissal.

**Requirements to Declare**

Current UM students who wish to switch into the BSHS program must possess a minimum 2.8 UM GPA to be considered for admission. Please note that the SONHS may have a waitlist to get into the BSHS program so meeting the minimum admission criteria for the BSHS program does not guarantee admission. Seats in the program are allocated from the waitlist to students based on a holistic review of all students on the waitlist but the following factors are strongly considered in each admission decision: (1) the availability of seats in a student's intended year of graduation, (2) the date in which a student added himself/herself to the waitlist, (3) the student's UM GPA, and (4) the feasibility of the student completing the desired degree on time. Questions about the BSHS waitlist should be directed to the academic advisors in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/).

Incoming transfer students who plan to enter the BSHS program must possess a minimum 2.8 transfer GPA to be considered for admission.

**Requirements to Continue**

BSHS are strongly encouraged not to continue with the BSHS degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

**Requirements to Graduate**

Students enrolled in the BSHS program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

**Prerequisites and Corequisites**

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/), Associate Dean, or Dean. Students should consult an academic advisor in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss any questions related to course enrollment.

Note: All Health Science majors must take the anatomy and physiology lectures and labs offered through the SONHS (i.e., HCS 212/213 and HCS 215/216) as stated in their plan of study. No exceptions will be made to take other UM anatomy or physiology lectures or labs outside of the SONHS.

**Residency Requirements**

Undergraduate BSHS students must adhere to the general UM residency rules. At least half of the health science major must be taken in residence at the UM. Exceptions to the residency requirements may only be obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Students should speak with an academic advisor in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) for more information on the residency requirements and on the UGASAC appeals process.

**Transfer Credit**

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/). Detailed course descriptions or syllabi must be presented to the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) for transfer equivalency reviews.

**Degree Requirements**

Listed in this section are the degree requirements for the BSHS program.

The University of Miami’s General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSHS program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study. Students should meet with an academic advisor in the Office of
Areas of Proficiency

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics & Computer Science

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements

Students complete this requirement by completing a course in each of the following areas:

1. Calculus: MTH 141, MTH 161, or MTH 171
2. Computer Science: 1 CSC or BTE course
3. Statistics:
   a. Health Management and Policy Track: MAS 201 or other approved statistics course
   b. All other tracks: HCS 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/) website and consult with an academic advisor in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) if they have any questions.

Outcomes

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Areas of Knowledge (Cognates)

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.
Arts & Humanities
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements
Complete one Arts & Humanities cognate.

Outcomes
By completing the Arts & Humanities requirement, students will be able to:
1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements
Complete one People & Society cognate.

Outcomes
By completing the People & Society requirement, students will be able to:
1. analyze the organization of society
2. analyze patterns of social change

Science, Technology, Engineering, and Mathematics (STEM)
STEM cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements
Complete one STEM cognate. The health science major may be used to fulfill this cognate area.

Outcomes
By completing the STEM requirement, students will be able to:
1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Major
Refer to the “Major Requirements” section below for information on the courses required for the BSHS program.

Minor
All students must complete a minor from the SONHS’ approved minors list. An approved second major from this list waives the minor requirement. See the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) for details.

Advanced Writing and Communication Skills
The Advanced Writing and Communication Skills requirement empowers health science students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

Requirements
To fulfill this requirement, students must complete five designated writing-intensive courses. Several health science requirements and/or electives may qualify as writing-intensive.

Health Science Courses that Require Formal Student Writing or Presentation
The following SONHS courses carry writing and presentation components and may count for the BSHS program:
Course | Writing Assignment | Student Presentations
---|---|---
BPH 301 | Various papers | Various presentations
BPH 305 | Three reflective papers | Final student presentation
BPH 309 | Three reflective papers | Final student presentation
BPH 310 | Four reflective papers | Final student presentation
BPH 321 | Five reflective papers | Student presentations throughout class
BPH 490 | Five journal entries, final paper | Final student presentation

Outcomes
By completing the Advanced Writing and Communication Skills requirement, students will be able to:

1. effectively communicate information related to health science in both speech and in writing, using appropriate information sources, presentation formats, and technologies
2. demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare

Plan for Assessment
Student Performance on Written Assignments and Presentations
In order to graduate from the BSHS program students must successfully pass two courses in English Composition (i.e., ENG 105 and ENG 106) as well as five writing-intensive courses with a grade greater than or equal to 70%. Grading of student written assignments and oral presentations are based on defined rubrics. These courses may be applied to the BSHS program as outlined in the major requirements. A number of elective courses in the BSHS curriculum also require students to submit significant written assignments and give oral presentations throughout the semester. Throughout the BSHS curriculum, students must demonstrate their ability to write and communicate accurately and with clarity in order to successful complete their courses.

Graduating Senior Survey (GSS) Responses for Questions Related to Written and Verbal Communication
Based on the results from the GSS, students believe their undergraduate coursework in the BSHS program significantly enhanced their written, oral, and formal presentation skills, which, in turn, allowed them to more effectively interact with various individuals and groups.

Electives
Students must earn a minimum of 120 credits to complete the BSHS degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Major Requirements
Health science must be a student’s first major. There is no additional major offered in health science.

Visit the "TRACKS IN BSHS PROGRAMS" link to learn more about the major requirements for the SONHS’ BSHS programs, which are listed under the "OVERVIEW" section for each BSHS program.

Minor Requirements
There is no minor available in health science.

Classes Not Applicable Toward SONHS Degrees
The following courses do not count toward the 120 credits required of the BSHS degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments
In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

Research Experience
Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research/) or the Office of Undergraduate Research and Community Outreach (https://ugr.miami.edu/) during their time at the UM. Students should speak with the academic advisors located in the Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) to learn more about the research opportunities available to them at the UM.
Required Coursework and Sample Plans of Study

Visit the "TRACKS IN BSHS PROGRAMS" link to learn more about the academic requirements for the SONHS' BSHS programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSHS program.

HCS 200. Electrophysiology. 3 Credit Hours.
This course is a survey of the basic principles of Public Health.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

HCS 202. Introductory Statistics in Health Care. 3 Credit Hours.
Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing, health sciences and public health.
Corequisite: MTH 101. Or Requisite: ALEKS ≥ 55 or SAT Score ≥ 630 or ACT ≥ 28.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

HCS 207. Introduction to Pharmacology. 3 Credit Hours.
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.
Prerequisites: BIL 150 and CHM 103 or 111 or 121 and HCS 212/215.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HCS 212. Human Anatomy. 3 Credit Hours.
Emphasis is on the understanding of the anatomical compartments of the human body and the ability to identify the bony skeleton, musculatures, blood vessels and internal organs of each compartment.
Prerequisite: BIL 150.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

HCS 213. Human Anatomy Laboratory. 1 Credit Hour.
Laboratory to accompany HCS 212.
Pre or Corequisite: HCS 212.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

HCS 215. Principles of Systemic Physiology. 3 Credit Hours.
Emphasis is on the understanding of the Physiology and selected Pathophysiology of various organs and systems.
Prerequisite: HCS 212. And Pre or Corequisite: CHM 111 or CHM 121 or CHM 103 and CHM 113 or CHM 105.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

HCS 216. Principles of Systemic Physiology Laboratory. 1 Credit Hour.
Laboratory to accompany HCS 215
Pre or Corequisite: HCS 215.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

HCS 217. Medical Terminology. 1 Credit Hour.
This course will assist the student in understanding the principles of medical word building in order to develop the extensive medical vocabulary used in health care professions. Students receive a thorough grounding in basic medical terminology through the study of root words, prefixes and suffixes. The course emphasizes correct pronunciation, spelling and use of medical terms.
Prerequisite: BIL 150.
Components: CLN.
Grading: GRD.
Typically Offered: Fall.
HCS 352. Biological Principles of Public Health. 3 Credit Hours.
This course examines the biological basis and pathogenesis of diseases from a public health perspective and describes the impact on populations. This course also presents the basic scientific and biomedical concepts of modern public health problems and explores in depth mechanisms and models of the major categories of disease. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

HCS 355. Global Nutrition. 3 Credit Hours.
This course examines nutrition related public health issues in the global setting. Nutrition related morbidity and mortality, etiologic factors, and population-focused strategies to address these issues are covered. Food relief and nutrition policies and programs at the local, national and international levels are examined. Current scientific research in international nutrition is reviewed from an epidemiological perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HCS 402. Global Health Disparities Research. 3 Credit Hours.
This is a 4 week intensive educational experience that prepares students to be successful conducting supervised health disparities research as part of the MHIRT program at a foreign institution, disseminating findings, and applying to graduate school. The training program is broken into a preparation phase (3 weeks prior to leaving to their host country), and a dissemination phase (1 week after they return). Students will be working as a research assistant at a foreign site for eight weeks in between the preparation and dissemination phases of this training program. Students will learn about the influence of culture and healthcare policy on health and health disparities, research design, statistics, communicating research findings and careers in health disparities research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HCS 461. Health Disparities Research Practicum. 1-4 Credit Hours.
This course is designed to provide opportunities for students across all levels of higher education to participate in health disparities research. Students will be mentored by a health disparities researcher with an active research project. Objectives will be established by the research mentor and the student according to educational level, interests and opportunities. Students will be incorporated into the research team and expected to attend project meetings. They will also be expected to participate in scholarly work that could contribute to the success of the project. Examples of scholarly work include co-authoring research papers and presentations, developing recruitment materials, assisting in compiling/developing data collection measures, or any other product deemed appropriate by the mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HCS 465. Public Health Statistics and Data Management. 3 Credit Hours.
This course is designed to give students an opportunity to apply basic principles of statistics and data management in public health. Students will learn to use statistical techniques to answer questions relating to the morbidity and mortality of health conditions and the efficacy and effectiveness of public health interventions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

HCS 487. Global Health Practicum. 3 Credit Hours.
Collaborative clinical venture between UM/SON and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas, including MedSurg, Surgery, ICU and/or Emergency nursing units. Students will apply and synthesize basic science knowledge and skills that foster ethical, legal and culturally specific health care.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

HCS 499. Selected Topics. 0-6 Credit Hours.
A selected topics course is offered as needed in order to present emerging issues or specialized topics that are not part of the regular curriculum.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BSHS - General Track

Program Overview

Overview

Students enrolled in the General Track must complete the coursework listed on the Curriculum tab to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

Student Handbook | Page 1511 - 2020

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, General Track
- **Minor(s):** Chemistry
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Abnormal Psychology (RAU = Psychology)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Health Science major (RAU = Nursing & Health Studies)

Mission
The Mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation and the world. The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include Pre-physical therapy, Pre-pharmacy, Pre-medicine, Pre-occupational therapy, Health Science/Health Management and Policy, and Health Science General.

Student Learning Outcomes

- Students will be able to demonstrate advanced knowledge in human anatomy.
- Students will be able to demonstrate knowledge of statistical analyses.
- Students will demonstrate knowledge related to the importance of nutrition in human health and well-being.

BSHS - Health Management and Policy Track

Students enrolled in the Health Management and Policy Track must complete the coursework listed on the Curriculum tab to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

* The health science major may be used to fulfill this cognate area.

** Students may fulfill this requirement by taking HMP 310, HMP 388, HMP 498, HMP 499, INS 570, INS 571, INS 572, INS 573, or SOC 321

*** Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).

**** CHM 222 and CHM 206 are recommended but not required for this track.

***** Students who complete the Health Management and Policy Track automatically complete a minor in Health Sector Management and Policy; no additional coursework is required to complete this requirement.

******* Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

******** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.
This is only a sample. There are numerous ways students can create plans of study for the Health Management and Policy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, Health Management and Policy Track
- **Minor(s):** Health Sector Management and Policy
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Abnormal Psychology (RAU = Psychology)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Health Science major (RAU = Nursing & Health Studies)

**Goals**

**Student Learning Outcomes**

- Students will be able to demonstrate advanced knowledge in human anatomy.
- Students will be able to demonstrate knowledge of statistical analyses.
- Students will demonstrate knowledge related to the importance of nutrition in human health and well-being.

**BSHS - Pre-Medical Track**

Students enrolled in the Pre-Medical Track must complete the coursework listed on the Curriculum tab to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

* The health science major may be used to fulfill this cognate area.

** Six graded credits of ENG courses (6 credits). Creative writing courses cannot count. ENG 105 and ENG 106 may count if a grade was received.

*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Pre-Medical Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, Pre-Medical Track
- **Minor(s):** Chemistry
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Abnormal Psychology (RAU = Psychology)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Health Science major (RAU = Nursing & Health Studies)

### Mission

The Mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation and the world. The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields.

Pre-professional tracks include Pre-physical therapy, Pre-pharmacy, Pre-medicine, Pre-occupational therapy, Health Science/Health Management and Policy, and Health Science General.

### Goals

#### Student Learning Outcomes

- Students will be able to demonstrate advanced knowledge in human anatomy.
- Students will be able to demonstrate knowledge of statistical analyses.
- Students will demonstrate knowledge related to the importance of nutrition in human health and well-being.

### BSHS - Pre-Occupational Therapy Track

Students enrolled in the Pre-Occupational Therapy Track must complete the coursework listed under curriculum requirements to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

**W** Course is designated as writing-intensive

**Mission**

The Mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation and the world. The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include Pre-physical therapy, Pre-pharmacy, Pre-medicine, Pre-occupational therapy, Health Science/Health Management and Policy, and Health Science General.

**Goals**

**Student Learning Outcomes**

- Students will be able to demonstrate advanced knowledge in human anatomy.
- Students will be able to demonstrate knowledge of statistical analyses.
- Students will demonstrate knowledge related to the importance of nutrition in human health and well-being.

**BSHS - Pre-Pharmacy Track**

Students enrolled in the Pre-Pharmacy Track must complete the coursework listed under curriculum requirements to earn the BSHS degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

---

* The health science major may be used to fulfill this cognate area.
** Students may fulfill this requirement by taking any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).
*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.
**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Pre-Pharmacy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook ([http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/](http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/)) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) ([http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/](http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/)) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 107
- **Major(s):** Health Science, Pre-Pharmacy Track
- **Minor(s):** Chemistry
- **Cognates**
  - **Art & Humanities:** American Literature (RAU = English)
  - **People & Society:** Abnormal Psychology (RAU = Psychology)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Health Science major (RAU = Nursing & Health Studies)

* Credit Hours: 120

---

* The health science major may be used to fulfill this cognate area.

** HCS 216 is not required but it is highly recommended.

*** Students may fulfills this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).

**** CHM 222 and CHM 206 are recommended but not required for this track.

***** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

****** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

---

**This is only a sample.** There are numerous ways students can create plans of study for the Pre-Physical Therapy Track. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:
- ENG placement: ENG 105
- MTH placement: MTH 107
- Major(s): Health Science, Pre-Physical Therapy Track
- Minor(s): Chemistry
- Cognates
  - Art & Humanities: American Literature (RAU = English)
  - People & Society: Foundations of Behavior for Prehealth Professions (RAU = Anthropology)
  - Science, Technology, Engineering, and Mathematics (STEM): Health Science major (RAU = Nursing & Health Studies)

</table>

**W** Course is designated as writing-intensive

* Students may fulfill this requirement by taking BMB 401 or any BIL, BPH, or HCS course for at least 3 credits at the 200 level or above (except for BPH 202, HCS 202, and NUR 202).

** HCS 216 is not required but it is highly recommended.

**Mission**

The Mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation and the world. The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include Pre-physical therapy, Pre-pharmacy, Pre-medicine, Pre-occupational therapy, Health Science/Health Management and Policy, and Health Science General.

**Goals**

**Student Learning Outcomes**

- Students will be able to demonstrate advanced knowledge in human anatomy.
- Students will be able to demonstrate knowledge of statistical analyses.
- Students will demonstrate knowledge related to the importance of nutrition in human health and well-being.

**Nursing**

[www.miami.edu/sonhs](http://www.miami.edu/sonhs)

**Nursing Accreditation**

The baccalaureate nursing program in the University of Miami’s (UM’s) School of Nursing and Health Studies (SONHS) is approved by the Florida Board of Nursing and accredited by the following:

Commission of Collegiate Nursing Education (CCNE)
Academic Programs

Baccalaureate education is the primary foundation for professional nursing and is necessary for graduate study. The SONHS offers three baccalaureate options leading to the Bachelor of Science in Nursing (BSN) degree:

1. **Accelerated BSN**: For students who hold a baccalaureate degree in a field other than nursing and who seek a one year nursing degree
2. **RN-to-BSN**: For students who possess a diploma or Associate's degree in nursing, who have successfully completed the Registered Nurse (RN) licensure exam, and who wish to finish their baccalaureate education within three to five semesters
3. **Traditional BSN**: For students who may not have any previous higher education experience and who seek a traditional four-year nursing degree

Admission

Students who possess a baccalaureate degree from a regionally-accredited institution in a field other than nursing and who wish to pursue a career in nursing may apply to the **Accelerated BSN** program. Applicants must meet specific admission criteria and complete specific clinical prerequisites (http://acceleratedbsn.sonhs.miami.edu/admissions/) before they may enter the Accelerated BSN program. Applications for the Accelerated BSN program are submitted through NursingCAS (http://www.nursingcas.org/) and are reviewed by the SONHS.

The **RN-to-BSN** program is designed to provide licensed RNs who have an Associate's degree or a nursing diploma with an opportunity to complete the remaining coursework needed to earn a BSN degree. Students interested in the RN-to-BSN program must meet specific admission criteria (http://rntobsn.sonhs.miami.edu/admissions/) and must apply through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint). All applications are reviewed by the SONHS.

Admission as a new freshman to the **Traditional BSN** program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM. Students who wish to transfer into the Traditional BSN program must also meet general UM admission requirements. Additionally, students who wish to transfer directly into the clinical components of the Traditional BSN curriculum (i.e., the third year) must complete specific clinical prerequisites (http://bsn.sonhs.miami.edu/admissions/) as outlined by the SONHS. These transfer applicants will be considered for direct entry into clinical coursework as space allows. All transfer applications are handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and are reviewed by the SONHS. Only credits taken at regionally-accredited institutions are considered for transfer to the UM.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the UM SONHS at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

1. Observation
2. Communication
3. Motor
4. Conceptual-Integrative
5. Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment. Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant's ability to complete all components of the program.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.
Communication
Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor
Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative
These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social
Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Clinical Clearance
Before students can enter the clinical components of the undergraduate nursing curriculum, they must successfully complete a drug test and a background check. Students must have a background report without any infractions, regardless of how they were resolved or adjudicated. Accordingly, if a student's background report contains any infractions, regardless of how they were resolved or adjudicated, he/she may not be able to successfully complete the background check and he/she will be withdrawn from the nursing program.

Students must also provide current immunizations as outlined by the SONHS and obtain a Basic Life Support (BLS) for Healthcare Providers certification from the American Heart Association prior to entry into clinical coursework. The BLS certification must include content on Automated External Defibrillators (AEDs).

Refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) or speak with a representative in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) for more information.

Grades
Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate nursing students must earn a C or higher in each clinical prerequisite and each nursing course to progress. A C- or below is considered a failure in a clinical prerequisite or a nursing course. Students are allowed to repeat only one failed clinical prerequisite and one failed nursing course. A student who fails only one clinical prerequisite and/or one nursing course, retakes the failed clinical prerequisite and/or failed nursing course, and receives a passing grade on the second attempt at a failed clinical prerequisite and/or a failed nursing course may progress through the program but the original failure is still counted as a failed course. Failure of two clinical prerequisites or two nursing courses with a grade of C- or below, or failure of the same clinical prerequisite or the same nursing course twice with a grade of C- or below, constitutes failure of two clinical prerequisites or two nursing courses, respectively, and the student will be dismissed from the nursing program.

When a nursing course must be repeated, progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the BSN program.

Students who repeat a clinical nursing course must repeat both the theoretical and clinical components of the course. Students are required to fulfill the course requirements in effect at the time of enrollment. No special courses will be created for students who repeat a course.

Withdraw Policy
All BSN students may not withdraw from more than two nursing courses during the length of the nursing program and cannot withdraw from the same nursing course twice. Students must adhere to the withdraw dates set by the University in the Academic Calendar.
Grade Point Averages (GPAs)

Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Declare

Current UM students who wish to switch into the Traditional BSN program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to be considered. Please note that the SONHS may have a waitlist to get into the Traditional BSN program so meeting the minimum admission criteria for the Traditional BSN program does not guarantee admission. Seats in the program are allocated from the waitlist to students based on a holistic review of all students on the waitlist but the following factors are strongly considered in each admission decision: (1) the availability of seats in a student’s intended year of graduation, (2) the date in which a student added himself/herself to the waitlist, (3) the student’s UM GPA, and (4) the feasibility of the student completing the desired degree on time. Questions about the Traditional BSN waitlist should be directed to the academic advisors in the OSS.

Incoming transfer students who plan to enter the Traditional BSN degree must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

Requirements to Continue

Students who are enrolled in the Traditional BSN program and who are not yet enrolled in their clinical coursework (i.e., third or fourth year) are strongly encouraged not to continue with the nursing major if they have less than a 2.5 UM GPA and/or less than a 2.5 clinical prerequisite GPA after 15 credits in the clinical prerequisites and/or second year nursing courses.

Requirements to Progress into Clinical Coursework

Students who enter the Accelerated BSN program enter directly into clinical coursework. These students must possess a minimum 3.0 transfer GPA and a minimum 3.0 clinical prerequisite GPA to be considered for admission.

Current UM students enrolled in the Traditional BSN program must possess a minimum 3.0 UM GPA and a minimum 2.75 clinical prerequisite GPA to progress into their clinical coursework (i.e., third year). Students must also have completed a minimum of 60-63 total credits to be eligible to progress (Note: Only 57 credits are slated in the prescribed Plan of Study for students' clinical years. If students only have 60-62 completed credits at the time of progression, they will be required to complete additional elective credits during their last two years to reach the 120 credit requirement for the degree.).

Incoming transfer students who apply to transfer directly into the clinical components of the Traditional BSN degree (i.e., the third year) must possess a minimum 3.5 transfer GPA and a minimum 3.3 clinical prerequisite GPA to be considered for admission.

Requirements to Graduate

Students enrolled in the Accelerated BSN, RN-to-BSN, and Traditional BSN programs must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites

Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (http://oss.sonhs.miami.edu/) to discuss any questions related to course enrollment.

Note: All Traditional BSN majors must take the anatomy and physiology lectures and labs offered through the SONHS (i.e., HCS 212/213 and HCS 215/216) as stated in their plan of study. No exceptions will be made to take other UM anatomy or physiology lectures or labs outside of the SONHS.

Residency Requirements

Undergraduate nursing students must adhere to the general UM residency rules. Once a student enrolls at the UM, all remaining clinical prerequisites must be completed at the UM unless special permission is obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Additionally, all courses in the nursing major must be completed at the UM. Students should speak with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) for more information on the residency requirements and on the UGASAC appeals process.

Transfer Credit

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/). Detailed course descriptions or syllabi must be be presented to the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) for transfer equivalency reviews.
Degree Requirements

Listed in this section are the degree requirements for the Traditional BSN program. The Accelerated BSN and RN-to-BSN requirements are listed under the "OVERVIEW" section of the "TRACKS IN BSN PROGRAMS" link for each of the respective programs.

The University of Miami's General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year). Students should meet with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss any questions related to degree, clinical prerequisite, or major requirements.

Areas of Proficiency

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

Requirements

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

Outcomes

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Mathematics

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

Requirements

Students complete this requirement by completing NUR 202.

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/). The following items may affect students' math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/) website and consult with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) if they have any questions.

Outcomes

By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Areas of Knowledge (Cognates)

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of
Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.

**Arts & Humanities**
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

**Requirements**
Complete one Arts & Humanities cognate.

**Outcomes**
By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

**People & Society**
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

**Requirements**
Complete one People & Society cognate.

**Outcomes**
By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change

**Science, Technology, Engineering, and Mathematics (STEM)**
STEM cognates develop students' abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

**Requirements**
Complete one STEM cognate. The nursing major may be used to fulfill this cognate area.

**Outcomes**
By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

**Clinical Prerequisites**
Refer to the "Clinical Prerequisite Requirements" section below for information on the clinical prerequisites required for the Traditional BSN program.

**Major**
Refer to the "Major Requirements" section below for information on the courses required for the Traditional BSN nursing major.

**Advanced Writing and Communication Skills**
The Advanced Writing and Communication Skills requirement empowers nursing students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health. Several designated writing-intensive courses are built into the nursing major to satisfy this requirement.

**Required Communication domains**
Students must communicate effectively using English in clinical and classroom settings. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. Students must be able to communicate effectively and efficiently with all members of the healthcare team in both immediate and recorded modes. Throughout the curriculum students are expected to achieve skills in the following communication domains:
Therapeutic Communication
Therapeutic communication between the nurse and patient is a cornerstone of effective nursing care. This communication style is goal-oriented and focused on learning and promoting growth.

Example content: principles of therapeutic use of self; therapeutic communication techniques; health education/teaching; reflective journals

Technical Communication
Technical communication encompasses the specific methods used by the nursing profession to communicate information necessary for nursing practice.

Example content: use of clinical information systems (e.g., electronic health record, physician order entry); application of standardized health care terminology; use of data and data systems

Inter- and Intra-Professional Communication
Effective communication among all members of the healthcare team is essential for delivering high quality, safe patient care.

Example content: teamwork/cooperative learning; scopes of practice; conflict resolution; group dynamics and evaluation

Scholarly Written Communication
Scholarly writing is a formal means of communication in which the writer communicates synthesized knowledge about a topic while also demonstrating original thought and unique perspectives.

Example content: scholarly papers; research critiques; application of APA publication style

Scholarly Verbal Communication
Scholarly verbal communication is a formal way of speaking with the intended audience to provide and/or elicit information in a systematic manner. Primary methods of scholarly verbal communication involve verbal presentations/lectures and formal data gathering processes such as interviews.

Example content: scholarly presentations; key informant interviews

Minimal writing proficiency standards
Writing proficiency is evaluated throughout the BSN plan of study. Three primary categories of writing are required:

1. scholarly papers (NUR 400/NUR 401, NUR 440, and NUR 453)
2. patient care documentation (NUR 304, NUR 308, NUR 318, NUR 320, NUR 411, NUR 448, and NUR 453)
3. reflective journals (NUR 306 and NUR 453)

Each writing component is evaluated as part of the grading rubric for the associated course. Feedback and revisions are required.

Plan for assessment
Content to meet the required communication domains and minimal writing proficiency standards is provided across the curriculum. The table below outlines the specific communication domains covered in each course as well as the assessment/outcome criteria used to measure them. In addition to demonstrating skills across the five required communication domains, students must complete ENG 105 and ENG 106 or their equivalents to provide the foundation for the development of more advanced writing and communication skills.

Electives
Students must earn a minimum of 120 credits to complete the Traditional BSN degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.

Clinical Prerequisite Requirements
Accelerated BSN
All clinical prerequisites must be completed prior to matriculation into the Accelerated BSN program and within the last 10 years. The clinical prerequisites include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>

RN-to-BSN
Students must meet specific admission criteria (http://rntobsn.sonhs.miami.edu/admissions/) to be considered for the RN-to-BSN program. If admitted, any required coursework must be completed prior to matriculation.

Traditional BSN
All clinical prerequisites must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year) and within the last 10 years. The clinical requirements include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>

</tbody>
</table>

(*) = Chemistry is satisfied by CHM 103/CHM 105 or CHM 121/CHM 113.
(**) = MTH 101, MTH 107, or mathematics placement higher than MTH 107. Note: MTH 107 is a pre- or co-requisite for BIL 150.

Students can transfer equivalent clinical prerequisites to the UM as long as they comply with the general UM and the SONHS residency rules (see “Residency Requirements” section above). Students must provide the documentation listed in the "Transfer Credit" section above to the OSS (http://oss.sonhs.miami.edu/) for any health science, nursing, or public health transfer equivalency requests. For transfer equivalency reviews of any other clinical prerequisites, students must present any necessary documentation to the respective academic unit for their consideration.

Major Requirements
Nursing must be a student’s first major. There is no additional major offered in nursing.

Visit the "TRACKS IN BSN PROGRAMS" link to learn more about the major requirements for the SONHS’ BSN programs, which are listed under the "OVERVIEW" section for each BSN program.
Minor Requirements

BSN students are not required to complete a minor.

There is no minor available in nursing.

Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSN degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Pre-immersion Course

Prior to enrollment in clinical nursing courses, students must complete a mandatory online pre-immersion course. The pre-immersion course is listed in students’ first term of clinical enrollment but it does not affect students’ GPAs. Failure to complete the pre-immersion course may delay entry into the clinical nursing courses. Information about the pre-immersion course will be provided to eligible students by the OSS.

Senior Assessments

In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

HESI Exams

Mandatory HESI exams are required throughout the undergraduate nursing programs. For further details, refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/).

RN Licensure Exam (NCLEX-RN)

Students who successfully complete the Accelerated BSN or Traditional BSN program at the SONHS are eligible to sit for the RN licensure exam referred to as the NCLEX-RN. For additional eligibility requirements, refer to the appropriate state board of nursing website.

Research Experience

Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research/) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach/) during their time at the UM. Students should speak with the academic advisors located in the OSS (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to learn more about the research opportunities available to them at the UM.

Required Coursework and Sample Plans of Study

Visit the "TRACKS IN BSN PROGRAMS" link to learn more about the academic requirements for the SONHS’ BSN programs and to view sample graduation plans, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for each BSN program.

NUR 100. Introduction to Nursing. 3 Credit Hours.
This is an introductory course to explore the various roles and responsibilities of the professional nurse in American health care. Major issues within health care today will be discussed and the impact they have on professional nursing will be explored.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 200. Process of Health Promotion. 3 Credit Hours.
Healthcare: A process of health promotion, maintenance, rehabilitation, and preventative medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

NUR 202. Introductory Statistics in Health Care. 3 Credit Hours.
Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing and health sciences.
Corequisite: MTH 101. Or Requisite: ALEKS > or = 55 or SAT Score > or = 630 or ACT > or = 28.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
NUR 205. Personal Nutrition. 3 Credit Hours.
Principles of nutrition integrated with cultural dietary patterns across the lifespan. Not for nursing majors or minors.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 207. Introduction to Pharmacology. 3 Credit Hours.
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.
Prerequisites: BIL 150 and CHM 103 or 111 or 121 and HCS 212/215.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 300. Seminar in Inter-Professional Health Care. 1 Credit Hour.
This course will introduce the core competencies of inter professional collaborative practice using guidelines from the Institute of Medicine, Quality and Safety Education for Nurses and the Inter professional Education Consortium. Concepts of team based care will be discussed. The course will offer online activities as well as face-to-face team based activities with other healthcare professionals.
Requisite: Nursing Major and Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

NUR 301. Human Sexuality and Vulnerable Populations. 3 Credit Hours.
The study of human sexuality via multidisciplinary theoretical perspectives and research. Students will examine the complex relationships of the physiological, psychological, cultural, gender, religious, historical, and political aspects of human sexuality. Human sexuality in the context of health disparities will form the foundation for the course. WRITING COURSE
Prerequisite: BPH 206 or Requisite: Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 303. HIV/AIDS and Health Maintenance for Health Care Providers. 3 Credit Hours.
Definition, diagnosis, management, and care of diverse patient populations with HIV infection and AIDS. Course is presented and discussed from an interdisciplinary health care perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 304. Adult Health I: Fundamentals of Nursing Practice. 6 Credit Hours.
This clinical course emphasizes the supervised application of health assessment skills, nursing process, and clinical nursing techniques in the clinical laboratory, community, and acute care settings.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 305. Issues in Health Disparities. 3 Credit Hours.
This course will be an introduction to the general research on health systems and health disparities. Emphasis will be placed on social, biological, economic and social policy issues that impact on the health of minority populations. Concepts associated with epidemiology, poverty, racism, public policy and international politics will be explored. WRITING COURSE
Prerequisite: BPH 206 or Requisite: Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 306. Principles of Nutrition. 3 Credit Hours.
Principles of nutrition integrated with cultural dietary patterns for client adaptation across the lifespan.
Requisite: Sophomore Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
NUR 307. Pharmacology. 3 Credit Hours.
Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 308. Adult Health II. 7 Credit Hours.
This course focuses on the nursing management of the client throughout the adult life cycle who experiences alterations and/or adaptations in physiologic defense mechanisms. Teaching strategies to be utilized include lecture, discussion, critical thinking exercises.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 310. Global Health. 3 Credit Hours.
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world are emphasized.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 311. Theories and Concepts of Nursing. 2 Credit Hours.
An introductory nursing course explaining the philosophy of baccalaureate nursing using the major concepts of person, environment, health, and nursing with a multicultural focus.
Requisite: Nursing Major and Sophomore Standing or Higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 314. Health Assessment and Promotion. 3 Credit Hours.
Introduction to health assessment using a lifespan approach. Emphasis is on the development of data collection and basic decision-making using health assessment findings.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 315. Pathophysiology. 3 Credit Hours.
The study of the physiologic and biologic manifestations of disease and disease processes. Emphasis is placed on physiology of altered health within the context of disruptions of structure and function of the human body as a whole.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 317. Theories in Growth and Development. 3 Credit Hours.
Application of growth and development theories through the lifespan with a case study approach to issues commonly encountered nursing practice in a variety of clinical settings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 318. Women's Health Nursing. 4 Credit Hours.
This course focuses on the use of the nursing process in the care of women and the care of mothers and newborns with an emphasis on health promotion, illness prevention and nursing clinical management of chronic and acute conditions.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
NUR 319. Contemporary Issues in Bioethics for Health Care. 3 Credit Hours.
This course will cover bioethical issues in the health care environment, including ethical principles, theories and decision making strategies. WRITING COURSE
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 320. Child and Adolescent Health Nursing. 4 Credit Hours.
This course focuses in the use of the nursing process to develop and implement nursing management strategies for children and their families experiencing acute, chronic, and critical multi-system health alterations within a multicultural content. Use of the nursing process to expand and develop appropriate clinical interventions and a member of the health care team. Students will build on foundation skills in critical thinking, collaboration, and leadership in the provision of nursing care.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 350. Pathophysiology/Pharmacology for RN-to-BSN. 4 Credit Hours.
This course presents the study of the physiological and biologic manifestations of disease and disease processes, and introduces the basic principles of therapeutic pharmacology. Emphasis is placed on the physiology of altered health within the context of disruptions of structure and function of the human body as a whole. Special consideration of cultural beliefs and folk medicine is included.
Requisite: Must be in the RN to BSN program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 390. Advanced Placement Practice I for RN-to-BSN Students. 10 Credit Hours.
Nursing Management of the client throughout adulthood who experiences alterations and/or adaptations/maladaptations in physiologic defense mechanisms; complex alteration and/or adaptations in organ system function. The client in this course is identified as the individual, family or significant others. Course content emphasizes concepts of infection, the surgical client, immunity and altered cell growth, utilizing the nursing theories and the nursing process. Assists adult clients to adjust to multisystem alterations/adaptations/maladaptations in the endocrine, cardiovascular, respiratory, immunological and hemopoietic, nervous, musculoskeletal, digestive, and renal urinary systems. Specific models are utilized to enhance the teaching of critical thinking. Research findings are utilized to support nursing interventions.
Requisite: Must be in the RN to BSN program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 400. Theories, Research and Evidence-Based Practice. 3 Credit Hours.
Course emphasis is placed on developing an understanding of the research process and application of research findings in community-based practice in multicultural settings. Course focuses on the relationship between theory, research, practice, and the development of competencies to become an informed consumer of research. Writing Credit.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

NUR 401. Evidence-Based Nursing Practice. 3 Credit Hours.
This course examines evidence-based practice in nursing. Focuses on the research process; location, critical appraisal, and evaluation of evidence; application and evaluation of evidence-based practice changes; and quality improvement.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.
NUR 402. Global Health Disparities Research. 3 Credit Hours.
This is a 4 week intensive educational experience that prepares students to be successful conducting supervised health disparities research as part of the MHIRT program at a foreign institution, disseminating findings, and applying to graduate school. The training program is broken into a preparation phase (3 weeks prior to leaving to their host country), and a dissemination phase (1 week after they return). Students will be working as a research assistant at a foreign site for eight weeks in between the preparation and dissemination phases of this training program. Students will learn about the influence of culture and healthcare policy on health and health disparities, research design, statistics, communicating research findings and careers in health disparities research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 403. Advanced Placement Practice II for RN-to-BSN Students. 10 Credit Hours.
This course focuses on the nursing process in the care of pediatric clients and families, the obstetrical client, and women's health. Emphasis is on the use of the nursing process to assist clients to adapt to health alterations requiring care in secondary health care settings. This course covers care of the pediatric client and the childbearing client and women's health.
Requisite: Must be in the RN to BSN program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 405. Professionalism and Career Pathways. 3 Credit Hours.
This nursing course focuses on the assessment and development of a career pathway for registered nurses seeking a Bachelor's in the Science of Nursing professional nursing practice. There will be a focus on concepts of professionalism, roles in nursing, advanced practice, diversity, culture and a critical analysis of legal, ethical and political dimensions of nursing practice.
Requisite: Must be a Nursing Clinical Major.
Components: DIL.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 406. Current Issues in Healthcare. 3 Credit Hours.
The focus of this course is to explore and understand current and emerging healthcare issues as well as discuss how nurses as members of interprofessional healthcare teams contribute to positive patient outcomes. Students will integrate their professional nursing practice experiences to enrich discussions of current and emerging healthcare issues.
Prerequisite: NUR 311. And NUR 314. And NUR 350. And NUR 400.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

NUR 408. Genetics and Healthcare. 3 Credit Hours.
Exploration of basic knowledge in genomics, understanding of social, cultural and psychological implications of genetic services, health prevention and promotion.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 411. Adult Health Ill. 5 Credit Hours.
This course focuses on the adult experiencing complex multisystem alteration/adaptations in organ and system function. Emphasis is on the use of the nursing process to assist adult clients to adapt to system related insults.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
NUR 412. Epidemiology for Population-Based Care. 2 Credit Hours.
During this course students will examine the principles of epidemiology including, the historical evolution of epidemiology, the natural history of disease, epidemiologic models, and epidemiologic research. Health and disease is conceptualized as a complex interaction between individual relationships, community and socio-economic-politico level factors with unique considerations for target populations across the lifespan. The process of disease surveillance is discussed including trends in communicable and non-communicable disease as well as the measures of morbidity (e.g., incidence and prevalence) and mortality. Factors, or determinants of health, that contribute to distribution of disease in populations are discussed. The effect of health care policy and health economics on disease distribution is considered. How the interaction of the determinants of health, health care policy, and health economics contribute to health disparities is also examined. Disease surveillance and health promotion are examined from a global perspective. The impact of the environment on health is also discussed. Finally, introductory disaster management concepts are reviewed as they relate to the care of populations affected by disasters.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

NUR 414. Advanced Placement Practice III for RN-to-BSN Students. 10 Credit Hours.
Content emphasizes concepts and themes of families and communities and the use of the nursing process to assist in promoting and maintaining health. The behavioral health focusses on psychotherapeutic processes across the life span Emphasis is on planning nursing care for individuals, families and groups and p rofessional and therapeutic communication skills and techniques. Explores the influence of neuro-physiology and psychopharmacology on the development of psychiatric and mental health services and the evolution of the role of the psychiatric nurse.
Requisite: Must be in the RN to BSN program.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 415. Perianesthesia Nursing. 3 Credit Hours.
The focus of this course is on the use of the nursing process to develop and implement nursing management strategies for patients and families undergoing a surgical and/or special procedure. Emphasis is placed on the use of a multicultural nursing perspective to plan and implement nursing interventions. This course highlights Perianesthesia nursing care of surgical patients.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 417. Pre-Immersion Course for Accelerated Option Students. 0 Credit Hours.
This course is designed to facilitate personal and professional success; this course introduces students to the purposes and processes of nursing. An emphasis is placed on study, communication, and critical thinking skills that support academic achievement. Students also examine the relationship between learning and motivation.
Requisite: Must be a Nursing Clinical Major.
Components: DIL.
Grading: NON.
Typically Offered: Spring & Summer.

NUR 418. Pre-Immersion for Traditional Option Students. 0 Credit Hours.
This course is designed to facilitate personal and professional success; this course introduces students to the purposes and processes of nursing. An emphasis is placed on study, communication, and critical thinking skills that support academic achievement. Students also examine the relationship between learning and motivation.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: NON.
Typically Offered: Fall.

NUR 424. Math Essentials for BSN Students. 0 Credit Hours.
This course supports students with basic to advanced medical math concepts. Topics include calculating dosages, using scientific formulas and basic statistical principles.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
NUR 426. Leadership and Management in Nursing. 5 Credit Hours.
Analysis and synthesis of the application of professional concepts in a variety of multicultural health care delivery systems. Emphasis is placed on personal, professional, and organizational growth. Individualized and integrated clinical experiences are provided through direct clinical supervision by preceptors.
Requisite: Must be in the RN to BSN program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

NUR 430. Leadership in Nursing. 3 Credit Hours.
Theoretical and applied concepts of transition to the nursing role within the healthcare setting are explored in this course. The focus is on practice issues and responsibilities in contemporary professional nursing practice. Emphasis is placed on the transition to practice and nursing care systems with increasing responsibility through discussion of practice theory and styles, empowering, mentoring, managing change and striving for excellence. Seminar discussion topics will focus on the issues of successful transition to the practice environment as new nurse.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 435. Clinical Express Undgr. 0-5 Credit Hours.
This course is an online orientation for clinical faculty at the School of Nursing and Health Studies. The content is specific to clinical instructors who will be supervising BSN nursing students at various clinical sites used by the School of Nursing and Health Studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

NUR 440. Population Focused Nursing. 4 Credit Hours.
The focus is on population-focused nursing and community-oriented approaches to understanding and addressing major public health concerns across the life span. Emphasis is on assessing, planning, implementing and evaluating programs for a variety of communities both domestically and internationally. Health and disease is conceptualized as a complex interaction between individual, relationship, community and socio-economic-politic level factors. Epidemiology, sociology, behavioral sciences and nursing theory and practice are integrated throughout. Special attention is given to addressing the unique needs of vulnerable populations and cultural groups, the elimination of health disparities, and social justice.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 441. Public Health Nursing. 2 Credit Hours.
The focus of this course is on public health nursing and community-oriented approaches to addressing major public health concerns across the life span. Emphasis is on assessing, planning, implementing and evaluating programs for a variety of communities both domestically and internationally. Health and disease is conceptualized as a complex interaction between individual, relationship, community and socio-economic-politic level factors. Epidemiology, sociology, behavioral sciences and nursing theory and practice are integrated throughout. Special attention is given to addressing the unique needs of vulnerable populations and cultural groups, the elimination of health disparities, and social justice considering the population aggregate's determinants of health. Finally, the varying roles of the public health nurse are examined, including that of the public health nurse in disaster response.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 448. Psychiatric Mental Health Nursing. 4 Credit Hours.
The focus is on psychotherapeutic processes across the life span. Emphasis is on planning nursing care for individuals, families, and communities with a variety of psychiatric and mental health problems in various settings (inpatient, outpatient, community). Professional and therapeutic communication skills and techniques are important components of this course.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
NUR 453. Role Transition. 5 Credit Hours.
Theoretical and applied concepts of transition to the nursing role within the healthcare setting are integrated in this course. The course is a synthesis of previously learned knowledge, incorporating the components of physiological, psychological, and developmental concerns in the care of the client. Seminar discussion topics have a focus on the issues of successful transition to the practice environment as a nurse generalist, with the ability to exercise clinical reasoning and evidence-based practice.
Requisite: Must be a Nursing Clinical Major.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

NUR 461. Health Disparities Research Practicum. 1-4 Credit Hours.
This course is designed to provide opportunities for students across all levels of higher education to participate in health disparities research. Students will be mentored by a health disparities researcher with an active research project. Objectives will be established by the research mentor and the student according to educational level, interests and opportunities. Students will be incorporated into the research team and expected to attend project meetings. They will also be expected to participate in scholarly work that could contribute to the success of the project. Examples of scholarly work include co-authoring research papers and presentations, developing recruitment materials, assisting in compiling/developing data collection measures, or any other product deemed appropriate by the mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 485. Global Health: Transcultural Nursing. 3 Credit Hours.
This course will use a hybrid model that includes an immersive experience in an international setting followed by online activities and face to face meetings. The University of Miami, School of Nursing and Health Studies will provide transcultural nursing experiences under different international healthcare systems. NUR 487 is designed to offer students the opportunity to develop an understanding of healthcare systems and care delivery models outside of the U.S. Academic and supervised clinical interactions will allow students to have a cultural clinical nursing experience. This course will allow students to apply and synthesize basic science knowledge and skills that foster ethical, legal and culture specific health care.
Components: DIL.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 487. International Health: Transcultural Nursing. 3 Credit Hours.
Collaborative clinical venture between the University of Miami, School of Nursing and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas including Medical-Surgical, Surgery, Intensive Care and/or Emergency nursing units. This course will allow students to apply and synthesize basic science knowledge and skills that foster ethical, legal and culture specific health care.
Requisite: School of Nursing Health Studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 498. Selected Topics. 0-6 Credit Hours.
Special topics in nursing. Course titles and descriptions change semester-by-semester based on course content. This designation is used as needed. Credits can range from 0-6 credits.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 499. Selected Topics. 0-6 Credit Hours.
Special topics in nursing. Course titles and descriptions change semester-by-semester based on course content. This designation is used as needed. Credits can range from 0-6 credits.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

NUR 536. U.S. Health Care Crisis: Politics and Policies. 3 Credit Hours.
This course will explore key health policy issues within the U.S., along with the politics and interest groups which shape them. Fundamental concerns within the health care system such as: cost, quality and access to care will be analyzed. Major topics of discussion will include: Medicare, Medicaid, private insurance, the nursing shortage, and prescription drugs. The politics and policies surrounding issues such as bioethics, globalization, and infectious disease will also be considered.
Requisite: Junior Status and no IP Credit.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
Accelerated BSN

Students enrolled in the Accelerated BSN program must complete the following coursework as specified in the Plan of Study to earn the BSN degree through the School of Nursing and Health Studies (SONHS):

**Curriculum Requirements**

Traditional BSN

Students enrolled in the Traditional BSN program must complete the coursework listed under curriculum to earn the BSN degree through the School of Nursing and Health Studies (SONHS). All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to degree, clinical prerequisite, or major requirements.

Mission
The mission of the School of Nursing and Health Studies (SONHS) is to educate students and support faculty committed to the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

Goals
Student Learning Outcomes

• Students will demonstrate advanced knowledge of natural and behavioral sciences, arts, humanities and nursing science as a basis for cultural competence in nursing practice.

• Students will demonstrate the use of evidence-based research and scholarship findings in practice.

• Students will demonstrate effective inter-professional communication with others to improve patient outcomes in culturally diverse settings.

C  Course includes a clinical component and meets the UM civic engagement criteria.
L  Course includes a lab component.
*  The nursing major may be used to fulfill this cognate area.
** Chemistry is satisfied by CHM 103/CHM 105 or CHM 121/CHM 113.
*** MTH 101, MTH 107, or mathematics placement higher than MTH 107. Note: MTH 107 is a pre- or co-requisite for BIL 150.
**** These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in the Plan of Study.
***** Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students’ GPA.
****** This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level (except for BPH 202, HCS 202, and NUR 202).
******* These courses are factored into the Traditional BSN nursing coursework; students do not need to take extra courses to complete this requirement.
******** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

This is only a sample. There are numerous ways students can create plans of study for the Traditional BSN program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG and MTH placement scores and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG and MTH placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 101
• Major(s): Nursing  
• Minor(s): None  
• Cognates  
  • Art & Humanities: World of Music (RAU = Music)  
  • People & Society: The Science of Human Development (RAU = Psychology)  
  • Science, Technology, Engineering, and Mathematics (STEM): Nursing major (RAU = Nursing & Health Studies)

All Areas of Proficiency, Areas of Knowledge, clinical prerequisites, and electives, except for the nursing major elective, must be completed prior to the clinical components of the Traditional BSN program (i.e., the third year).

C    Course includes a clinical component and meets the UM civic engagement criteria.
L    Course includes a lab component.
*    These NUR courses follow a lock-step sequence; these NUR courses must be taken in the semesters specified in this Plan of Study.
**    Course must be completed online via Blackboard prior to full matriculation into the clinical components of the Traditional BSN program (i.e., the third year); students officially register for the course in their first semester of their third year but the course does not affect the students’ GPA.
***    This elective must be completed by taking at least 3 credits in a BIL, BPH, HCS, HST, or NUR course at or above the 200 level (except for BPH 202, HCS 202, and NUR 202).

Mission
The mission of the School of Nursing and Health Studies (SONHS) is to educate students and support faculty committed to the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

Goals
Student Learning Outcomes
• Students will demonstrate advanced knowledge of natural and behavioral sciences, arts, humanities and nursing science as a basis for cultural competence in nursing practice.
• Students will demonstrate the use of evidence-based research and scholarship findings in practice.
• Students will demonstrate effective interprofessional communication with others to improve patient outcomes in culturally diverse settings.

RN to BSN
Students enrolled in the RN-to-BSN program must complete the following coursework as specified in the Plan of Study to earn the BSN degree through the School of Nursing and Health Studies (SONHS):

Curriculum Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NUR 305</td>
<td>Issues in Health Disparities</td>
<td>3</td>
</tr>
<tr>
<td>NUR 311</td>
<td>Theories and Concepts of Nursing</td>
<td>2</td>
</tr>
<tr>
<td>NUR 314</td>
<td>Health Assessment and Promotion (L)</td>
<td>3</td>
</tr>
</tbody>
</table>
Upon successful completion of the 30 core credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of the following Advanced Placement courses at no additional tuition cost:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NUR 390</td>
<td>Advanced Placement Practice I for RN-to-BSN Students</td>
<td>10</td>
</tr>
<tr>
<td>NUR 403</td>

<td>10</td>
</tr>
<tr>
<td>NUR 414</td>
<td>Advanced Placement Practice III for RN-to-BSN Students</td>
<td>10</td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td></td>
<td>30</td>
</tr>
</tbody>
</table>

The RN-to-BSN is a lock-step program. Students are admitted into a 3 semester or 5 semester track and are required to follow the appropriate Plan of Study outlined below.

### Plan of Study - 3 semester track

<table>

C Course includes a clinical component and meets the UM civic engagement criteria.

L Course includes a lab component.

* Upon successful completion of the 30 junior year credits listed above, 30 additional credits are automatically awarded to RN-to-BSN students simply for possessing an RN license, bringing their overall credit total up to the 120 credits required for the BSN degree. These credits are added in the form of Advanced Placement courses at no additional tuition cost.

## Mission

The mission of the School of Nursing and Health Studies (SONHS) is to educate students and support faculty committed to the art and science of nursing and health care studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation, and the world.

## Goals

### Student Learning Outcomes

- Students will demonstrate advanced knowledge of natural and behavioral sciences, arts, humanities and nursing science as a basis for cultural competence in nursing practice.
- Students will demonstrate the use of evidence-based research and scholarship findings in practice.
- Students will demonstrate effective interprofessional communication with others to improve patient outcomes in culturally diverse settings.
Public Health

Academic Programs
The University of Miami (UM) School of Nursing and Health Studies (SONHS) offers courses leading to the degree of Bachelor of Science in Public Health (BSPH). Baccalaureate education provides the foundation for further education in public health and specialized health professional fields. The program is currently undergoing the accreditation process with the Council on Education for Public Health.

Admission
Admission as a new freshman or transfer student to the BSPH program is handled through the Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint) and is open to applicants who meet the general requirements for admission to the UM.

Applicants interested in any of the SONHS' baccalaureate programs are encouraged to speak with a representative from the SONHS' Office of Student Services (OSS) (https://www.sonhs.miami.edu/admissions-and-student-services/) and/or the UM's Office of Undergraduate Admission (http://admissions.miami.edu/undergraduate/?utm_source=Mailers&utm_medium=Print&utm_campaign=FromPrint).

Academic Policies

Grades
Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to grades, progression, and dismissal.

Undergraduate BSPH students must earn a C- or higher in each course for the major to progress.

When a course must be repeated, progression in the BSPH program may be altered in order for prerequisites to be met. Such alteration may lengthen the time required to complete the BSPH program.

Grade Point Averages (GPAs)
Students should refer to the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) for more detailed information on the SONHS' policies related to GPAs, progression, and dismissal.

Requirements to Declare
Current UM students who wish to switch into the BSPH program or add an additional major in public health must possess a minimum 2.8 UM GPA to be considered. Please note that the SONHS may have a waitlist to get into this program so meeting the minimum admission criteria for the program does not guarantee admission. Seats in the program are allocated from the waitlist to students based on a holistic review of all students on the waitlist but the following factors are strongly considered in each admission decision: (1) the availability of seats in a student's intended year of graduation, (2) the date in which a student added himself/herself to the waitlist, (3) the student's UM GPA, and (4) the feasibility of the student completing the desired degree on time. Questions about the waitlist should be directed to the academic advisors in the OSS.

Incoming transfer students who plan to enter the BSPH program must possess a minimum 2.8 transfer GPA to be considered for admission.

Requirements to Continue
BSPH are strongly encouraged not to continue with the BSPH degree if they have less than a 2.5 UM GPA after 15 credits completed in the major.

Requirements to Graduate
Students enrolled in the BSPH program must complete their coursework with a minimum 2.0 UM GPA and a minimum 2.0 major GPA to graduate.

Prerequisites and Corequisites
Students must successfully complete all specified prerequisites with a C or higher before entering a nursing course or with a C- or higher before entering a health science or public health course. Students must also register for all required corequisites at the time of enrollment. If students enroll in a health science, nursing, or public health course without the proper prerequisite or corequisite, they may be dropped from the course at the discretion of the course instructor, OSS, Associate Dean, or Dean. Students should consult an academic advisor in the OSS (http://oss.sonhs.miami.edu/) to discuss any questions related to course enrollment.

Residency Requirements
Undergraduate BSPH students must adhere to the general UM residency rules. At least half of the public health major and at least half of the public health minor must be taken in residence at the UM. Exceptions to the residency requirements may only be obtained through an appeal to the Undergraduate Academic Standing and Admissions Committee (UGASAC). Students should speak with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) for more information on the residency requirements and on the UGASAC appeals process.
Public health majors must complete at least 18 of the 33 credits required for the public health major in residence at the University of Miami School of Nursing and Health Studies. Public health majors can apply a maximum of 6 credits from study abroad programs toward their public health major. These study abroad credits will count as part of the remaining 15 of the 33 credits required of the major that are allowed to be taken outside of the University of Miami School of Nursing and Health Studies.

**Transfer Credit**

Students may transfer health science, nursing, or public health courses from other institutions to the UM with approval by the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/). Detailed course descriptions or syllabi must be presented to the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) for transfer equivalency reviews.

**Degree Requirements**

Listed in this section are the degree requirements for the BSPH program.

The University of Miami’s General Education Requirements (GERs) consist of the Areas of Proficiency, Areas of Knowledge, and Advanced Writing and Communication Skills requirements. Through the completion of the GERs, graduates acquire essential intellectual skills and engage a range of academic disciplines. The GERs provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The GERs also allow students to create an integrative map for their academic careers, providing a context for more focused studies.

There are numerous ways students can create plans of study for the BSPH program. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.sonhs.miami.edu/academics/student-handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study. Students should meet with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) to discuss any questions related to degree requirements and plans of study.

**Areas of Proficiency**

The Areas of Proficiency requirements ensure students either possess or develop the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

**English Composition**

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively.

*Requirements*

Students complete this requirement by completing ENG 105 and ENG 106 (Note: SAT or ACT verbal scores can be used to waive the ENG 105 requirement; credit will not be awarded for the waiver. Students who enter UM with credits for ENG 105 or ENG 106 may take ENG 208 to finish this requirement).

*Outcomes*

By completing the English Composition requirement, students will be able to:

1. gather information, synthesize data, compare various points of view, and present results in writing
2. develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument
3. consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

**Mathematics**

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems by emphasizing the manipulation, interpretation, and application of quantitative data.

*Requirements*

Students complete this requirement by completing a course in each of the following areas:

1. **Mathematics**: MTH 107 or higher
2. **Statistics**: BPH 202 or other approved statistics course

Math placement criteria is established affected by the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/). The following items may affect students’ math placement at the UM: SAT and ACT scores, ALEKS math placement scores, and AP, IB, dual enrollment, and transfer credits. Students should review the information listed on the Department of Mathematics (http://www.math.miami.edu/undergraduate/aleks-math-placement/) website and consult with an academic advisor in the OSS (https://www.sonhs.miami.edu/admissions-and-student-services/) if they have any questions.
Outcomes
By completing the Mathematics requirement, students will be able to:

1. select quantitative tools appropriate for solving problems
2. use quantitative tools appropriate for solving problems
3. interpret quantitative data in an appropriate manner for solving problems

Social Science
Requirements
Students complete this requirement by completing PSY 110 and an additional approved social science course for a total of 6 credits.

Modern Language
Requirements
Students complete this requirement by completing one 3 credit Modern Language course at or above the 200 level.

Natural Science
Requirements
Students complete this requirement by completing BIL 150 and BIL 151, as well as CHM 103 and CHM 105 or CHM 121 and CHM 113 for a total of 9-10 credits.

Areas of Knowledge (Cognates)
The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the Areas of Knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements, students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Students fulfill the Areas of Knowledge requirement by completing a specific "cognate" in three distinct areas: Arts & Humanities, People & Society, and Science, Technology, Engineering, and Mathematics (STEM). Cognates are groups of "at least three related courses for at least 9 credits" focused on a specific topic. Majors and minors can be used to fulfill a cognate in its respective Area of Knowledge. Each cognate used to fulfill one of the Areas of Knowledge must have a different Responsible Academic Unit (RAU). Several cognates may include the same courses; however, one course cannot be used to complete multiple cognates. For more information on cognates, go to the "General Education Requirements" section of the Academic Bulletin or visit http://www.miami.edu/cognates/.

Arts & Humanities
Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Requirements
Complete one Arts & Humanities cognate.

Outcomes
By completing the Arts & Humanities requirement, students will be able to:

1. critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis
2. understand the creation and performance of art

People & Society
People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Requirements
Complete one People & Society cognate. The public health major may be used to fulfill this cognate area.

Outcomes
By completing the People & Society requirement, students will be able to:

1. analyze the organization of society
2. analyze patterns of social change
Science, Technology, Engineering, and Mathematics (STEM)

STEM cognates develop students’ abilities to think critically about mathematical, scientific, and technological issues by understanding the processes and methods of scientific inquiry involved in experimentation, observation, and quantitative analysis. The STEM cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Requirements
Complete one STEM cognate.

Outcomes
By completing the STEM requirement, students will be able to:

1. understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems
2. interpret quantitative data and draw useful conclusions

Major
Refer to the "Major Requirements" section below for information on the courses required for the BSPH program.

Minor
BSPH students are not required to complete a minor.

Advanced Writing and Communication Skills

The Advanced Writing and Communication Skills requirement empowers public health students to develop their communication skills, both written and verbal, enabling them to better articulate information relating to health science, nursing, and public health.

Requirements
To fulfill this requirement, students must complete five designated writing-intensive courses. Several public health requirements and/or electives may qualify as writing-intensive.

Public health Courses that Require Formal Student Writing or Presentation

The following courses carry writing and presentation components and may count for the BSPH program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Writing Assignment</th>
<th>Student Presentations</th>
</tr>
</thead>
<tbody>
<tr>
<td>BPH 301</td>
<td>Various papers</td>
<td>Various presentations</td>
</tr>
<tr>
<td>BPH 305</td>
<td>Three reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 309</td>
<td>Three reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 310</td>
<td>Four reflective papers</td>
<td>Final student presentation</td>
</tr>
<tr>
<td>BPH 321</td>
<td>Five reflective papers</td>
<td>Student presentations throughout class</td>
</tr>
<tr>
<td>BPH 490</td>
<td>Five journal entries, final paper</td>
<td>Final student presentation</td>
</tr>
</tbody>
</table>

Outcomes
By completing the Advanced Writing and Communication Skills requirement, students will be able to:

1. effectively communicate information related to public health in both speech and in writing, using appropriate information sources, presentation formats, and technologies
2. demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare

Plan for assessment

Student Performance on Written Assignments and Presentations

In order to graduate from the BSPH program students must successfully pass two courses in English Composition (i.e., ENG 105 and ENG 106) as well as five writing-intensive courses with a grade greater than or equal to 70%. The majority of public health courses include written assignments and student presentations as part of the course grade. Grading of student written assignments and oral presentations are based on defined rubrics. These courses may be applied to the BSPH program as outlined in the major requirements.

Graduating Senior Survey (GSS) Responses for Questions Related to Written and Verbal Communication

Based on the results from the GSS, students believe their undergraduate coursework in the BSPH program significantly enhanced their written, oral, and formal presentation skills, which, in turn, allowed them to more effectively interact with various individuals and groups.

Electives

Students must earn a minimum of 120 credits to complete the BSPH degree. Students may need to take varying numbers of elective credits beyond the degree requirements listed above to reach the 120 credit threshold.
Major Requirements

Public health can be a primary major or an additional major.

Coursework in the BSPH program is based on recommendations made by the Association for Prevention Teaching and Research (2008) for undergraduate course work in public health. Students are required to complete 33 credit hours of public health coursework, which includes 27 credit hours of core required courses and 6 credit hours of approved public health electives.

Visit the "MAJORS" link to learn more about the major requirements for the SONHS’ BSPH program, which are listed under the "OVERVIEW" section for the public health major.

Second Major Requirements

A second major in public health is available to all UM students. Students who pursue a second major in public health must complete the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BPH 206</td>
<td>Introduction to Public Health</td>
<td>3</td>
</tr>
<tr>
<td>BPH 208</td>
<td>Introductory Epidemiology</td>
<td>3</td>
</tr>
<tr>
<td>BPH 305</td>
<td>Issues in Health Disparities</td>
<td>3</td>
</tr>
<tr>
<td>BPH 309</td>
<td>Health and Environment</td>
<td>3</td>
</tr>
<tr>
<td>BPH 310</td>
<td>Global Health</td>
<td>3</td>
</tr>
<tr>
<td>BPH 321</td>
<td>Health Promotion and Disease Prevention</td>
<td>3</td>
</tr>
<tr>
<td>BPH 322</td>
<td>Introduction to Health Policy</td>
<td>3</td>
</tr>
<tr>
<td>BPH 352</td>
<td>Biological Principles of Public Health</td>
<td>3</td>
</tr>
<tr>
<td>BPH 465</td>
<td>Public Health Statistics and Data Management</td>
<td>3</td>
</tr>
<tr>
<td>BPH 490</td>
<td>Field Practicum in Community Health</td>
<td>3</td>
</tr>
<tr>
<td>Elective(*)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Total Credit Hours</td>
<td>33</td>
<td></td>
</tr>
</tbody>
</table>

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

Minor Requirements

The SONHS offers a minor in public health. The School also collaborated with the School of Communication to offer a minor health communication.

Visit the "MINORS" link to learn more about the minor requirements for the public health and health communication minors.

Classes Not Applicable Toward SONHS Degrees

The following courses do not count toward the 120 credits required of the BSPH degree: DAN 101-104, ENG 103, and MTH 099. Based on their ENG or MTH placement scores, students may need to complete ENG 103 or MTH 099 before enrolling in higher-level requirements. Even though the courses listed above cannot count toward graduation, they can count toward the 12 credits required to be considered a full-time student.

Senior Assessments

In line with the SONHS’ ongoing accreditation efforts, seniors with a major in the health science, nursing, and public health may be required to participate in general or major-specific senior assessments lasting up to several hours each. Scores on senior assessments will not affect students’ GPAs or ability to graduate, but failure to complete required assessments may delay or prevent students’ ability to graduate.

Bachelor of Science in Public Health (BSPH) and Master of Public Health (MPH)/Master of Science in Public Health (MSPH) 4+1 Program

The SONHS and the Graduate Programs in Public Health at the UM Miller School of Medicine have developed a Bachelor of Science in Public Health (BSPH) to a Master in Public Health (MPH) or Master of Science in Public Health (MSPH) 4 + 1 program. Please click here (p. 1562) for more information.

Research Experience

Students may participate in research experiences through the SONHS (http://www.miami.edu/sonhs/index.php/sonhs/research/) or the Office of Undergraduate Research and Community Outreach (http://www.miami.edu/index.php/undergraduate_research_and_community_outreach/) during
their time at the UM. Students should speak with the academic advisors located in the OSS (http://oss.sonhs.miami.edu/) to learn more about the research opportunities available to them at the UM.

**Required Coursework and Sample Plans of Study**

Visit the "MAJORS" link to learn more about the academic requirements for the SONHS' BSPH program and to view a sample graduation plan, which are listed under the "OVERVIEW" and "PLAN OF STUDY" sections, respectively, for the BSPH program.

**BPH 200. Basic Concepts Public Health. 3 Credit Hours.**
This course focuses on current health care issues and the health care system as well as the future direction of health care.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

**BPH 202. Introductory Statistics in Health Care. 3 Credit Hours.**
Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing, health sciences, and public health.
Corequisite: MTH 101. Or Requisite: ALEKS ≥ 55 or SAT Score ≥ 630 or ACT > or = 28.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BPH 206. Introduction to Public Health. 3 Credit Hours.**
Introduction to all aspects of public health, including health services administration, and policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BPH 208. Introductory Epidemiology. 3 Credit Hours.**
This course is a general introduction to epidemiology, definition of concepts and natural history of disease and levels of prevention. It also covers measures of morbidity and mortality. Epidemiologic aspects of infectious and chronic diseases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**BPH 217. Medical Terminology. 1 Credit Hour.**
This course will assist the student in understanding the principles of medical word building in order to develop the extensive medical vocabulary used in health care professions. Students receive a thorough grounding in basic medical terminology through the study of root words, prefixes and suffixes. The course emphasizes correct pronunciation, spelling and use of medical terms.
Prerequisite: BIL 150.
Components: CLN.
Grading: GRD.
Typically Offered: Fall.

**BPH 301. Human Sexuality and Vulnerable Populations. 3 Credit Hours.**
The study of human sexuality via multidisciplinary theoretical perspectives and research. Students will examine the complex relationships of the physiological, psychological, cultural, gender, religious, historical, and political aspects of human sexuality. Human sexuality in the context of health disparities will form the foundation for the course. WRITING COURSE.
Prerequisite: BPH 206 or Requisite: Nursing Clinical Major.
Components: LEC.
Grading: GRD.

**BPH 303. HIV/AIDS and Health Maintenance for Health Care Providers. 3 Credit Hours.**
Definition, diagnosis, management and care of diverse patient populations with HIV infection and AIDS. Presented and discussed from an interdisciplinary health care perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

**BPH 305. Issues in Health Disparities. 3 Credit Hours.**
This course will be an introduction to the general research on health systems and health disparities. Emphasis will be paced on social, biological, economic, and social policy issues that impact on the health of minority populations. Concepts associated with epidemiology, poverty, racism, public policy, and international politics will be explored. WRITING COURSE.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BPH 306. Principles of Nutrition. 3 Credit Hours.
Principles of nutrition integrated with cultural dietary patterns for client adaptation across the lifespan.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 309. Health and Environment. 3 Credit Hours.
This course examines health issues, scientific understanding of causes and possible future approaches to control of the major environmental health problems. Topics include how the body reacts to environmental pollutants; physical, chemical, and biological agents of environmental contamination; vectors for dissemination; susceptible populations; the scientific bases for policy decisions and emerging global environmental health problems.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BPH 310. Global Health. 3 Credit Hours.
Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the global are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world are emphasized.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 317. Theories in Growth and Development. 3 Credit Hours.
Application of growth and development theories through the lifespan with a case study approach to issues commonly encountered nursing practice in a variety of clinical settings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BPH 319. Contemporary Issues in Bioethics for Health Care. 3 Credit Hours.
The course will cover bioethical issues in the health care environment including ethical principles, theories and decision making strategies.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BPH 321. Health Promotion and Disease Prevention. 3 Credit Hours.
The focus of this course is on the understanding and implementation of strategies aimed at promoting health and preventing disease. It also focuses on optimal health maintenance and wellness support for individuals, families, and communities. The content of the course includes health across the lifespan and resources associated with health promotion. Common health alternations will be discussed, as well as socio-cultural perceptions of health and illness.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 322. Introduction to Health Policy. 3 Credit Hours.
This course provides an introduction to the organization, delivery, and financing of health care in the United States. We will consider policy challenges created by the structure of the health care system, including access to care, quality of care, and cost growth. Major areas of focus will include public insurance programs, private insurance, the uninsured, health disparities, and implementation of health care reform legislation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
BPH 352. Biological Principles of Public Health. 3 Credit Hours.
This course examines the biological basis and pathogenesis of diseases from a public health perspective and describes the impact on populations. This course also presents the basic scientific and biomedical concepts of modern public health problems and explores in depth mechanisms and models of the major categories of disease. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs.
Prerequisites: BPH 206 and BIL 150 and BIL 151 and CHM 103 or CHM 111 or CHM 121 and CHM 105 or CHM 113.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 355. Global Nutrition. 3 Credit Hours.
This course examines nutrition related public health issues in the global setting. Nutrition related morbidity and mortality, etiologic factors, and population-focused strategies to address these issues are covered. Food relief and nutrition policies and programs at the local, national and international levels are examined. Current scientific research in international nutrition is reviewed from an epidemiological perspective.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BPH 365. Research Methods in Public Health. 3 Credit Hours.
This course utilizes fundamental epidemiological skills to apply concepts and practical issues related to conducting public health research. It covers key processes of research investigations such as the identification of gaps in the field, critical thinking, study design selection, research proposal development, quantitative and qualitative research methods, and best practices for the dissemination of research findings.
Prerequisite: BPH 208.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 402. Global Health Disparities Research. 3 Credit Hours.
This is a 4 week intensive educational experience that prepares students to be successful conducting supervised health disparities research as part of the MHIRT program at a foreign institution, disseminating findings, and applying to graduate school. The training program is broken into a preparation phase (3 weeks prior to leaving to their host country), and a dissemination phase (1 week after they return). Students will be working as a research assistant at a foreign site for eight weeks in between the preparation and dissemination phases of this training program. Students will learn about the influence of culture and healthcare policy on health and health disparities, research design, statistics, communicating research findings and careers in health disparities research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BPH 419. Contemporary Health Issues in South Florida. 3 Credit Hours.
This course will provide students with an in-depth look at public health topics relevant to communities in South Florida. Emphasis will be placed on the social, cultural, and policy issues that impact the health of vulnerable populations in our community. Interdisciplinary researcher knowledge and practice from the University of Miami and other relevant institutions will be highlighted.
Prerequisite: BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BPH 461. Practicum in Health Disparities Research. 1-4 Credit Hours.
This course is designed to provide opportunities for students across all levels of higher education to participate in health disparities research. Students will be mentored by a health disparities researcher with an active research project. Objectives will be established by the research mentor and the student according to educational level, interests and opportunities. Students will be incorporated into the research team and expected to attend project meetings. They will also be expected to participate in scholarly work that could contribute to the success of the project. Examples of scholarly work include co-authoring research papers and presentations, developing recruitment materials, assisting in compiling/developing data collection measures, or any other product deemed appropriate by the mentor.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BPH 465. Public Health Statistics and Data Management. 3 Credit Hours.
This course is designed to give students an opportunity to apply basic principles of statistics and data management in public health. Students will learn to use statistical techniques to answer questions relating to the morbidity and mortality of health conditions and the efficacy and effectiveness of public health interventions.
Prerequisites: BPH/HCS/NUR 202 and BPH 206.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BPH 487. Global Health Practicum. 3 Credit Hours.
Collaborative clinical venture between UM/SON and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas, including MedSurg, ICU and/or Emergency nursing units. Students will apply and synthesize basic science knowledge and skills that foster ethical, legal, and culturally specific health care.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BPH 490. Field Practicum in Community Health. 3 Credit Hours.
This course provides students with field experiences in community health. During the didactic portion of the course, students will be introduced to the basic principles and methods used in community health assessment, program development, program implementation, and evaluation. During the field experience component of the course students will work under the supervision of lead faculty to apply the knowledge and skills they obtained during their course of study to address a public health issue.
Prerequisite: BPH 206 and 208 and 321 and 465.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.

BPH 499. Selected Topics. 0-6 Credit Hours.
Offerings will vary by semester based upon student demand and availability of faculty.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

B.S.P.H. Bachelor of Science in Public Health /M.P.H. Master of Public Health Joint Degree
Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MPH)
The University of Miami’s School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Public Health (MPH). SONHS academically-qualified juniors are eligible to apply to the MPH program. If accepted, students complete the combined bachelor’s and master’s degrees in 5 years.

Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

Accepted students take 12 credits of master’s level (600) Public Health courses during their undergraduate senior year, not to exceed 6 credits per semester. These 600 level credits count towards the MPH degree. Students must achieve a minimum GPA of 3.0 in the graduate level courses in order to matriculate into the MPH program. The summer following the completion of the BSPH degree, students may take 3 to 6 graduate-level credits at the 600 level Public Health courses and then take the required the following fall and spring semesters to complete the 45 credit MPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

Admission Requirements
SONHS academically-qualified juniors are eligible to apply to the MPH program. Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.
BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

**Elective Courses**

Choose 12 credits of coursework in one or more of the following areas:

- EPH - 600 or 700 level courses not already listed
- BST - 600 or 700 level courses not already listed
- Biostatistics
- Environmental and Public Health (not already listed)
- Epidemiology and Population Health Sciences
- Health Services Policy and Research
- Prevention Science and Community Health

**Total Credit Hours**: 165-166

---

* The public health major may be used to fulfill this cognate area.

** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, and SOC 480

*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

1 The Capstone Field Experience and the Capstone Project are both vital components of the MPH program, and together form the Capstone Program. The Capstone Field Experience is designed to provide students with real world work experience in the field of public health. This experience places students in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student. The Capstone Project is intended to build upon this fieldwork and is geared toward providing the student with an opportunity to apply public health academic theory and acquired skills to community health problems. Students are encouraged to build their Capstone Program in such a way that supports their academic and professional interests as they advance in their careers as public health professionals.

**BSPH degree**

This is only a sample. There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

- **ENG placement**: ENG 105
- **MTH placement**: MTH 101
- **Modern Language placement**: SPA 101
• **Major(s):** Public Health
• **Minor(s):** None
• **Cognates**
  • **Art & Humanities:** Popular Culture (RAU = English)
  • **People & Society:** Public Health major (RAU = Nursing & Health Studies)
  • **Science, Technology, Engineering, and Mathematics (STEM):** Biology and Chemistry for Pre-Health Sciences (RAU = Chemistry)

**MPH degree**

BSPH students will complete 12 of 45 graduate-level credits (6 in spring and 6 in fall) for the MPH during their senior year of undergraduate studies. This requires special permission from advisors and deans. The remaining MPH credits will be completed during the summer, fall, winter intersession, spring, and summer semesters immediately following graduation from the BSPH program.

B.S.P.H. Bachelor of Science in Public Health / M.S.P.H. Master of Science in Public Health

Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MSPH)

The University of Miami’s School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Science in Public Health (MSPH). SONHS academically-qualified juniors are eligible to apply to the MSPH program. If accepted, students complete the combined bachelor's and master's degrees in 5 years.

Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MSPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MSPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

Accepted students take 12 credits of master's level (600) Public Health courses during their undergraduate senior year, not to exceed 6 credits per semester. These 600 level credits count towards the MSPH degree. Students must achieve a minimum GPA of 3.0 in the graduate level courses in order to matriculate into the MSPH program. The summer following the completion of the BSPH degree, students may take 3 to 6 graduate-level credits at the 600 level Public Health courses and then take the required following fall and spring semesters to complete the 45 credit MSPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the MSPH program in the fall. Admission decisions regarding the entry of BSPH students into the MSPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

* The public health major may be used to fulfill this cognate area.
** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, and SOC 480.
Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

List of approved Method Courses - Select 2 courses from this list: BST 605, BST 625, BST 630, BST 692, EPH 604, EPH 644, EPH 647, EPH 651, EPH 656, EPH 703, EPH 705, EPH 722, EPH 727, EPH 751, EPH 752, EPH 772, EPH 774, EPH 776

After completion of core courses, the student may select courses to fit his/her own area of interest. This allows for personal tailoring of the academic program to fit the student’s individual needs and career goals.

The MSPH Thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty advisor and thesis project committee during their investigation. Formal MSPH Thesis project oral presentation is required.

BSPH degree

This is only a sample. There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

- ENG placement: ENG 105
- MTH placement: MTH 101
- Modern Language placement: SPA 101
- Major(s): Public Health
- Minor(s): None
- Cognates
  - Art & Humanities: Popular Culture (RAU = English)
  - People & Society: Public Health major (RAU = Nursing & Health Studies)
  - Science, Technology, Engineering, and Mathematics (STEM): Biology and Chemistry for Pre-Health Sciences (RAU = Chemistry)

MSPH degree

BSPH students will complete 12 of 45 graduate-level credits (6 in spring and 6 in fall) for the MSPH during their senior year of undergraduate studies. This requires special permission from advisors and deans. The remaining MSPH credits will be completed during the summer, fall, winter intersession, spring, and summer semesters immediately following graduation from the BSPH program.

(W) = Course is designated as writing-intensive
(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, and SOC 480

§ **MSPH Graduate Program**: BSPH students will complete 12 of 45 graduate-level credits (6 in spring and 6 in fall) for the MPH during their senior year of undergraduate studies. This requires special permission from advisors and deans. The remaining MPH credits will be completed during the summer, fall, winter intersession, spring, and summer semesters immediately following graduation from the BSPH program. In this Study Plan sample, **Year One** refers only to the the summer immediately following completion of your undergraduate degree; **Year Two** begins with the fall semester of full-time graduate courses.

### BSPH - Public Health

Students enrolled in the public health major must complete the coursework listed under curriculum requirements to earn the BSPH degree through the School of Nursing and Health Studies (SONHS). Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

* The public health major may be used to fulfill this cognate area.

** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.

**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.

---

**This is only a sample.** There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) **recommends students create their own plan of study** that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 101
- **Modern Language placement:** SPA 101
- **Major(s):** Public Health
- **Minor(s):** None
- **Cognates**

(W) = Course is designated as writing-intensive

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

**Mission**

The Mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in the art and science of nursing and health studies through creating and disseminating health knowledge and developing culturally competent leaders to provide safe service to our community, the nation and the world. The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Public Health. Baccalaureate education provides the foundation for further education in Public Health and/or other specialized health professional fields.

**Goals**

**Student Learning Outcomes**

- Students will be able to interpret quantitative and qualitative research findings in the medical, nursing, public health and social science literature.
- Students will demonstrate awareness of local health problems, determinants, and interventions in South Florida.
- Students will effectively communicate information related to public health.

**Health Communication Minor**

The School of Communication (SoC) in collaboration with the School of Nursing and Health Studies (SONHS) offers a minor in health communication, which is available to all students. Students must have a minimum of a 2.0 UM GPA to declare the minor and they must earn a C or higher in each course for the minor for it to count; a grade of C- or lower is not acceptable for the health communication minor. Students should meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to discuss any questions related to their degree requirements.

Public Health Minor

The School of Nursing and Health Studies (SONHS) offers a minor in public health, which is available to all students. The public health minor consists of two required courses and two electives as outlined below. Students must earn a grade of C- or higher in each course and an overall GPA of 2.0 to complete the public health minor. Any questions related to the public health minor requirements should be directed to an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/).

GRADUATE ACADEMIC PROGRAMS

Mission

The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.

Architecture

http://www.arc.miami.edu

Introduction

The School of Architecture at the University of Miami offers:

- Master of Architecture I (3 year track)
- Master of Architecture I AP (Advanced Standing 2 year track)
- Master of Science in Architecture (Design and Research track)
- Master of Construction Management
- Executive Master of Construction Management
- Master of Real Estate Development + Urbanism
- Master of Urban Design
- Master of Professional Science in Urban Sustainability and Resilience with a track in Resilience (interdisciplinary program offered in collaboration with the College of Arts & Sciences, www.urb.miami.edu (https://urb.miami.edu))
- Master of Data Science with a track in Smart Cities (interdisciplinary program offered in collaboration with the College of Arts & Sciences, www.msdatasciences.miami.edu) (https://www.msdatascience.miami.edu)
- Dual Master Degrees
- Certificates

The School of Architecture’s location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation’s fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Accreditation

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Miami School of Architecture offers the following NAAB-accredited degree programs:

Bachelor of Architecture (171 undergraduate credits)
Master of Architecture I (105 graduate credits)
Master of Architecture I AP (60 graduate credits)
Admission Requirements

Applications are generally considered for entrance in the Fall semester only. Courses in all Master program's are sequenced to deliver a cohesive educational experience and students are expected to follow the established course sequences for their program. Students entering the program in Spring or Summer are not eligible to enter the course sequence at that time, but may take electives or other required courses. This will necessarily extend the duration of the program.

Applications start on November 1 until June 1 for entry in Fall and start on October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin. It is the responsibility of each student to understand these requirements and to ensure that they are met.

Please refer to our latest admission and portfolio requirements here (https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/) and see additional information for international students. (https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/international-admissions/)

- Photo Lab (https://www.arc.miami.edu/resources/labs-and-centers/photo-lab/)

Dual Degrees

- Bachelor of Science in Architectural Engineering (B.S.A.E)/Master of Architecture I (M.Arch)
- Master of Architecture (M.Arch I and I AP) and Master of Real Estate Development + Urbanism: 105 credits + 21 credits
- Master of Architecture (M.Arch I and I AP) and Master of Urban Design: 60 credits + 21 credits
- Master of Urban Design (M.U.D)/Master of Real Estate Development + Urbanism (MRED+U): 30 cr + 30 cr (min. 60 credits)

Certificates

Graduate students increasingly look to areas of concentration that can provide skill and knowledge bases for professional applications. Historic Preservation, Design for Health and Wellbeing, Sustainable and Resilient Design, Design for Health and Well-Being, Construction Management, Urban Design, and Real Estate Development prove to be rapidly growing areas of professional specialization as they engage critical areas of investigation in contemporary architecture. The graduate certificate programs address both the intellectual and academic needs of the School of Architecture, and the desire of the School to use its current curriculum as a platform to engage these specialized areas further.

Master of Architecture

The Master of Architecture program promotes a creative, open and supportive environment emphasizing advanced and personalized instruction through small class and studio courses. The School's resources are enhanced by the interdisciplinary opportunities offered by the other schools and colleges at the University of Miami. Located in the southeastern U.S. in close proximity to the Caribbean and Latin America, the School also participates in an international network to enable students and faculty to develop an understanding of architecture and culture in an increasingly globalized world. In addition, the School of architecture Rome Program offers graduate students an intensive experience in design, theory, and history of architecture with U-SoA faculty at the Schools private Rome studios.

U-SoA faculty are joined each year by internationally recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of studios and in the exploration of diverse areas of professional concentration. Students immerse in contemporary challenges to address a variety of social, cultural, technological and programmatic contexts. Students are encouraged to get involved in various research projects located within the School's various labs, and to pursue a certificate in an area of professional concentration.

The Master of Architecture (M.Arch) program consists of the following two tracks:
**Master of Architecture I (3 year track)**
A 3 year program for students with non-pre-professional degrees (students who have an undergraduate degree in a discipline other than architecture (completion of 105 credits is required).

**Master of Architecture I AP (Advanced Standing 2 year track)**
A 2 year program for students with pre-professional degrees in architecture such as Bachelor of Architectural Studies, Bachelor of Arts, Bachelor of Design, Bachelor of Environmental Design, Bachelor of Fine Arts, Bachelor of Science (completion of 60 credits is required).

**Master of Construction Management/Executive Master of Construction Management**
Gain the technical knowledge and managerial skills you need to set yourself apart in the construction industry. The Master of Construction Management (M.C.M.) is an one year (three semesters), 36 credit program. It is designed to broaden your educational and career options to solve challenges in the industry and become future leaders of design and construction related organizations worldwide. The Executive Master of Construction Management (E.M.C.M.) is a 30 credit program designed for accomplished professionals in the design and construction industry who are ready to take their career to the next level.

**Master of Science in Architecture**
The Master of Science in Architecture (M.Sc.Arch.) is a one year, three semester program (completion of 36 credits is required). The program offers a critical and professional environment to investigate design strategies and design challenges in relation to the most pressing issues of the 21st century: resilient design, tropical and subtropical architectures, identity in a globalized world, health care design, housing design, conservation of the built environment and the effect of embedded technologies on design. The Master of Science in Architecture program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

The School of Architecture offers two tracks:
- Architectural Design
- Architectural Studies

**Master of Urban Design**
The Master in Urban Design, is a three (optional four) semester program that provides students with a design experience investigating the guiding principles for building regions, cities and communities. Guided by the imperatives of sustainability and resilience, the program conceptualizes cities as an extension of the ecological transect across the natural to human habitat, providing students with a range of experiences from rural to urban.

**Master in Real Estate Development and Urbanism**
The Master of Real Estate Development + Urbanism is an immersive one-year interdisciplinary graduate program that combines coursework in real estate development, finance, market analysis, construction, architecture, urban design, law and entrepreneurship. The program draws on the strengths of the University of Miami’s Schools of Architecture, Business, Engineering, and Law to create a world-class program that blends the fundamentals of real estate development with livable community design. Students are immersed in one of the world’s most dynamic real estate markets through a rigorous curriculum enriched by a wide range of study tours, speaker series, the annual Real Estate Impact Conference, research initiatives and networking events. The prestigious MRED+U Advisory Board connects students with over 50 industry leaders who are directly engaged in the program as lecturers, mentors and advisors, providing internship and employment opportunities and access to dozens of cutting-edge projects from every real estate sector.

**Awards and Scholarships**
All students admitted full time may be eligible for partial tuition based scholarship support. The School of Architecture provides merit-based tuition scholarships to graduate students. Applicants to the Graduate Programs will be considered each semester for a limited number of merit-based assistantships within the School. Assistantships are an honors award available to a limited number of students.

American Institute of Architects Henry Adams Medal is awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture. American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.

Other honors, distinctions, and awards are presented annually for excellent student performance.
- Master of Architecture I (https://grad.arc.miami.edu/)(M.ARCH 3 year track)
- Master of Architecture I AP (https://grad.arc.miami.edu/)(M.ARCH with Advanced Standing 2 year track)
- Master of Science in Architecture - Architectural Design or Architectural Studies (M.Sc.Arch.) (https://grad.arc.miami.edu/)
- Master of Construction Management (M.C.M.) (https://mcm.arc.miami.edu/)
- Executive Master of Construction Management (E.M.C.M.) (https://mcm.arc.miami.edu/)
- Master of Real Estate Development + Urbanism (M.R.E.D.+U) (https://mredu.arc.miami.edu/)
- Master of Urban Design (M.U.D.) (https://www.arc.miami.edu/academics/graduate/master-of-urban-design/)
• Master of Professional Science in Urban Sustainability and Resilience (https://urb.miami.edu) with a track in Resilience (interdisciplinary program offered in collaboration with the College of Arts & Sciences, www.urb.miami.edu (https://urb.miami.edu/))
• Master of Data Science (https://www.msdatascience.miami.edu) with a track in Smart Cities (interdisciplinary program offered in collaboration with the College of Arts & Sciences, www.msdatasciences.miami.edu) (https://www.msdatascience.miami.edu/)

Certificates
Graduate students increasingly look to areas of concentration that can provide skill and knowledge bases for professional applications. Historic Preservation, Design for Health and Wellbeing, Sustainable and Resilient Design, Design for Health and Well-Being, Construction Management, Urban Design, and Real Estate Development prove to be rapidly growing areas of professional specialization as they engage critical areas of investigation in contemporary architecture. The graduate certificate programs address both the intellectual and academic needs of the School of Architecture, and the desire of the School to use its current curriculum as a platform to engage these specialized areas further.

• Historic Preservation Certificate (p. 1603)
• Classical Architecture Certificate (p. 1598)
• Sustainable and Resilient Design Certificate (p. 1607)
• Construction Management Certificate (p. 1599)
• Urban Design Certificate (p. 1609)
• Real Estate Development and Urbanism Certificate (p. 1605)
• Hospitality Design Certificate (p. 1603)
• Design for Health and Well-Being Certificate (p. 1601)

Certificates require 15 credits of one certificate related studio (6 cr) and related architecture electives (9 cr).

ARC 601. Urban Design Studio I. 6 Credit Hours.
Introduction to urban design principles and techniques, in the master planning of a new community. Emphasis on the sustainability of human settlements within the context of degradation of natural systems and resource depletion; regional environmental and infrastructure systems; transportation and traffic; transit-oriented development; land use, building, and thoroughfare types.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 602. Urban Design Studio II. 6 Credit Hours.
Design projects focusing on contemporary challenges and goals for existing settlements, including urban and suburban disinvestment and deterioration, urban redevelopment, social equity, resilience and adaptation to climate change, design for healthy communities and active living, and urban agriculture.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 603. Urban Design Studio III. 6 Credit Hours.
Urban design projects that deploy full range of techniques for regional control of urban growth. Application of advanced technologies, including smart cities, innovations in transportation and traffic engineering, energy generation and conservation, and emissions reduction.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 604. Architecture Design and Theory I. 6 Credit Hours.
The inaugural design studio focuses on the role of architectural design as an integrative discipline. Using Miami as a laboratory and drawing from natural specimens, the studio will examine the relationship between nature, landscape and the built environment. It will use research and analysis, design thinking skills, ordering systems, site design, materials, methods, structure, light, space, and tectonics as a means of developing a meaningful design process. Components: STU.
Components: STU.
Grading: GRD.
Typically Offered: Fall.
ARC 605. Architecture Design and Theory II. 6 Credit Hours.
This introductory design studio focuses on the role of architectural design as a responsive discipline. The studio will look at how architectural form is informed by thoughtful consideration of materials and methods of construction, as well as programming and context. Situated in an urban environment rich in material, stylistic and typological history, the studio will challenge students to develop a careful reading of place while responding to urban context, topography, and other site requirements. By considering issues of precedent, composition, display, and identity, it will examine the production of meaning in architecture.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 606. Architectural Design and Theory III. 6 Credit Hours.
The Rome Design Studio operates as a form of design-based critical inquiry into issues of urban design, architecture, and the adaptive reuse and transformation of buildings and spaces. Drawing will be explored as a means of analysis, in order to observe and record the urban and architectural conditions of Rome. Students will discover the layers of Rome, combining archaeology with architecture and urban history. Coursework emphasizes a critical reassessment of the historic urban sites relative to questions of program, infrastructure, and cultural changes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 607. Architecture Design and Theory IV. 6 Credit Hours.
Advanced Design Studio based course addressing more complex and ambitious topics related with the built environment, the ability to prepare and solve a program through design, materials, technique, technology, social human centered aspects of architecture, structure, architecture as light and space, site and context and environmental issues.
Components: STU.
Grading: GRD.
Typically Offered: Fall.

ARC 608. Architecture Design. 3-6 Credit Hours.
Advanced Design Studio focusing on skills associated with making integrated architectural design decisions across multiple systems. Design decisions within a complex architectural project will focus on the consideration and broad integration of environmental stewardship, technical documentation, accessibility, site conditions, life safety, environmental systems, structural systems, and building envelope systems and assemblies.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 609. Architecture Design. 3-6 Credit Hours.
Specialization component: student and faculty select areas of in-depth study in housing, resiliency, healthcare, urban design, housing and hospitality, historic preservation etc.
Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 610. Architecture Design Degree Project. 6 Credit Hours.
The Architecture Design Degree Project studio offers two options: 1) an independent design research project (design thesis) on a topic selected and developed by the student, or 2) a graduate research studio. Design Thesis is an opportunity for each student, working with a faculty advisor, to define an individual position with regard to the discipline of Architecture. The graduate research studio, led by a faculty member, will investigate relevant or thematic issues of architecture. All graduating students will be required to present their Degree Project, comprising research, analysis and creative work, as a book.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 611. Visual Representation. 3 Credit Hours.
Issues covered in the course will deal with the illustration of ideas in architectural manner. Students are to use the skill of drawing and model-making, either by hand or on the computer, as their new language. Topics will include how to read, understand, and create design drawings, to draw from observations and analyze their subject matter, to be able to distinguish the relevance of a particular drawing and to structure how they present their information. Students will be instructed to properly craft their work in and outside of studio in an effort to see their work evolve and improve.
Components: STU.
Grading: GRD.
Typically Offered: Fall.
ARC 612. Advanced Visual Analysis. 3 Credit Hours.
Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 613. Advanced Visual Representation. 3 Credit Hours.
Students will learn to carefully evaluate space, color, depth, hierarchy, balance and scale in all architectural visual representation. The assignments will explore different media as it is used in the profession including but not limited to: diagrams, renderings, plans, elevations, sections, and axonometric. Through lectures and workshops, the course will provide a combination of both theoretical and practical lessons encompassing the fundamentals of architectural visual representation. The course will also include parallel lectures on typography, architectural graphic design, and verbal presentation. The lectures will be given by highly regarded industry professionals who will address the way that students can be aware of and understand typography, verbal presentation, and graphic design fundamentals as it relates to architecture. The class will consist of three parts. Part I introduces students to the fundamentals of 3d modeling and drafting as part of a representation workflow. The exercise will include both urban and building scales. Part II concentrates on understanding and dissecting more complex geometries through advance use of digital parametric software such as Grasshopper. Part III focuses on visual representation based on a studio project with emphasis on graphic techniques for final presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 614. Michelangelo. 3 Credit Hours.
Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 615. Advanced Visualization Techniques. 3 Credit Hours.
Beginning at the urban scale, students will engage with the concept of mapping and the graphical representation of an urban environment. This will be done through site analysis and investigation of existing conditions for the neighborhood of Miami Beach, FL. After the urban analysis, students will transition into the building scale and analyze a "Lifeguard House" in Miami Beach. Students will be asked to rethink and redesign the lifeguard house using Rhino 3D. Each student will produce drawings including elevations, plans, sections, and exploded axonometric of their new design. Lastly, students will create a physical model using the laser cutter.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 616. Architectural Watercolor Renderings. 3 Credit Hours.
This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 617. Construction Documents. 3 Credit Hours.
Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 618. Documentation of Historic Architecture. 3 Credit Hours.
Principles of preservation and restoration, research methods, measured drawings, surveying methods, and case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 619. Architecture and Color. 3 Credit Hours.
This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Alber, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
ARC 620. Responsible Architecture. 3 Credit Hours.
A responsible architecture is one that takes into consideration aesthetics, ecology, sustainability, history, context (urban or otherwise), as well as the health, welfare, and joy of the people who occupy it. This course will address architecture from a distinctly humanist viewpoint, keeping in mind how man is inextricably connected to his environment, both architectural and natural. To focus on sustainability, typology, urbanism, or aesthetics alone would be to negate architecture’s interconnectedness. The creation of a responsible architecture requires this multi-layered approach.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 621. Housing, Infrastructure and Transportation. 3 Credit Hours.
Case studies in sustainable urban design. Survey and assessment of innovations in community design and building. Examples from the late nineteenth century to contemporary practice illuminate environmental, social, and economic goals and impacts in urban design.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 622. Urban Design History and Theory. 3 Credit Hours.
Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 623. Urban Design Competition. 1-3 Credit Hours.
Intensive, collaborative urban design project, combining master planning and real estate development expertise, to be submitted to international peer reviewed competition. Project teams are comprised of students from several different degree programs, such as architecture, urban design, real estate development, business, and law.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 624. Select Topics in Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 625. Landscape Arch Design I. 3 Credit Hours.
Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares, and response to urban and architectural context.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 626. Landscape Arch Design II. 3 Credit Hours.
Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 627. Architecture Photography. 3 Credit Hours.
Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 628. Historic Preservation. 3 Credit Hours.
Basic design principles for the rehabilitation of historic buildings and districts. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior’s Standards for rehabilitation.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 629. Research in Design-Methods and Procedures. 3 Credit Hours.
Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 630. Building Technology I: Materials and Methods. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 631. Building Technology II: Structural Systems. 3 Credit Hours.
Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 632. Building Structures I. 3 Credit Hours.
The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 633. Building Structures II. 3 Credit Hours.
The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

ARC 634. The Palazzo in Italian Architecture. 3 Credit Hours.
Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 635. Historic Italian Urbanism. 3 Credit Hours.
Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 636. Italian Gardens. 3 Credit Hours.
Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 637. Research in Rome. 3 Credit Hours.
An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 638. Interior Architecture Design. 3 Credit Hours.
Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.
Components: LEC.
Grading: GRD.
ARC 639. Adaptation to Climate Change. 3 Credit Hours.
Introduction to the phenomena and related discussion on the topic of climate change. Review of current scientific evidence, tactics for mitigation of emissions and other causal actions, followed by study of the adaptation required by changing conditions. Class assignments include creative proposals for adaptation action.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 640. Tropical Architecture. 3 Credit Hours.
A discussion of tropical architecture and the theme of tropicalism. Research, analysis and documentation in drawing of selected case studies

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 641. Seminar on Town Design. 3 Credit Hours.
Introduction to the lexicon of urbanism; analytical presentations of the concepts of region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 642. Seminar on Housing. 3 Credit Hours.
Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 643. Seminar on Retrofit of Suburbia. 3 Credit Hours.
Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 644. The Architecture of Palladio. 3 Credit Hours.
On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 645. Urban Composition. 3 Credit Hours.
Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 646. Studies of Havana. 3 Credit Hours.
Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 647. Architecture and Urban Identity. 3 Credit Hours.
Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ARC 648. Seminar in Community Development. 3 Credit Hours.
Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 649. Construction and Project Management. 3 Credit Hours.
Management of construction projects including legal considerations and techniques of management science applied to construction. Includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, flow charts, tracking progress, construction contracts, indemnity agreements, and network planning techniques including CPM and PERT.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 650. Professional Lecture Series. 3 Credit Hours.
Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 651. Contemporary Theories of Architecture. 3 Credit Hours.
Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 652. Management of Professional Practice. 3 Credit Hours.
Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships, disputes and risk management.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 653. Structural Design Theory. 3 Credit Hours.
Relationship of structural systems to architectural design. Case studies in the ories of structure, form and construction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 654. Architecture of South Florida. 3 Credit Hours.
History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ARC 655. 18th and 19th Century American Architecture and Architects. 3 Credit Hours.
The course concentrates on the development of early American architecture, Architects and Urbanism primarily but not exclusively to 17th, 18th and 19th centuries with particular emphasis on theoretical, technological and cultural developments in America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 657. Design and Fabrication Techniques. 3-6 Credit Hours.
Design, construction and detailing of wood and other materials as applied to furnishings and interiors. Workshop includes research, exercises, documentation and a final project.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 658. Theories of Landscape Architecture. 3 Credit Hours.
Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design, including concerns such as urban heat island effect, climate change resilience, and health impacts of landscape.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 659. Sustainability and LEED Exam Prep. 1-3 Credit Hours.
Study of U.S. Green Building Council standards for environmental efficacy in building and neighborhood design. Emphasis on fundamental knowledge of green building concepts, including transportation, energy, water and air quality. Includes preparation for LEED Accreditation Exam and registration for exam that provides the credential signifying expertise in green building and a LEED rating.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 660. Contemporary Latin American Architecture. 3 Credit Hours.
An examination of Contemporary Latin American Architecture and Urbanism from the turn of the 20th Century to the present day. The work of some of the great figures on Latin American Modernism such as Niemeyer and Barragan, to contemporary figures such as Paulo Mendes da Rocha and Isay Weinfeld will be discussed. The influence of the Modern Movement in Europe and Le Corbusier will be reviewed. Large scale City Plans such as Lucio Costa's Plan for Brasilia and Roberto Burle-Marx's designs for Flamengo Park and Copacabana in Rio de Janeiro will be analyzed.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 661. Building Technology I: Materials and Methods.. 3 Credit Hours.
Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction tech- niques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 662. Environmental Building Systems I. 3 Credit Hours.
Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 663. Environmental Building Systems II. 3 Credit Hours.
Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 665. Computer Modeling. 3 Credit Hours.
Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 667. History of Architecture I. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 668. History of Architecture II. 3 Credit Hours.
Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 669. Directed Readings. 3 Credit Hours.
A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 670. Modern Architecture. 3 Credit Hours.
History of architecture, landscape, and city design in the modern era.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 671. Ancient Architecture. 3 Credit Hours.
History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 672. Selected Topics in World Architecture. 3 Credit Hours.
History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 673. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.
History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 674. Renaissance Architecture. 3 Credit Hours.
History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 675. Colonial Architecture. 3 Credit Hours.
History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 676. 19th and 20th Century Architecture. 3 Credit Hours.
History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 677. The Architecture of Alvar Aalto. 3 Credit Hours.
An examination of the architecture of Alvar Aalto through the analysis of selected buildings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 678. Italian Rationalist Architecture. 3 Credit Hours.
History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
**ARC 679. An Introduction to Resilient Building and Community Design. 3 Credit Hours.**
This course introduces students to the relationships between climate, resiliency, architecture and urbanism; building awareness of the growing challenges and opportunities ahead, and the intersections between these disciplines. What does resilience mean in this broader context, and how should escalating stressors and shocks be addressed? Students learn about climate sciences, then research, document, and analyze evolving resilient design strategies, at the scale of buildings, neighborhoods and cities, in the end, applying those lessons to a given case study site; developing a holistic set of resilient design recommendations. During the course, students interact with specialists in the fields of architecture and urban design, as well as related fields, such as engineering, social, marine and environmental sciences, and/or policymakers, to better comprehend first-hand the interwoven scientific, social, environmental, and governmental ramifications to resilient design. Lastly, students learn the mechanics of participatory design methods employed to engage communities in related efforts.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**ARC 680. Professional Advancement, Internship + Research (PAIR). 3 Credit Hours.**
Research Component of PAIR program. Student, host office and faculty collaboratively develop a focused, in-depth research project related to the tasks the student is completing as part of the Internship Component of the PAIR program. Application and PAIR committee acceptance required prior to enrollment.

Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 681. Special Problems. 1-3 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: STU.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 682. Special Problems. 3-6 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 683. Special Problems. 3 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 684. Special Problems. 3 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 685. Special Problems. 3 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 686. Special Problems. 3 Credit Hours.**
Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

**ARC 690. History of Cities. 3 Credit Hours.**
Historical overview of the origin and development of cities around the world. Emphasis on intentional form of settlements (the ideal) as well as response to economic and political imperatives such as trade and defense (the real).

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ARC 691. Housing and the Contemporary City. 3 Credit Hours.
Housing is a relatively new field and discipline, born of the complex interplay of urban development, building traditions, architectural innovation and basic human needs. The role of housing in building the city, and the role of the city in determining the shape and content of housing, will be the point of departure for this survey and seminar. The student is expected to gain an understanding of how building typology, history, urban traditions, site design, the functional issues of lifestyle and culture affect the critical issue of housing design. Simultaneously, an awareness of the role of housing design in the creation and articulation of urban space will be studied.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ARC 692. Cinema and Architecture. 3 Credit Hours.
The class studies the relationship between architecture and cinema. Lectures, film screenings, and readings, explore the origin and development of filmic space with an emphasis on its relation to the real and poetic image of the city. The class analyzes selected films as they relate to, comment, criticize, and anticipate the development of contemporary concepts of space, urban space, interior space, etc.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ARC 693. Computer Animation. 3 Credit Hours.
Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 694. Geographic Information Systems in Urban Design. 0-3 Credit Hours.
Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 695. Interactive Multimedia in Design. 3 Credit Hours.
Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 696. Advanced Topics. 3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ARC 697. Designing for the Internet of Things. 3 Credit Hours.
This course examines how current research and development in embedded computation bears on architecture, landscape, and urbanism. Students will explore the implications and impact of ubiquitous computing in its potential to change the way we conceive, construct, inhabit and interact with our buildings, landscapes, and cities.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ARC 698. Introduction to Programming for Architects. 3 Credit Hours.
As digital tools continue to play an increasing role in the Architect's toolkit, it is becoming increasingly important that Architects not only understand how to use and navigate these tools but to customize and adapt them to their specific needs. Learning how to program allows Architects to start to fully utilize the potential in digital tools by maximizing the possibilities in not only 3D modeling and digital fabrication but in responsive architecture, embedded computation and animating spaces contributing to a more dynamic and potentially inter-connected built environment.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ARC 699. Directed Research. 1-6 Credit Hours.
The course addresses the issues of design as research and pre-design. Students will develop research, write a thesis statement, select a site, prepare a site documentation and site analysis, and develop an architectural program for the thesis project, select pertinent case studies and diagram them. This work will be collected and presented as both a presentation and in book form. In addition, the course prepares students for an independent design project through thoughtful development of a thesis question, site and program. The preparation of the thesis question will require the development of basic research strategies and methods, and understanding of how to find an evaluate sources, the analysis and synthesis of information, the development of a research plan and a design method, and the written and oral presentation of these skills to an outside audience.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 701. Masters Final Project. 6 Credit Hours.
Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 720. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ARC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CMA 601. Fundamentals of Construction Management. 3 Credit Hours.
Fundamentals of Construction Management is an introductory-level, graduate course. This course is designed to provide students with introductory knowledge and basic skills they will need to understand and apply as they progress through the program. Students receive an overview of key topics that will be covered in greater detail through core courses and electives during subsequent terms. Each class session provides a primer on a specific area of vital importance, including scheduling, cost estimating and Project Management. Upon completion students will be familiar with basic concepts, terminology, and procedures associated with the industry, and well prepared to study these subjects in greater depth.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CMA 603. Critical Thinking and Communications in Design and Construction. 1 Credit Hour.
Critical thinking is the driver of effective communication. In general, critical thinking is the ability to deal with the contradictions and problems in a tumultuous environment in a reasoned, purposeful and productive way. Decisions are made using an approach that is fair, objective, accurate and based on information that is relevant to the situation. The pursuit of critical thinking equips leaders and managers think rationally, provide sound reasoning and develop a coherent argument. In this Course, students identify and use critical thinking skills, processes and techniques to effectively communicate their ideas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CMA 610. Financial Management and Accounting for Construction. 2 Credit Hours.
Students in this course study the management of construction company and construction project finances. They learn the fundamentals of construction accounting and depreciation, prepare financial statements for a construction company, analyze company's financial health, conduct cost and profit center analysis, prepare and forecast cash flows, and use the technique of time value of money for economic decision making.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CMA 620. Construction Project Controls. 2 Credit Hours.
Project Planning, Scheduling & Control is the process of coordinating numerous and often complex elements to erect a structure and satisfy the needs of a sophisticated owner. Study of methods for coordinating people, equipment, materials, money, and schedule to complete a project on time and within approved cost. Each phase of the work must be monitored and measured. You cannot control if you cannot measure and you cannot measure if you cannot count. It then becomes the goal of project controls to quantify and govern costs and the goal of the scheduling process to quantify and visualize the progress of the job and make the necessary changes to deliver a successful job.
Prerequisite: CMA 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CMA 630. Contract Documents. 2 Credit Hours.
Students in this class will gain a basic knowledge of construction contract documents including agreements, contracts, drawings and specifications, requests for information, change orders, and other documents that make up the body of Contract Documents associated with a given project. The course focuses on understanding the relationship between, contract documents and the construction process, as influenced by Project Delivery Methods We will explore contractual relationships, legal roles and responsibilities, and contract types.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CMA 632. Construction Risk Analysis and Control. 2 Credit Hours.
Construction Risk Management is an advanced-level, graduate course designed especially for disciplines involved in creating the built environment (e.g., architecture, urban planning, infrastructure-related engineering disciplines). The focus will be on identifying and managing risks at the project. A variety of risk analysis concepts, tools and methodologies will be utilized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 636. Legal Issues in Building Construction. 2 Credit Hours.
This course examines problems that can arise during the course of construction due to different interpretations by various project team members of contract document provisions and communications. These problems can significantly affect the risk, schedule and cost of a project. Students will be encouraged to work in small groups to identify, and to recommend specific actions to avoid and to minimize adverse impacts of, ambiguous contract provisions and project communications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 640. Virtual Design and Construction (VDC/BIM). 3 Credit Hours.
The building industry is rapidly adopting Virtual Design and Construction (VDC) and Building Information Models (BIM) throughout the project process; design, construction, and facilities management. VDC and BIM are increasingly becoming an umbrella term for a variety of software tools, design methods, and construction processes that allow for more automation, communication and integration between project participants. This course reflects on emerging technologies in the context of Project Management and Integrated Delivery, and includes modeling, visualization, 3D clash detection, digital site layout, 4D modeling, as-built model generation, and digital information management. This course will first introduce basic VDC and BIM concepts and review industry examples of how these concepts play out on design and construction projects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 642. Emerging Technologies in Design and Construction. 2 Credit Hours.
Technologies emerge in part to address the needs of society, improve sustainability and resiliency, and increase productivity and thus profit margins. There is an undeniable need for efficiency in managing the construction process, and emerging technologies offers perhaps the best opportunities to improve the construction process through better integration and efficiency. This course surveys cutting edge technologies in the construction industry and their applications in the design and construction process.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 644. Sustainable Development. 2 Credit Hours.
This course provides the students with an understanding of the environmental and resource implications of construction activity within the context of sustainable development. It considers the theoretical and methodological basis of approaches designed to quantify the impacts associated with choices made at different stages of the construction life cycle, as well as tools designed to evaluate relative environmental and sustainability performance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CMA 654. Introduction to Health and Safety. 1 Credit Hour.
Introduces occupational safety hazards associated with the construction industry. Emphasis placed on recognition, evaluation and control of safety hazards particularly as they relate to the Occupational Safety and Health Act.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

CMA 670. Construction Site Practicum (Materials and Methods Health and Safety). 2 Credit Hours.
This course allows students to participate in a supervised work program where they apply MCM coursework knowledge in a practical setting. Students will complete 2 rotations per term. Each rotation will be at a different job site and with a different corporate sponsor. Work is supervised by a SoA faculty member and a corporate sponsor. Students develop conceptual and professional skills related to their practice at a construction site, a minimum of 20 hours per week (140 hours per 7-week rotation). Students will also meet with their faculty supervisor 1 hour per week during the term to review progress. Satisfactory performance at the field placement and during on-campus class meetings must be demonstrated before students can proceed to the Professional Internship (CMA 674).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 671. Construction Management Practicum (Project Management). 2 Credit Hours.
This course allows students to participate in a supervised work program where they apply MCM coursework knowledge in a practical setting. Students will complete 2 rotations per term. Each rotation will be at a different job site and with a different corporate sponsor. Work is supervised by a SoA faculty member and a corporate sponsor. Students develop conceptual and professional skills related to their practice at a construction office a minimum of 20 hours per week (140 hours per 7-week rotation). Students will also meet with their faculty supervisor 1 hour per week during the term to review progress. Satisfactory performance at the field placement and during on-campus class meetings must be demonstrated before students can proceed to the Professional Internship (CMA 673).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 674. Capstone Project. 3 Credit Hours.
The Construction Management Capstone Project course introduces the methods and tools necessary to analyze a set of plans and specifications for an active Miami building project (or projects) and includes a comprehensive review and analysis of documentation requirements for the selected project(s). Students are paired with appropriate industry managers and work in small teams, utilizing knowledge acquired from their core courses to develop and draft a comprehensive, professional level project manual. Review of contract plans and documents as well as site visits and interaction with actual project team members are required. To be taken during the final term of study.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CMA 676. Interdisciplinary Design Studio/ Integrated Project Delivery. 3 Credit Hours.
Integrated Project Delivery is an alternative to the traditional design-bid-build approach. It is based on enhanced collaboration among design professionals, clients and the building team. These methods can reduce risk and improve the efficiency of the design and construction delivery process. Integrated practice and integrated project delivery are a response to pressures from building owners for a more efficient and predictable process for designing and constructing buildings, and to the increasing availability of advanced digital technologies such as Building Information Modeling. This is an active learning course. Students enrolled in this course will participate in the integrated Design Studio assuming the role of the Construction consultant providing guidance in the design process including; defining goals and standards, Project Costs, Project Schedule, Project Quality, Sustainability, and Performance. Prerequisite: CMA 640
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CMA 680. Directed Studies. 1-4 Credit Hours.
This course is designed to provide further study through directed readings, directed research projects or seminars, or special class work related to research in a specific subject related to the construction industry not realizable through an existing course. Students must, in consultation with a faculty member, develop a detailed project proposal indicating the rationale, readings, scope, objectives, and methods prior to beginning the course. Each Directed Studies course is usually initiated in response to student interest and is limited to five or fewer students.
Components: IND.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CMA 681. Special Topics in Construction. 1-3 Credit Hours.
Group or individual investigations of special topics and current issues relevant to the construction industry. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CMA 682. Special Topics in Construction. 1-3 Credit Hours.
Explorations of special topics and current issues relevant to the construction industry. Teaching and learning methods vary depending on the subject matter.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 684. Special Problems. 1-6 Credit Hours.
Explorations of special problems and current topics relevant to the construction industry. Teaching and learning methods vary depending on the subject matter.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 690. Advanced Productivity and Lean Construction. 2 Credit Hours.
The course aims to provide an understanding of the modern concepts and methods in productivity and production system to improve construction practice with lean construction, as well as other tools and techniques for designing and implementing lean construction on projects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

CMA 691. Quality Management and Performance. 1 Credit Hour.
Advanced construction management approaches to quality; process and productivity improvement in construction. Students use of case studies, exercises, and/or term projects to show application of management and quantitative concepts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 692. Construction Forensics. 1 Credit Hour.
Construction failure, in its many forms, are both interesting and instructive and in the context of this course, students will study construction failures in their many forms.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CMA 694. Codes, Standards and Regulations. 1 Credit Hour.
This course provides students with an awareness of different codes, standards, and regulations applicable to the construction industry, how to find the codes and what roles they play in design and construction. The course takes the student through the history of codes, standards, and regulations, their promulgation and their future.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CMA 701. Operating and Managing a Construction Organization. 3 Credit Hours.
Successfully managing a construction company is a multifaceted undertaking that requires knowledge of common business practices, accounting principles, regional economic conditions and expertise in the building process. This course leads students through the how-to's of running a successful, large, complex construction company. It analyzes how the industry actually works, including contractual relationships with clients in all types of projects from design/build to privatization. It covers the business fundamentals of running a construction company, including issues such as surety and insurance: various types of construction organizations, domestic and international; and company culture - inner-workings of a business that can mean the differences between success and failure.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CMA 702. Professional Leadership Seminar. 1 Credit Hour.
This course will explore in a seminar format leaders and leadership situations. Industry leaders will share years of experience and tell their stories. It is an eclectic group who face diverse challenges. The key elements of leadership will be discussed and a framework for thinking about leadership created to provide focus for discussions. The goal will be to enhance students' understanding of and openness to growth as leaders. It is not to teach students to lead. It is to help them think more insightfully about the subject and gain an understanding of what they can do to become more effective.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.
CMA 708. Preconstruction Services. 2 Credit Hours.
Pre-construction services grew out of construction cost estimating to encompass the other activities in planning a project with the intent to help deliver a satisfactory project that meets the owner’s objectives. The preconstruction team participates in design decisions, evaluations, studies, value engineering, value analysis, scheduling, constructability reviews, and more. The course covers the analysis of pre-construction services including, feasibility studies, conceptual estimating, scope definition, cost estimating & GMP, constructability & design review, value engineering, and bid review & comparison.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 710. Construction Finance, Planning and Analysis. 2 Credit Hours.
This course is designed for industry professionals to enhance their skills in managing the finances of a construction organization and create a sustainable corporate enterprise. The emphasis is on accounting and managerial finance principles from the perspective of a company President or General Manager.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 720. Advanced Planning and Scheduling. 2 Credit Hours.
In depth understanding of the theory and techniques associated with planning, analysis and control. This is a practice oriented, construction project-planning, management and control course emphasizing standard quantitative and qualitative techniques. The Planning, Management, and Control skills necessary to function effectively on complex projects share a common requirement for understanding scheduling, cost control, and their inter-relationship for ensuring successful project performance.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CMA 722. Case Studies in Risk Management. 2 Credit Hours.
Through the case studies and discussion, this course focuses on the safety practices mandated by government regulation and required by good business practice. Exposure analysis, risk management, risk transfer and the costs associated with each will be examined.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CMA 724. Human Resource Management. 1 Credit Hour.
This course uses case studies to discuss the variety of issues that contribute directly to organizational and professional development. Included are the strategies used to create working environments geared toward success on the job. Managing an organization’s people is often the most challenging and complex task required of a manager. It is also the responsibility, if executed well, that permits a person to rise to the senior level of management, or prevents a manager from rising to the senior level if done poorly. The objective of the course is to teach the basic principles of strategic human resource management—how an organization acquires, rewards, motivates, uses, and generally manages its people effectively.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CMA 726. Case Studies in Construction Management. 2 Credit Hours.
Case Studies in Construction Management uses case studies to analyze and integrate the various disciplines found in the development of the Built Environment from the perspective of Construction Management.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 730. Managing Legal Issues in Building Construction. 2 Credit Hours.
This course is not intended to make lawyers out of Construction Management students. It is, rather, an effort to introduce those who might become involved in the construction industry to legal issues which are essential elements of construction projects. The course, which will be taught by practitioners and participants in the field, provides an overview of the legal issues which confront the construction executive from proposals and preconstruction services through post occupancy and warranty.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
CMA 734. Prevention and Resolution of Contract Disputes. 2 Credit Hours.
This course covers the variety of contractual relationships in the construction industry and the actions that may result in disputes. Emphasis is given to the steps required for rapid, cost-effective resolution of disputes. Resolution techniques such as negotiating, mediation, arbitration, and litigation are examined, and case studies requiring oral and written presentations are incorporated into the class sessions.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CMA 740. Project Feasibility Analysis and Valuation. 2 Credit Hours.
This course provides students with the essential tools needed to analyze the feasibility of a real estate development project, including the process for determining the asset's valuation based on projected cash flows. For a construction organization, understanding how a client/owner evaluates project opportunities and forecasts asset performance furnishes valuable insight into the critical cost and revenue assumptions that drive a project's expected returns.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

CMA 799. Capstone Research. 2 Credit Hours.
This course will guide students in the development of their research topic. It integrates applied classroom and current industry practice and knowledge through observation and interpretation of realistic CM issues.
Components: RSC.
Grading: GRD.
Typically Offered: Fall.

CMA 801. Executive Capstone Project. 4 Credit Hours.
The executive program concludes with a 4 credit Capstone Project focused on the assessment of problem areas in a selected project or organization and applying knowledge gained to increase efficiency, eliminate errors and increase profitability.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RED 601. Introduction to Real Estate Development and Urbanism. 3 Credit Hours.
Fundamentals of real estate development of urban places, including the many challenges of the development process such as analyzing market sectors and development opportunities, comprehending the development context of regulation, public policy and politics, raising investment capital, assembling land, program formulation, building types, construction management, marketing, and sales.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

RED 610. Financing Urban Real Estate Development. 3 Credit Hours.
Concepts and techniques for analyzing financial decisions in property development and investment including: real estate economics and investment performance measurement, leasing and property income streams, pro forma analysis, basics of equity and debt valuation, income tax and leverage considerations, mortgages, and deal structures. Emphasis financing individual projects.
ARRE_MREDU Academic Program.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

RED 612. Applied Real Estate Finance and Investments: 1. 2 Credit Hours.
This course builds a foundation for further study of real estate investments and development. This course provides for advanced application of theory and techniques for the analysis of horizontal and vertical development. Discounted cash flow models are developed and enhanced to address topics including multiple property types, staggered sellouts, and condominiums. Emphasis is placed on analysis where extreme data poverty or uncertain exist.
Requisite: ARRE_MREDU Program and Prerequisite: RED 610.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
RED 614. Applied Real Estate Finance and Investments: 2. 2 Credit Hours.
This course builds a foundation for further study of real estate investments and development. This course provides for advanced application of theory and techniques at the entity and deal-level. Discounted cash flow models are developed and enhanced to address topics including partnerships and waterfalls, income tax considerations and a greater exploration of a variety of public and private debt instruments. Emphasis is placed on analyzing the performance of a prospective development across the entire capital stack.
Requisite: ARRE_MREDU Program and Prerequisite: RED 608 and RED 610.
Components: LEC.
Grading: LEC.
Typically Offered: Fall & Spring.

RED 618. Technologies and Tools for Commercial Real Estate. 1 Credit Hour.
Students in the Technologies and Tools for Commercial Real Estate will learn basic skills for ARGUS Enterprise, REIS, Co-Star, Real Capital Analytics and/or the latest in Real Estate Technology and Tools. Students will be introduced to concepts of entering leases, budgets, market assumptions or valuation and yield parameters on a repetitive basis. The modules that are covered in the course include Valuation-Cash Flow, Portfolio Level Reporting and Sensitivity. Courses concentrate on practical applications of software and tools through interactive examples and case studies. Participants are exposed to a large cross section of software capabilities, fundamentals and unique nuances. Offered: Spring.
Prerequisite: RED 610.
Components: WKS.
Grading: LEC.
Typically Offered: Spring.

RED 620. Real Estate Law. 3 Credit Hours.
Fundamentals of law and the entitlement process, including contractual aspects of real estate development, finance, management and ethical issues and a real-world overview of the review and approvals process.
Components: LEC.
Grading: LEC.
Typically Offered: Fall.

RED 630. Real Estate Market Analysis. 3 Credit Hours.
Identification of critical market factors that determine development opportunities. Topics include business and construction cycles, regional and urban growth trends, commercial and industrial location theories, and advanced demographic analysis and projection techniques to project and analyze occupancy, rental growth, absorption, and competitive supply.
Components: LEC.
Grading: LEC.
Typically Offered: Fall.

RED 640. Charrette Training. 1 Credit Hour.
Intensive workshop and training in public outreach and participatory planning with emphasis on analysis of political context, appropriate communication technology, collaboration techniques, and design team management. Offered in conjunction with National Charrette Institute.
Components: LEC.
Grading: LEC.
Typically Offered: Fall & Spring.

RED 650. Complex Urban Real Estate Transactions. 3 Credit Hours.
Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.
ARRE_MREDU Academic Program.
Components: LEC.
Grading: LEC.
Typically Offered: Spring.

RED 660. Urban Infill, Preservation, and Mixed Use Development. 3 Credit Hours.
Builds students’ competencies for infill and redevelopment practice focusing on: mixed-use development, transit oriented development, barriers and solutions for urban infill development, urban site analysis, repositioning of urban land, vacant and underutilized properties, long-term land leases, tax incentives, historic preservation, public-private partnerships, business improvement districts, tax increment financing, community (re)development districts, parking strategies, and urban housing types.
Components: LEC.
Grading: LEC.
Typically Offered: Spring.
RED 670. Construction and Project Management. 3 Credit Hours.
Management of construction projects including legal considerations and techniques of management science applied to construction. Includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, flow charts, tracking progress, construction contracts, indemnity agreements, and network planning techniques including CPM and PERT.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RED 680. Entrepreneurship in Real Estate Development. 3 Credit Hours.
Focuses on management and business practices for building new urban real estate firms capable of leading the industry and assuming competitive advantages over conventional models.
ARRE_MREDU Academic Program.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RED 690. Case Studies in Real Estate Development. 3 Credit Hours.
Students integrate and apply their learning and skills to complex problem-solving involving a series of intensive real world cases of urban real estate development. Focuses on project feasibility and helps hone the required set of development skills.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

RED 699. Capstone: Real Estate Development and Urbanism Charrette. 1-3 Credit Hours.
An intensive real estate development and urban design studio in which students are part of a multi-disciplinary team on an urban development project. Focuses on comprehensive analysis, project planning, feasibility and program development through the application of advanced development skills in an urban context.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

Certificate in Classical Architecture

Certificate in Classical Architecture
(This certificate is not stand alone; it's part of a Master degree only.)
For thousands of years, the Classical tradition has lain at the heart of western architecture, resulting in an enduring language of design of universal appeal that is readily understood by the general public. The growing appreciation for classical and traditional architecture has meant that the demand for traditional buildings, in both the public and private realms, is greater today than it has been for 50+ years. This is reflected in the hiring preference (by many architectural firms) to obtain graduates whose portfolios demonstrate a skill set in this field, along with conventional modernist idioms.

It is our belief that giving students a training in classicism makes them better designers in all traditions, including modernism. The core of the certificate program is a studio in which the vocabulary (the orders) and the syntax (composition) of classical architecture are taught through a series of pedagogical exercises and esquisse (sketch) projects; in addition, students will take electives in history, theory, and documentary analysis.

The Certificate program engages the educational opportunities of two organizations: The Institute of Classical Architecture & Art (ICAA) and the Prince’s Foundation for the Built Environment. A New York City-based organization with 14 chapters nationwide including one in the Southeast (Atlanta), The ICAA is the leading national non-profit organization dedicated to advancing the practice and appreciation of the Classical tradition in architecture and the allied arts. The Prince’s Foundation for the Built Environment, a United Kingdom-based architecture school and trust, was founded by the Prince of Wales in order to promote a return of human values to architecture.

Certificate requires a total of 15 credits of core courses and related electives.

Goals

- To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
- To preserve and develop knowledge for the profession through research and practice.
- To share knowledge locally and internationally through community service.
- To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

Student Learning Outcomes

- Students will demonstrate the ability to effectively use basic architectural and environmental principles in design.
- Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.
- Students will demonstrate the ability to read, write, speak and listen effectively.
- Students will demonstrate the ability to use appropriate representational media, such as traditional graphic and digital technology skills, to convey essential formal elements at each stage of the programming and design process.

Certificate in Construction Management

Overview

Growth in the construction industry is projected to outpace all other industries through 2030, creating a high demand for qualified professionals in the industry. The Certificate in Construction Management addresses the growing demand for professionals with the advanced knowledge, discipline, and skills needed to face the challenges of the construction industry and become future leaders of design and construction-related organizations worldwide. The certificate takes advantage of the culture and resources available at the School of Architecture as well as the Miami Herbert Business School and the School of Law. The Certificate in Construction Management prepares graduate architecture students for effective management leadership in the construction field. It provides a foundation for training in professional management of construction projects while focusing on three components that represent the functional areas of construction management:

- Management
- Project Controls
- Design and Construction Technology

Certificate requires a total of 15 credits of core courses and related electives.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Certificate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Construction Management Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. Bachelor degree with a 3.0 cumulative point average (GPA)
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the certificate and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded.
   All transcripts must be sent directly from the institution's registrar. E-scripts to download are also accepted. See more information on international transcripts below.

5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.

**Additional requirements for International Students:**

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
   - Educational Credential Evaluators, Inc. (http://www.ece.org/) (www.ece.org (http://www.ece.org/))
   - World Education Services (http://www.wes.org/) (www.wes.org (http://www.wes.org/))

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.arc.miami.edu (https://umcm.arc.miami.edu/) and refer to our latest admission requirements here. (https://www.arc.miami.edu/admissions/admission-requirements/graduate-requirements/)

Certificate in Design for Health & Well-Being

Certificate in Design for Health & Well-Being

As a growing body of research demonstrates the significant impacts of the built environment on health and well-being, new systems of building certifications and demands for evidence-based decision-making have expanded beyond the field of healthcare buildings to include the full spectrum of urban, institutional, commercial, and residential design. At the same time, the field of healthcare design is addressing fundamental change. As healthcare systems are in the midst of realignments with population health and community-based care, these realignments are moving beyond the walls of acute care facilities to encompass wellness beginning with behaviors, which research is showing to be highly influenced by the environment.

The University of Miami Built Environment Behavior and Health Research Group, with faculty in the Department of Public Health Sciences and the School of Architecture, has conducted an ongoing program of funded research in this area of inquiry since 1999. In 2015, research group members Professor Joanna Lombard and Public Health Sciences Research Associate Professor Scott Brown were selected as Charter Members of one of eleven founding university teams selected by the American Institute of Architects (AIA), AIA Foundation, and the Association of Collegiate Schools of Architecture for the AIA Design + Health Research Consortium. The work of the research group has been widely disseminated to include informed public policy that has been integrated into both architecture and urban design studios in the School of Architecture.

Focusing more specifically on healthcare environments, in 2009, Professor Joanna Lombard initiated the School’s first Healthcare Design Studio and aligned with the School of Business, the first healthcare focused symposium, “Future Directions: Health Care and the Built Environment.” Over the last 9 years, subsequent studios and related colloquia have been associated with healthcare systems and urban environments, addressing the rapidly changing world of healthcare and engaging topical research in public health. Alumni from these studios have found positions around the United States working in this vanguard area of the intersection of health and well-being. Applying to building and healthcare design specifically, this intersection has extended to other larger issues of community design.

Certificate requires a total of 15 credits of core courses and related electives.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://fnaid.miami.edu/) for further assistance.

Admission Requirements

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Certificate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. Bachelor degree with a 3.0 cumulative point average (GPA)
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the certificate and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded.
   All transcripts must be sent directly from the institution’s registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

Students applying must present a selection of their best architectural works during their pre-professional studies. Examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models, photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

Additional requirements for International Students:

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
• Educational Credential Evaluators, Inc. (http://www.ece.org) (www.ece.org (http://www.ece.org/))
• World Education Services (http://www.wes.org) (www.wes.org (http://www.wes.org/))

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.arc.miami.edu (https://www.arc.miami.edu/academics/research/health-and-the-built-environment/) and refer to our latest admission and portfolio requirements here. (https://www.arc.miami.edu/admissions/admission-requirements/graduate-requirements/)

**Goals**

• To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
• To preserve and develop knowledge for the profession through research and practice.
• To share knowledge locally and internationally through community service.
• To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

**Student Learning Outcomes**

• Students will demonstrate the ability to effectively use basic architectural and environmental principles in design.
• Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.
• Students will demonstrate the ability to read, write, speak and listen effectively.
• Students will demonstrate the ability to use appropriate representational media, such as traditional graphic and digital technology skills, to convey essential formal elements at each stage of the programming and design process.
Certificate in Historic Preservation

The Certificate in Historic Preservation program provides a unique opportunity for both undergraduate and graduate students at U-SoA to expand their knowledge of historic preservation while completing their professional degrees. The program builds on U-SoA’s strengths in history, urban design, community-building, and regionalism.

Miami and its region, including South Florida and the Caribbean, serve as an ideal laboratory for the program. A diversity of characteristics and threatened buildings, urban districts, and landscapes provide the context for exploring the evolving issues in historic preservation.

The Certificate Program stresses an interdisciplinary approach and allows specialization in areas of regional significance, such as tropical and subtropical architecture. Program resources include Miami’s professional community with its extensive experience in preservation in practice.

Certificate requires a total of 15 credits of core courses and related electives.

Certificate in Hospitality Design

Overview

The hospitality industry is a foundational building block of modern urban centers. Hospitality has emerged in the last 10 years as a critical area of lifestyle innovation and brand development as well as a laboratory for the application of new ideas about resilience and sustainability. Supported by
the School's Real Estate Development + Urbanism program, the Certificate in Hospitality Design will provide a foundation in hospitality design training for interested graduate students.

Miami, as one of the major US hotel and hospitality markets, is well-suited as a center of research and practical application of hospitality design. Many local architectural firms specialize in hospitality design and export these services within the region and around the world.

Since its inception in 2014, the SoA Hotel Studio has consistently attracted students seeking to explore the specialized field of hospitality architecture. The Hospitality Studio engages the program and function of hotels, but also the very important role of hotels in responding to and enriching their context. Urban hotels and resort hotels present a set of critical issues that require inter-disciplinary approaches. Since 2016, the School has also offered a seminar in hospitality design. Together, these two courses have provided a foundation for further engagement and exploration of the field.

Certificate requires a total of 15 credits of core courses and related electives.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements

Certificate in Real Estate Development and Urbanism

Certificate in Real Estate Development and Urbanism

The Certificate in Real Estate Development and Urbanism is designed to provide students with skills and experience to compete in the evolving world of urban real estate development. The curriculum is enriched by the University’s location in one of the nation’s most dynamic real estate markets, and by the School of Architecture faculty’s experience in livable community design. The certificate lays a foundation for training real estate industry professionals capable of tapping the power of the market to deliver development that offers a high quality of life for diverse populations to live, work, and pursue daily activities in walkable and sustainable neighborhoods and communities.

The Certificate will build on course offerings in the existing Master of Real Estate Development and Urbanism program, including real estate development, real estate finance, market analysis, real estate law, land use policies and codes, construction and project management, public private partnerships, sustainable development, and entrepreneurship. The existing curriculum incorporates case studies and materials on mixed-use development, urban infill, the redevelopment and repositioning of urban properties, historic preservation, and the integration of design, policy, management, and real estate development decision-making in shaping the built environment of communities.

There is a strong and increasing demand for graduates in architecture with both interdisciplinary skillsets and a foundational knowledge in real estate development, as well as knowledge of the interaction between real estate, architecture, construction, and urban design.

Certificate requires a total of 15 credits of core courses and related electives.

Certificate in Sustainable & Resilient Design

Certificate in Sustainable and Resilient Design

Environmental impacts of building practices, climate change, and rising sea levels are changing the landscape of architecture as a profession. Architects play a central role in selecting material and technology strategies, as well as developing robust adaptation strategies by addressing material impacts and climate stressors in their designs. Research, innovation, and community outreach are central and connected aspects of sustainable and resilient building practices. South Florida is ground zero for issues of coastal resiliency in particular. SoA has developed a coastal resiliency curriculum that capitalizes on civic and scholarly partnerships and aims to better familiarize students with these and other inter-related design, planning, regulatory issues, and the responding strategies under development. SoA faculty have been awarded significant research grants by the National Endowment for the Arts, the National Science Foundation, the W. K. Kellogg Foundation, and the Knight Foundation, resulting in the publication of related findings that aim to foster solutions.

Certificate requires a total of 15 credits of core courses and related electives.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements

Goals

- To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
- To preserve and develop knowledge for the profession through research and practice.
- To share knowledge locally and internationally through community service.
- To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

Student Learning Outcomes

- Students will demonstrate the ability to effectively use basic architectural and environmental principles in design.
- Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.
- Students will demonstrate the ability to read, write, speak and listen effectively.
- Students will demonstrate the ability to use appropriate representational media, such as traditional graphic and digital technology skills, to convey essential formal elements at each stage of the programming and design process.
Certificate in Urban Design

The vital role of designers in shaping the physical environment and its relationship to the natural world is at the core of the school's pedagogy. Urban Design and Real Estate Development, and the nexus between them, form a critical field of inquiry supported by the two distinct Master programs: the Master of Urban Design and the Master of Real Estate Development + Urbanism. Students in both programs share experiences in the classroom and in learning engagements with communities.

Certificate requires a total of 15 credits of core courses and related electives.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Certificate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. Bachelor degree with a 3.0 cumulative point average (GPA)
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the certificate and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded.
   All transcripts must be sent directly from the institution’s registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

Students applying must present a selection of their best architectural works during their pre-professional studies. Examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models, photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

Additional requirements for International Students:

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
   - Educational Credential Evaluators, Inc. (http://www.ece.org/) (www.ece.org (http://www.ece.org/))
   - World Education Services (http://www.wes.org/) (www.wes.org (http://www.wes.org/))

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.arc.miami.edu (https://mud.arc.miami.edu/) and refer to our latest admission and portfolio requirements here. (https://www.arc.miami.edu/admissions/admission-requirements/graduate-requirements/)

### Executive Master of Construction Management

**Overview**

The Executive Master of Construction Management (E.M.C.M.) (https://mcm.arc.miami.edu/) is an interdisciplinary 30-credit program and designed for accomplished professionals in the design and construction industry who are ready to take their career to the next level. Courses are offered in the late afternoons, evenings and on weekends, to meet the needs of working professionals. The program will focus on current issues and events in construction Management and address the needs of the industry by developing candidates for middle and upper management positions.
To obtain detailed program admission information, please reference our website [https://mcm.arc.miami.edu](https://mcm.arc.miami.edu) or contact the Graduate Admission Office at Tel. 305-284-3060.

*Electives must be approved by the Program Director.
Mission

The mission of Executive Master of Construction Management is to provide experienced construction professionals, a highly specialized practical curriculum embodied with real-world experience and taught by industry leaders to augment their practical knowledge of the industry and assist in advancing their careers into leadership positions at their organizations.

Goals

- To provide an integrative, flexible, and state of the art curriculum that prepares students with the knowledge, discipline and marketable skills, to become future leaders in design and construction-related organizations;
- To provide future construction professionals with the knowledge and quantitative skills required to understand, organize and control construction projects from conception to closeout;
- To expose participants to technical skills and knowledge in architecture, engineering, construction, and cutting-edge technology in support of planning, analyzing, and solving construction problems;
- To encourage our students, as future industry leaders, through the school’s culture and resources to address the critical social, economic, and environmental challenges facing the construction industry; and
- To encourage participants to make meaningful contributions to the shaping of the built environment.

Student Learning Outcomes

- Students will apply various management techniques and methods to efficiently and effectively plan and control construction projects.
- Students will adopt and integrate emerging technologies and innovations in Construction Management practices.
- Students will understand the value of and apply sustainable building practices to optimize the use of available resources.
- Students will apply skills to manage creative teams and project processes effectively and efficiently.
- Students will possess an understanding of the contributions made by design professionals to the construction processes, and can communicate and interact with design professionals within the multidisciplinary construction team.

Master of Architecture

Master of Architecture I (3 year track)

The Master of Architecture I is a NAAB-accredited, 3 year (7 semesters) program intended for students holding undergraduate degrees in non-design fields. This STEM-designated professional degree program provides a well-grounded understanding of architecture as students immerse in contemporary challenges to address a variety of social, cultural, technological and programmatic contexts.

At the heart of the M.Arch I curriculum are Core Studios that introduce students to critical topics, imbue necessary skills, inspire critical thinking, examine the production of meaning in architecture, and foster an understanding of architecture as an integrative discipline. The Core Studios are carefully synchronized with core courses in drawing and visualization, history and theory, technology and systems, and practice.

The first year begins with an examination of the relationship between nature, landscape, and the built environment, and how architectural form is informed by a careful reading of place. A summer in the School's Rome studio is configured to provide an intensive, on-site experience balancing design, history, theory, and analysis through drawing. In order to make travel to Rome more accessible, the School covers the cost of travel and lodging for this trip.

During the second year, students engage design-based critical inquiry into more complex issues including technology, structural systems, environmental stewardship, building envelope systems, and social human-centered aspects of architecture. In the Integrative Studio, which systematically incorporates professionals into the studio environment, students emulate modes of practice by organizing a complex architectural project combining design considerations with complex building systems, while also demonstrating proficiency in technical documentation.

In their final year, graduate M.Arch students are expected to pursue a final degree project. Final degree projects comprise one of two tracks:

1) Design Thesis, an opportunity for each student, working with a faculty advisor, to conduct independent scholarly research and define an individual position with regard to the discipline of architecture

2) Graduate Design Research Studio, led by a faculty member, which investigates relevant or thematic issues of architecture.

Beyond the Core Studios, students are able to develop individual focus areas, for instance in advanced technology, design-build, and building construction, sustainability and resilience, urban design, historic preservation, and adaptive-use, healthcare, or hospitality. Students direct their trajectory following their interests, develop areas of professional concentration through certificates, and engage in critical research.

U-SoA faculty are joined each year by internationally-recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of Advanced Elective Design Studios. The School is home to innovative research units, including RAD-UM,
a lab dedicated to emergent embedded technology, the Laboratory of Littoral Urbanism, an acclaimed design/build program, and the Center for Urban and Community Design.

The M.Arch degree can also be combined efficiently with on-site post-professional degree programs, such as the Master of Science in Architecture, Master of Urban Design, Master of Real Estate Development and Urbanism, and Master of Construction Management.

**Master of Architecture I AP (2 year advanced standing track)**

The Master of Architecture I AP is a 2-year (4-semester program) for students holding a pre-professional degree in architecture or a closely-related field. This STEM-designated professional degree program provides an advanced platform for students to engage contemporary challenges and address a variety of social, cultural, technological and programmatic contexts.

This M.Arch I AP program allows students to advance their undergraduate education by engaging more complex challenges, honing their skills in essential areas, and by developing individual focus areas, for instance in advanced technology, design-build, and building construction, sustainability and resilience, urban design, historic preservation and adaptive-use, healthcare, or hospitality. Students direct their trajectory following their interests, develop areas of professional concentration through certificates, and engage in critical research.

In their final year, graduate M.Arch students are expected to pursue a final degree project. Final degree projects comprise one of two tracks:

1) Design Thesis, an opportunity for each student, working with a faculty advisor, to conduct independent scholarly research and define an individual position with regard to the discipline of architecture

2) Graduate Design Research Studio, led by a faculty member, which investigates relevant or thematic issues of architecture.

U-SoA faculty are joined each year by internationally-recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of Advanced Elective Design Studios. The School is home to innovative research units, including RAD-UM, a lab dedicated to emergent embedded technology, the Laboratory of Littoral Urbanism, an acclaimed design/build program, and the Center for Urban and Community Design.

The M.Arch degree can also be combined efficiently with on-site post-professional degree programs, such as the Master of Science in Architecture, Master of Urban Design, Master of Real Estate Development and Urbanism, and Master of Construction Management.

**Certificates**

Graduate students increasingly look to areas of concentration that can provide skill and knowledge bases for professional applications. Historic Preservation, Design for Health and Wellbeing, Sustainable and Resilient Design, Design for Health and Well-Being, Construction Management, Urban Design, and Real Estate Development prove to be rapidly growing areas of professional specialization as they engage critical areas of investigation in contemporary architecture. The certificate programs address both the intellectual and academic needs of the School of Architecture, and the desire of the School to use its current curriculum as a platform to engage these specialized areas further.

Certificates require 15 credits of one certificate-related studio (6 cr) and related architecture electives (9 cr).

**Admission Requirements**

Applications are generally considered for entrance in the Fall semester. only. Design studios in the Master of Architecture programs are sequenced to deliver a cohesive educational experience and students are expected to follow the established design studio sequence for their program. Students entering the program in Spring or Summer are not eligible to enter the studio sequence at that time, but may take electives or other required courses. This will necessarily extend the duration of the Master of Architecture program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution’s registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Digital portfolio sent to email: SoAgradadmissions@miami.edu.
Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

In the MArch. I/3 year track it is not required to submit a portfolio but it offers candidates an opportunity to present their visual interests and artistic skills. The work may include, but is not limited to reproductions of drawings, paintings, ceramics, sculpture, woodwork, photographs, video work and models. Although drafting (CAD or hand-drawing) courses are not required for admission to the 3-year program, students who want to include such drawings, are encouraged to do so.

Students applying for advanced standing (MArch.I AP/ 2-year track) must present a selection of their best architectural works during their pre-professional studies. In order to facilitate the waivering of courses and studios, examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models, photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

Additional requirements for International Students:

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
   - Educational Credential Evaluators, Inc. (http://www.ece.org) (www.ece.org (http://www.ece.org/))
   - World Education Services (http://www.wes.org/) (www.wes.org (http://www.wes.org/))

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.arc.miami.edu (https://grad.arc.miami.edu/) and refer to our latest admission and portfolio requirements here (https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/).

Credit Hours: 15

Total Credit Hours: 60

1. Architecture and professional courses completed in a non-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program (max. of 6 credits).

2. Requirements/Recommendations for additional coursework will be contingent on the evaluation of the student’s prior work at the time of admission.

3. An additional summer semester may be added for students with less than 8 Design Studios from a Bachelor of Architecture degree (6 credits).

**Goals**

- To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
- To preserve and develop knowledge for the profession through research and practice.
- To share knowledge locally and internationally through community service.
- To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.
The dual Master of Architecture I and the Master of Real Estate Development and Urbanism is a 126 credit program. The dual Master of Architecture I AP and Master of Real Estate Development and Urbanism program is a 81 credit program.

The **Master of Architecture** I is a NAAB-accredited, 3 year (7 semesters) program intended for students holding undergraduate degrees in non-design fields. This STEM-designated professional degree program provides a well-grounded understanding of architecture as students immerse in contemporary challenges to address a variety of social, cultural, technological and programmatic contexts.

At the heart of the M.Arch I curriculum are Core Studios that introduce students to critical topics, imbue necessary skills, inspire critical thinking, examine the production of meaning in architecture, and foster an understanding of architecture as an integrative discipline. The Core Studios are carefully synchronized with core courses in drawing and visualization, history and theory, technology and systems, and practice.

The first year begins with an examination of the relationship between nature, landscape, and the built environment, and how architectural form is informed by a careful reading of place. A summer in the School’s Rome studio is configured to provide an intensive, on-site experience balancing design, history, theory, and analysis through drawing. In order to make travel to Rome more accessible, the School covers the cost of travel and lodging for this trip.

During the second year, students engage design-based critical inquiry into more complex issues including technology, structural systems, environmental stewardship, building envelope systems, and social human-centered aspects of architecture. In the Integrative Studio, which systematically incorporates professionals into the studio environment, students emulate modes of practice by organizing a complex architectural project combining design considerations with complex building systems, while also demonstrating proficiency in technical documentation.

In their final year, graduate M.Arch students are expected to pursue a final degree project. Final degree projects comprise one of two tracks:

1) **Design Thesis**, an opportunity for each student, working with a faculty advisor, to conduct independent scholarly research and define an individual position with regard to the discipline of architecture.

2) **Graduate Design Research Studio**, led by a faculty member, which investigates relevant or thematic issues of architecture.

Beyond the Core Studios, students are able to develop individual focus areas, for instance in advanced technology, design-build, and building construction, sustainability and resilience, urban design, historic preservation, and adaptive-use, healthcare, or hospitality. Students direct their trajectory following their interests, develop areas of professional concentration through certificates, and engage in critical research.

U-SoA faculty are joined each year by internationally-recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of Advanced Elective Design Studios. The School is home to innovative research units, including RAD-UM, a lab dedicated to emergent embedded technology, the Laboratory of Littoral Urbanism, an acclaimed design/build program, and the Center for Urban and Community Design.

The **Master of Architecture I AP** is a 2-year (4-semester program) for students holding a pre-professional degree in architecture or a closely-related field. This STEM-designated professional degree program provides an advanced platform for students to engage contemporary challenges and address a variety of social, cultural, technological and programmatic contexts.

This M.Arch I AP program allows students to advance their undergraduate education by engaging more complex challenges, honing their skills in essential areas, and by developing individual focus areas, for instance in advanced technology, design-build, and building construction, sustainability and resilience, urban design, historic preservation and adaptive-use, healthcare, or hospitality. Students direct their trajectory following their interests, develop areas of professional concentration through certificates, and engage in critical research.

In their final year, graduate M.Arch students are expected to pursue a final degree project. Final degree projects comprise one of two tracks:

1) **Design Thesis**, an opportunity for each student, working with a faculty advisor, to conduct independent scholarly research and define an individual position with regard to the discipline of architecture.
2) Graduate Design Research Studio, led by a faculty member, which investigates relevant or thematic issues of architecture.

U-SoA faculty are joined each year by internationally-recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of Advanced Elective Design Studios. The School is home to innovative research units, including RAD-UM, a lab dedicated to emergent embedded technology, the Laboratory of Littoral Urbanism, an acclaimed design/build program, and the Center for Urban and Community Design.

The Master of Real Estate Development + Urbanism (MRED+U) program is an immersive one-year interdisciplinary graduate program that combines coursework in real estate development, finance, market analysis, construction, architecture, urban design, law and entrepreneurship. The program draws on the strengths of the University of Miami’s Schools of Architecture, Business, Engineering, and Law to create a world-class program that blends the fundamentals of real estate development with livable community design. Students are immersed in one of the world’s most dynamic real estate markets through a rigorous curriculum enriched by a wide range of study tours, speaker series, the annual Real Estate Impact Conference, research initiatives and networking events. The prestigious MRED+U Advisory Board connects students with over 50 industry leaders who are directly engaged in the program as lecturers, mentors and advisors, providing internship and employment opportunities and access to dozens of cutting-edge projects from every real estate sector.

**Admission Requirements with MARCH I (3-Year Track)**

Applications are generally considered for entrance in the Fall semester. only. Design studios in the Master of Architecture and courses in the Real Estate program are sequenced to deliver a cohesive educational experience and students are expected to follow the established design studio sequence for their program. Students entering the program in Spring or Summer are not eligible to enter the studio sequence at that time, but may take electives or other required courses. This may extend the duration of the Master of Architecture program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution's registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Resume
7. Optional Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

In the MArch. I/3 year track it is **not** required to submit a portfolio but it offers candidates an opportunity to present their visual interests and artistic skills. The work may include, but is not limited to reproductions of drawings, paintings, ceramics, sculpture, woodwork, photographs, video work and models. Although drafting (CAD or hand-drawing) courses are not required for admission to the 3-year program, students who want to include such drawings, are encouraged to do so.

**Additional requirements for International Students:**

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
   - Educational Credential Evaluators, Inc. (http://www.ece.org/) (www.ece.org (http://www.ece.org/))
   - World Education Services (http://www.wes.org/) (www.wes.org (http://www.wes.org/))
For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

**Admission Requirements with MARCH (2 Year Track)**

Applications are generally considered for entrance in the Fall semester only. Design studios in the Master of Architecture and courses in the Real Estate program are sequenced to deliver a cohesive educational experience and students are expected to follow the established design studio sequence for their program. Students entering the program in Spring or Summer are not eligible to enter the studio sequence at that time, but may take electives or other required courses. This may extend the duration of the Master of Architecture program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School ([http://grad.miami.edu/](http://grad.miami.edu/)) as stipulated in the University Graduate Bulletin ([http://bulletin.miami.edu/](http://bulletin.miami.edu/)). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution's registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Resume
7. Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

Students applying for advanced standing (MArch.I AP/ 2-year track) must present a selection of their best architectural works during their pre-professional studies. In order to facilitate the waiving of courses and studios, examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models, photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

**Additional requirements for International Students:**

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.arc.miami.edu ([https://grad.arc.miami.edu/](https://grad.arc.miami.edu/)) and refer to our latest admission and portfolio requirements [here](https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/).

### Master of Architecture I and Master of Urban Design Dual Degree

#### Overview

The dual Master of Architecture I and Master of Urban Design is a 126 credit program. The dual Master of Architecture I AP and Master of Urban Design is a 81 credit program.

The Master of Architecture I is a NAAB-accredited, 3 year (7 semesters) program intended for students holding undergraduate degrees in non-design fields. This STEM-designated professional degree program provides a well-grounded understanding of architecture as students immerse in contemporary challenges to address a variety of social, cultural, technological and programmatic contexts.
At the heart of the M.Arch I curriculum are Core Studios that introduce students to critical topics, imbue necessary skills, inspire critical thinking, examine the production of meaning in architecture, and foster an understanding of architecture as an integrative discipline. The Core Studios are carefully synchronized with core courses in drawing and visualization, history and theory, technology and systems, and practice.

The first year begins with an examination of the relationship between nature, landscape, and the built environment, and how architectural form is informed by a careful reading of place. A summer in the School's Rome studio is configured to provide an intensive, on-site experience balancing design, history, theory, and analysis through drawing. In order to make travel to Rome more accessible, the School covers the cost of travel and lodging for this trip.

During the second year, students engage design-based critical inquiry into more complex issues including technology, structural systems, environmental stewardship, building envelope systems, and social human-centered aspects of architecture. In the Integrative Studio, which systematically incorporates professionals into the studio environment, students emulate modes of practice by organizing a complex architectural project combining design considerations with complex building systems, while also demonstrating proficiency in technical documentation.

In their final year, graduate M.Arch students are expected to pursue a final degree project. Final degree projects comprise one of two tracks:

1) Design Thesis, an opportunity for each student, working with a faculty advisor, to conduct independent scholarly research and define an individual position with regard to the discipline of architecture

2) Graduate Design Research Studio, led by a faculty member, which investigates relevant or thematic issues of architecture.

Beyond the Core Studios, students are able to develop individual focus areas, for instance in advanced technology, design-build, and building construction, sustainability and resilience, urban design, historic preservation, and adaptive-use, healthcare, or hospitality. Students direct their trajectory following their interests, develop areas of professional concentration through certificates, and engage in critical research.

U-SoA faculty are joined each year by internationally-recognized visiting scholars and fellows. The diversity of faculty interests and experience offers opportunities for students in the selection of Advanced Elective Design Studios. The School is home to innovative research units, including RAD-UM, a lab dedicated to emergent embedded technology, the Laboratory of Littoral Urbanism, an acclaimed design/build program, and the Center for Urban and Community Design.

The Master in Urban Design provides students with a design experience investigating the guiding principles for building regions, cities and communities. The degree is STEM-designated which allows international students to apply for OPT for up to 36 months after graduation.

Guided by imperatives of sustainability and resilience, the program conceptualizes cities as an extension of the ecological transect across the natural to human habitat, providing students with a range of experiences from rural to urban.

Program Director Elizabeth Plater-Zyberk, recognized for her foundational role in the development of the movement called the New Urbanism, leads the program that invites students to explore design, policy and management tools for place-making as a vehicle for improving quality of life in a variety of urban settings. The impact of the built environment on health, retrofitting the suburban landscape, real estate development as community building, adaptation to climate change, and urban growth and revitalization, are topics prominent in course offerings and faculty research.

The three-semester curriculum begins in the fall each year with foundation courses in urban design and real estate development, in an Interdisciplinary approach structured by environmental, social and economic goals. The spring semester intensifies students' engagement with contemporary urban challenges such as climate resilience, healthy community design, and repair of suburban sprawl. The summer semester provides a concluding experience that aggregates prior topics in an international setting that challenges goals of sustainability and resource conservation. As part of the
curriculum, students participate in the National Charrette Institute certification course, a training in public outreach and participatory planning, and collaborate with real estate development students in two special projects: a national design and development competition, and a local community revitalization plan. These experiences and the course work shared with the Master of Real Estate Development and Urbanism program provide a focus on implementation. The optional fourth semester of the Master of Urban Design program is a semester-long independent study design project or thesis. In recent years these have focused on topics such as greening a Brazilian City, socially integrated public housing in China, and an analysis of principles and metrics of Smart Cities and New Urbanism.

Other resources that enrich the urban design student’s experience in the School include the Center for Community and Urban Design (CUCD), engaging students in community outreach projects in South Florida and The Caribbean, and the Archive of the New Urbanism, housed in the School of Architecture Library. The Archive is a growing resource of documents, with both texts and images that support research related to urban design. Also, Research Affiliates from around the world annually study the state-of-the-art in urban design and architecture.

Guiding the ever evolving program are faculty members Charles Bohl, Jaime Correa, Eric Firley, Jean Francois Lejeune, Victor Deupi and Joanna Lombard, internationally recognized in research, publication and design.

While the Master of Urban Design is a post-professional program, structured for students with a professional degree in architecture, those holding a degree in engineering, planning or landscape architecture may apply for admission. A preparatory summer course may be required for non-architects, to be determined by the admission process.

History of Program

Urban Design offerings at the School of Architecture emerged in the 1980’s when a group of faculty members sought to have an impact on the urban growth of South Florida. The impetus was their study of Coral Gables, a Progressive Era new town, one of a series of Anglo-American Suburbs that can be found across the United States. George Merrick founded Coral Gables in 1923. He believed that for his city to be great it needed a university, and he set aside land for the University of Miami. The architects Merrick engaged in the building of Coral Gables founded the architecture program at the outset. Today, building on his legacy, the School of Architecture is renown for its dedication to preparing future professionals with an understanding of the larger context for their work in the environment and society.

In 1988, mentored by their city and their studies of its design, and by leading thinkers of the time such as Leon and Rob Krier, the faculty established a post-professional degree in urban design. The young faculty’s design of Seaside, now an icon of new community design, challenged the planning and development conventions of its day. The new masters program established the precepts of Traditional Neighborhood Development (TND) and of the Charter for the New Urbanism. The School’s faculty and alumni are among the founders of the Congress for the New Urbanism, and have been prominent contributors to the evolution of the movement, now a globally renowned approach to sustainable urban growth and revitalization.

Admission Requirements with MARCH I (3-Year Track)

Applications are generally considered for entrance in the Fall semester. only. Design studios in the Master of Architecture I and Master of Urban Design programs are sequenced to deliver a cohesive educational experience and students are expected to follow the established design studio sequence for their program. Students entering the program in Spring or Summer are not eligible to enter the studio sequence at that time, but may take electives or other required courses. This may extend the duration of the program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution's registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

Students applying must present a selection of their best architectural works during their pre-professional studies. In order to facilitate the waiving of courses and studios, examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models,
photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

**Additional requirements for International Students:**

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

**Admission Requirements with MARCH (2 Year Track)**

Applications are generally considered for entrance in the Fall semester. only. Design studios in the Master of Architecture and Urban Design programs are sequenced to deliver a cohesive educational experience and students are expected to follow the established design studio sequence for their program. Students entering the program in Spring or Summer are not eligible to enter the studio sequence at that time, but may take electives or other required courses. This may extend the duration of the Master of Architecture program.

Master of Construction Management

Overview
The Master of Construction Management (M.C.M. (https://mcm.arc.miami.edu/)) prepares students for management roles in the Construction Industry. Formal knowledge and experience in project and construction management are highly sought after by architectural and engineering firms, construction companies, and real estate developers. The curriculum will broaden educational and career options for students. The program features
a forward-thinking state-of-the-art practice-based curriculum that prepares students with the knowledge, discipline, and, skills to lead design and construction-related organizations. Courses are offered in the evenings and weekends, to meet the needs of working professionals.

The 36 credit program is open to students with an undergraduate degree in Architecture, Engineering, Construction, and related studies. Students not having earned a degree in Architecture, Engineering, or Construction related fields may apply to the program. Related experience or area of study will be considered and if deemed necessary by the Program Director, students may be required to take leveling (foundational) courses or attend our boot-camps before enrolling in the curriculum.

The program is a non-thesis program and consists of 36 credit hours. This includes

- 15 credits of required core courses
- 10 credits of professional practice core courses - practicums and internship
- 5 credits technology core courses and
- 6 credits of electives

Combined with other educational opportunities currently offered at the U-SoA or other academic units, students can create their future expanding their horizon in the job market.

Admissions

To obtain detailed program admission information, please reference our website https://mcm.arc.miami.edu (https://mcm.arc.miami.edu/) or contact the Graduate Admission Office at Tel. 305-284-3060.

Internship:

One semester internship as per academic calendar of 10 - 20 hours per week practical training is required for Master of Construction Management students. The practical training must be approved in advance by the faculty director. International Students in F-1 status are required to obtain authorization for CPT from the Department of International Student and Scholar Services (ISSS) prior to engaging in practical training.

**Internship:**

One semester internship as per academic calendar of 10 - 20 hours per week practical training is required for Master of Construction Management students. The practical training must be approved in advance by the faculty director. International Students in F-1 status are required to obtain authorization for CPT from the Department of International Student and Scholar Services (ISSS) prior to engaging in practical training.

**Mission**

The mission of the Construction Management programs is to broaden educational and career options for our graduates and to provide an integrative, flexible, and state of the art curriculum that prepares students with the knowledge, discipline and the marketable skills to become future leaders of design and construction related organizations worldwide. Students are encouraged, as future industry leaders, address the critical social, economic, and environmental challenges facing the construction industry and to make meaningful contributions in the shaping of the built environment.

**Goals**

- To provide an integrative, flexible, and state of the art curriculum that prepares students with the knowledge, discipline and marketable skills, to become leaders in 21st century design and construction-related organizations;
- To provide future construction professionals with the knowledge and quantitative skills required to understand, organize and control construction projects from conception to closeout;
- To expose participants to technical skills and knowledge in architecture, engineering, construction, and cutting-edge technology in support of planning, analyzing, and solving construction problems;
- To encourage our students, as future industry leaders, through the school's culture and resources to address the critical social, economic, and environmental challenges facing the construction industry; and
- To encourage participants to make meaningful contributions to the shaping of the built environment.

**Student Learning Outcomes**

- Students will apply various management techniques and methods to efficiently and effectively plan and control construction projects.
- Students will adopt and integrate emerging technologies and innovations in Construction Management practices.
- Students will understand the value of and apply sustainable building practices to optimize the use of available resources.
- Students will apply skills to manage creative teams and project processes effectively and efficiently.
- Students will possess an understanding of the contributions made by design professionals to the construction processes, and can communicate and interact with design professionals within the multidisciplinary construction team.
Master of Real Estate Development + Urbanism

Overview

The Master of Real Estate Development + Urbanism (MRED+U) program is an immersive one-year interdisciplinary graduate program that combines coursework in real estate development, finance, market analysis, construction, architecture, urban design, law and entrepreneurship. The program draws on the strengths of the University of Miami’s Schools of Architecture, Business, Engineering, and Law to create a world-class program that blends the fundamentals of real estate development with livable community design. Students are immersed in one of the world’s most dynamic real estate markets through a rigorous curriculum enriched by a wide range of study tours, speaker series, the annual Real Estate Impact Conference, research initiatives and networking events. The prestigious MRED+U Advisory Board connects students with over 50 industry leaders who are directly engaged in the program as lecturers, mentors and advisors, providing internship and employment opportunities and access to dozens of cutting-edge projects from every real estate sector.

Dual degree and certificate options are available combining the MRED+U degree with the Master in Construction Management, Masters in Architecture and Master in Urban Design programs, as well as certificates in Hospitality Design, Sustainable and Resilient Design, Historic Preservation, and Design for Health & Well-Being.

Admission Requirements

Applications are generally considered for entrance in the Fall semester. Courses in the Master of Real Estate Development and Urbanism program are sequenced to deliver a cohesive educational experience and students are expected to follow the established course sequence for their program. Students entering the program in Spring or Summer may not be eligible to enter the course sequence at that time, but may take electives or other required courses. This will necessarily extend the duration of the program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Real Estate Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution’s registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Two academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Resume sent to email: SoAgradadmissions@miami.edu.

Additional requirements for International Students:

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
   5. World Education Services (http://www.wes.org/) (www.wes.org (http://www.wes.org/))

For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.mredu.arc.miami.edu (https://mredu.arc.miami.edu/) and refer to our latest admission requirements here (https://www.arc.miami.edu/admissions/admissions-and-portfolio-requirements/grad-requirements/).

**Required Internship/Practical Training**

Total Credit Hours 36

1 Elective credits can be fulfilled from one, two or three credit course offerings over the three semesters including study abroad courses involving MRED+U faculty (or approved by the Director).

**Required Internship**

A minimum of 4 months of 10-20 hours per week practical training is required for Master of Real Estate Development and Urbanism students. The practical training must be approved in advance by the faculty director. International Students in F-1 status are required to obtain authorization for CPT from the Department of International Student and Scholar Services (ISSS) prior to engaging in practical training.

1 Elective credits can be fulfilled from one, two and three credit course offerings over the three semesters including study abroad courses involving MRED+U faculty (or approved by the Director).

2 With professor approval, students may test out of RED 610 and complete RED 612 and RED 614 or approved FIN courses.

**Mission**

The mission of the MRED+U program is to educate future real estate professionals on the fundamentals of real estate development grounded in livable community planning and design.

**Goals**

- Prepare real estate industry professionals capable of tapping the power of the market to deliver financially successful development that offers a high quality of life for diverse populations to live, work, and pursue daily activities in walkable, sustainable neighborhoods and communities.
- Prepare students for professional leadership and lifelong learning in urban real estate development with an emphasis on livable community planning and design.
- Preserve and develop knowledge for the profession through research and practice.
• Share knowledge locally, nationally and internationally through the program website, programs and community outreach projects.
• Promote community design and real estate development goals of environmental responsibility, social equity and economic sustainability.

Student Learning Outcomes

• Students will demonstrate the ability to assess the viability of individual properties, neighborhoods and districts for appropriate types and scales of urban real estate development including the physical, environmental, regulatory (land use, zoning, building codes, etc.), political, transportation, social and community context for development.
• Students will demonstrate the ability to identify and research regional and local (on the ground) real estate market conditions, comparable and competitive properties, demographic and psychographic characteristics of populations and prospective customers and tenants for real estate.
• Students will demonstrate the ability to prepare a real estate development program with appropriate land uses, tenant mixtures, parking and non-revenue generating elements (civic uses and public space) consistent with local regulations (land use, zoning).
• Students will demonstrate: literacy in real estate finance terminology and concepts for real estate development; the ability to analyze the financial feasibility of real estate development proposals; and, the ability to prepare and present a financial pro forma for a real estate development proposal.
• Students will demonstrate the ability to work in various roles and collaborate as part of an interdisciplinary team carrying out an urban real estate development project.
• Students will demonstrate the ability to craft and effectively deliver concise presentations for real estate development proposals to a variety of audiences.
• Students will demonstrate knowledge of exemplary urban projects and places including historic, new and redeveloped urban places. Students will demonstrate knowledge of design principles used to create and maintain livable communities, build real estate value and advance sustainability.

Master of Real Estate Development and Urbanism + Master of Urban Design Dual Degree

Overview

The Master of Real Estate Development + Urbanism (MRED+U) and Master of Urban Design are a 60 credit minimum program.

The interdisciplinary graduate program that combines coursework in real estate development, finance, market analysis, construction, architecture, urban design, law and entrepreneurship. The program draws on the strengths of the University of Miami's Schools of Architecture, Business, Engineering, and Law to create a world-class program that blends the fundamentals of real estate development with livable community design. Students are immersed in one of the world's most dynamic real estate markets through a rigorous curriculum enriched by a wide range of study tours, speaker series, the annual Real Estate Impact Conference, research initiatives and networking events. The prestigious MRED+U Advisory Board connects students with over 50 industry leaders who are directly engaged in the program as lecturers, mentors and advisors, providing internship and employment opportunities and access to dozens of cutting-edge projects from every real estate sector.

The Master in Urban Design provides students with a design experience investigating the guiding principles for building regions, cities and communities. The degree is STEM-designated which allows international students to apply for OPT for up to 36 months after graduation.

Guided by imperatives of sustainability and resilience, the program conceptualizes cities as an extension of the ecological transect across the natural to human habitat, providing students with a range of experiences from rural to urban.

Program Director Elizabeth Plater-Zyberk, recognized for her foundational role in the development of the movement called the New Urbanism, leads the program that invites students to explore design, policy and management tools for place-making as a vehicle for improving quality of life in a variety of urban settings. The impact of the built environment on health, retrofitting the suburban landscape, real estate development as community building, adaptation to climate change, and urban growth and revitalization, are topics prominent in course offerings and faculty research.

The three-semester curriculum begins in the fall each year with foundation courses in urban design and real estate development, in an Interdisciplinary approach structured by environmental, social and economic goals. The spring semester intensifies students' engagement with contemporary urban challenges such as climate resilience, healthy community design, and repair of suburban sprawl. The summer semester provides a concluding experience that aggregates prior topics in an international setting that challenges goals of sustainability and resource conservation. As part of the curriculum, students participate in the National Charrette Institute certification course, a training in public outreach and participatory planning, and collaborate with real estate development students in two special projects: a national design and development competition, and a local community revitalization plan. These experiences and the course work shared with the Master of Real Estate Development and Urbanism program provide a focus on implementation. The optional fourth semester of the Master of Urban Design program is a semester-long independent study design project or thesis. In recent years these have focused on topics such as greening a Brazilian City, socially integrated public housing in China, and an analysis of principles and metrics of Smart Cities and New Urbanism.

Other resources that enrich the urban design student’s experience in the School include the Center for Community and Urban Design (CUCD), engaging students in community outreach projects in South Florida and The Caribbean, and the Archive of the New Urbanism, housed in the School of
Architecture Library. The Archive is a growing resource of documents, with both texts and images that support research related to urban design. Also, Research Affiliates from around the world join the faculty annually to study the state-of-the-art in urban design and architecture.

Guiding the ever evolving program are faculty members Charles Bohl, Jaime Correa, Eric Firley, Jean Francois Lejeune, Victor Deupi and Joanna Lombard, internationally recognized in research, publication and design.

While the Master of Urban Design is a post-professional program, structured for students with a professional degree in architecture, those holding a degree in engineering, planning or landscape architecture may apply for admission. A preparatory summer course may be required for non-architects, to be determined by the admission process.

**History of Program**

Urban Design offerings at the School of Architecture emerged in the 1980’s when a group of faculty members sought to have an impact on the urban growth of South Florida. The impetus was their study of Coral Gables, a Progressive Era new town, one of a series of Anglo-American Suburbs that can be found across the United States. George Merrick founded Coral Gables in 1923. He believed that for his city to be great it needed a university, and he set aside land for the University of Miami. The architects Merrick engaged in the building of Coral Gables founded the architecture program at the outset. Today, building on his legacy, the School of Architecture is renown for its dedication to preparing future professionals with an understanding of the larger context for their work in the environment and society.

In 1988, mentored by their city and their studies of its design, and by leading thinkers of the time such as Leon and Rob Krier, the faculty established a post-professional degree in urban design. The young faculty's design of Seaside, now an icon of new community design, challenged the planning and development conventions of its day. The new masters program established the precepts of Traditional Neighborhood Development (TND) and of the Charter for the New Urbanism. The School's faculty and alumni are among the founders of the Congress for the New Urbanism, and have been prominent contributors to the evolution of the movement, now a globally renowned approach to sustainable urban growth and revitalization.

**Admission Requirements**

Applications are generally considered for entrance in the Fall semester. Courses in the Master of Real Estate Development and Urbanism and Urban Design program are sequenced to deliver a cohesive educational experience and students are expected to follow the established course sequence for their program. Students entering the program in Spring or Summer may not be eligible to enter the course sequence at that time, but may take electives or other required courses. This may extend the duration of the program.

Applications start on November 1 until June 1 for entry in Fall and October 1 until December 1 for entry in Spring. Admission to the Graduate Program is subject to the rules, regulations and procedures of the Graduate School (http://grad.miami.edu/) as stipulated in the University Graduate Bulletin (http://bulletin.miami.edu/). It is the responsibility of each student to understand these requirements and to ensure that they are met.

Applications will be reviewed by the Architecture and Real Estate Faculty Graduate Admissions Committee only after fulfilling the below requirements and all of the following documents have been received:

1. 3.0 cumulative point average
2. Completed application (http://grad.miami.edu/apply/on-campus-graduate-programs/) form with an application fee. This fee is mandatory.
3. A letter or statement expressing your interest in the program and reasons for applying.
4. Official transcripts of all college and university courses taken, indicating the date your professional or other undergraduate degree was awarded. All transcripts must be sent directly from the institution's registrar. E-scripts to download are also accepted. See more information on international transcripts below.
5. Three academic (and professional, if applicable) letters of recommendation. If you have waived your right for access to your letters, they may be sent directly from the recommender, or they may be included with your application in a signed and sealed envelope.
6. Resume
7. Digital portfolio sent to email: SoAgradadmissions@miami.edu.

Please save the digital portfolio with your Lastname_Firstname. Digital portfolios must be no greater than 8 MB. You may also share a portfolio link to review your work.

Students applying for the Master of Urban Design must present a selection of their best architectural works during their pre-professional studies. In order to facilitate the waiving of courses and studios, examples must emphasize comprehensive skills including sketches, plans, sections and elevations, and graphics that exhibit conceptual and diagramming abilities, understanding of structures and of urban context, as well as any other skills (computer modeling, models, photography and film abilities, etc.). Examples of professional work are encouraged but must clearly identify and describe work done independently and as part of a team.

**Additional requirements for International Students:**

1. TOEFL of min. 80 or IELTS of min. 6.5 (please use University code 5815).
2. Graduate international transcripts will be reviewed by one of the approved Evaluation Services:
For application review purposes, English translated official transcripts are sufficient. Once the applicant gets admitted, the international evaluation report is required.

Please visit our website at www.mredu.arc.miami.edu and refer to our latest admission requirements here.

Master of Science in Architecture

Overview
The Master of Science in Architecture (M.Sc.Arch.) is a one-year, three-semester program (completion of 36 credits is required). The program offers a critical and professional environment to investigate design strategies and design challenges in relation to the most pressing issues of the 21st century: resilient design, tropical and subtropical architectures, identity in a globalized world, health care design, housing design, conservation of the built environment and the effect of embedded technologies on design. The Master of Science in Architecture program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study. The degree is STEM-designated which allows international students to apply for OPT for up to 36 months after graduation.

Goals

• To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
• To preserve and develop knowledge for the profession through research and practice.
• To share knowledge locally and internationally through community service.
• To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

Student Learning Outcomes

• Students will demonstrate the ability to develop knowledge for the profession through research and practice.
• Students will demonstrate clear reasoning with organized presentation of evidence, assumptions, and conclusions.
• Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.
• Students will demonstrate the ability to read, write, speak and listen effectively.
Master of Urban Design

Overview

The Master in Urban Design, is a three (optional four) 36 credit semester program that provides students with a design experience investigating the guiding principles for building regions, cities and communities. The degree is STEM-designated which allows international students to apply for OPT for up to 36 months after graduation.

Guided by imperatives of sustainability and resilience, the program conceptualizes cities as an extension of the ecological transect across the natural to human habitat, providing students with a range of experiences from rural to urban.

Program Director Elizabeth Plater-Zyberk, recognized for her foundational role in the development of the movement called the New Urbanism, leads the program that invites students to explore design, policy and management tools for place-making as a vehicle for improving quality of life in a variety of urban settings. The impact of the built environment on health, retrofitting the suburban landscape, real estate development as community building, adaptation to climate change, and urban growth and revitalization, are topics prominent in course offerings and faculty research.

The three-semester curriculum begins in the fall each year with foundation courses in urban design and real estate development, in an Interdisciplinary approach structured by environmental, social and economic goals. The spring semester intensifies students’ engagement with contemporary urban challenges such as climate resilience, healthy community design, and repair of suburban sprawl. The summer semester provides a concluding experience that aggregates prior topics in an international setting that challenges goals of sustainability and resource conservation. As part of the curriculum, students participate in the National Charrette Institute certification course, a training in public outreach and participatory planning, and collaborate with real estate development students in two special projects: a national design and development competition, and a local community revitalization plan. These experiences and the course work shared with the Master of Real Estate Development and Urbanism program provide a focus on implementation. The optional fourth semester of the Master of Urban Design program is a semester-long independent study design project or thesis. In recent years these have focused on topics such as greening a Brazilian City, socially integrated public housing in China, and an analysis of principles and metrics of Smart Cities and New Urbanism.

Other resources that enrich the urban design student’s experience in the School include the Center for Community and Urban Design (CUCD), engaging students in community outreach projects in South Florida and The Caribbean, and the Archive of the New Urbanism, housed in the School of Architecture Library. The Archive is a growing resource of documents, with both texts and images that support research related to urban design. Also, Research Affiliates from around the world join the faculty annually to study the state-of-the-art in urban design and architecture.

Guiding the ever evolving program are faculty members Charles Bohl, Jaime Correa, Eric Firley, Jean Francois Lejeune, Victor Deupi and Joanna Lombard, internationally recognized in research, publication and design.

While the Master of Urban Design is a post-professional program, structured for students with a professional degree in architecture, those holding a degree in engineering, planning or landscape architecture may apply for admission. A preparatory summer course may be required for non-architects, to be determined by the admission process.

History of Program

Urban Design offerings at the School of Architecture emerged in the 1980’s when a group of faculty members sought to have an impact on the urban growth of South Florida. The impetus was their study of Coral Gables, a Progressive Era new town, one of a series of Anglo-American Suburbs that can be found across the United States. George Merrick founded Coral Gables in 1923. He believed that for his city to be great it needed a university, and he set aside land for the University of Miami. The architects Merrick engaged in the building of Coral Gables founded the architecture program at the outset. Today, building on his legacy, the School of Architecture is renown for its dedication to preparing future professionals with an understanding of the larger context for their work in the environment and society.

In 1988, mentored by their city and their studies of its design, and by leading thinkers of the time such as Leon and Rob Krier, the faculty established a post-professional degree in urban design. The young faculty’s design of Seaside, now an icon of new community design, challenged the planning and development conventions of its day. The new masters program established the precepts of Traditional Neighborhood Development (TND) and of the Charter for the New Urbanism. The School’s faculty and alumni are among the founders of the Congress for the New Urbanism, and have been prominent contributors to the evolution of the movement, now a globally renowned approach to sustainable urban growth and revitalization.

**Goals**
To prepare students for professional leadership and lifelong learning in architecture, urbanism, and related fields.
To preserve and develop knowledge for the profession through research and practice.
To share knowledge locally and internationally through community service.
To promote building and community design goals of environmental responsibility, social equity, and economic sustainability.

Student Learning Outcomes

Students will demonstrate the Ability to effectively use basic architectural and environmental principles in design.
Students will demonstrate the ability to raise clear and precise questions, use abstract ideas to interpret information, consider diverse points of view, reach well-reasoned conclusions, and test alternative outcomes against relevant criteria and standards.
Students will demonstrate the ability to read, write, speak and listen effectively.

Other
The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available here (https://www.as.miami.edu/_assets/pdf/krilof-graduate-student-travel-scholarship-form-2019.pdf) and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services.

Anthropology
anthropology.as.miami.edu

The University of Miami offers a Master of Arts degree in the Professional Practice in Anthropology. The program will provide an academic foundation of best practices, current theory, grantsmanship, government regulations, and ethical standards of working with living peoples, dynamic cultural systems, and cultural heritage materials within the U.S. and abroad. It is designed to prepare graduates for careers in the private sector, government and nongovernmental organizations, nonprofit organizations, and education, including medical and research settings.

Students in these programs are expected to design their mandatory field/research experience in concert with a faculty advisor and external site supervisor as a means of acquiring practical experience in workplace setting. These students will present a professional paper, submit a grant proposal, and/or produce a manuscript for publication as part of the requirements for graduation. They may elect to pursue a degree with or without a written thesis. A total of 36 semester credit hours of graduate coursework (600-level or above) is required to complete the degree.

Master's Program in Anthropology

- Master of Arts in Anthropology (p. 1643)

**APY 601. Advanced Seminar in Archaeology, Theory and Practice. 3 Credit Hours.**
History and theoretical foundation of modern archaeology; ethics, professional standards, and best practices in archaeology; cultural heritage management with special emphasis on NAGPRA; compliance with Secretary of the Interior standards, Section 106 regulatory knowledge and skills for compliance with government regulations, and current topical literature on archaeology.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**APY 602. Advanced Seminar in Cultural Anthropology. 3 Credit Hours.**
The application of the anthropological perspective, data collection and analyses methods, and theoretical foundations of traditional cultural anthropology to understanding and working on solving human problems in the modern world. Topics include the design, conduct, and application of modern ethnological methods to research venues in business, governmental/NGO agencies, conflict studies, natural disasters, medical, globalization and financial organizations.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**APY 603. Advanced Seminar in Biological Anthropology. 3 Credit Hours.**
The historical and theoretical foundations of modern biological anthropology. Topics include ethics and standards for human subjects; applied bioarchaeology, biological anthropology in medical/legal settings, primatology, Human biology and adaptive diversity, modern perspectives on race, and skeletal biology of modern peoples. The development of professional research and writing skills for the discipline is integral to course goals.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

**APY 604. Advanced Seminar in Linguistic Anthropology. 3 Credit Hours.**
Core aspects of linguistics theory, and consider the ways in which modern linguistic techniques can be applied in the investigation of both common and uncommon typological patterns in the world’s 7000+ languages. Requisite: Graduate Status or Permission of Instructor. Requisite: Graduate Status or Permission of Instructor. Typically Offered: Fall & Spring.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
APY 605. Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 611. Methods of Anthropological Research. 3-6 Credit Hours.
Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 612. Advanced Medical Anthropology. 3 Credit Hours.
Applications of theories and methods of medical anthropology to problems in human health and disease.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 615. Advanced Museum Internship. 3 Credit Hours.
Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 616. Advanced Workshop in Anthropology. 3-6 Credit Hours.
This course is designed for graduate students to participate in special topics in Anthropology and related fields.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 628. Advanced Graduate Seminar. 3 Credit Hours.
Specialized topics in Anthropology to involve students into current research specializations.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 690. Teaching Practicum in Anthropology. 3 Credit Hours.
Logistics and pedagogical issues of teaching anthropology, including skill set and materials suitable for employment in settings for which the master’s is the required, e.g., two-year schools. The student will evaluate texts, create teaching materials for a given subfield, master commonly-available electronic teaching and learning tools, and teach one class as directed.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 696. Advanced & Graduate Colloquy in Black Feminist Theory and Praxis: Major of 7 Black Feminist Thinkers. 3 Credit Hours.
Black feminist theory, produced primarily by Black women scholars, artist and activists, throughout the diaspora, constitutes a distinctive and influential body of politics and thought. Black feminist’s unwarranted interventions in Black politics arts and letters – produced at the interstices of violence, silence, invisibility, or forgetting – exposes and makes available a wider horizon of possibilities than had been proposed before its emergence. The central theoretical innovation of this praxis (later claimed by theorists of various stripes), is the multiple-‘interlocking’, ‘intersectional’, ‘compound’ – constitution of “identity” oppression, aesthetic sensibilities, for example, and therefore of roads toward freedom. This distinctive body of work is not only interdisciplinary, multilingual, but also constitutive to specific geographies, politics, experiences, and particular intellectual and political streams.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

APY 699. Directed Reading in Anthropology. 3-6 Credit Hours.
Supervised readings on special topics in Anthropology, allowing the student to work independently with an Anthropology professor, conducting research on a topic of both of their choosing.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
APY 702. Field Studies in Anthropology. 3-6 Credit Hours.
Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 805. Graduate Internship: Professional Practice of Anthropology. 1-9 Credit Hours.
An internship designed to provide valuable career-related work experience in a real-world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid. This course may be repeated.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

APY 810. Master's Degree Thesis Preparation and Writing. 1-9 Credit Hours.
Preparation/completion of a written thesis for the master's degree when the student has completed the thesis research, is engaged in writing the thesis, and expects to use the facilities and resources of the Anthropology department and the university; enrollment is required when the completed thesis is defended and approved. This course may be repeated
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

M.A. in Anthropology
http://www.as.miami.edu/anthropology/

Overview
The Department of Anthropology offers a Master of Arts degree in the Professional Practice of Anthropology. The program offers students the opportunity to specialize in one of three areas:

Applied archaeology
Cultural heritage management (cultural resource management), including museum management for archaeological collections, graduates will be in compliance with regulations and requirements from the U.S. Secretary of the Interior.

Applied biological anthropology
Analysis and identification of human remains; museum management of human skeletal/dental remains; applied primatology.

Applied cultural anthropology
Medical anthropology, anthropology in public health and allied fields, and applied ethnography for industrial/private/government sectors.

Degree Requirements
The aim of the curriculum is to give graduates the skill sets needed to design, conduct, and analyze anthropological fieldwork for their employers or as a component of independent research-driven careers. Graduate students have two degree options. Both thesis and non-thesis options require a minimum of 36 credits beyond the baccalaureate degree and 18 months in residency.

Basic Coursework, Common to Both Options
1. Two of the four core graduate seminars in professional practice and theoretical foundations (total of 6 credits);
2. At least one course in anthropological research methods (3-9 credits);
3. At least one course in anthropological field studies, potentially fulfilled via internship (3-9 credits).

Option 1 - Thesis
Requires a written thesis with an open defense guided by an advisor and committee chosen in consultation with the anthropology faculty. The committee for the thesis must include at least three faculty members, including one from outside anthropology. A minimum of 18 months in residency is also required for this option. Thesis requirements will conform to the University of Miami's standards and format.

Option 2 - Non-Thesis
Requires 9 credits of elective coursework within anthropology and a paper for presentation at a conference and/or for publication in a professional venue.
GIS Certification, available for both options
In cooperation with the Department of Geography and Regional Studies, students may obtain a GIS certificate by completing a specific 12-credit sequence in the Department of Geography and Regional Studies. (This will entail 3 credits beyond the normal required non-anthropology coursework.)

Academic Standing
Graduate students are expected to maintain an overall GPA of 3.0.

For more information, please consult the Department of Anthropology web site: http://www.as.miami.edu/anthropology/

For inquiries regarding graduate school policies, please consult: https://www.grad.miami.edu/

Admission Requirements
All applicants will be selected for admission based on:

Transcripts
1. Official copy of undergraduate transcripts showing the date the bachelor’s degree was awarded.
2. Transcripts must show a 3.0 GPA in anthropology and no less than 3.0 for the overall GPA.
3. Students with lower averages may be admitted provisionally with higher than minimum GRE scores and supporting materials from referees on a case-by-case basis.

Personal Statement
1. A personal statement in which the applicant details reasons for pursuing an MA in our program specifically.
2. A cogent written statement will be used in evaluating the applicants’ ability for written expression, as well as their fit with our strengths and offerings.

GRE (optional)
1. While there is no GRE requirement, students can submit GRE scores if they choose.

Part Time Admission
Returning students or practicing professional anthropologists who seek continuing education to better their skill set while enhancing their opportunities for advancement in the field may apply. Nondegree-seeking students and/or part time students will be considered by the Admissions Committee on a case-by-case basis.

### Mission

**Goals**

It is the goal of this program and our department to produce professional Anthropologists with the highest caliber skill set and tools for critical thinking, problem solving, and written and oral communication skills for persons in the discipline and with nonspecialists in other settings.

### Student Learning Outcomes

- The student will demonstrate advanced knowledge and theoretical foundation in any of the four subfields of anthropology.
- The students will demonstrate professional communication skills (written and oral) in their subfield or discipline.
- The student will develop a set of teaching materials in anthropology (optional).

### Art and Art History

art.as.miami.edu

### Degree Programs

The Department of Art and Art History currently offers a Master of Fine Arts degree in the professional practice of studio art.

- The Master of Fine Arts can be completed in the following studio areas:
  - Ceramics
  - Digital Imaging-Illustration/Photography
  - Painting
  - Printmaking
  - Sculpture

### Master of Fine Arts

**M.F.A. in Studio Art:**

The M.F.A. in Studio Art is designed for personal development and career success in both traditional and conceptual-based practice. The Master of Fine Arts degree in the professional practice of studio art is a three-year program that offers students the opportunity to specialize in five concentrations: 1) Ceramics; 2) Digital Imaging-Illustration/Photography; 3) Painting; 4) Printmaking; and 5) Sculpture.

**Admission Requirements:**

Applicants for the program will be selected for admission based on submission of the following materials and standards by the application deadline:
1. Official copy of undergraduate transcripts showing the date the B.A. /B.S. /B.F.A. degree was awarded. [Transcripts must show no less than 3.0 for the overall G.P.A.] Transcripts need to be mailed directly to the department.
2. A personal statement of interest in the M.F.A in Studio Art program at the University of Miami.
3. A portfolio of digital images of personal artwork, not to exceed 20 images. [Portfolios are currently uploaded via the Acceptd site; please visit the department’s website for details.]
4. Three letters of recommendation.
5. A minimum TOEFL score of 80 (for international students only).
6. It is highly recommended that applicants have advanced coursework in the area they wish to study, as well as related professional and/or exhibition experience.

Academic Standing:

Graduate students are expected to maintain an overall G.P.A. of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified, and will work with his/her faculty adviser to rectify the performance problems. If the student has a second consecutive semester with an average G.P.A. below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her adviser in accordance with guidelines for the University’s Graduate School.

Masters Program in Art and Art History

• M.F.A. in Studio Art (p. 1651)

ART 502. Advanced Painting IV. 1-6 Credit Hours.
Continuation of ART 501.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 602. Advanced Painting ix. 1-6 Credit Hours.
Continuation of ART 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 603. Problems in Studio Art. 1-6 Credit Hours.
Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 604. Seminar in Studio Art. 3 Credit Hours.
Special topics in selected area of studio art.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ART 606. Special Topics in Studio Art for Graduate Students. 3 Credit Hours.
Course devoted to exploring new topics in studio art practice and theory, including media specific and/or inter-disciplinary approaches. Course content to be determined by Instructor.
Components: STU.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 609. Independent Study in Other Media. 1-6 Credit Hours.
Course content decided between student and professor. Independent study course may be repeated.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 630. Graduate Digital Photography I. 1-6 Credit Hours.
Advance Digital Photography Course: Content decided between student and professor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 631. Graduate Digital Photography II. 1-6 Credit Hours.
Advance Digital Course: Content decided between student and professor. Lecture Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 632. Graduate Independent Study in Photography. 1-6 Credit Hours.
Independent Study in Photography: Content decided between student and professor. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 633. Graduate Digital Photography III. 1-6 Credit Hours.
Content decided in conference between candidate and instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 634. Graduate Digital Photography IV. 1-6 Credit Hours.
Continuation of ART 610. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 641. Graduate Painting I. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 642. Graduate Painting II. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 643. Graduate Painting III. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 644. Graduate Painting IV. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 645. Graduate Painting V. 1-6 Credit Hours.
Self-directed study in consultation with instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 646. Advanced Painting VIII. 1-6 Credit Hours.
Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor. Requisite: Graduate Standing. Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 651. Intaglio/Relief. 1-6 Credit Hours.
Advanced intaglio/relief processes: course requirements decided between candidate and professor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 652. Lithography. 1-6 Credit Hours.
Advanced lithography. Course requirements decided between candidate and professor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 653. Silkscreen. 1-6 Credit Hours.
Advanced work in silkscreen.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 655. Topics in Printmaking. 1-6 Credit Hours.
Current readings and/or technical concerns not covered in the regular curriculum.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 663. Portfolio/Business of Design. 3 Credit Hours.
Individually supervised graphic design portfolio. Professional practices in design.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 664. Special Projects/Multimedia/Portfolio. 1-6 Credit Hours.
Video Art, print design, illustration or multimedia portfolio preparation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ART 665. Graphic Design. 3 Credit Hours.
Advanced graduate projects in graphic design.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 666. Multimedia. 3 Credit Hours.
Advanced graduate projects in multimedia.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 667. Experimental Illustration for Print and Interactive Media. 3 Credit Hours.
Exploration and innovation of contemporary illustration and digital publishing. Research and practice of new styles of international illustration for print and interactive media.
Prerequisite: ART 663 or ART 665.
Components: STU.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 671. Graduate Sculpture I. 1-6 Credit Hours.
Examination of ongoing work in relationship to historical and contemporary interpretations issues.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 672. Graduate Sculpture II. 1-6 Credit Hours.
Continuation of ART 671. Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 673. Graduate Sculpture III. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 674. Graduate Sculpture IV. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 675. Graduate Sculpture V. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 676. Graduate Sculpture VI. 1-6 Credit Hours.
Content decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 681. Writing About Art. 3 Credit Hours.
Writing about art on a professional level.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ART 682. Contemporary Ceramic Art I. 1-6 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 683. Contemporary Ceramic Art II. 1-6 Credit Hours.
Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 684. Contemporary Ceramics Art III. 1-6 Credit Hours.
Content to be decided in conference between candidate and instructor.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
ART 685. Contemporary Ceramics Art IV. 1-6 Credit Hours.
Continuation of ART 661.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 686. Contemporary Ceramic Art V. 1-6 Credit Hours.
Continuation of ART 685: Contemporary Ceramic ART IV
Prerequisite: ART 685.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 687. Contemporary Ceramic Art VI. 1-6 Credit Hours.
Continuation of ART 686: Contemporary Ceramic Art V
Prerequisite: ART 686.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 688. Independent Study in Ceramics/Glass. 1-6 Credit Hours.
Theory, history and practice of Video Art and contemporary documentary film and their various manifestations. Creation of conceptual videos for exhibition, web and interactive media.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 689. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.
Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 693. Seminar in Professional Practices. 1-6 Credit Hours.
Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 699. Exhibition Preparation. 3 Credit Hours.
A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 810 Thesis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ART 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ART 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ART 810 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

**Mission**

The Art Department is dedicated to the promotion of excellence in the visual arts by encouraging originality, discovery, creativity, and critical inquiry. The department provides an educationally diverse environment where students can acquire the critical perspectives, historical knowledge, and technical skills that will prepare them for a variety of professional careers in the arts.

**Goals**

Students will acquire the skills needed for careers as practicing artists who can successfully interact with galleries and museums, write grants, attend residencies, sell works of art, and manage expenses and income.

**Student Learning Outcomes**

- Students will be able to produce creative, original and quality artwork suited for exhibition.
- Students will develop an in-depth understanding of the history of art and both traditional and contemporary aesthetic positions.
- Students will develop their written communication skills.

**Biology**

biology.as.miami.edu

Dept. Code: BIL

**Degree Programs**

**Application for Admission**

Applications are due December 1.

In applying for admission, applicants must select either the Master’s or the Ph.D. track.

Students with an appropriate B.S. degree or B.A. may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master’s track, but wish to change to a Ph.D. track without completing the Master’s may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
   a. Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)
   b. Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; (photocopies of scores are not accepted)
c. International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) official scores (photocopies of scores are not accepted).

3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu):
   a. A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor.
   b. Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)

4. Letters of recommendation from three science instructors/supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at bio.gradcoord@miami.edu.

5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu). Applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor.

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

*Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.*

**Degree Requirements**

All students are required to satisfy the **general requirements** for the appropriate degree that are listed in the **Graduate Studies Bulletin**, whether or not they are listed among the Biology requirements.

**Implementation**

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student’s progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
   a. Student making satisfactory progress
   b. Student not making satisfactory progress; recommendations for improvement
   c. Student not making satisfactory progress; his/her tenure terminated.

**Financial Support**

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master’s degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

**Masters Programs in Biology**

- M.S. in Biology with Thesis (Three Year Program) (p. 1664)
- M.S. in Biology without Thesis (Two Year Program) (p. 1670)
- B.S./M.S. in Biology (p. 1659)

**Doctoral Program in Biology**

- Ph.D. in Biology (p. 1671)
BIL 608. Research in Progress Seminar. 1 Credit Hour.
Through weekly research seminar presentations, students will explore current research by Biology Department graduate students, postdoctoral fellows, and faculty. Current students will also prepare and present a research seminar on their past, present, or future research objectives for feedback from fellow students and faculty.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

BIL 610. Lab Group Meeting. 1 Credit Hour.
Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Fall semesters)
Components: DIS.
Grading: GRD.
Typically Offered: Fall.

BIL 611. Lab Group Meeting. 1 Credit Hour.
Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Spring semesters)
Components: DIS.
Grading: SUS.
Typically Offered: Spring.

BIL 612. Graduate Core I. 3 Credit Hours.
Foundations of genome structure and how the information encoded in genomes is regulated by intrinsic and extrinsic factors during development and evolution. Major topics include genome structure, gene regulation, cells, development, physiology and EvoDevo.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 613. Graduate Core II. 3 Credit Hours.
Foundations of key ecological and evolutionary theory. Major topics in Ecology include population, community, physiological and ecosystem ecology. Major topics in Evolution include principles of natural selection, speciation, biodiversity, population genetics, neutral theory, molecular evolution, phylogenetics, and systematics.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BIL 614. Professional Writing and Grantsmanship. 3 Credit Hours.
Elements of argumentative writing, reader-oriented writing strategies, fundability of submitted grants, and techniques for mastering presentation venues such as posters and talks.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 615. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.
Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Course includes introductions to cellular automatons and models based on social and behavioral networks. No prior programming experience required.
Prerequisite: At least one BIL course at the 200 level.
Components: LEC.
Grading: GRD.

BIL 616. Professional Skills I. 1 Credit Hour.
Training and development in the skills necessary to become an accomplished professional scientist. Instruction on preparation, submission, and review of manuscripts; viewing and attending poster sessions; presenting scientific talks; communicating effectively with colleagues, lab partners, and the student's principal investigator.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
BIL 618. Advanced Biostatistics. 4 Credit Hours.
This course will provide an overview of statistical analyses needed to understand, present, and publish biological research. Examples will primarily be drawn from the biomedical and ecological fields. The course will begin with a review of descriptive statistics, probability theory, and univariate distributions, followed by an overview of experimental design and analysis of categorical data using contingency tables. This will be followed by a unit on parametric analysis of univariate data including both simple and multiple linear regression, model selection, and analysis of variance. The final unit will cover non-parametric versions of these analyses and more advanced multivariate statistical methods. Lectures will be accompanied by a computer lab in which students learn hands-on statistical analysis in SAS JMP.
Requisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 620. Evolution. 3 Credit Hours.
Evidence for evolution; microevolution including natural selection, kin selection, genetic drift, gene flow, mutation, and evolutionary game theory; macroevolution including speciation, adaptation, phylogenetics, origin of life, and extinction.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BIL 621. Phylogenetics. 3 Credit Hours.
Concepts and methods in phylogenetic systematics. The importance of phylogenetic trees in biology. Use of phylogenies in taxonomy, trait evolution (including homology, adaptations and key innovations), biogeography, speciation, diversification rates, molecular evolution, molecular clocks, and gene duplication.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 622. Plant Diversity. 3 Credit Hours.
The diversity and evolution of seed plants, the most important plants on land that shape our physical environment, affect climate, and provide humans with food, medicines, and materials important in all aspects of our lives. Survey of major lineages of Gymnosperms and Angiosperms, their evolutionary history, adaptations to life on land, reproductive biology, ecology, and economic benefits. Techniques for the collection of plant specimens from the field, and their preparation and identification for museum collections.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 623. Advanced Biology of Marine Invertebrates. 4 Credit Hours.
Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 625. Advanced Herpetology. 4 Credit Hours.
Biology of reptiles and amphibians. Their evolutionary history, a description of their current diversity, and how this diversity is distributed geographically. Physiology, including thermoregulation, reproduction, locomotion, and feeding. Spatial ecology, communication, sexual selection, predation, and community assembly. Local field component will include an independent research project addressing a herpetological question.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 630. Population and Community Ecology: Theory. 3 Credit Hours.
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 631. Advanced Field Ecology. 5 Credit Hours.
Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 632. Population and Community Ecology: Theory II. 3 Credit Hours.
Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 633. Conservation Biology. 3 Credit Hours.
Challenges facing conservation practitioners and the toolkit that has been developed to face them. Distribution and value of biodiversity, threats to biodiversity, and methods that have been developed to face these threats at both species and landscape levels. Government implementation of conservation strategies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 634. Stable Isotope Ecology. 3 Credit Hours.
Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 635. Molecular Ecology. 3 Credit Hours.
Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 636. Tropical Biology: An Ecological Approach. 8 Credit Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies. Lecture, laboratory, and fieldwork.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 637. Ecologia de Poblaciones. 7 Credit Hours.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 638. Tropical Managed Ecosystems. 8 Credit Hours.
Application of ecological principles to problems in agriculture, forestry, conservation and natural resource management in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 639. Ecosystem Ecology. 3 Credit Hours.
Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 641. Animal Behavior. 3 Credit Hours.
Amazing behaviors of animals from an evolutionary perspective, including how the diversity of behavior in nature is shaped by natural and sexual selection.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BIL 645. Developmental Biology. 3 Credit Hours.
A study of the process by which a fertilized egg gives rise to a multicellular organism with organs, tissues and cell types that are structurally and functionally distinct and are arranged in a characteristic three-dimensional body plan. This course will take a comparative approach using invertebrate and vertebrate models to cover the current understanding of the cellular, molecular and genetic mechanisms that regulate the development of animals. Evolutionary mechanisms and the biomedical relevance of developmental biology will be emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 649. Seminar in Behavior. 1 Credit Hour.
Discussion of current literature in animal behavior. This course may be repeated for credit.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

BIL 650. The Biology of Symbiosis. 3 Credit Hours.
Symbiosis, interactions between species that live in close physical association, in particular those between microbes and multicellular eukaryotic hosts is fundamental to almost all aspects of biology. Building discipline specific knowledge about symbiosis. The course includes engagement with the scientific literature as a professional researcher, and development of foundational skills for presentation and synthesis of scientific information in visual, oral and written form.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 651. Population Genetics and Genomics. 3 Credit Hours.
Population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., Drosophila), and non-model organisms.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 652. Bioinformatics Tools. 3 Credit Hours.
Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure-function analysis and various applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 653. Bioinformatics Algorithms. 3 Credit Hours.
The complexity of bioinformatics computations. Introduction to Perl and Bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor binding site recognition and motif finding, gene prediction, phylogeny, micro array analysis, RNA folding, gene design and synthesis.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 654. Electron Microscopy. 4 Credit Hours.
Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 655. Techniques in Scanning Electron Microscopy. 3 Credit Hours.
Tissue preparation, use of the scanning electron microscope (SEM), photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BIL 656. Ecological and Evolutionary Genomics. 3 Credit Hours.
The evolution of genomes, and the ecological interactions that drive their evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 661. High Altitude Biology and Medicine. 3 Credit Hours.
High altitude biology and medicine: Mechanisms of hypoxia resistance influencing the requirement to match oxygen supply and demand throughout
the oxygen cascade. Topics draw from genomics, integrated physiology, population genetics, biochemistry, gene expression, evolution, and alpine
medicine. Taxonomic examples from the literature will include humans, other mammals, birds, reptiles, amphibians, and fish.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 665. Evolution and Development. 3 Credit Hours.
Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 668. Evolution and development of Nervous Systems. 3 Credit Hours.
Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems
have resisted change while others have diverged dramatically during evolution.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 675. Advanced Study in Plant or Animal Sciences. 1-6 Credit Hours.
Content of course will vary by semester. Content in any semester will be expressed as course subtitle.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 678. Current Topics in Biological Research - DVP. 1 Credit Hour.
Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting
Professor program.
Components: SEM.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

BIL 680. Research Ethics. 0 Credit Hours.
principles of scientific integrity that forms an integral part of the proposed research training effort.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 689. Nonacademic Careers in Biology. 2 Credit Hours.
Speakers recruited from local biotech companies, conservation organizations, science museums, the National Park Service and Customs as well as
invasive species specialists, medical dosimetrists, principals of schools seeking biology teachers, and others will give weekly seminars about their
practice of science in their occupations. Following each seminar, students will meet with speakers in an informal setting to discuss the particulars and
or prospects of the career in question. The express purpose of this course is to provide students with an idea of the utility of their biology degree in the
workplace. Papers or writings that pertain to a particular career will be assigned prior to the seminar so that students will be ready with questions for
the speaker.
Prerequisite: BIL 200 or Higher.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BIL 810. Master's Thesis. 1-6 Credit Hours.
The student working on their Master's thesis enrolls for credit, in most departments not to exceed six, as determined by the student's advisor. May be
regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
BIL 820. Research in Residence - Master’s Thesis. 1 Credit Hour.
Used to establish research in residence for the thesis for the Master’s degree after the student has enrolled for the permissible cumulative total in BIL810 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BIL 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL830 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BIL 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by their advisor. Not more than 12 credits of BIL840 may be taken in a regular semester, nor more than six credits in a summer session. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BIL 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

B.S./M.S. in Biology
Overview
The 5-year BS/MS degree in the Department of Biology is designed for students who are engaged in research and considering a career in biological sciences. Over the course of their senior year, plus one additional year of graduate study, students in the program will take graduate level courses, conduct independent research, and write a Masters of Science thesis.

The first step in this process is for the student and a faculty member to agree on a suitable research project. Students should consider talking with several faculty members to discuss possible projects before settling on a research topic. The Director of the Biology BS/MS program can assist the student in finding a participating faculty mentor in Biology. For at least two semesters of their undergraduate studies, the student must have enough time in their schedule to devote to research <BIL 495, BIL 496, BIL 497>. This is the equivalent of a 2-credit laboratory (6 hours per week), but if the student is enthusiastic about his/her project, he/she will want to spend more time on it than that. Applications to the program are evaluated at the end of the Junior year, so the student should begin research in his/her Sophomore year.

In addition to the requirements for the Bachelor of Science, a student must complete specific courses/seminars, as listed under Curriculum Requirements in preparation for their year of graduate study.

Timeline:

Freshman/Sophomore/Junior year: Find a research mentor, register with the Office of Undergraduate Research and begin your research project. Enroll in Projects in Biology <BIL 495, BIL 496, BIL 497>. Notify the Program Director of your intent.

Junior year: Apply to the program in the fall semester. Continue your research project.

Senior year: Complete the requirements for the B.S. and take one 3 credit Masters-level course each semester. Attend the Biology Departmental Seminar. Present your research findings at the Research, Creativity and Innovation Forum in the spring semester.

Masters year: Take 12-15 credits of Masters coursework each semester. Finish your lab research, write and defend your thesis.

Select one of the following three Options for upper level required biology core courses:

**Option One:** This option is recommended for students interested in medical school, other health sciences, cell, molecular and developmental biology.

- BIL 250 Genetics
- BIL 255 Cellular and Molecular Biology
- BIL 360 Comparative Physiology
- BIL 330 Ecology
- or BIL 320 Evolutionary Biology

**Option Two:** This option is recommended for students interested in ecology, evolution, biodiversity and conservation.

- BIL 250 Genetics
- BIL 320 Evolutionary Biology
- BIL 330 Ecology
- or BIL 360 Comparative Physiology

**Option Three:**

- BIL 250 Genetics
- BIL 255 Cellular and Molecular Biology
- BIL 360 Comparative Physiology

**Additional BIL electives**

- 12

At least one BIL elective must be a CAPSTONE course. (Locate capstone courses in Class Search under "Additional Search Criteria", subheading "Class Attributes").

At least four credit hours of the following must be taken for the B.S./M.S. in Biology program. A maximum of six credit hours may be applied as electives towards the B.S. in Biology.

- BIL 495 Projects in Biology
- BIL 496 Projects in Biology
- BIL 497 Projects in Biology

Two biology laboratory or field courses beyond <BIL 151 or BIL 153> and <BIL 161 or BIL 163> are required as part of the additional BIL electives. An approved laboratory/field course at the 300 level or higher in departments other than Biology (e.g., BMB, MIC, MSC, NEU) can be counted as one of the two required lab courses. Projects in Biology <BIL 495, BIL 496 or BIL 497> may be counted as one of the two required lab courses. Check with the Department of Biology to confirm that a specific course is allowed to fulfill this requirement.

At least six credit hours of graduate courses in Biology (BIL 600-level) must be taken in the Senior year.

Up to eight credit hours toward the major may be selected from courses with a biological topic and numbered 300 or higher in MBE, MES, MSC, or OCE.

A maximum of two credit hours of the following may be applied towards the major

- BIL 371 Readings in Biology
- BIL 372 Readings in Biology

A maximum of three total credit hours from the following courses may be applied towards the major. Any course in this list may be taken only once to count towards the major. However, these courses may be taken additional times for general elective credit only.

- BIL 281 Undergraduate Learning Internship in Biology
- BIL 381 Workshop Leaders in Biology I
- BIL 382 Workshop Leaders in Biology II
- BIL 481 Undergraduate Teaching Assistant Training in Biology
- BIL 482 PRISM Teaching Fellow

**Chemistry**

Three semesters (16 credits) of chemistry are required for the biology major.

</tr>
</tbody>
</table>

**Minor in a Natural Science** \(^1-16\)

A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology

Total credit hours for the minor will vary by department.

The CHM requirement for the BS in biology fulfills either 12 or 15 (depending on which option is selected) of the 16 credits necessary for the minor in Chemistry. To complete the minor in Chemistry, only 1-4 additional credits in CHM are required beyond those necessary for the BS in Biology.

**Additional Required Courses**

Overview

The Department of Biology aims to train graduate students in integrative research, with a curriculum that exposes students to the major sub-disciplines of biology and a program that allows enough flexibility to develop interdisciplinary work. Our major strengths include developmental biology, global change biology, neuroscience, and species interactions.

Application for Admission

Applications are due December 1.

In applying for admission, applicants must select either the Master’s or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master’s track, but wish to change to a Ph.D. track without completing the Master’s may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
   a. Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)
   b. Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; (photocopies of scores are not accepted)
   c. International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu)
   a. A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
   b. Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
4. Letters of recommendation from three science instructors/ supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at bio.gradcoord@miami.edu
5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu). Applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

*Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.*

**Degree Requirements**

All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

**Implementation**

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student’s progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
   a. Student making satisfactory progress
   b. Student not making satisfactory progress; recommendations for improvement
   c. Student not making satisfactory progress; his/her tenure terminated.

**Financial Support**

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master’s degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
   a. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

**Curriculum Requirements**

**M.S. in Biology with Thesis (Three-Year Program)**

<table>
<thead>
<tr>

<td>6</td>
</tr>
<tr>
<td></td>
<td><strong>Total Credit Hours</strong></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

1. Credit hours: a total of 30 credit hours are required:
   - 24 course credit hours, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 24 course credit hours.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research - DVP</td>
<td>1</td>
</tr>
</tbody>
</table>

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
2. Research Proposal: public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

3. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.

4. Other requirements described under "The Master's Degree," including but not limited to:
   - a total of at least 30 credit hours (course credit hours plus research credit hours). The Graduate School and the Department concur in requiring at least 24 course credit hours and exactly 6 research credit hours (BIL 810) for a thesis M.S.
   - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 820) status until the degree is granted. This course carries 1 credit hour, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hour normally applies to this course.

5. About the committee:
   - A single committee will combine the responsibilities of the supervisory and thesis committees.
   - The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   - The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
   - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student's file and emailed to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu).

6. About the time table:
   - A written thesis proposal is due no later than the middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.
   - Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.
   - Defense of the thesis and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the sixth semester unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
   - The oral defense of the thesis must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
   - No student may receive the degree in the same semester in which she/he is admitted to candidacy.
   - The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
   - Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

7. Completed SACS evaluation forms are required at two points during the course of study. One following the research proposal defense and the final following defense of the thesis. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

   • At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
   • The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Passing a written comprehensive exam given by the committee.

3. About the committee:
   • A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   • The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
   • The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School.
   • Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student's file.

4. About the time table:
   • The comprehensive exam must be passed by the end of the fourth semester.
   • No student may receive the degree in the same semester in which she/he is admitted to candidacy.
   • The indicated dates form firm deadlines. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
   • Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

5. Completed SACS evaluation forms are required following the comprehensive exam. The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

**Suggested Plan of Study**

**Masters with Thesis Program Timeline - Including Program Requirements and Suggested Goals**

Disclaimer: This Masters with Thesis Program Timeline does not replace the "Procedures for Graduate Students in Biology".

**Semester 1:**

Requirements* (Suggested credits 9):

- Graduate Core I (3 credits)
- Take 6 additional credits
- Form Initial Committee
- Meet with Committee to plan first year of study.

Suggested Goals: (1) Sometime in your first year, start contributing to a project in your group that will yield co-authorship on an article in year 1 or 2. (2) Start your personal Endnote (or equivalent) library and start delving into the primary literature to inform your work. (3) Take Professional Skills Course.
Semester 2:
Requirements* (Suggested credits 9):

• Graduate Core II (3 credits)
• Take 6 additional credits
  • By the end of the first year you must have met your Committee.
  • A written thesis proposal is due no later than the end of the second semester.

Suggested Goals: (1) By the end of your first year, you should have completed the departmental Core course. (2) Establish 30 minutes per day dedicated to writing.

Semester 3:
Requirements* (Suggested credits 4):

• Research in Progress (1 credit)
• Take 3 additional credits
  • Meet with Committee.

Suggested Goals: Attend a local conference and present your proposed research at the Annual Biology Graduate Student Symposium.

Semester 4:
Requirements* (Suggested credits 4):

• Research in Progress (1 credit)
• Take 3 additional credits
  • Meet with Committee.

Suggested Goals: (1) By the end of the fourth semester you should have completed all of your required coursework including a graduate-level course in statistics. (2) Network to explore options for jobs after your Masters degree. (3) Set up summer internship. (4) Start to apply for positions after Masters.

Semester 5:
Requirements* (Suggested credits 3):

• Research in Progress (1 credit)
• Take 2 additional credits
  • Meet with Committee.

Suggested Goals: (1) Work with your mentor on completing a draft of your thesis. (2) Present your work at a national meeting. (3) Apply for positions after Masters.

Semester 6:
Requirements* (Suggested credits 1):

• Research in Progress (1 credit)
  • Analysis of data and a polished draft of the thesis should be completed and in the hands of the committee by the middle of this semester.
  • Publicly defend your Masters thesis.

Suggested Goals: (1) Set-up next stage of professional development.

Masters Program Timeline Notes:

1. The timeline for the suggested goals will vary some across labs and disciplines. The important things to capture from the list of suggested goals are (1) the importance of publishing, (2) the value of publishing early and steadily, and (3) the importance of building your professional network by attending and presenting your work at meetings. Use the suggested timeline to facilitate setting your professional goals and discussing your goals with your advisor and members of your committee.

2. Contributing to research projects outside your main research project can be a valuable way to gain lab/field skills and skills in data analysis, presentation and writing. Thus, it is suggested that sometime in your 1st year you should start contributing to a project in your group that will yield co-authorship on a publication in Year 1 or 2.

3. Because of the compressed timeline of the masters with thesis, meeting with your committee once each semester is a program requirement.
4. TOTAL CREDITS must at least 30 at time of graduation.
5. One credit of an 800-level course qualifies as full-time enrollment. Thus, in your final years, enrolling in one credit of BIL820 is sufficient.
6. Proposal and dissertation defenses must be advertised and scheduled at a time that does not conflict with departmental events including seminars, workshops and faculty meetings. Absolutely no defense should be scheduled to conflict with Monday Seminars (12:20-1:30), Wednesday Faculty Meetings (12:20-1:30), or to conflict with Friday Seminars (12:20-1:30; please note that scheduling defenses for presentation as part of the Friday Seminar Series is encouraged). Defenses must be scheduled during regular term times, consult your program requirements for details.

Department of Biology – University of Miami [April 10, 2020]

M.S. in Biology without Thesis (Two-Year Program)

Disclaimer: This Masters without Thesis Program Timeline does not replace the "Procedures for Graduate Students in Biology".

Semester 1:
Requirements* (Suggested credits 9):
• Graduate Core I (3 credits)
• Take 6 additional credits
• Meet with Committee to plan first year of study.

Suggested Goals: Take Professional Skills course.

Semester 2:
Requirements* (Suggested credits 9):
• Graduate Core II (3 credits)
• Take 6 additional credits
• Form Initial Committee.

Suggested Goals: (1) By the end of your first year, you should have completed the departmental Core course. (2) Consider taking a graduate-level statistics course. (3) Set up summer internship. (4) Explore career options for after Masters Degree.

Semester 3:
Requirements* (Suggested credits 9):
• Take 9 credits
• Meet with Committee.

Suggested Goals: Apply for positions after Masters.

Semester 4:
Requirements* (Suggested credits 3):
• Take 3 credits
• Complete Comprehensive exam
• By the end of the fourth semester you should have completed all of your required coursework including a graduate-level course in statistics.

Suggested Goals: Network to explore options for jobs after your Masters degree.

Coursework Masters without Thesis Program Timeline Notes:
1. The timeline for the suggested goals will vary some across labs and disciplines. The important things to capture from the list of suggested goals are (1) the importance of presentation skills, (2) the value of learning to write compelling arguments. Use the suggested timeline to facilitate setting your professional goals and discussing your goals with your advisor and members of your committee.
2. Because of the compressed timeline of the masters without thesis, meeting with your committee once each semester is a program requirement.
3. TOTAL CREDITS must at least 30 at time of graduation.

Department of Biology – University of Miami [April 10, 2020]
Mission
The purpose of the Biology M.S. program is to engender the knowledge of biological concepts as well as the critical thinking and presentation skills that are central to professional careers in teaching, laboratory employment and non-governmental organizations.

Student Learning Outcomes
• Students will demonstrate a deep knowledge of a biological area.
• Students will demonstrate the ability to critically evaluate peer-reviewed publications in Biology.
• Students will demonstrate the presentation skills necessary for presenting their work at professional meetings.

M.S. in Biology without Thesis (Two Year Program)

Curriculum Requirements
1. Credit hours:
• A total of 30 course credit hours are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 30 course credit hours:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research - DVP</td>
<td>1</td>
</tr>
</tbody>
</table>

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.
• The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Passing a written comprehensive exam given by the committee.

3. About the committee:
• A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
• The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student’s advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
• The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
• Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student’s file.

4. About the time table:
• The comprehensive exam must be passed by the end of the fourth semester.
• No student may receive the degree in the same semester in which she/he is admitted to candidacy.
• The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.
• Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time student status and recency of credit hour and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the proposed financial support.

5. Completed SACS evaluation forms are required following the comprehensive exam. The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Mission
The purpose of the Biology M.S. program is to engender the knowledge of biological concepts as well as the critical thinking and presentation skills that are central to professional careers in teaching, laboratory employment and non-governmental organizations.
Goals
Student Learning Outcomes
• Students will demonstrate a deep knowledge of a biological area.
• Students will demonstrate the ability to critically evaluate peer-reviewed publications in Biology.
• Students will demonstrate the presentation skills necessary for presenting their work at professional meetings.

Ph.D. in Biology
Overview
The Department of Biology aims to train graduate students in integrative research, with a curriculum that exposes students to the major sub-disciplines of biology and a program that allows enough flexibility to develop interdisciplinary work. Our major strengths include developmental biology, global change biology, neuroscience, and species interactions.

Application for Admission
Applications are due December 1.

In applying for admission, applicants must select either the Master’s or the Ph.D. track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master’s track, but wish to change to a Ph.D. track without completing the Master’s may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant’s file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master’s track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:
2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
   a. Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)
   b. Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; (photocopies of scores are not accepted)
   c. International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu)
   a. A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
   b. Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
4. Letters of recommendation from three science instructors/ supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at bio.gradcoord@miami.edu
5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (bio.gradcoord@miami.edu). Applicants MUST secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.

Degree Requirements
All students are required to satisfy the general requirements for the appropriate degree that are listed in the Graduate Studies Bulletin, whether or not they are listed among the Biology requirements.

Implementation
All Graduate students will be reviewed each spring semester by GAAC.
1. The advisor will review the student’s progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
   a. Student making satisfactory progress
   b. Student not making satisfactory progress; recommendations for improvement
   c. Student not making satisfactory progress; his/her tenure terminated.

**Financial Support**

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master’s degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

**Curriculum Requirements**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 612</td>
<td>Graduate Core I</td>
<td>3</td>
</tr>
<tr>
<td>BIL 613</td>
<td>Graduate Core II</td>
<td>3</td>
</tr>
<tr>
<td>BIL 618</td>
<td>Advanced Biostatistics</td>
<td>4</td>
</tr>
<tr>
<td>BIL Courses</td>
<td></td>
<td>38</td>
</tr>
<tr>
<td>BIL 830</td>
<td>Doctoral Dissertation</td>
<td>12</td>
</tr>
<tr>
<td>or BIL 840</td>
<td>Post-Candidacy Doctoral Dissertation</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Total Credit Hours</td>
<td>60</td>
</tr>
</tbody>
</table>

1. Credit hours: a total of 60 credit hours (including both course and research credit hours) beyond the Bachelor’s degree are required:
   • At least 18 course credit hours that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics (BIL 618). The independent study series is:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIL 675</td>
<td>Advanced Study in Plant or Animal Sciences</td>
<td>1-6</td>
</tr>
<tr>
<td>BIL 678</td>
<td>Current Topics in Biological Research - DVP</td>
<td>1</td>
</tr>
</tbody>
</table>

At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

   • At least 12 research credit hours (BIL 830 and/or BIL 840). Once the overall number of required credit hours (see below #8) has been reached, there is no need to take additional research credit hours.

   • An additional 30 credit hours from any combination of graduate courses (600 level regular courses and independent study courses) and research credit hours (800 level) to bring the total number of credit hours beyond the Bachelor’s Degree to 60 credit hours. (One example: 18 required course credit hours + 12 required research credit hours + 15 additional course credit hours + 15 additional research credit hours = 60 total; another example would be 18 additional course credit hours and only 12 additional dissertation credit hours, etc.)

   • Students who already have a Master’s Degree in the same field may not need as many course credit hours (consult Graduate School rules on transfer credit hours), but at least 24 credit hours must be taken in residence at UM.

   • The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.

   • The minimum acceptable grade average in all coursework towards the degree is a “B (3.0)” and no grade may be below a “C.”

   • CONCEPTUAL AREAS: Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the 620’s series); ECOLOGY (graduate level ecology courses are in the 630’s series), BEHAVIOR (graduate level behavior courses are in the 640’s series); GENETICS AND MOLECULAR BIOLOGY (graduate level
2. Comprehensive qualifying exam should be passed by the end of the third semester.

The qualifying examination has two components:

(I) Comprehensive Component

(II) Specialty Component

The Graduate Core will serve as the comprehensive component of the qualifying exam. The minimum acceptable grade in each of Graduate Core I and Graduate Core II is a “B” (3.0). Students who fail to achieve a B average across the two Graduate Core classes will be considered to have failed the comprehensive component of the qualifying exam. Students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

Final letter grades will use the University of Miami standard quality points:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>

<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

In the event that a student fails the comprehensive component of the qualifying exam, the student will be given the opportunity in the following academic year to retake any Graduate Core class in which they failed to achieve the minimum grade of a B. It is only necessary to retake a class if a student earned less than a B in that class (i.e. if students earn less than a B in only one of the two classes, it is not necessary for them to retake both classes in the sequence). All students retaking classes must have completed their retakes by the end of their fourth semester. Each retake grade will replace a student’s original grade for that part of the Graduate Core. Following the retakes, students who earn As (4.0) in both Graduate Core I and Graduate Core II will pass with distinction, students whose grade average across the two classes is <4 but ≥3 will earn a passing grade, while students with a grade average across the two classes of <3 will fail the comprehensive component of the qualifying exam. A student who earns less than a B in a retake, will fail the comprehensive component of the qualifying exam for a second time and be terminated from the program. In addition to assigning letter grades, faculty will complete the graduate school rubric for evaluating student performance on qualifying exams for each student.

(II) Specialty Component

The specialty component of the qualifying exam will be administered by the initial committee (see § “The committee”) who will test the student in subject areas related to the student’s field of study. As early as the middle of the first semester and before the end of the second semester the student should meet with their initial committee to define the scope of their specialty exam. The specialty component should focus two specific areas of biology that the student intends to incorporate into their dissertation research. These areas can be discussed with the committee, and may be defined by a specific group of reviews, papers, books and book chapters, and even mathematical or computational skill sets to master. The student should be actively engaging their committee to explore and define these areas over their first year of study. The student is responsible for working with their committee to develop a clear understanding of what individual faculty expect of them with respect to preparing for the specialty component of the qualifying exam.

Traditional Specialty Component: The specialty component of the qualifying exam will be administered in the third semester. The committee will designate a chair other than the student's advisor to administer the examination. The written part of the exam will be closed-book and will be administered on campus in a single four-hour period by the examination chair. Two committee members will provide questions for the four-hour specialty exam. Each of the two committee members will provide questions expected to occupy the student for half of the four-hour exam. Exams can be hand-written or completed on a wireless disabled laptop with autocorrect and prompts disabled. All members of the committee will read the exam, the committee members who provided the questions will grade the exam questions they provided. One week after the
committee has read the written answers (about one week after the written exam), an oral exam will be administered by the whole committee for the purpose of further exploring the student’s grasp of both the specialty component subject matter and any material covered by Graduate Core I and II.

**Alternative Specialty Component:** With committee approval, an alternative to the traditional specialty component of the qualifying exam is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. The purpose of the alternate exam is to immediately focus students and their graduate advisors on developing the research, analysis and writing skills that are necessary for a successful career. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee. One week after the committee has read the manuscript, there will be an oral exam for the purpose of further exploring the student’s grasp of both the specialty component subject matter and any material covered by Graduate Core I and II.

**The specific requirements for the alternative specialty component are:**

1. The research must have been conducted since matriculation at UM, under the guidance of the Ph.D. advisor. Research conducted prior to matriculation at UM cannot be the basis for the article. However, a student’s supervisory committee may at its discretion approve work that considerably extends previous research (e.g. a M.S. project) and that contains substantial new data generated since matriculation.

2. The student must be the first author of the article, and must play the principal role in data analysis, writing, submission, and seeing the manuscript through to publication.

3. The target journal should have an impact factor above the median (i.e., top 50%) for journals in its subject area.

4. The publication must be a full article: No form of short note (e.g., primer, technical or natural history note), short communication or brief commentary is acceptable. Substance rather than paper length will be the major consideration: e.g., articles in *Science* and *Nature* would be short but perfectly acceptable! The exam committee will assess the paper’s acceptability.

5. Prior to submission for publication, all members of the supervisory committee must have agreed upon journal selection, served as collegial reviewers of the manuscript, and agreed that the manuscript is suitable for submission. The student is also expected to orally present and defend the research described in the manuscript.

6. Satisfactory completion of this alternate qualifying exam will require submission of the manuscript before the end of the third semester of graduate study. As is the case for a standard written qualifying exam, satisfactory completion will also require a vote of the supervisory/examination committee.

7. A memorandum to GAAC by the supervisory/examination committee chair reporting passing the alternate qualifying exam should be accompanied by a copy of the journal’s acknowledgment of submission.

8. If the approved manuscript has not been submitted before the end of the third semester, the student must prepare to sit the regular specialty component of the qualifying exam before the end of the fourth semester. Students have up to the Monday of the second last week of classes in the fourth semester to submit their manuscript. If the manuscript is not submitted by the end of the second last week of classes in the fourth semester, the student must sit the regular specialty component of the qualifying exam before the end of the fourth semester.

9. The student is encouraged to present the work on which the manuscript is based at the department’s annual graduate student symposium.

10. Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). Conditional passes may not be awarded. For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee’s evaluation must be prepared by the chair of the examination committee and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, the student will be terminated from the program.

11. At time of completion of the oral examination the examination committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the complete research committee (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will be recorded if no more than one member of the complete research committee (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a second chance to defend no later than the sixth week of the fifth semester. If the defense is failed a second time, the student will be terminated from the program. At time of completion of the proposal defense the complete research committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

4. Admission to candidacy. (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal and to have complete SACS evaluation forms from both the qualifying exam and the proposal defense on file.

5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department’s training program.

6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.) is required. All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.
7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality
appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the graduate school form and the
signature page of the dissertation. A final, acceptable typescript of the dissertation must be in the hands of the committee a minimum of two
weeks prior to the defense. If this deadline is not met, the defense must be rescheduled. A public dissertation seminar also is presented at the
time of the defense. Following the defense the committee is required to provide the Graduate Director with a completed SACS evaluation form.

8. Other requirements described under "Doctor of Philosophy," including but not limited to:

- a total of at least 60 credit hours (course credit hours plus research credit hours).
- once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 850) status until the degree is granted.
  This course carries 1 credit hour, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course
  credit hours normally applies to this course.

9. Committee: A single committee will advise the student on both comprehensive and research training. The committee will be responsible
for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed
above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project
design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by
the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:

- The initial committee will consist of at least 4 faculty, 2 appointed to ensure breadth of training (from two areas outside the research area) and
  2 from the research area. It will be formed to help the student choose courses during the first few weeks of the first semester. This committee
  will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken
  elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The
  choice of areas briefly will be outlined in a memo to GAAC.

- The initial committee of at least 4 faculty will be responsible for preparing and administering the comprehensive examination.

- The complete committee of at least 4 faculty including one from outside the department, should be formed by the end of the third semester; all
  four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum
  of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required
  that two shall be from the Graduate Faculty.

- The dissertation committee (of four) is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals
  as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and
  the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the
  committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it also is required that two shall
  be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department,
  but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.

- Committee meetings are required at least once a year (recommended at least once a semester in the early phases). The student is responsible
  for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos
  summarizing each meeting should be in the student's file.

10. About the time table:

- The written comprehensive qualifying examination must be passed by the end of the third semester.

- A polished, written dissertation proposal must be defended to the committee in the fourth semester together with a public presentation of the
  proposal. This must take place by mid-April of the spring semester or mid-November of the fall semester.

- Admission to candidacy normally occurs after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of
  the committee and the approval of the Graduate School. Application for admission to candidacy is made to the graduate school on a special form.

- Analysis of data and a polished draft of the dissertation should be completed and in the hands of the dissertation committee no later than the
  middle of the tenth semester.

- Defense of the dissertation and its submission to the Graduate School must meet or precede the deadline for graduation immediately following the
tenth semester unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and
  of the public seminar must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the
  department.

- The oral defense of the dissertation must be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.

- No student may receive the degree in the same semester in which she/he is admitted to candidacy.

- The indicated dates form firm deadlines. A student’s committee, however, may submit a written petition to GAAC for an extension of time detailing
  reasons for the request. An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.

- Proposals to change the schedule for any reason should be preceded by a study of the graduate bulletin sections on leaves of absence, full time
  student status and recency of credit hour; and explicitly should address how the proposed change of schedule relates to these matters. The
memo requesting the change also should address the **proposed financial support** of the student beyond the 10 semesters of normal departmental support.

11. **Public presentations must be during regular semesters.** The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.

12. Completed SACS evaluation forms are required at three points during the course of study. One following the qualifying exam, one following the proposal defense and the final following defense of the dissertation. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

**Suggested Plan of Study**

**Ph.D. Program Timeline - Including Program Requirements and Suggested Goals**

Disclaimer: This Ph.D. Program Timeline does not replace the "Procedures for Graduate Students in Biology".

**Semester 1:**
Requirements* (Suggested credits 9):
- Graduate Core I (3 credits)
- Take 6 additional credits
- Form Initial Committee
- Meet with Committee to plan first year of study.

Suggested Goals: (1) Sometime in your 1st year start contributing to a project in your group that will yield co-authorship on a publication in Year 1 or 2. (2) Start your personal Endnote (or equivalent) library and start delving into primary literature to inform development of your dissertation research.

**Semester 2:**
Requirements* (Suggested credits 9):
- Graduate Core II (3 credits)
- Take 6 additional credits
- By the end of the first year you must have met your Committee.

Suggested Goals: (1) By the end of your 1st year have completed 12 of the 18 required course work credits.

**Semester 3:**
Requirements* (Suggested credits 6):
- Research in Progress (1 credit)
- Take 5 additional credits
- Qualifying Exam
- Qualifying Exams SACS forms submitted to GAAC Director

Suggested Goals: (1) Attend a local conference during 2nd year. (2) Submit Research Fellowship Application(s) in Year 2.

**Semester 4:**
Requirements* (Suggested credits 5):
- Research in Progress (1 credit)
- Take 4 additional credits
- Proposal Defense
- Proposal Defense SACS forms submitted to GAAC Director
- Advance to Candidacy

Suggested Goals: (1) By the end of the 2nd year have completed ALL 18 required course work credits (including the statistics requirement).

**Semester 5:**
Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits
- Meet with Committee at least once in Year 3

Suggested Goals: (1) Preparation and submission of 1st, 1st authored manuscript in Year 3. (2) Present research at professional meeting in Year 3. (3) Start planning and submitting Grant Applications(s).

Semester 6:

Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits

Suggested Goals: Submit Grant Applications(s)

Semester 7:

Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits
- Meet with Committee at least once in Year 4

Suggested Goals: (1) Preparation and submission of 2nd, 1st authored manuscript in Year 4. (2) Present research at professional meeting in Year 4.

Semester 8:

Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits

Suggested Goals: Start researching applying for postdocs fellowships/jobs

Semester 9:

Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits
- Meet with committee in 9th semester to demonstrate sufficiency and plan presentation and completion of the dissertation.

Suggested Goals: (1) Complete experimental work and data analysis in 9th semester (2) Present research at professional meeting in Year 5 (if funds are available consider attending more than one professional meeting). (3) Start applying for postdocs/jobs.

Semester 10:

Requirements* (Suggested credits 5):

- Research in Progress (1 credit)
- Take 4 additional credits
- Dissertation Defense
- Dissertation Defense SACS forms submitted to GAAC Director

Suggested Goals: (1) Focus on writing dissertation and final 1st authored publications. (2) Continue applying for postdoc/jobs.

Ph.D. Program Timeline Notes:

1. The timeline for the suggested goals will vary some across labs and disciplines. The important things to capture from the list of suggested goals are (1) the importance of publishing, (2) the value of publishing early and steadily, and (3) the importance of building your professional...
network by attending and presenting your work at meetings. Use the suggested timeline to facilitate setting your professional goals and discussing your goals with your advisor and members of your committee.

2. Contributing to research projects outside your main research project can be a valuable way to gain lab/field skills and skills in data analysis, presentation and writing. Thus, it is suggested that sometime in your 1st year you should start contributing to a project in your group that will yield co-authorship on a publication in Year 1 or 2.

3. Meeting with your committee once each semester is strongly encouraged. Meeting with your committee once each year is a program requirement.

4. TOTAL CREDITS must equal 60 at time of graduation and must not exceed 60. This means that if your time in the program goes beyond the 10 semesters of guaranteed support, you will need to plan and budget your remaining credits accordingly.

5. One credit of an 800-level course qualifies as full-time enrollment. Thus, in your final years, enrolling in one credit of BiL840 is sufficient.

6. Proposal and dissertation defenses must be advertised and scheduled at a time that does not conflict with departmental events including seminars, workshops and faculty meetings. Absolutely no defense should be scheduled to conflict with Monday Seminars (12:20-1:30), Wednesday Faculty Meetings (12:20-1:30), or to conflict with Friday Seminars (12:20-1:30; please note that scheduling defenses for presentation as part of the Friday Seminar Series is encouraged). Defenses must be scheduled during regular term times, consult your program requirements for details.

Mission
The purpose of the Biology Doctoral Program is to engender the research, teaching and presentation skills that are central to professional biological careers in academia, government and private organizations.

Student Learning Outcomes
- Students will demonstrate a deep knowledge of a Biological area, and the research skills required to make an original scientific contribution.
- Students will demonstrate the ability to teach Biology to University of Miami undergraduates.
- Students will demonstrate appropriate level of writing skills for communicating their research in professional settings.

Chemistry
chemistry.as.miami.edu

Dept. Code: CHM

Degree Programs
Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.
Masters Program in Chemistry

- M.S. in Chemistry (p. 1682)

Doctoral Program in Chemistry

- Ph.D. in Chemistry (p. 1682)

CHM 615. Makings of a Scientist. 3 Credit Hours.
By analyzing achievements and advise of few successful scientists, chemists in particular, will highlight what qualities are needed to be a successful scientist. Importance of motivation, perseverance, communication skills, adhering to ethical guidelines and ability to deal with colleagues and co-workers will be brought out. Career options available for a trained chemist and how different each one is will be pointed out. Overall this is a course in multi-mentoring of graduate students who are aiming for a career in science and hope to become successful researchers in science, particularly in chemistry.
Prerequisite: CHM 202 with a grade of C- or higher.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 620. Physical Organic Chemistry. 3 Credit Hours.
Aspects of chemical bonding, acids and bases, steeoechemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 622. Synthetic Organic Chemistry. 3 Credit Hours.
Functional group transformations, Synthon approach. Retro-synthetic analyses, multistep syntheses.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 624. Supramolecular Chemistry. 3 Credit Hours.
Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 625. Structural Organic Chemistry. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 626. Structural Organic Chemistry. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

CHM 630. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.
The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 635. Molecular and Supramolecular Photochemistry. 3 Credit Hours.
Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CHM 641. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.
Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CHM 653. Modern Quantum Chemistry. 3 Credit Hours.
Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 655. Electrochemistry. 3 Credit Hours.
Modern electrochemical techniques including voltammetry, chronocoulometry, rotating disk electrode, and ultramicroelectrodes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 665. Principles of Spectroscopic Techniques. 3 Credit Hours.
Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 675. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.
Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time-domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 681. Advanced Analytical Chemistry. 3 Credit Hours.
Provides a strong foundation in the most important concepts in advanced analytical chemistry, including electrochemistry, chemical separations, and bioanalytical chemistry, and in the different classes of instrumental analytical techniques available to current chemists.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 691. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 692. Topics in Chemistry. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 693. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 694. Readings in Chemistry. 1-3 Credit Hours.
Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CHM 779. Chemistry Seminar. 1 Credit Hour.
Participation in the departmental seminar program. Required each semester the student is in residence and not enrolled in CHM 680 (excluding
summer sessions).
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 780. Chemistry Seminar. 1 Credit Hour.
Participation in the chemistry department seminar program, including an oral presentation of special topics.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 785. Introduction to Research. 2 Credit Hours.
Research principles and practices, independent study in selected subject areas, and/or oral presentation of a proposed research topic. Open only to
graduate students working toward the M.S. or Ph.D. in chemistry.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 788. Problems in Research Planning. 2 Credit Hours.
Formulation of a research program for investigating an original problem not related to the candidate's major laboratory research. A brief written
summary and an oral defense of the plan will be required.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CHM 805. Research Practices. 1-3 Credit Hours.
Research experiences in special techniques. For students electing the non-thesis M.S. option. May be repeated for a total not to exceed six credits.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

CHM 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not
awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in
CHM 710 (usually six credits). Credit not granted. May be regarded as full-time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

CHM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up
to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 840. Post-candidacy Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for
less than a total of 12. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CHM 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate
doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
CHM 880. Doctoral Dissertation Seminar. 1 Credit Hour.
Required of all candidates for the Ph.D. degree when defending their doctoral dissertation during their final term. A written dissertation and an oral defense of the Ph.D. dissertation will be required.
Prerequisite: CHM 830 and CHM 840.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the chemistry seminars (CHM 779) and Introduction to Research (CHM 785) must be taken in the first and second year.
- The required number of credit hours in research (CHM 810) must be taken in the second year.
- A dissertation based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The M.S. degree may be earned with or without a thesis.

In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.

Ph.D. in Chemistry
Curriculum Requirements

The general requirements for the doctorate in Chemistry are set forth in this Bulletin under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credit hours. The department will cover tuition costs up to 60 credit hours for students on assistantships and fellowships.

| Total Credit Hours | 60 |

- The required number of credit hours in the chemistry seminar (CHM 779) must be taken in the first and second year.
- The required number of credit hours in Introduction to Research (CHM 785) must be taken in the first year.
- The required number of credit hours in the chemistry seminar (CHM 780) must be taken in the fall semester of the third year.
- The required number of credit hours in Pre-candidacy Doctoral Dissertation (CHM 830) must be taken in the first, second, third and fourth year.
- The required number of credit hours credits in Post-candidacy Doctoral Dissertation (CHM 840) must be taken in the fourth year.
- An Oral Comprehensive Exam must be passed before the end of the spring semester of the second year.
- An original research proposal in Problems in Research Planning (CHM 788) must be presented and defended before the end of the spring semester of the third year.
- A Doctoral Dissertation (CHM 880) based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.
Mission
As one of the core sciences, Chemistry has always been of the utmost importance in inventing new technology and ensuring that our nation remains at the forefront of scientific advances in energy, medicine, agriculture, environmental issues, and nanotechnology. The Ph.D. program at the University of Miami is committed to interdisciplinary interactions with research partners in all scientific and technological areas, thereby enriching the educational opportunities of the graduate students in the Department of Chemistry. We strive to deliver a high quality classroom-based instructional experience to provide our students with a broad knowledge base in the field, and, at the same time, allow for specialization in select topics to advance student understanding. By combining this instructional effort with a cutting-edge research program, our mission is to provide chemistry graduate students with a modern educational experience for future careers in all areas of the field, including academic, governmental, and industrial positions.

Goals
Student Learning Outcomes
• Graduates will be able to demonstrate a broad understanding of chemical principles in all areas of the science.
• Graduates will be able to demonstrate a significant understanding of chemical instrumentation analysis methods, and laboratory techniques.
• Graduates will exhibit advanced critical thinking skills and problem solving strategies as applied to chemical research.
• Graduates will exhibit advanced creative thinking skills and ability to design their own projects as applied to chemical research.
• Graduates will be able to clearly and effectively communicate scientific results.
• Graduates will be able to clearly and effectively communicate scientific results, and demonstrate mastery in the area they are specializing in.

Computer Science

csc.as.miami.edu

Dept. Code: CSC

Introduction
The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. Faculty research interests include algorithm engineering, applied cryptography & cybersecurity, automated reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, computational neuroscience, data mining & data science, machine learning & neural networks, music information retrieval, robotics, scientific computing, semantic web, and sensors & wireless systems.

Educational Objectives
The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to faculty research areas.

Degree Programs
The Department of Computer Science offers
• a Master of Science (MS) in Computer Science
• a track in the university-wide Master of Science (MS) in Data Science
• a Doctor of Philosophy (PhD) in Computer Science

Note
All Computer Science graduate TAs and RAs must complete RCR training during their first semester in the department. All other Computer Science graduate students must complete Responsible Conduct of Research (RCR) training before starting research work. Information about RCR training can be found from UM ethics programs: https://www.uresearch.miami.edu/uresearch-services/citi/index.html (https://www.uresearch.miami.edu/uresearch-services/citi/).

Masters Programs in Computer Science
• MS in Computer Science (p. 1694)
• Five-Year BS and MS in Computer Science (p. 1690)
• MS in Data Science (p. 1701)
Doctoral Program in Computer Science

- Ph.D. in Computer Science (p. 1696)

CSC 607. Logic. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 609. Data Security and Cryptography. 3 Credit Hours.
Prerequisite: CSC 317 or CSC 427.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 615. Introduction to Python Programming for Graduate Students. 3 Credit Hours.
Python programming and data structures. Program design and implementation. Python packages for scientific applications, data analysis, and machine learning. Designed for graduate students from the sciences. Not available to Computer Science students.
Prerequisite: MTH 161 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 616. Cybersecurity. 3 Credit Hours.
Prerequisite: CSC 317 And MTH 224 And MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 618. Interpreters and Compiler Theory. 3 Credit Hours.
Prerequisite: CSC 419.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 623. Theory of Relational Databases. 3 Credit Hours.
Prerequisite: CSC 423.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 629. Introduction to Computer Graphics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 632. Introduction to Parallel Computing. 3 Credit Hours.
Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 640. Algorithm Design and Analysis. 3 Credit Hours.
Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 645. Introduction to Artificial Intelligence. 3 Credit Hours.
Game theory. AI programming.
Prerequisite: CSC 317 Or ECE 318 And MTH 224 Or ECE 310 Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 646. Introduction to Machine Learning with Applications. 3 Credit Hours.
Prerequisite: MTH 210 and MTH 224.
Components: LEC.
Grading: GRD.

CSC 647. Computational Geometry. 3 Credit Hours.
Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 648. Bioinformatics Algorithms. 3 Credit Hours.
The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 650. Computational Neuroscience. 3 Credit Hours.
Connections to machine learning. Tutorials in Matlab.
Prerequisite: MTH 162 and MTH 224.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 656. Multimedia Systems. 3 Credit Hours.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 670. Directed Reading. 2-4 Credit Hours.
Directed reading in Computer Science - content varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
CSC 685. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 686. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 687. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 688. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 689. Topics in Computer Science. 1-3 Credit Hours.
Topics in Computer Science - content varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 690. Seminar for Graduate Students I. 1-3 Credit Hours.
Flexible topics of interest to graduate students.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 692. Seminar for Graduate Students II. 1-3 Credit Hours.
Flexible topics of interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 707. Logic Programming. 3 Credit Hours.
Prerequisite: MTH 506 and CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 711. Theory of Computation. 3 Credit Hours.
Recursive functions, Markov algorithms, Turing machines. Unsolvability.
Prerequisite: CSC 317 or CSC 517.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 712. Complexity Theory. 3 Credit Hours.
Models of computations, Blum's axioms, intractability, NP-completeness.
Prerequisite: CSC 427.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 724. Mobile Wireless Systems. 3 Credit Hours.
Cellular Systems, multiple access techniques, wireless networking, mobile IP, power management, user location information management, TDMA,
CDMA, and GSM systems, data broadcasting.
Prerequisite: CSC 424.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 732. Parallel Algorithms. 3 Credit Hours.
Parallel computation models; sorting networks; parallel algorithms for sorting, searching, graph problems, prefix computation, pattern matching, and
fast Fourier transforms; theory of P-completeness, the class NC.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

CSC 746. Neural Networks and Deep Learning. 3 Credit Hours.
training, Deep Feedforward Networks: Regularization for deep learning, Optimization for training deep models, Convolution networks. Applications:
Computer vision, speech recognition, Natural language processing.
Prerequisite: CSC 317.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 749. Automated Reasoning. 3 Credit Hours.
system and as a programming language. Applications of ATP in research and industry.
Prerequisite: CSC 317 or CSC 645.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 751. Semantic Web. 3 Credit Hours.
An overview of the underlying semantic web technologies. Ontology construction and implementation using tools and APIs (logic, XML, RDF, RDFS).
Theoretical and practical aspects of knowledge representation (description logic, RDF, RDFS, SPARQL, SROIQ(D)). Designing and debugging ontologies
(ontology engineering, entailment tools, project).
Prerequisite: CSC 317 and MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 752. Autonomous Robotic Systems. 3 Credit Hours.
Introduction: autonomous systems, autonomous robots, RoboCup, typical components of an autonomous robot. Modeling: perception, noise,
modeling, recursive state estimation, Bayes’ filter, particle filter, self-localization. Control and motion: PIO-control, calibration of parameters, controlling
a wheeled robot, controlling joints, walking motion. Learning (optional, if time permits): overview, different types of learning, reinforcement learning.
Prerequisite: CSC 317 and MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 756. Advanced Multimedia Systems. 3 Credit Hours.
multimedia software development tools. Architecture and issues for distributed multimedia systems. Multimedia communications systems.
Prerequisite: CSC 656.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 785. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
CSC 786. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 787. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 788. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 789. Advanced Topics in Computer Science. 1-3 Credit Hours.
Advanced Topics in Computer Science
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

CSC 793. Research Project. 1-6 Credit Hours.
Supervised research project preceding dissertation research for the Ph.D.
Components: IND.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 794. Research Project. 1-6 Credit Hours.
Supervised research project preceding dissertation research for the Ph.D.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for the number of credit hours as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

CSC 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

CSC 830. Pre-Candidacy DOCTORAL DISSERTATION. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

CSC 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of CSC 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
B.S./M.S. in Computer Science Five-Year

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

<table>

</tbody>
</table>

- They have completed 3 credit hours of CSC 410 and/or CSC 411 in a research-oriented project.
- They have an overall GPA of at least 3.0.
- They have a GPA of at least 3.3 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credit hours of CSC 410 and/or CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take up to 12 credits of courses, including 600 level courses, that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree.

Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

**Tracks**

Select one of the following Tracks:

**Comprehensive Track:**
- CSC 419 Programming Languages
- CSC 421 Principles of Computer Operating Systems
- CSC 423 Database Systems
- CSC 424 Computer Networks

Select a minimum of 5 credit hours of approved electives

**Flexible Track:**
- Select a minimum of 17 credit hours of approved electives

**Computational Science Track:**
- CSC 210 Computing for Scientists
- CSC 528 Introduction to Parallel Computing
- CSC 547 Computational Geometry
- CSC 548 Bioinformatics Algorithms
- CSC 410 or CSC 411 Computer Science Project Planning
- CSC 320 or MTH 520 Introduction to Numerical Analysis
- MTH 320 Numerical Linear Algebra
- BIL 150 General Biology
- BIL 151 General Biology Laboratory

**Cryptography and Security Track:**
- CSC 421 Principles of Computer Operating Systems
- CSC 424 Computer Networks
- CSC 507 Data Security and Cryptography
- CSC 410 or CSC 411 Computer Science Project Planning
- MTH 461 or MTH 505 Theory of Numbers
- MTH 561 Abstract Algebra I

Select a minimum of 2 credit hours of approved electives

**Graphics and Games Track:**
- CSC 229 Introduction to Game Programming
- CSC 329 Introduction to Artificial Intelligence
- CSC 410 or CSC 411 Computer Science Project Planning
- CSC 529 Computer Science Project Implementation

Select a minimum of 5 credit hours of approved electives

**Science & Ethics Requirement**

An approved two semester sequence of courses with laboratory in Biology, Chemistry, Physics, or Geological Sciences

**Approved Electives**

- Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX
- BTE 535 Information Security
- BTE 565 Mobile to Cloud: Developing Distributed Applications
- ECE 414 Computer Organization and Design
ECE 514  Computer Architecture
ECE 548  Machine Learning
ECE 553  Neural Networks
ECE 570  Network Client-Server Programming
ECE 572  Object-Oriented and Distributed Database Management Systems
ECE 574  Agent Technology
ECE 576  Internet and Intranet Security
ECE 577  Data Mining
ECE 481  Senior Project I 9
ECE 482  Senior Project II 9
MTH 320  Introduction to Numerical Analysis
MTH 505  Theory of Numbers
MTH 520  Numerical Linear Algebra
MTH 521  Numerical Methods in Differential Equations
MTH 524  Introduction to Probability
MTH 525  Introduction to Mathematical Statistics
MTH 542  Statistical Analysis

Total Credit Hours 120

---

1 These mathematics courses can also fulfill the requirements for a Minor in Mathematics (see here for details).
2 Available to all students.
3 The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.
4 Requires permission of the Director of Undergraduate Studies.
5 In addition to the generally approved electives, CIM 423, CIM 433, MMI 504, and MMI 505 are approved for the Graphics and Games track.
6 This course may also be applied towards the Science requirement.
7 CSC 40X - Computer Science Practicum must be taken at the same time as host course.
8 Maximally 6 credit hours from CSC 481 - Computer Science Teaching Assistant.
9 ECE 481 and ECE 482 may be used to replace any requirement for CSC 410 and CSC411.
10 For the Additional Major in Computer Science, with Tracks, students not in the College of Arts and Sciences should use the requirements of their school or college's degree in place of the additional requirements listed here.

**M.S. Curriculum Requirements**

Students must complete the Graduate School requirements, and the Departmental requirements described here.

<table>

</tr>
</tbody>
</table>

Total Credit Hours 30-36
For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

All Computer Science graduate TAs and RAs must complete Responsible Conduct of Research (RCR) training during their first semester in the department. All other Computer Science graduate students must complete RCR training before starting research work. Information about RCR training can be found from UM ethics programs: http://www.miami.edu/index.php/ethics/projects/rcr/ (https://ethics.miami.edu/disciplines/research-ethics/responsible-conduct-of-research/).

# M.S. in Computer Science

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

## Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

---

## Writing Intensive Course

<table>

Information about RCR training can be found from UM ethics programs: [http://www.miami.edu/index.php/ethics/projects/rcr/](http://www.miami.edu/index.php/ethics/projects/rcr/)

**Mission**

The Department’s mission is to educate and perform scholarly activities in Computer Science.

**Goals**

**Student Learning Outcomes**

- Student has adequate knowledge of 1) hardware and software systems and 2) design and implementation procedures for software systems.
- Student has foundation of theoretical computer science including discrete mathematics, automata and language theory, design and analysis of algorithms, computational complexity, and correctness of programs.
- Student has understanding and knowledge of the state-of-the-art hardware and software applications in one or more research area and has identified one or more open and interesting problems that computer scientists are currently addressing.
- Student has applied knowledge of computer science theories and software development methodologies to solve an original research topic. The student has written a Ph.D. dissertation and presented to his dissertation committee.
Ph.D. in Computer Science

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

</tr>
<tr>
<td></td>
<td><strong>Total Credit Hours</strong></td>
<td><strong>27</strong></td>
</tr>
</tbody>
</table>

Students may be admitted with deficiencies, normally a maximum of 6 credits. These must be completed in addition to the degree requirements.

Requirements for Graduation

Students must complete the Graduate School requirements (p. 85), and the Departmental requirements described here.

Credits

For graduation students must complete at least 60 credits (as required by the Graduate School), including at least 24 classroom course credits (see below), at least 9 pre-candidacy credits (CSC830), and at least 9 post-candidacy credits (CSC840).

Written Qualifying Exam

The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Courses

By the end of the first two years, the student must have completed at least eight classroom courses, for a total of at least 24 credits. At least four of these courses (12 credit hours) must be CSC7XX courses. The student must work with the Director of Graduate Studies to select approved courses. Maximally 12 credits from prior study may be pre-approved by the Director of Graduate Studies for transfer after completion of an equivalent number of credits at the University of Miami.

Selecting an Advisor

By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations

After passing the written qualifying exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student’s oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student’s research.

Teaching Experience

Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.
Responsible Conduct of Research Training

All Computer Science graduate TAs and RAs must complete Responsible Conduct of Research (RCR) training during their first semester in the department. All other Computer Science graduate students must complete RCR training before starting research work. Information about RCR training can be found from UM ethics programs: http://www.miami.edu/index.php/ethics/projects/rcr/

Mission

The Department’s mission is to educate and perform scholarly activities in Computer Science.

Goals

Student Learning Outcomes

• Student has adequate knowledge of 1) hardware and software systems and 2) design and implementation procedures for software systems.
• Student has foundation of theoretical computer science including discrete mathematics, automata and language theory, design and analysis of algorithms, computational complexity, and correctness of programs.
• Student has understanding and knowledge of the state-of-the-art hardware and software applications in one or more research area and has identified one or more open and interesting problems that computer scientists are currently addressing.
• Student has applied knowledge of computer science theories and software development methodologies to solve an original research topic. The student has written a Ph.D. dissertation and presented to his dissertation committee.
• Student has received national and international recognition for presentation and publication of original research results.

Criminology

sociology.as.miami.edu

The Department of Sociology offers a Master’s of Science degree in Criminology and Criminal Justice. The program provides training in fundamentals of the criminal justice system and criminological theory, as well as foundational training in research methods and statistics. Students may tailor their programs to best fit their goals through their selected electives, curricula tracks, and choice of one of three completion options. At present, curricula tracks (comprised of six credit hours) include such areas as leaderships and management, criminal law, research methods and statistics, and geographic information systems (GIS). Students have the program completion options of preparing for and taking a comprehensive examination, completing an internship and accompanying paper, or completing a Master’s thesis.

For more information, please see our website: http://www.as.miami.edu/sociology/graduate-programs/mscriminology/.

Admission Requirements

Students are evaluated for admission based on a holistic assessment of the following requirements. Students must submit:

1. A statement of purpose.
   a. In this personal statement applicants detail their reasons for pursuing the degree, both in general and in our program specifically. The statement will help evaluate applicants’ writing abilities as well as fit with our program.
2. Transcripts from all academic institutions attended.
   a. Official transcripts from all academic institutions attended must be submitted. Transcripts should show that students attained a minimum of 3.0 in the last 60 credits of upper division undergraduate coursework and/or 3.0 in graduate coursework. Applicants with lower averages may be admitted to the Certificate program.
3. Letters of recommendation.
   a. At least three letters of recommendation must be submitted. These should be positive and strongly indicate that the applicant has the aptitude and stamina necessary to successfully complete a graduate degree.

Academic Standing

Graduate students are expected to maintain a minimum of a 3.0 overall GPA in all coursework. Should the average fall below that minimum in a semester, the student will be notified and will work with his/her advisor to rectify the performance issues. If the student has a second consecutive semester with an average overall GPA below 3.0, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program in accordance with guidelines for the University’s Graduate School.

Masters Program in Criminology and Criminal Justice

M.S. in Criminology and Criminal Justice (p. 1699)

Certificate in Criminology and Criminal Justice

Certificate in Criminology and Criminal Justice (p. 1698)
Certificate in Criminology and Criminal Justice

Overview
The Department of Sociology offers a Graduate Certificate in Criminology and Criminal Justice. The program provides training in fundamentals of the criminal justice system and criminological theory, as well as foundational training in research methods and statistics. The Certificate is designed for students who wish to augment their training in criminology and criminal justice as well as for those students seeking to enter the M.S. program in Criminology and Criminal Justice but who may not meet all program requirements. Students earn the Certificate by successfully completing the five required courses.

Please see our website for more information: http://www.as.miami.edu/sociology/graduate-programs/mscriminology/.

Academic Standing
Graduate students are expected to maintain a minimum of a 3.0 overall GPA in all coursework. Should the average fall below that minimum in a semester, the student will be notified and will work with his/her advisor to rectify the performance issues. If the student has a second consecutive semester with an average overall GPA below 3.0, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program in accordance with guidelines for the University’s Graduate School.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements
Students are evaluated for admission based on a holistic assessment of the following requirements. Students must submit:

1. A statement of purpose
   a. In this personal statement, applicants detail their reasons for pursuing the degree, both in general and in our program specifically. The statement will help evaluate applicants’ writing abilities as well as fit with our program.

2. Transcripts from all academic institutions attended
   a. Official transcripts from all academic institutions attended must be submitted. Transcripts should show that students attained a minimum of 3.0 in the last 60 credits of upper division undergraduate coursework and/or 3.0 in graduate coursework. Applicants with lower averages may be admitted.

3. Letters of recommendation from at least three references familiar with the individual’s scholastic and/or work performance
   a. At least three letters of recommendation must be submitted. These should be positive and strongly indicate that the applicant has the aptitude and stamina necessary to successfully complete a graduate degree.

Mission
The Graduate Certificate in Criminology and Criminal Justice program aims to address issues related to crime and its control in the United States. For those working in or seeking to work in criminal-justice related positions, higher levels of education are increasingly required for employment and/or advancement in many professions and jobs. The 15 credit hour program is designed to provide students with a foundation in criminal justice and criminological theory, connections between theory and policy, and in research methods and statistics.

Goals
The program objectives of the Graduate Certificate program in Criminology and Criminal Justice are to:

• Provide a Graduate Certificate for those currently or intending to work in research or applied settings in criminal justice agencies or community college teaching. It also provides an opportunity for interested students to explore potential further education in a Master's program.
• Provide training in criminology and criminal justice, enabling a strong and integrated knowledge of research and practice. This will enable greater understanding of both the etiology and prevention of crime as well as to better inform criminal justice policy.
• Provide the research and conceptual skills required to conduct analyses and assessments of the criminal justice system.
Student Learning Outcomes

• Students will demonstrate advanced knowledge of classic and contemporary criminological theory.
• Certificate earners will demonstrate proficiency in written and oral communication.
• Certificate earners will have a thorough knowledge of the fundamentals of research in the social sciences and be able to synthesize and apply them in written form.

M.S. in Criminology and Criminal Justice

Overview

The Department of Sociology offers a Master's of Science degree in Criminology and Criminal Justice. The program provides training in fundamentals of the criminal justice system and criminological theory, as well as foundational training in research methods and statistics. Students may tailor their programs to best fit their goals through their selected electives, curricula tracks, and choice of one of three completion options. At present, curricula tracks (comprised of six credit hours) include such areas as leadership and management, criminal law, research methods and statistics, and geographic information systems (GIS). Students have the program completion options of preparing for and taking a comprehensive examination, completing an internship and accompanying paper, or completing a Master’s thesis.

**Mission**

The Master of Science in Criminology and Criminal Justice program aims to address issues related to crime and its control in the United States. For those working in or seeking to work in criminal-justice related positions, higher levels of education are increasingly required for employment and/or advancement in many professions and jobs. The program is designed to provide students with a foundation in criminal justice and criminological theory, research methods and statistics, and substantive areas.

**Goals**

The program objectives of the proposed new Master’s program in Criminology and Criminal Justice are to:

- Provide a terminal Master’s degree for those currently or intending to work in research or applied settings in criminal justice agencies or community college teaching. It also provides an opportunity for interested students to explore potential further education in a doctoral program.
• Provide interdisciplinary training in criminology and criminal justice, enabling a strong and integrated knowledge of research and practice. This will enable greater understanding of both the etiology and prevention of crime as well as to better inform criminal justice policy.
• Provide a comprehensive understanding of the complexities of criminal behavior, its control, and of the criminal justice system.
• Provide the research and conceptual skills required to conduct advanced analyses and assessments of the criminal justice system.

Student Learning Outcomes

• Students will demonstrate advanced knowledge of classic and contemporary criminological theory.
• Graduates will have a thorough knowledge of the discipline and the theoretical foundations of the literature and be able to synthesize and apply them in well-written form.
• Graduates will have a thorough knowledge of the fundamentals of research in the social sciences and be able to synthesize and apply them in written form.

Data Science

Overview - Master of Science in Data Science (MSDS)

The Master of Science in Data Science is a thirty (30) credit interdisciplinary graduate program that combines the teaching of domain-specific and technical skills for analyzing large data sets. Students interested in data science tools will be able to focus on tool principles and tool development, and students interested in data science application domains will be able to focus on the application of data science tools with a selection of courses that develop skills in one of three application areas. The program also provides its students the option of doing an industrial internship, to acquire professional experience. The program is both academic and professional in nature, providing course that are true to a Master’s level degree and courses that reflect the needs of the profession.

This innovative degree program exists through the collaboration of several UM units, including the College of Arts & Sciences, College of Engineering, School of Architecture, School of Communication, Rosenstiel School of Marine & Atmospheric Sciences (RSMAS), School of Education & Human Development, and the Institute for Data Science and Computing (iDSC). Core courses are taken in engineering, computer science, and statistics, and while selecting a track is not required, tracks are available through the participating schools and colleges.

Students from non-technical backgrounds are encouraged to apply. Summer prerequisite courses in linear algebra, statistics, and programming are available for applicants who may need additional coursework prior to the start of the program. Equivalencies will be considered by the admissions committee.

The following tracks are available for M.S. students.

• Technical Data Science (College of Arts & Sciences and College of Engineering)
• Smart Cities (School of Architecture)
• Data Visualization (School of Communication)
• Marine & Atmospheric Science (Rosenstiel School of Marine & Atmospheric Sciences)
• Educational Measurement & Statistics (School of Education & Human Development) - pending approval

Regardless of the focus track, all degrees are awarded by the College of Arts & Sciences.

For more information, please visit http://msdatascience.miami.edu (https://msdatascience.miami.edu)/

• M.S. in Data Science (p. 1701)
• M.S. in Data Science with a track in Technical Data Science (p. 1701)
• M.S. in Data Science with a track in Smart Cities (p. 1701)
• M.S. in Data Science with a track in Data Visualization (p. 1701)
• M.S. in Data Science with a track in Marine & Atmospheric Sciences (p. 1701)
• M.S. in Data Science with a track in Educational Measurement & Statistics. - (p. 1701) pending approval

M.S. in Data Science

https://msdatascience.miami.edu/

Program Overview

The Master of Science in Data Science is an interdisciplinary graduate program that combines the teaching of domain-specific and technical skills for analyzing large data sets. Built upon a core of foundational data science courses in Computer Science, Electrical Engineering, and Mathematics, and a selection of courses from data science application domains, the program is interdisciplinary in nature. Students interested in data science tools will be able to focus on tool principles and tool development, and students interested in data science application domains will be able to focus on the application of data science tools with a selection of courses that develop skills in one of three application areas. The program also provides its
students the option of doing an industrial internship, to acquire professional experience. The program allows the various academic units involved to add courses in their specific application domains, thus keeping the program updated and relevant to current practice and industrial needs. The program is both academic and professional in nature, providing courses that are true to a Master's level degree and courses that reflect the needs of the profession.

**Admission Requirements**

1. Completion of an application.

2. A Baccalaureate degree for an accredited institution.

3. A minimum cumulative undergraduate GPA of 3.0.

4. Introduction to Probability and Statistics and Computer Programming I (or equivalents). Students may be admitted with deficiencies, which must be completed in addition to the degree requirements.

5. GRE general test scores

   Applicants must rank in the 65% percentile or higher in the Quantitative Reasoning Test. There is no minimum score requirement for other parts of the GRE.

6. Students from non-English speaking countries must send either TOEFL or IELTS

   - TOEFL minimum score: Internet based - 92; Computer based - 237; Paper based 580
   - IELTS minimum score: 6.5

7. A personal statement of intent in which the applicant details reasons for pursuing the degree.

Student Learning Outcomes

Upon completion of the MS in Data Science, students will be able to:

1. Use mathematical, statistical, and computational techniques to analyze large datasets, including collecting data, cleaning data, integrating multiple data sets, and applying the analytical techniques to the data.
2. Write computer programs for accomplishing the aforementioned analysis tasks and the analysis results obtained.
3. Interpret domain data appropriately, and provide insights into the data at hand.
4. Communicate the results of their analysis clearly to the relevant people, including decision-makers, stakeholders, and managers.
5. Generalize data analysis skills to problems in a real-world setting.

Specific to the individual tracks.
(a) For the Technical Data Science track

1. Use machine learning to discover the underlying structures and relationships in large datasets.
2. Apply data analysis and data mining to identify patterns in large datasets and develop classification/prediction models.
3. Deploy appropriate tools for visualizing data and their analysis results.

(b) For the Smart Cities track:

1. Use data science techniques to collect and analyze data from buildings and infrastructure.
2. Use data analysis and visualization skills to inform the design, development, and management of sustainable and resilient environments.

(c) For the Data Visualization track:

1. Use interactive and static visualization techniques for communication and dissemination to audiences with diverse levels of technological background/sophistication.
2. Use visualization techniques for advocacy.

(d) For the Marine and Atmospheric Science track:

1. Use public, private data sets, and their aggregates for domain-specific inquiries.
2. Analyze data that covers large areas over time.
3. Use data science skills to develop plans for analysis and execute them.
4. Apply appropriate technologies to analyze marine and atmospheric data.

Dept. Code: ENG

Degree Programs

The Ph.D. program in English (p. 1716) is an innovative scholarly course of study offering substantial work in literatures in English, including British, American, Caribbean, Irish, and other Anglophone literature, with some opportunities for advanced work in comparative literature.

The M.F.A. program in Creative Writing (p. 1714) located in the English Department offers an intensive two year study with a third year option in the reading, writing and teaching of creative writing.

Master of Fine Arts
• M.F.A. in Creative Writing (p. 1714)

Doctoral Program in English
• Ph.D. in English (p. 1716)
ENG 601. Creative Writing: Fiction III. 3-6 Credit Hours.
Advanced M.F.A. workshop in the techniques of writing fiction.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 602. Creative Writing: Poetry II. 3-6 Credit Hours.
Advanced M.F.A. workshop in the techniques of writing poetry.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 604. Form in Poetry. 3 Credit Hours.
Poetic works as literary objects, with attention to poetic trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 605. Form in Fiction. 3 Credit Hours.
Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 607. Studies in Renaissance Drama. 3 Credit Hours.
Studies in Renaissance Drama.
Components: LEC.
Grading: GRD.

ENG 610. Studies in Old English Language and Literature. 3 Credit Hours.
Content varies by semester.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 611. Introduction to Digital Humanities. 3 Credit Hours.
An introduction to the theory and practice of the digital humanities from a literary and cultural studies perspective. It introduces major types of digital humanities work and central debates and concerns in the field. The course is taught in English and is open to graduate students from all humanities departments. No experience in the digital humanities or with digital tools or methods is required.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 612. Topics in Digital Humanities and Media Studies. 3 Credit Hours.
A survey of Media Studies. Students will approach a broad range of texts in the field, and outline both its historical development and present state, with a particular focus on emerging theories and practices within Media Studies and Digital Humanities in the academy. The course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 613. Practicum in Digital Humanities. 3 Credit Hours.
Offers students the possibility to apply their learning in the field of Digital Humanities and move forward on their personal Digital Humanities research project. Students will carry out many practical exercises with programming languages and digital tools, and work towards a final digital project. This course is taught in English and is open to graduate students from all humanities departments.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ENG 614. Stu Neocol Poet Prose. 3 Credit Hours.
Studies in Neoclassical Poetry and Prose.
Components: LEC.
Grading: GRD.
ENG 615. Studies in Chaucer. 3 Credit Hours.
Studies in Chaucer.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 616. Studies in Middle English Language and Literature. 3 Credit Hours.
Studies in Middle English Language & Literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 620. Studies in Shakespeare. 3 Credit Hours.
Studies in Shakespeare.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 621. Studies in Elizabethan and Jacobean Drama. 3 Credit Hours.
Studies in Elizabethan and Jacobean Drama.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 622. Studies in 16th Century Literature. 3 Credit Hours.
A survey of predominantly non-dramatic Renaissance literature, with an emphasis on the Sixteenth Century.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 623. Studies in Spenser. 3 Credit Hours.
Studies in Spenser.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 624. Studies in 17th Century Literature. 3 Credit Hours.
Studies in 17th century literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 625. Studies in Milton. 3 Credit Hours.
Studies in Milton.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 630. Restoration and 18th-Century Drama. 3 Credit Hours.
Studies in Restoration and 18th Century Drama.
Components: DIS.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 631. Studies in Restoration and 18th Century Literature. 3 Credit Hours.
Special topics in British Literature from 1660-1800.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 633. The Eighteenth-Century British Novel. 3 Credit Hours.
Survey of the British novel from Defoe to Austen.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 640. Studies in Romanticism. 3 Credit Hours.
A study of writers and genres between the late eighteenth and the mid-nineteenth century, through an investigation of questions of canonicity, epistemological orientation, colonialism, and the revolutionary context.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 645. Studies in Victorian Poetry and Prose. 3 Credit Hours.
Victorian poetry and prose exclusive of the novel. Poems by Tennyson, Browning, Arnold, Rossetti, and others. Prose works by writers such as Carlyle, Newman, Mill, Ruskin, and Pater.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 646. Nineteenth-Century British Novel. 3 Credit Hours.
Survey of the British novel from Austen to Conrad.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 648. Studies in the Novel. 3 Credit Hours.
Topics in eighteenth-, nineteenth-, and twentieth-century fiction.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 650. Studies in Modern British Literature. 3 Credit Hours.
Intensive coverage of a limited topic in twentieth-century British or Irish literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 651. Studies in Joyce. 3 Credit Hours.
Close readings of Dubliners, A Portrait of the Artist as a Young Man, Ulysses, and Finnegans Wake; extensive review of Joyce criticism.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 652. Studies in Irish Literature. 3 Credit Hours.
Intensive coverage of a selected topic in Irish Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 654. Contemporary British Literature. 3 Credit Hours.
Studies in British prose, poetry, and drama since 1939.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 655. Contemporary American Poetry and Poetics. 3 Credit Hours.
Poetry and poetics from 1945 to present, focusing on Black Mountain Poetics, the New York School, the Black Arts Movement, Language Poetry and more recent writers and movements.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 658. Studies in Transatlantic Literature. 3 Credit Hours.
Literature on transatlantic themes and/or by transatlantic writers. Border crossing; ships; sailors; and other travelers; movement of people, things, and ideas in the Atlantic world.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 660. Studies in American Literature: Beginnings to 1800. 3 Credit Hours.
Studies in American Literature: Beginnings to 1800.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 661. Studies in American Literature: 1800-1865. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 662. Studies in American Literature: 1865-1914. 3 Credit Hours.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 663. Studies in American Literature: 1914 to 1950. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 664. Studies in American Literature: 1950 to the present. 3 Credit Hours.
Studies in American Literature: 1950 to the present.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 665. Studies in African-American Literature. 3 Credit Hours.
Studies in African-American Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 666. Caribbean Literature. 3 Credit Hours.
Caribbean literature and cultural theory; Caribbean aesthetic.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 667. Caribbean Popular Culture. 3 Credit Hours.
Special topics on the relations among politics, popular culture, and literature in the Caribbean region.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 668. Studies in Race and Diasporic Literatures. 3 Credit Hours.
Analysis of race, ethnicity, immigration, and transnationalism in literature and cultural theory.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 669. Studies in Women's Literature. 3 Credit Hours.
Topic varies by semester. Analysis of gender issues and literary production by women.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 670. The Classical Tradition and English Literature. 3 Credit Hours.
A study of classical authors such as Homer, Aeschylus, Sophocles, Euripides, Virgil, Ovid, Horace, and Catullus, who have been seminal for English writers from the Middle Ages to the present.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 672. Comparative Studies in Renaissance and Baroque Literature. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 673. Eighteenth-Century European Literature. 3 Credit Hours.
Major literary and aesthetic works of the European Enlightenment.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 674. The Romantic Movement in Europe. 3 Credit Hours.
A study of the forces and influences of the Romantic Movement in Europe as these intersect English Romanticism.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 675. European Novel. 3 Credit Hours.
Major authors and trends in the development of the European novel as a unified literary tradition.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 677. Studies in Modern Literature. 3 Credit Hours.
Studies in Modern Literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 678. Studies in Contemporary Literature. 3 Credit Hours.
Studies in Contemporary Literature.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 680. History of Literary Criticism. 3 Credit Hours.
A survey of literary criticism and theory from the ancient Greeks to the early twentieth century.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 681. Introduction to Literary Theory. 3 Credit Hours.
Twentieth-century literary theory beginning with the New Criticism and including topics such as semiotics, hermeneutics, deconstruction, feminism, and neopragmatism.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 682. Contemporary Criticism and Theory. 3 Credit Hours.
Topics in recent criticism and theory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 683. Literature and Psychoanalysis. 3 Credit Hours.
The interrelations between literary theory, textual analysis, and psychoanalytic theory.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 684. Theory of Narrative. 3 Credit Hours.
Analysis of narrative theories, ancient to contemporary.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ENG 685. Feminist Theory. 3 Credit Hours.
Feminist writing and criticism from the nineteenth century to the present. Supplementary readings in anthropological, psychoanalytic, and socio-political criticism, as well as in theories of poetic tradition and the poetic process.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 686. Theories of Gender and Sexuality. 3 Credit Hours.
Queer theory and its relationship with gender studies, critical race studies, and emerging directions in the field.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 687. Studies in Literature and Culture since 1950. 3 Credit Hours.
Studies in Literature and Culture since 1950.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 688. Studies in Latino/a Literatures and Cultures. 3 Credit Hours.
Comparative and interdisciplinary approaches to art, film, music and literature. Topics may include: borderlands, postcolonial and "Americas" methodologies; ethnicity, race and mestizaje; immigration and the "Latiniazation" of the U.S.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 689. Comparative Americas Studies. 3 Credit Hours.
Comparative, interdisciplinary and transnational approaches to literature and cultures of the Americas.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 691. Graduate Practicum I: Teaching College Writing. 0 Credit Hours.
Methods and problems in teaching English composition and college writing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 692. Graduate Practicum II: Teaching College Literature. 0 Credit Hours.
Methods and problems in teaching introductory literature courses.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ENG 693. Teaching College Composition. 3 Credit Hours.
Rhetorical and literary theory related to composition instruction. Designed primarily for Teaching Assistants in the English Department, but open to all students planning to teach writing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ENG 695. Special Topics. 3 Credit Hours.
Varies by semester.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ENG 696. Directed Readings. 1-3 Credit Hours.
Varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ENG 697. Readings for the Qualifying Examination. 1-3 Credit Hours.
Varies by semester.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.
ENG 699. Academic Jobs in English. 1 Credit Hour.
In this course, advanced doctoral candidates will develop and refine the materials required to apply successfully for academic positions in English. They will practice interview techniques and participate in a mock interview. They will design and deliver a presentation on their teaching and research. The course’s aim is for students to complete their written job materials (e.g. CV, job letter, writing sample, teaching portfolio, and online profile) and to master the skills required to give effective interviews and job presentations.
Components: PRA.
Grading: SUS.

ENG 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in ENG 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of ENG 740 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ENG 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

M.F.A. in Creative Writing
http://www.as.miami.edu/english/creativewriting/

Master of Fine Arts in Fiction and Poetry
The University of Miami’s MFA Program in Creative Writing offers a fully funded, two-year course of study in the writing of poetry, fiction, or cross-genre literature while providing substantial training in the teaching of creative writing and composition. Students may apply to receive a third year of funding, during which graduate students focus on professional development and publication as they continue to teach undergraduate writing courses. The program features a broad multilingual focus in a vibrant, multicultural city unlike any other. Enrollment is kept deliberately small to maximize student-teacher interaction, and faculty at UM are supportive of the linguistic and cultural differences that writers bring to their art.

Full Funding
The James Michener Fellowships and Teaching Assistantships support all our graduate students. Awards include a full tuition waiver and an annual stipend. MFA candidates teach one section of Introduction to Creative Writing per semester during their second year in the program or one section each of Creative Writing and Composition.

The Third Year
Students who proceed into a third year will teach Creative Writing and Composition, with additional professional development options in literary magazine editing and communications/public outreach. They will receive faculty mentorship towards professional development.
Graduates of the MFA in Creative Writing have gone on to publish award-winning novels, books of poetry, and creative nonfiction; have been awarded Stegner Fellowships and other residencies; and have gone on to find employment in teaching and publishing.

Mission
The MFA in Creative Writing Program provides its students with a thorough understanding of how to write publishable novels, collections of stories, and books of poetry in order to contribute to the global literary canon; a range of critical and craft-based strategies in order to attain their creative and artistic vision; the skills needed to establish their own expertise, voice and style within the literary genre of their choice; the necessary preparation for careers in the production of contemporary literatures and arts administration within and outside of the academy; and training to teaching in two- and four-year colleges and in research universities. In addition to guiding our students in the writing and revision of their creative theses, we work to assist them in publishing their books, developing a forum for the reading of these works, and obtaining appropriate employment.

Goals
Student Learning Outcomes

- Students will demonstrate a thorough understanding of how to write publishable novels, collections of short stories and books of poetry in order to contribute to the global literary cannon.
- Students will master a range of critical and craft-based strategies in order to attain their creative and artistic vision and demonstrating the skills needed to establish their own expertise, voice and style within the literary genre of their choice by submitting a final portfolio and by participating in the Closing Conversation.
- Students will cultivate the necessary skills for careers in the production of contemporary literatures and arts administration.

Ph.D. in English
http://www.as.miami.edu/english

Curriculum Requirements

1. Courses
   Ph.D. students must complete 54 credit hours (if entering with a B.A.) or 36 credit hours (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements
   A basic reading knowledge of two foreign languages or an advanced reading knowledge of one foreign language is required.

3. Qualifying Examination
   All Ph.D. students are required to pass a qualifying examination. Students may not take the qualifying examination until they have:
   • completed the required Ph.D. coursework,
   • satisfied the foreign language requirement
   • enrolled for ENG 697.

4. Dissertation
   Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.
   The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.
   Further information on the department’s graduate programs is contained in the Guide to Graduate Study available from the Department of English and posted on the department Web site in the Graduate section.
   Students must complete their work within one year of the schedule set out in the Guide to Graduate Study.

   Doctoral Concentration in Early Modern Studies

   PhD students in English pursuing the doctoral concentration in Early Modern Studies must take as part of their required course credit hours a minimum of four Early Modern-focused courses (12 credit hours). A minimum of two Early Modern-focused courses (6 credits) must be in English and a minimum of two Early Modern-focused courses (6 credits) must be in History and/or Modern Languages and Literatures.

   Doctoral Concentration in Caribbean Studies (pending approval of the Board of Trustees)

   PhD students in English pursuing the doctoral concentration in Caribbean Studies must take as part of their required course credit hours a minimum of four Caribbean-focused courses (12 credit hours) as shown below:

   A minimum of two courses (6 credits) selected from the following:
ENG 658: Studies in Transatlantic Literature
ENG 665: Studies in African American Literature
ENG 666: Caribbean Literature
ENG 667: Caribbean Popular Culture
ENG 668: Studies in Race and Diasporic Literatures
ENG 686: Theories of Gender and Sexuality
ENG 687: Studies in Literature and Culture since 1950
ENG 688: Studies in Latino/a Literatures and Cultures
ENG 689: Comparative Americas Studies

A minimum of two courses (6 credits) selected from the following:

FRE 775: Topics in Francophone Studies
HIS 602: Africa and the African Diaspora
HIS 602: Africa in Cuba / Cuba in Africa
HIS 652: Race in Latin America
HIS 652: Travels through Latin America
HIS 654: Afro-Caribbean Religion: Healing and Power
HIS 654: Haiti in History
HIS 654: Caribbean Intellectual History and Social Movements
HIS 662: Slavery and Capitalism
HIS 669: Black Protest Thought
HIS 669: Rethinking African-American Culture
HIS 669: History of Global Slavery
HIS 708: Slavery in the Atlantic World
HIS 708: Atlantic Histories
HIS 716: Caribbean Field Prep
MLL 702: Bilingualism
MLL 703: Topics in Critical Studies of Language
MLL 721: Atlantic Crossings: Literature and Immigration in the Age of Globalization
MLL 727: Topics in Caribbean Studies
SPA 733: Topics in Colonial Literature
SPA 735: Topics in 19th Century Latin American and Caribbean Literature
SPA 736: Topics in 20th Century Latin American and Caribbean Literature

Or other courses with advisor or DGS approval.

Mission

The Department of English works to provide its students with a thorough understanding of literatures written in English; to introduce them to a range of critical and theoretical methodologies; to provide them with the skills needed to establish their own scholarly expertise within an area of specialization; to prepare them for careers in scholarship and research within the academy; to train them for teaching in two- and four-year colleges
and in research universities; where appropriate, to transfer and develop those research, communication, and presentation skills to non-academic settings; and to assist them in obtaining appropriate employment inside or outside higher education.

Goals
Student Learning Outcomes
- Students will demonstrate knowledge of literatures written in English and master methods of literary and cultural analysis.
- Students will develop a capacity for professional development, enabling the graduate to contribute to a profession or field of study.
- Students will demonstrate excellence in teaching undergraduate writing and literature courses.

Geography

geography.as.miami.edu

Dept. Code: GEG

Geographers have an instinctual love of maps, of places, and pay attention to the tangible worlds while posing a strong innate curiosity about the world.

Introduction
The Department of Geography and Regional Studies, has a long and distinguished history of excellent scholarship, is proud to continue its mission of education, research, and service to the community and the world about the importance of geographic knowledge. Our vibrant and diverse department is organized around three major core areas of specialization: Urbanization, Cities and Sustainability; Space, Conservation and Environment; and Public Health, Illness, and Disease. The program builds upon our strengths in urban geography, environmental studies, and medical geography along with gaining skills in methodology, including GIS, remote sensing, and statistics. For the past five years, the Department of Geography’s urban studies program has consistently ranked as one of the nation’s top 5% urban programs for its quality of research and instruction, based on data from Academic Analytics.

Degree Programs
The Department of Geography and Regional Studies at UM is home to one Geography graduate program: Master's (MA), and a Graduate Certificate in Geospatial Technology. Each graduate student selects one of the department's core program areas as a concentration for research and fieldwork, and works closely with a particular faculty adviser.

Areas of Specialization

Urbanization, Cities and Sustainability
This program examines the dramatic growth in the size, number, and population of global cities. Areas of emphasis include: Smart Cities; Global Urbanization and Infrastructure; Sustainable Development; African Urbanism; Urban Spatial Restructuring, Development Geography, Urban Health and Well-Being; Social Justice, and Ethnicity.

Conservation and Environment
This program builds upon the foundations of human geography as an integrated social science to examine the interplay of socio-spatial processes involved in shaping the complex interrelationships between societies and nature and the built environment. Areas of emphasis include: Climate Change, Biogeography, and Systematic Conservation Planning.

Public Health, Illness, and Disease
This program examines and responds to both challenges and opportunities to improve population health within and across populations and cities and metropolitan areas. Areas of emphasis include Health Disparities, Spatial Epidemiology, Community and Culturally Responsive Research and Mathematical Modeling for Disease Transmission.

Application Procedure & Financial Assistance
Applicants must submit a completed application form, at least two letters of reference, official transcripts from each undergraduate and/or graduate school attended, and an official GRE (Verbal/Quantitative/Analytical) record. The Graduate Admissions Committee evaluates the student's academic accomplishments and promise as well as the match between the applicant's professional goals and core faculty expertise. For information about the department in general, as well as the professional activities of individual faculty members, see the Department website. The application procedure may be found on the Applications page.

Transfer of Credit
The university has specific and stringent requirements concerning the transfer of credit. Please see the Graduate College website for Transfer of Credit requirements.
Financial Assistance
Please visit the Financial Support page for details.

Admission requirements and deadlines can be found on the Geography Department’s web page at http://www.as.miami.edu/geography/graduate/ and for the Certificate Program at the Certificate Program webpage at http://www.as.miami.edu/gisc/.

Major

• MA in Geography (p. 1724)

• M.P.S. in Urban Sustainability and Resilience

Certificate in Geospatial Technology

• Graduate Certificate in Geospatial Technology (p. 1723)

GEG 602. Geographic Thought and Analysis. 3 Credit Hours.
Seminar for Graduate and senior undergraduate students about geographic thought and geographical traditions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GEG 603. Research Design in Geography. 3 Credit Hours.
Designing and proposing geographic research projects based upon a critical reading of the geographical literature. Students will prepare a master’s thesis (master’s students) or dissertation (doctoral students) project proposal.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GEG 610. Survey Research Methods. 3 Credit Hours.
The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GEG 612. Health Applications of Geospatial Information Systems. 3 Credit Hours.
Ideas from a broad range of geospatial health subjects, and hands-on exercises to help students to better process spatial data and use them for specific analyses that address issues related to health.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
GEG 613. Advanced Cartography. 3 Credit Hours.
Cartographic research techniques, cognitive mapping, distortion, transformations and cartograms. Prerequisite: GEG 280 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 619. Immigration to the United States. 3 Credit Hours.
A description and analysis of current immigration patterns in the United States.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GEG 620. Sustainable Cities. 3 Credit Hours.
The emerging field of urban sustainability from an interdisciplinary perspective, by providing major theories and methodologies in sustainable urbanism, especially in terms of urban resilience, economic inequality, urban ecology, and environmental justice.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 622. Urbanization in the Developing World. 3 Credit Hours.
Patterns and processes in large cities in the developing world are examined.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GEG 623. Seminar in Urban Management. 3 Credit Hours.
Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GEG 625. Advanced Independent Study in Geography I. 1-6 Credit Hours.
Advanced independent study for Two-Paper Option for first paper.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 632. Seminar in Environmental Geography and Planetary Health. 3 Credit Hours.
Advanced topics in Environmental Geography from a systems approach.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 635. Internship in Geography. 1-4 Credit Hours.
Students are assigned to work for a local public or private agency.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

GEG 636. Sustainable Food Systems. 3 Credit Hours.
The intricacies of global geographies of major food systems, how these systems have come to be and where major food types produced, why and where the major demand centers are. It also examines what the future implication for food is through exploration and evaluation of a range of visions for a safe, sustainable food system.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 637. Development Studies. 3 Credit Hours.
Advanced seminar on issues in contemporary development studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
GEG 643. Population, Sustainability and the Media. 3 Credit Hours.
Explores opposing views of population growth and environmental sustainability through the media and cinema: contrasts "Doomsters" who believe population growth and resource consumption threaten human survival, and pro-growth "Boomsters" who believe human ingenuity and technology will continue to allow humankind to prosper.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GEG 645. Advanced Independent Study in Geography II. 1-6 Credit Hours.
Advanced independent study for Two-Paper Option for second paper.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 646. Immigrant & Refugee Health. 3 Credit Hours.
A theoretical background essential for understanding the complex interaction of migration and health. Emphasis is placed on the health issues experienced by displaced populations including refugees, migrants, and internally displaced persons.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 648. Climate Change and Public Health. 3 Credit Hours.
The mechanisms by which climate change adversely affects human health and the policy options for mitigating our exposure.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 652. Seminar on the Geography of South Florida. 3 Credit Hours.
Human and physical geography of South Florida.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 655. Field Methods and Geospatial Analysis. 3 Credit Hours.
With a focus on geospatial applications, this methods course introduces students to field research addressing complex socio-environmental issues. The course includes exercises with GPS data collection; geo-tagged photography; ground truthing; spatial survey design; and distributed GIS. Various research areas and cognate field methods including environmental demography, community surveying, cultural mapping, and multi-sited ethnography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

GEG 656. Interdisciplinary Issues in Latin American and Caribbean Studies. 3 Credit Hours.
Political, economic, social, and cultural issues of Latin American and Caribbean area Studies.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 658. Seminar in Comparative Politics I. 3 Credit Hours.
Comparative political analysis within and across nations. Debates on state formation, democracy and development, democratization, and the role of ideas, interests, and institutions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 661. Urban Geography I. 3 Credit Hours.
An introduction to the essential elements about the growth and development of cities. Review of the challenges of urbanization and urban sustainability in the contemporary period.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 663. Urban Geography II. 3 Credit Hours.
Analysis of the spatial structure of urban centers, the development of and interaction between functional zones, and the movement of goods and people in urban areas.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
GEG 680. Spatial Data Analysis I. 3 Credit Hours.
The use of basic methods or quantitative analysis for spatial data, including basic descriptive and inferential statistics and special techniques for spatial data.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 681. Spatial Data Analysis II. 3 Credit Hours.
Social and environmental science applications of spatial statistical analysis illustrated with data and numerical (simulation experiments) examples employing interactive software. This course's focus is on spatial auto correlation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 685. Digital Cartography. 3 Credit Hours.
Introduction to cartographic methods, interpretation, and history. Basic principles of visual representation, how to map qualitative and quantitative data, and how to prepare maps for publication and the web.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 691. Geographic Information Systems I. 3 Credit Hours.
An introduction to fundamental concepts in Geographic Information Systems (GIS) and related geographic technologies. Students are exposed to leading GIS software tools used in the industry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 692. Remote Sensing of the Environment. 3 Credit Hours.
Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 693. Geographic Information Systems II. 3 Credit Hours.
An introduction to spatial analysis, which consists of techniques for analyzing patterns of and interrelationships between spatial data. Topics include vector polygon editing and topology, integration of raster and vector data, surface analysis and 3D analysis, suitability mapping, spatial modeling and multi-criteria evaluations.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 695. Web GIS. 3 Credit Hours.
Map serving technologies and internet map design, focusing on the programming concepts needed to construct and implement high-quality web mapping applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 758. Seminar in Comparative Politics II. 3 Credit Hours.
Theoretical approaches and methodological debates in Comparative Politics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

GEG 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
GEG 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in GEG 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

GEG 825. Continuous Registration--Master's Study. 0 Credit Hours.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Certificate in Geospatial Technology

Overview
The Certificate Program in Geospatial Technology (GT) is designed to benefit students who seek to enhance their skills in geospatial technology, especially Geographic Information Systems (GIS) and satellite remote sensing. The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives. Students may receive credit toward the Certificate for past coursework completed at UM or other accredited schools. All fifteen credits may be double counted toward the M.A. degree, making it possible for a student to complete both the M.A. and the Certificate in two years.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Total Credit Hours 15

* Note that all courses from the Certificate Program can be double counted toward the MA in Geography Degree.

** Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 credit hours may be earned with an internship (GEG 635)

*** For more information e-mail terghazar@miami.edu to make an appointment.

Mission
This graduate certificate program is designed for students who seek to enhance their skills in geospatial technology, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will learn to work with geospatial datasets using industry-standard software including ArcGIS, ERDAS IMAGINE, TerrSet, and SPSS.

Goals
Graduates of the program will improve their employment prospects and/or advance their careers in geospatial technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS.
Student Learning Outcomes

- Students will demonstrate skills in the interpretation of geospatial datasets, statistical datasets and remotely sensed imagery, and in the preparation of those datasets for analysis and creation of maps and other products. Students will also demonstrate an understanding of the concepts and applications of geospatial technology, and apply them appropriately to the practice of mapping and digital cartography.

Mission
The Department of Geography and Regional Studies (GEG) seeks to encourage the rigorous investigation of human-environment interactions and the analysis of spatial patterns and trends related to societal processes. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures result from the interaction of space, time, and place. The department's core objective is to foster the examination, open discussion, and lively debate of geographic issues and urban studies among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Goals
Our graduate program (MA) aims to prepare students for positions in teaching, government, non-governmental organizations, private business, urban and regional planning, Geographic Information Systems (GIS), remote sensing (RS), resource management, and environmental analysis. The program focuses on three thematic areas: development studies, environmental analysis, and globalization and urban change. In addition, students can take courses in geospatial technology and learn marketable skills for today's job market: GIS, digital cartography, satellite remote sensing, land use and land cover analysis, survey research, and spatial statistics. During their studies, our students develop global citizenship, being able to see the global problems by using different lens, and develop skills to work effectively in multi-cultural environments and collaborative settings.

Student Learning Outcomes
• Students will have advanced understanding of the concepts and theories in both human and physical geographies and will be able to select and use advanced tools and methods to measure and assess spatial-temporal patterns and processes, the interrelationships between people and places, and the interactions between people and nature.
• Students will integrate and apply advanced concepts and theories in human and physical geographies and apply critical thinking to conduct an original research project.
• Students will demonstrate effective, advanced and original written, cartographic, and oral communication.

M.P.S. in Urban Sustainability and Resilience
The Master of Professional Science degree (MPS) in Urban Sustainability and Resilience is an interdisciplinary 36 credit program offered jointly between the College of Arts & Sciences’ Department of Geography and Regional Studies and the School of Architecture. The curriculum leverages the knowledge, skills and hands-on practical engagement necessary for students working toward contributing to the urban challenges confronting cities on the front lines of climate change.

Admission Requirements
• A completed Bachelor’s degree in an appropriate field from an accredited institution.
• A minimum overall undergraduate grade point average of 3.0 (on a 4.0 scale).
• A score of at least 80 on the TOEFL for international students.
• GRE minimum score of 297 or higher. (The program may waive GRE requirements GRE based on the applicant’s years of experience and the quality of experience or allow for equivalent exam substitutions, e.g. LSAT or GMAT).
• Three current letters of recommendations.
• A personal statement of academic and professional goals.

**Students Must Complete One of the Following Tracks**

**Sustainability Track**

Students Complete 9 Credit Hours from the Following Electives:

- **GEG 661** Urban Geography I (Required)
- **ARC 626** Landscape Arch Design II
- **ARC 628** Historic Preservation
- **ARC 640** Tropical Architecture
- **ARC 641** Seminar on Town Design
- **ARC 685** Special Problems (Sustainable Design in Context)
- **ARC 690** History of Cities
- **GEG 622** Urbanization in the Developing World
- **GEG 643** Population, Sustainability and the Media
- **GEG 648** Climate Change and Public Health
- **GEG 661** Urban Geography I
- **IGS 644** Energy Security and Environmental Sustainability
- **IGS 647** Disasters and Humanitarian Assistance

**Resilience Track**

Students Complete 9 Credit Hours from the Following Electives:

- **ARC 694** Geographic Information Systems in Urban Design (Required)
- **ARC 621** Housing, Infrastructure and Transportation
- **ARC 623** Urban Design Competition (Urban Design and Development Charrette)
- **ARC 639** Adaptation to Climate Change
- **ARC 643** Seminar on Retrofit of Suburbia
- **ARC 648** Seminar in Community Development
- **ARC 680** Professional Advancement, Internship + Research (PAIR)
- **ARC 684** Special Problems (RAD-LAB UM)
- **ARC 697** Designing for the Internet of Things
- **GEG 636** Sustainable Food Systems
- **GEG 680** Spatial Data Analysis I
- **GEG 681** Spatial Data Analysis II
- **RED 601** Introduction to Real Estate Development and Urbanism
- **RED 650** Complex Urban Real Estate Transactions
- **RED 660** Urban Infill, Preservation, and Mixed Use Development

**Electives (with approval of faculty advisor)**

- **6**

**Practicum, Design Studio or Project Studio Report**

- **6**

**Total Credit Hours**

- **36**

**Mission**

The purpose of this interdisciplinary MPS in Urban Sustainability and Resilience program is to provide the knowledge, skills and hands-on practical engagement necessary for students working toward contributing to the urban challenges of the 21st century.

**Goals**

- Students will gain an interdisciplinary understanding of the spatial and temporal transitions involved in pathways toward urban sustainability (focusing on challenges such as health, housing, the environment, crime, and sea-level rise).
- Students will gain skills in methodology, including Geographic Information Systems (GIS), urban design, remote sensing, data visualization, and qualitative or quantitative methods. The knowledge acquired by students can contribute to future policies that lead to more sustainable development pathways.

**Student Learning Outcomes**

- Through the advanced understanding of the concepts and theories of both Sustainability Science, Design, Planning and Geography, students will be able to select and use advanced tools and methods to measure and assess synergies and trade-offs among governance, environmental conservation, economic prosperity, and social inclusion.
- Students will be able to translate research on sustainability development, resilience and geography into policies and programs that seek to solve some of the recurrent urban problems.

**Global Health and Society**

https://global-health.as.miami.edu/

The Master of Arts in Global Health and Society (GHS) provides a comprehensive framework of global health that underscores the sociopolitical, economic, and geographic factors that, in addition to biomedical factors, impact health conditions of various countries and populations throughout the world. The GHS program is 36 credits, and offers a range of interdisciplinary courses that examine the emerging challenges to human health and security, the differential access and adoption of evidence-based health policies and practices, and how these interventions translate from international to community scales. Our students gain the social science knowledge and methodologies to integrate stakeholders and researchers in the design, implementation, interpretation of community-based participatory studies. Additionally, graduates of our program acquire skills in leadership and advocacy, and combined with a deep understanding of policy and governance, are prepared to assist private, government, non-profit, and for-profit organizations formulate new global and community health strategies.

There are three tracks in the GHS program:

- Global Health General
- Policy, Governance and Advocacy
- Community-Based Participatory Research, Monitoring and Evaluation (CBPR)

**Master of Arts in Global Health and Society**

M.A. in Global Health and Society
M.A. in Global Health and Society

Admission Requirements
The Master of Arts in Global Health & Society employs a rolling admissions deadline. Students may apply for the Fall, Spring, and Summer admission. Interested students should contact the program with any questions.

- **Online Application**
