Each Student is required to complete a Program of Study and have it approved by their Supervisory Committee and the Graduate Program Director prior to entering the program.

Internships, Practical Training, Workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605 (http://bulletin.miami.edu/search/?search=umi+605)) will not count towards any CAE degree requirements. CAE 665 - 669 and CAE 765 - 769 shall not count towards the degree.

The Supervisory Committee at the University of Miami must have a minimum of 3 members, including:

1. Committee Chair (Advisor) shall be full-time CAE Faculty and a member of the Graduate Faculty
2. Full-time or Part-time CAE Faculty
3. Non-CAE member with an earned Ph.D.

In addition to the Committee Chair, at least one member must be tenured/tenure-earning or a member of the Graduate Faculty.

**Ph.D. in Civil Engineering**

**Overview**

The Department of Civil, Architectural, and Environmental Engineering (CAE) offers a Doctor of Philosophy (Ph.D.) degree in Civil Engineering with the following areas of emphasis:

- Civil Engineering
- Architectural Engineering
- Environmental Engineering

The educational objectives of the Doctor of Philosophy program in Civil Engineering are to produce graduates whom:

1. Have advanced technical knowledge in at least one specialty area of civil engineering
2. Have advanced capability to apply advanced knowledge to engineering problems
3. Have made significant contributions in at least one specialty area of civil engineering

The specialty areas of study for the Ph.D. include:

- Structural Engineering and Structural Materials
- Environmental Engineering
- Water Resources Engineering
- Integrated Building Systems
- Mechanical, Electrical, and Plumbing (MEP) Systems

For students who already have an earned Master of Science (in either civil, architectural, or environmental engineering, or a closely related engineering field), 30 graduate-level credits are required beyond the M.S. degree. For students who do not have an M.S. (in civil, architectural, or environmental engineering, or a closely related engineering field), a minimum of 60 graduate-level credits are required beyond the B.S. degree. All students are required to engage in supervised research and defend a dissertation.
The Program of Study is the student’s specific set of coursework that defines the course requirements for graduation and must be approved by an advisory committee (known as the Supervisory Committee). Depending on whether the student already has an earned M.S. degree, the Ph.D. degree can typically be completed within two to five years.

**Curriculum Requirements**

**For a Ph.D. following an M.S.**

For students who already have an earned M.S. (in civil, architectural, or environmental engineering), a minimum of 30 graduate-level credits are required beyond the B.S. degree with an average of "B" or better and no grade below a "C". Of the credits:

- At least 18 credits in CAE
- At least 18 credits of lecture-based and/or Independent Study courses
- At least 6 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- 12 credits of Doctoral Dissertation (CAE 830 and/or CAE 840)
- A total of 6 credits of transfer and/or exchange coursework (not counted towards the B.S. or M.S. degrees) may be taken at another institution and used to satisfy the requirements for the Ph.D. degree.

The table presents an overview of the courses selection:

<table>

<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

Note: All courses, except Dissertation, are 3 credit hours unless otherwise indicated. Refer to the Additional Details section (below) for additional options and restrictions.

**For a Ph.D. without prior M.S.**

For students who do not have an M.S. (in civil, architectural, or environmental engineering), a minimum of 60 graduate-level credits are required beyond the B.S. degree with an average of "B" or better and no grade below "C". Of the 60 credits:

- At least 42 credits of lecture-based and/or Independent Study courses
- At least 12 credits of lecture-based CAE courses at the 700 level (not Independent Study)
- At least 30 credits in CAE
- 18 credits of Doctoral Dissertation (CAE 830 and/or CAE 840)
- A total of 12 credits of transfer and/or exchange coursework (not counted towards the B.S. or M.S. degrees) may be taken at another institution and used to satisfy the requirements for the Ph.D. degree.

</tr>
<tr>
<td>10 Elective Courses</td>
<td></td>
<td>30</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td></td>
<td><strong>60</strong></td>
</tr>
</tbody>
</table>

Note: All courses, except Dissertation, are 3 credit hours unless otherwise indicated. Refer to the Additional Details section (below) for additional options and restrictions.

**Qualifying Examination**

A Ph.D. student must pass a Qualifying Examination, generally taken at the end of the first year of study, before being allowed to defend a dissertation proposal. The examination, administered by the student’s Supervisory Committee, must consist of a written component, and may also include an oral component if deemed appropriate by the Supervisory Committee. Three outcomes of the examination are possible: Pass, Fail, and Fail with option to re-take once. For students retaking the exam, the Committee will determine a suitable time frame, but not to exceed 6 months.
Dissertation Proposal Defense
Subsequent to passage of the Qualifying Examination, the student can defend his/her Dissertation Proposal to their Dissertation Committee, which is typically the same as the student’s Supervisory Committee or, if not, has makeup equivalent to the Supervisory Committee. All Committee members must approve the Proposal.

Admission to Candidacy
Admission of the student to Candidacy is subject to passage of the Qualifying Examination and passage of the oral Dissertation Proposal Defense.

Dissertation Defense
The Ph.D. thesis must be defended to, approved by, and signed by the student’s Dissertation Committee, which is typically the same as the student’s Supervisory Committee or, if not, has a composition that is equivalent to the Supervisory Committee.

Additional Details
- Master’s Design Project (CAE 604) will not count towards the Ph.D. degree requirements.
- Internships, Practical Training, workshops, or other types of practicum are neither required nor optional credit-earning components in the established graduate curriculum (Program of Study). Credit earned through these experiences (such as UMI 605) will not count towards any CAE degree requirements. Courses CAE 665 - 669 and CAE 765 - 769 shall not count towards the degree.
- At a minimum, a qualifying exam and a final public oral examination in defense of the thesis are required.
- The Supervisory Committee (and Dissertation Committee) must have a minimum of 4 members, including:
  1. Committee Chair (Advisor) shall be full-time CAE faculty and a member of the Graduate Faculty.
  2. CAE faculty and a member of the Graduate Faculty
  3. CAE faculty and a member of the Graduate Faculty
  4. Non-CAE member with an earned Ph.D.

Mission
The mission of the Department of Civil, Architectural, and Environmental Engineering is to:
- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning;
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life; and
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise.

Goals
The educational objectives of the Ph.D. program are to produce graduates whom:
- Have advanced technical knowledge in at least one specialty area of civil engineering;
- Have advanced capability to apply advanced knowledge to engineering problems; and
- Have made significant contributions in at least one specialty area of civil engineering.

[Specialty areas include structural, environmental, water-resources, and architectural engineering.]

Student Learning Outcomes
- Students will demonstrate an advanced knowledge of the discipline (mathematics, science, and engineering), including methodology relevant to a specialty area.
- Students will demonstrate an advanced ability to identify, formulate, and solve engineering problems to carry out supervised research.
- Students will demonstrate an advanced ability to generate technical contributions and effectively communicate them to the scientific community.

Electrical and Computer Engineering
https://ece.coe.miami.edu/
The Department of Electrical and Computer Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Electrical and Computer Engineering. Five-year BS and MS dual degree programs are available for qualified undergraduate students enrolled within the Department.

Current research interests of the faculty include:
• Statistical signal processing.
• Image and video processing, pattern recognition, computer vision, automation of visual tasks.
• Machine learning and big data analytics.
• Bioinformatics, computational biology, and genomics.
• Nano-photonics, plasmonics, micro/nano-electronic devices, nano-materials and structures.
• Fusion and learning in networks.
• Data mining, multimedia information systems, multimedia networking and security.
• Intelligent sensor microchips and MEMS, BioMEMS, implantable medical devices, VLSI, ASICS, system-on-a-chip, FPGAs.
• Integrated optics, holography, lithography, spectral imaging, optical coherence tomography.
• Game theory, multi-agent systems.

Master of Science in Electrical and Computer Engineering (MSECE)
Must complete either a thesis option (consisting 24 course credits + 06 thesis credits) or a non-thesis option (30 course credits). Thesis option requirements include the submission and oral defense of a thesis supervised by a Research Supervisor.

Doctor of Philosophy (PhD)
Must complete 30 credits (18 course credits + 12 dissertation credits). Requirements include successful completion of a Qualifying Examination, an oral defense of a research proposal, and submission and oral defense of a dissertation supervised by a Research Supervisor.

Masters Programs in Electrical and Computer Engineering
• M.S. in Electrical and Computer Engineering (p. 2280)
• Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option (p. 1136)
• Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Audio Engineering Option (p. 1139)
• Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option (p. 1152)
• Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree - Software Engineering Option (p. 1155)

Doctoral Program in Electrical and Computer Engineering
• Ph.D. in Electrical and Computer Engineering (p. 2282)

ECE 600. Engineering Analytical Techniques. 3 Credit Hours.
Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 602. Engineering Acoustics. 3 Credit Hours.
Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered. Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 603. Laser Communications. 3 Credit Hours.
Principles of optics, optical fibers, electro-optics, light wave propagation in free space and anisotropic media, and waveguides are discussed. Communication devices including lasers, detectors, electro-optic modulators, optical fiber communication links are covered. The course includes seven hands-on experiments. Prerequisite: PHY 222 and PHY 223 and ECE 301 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 604. Fundamentals of Optical Imaging. 3 Credit Hours.
Introduction to optical imaging, optical coherence tomography imaging, fiber endoscope imaging, and spectral imaging. Learn grating diffraction, interferometer, and optical spectrometer. The course includes ten hands-on experiments. Gain system level understanding of optical coherence tomography and spectral imaging.
Prerequisites: ECE 301 or BME 545.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 605. Semiconductor Photonic Devices. 3 Credit Hours.
Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices.
Prerequisite: ECE 302, 306, 405.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 606. Microfabrication. 3 Credit Hours.
Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 632. VLSI Systems. 3 Credit Hours.
Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered. * For students who are taking it as ECE 632 there will be a separate advanced final project that will include the use of all digital circuit library that will be developed in the lab exercises and in addition include an analog component to achieve a mixed signal system integration. This will require additional research study as well as comprehension of more advanced topics in VLSI. Supplemental material and additional project instruction will be delivered in the lab.
Prerequisite: ECE 202. Or ECE 305. And ECE 211. Or ECE 304.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 633. Random Signals and Noise. 3 Credit Hours.
Probability models, Bayes’ theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.
Prerequisite: ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 634. Communication Networks. 3 Credit Hours.
Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching a3nd routing, and network performance are discussed. * For students who are taking it as ECE 634 there will be a separate requirement.
Prerequisite: ECE 212. Or ECE 312. And ECE 310. Or IEN 310.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 636. Adaptive Filters and Signal Processing. 3 Credit Hours.
Topics include linear models and estimation, orthogonality principle, Wiener filters, stochastic gradient methods, LMS and RLS algorithms, mean square error and tracking performance and applications.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 637. Principles of Artificial Intelligence. 3 Credit Hours.
Search techniques, game trees, use of heuristics, logic, representation of knowledge, algorithms for automated reasoning including automated reasoning under imperfect information, some advanced approaches to AI-Problems such as planning.
Prerequisite: ECE 218.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 638. Introduction to Digital Image Processing. 3 Credit Hours.
Prerequisite: ECE 206. Or ECE 307. And MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 639. Digital Communications. 3 Credit Hours.
Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.

ECE 640. Digital Speech and Audio Processing. 3 Credit Hours.
Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.
Prerequisite: ECE 336.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 642. MEMS: Sensors and Electronics. 3 Credit Hours.
This course will introduce the fundamentals of Microelectromechanical Systems (MEMS). An introductory foundation of MEMS concepts will be established through lectures on sensors, actuators, readout electronics, and noise. Physical principles of electromechanical, piezoresistive, capacitive, and piezoelectric sensing will be introduced. Based on these design and analysis principles the course will focus on commercial applications such as accelerometers, biochemical sensors, RF components, microfluidics, and optical devices. Sensor electronics will be discussed with a focus on integration with Complementary Metal Oxide Semiconductor (CMOS) technology.
Prerequisite: Permission of Instructor OR ECE 532.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 643. BioNanotechnology. 3 Credit Hours.
Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 646. Reliable Digital System Design. 3 Credit Hours.
Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in ECE 454. Offered only for Graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 648. Machine Learning. 3 Credit Hours.
Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 653. Neural Networks. 3 Credit Hours.
Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.
Prerequisite: ECE 218. Or MTH 309.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 662. Wireless and Cellular Communication. 3 Credit Hours.
Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.
Prerequisite: ECE 404.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 664. Wireless Networks. 3 Credit Hours.
Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks. IEEE 802.11 (Wi-Fi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.
Pre or Corequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 672. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 673. Information Assurance. 3 Credit Hours.
Assurance as the basis for believing an information system will behave as expected. Security design fundamentals that help create systems that are fit for their purpose and worthy of being trusted. The concepts of information assurance fundamentals. Vulnerabilities and Risk Management assessment. Security Life-Cycle, Mechanisms, Frameworks and Emerging Threats.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 674. Agent Technology. 3 Credit Hours.
Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agent, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.
Prerequisite: ECE 537 Or ECE 637.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 675. Digital Forensics. 3 Credit Hours.
The techniques and skills to apply forensics techniques throughout an investigation life cycle while complying with legal requirements. Preservation, identification, extraction and documentation of computer evidence stored on a computer. Application of forensics techniques to investigate and analyze a host in a network, devices including mobile, and techniques to investigate and analyze network traffic.
Prerequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 676. Internet and Intranet Security. 3 Credit Hours.
Security issues and applications for securing internet and Intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.
Prerequisite: ECE 218 or CSC 322 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 677. Data Mining. 3 Credit Hours.
Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 678. Network Security. 3 Credit Hours.
Information about the threats that may be present in the cyber realm and the techniques that can be taken to protect a network and communication assets from cyber threats. Threat examination and application of security measures. Implementation of network defense measures and adjustments for cloud and hybrid applications.
Prerequisite: ECE 634.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECE 680. Electrical and Computer Engineering Internship. 1-3 Credit Hours.
Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 681. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 682. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

ECE 683. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 684. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 685. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 686. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 687. Special Topics in Computer Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Computer Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 697. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 698. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 699. Special Topics in Electrical Engineering. 1-3 Credit Hours.
Lecture courses in selected areas of specialization within Electrical Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 715. M.S. Design Project I. 3 Credit Hours.
Comprehensive M.S. design project in electrical or computer engineering. Open only to students in the BS/MS dual-degree program.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 716. M.S. Design Project II. 3 Credit Hours.
Continuation of ECE 715. Open only to students in the BS/MS dual-degree program.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECE 720. Convex Optimization. 3 Credit Hours.
This course aims to give students the tools and training to recognize convex optimization problems that arise in scientific and engineering applications, presenting the basic theory, and concentrating on modeling aspects and results that are useful in applications. Topics include convex sets, convex functions, optimization problems, optimality condition and duality, and algorithms. Applications to signal processing, machine learning and wireless communications are presented.
Prerequisite: MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 725. Statistical Signal Processing. 3 Credit Hours.
Fundamentals of statistical signal processing, focusing on detection and estimation. Detection: hypothesis testing, Neyman-Pearson criterion, Bayes risk, generalized likelihood ratio tests. Estimation: minimum variance, maximum likelihood, maximum a-posteriori, and minimum mean squared error methods, Cramer-Rao and Bayesian bounds, expectation maximization, least squares, Kalman filter, sparse solutions, applications. Students should have completed basic courses on linear algebra and probability prior to taking this course.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 730. Statistical Learning. 3 Credit Hours.
Statistical learning theory, high-dimensional data models, regression, classification, sparse kernel machines, mixture models, graphical models, Markov chain Monte Carol simulation, model assessment and selection, model inference and combining.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 735. Fundamentals of Network Science. 3 Credit Hours.
Mathematics of networks; network measures and metrics; power laws and scale-free networks; Erdos-Renyi random networks; random networks with general degree distributions; models of network formation, including preferential attachment models.
Prerequisite: MTH 210.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECE 738. Computer Vision. 3 Credit Hours.
Principles of computer vision. Segmentation, shape and texture analysis, 3D scene analysis, polyhedral scenes, time-varying image analysis, parallel processing algorithms, matching, and recognition are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 753. Pattern Recognition and Neural Networks. 3 Credit Hours.
Statistical pattern classification, feature extraction, cluster analysis, neural net models, Hopfield net, competitive learning, multi-layer perceptron, and the Boltzmann machine are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 756. Information Theory. 3 Credit Hours.
Measure of uncertainty and entropy, two dimensional sources, noisy channels, mutual and transinformation, equivocation, efficiency and channel capacity, minimum redundancy coding, error-detecting, error-correcting codes, continuous channel without memory. Gaussian additive noise, sampling theorem, and vector space are covered.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ECE 781. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall.

ECE 782. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECE 783. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 784. Advanced Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

ECE 785. Advanced Problems in CyberSecurity. 3 Credit Hours.
Comprehensive M.S. capstone project in CyberSecurity.
Components: THI.
Grading: GRD.
Typically Offered: Spring.

ECE 792. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.
This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.
Components: MOD.
Grading: SUS.
Typically Offered: Fall & Spring.

ECE 795. Advanced Topics in Computer Engineering. 1-3 Credit Hours.
Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ECE 796. Advanced Topics in Computer Engineering. 1-3 Credit Hours.
Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

ECE 797. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

ECE 798. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.
Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

ECE 799. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.
Grading: GRD.
 Typically Offered: Offered by Announcement Only.

ECE 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
 Typically Offered: Fall & Spring.

ECE 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ECE 810 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.
Grading: GRD.
 Typically Offered: Fall & Spring.

ECE 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.
Grading: GRD.
 Typically Offered: Fall & Spring.

ECE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 hours of ECE 830 may be taken in a regular semester; no more than six in a summer session.

Components: THI.
Grading: SUS.
 Typically Offered: Fall, Spring, & Summer.

ECE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 credits in ECE 840 may be taken in a regular semester; no more than six credits in a summer session.

Components: THI.
Grading: SUS.
 Typically Offered: Fall, Spring, & Summer.
ECE 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

M.S. in Electrical and Computer Engineering

The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.) with a thesis option (24 course credit hours and 6 thesis credit hours) or a non-thesis option (30 course credit hours and no thesis credit hours). The M.S.E.C.E. program offers five tracks: audio engineering, data analytics, Microdevices and Photonics, cybersecurity, and a general ECE track.

Admissions Requirements
Admission to MS degree programs in the College of Engineering (CoE) at the University of Miami is competitive. A qualified applicant needs a strong academic record, as evidenced by their grades in relevant coursework (traditionally a cumulative gpa of 3.0 or higher). Additionally, prospective students should have a 300 or higher on the GRE General Test (verbal plus quantitative), acceptable scores on TOEFL or ILETS exams (English proficiency exams for international students only), as well as comprehensive letters of recommendation. Transfer of credits from other institutes complies with the rules of the graduate school. Many of our applicants have research experiences that have resulted in publication.

Traditionally a BS degree in engineering is required for admission into one of our MS programs. Students who do not have a degree in an Engineering field can still apply and will be considered by the admission committee, but if admitted pre-requisite coursework is traditionally required before being fully admitted into MS studies with us.

Graduation Requirements
The M.S.E.C.E. program with the non-thesis option complies in full with the CoE degree requirements
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 course credit hours must be at the 700-level.
- In addition, the cybersecurity track requires a 3-credit-hour graduating project.

The M.S.E.C.E. program with the thesis option, complies with the following CoE degree requirements
- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 of the course credit hours must be at the 700 level
- 6 credit hours of the required 30 must be earned in thesis work.

In addition to the CoE degree requirements, the M.S.E.C.E. program with the thesis option requires the following:
- Appointment of a Thesis Defense Committee comprised of at least 3 members: the Chair of the committee is the Research Advisor who must have RF/GF status within ECE; at least one other member (excluding the Research Advisor) must have RF/GF status within ECE; at least one member must be from outside ECE.

Curriculum Requirements

General ECE Option
Any 600-level and 700-level ECE courses and courses in other departments with the approval of the academic advisor.

Audio Engineering Option

Total Credit Hours 21

1 Remaining credits may be taken from 600/700 level courses in ECE, CS, MTH, or any other department in consultation with the academic advisor.

2 Additional Elective Course Areas: Legal Issues (Digital Evidence and Analysis, Privacy, Legal Response/Responsibilities, Policies)
Mission
The MS program in the Department of Electrical and Computer Engineering is designed to prepare students for both of the following:

- Advanced academic degrees leading to successful careers in teaching and research; and
- Rewarding and productive careers in industrial and government research positions.

Goals
Student Learning Outcomes
- The graduate will be able to exhibit broad understanding and mastery of the basic corpus of knowledge representing the discipline. They should be able to apply in their work 1) advanced mathematical principle and 2) advanced knowledge of science and engineering.
- The student will leave the university with the ability to apply critical thinking to complex engineering problems. This means that they should be able to 1) identify advanced engineering problems and address then, and 2) demonstrate proficiency in critically analyzing and solving advanced engineering problems.
- The students will demonstrate proficiency in conveying the results of their work both in terms of written communication and convincing oral presentation.

Ph.D. in Electrical and Computer Engineering
The Ph.D. degree is designed so that it
- offers students the theoretical, practical, and professional knowledge that will enable them to pursue discovery of new knowledge;
- allows students to conduct visible high-quality research that will advance the state of knowledge; and
- serves to train, motivate, and inspire our graduates to become leaders in their fields.

Admission Requirements
The minimum GRE requirement is 310 (verbal plus quantitative) for the B.S. to Ph.D. track, and 305 for the M.S. to Ph.D. track. Other requirements are identical to the CoE requirements. The transfer policy complies with the rules of the graduate school.

Graduation Requirements
The average grade of course works should be B or better, and no grade can be below C. Other requirements are identical to the CoE requirements.

Qualifying Examination
The Ph.D. Qualifying Examination is held twice a year, one week prior to the beginning of the Fall and Spring semesters. The applicant must select four subject areas listed in the following:

Computer Engineering (CE) Program
CE1 Programming Languages and Algorithms
CE2 Computer Networks
CE3 Computer Architecture and Digital Systems
CE4 Database and Distributed Systems
CE5 Analytical Techniques

Electrical Engineering (EE) Program
EE1 Signals and Systems
EE2 Communications
EE3 Circuits and Electronics
EE4 Solid-State Physics and Devices
EE5 Analytical Techniques

The criteria for subject selection are as follows:
- Select the PROGRAM (CE or EE) (in consultation with Research Advisor).
- Select FOUR subjects as follows:
  - THREE from the selected PROGRAM
  - ONE from the other PROGRAM

Subject matter in CE5 and EE5 are identical, and both CE5 and EE5 cannot be selected in one sitting.
Requirements for satisfactory completion of the Ph.D. qualifying examination are:

- **Taking the Ph.D. Qualifying Examination:**
  - The first attempt must be within two semesters (summers excluded) of initial enrollment in the Ph.D. program.
  - Any student failing to pass the examination during the first attempt, can retake the examination a second time during its immediate next offering (see Passing the Ph.D. Qualifying Examination section below).
  - Any student failing to pass the examination a second time will have his/her Ph.D. status terminated.

- **Passing the Ph.D. Qualifying Examination:** To pass the examination, a student's grades must satisfy the following criteria:
  - **Criterion 1:** Average grade of "B" (3.000) or better for the entire 4-subject examination: a student failing to meet this criterion will be required to repeat the whole examination during its immediate next offering. The student may change the subject areas selected.
  - **Criterion 2:** Grade of "C" (2.000) or better for each subject: each subject failing to meet this criterion will have to be repeated during the immediate next offering of the Ph.D. Qualifying Examination. No change in the subject area is allowed and the average grade computed with the re-taken subject together with the remaining subject areas previously taken must satisfy Criteria 1 and 2 to successfully pass the examination.

**Dissertation Committee**

The dissertation committee should comprise at least 5 members: the Chair of the committee is the Research Advisor who must be a member of the Graduate Faculty; at least two other members (excluding the Research Advisor) must be ECE faculty members as well as members of the Graduate Faculty; at least one member must be from outside ECE.

**Dissertation Proposal Defense**

An oral defense of a dissertation proposal on an original research topic before the dissertation committee is required.

**Admission to Candidacy**

Requirements are identical to the CoE requirements.

**Mission**

Provide outstanding graduate educational programs to students in electrical engineering, and computer engineering. Conduct visible high-quality research programs that will advance the state of knowledge in the fields of electrical engineering and computer engineering and will serve to train, motivate and inspire our graduates to become leaders in their fields.

**Goals**

Graduates of the Ph.D. program will have the theoretical, practical, and professional knowledge that will enable them to independently pursue the discovery of new knowledge and methods that enhance the theory and practice of electrical engineering and computer engineering. Graduates will be qualified for entry-level academic positions, or research positions in industrial and government research institutions and laboratories.

**Student Learning Outcomes**

- Students will demonstrate advanced understanding of a broader range of subject areas and expertise in their research work that will allow them to be at a vanguard position when entering the workforce, in either academic or industrial/government careers.
- Students will demonstrate an established record of original and independent research contributions.
- Students will demonstrate ability to communicate the results of their technical both in writing and in oral presentations.

**Industrial Engineering**

**Department Mission Statement**

The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

**Degree Programs**

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- Master of Science in Occupational and Ergonomics Safety
• MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
• Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

• a Ph.D. in Ergonomics and Human Factors
• a Ph.D. in Industrial Engineering.

Masters Program in Industrial Engineering

• M.S. in Industrial Engineering (p. 2290)
• M.S. in Environmental Health and Safety (p. 2290)
• M.S. in Management of Technology (p. 2292)
• M.S.I.E./M.B.A. Executive Program (p. 2293)

Doctoral Program in Industrial Engineering

• Ph.D. in Industrial Engineering (p. 2294)

IEN 601. Manufacturing Analysis and Design I. 3 Credit Hours.
Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.
Prerequisite: IEN 301.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 602. Manufacturing Analysis and Design II. 3 Credit Hours.
Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 605. Robotics. 3 Credit Hours.
Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies. Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.
Components: LEC.
Grading: GRD.

IEN 607. Design of Manufacturing Systems. 3 Credit Hours.
State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.
Prerequisite: Graduate Standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 612. Statistical Quality Control and Quality Management. 3 Credit Hours.
This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advanced topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.
Prerequisite: IEN 311 or MAS 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 613. Quality Management in Service Organizations. 3 Credit Hours.
Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 616. Introduction to Applied Data Analytics. 3 Credit Hours.
This course focuses on some of the most commonly-used data analytics models and covers the basics of data analytics using the open source software R (which is one of the fastest growing open source software platforms). Specific course topics include Data Preprocessing and Cleaning, Fundamentals of R (for basic data analytics tasks), Regression Analysis, Discriminant Analysis & Classification, Segmentation/Clustering, Model Tuning/Selection, Performance Measurement in Data Analytics, and Decision Making with Data. This course provides hands-on skills to engineering graduate students with performing statistical data analysis and decision-making utilizing common types of data sets.
Prerequisite: IEN 442 And IEN 312.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 624. Decision Support Systems in Industrial Engineering. 3 Credit Hours.
Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 647. Computer Simulation Systems. 3 Credit Hours.
Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 648. Games and Decision Making. 3 Credit Hours.
This course covers fundamentals of decision theory and game theory. The course is research oriented and a significant part of the grading will be based on students' research. Topics include optimization with multiple variables, constrained optimization, Lagrange relaxation, utility theory, decision making under uncertainty, simultaneous move (Nash) games, sequential decision making, sequential (Stackelberg) games, games with imperfect information, contracting and coordination, and bargaining. This course is composed of lectures, in-class discussions and problem solving, homework assignments, and research paper assignments.
Prerequisite: IEN 310. And IEN 441.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 651. Accident Prevention Systems. 3 Credit Hours.
Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems
Prerequisites: IEN 311 and IEN 351.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 654. Applied Computational Biomechanics. 3 Credit Hours.
Students will become familiarized with current tools in the field of computational biomechanics for applications in ergonomics, sports performance, simulations of occupational activities and human movement in general. Through the presentation of case studies and the completion of assignments, students will gain hands-on experience on full-body simulation environments (e.g., OpenSim), biomechanically oriented finite elements packages (e.g., FEBio), and software for reconstruction of human anatomy from medical images (Seg3D).
Prerequisite: IEN 557. Or BME 375.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 657. Ergonomics and Human Factors Engineering. 3 Credit Hours.
The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.
Requisite: Graduate Standing.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Summer.

IEN 658. Industrial Hygiene I. 3 Credit Hours.
Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OHSA requirements with special emphasis on industrial ventilation, and other methods of control are included.
Prerequisite: IEN 557.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 668. Materials Handling and Facilities Planning. 3 Credit Hours.
Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed
Components: LEC.
Grading: GRD.

IEN 670. Engineering Management. 3 Credit Hours.
Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 671. Engineering Entrepreneurship. 3 Credit Hours.
The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 672. Management of Technological Innovation. 3 Credit Hours.
Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological, planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.
Prerequisite: IEN 572.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 690. Special Topics in Industrial Engineering. 3 Credit Hours.
Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".
Components: LEC.
Grading: GRD.

IEN 694. Master’s Capstone Design Project. 3 Credit Hours.
A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 695. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
IEN 696. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 699. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student’s field of study. Course may be repeated. Periodic reports and conferences are required.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 712. Design of Experiments. 3 Credit Hours.
Design and analysis of experiments, randomized blocks, Latin Squares, factorials, multiple correlation and regression, and application to response surfaces are discussed. 3 hours.
Prerequisite: IEN 311 or MAS 311 or equivalent.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 713. Applied Regression Analysis. 3 Credit Hours.
Theory and applications of regression based models. Focus will be on empirical model building, estimation, inference and prediction with emphasis on interpretation of results and understanding model assumptions. Key Topics will be linear regression, panel data and time series analysis.
Prerequisite: IEN 311.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 715. Quality Through Planned Experimentation. 3 Credit Hours.
Sequential experimentation and guidance on how to build the sequence and use graphical methods to ascertain how much the planned changes contribute to the variation in the data. Experimentation is presented as a system in the context of a model to improve quality and integrate statistical process control (SPC) with methods of design. Examples presented contain problems often encountered in actual experimentation in a manufacturing or a service facility. Not open to students with credit in IEN 712.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 716. Advanced Quality Control. 3 Credit Hours.
Advanced topics in variables and attributes acceptance sampling and control charting. Statistical and economical design of control chart and sampling plan, sampling design and analysis with inspection and measurement errors, product liability prevention, value engineering, quality costs, Metrology, military standards, quality manuals, customer and vendor relations, and total quality control concepts are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 742. Linear Programming and Extensions. 3 Credit Hours.
Formulation, solution, postoptimality analysis of linear programming problems; revised simplex, parametric programming, decomposition of large-scale systems. Use of computer packages. Introduction to integer programming, network flows, and nonlinear programming applications.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 757. Ergonomics and Occupational Biomechanics. 3 Credit Hours.
Effects of human factors in the improvement of performance of systems. Human capacities, capabilities, and limitations as derived from anatomical, physiological, and psychological principles are applied to the design of tools and equipment. Incorporation of all factors into systems design to achieve better system performance is emphasized
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 758. Ergonomics and Special Populations. 3 Credit Hours.
Ergonomic issues relevant to design for older adults and special populations such as the handicapped. Primary emphasis is placed on work environments, transportation and communication systems, and home environments. Topics include cognitive and physiological characteristics of special populations, workplace design, job and equipment design, rehabilitation engineering, clinical ergonomics, and legislation such as the ADA. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 760. Productivity Measurement and Evaluation. 3 Credit Hours.
Basic concepts. Productivity measurement approaches at international, national, industry, and company levels. Latest measurement models for manufacturing companies. Relationships between total and partial productivities, profit and total productivity. Productivity evaluation: theory and methodology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 761. Engineering Cost Management. 3 Credit Hours.
Issues of cost management, including activity based costing of engineering projects. A detailed study of how to separate, identify, understand and manage the major activities performed, and how these activities relate to customer needs. Overall view of costs associated with products, processes, and customers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 763. Project Management Techniques. 3 Credit Hours.
Techniques and Tools in Project Management. Use of network flow techniques including PERT/CPM, planning, systems concepts, time management, conflicts, cost and resource control, tradeoff analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

IEN 764. Supply Chain Management. 3 Credit Hours.
Supply Chain Management focuses on the flow of products, information, and money throughout the supply chain. An overview of issues, opportunities, tools, and approaches is provided. Emphasis is placed on business processes, system dynamics, control, design and re-engineering, and on the relationship between the supply chain and the company’s strategic position relative to its clients and its competition. The dimensions of intercorporate relationships with partners, including decision-making, incentives, and risk are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 765. Advanced Production Systems. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

IEN 772. Strategic Management of Technological Innovation.. 3 Credit Hours.
Advanced topics in the management of technology emphasizing the relationship between technology and competitiveness in the global marketplace. Technology development in the U.S., Japan, and Europe, industrial R & D, strategic technological planning, and conditions for successful implementations. Case studies are used with individual and group assignments. Prerequisite: IEN 572 - Management of Technology or permission of Instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 791. Industrial Engineering Seminar. 0 Credit Hours.
Oral presentation and discussion of current topics in Industrial Engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
IEN 792. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.
This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.

Components: MOD.
Grading: SUS.
Typically Offered: Fall & Spring.

IEN 794. Master's Project. 3 Credit Hours.
A capstone project for M.S. students in the non-thesis option.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

IEN 795. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 796. Special Problems. 1-3 Credit Hours.
Research and/or design projects through an individual investigation. of current problems. Offered by special arrangement only.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 799. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title “Advanced Topics”.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

IEN 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

IEN 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in IEN 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

IEN 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

IEN 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of IEN 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

IEN 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in IEN 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
IEN 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Environmental Health and Safety
Master of Science in Environmental Health and Safety
An interdisciplinary M.S. degree program in Environmental Health and Safety is offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

The program will consist of a 36 credit hours in the areas of environmental health and safety.

Mission
The Department of Industrial Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Goals
Student Learning Outcomes

- Graduates will demonstrate an ability to apply knowledge and methodology to advanced problems in Environmental Health and Safety.
- Graduates will demonstrate an ability to write effectively about advanced Environmental Health and Safety topics.
- Graduates will have an ability to present their findings effectively about advanced Environmental Health and Safety topics.

M.S. in Industrial Engineering
Overview
The Master of Science degree in Industrial Engineering includes the following areas of concentration:

1. Engineering Management
2. Ergonomics and Human Factors
3. Health Care Systems
4. Management of Technology
5. Manufacturing Engineering
6. Data Analytics
7. Operations Research
8. Productivity Engineering
9. Quality
Admission Requirements

1. Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant’s abilities and background. Students who hold a bachelor’s degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student’s overall program is planned by the student and the Graduate Advisor.

2. The Department of Industrial Engineering offers a 5-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).
   a. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.
   b. The special conditions for this 5-Year BSIE/MSIE Program are as follows:
      i. The student must declare his/her intent to participate before the end of their Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
      ii. A student wishing to withdraw from the 5-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 694 in order to get his/her BSIE degree.
      iii. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including a minimum of 3.0 GPA.
      iv. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.
   c. More details can be found in the Undergraduate bulletin (p. 1162).

Curriculum Requirements

Requirements for the Master of Science Degree (both thesis and non-thesis option):

1. An approved integrated program with a minimum of 30 credit hours with a 3.0 average or better on all credit hours attempted and no single grade below “C” at the University of Miami while a graduate student.

2. At least 12 course credit hours must be at the 700 level.

Note: All courses are 3 credit hours unless otherwise indicated

Notes:

a. In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.

b. Students who do not have previously earned Industrial Engineering degrees must take IEN647 and IEN765.

c. 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.

d. 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.

Mission

The Department of Industrial Engineering’s mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Student Learning Outcomes

- Graduates will demonstrate an advanced ability to design a system, component, or process to meet the desired business needs of the project.
- Students will gain an ability to write effectively about advanced topics in Industrial Engineering.
- Graduates will have an ability to present their findings effectively about advanced topics in Industrial Engineering.

M.S. in Management of Technology

Master of Science in Management of Technology is an academically challenging program that allows you to gain significant training in both technology and management.

It is a 36 credit hour curriculum with 12 credits in Technology oriented courses and 12 credits in Management topics.

A bachelor’s degree from a regionally accredited university with a GRE or GMAT score that is acceptable.

M.S.I.E./M.B.A. Executive Program

Dual MSIE/MBA Weekend Executive program makes it possible to earn two separate degrees at the same time, a Master of Business Administration Degree (MBA) and a Master of Science in Industrial Engineering (MSIE).

It is a 57 credit hour program that starts every January and is completed in two years and one semester. Classes are held on Saturdays and during intersessions.

A bachelor's degree in any engineering discipline, an acceptable GRE score, and at least 3 years of work experience is required.

Ph.D. in Industrial Engineering

Policies and Important Details
1. The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering.
2. To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
3. Once a student has completed all course and required research credit hours, he or she must enroll in “Research in Residence” status until the degree has been granted. “Research in Residence” status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
4. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.
5. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department's graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:
   a. To consult with and to advise students on their research.
   b. To meet, at intervals, to review progress and expected results.
   c. To read and comment upon the draft dissertation.
   d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
   e. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.
6. There are no foreign language requirements for the Ph.D. degree.

Course work requirements depend on the student’s background, and are established by the Graduate Advisor and the Department Chairman. 60 credit hours beyond the baccalaureate degree are the minimum requirement for this Ph.D. Students with a Master's degree may take the minimum hours listed below, while students without a master's must take the maximum hours.

¹ A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credit hours attempted with no single grade below "C" at the University of Miami while a graduate student.

² At least 24 credits must be taken in residence at the University of Miami.

³ 6 hours of Graduate Engineering coursework outside of IEN courses may be substituted in lieu of IEN courses with Graduate Advisor approval.
Mission
The Department of Industrial Engineering’s mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Goals
Student Learning Outcomes
• Graduates will identify advanced engineering problems, search all possible methods for solution and implement the most appropriate one.
• Graduates will demonstrate an ability to write effectively about advanced engineering topics.
• Graduates will have an ability to present their findings effectively about advanced engineering topics.

Mechanical and Aerospace Engineering
https://mae.coe.miami.edu/index.html
Dept. Code: MAE

Degree Programs
The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of:

1. Master of Science (p. 2296)
2. Doctor of Philosophy (http://bulletin.miami.edu/graduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-phd/)

The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.

Areas of Research
• Fluid Mechanics
• Biomechanics
• Solid Mechanics
• Composite Materials
• Optimization and Reliability
• Nano Mechanics
• Heat Transfer
• Hydrogen Energy
• Materials Science
• Internal Combustion Engines
• Controls and Design
• Aerodynamics and CFD
• Nano-Bio-Systems
• Fuel Cells

It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Clean Energy Research Institute
1. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.
2. Its goals are:
• to conduct research and to generate research proposals to investigate energy and environmental problems;
• to organize seminars, workshops and conferences using researchers within and without the University;
• to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and
• to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.

3. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, system optimization and reliability of solar and wind energy systems, and organization of national and international conferences and symposia on energy and environmental problems.

Research Laboratories

• Advanced Nano Systems Laboratory
• Advanced Research for the Exploration of Space
• Aerospace Materials Simulation Laboratory
• Center for Advanced Multi-Scale Studies
• Computational Fluid Dynamics Laboratory
• Fuel Cells Laboratory
• Internal Combustion Laboratory
• Materials Laboratory
• Measurements Laboratory
• Multi-Functional Composite Materials Laboratory
• Optimization and Reliability Laboratory
• Robotics and Intelligent Systems Engineering Laboratory
• Thermo-Fluid Mechanics Laboratory
• Tissue Biomechanics Laboratory
• Wind Tunnel Laboratory

Masters Programs in Mechanical and Aerospace Engineering

1. M.S. in Mechanical Engineering (p. 2302)
   a. non-thesis option
   b. thesis option

2. B.S./M.S. in Mechanical Engineering (http://bulletin.miami.edu/undergraduate-academic-programs/engineering/mechanical-aerospace-engineering/mechanical-engineering-bs-ms/)

   The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of 300 or more on the Graduate Record Examination (taken before the fifth year).

Doctoral Program in Mechanical and Aerospace Engineering

• Ph.D. in Mechanical Engineering (p. 2303)

MAE 504. Orbits Mechanics. 3 Credit Hours.
Analysis of orbits in an inverse-square gravitational field; elementary rocket dynamics, impulsive orbit transfer and rendezvous, and Lambert’s Theorem with applications; patched-conic trajectories, planetary gravity-assist maneuvers, and linearized orbit theory with application to simplified analytical models: perturbations
Prerequisite: MAE 202.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 531. Scientific and Engineering Foundations of Additive Manufacturing). 1-4 Credit Hours.
This course introduces the AM technologies and covers the core materials science and manufacturing engineering fundamentals upon which the technologies are built. Advantages and limitations of the AM technologies are highlighted, along with future opportunities.
Prerequisite: MAE 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MAE 532. Additive Manufacturing of Engineering Materials. 1-4 Credit Hours.
This course focuses on teaching the processing, structure, and property relationships in metals, polymers, polymer-based composites, and biocompatible materials fabricated using additive manufacturing (AM). Students will be exposed to conventional and advanced applications of AM technologies.
Prerequisite: MAE 301.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 601. Methods of Engineering Analysis. 3 Credit Hours.
Analysis of engineering systems in equilibrium and motion. Examples considered from mechanical, electrical, thermal and fluids engineering. Mathematical theory and computer methods for obtaining numerical solutions are developed for various cases involving discrete and continuous systems. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 602. Vibrations. 3 Credit Hours.
Basic theory of free and forced vibrations of mechanical systems with and without damping. Applications to systems with one and several degrees of freedom are included.
Components: LEC.
Grading: GRD.

MAE 603. Internal Combustion Engines. 3 Credit Hours.
Course discusses engine types, characteristics, and operation. Topics include performance factors, fuel combustion, power cycles, knock and engine variables, exhaust emissions, fuel metering, compressors, and turbines.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 604. Orbital Mechanics. 3 Credit Hours.
Analysis of orbits in an inverse-square gravitational field; elementary rocket dynamics, impulsive orbit transfer and rendezvous, and Lambert's Theorem with applications; patched-conic trajectories, planetary gravity-assist maneuvers, and linearized orbit theory with application to simplified analytical models; perturbations. Prerequisite: MAE 202, or consent of instructor. 3 undergraduate hours or 3 graduate hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 605. Design for Manufacturability. 3 Credit Hours.
Manufacturing concerns at design stage. Design theory and methodology. Statistical considerations in geometric dimensioning, tolerances, reliability-based design, and quality control. Producibility, design for assembly, and value engineering. Life cycle costs and optimum design using nonlinear programming and Taguchi approaches. Hands on projects on machine tools.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 607. Advanced Mechanics of Solids. 3 Credit Hours.
Courses discusses the basic elements of elasticity, plasticity, and viscoelasticity. Application to mechanical systems at rest and in motion are included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 608. Intermediate Heat Transfer. 3 Credit Hours.
Course discusses steady and unsteady heat transfer by conduction, convective heat transfer in laminar and turbulent fluid flow, natural convection, and heat transfer by radiation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAE 609. Turbomachinery Aero-thermodynamics. 3 Credit Hours.
Basic concepts of turbo machinery principle and thermo-aerodynamic design, including gas-turbine engine cycles, compressor and turbine cascade, energy transfer in turbomachines, velocity diagrams, design and prediction of axial-flow compressors and turbines, radial-flow turbomachines, etc. Prerequisite: MAE 371 And MAE 303.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 612. Intermediate Fluid Mechanics. 3 Credit Hours.
Course topics include conservation of mass, momentum, and energy, potential flow, viscous laminar and turbulent flows, the Reynolds analogy, and Boundary-layer approximations. Gas dynamics are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 614. Advanced Internal Combustion Engines Experimental Studies. 3 Credit Hours.
Experimental mechanical engineering as it pertains to internal combustion engines. The principal measurements necessary to analyze the operation of an internal combustion engine are covered. Emphasis is placed on experiment planning, data interpretation, and error analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 616. Introduction to Composite Materials. 3 Credit Hours.
Course provides an introduction to composite materials and terminology. Topics include advantages offered by composite materials, current aerospace, automotive, and bio-mechanics applications, experimental results, analytical models, and effects of impact and fatigue loads. The environment's impact on composite materials' performance and design procedures are discussed. Case studies examining composite materials as efficient replacements are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 621. Exhaust Emission Control. 3 Credit Hours.
Course topics include automotive emissions, air pollution, combustion of homogeneous mixtures, emission control systems, Federal emission standards, and emission instrumentation and measurement. Lecture, 2 hours; Laboratory, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 628. Fuel Cells. 3 Credit Hours.
Introduction to fuel cells, thermodynamics of fuel cells, electrochemical kinetics in fuel cells, transport phenomena in fuel cells, introduction to various types of fuel cells.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 631. Scientific and Engineering Foundations of Additive Manufacturing. 1-4 Credit Hours.
This course introduces the AM technologies and covers the core materials science and manufacturing engineering fundamentals upon which the technologies are built. Advantages and limitations of the AM technologies are highlighted, along with future opportunities. Prerequisite: MAE 301.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 632. Additive Manufacturing of Engineering Materials. 1-4 Credit Hours.
This course focuses on teaching the processing, structure, and property relationships in metals, polymers, polymer-based composites, and bio-compatible materials fabricated using additive manufacturing (AM). Students will be exposed to conventional and advanced applications of AM technologies. Prerequisite: MAE 301.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAE 639. Heating, Ventilating and Air Conditioning System Design. 3 Credit Hours.
Course topics include basic HVAC systems, multizone systems, dual-duct systems, terminal reheat systems, variable air volume systems, induction and induction reheat systems, special applications, hydronic systems, unitary and heat pump systems, hydronic heat recovery systems, cooling and heating load calculation duct and piping design, overall system design, and integration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 640. Energy Conversion. 3 Credit Hours.
Course topics include energy conversion, utilization, present and projected consumption of energy, thermodynamic principles, nuclear energy, fission and fusion reactions, hydroelectric power, and solar energy. Alternatives energy sources, the hydrogen economy, and the energy-environment-economy system are also discussed.
Requisite: Senior Status.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 651. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 652. Special Problems. 1-3 Credit Hours.
Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 670. Aero Propulsion. 3 Credit Hours.
Definition of the atmosphere, propulsion basics, rocket fundamentals, turbine fundamentals, gas turbine cycles, component matching, math and computer models, aircraft missions, cycle section, reliability, and durability are analyzed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 690. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MAE 691. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 692. Special Topics. 1-4 Credit Hours.
Subtitles describing the topics will be shown in parentheses in the class schedule, following the "Special Topics."
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 699. Cooperative Education. 1 Credit Hour.
Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MAE 701. Advanced Heat Transfer--Conduction and Radiation. 3 Credit Hours.
Advanced analytical methods of solutions of boundary value problems of steady, periodic, and unsteady heat conductions. Topics include techniques of transient point, line, and plane sources and sinks, thermodynamics of radiative equilibrium, radiative exchange, geometrical factors, network, and other methods. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 702. Advanced Heat Transfer--Convection. 3 Credit Hours.
The analogy between heat, mass, and momentum transfers. Topics include the transfer mechanism, heat transfer to liquid metals, boiling and condensation mechanisms, heat transfer in two-phase flow, ablation heat transfer, transpiration, film cooling, and heat exchanges. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 705. Finite Element Methods in Mechanical and Aerospace Engineering. 3 Credit Hours.
Finite-element analysis methods for static and dynamic analysis of mechanical and aerospace structures, heat transfer analysis, and fluid flow applications. Primary emphasis is placed on underlying mechanics and numerical techniques. Consideration is also given to the use of existing programs, such as ANSYS, NASTRAN and FIDAP, designing proper meshes, and choosing the proper element. A term project is included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 706. Experimental Methods in Fluid Mechanics. 3 Credit Hours.
Course topics include methods of flow visualization, laser techniques in measurement of wall motions, conduit compliance, Newtonian and non-Newtonian properties of fluids, measurement of unsteady flow and pressure, laser Doppler anemometry, ultrasound Doppler velocimetry, electromagnetic flowmetry, measurement of steady and unsteady wall sheer stresses and boundary layers.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 713. Transport Phenomena. 3 Credit Hours.
Course topics include laws of molecular transfer, the kinetic theory explanation of molecular transfer phenomena, introduction to turbulence, and molecular transfer in laminar and turbulent flows with experimental results. A unified treatment of salient aspects of momentum, heat, and mass transfer including the relationship between rate and conservation equations are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 714. Computational Fluid Dynamics. 3 Credit Hours.
Incompressible flow equations in rectangular co-ordinates. Topics include basic computational methods for incompressible flow, three dimensional flows, compressible flow equations in rectangular coordinates, basic computational methods for compressible flows, treatment of shocks, artificial viscosities, convergence, other mesh systems, programming, testing, and information processing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 730. Mechanical Systems Optimization. 3 Credit Hours.
Optimization as an element of the engineering design process. Topics include comparative examination of unconstrained algorithms, as well as development and application of methods for constrained optimization problems. Case studies which demonstrate the theory and application of mathematical programming as a design tool are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 740. Continuum Mechanics. 3 Credit Hours.
Course discusses concepts that are common to all continuous media. Topics include elements of tensor analysis, motion, deformation, vorticity, material derivatives, mass balance equation, and balance of linear and angular momentum as well as energy. Stress and its geometric characterization, constitutive equations of solid and fluid type behavior, fundamental applications, and the Clausius-Duhem inequality are also covered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MAE 751. Master's Project. 3 Credit Hours.
A required project for M.S. students in the non-thesis option.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 752. Master's Capstone Project. 4 Credit Hours.
A required project for the five year BSME/MSME program.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 762. CAD and FEM for Stress Analysis of 3D Printed Structures. 1-4 Credit Hours.
Computer aided design and analyses of physical systems behavior using discrete models. Topics include CAD design, numerical analysis, and FEM modeling of 3D printed materials and structures. Students solve engineering problems using student-developed and existing software.
Prerequisite: MAE 362 and Graduate student standing.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MAE 780. Graduate Colloquium. 1 Credit Hour.
Presentations by selected speakers of weekly programs dealing with topics of interest in Mechanical Engineering. Attendance is required of all students registered in Mechanical Engineering graduate programs.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MAE 791. Professional Communications Skills for Engineering Grad Students. 0 Credit Hours.
This course covers fundamental areas in professional communication for Engineering graduate students. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and obtaining positions in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary communication skills, developing collaborations, and developing effective presentation skills.
Components: MOD.
Grading: SUS.
Typically Offered: Fall & Spring.

MAE 792. Special Problems. 1-3 Credit Hours.
Research and/or design projects consisting of individual investigation of current problems. Offered by special arrangement only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MAE 798. Advanced Topics. 1-3 Credit Hours.
Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MAE 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MAE 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in MAE 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of MAE 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.
Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in MAE 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MAE 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Mechanical Engineering
http://www.coe.miami.edu/dept-mac/

Admission Requirements
Students applying for acceptance to degree status must comply with the general requirements of the Graduate School. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

Graduation Requirements
General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.

Curriculum Requirements
1. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.

2. The student is required to complete only graduate-level courses, 600-level or 700-level, to fulfill the course requirement.
   a. A minimum of two 700-level courses are to be completed as part of the total expected credits of coursework required in their chosen option.
   b. If no 700-level courses are available in the chosen area of interest of the student during their stay in the M.S. program, the requirement of 700-level course(s) can be waived with the recommendation of their faculty advisor.
   c. Any M.S. student can take a maximum of two 600-level or 700-level courses from other Engineering Department(s) or other Departments such as Mathematics and Computer Science with the approval of his/her faculty advisor. The student is expected to state his reasons for taking the outside departmental course and get his/her faculty advisor's approval before registering for the course(s). The only exception is that a course from Industrial Engineering Department needs to be a course that involves lectures for the entire duration of the semester instead of those that are conducted over weekends for only 4-to-6 weeks of the semester.
   d. A maximum of only one course is allowed among 600-level or 700-level courses of the MAE Department that are designated as “Special Topics” or “Special Problems” that do not have scheduled lecture classes for the entire duration of the semester.

3. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.
   a. M.S. with Thesis Option: The student is required to complete 24 credits of course work and 6 credits of thesis in their chosen area of specialization. The thesis involves research-type work completed under the supervision or guidance of a faculty advisor. At the completion of the thesis, the student is required to write a thesis and make an acceptable oral presentation of the thesis before a committee of three faculty members that includes the faculty thesis advisor as the Chair of the committee. The faculty advisor is required to be from the Department of Mechanical and Aerospace Engineering.
   b. M.S. with Non-Thesis Option: The student is required to complete 27 credits of course work and 3 credits of an independent project in an area of his/her interest under the supervision of a faculty advisor. The faculty advisor is required to be from the Department of Mechanical and Aerospace Engineering. After completing the project, the student is required to submit a project report to the faculty advisor and also make an oral presentation of the project before two faculty members, including the faculty advisor. The student will receive a grade for the project. The independent project credits do not count toward the required minimum of two 700-level courses to be completed as part of the total expected credits of coursework required in their chosen option.
   c. M.S. with Management Option: This is a Non-Thesis Option in which a student completes 15 credits from Mechanical and Aerospace Engineering courses and 12 credits from the general area of Management, and 3 project-based credits. The independent project credits do not...
count toward the required minimum of two 700-level courses to be completed as part of the total expected credits of coursework required in their chosen option. The courses in Management area can be taken either from the School of Business, if available, or from the Department of Industrial Engineering. The student will select the courses in consultation with his/her faculty advisor. The faculty advisor is required to be from the Department of Mechanical and Aerospace Engineering. An undergraduate degree in engineering is required.

4. Students can also concentrate their studies in Additive Manufacturing, providing students hands-on training in methods to design, analyze, and fabricate complex structures using state-of-art additive manufacturing printing facilities. This area of study is designed for students who want to further their career by enhancing their analytical and practical skills, critical thinking and problem solving strategies.
   a. Special areas of study include: Advanced material science and mechanics of materials, Computer Aided Design (CAD) for novel structural design and Finite Element Methods (FEM) for structural optimization and stress analysis, and Algorithm design for the additive manufacturing process.
   b. Students who choose to concentrate their studies in Additive Manufacturing take the following courses, as well as their required thesis or project credits:
      • Methods of Engineering Analysis
      • Scientific and Engineering Foundation of Additive Manufacturing
      • Additive Manufacturing of Engineering Materials
      • Additive Manufacturing Lab
      • Computer Aided Design (CAD) for novel structural design and Finite Element Methods (FEM) for structural optimization and stress analysis
      • Engineering Optimization
      • Electives [for the remainder of their required credit hours]: Advanced Mechanics of Materials, Introduction to Composite Materials and Analysis, Intermediate Heat Transfer, Mechanical Vibrations, Design for Manufacturability, or Special Topics (with multidisciplinary options).

Mission
The mission of the graduate program is to prepare students to become knowledgeable and skilled engineers and researchers with an understanding of the ethical and other professional aspects of mechanical engineering.

Goals
Student Learning Outcomes
• Students will demonstrate competence in the theoretical and practical knowledge of mechanical engineering.
• Students will demonstrate the ability to effectively communicate the results of their scientific research in writing and in oral presentations.
• Students will demonstrate the ability to think critically in learning and/or research.

Ph.D. in Mechanical Engineering
http://www.umcoe.miami.edu/dept-mac/

Admission Requirements
The program leading to the degree of Doctor of Philosophy in the Department of Mechanical and Aerospace Engineering complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.

Curriculum
1. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination. For students entering with a Master's degree, a maximum of only one course is allowed among 600-level or 700-level courses of the MAE Department that are designated as "Special Topics" or "Special Problems" that do not have scheduled lecture classes for the entire duration of the semester. For students entering with a Bachelor's degree, a maximum of only two courses is allowed among 600-level or 700-level courses of the MAE Department that are designated as "Special Topics" or "Special Problems" that do not have scheduled lecture classes for the entire duration of the semester.
2. A qualifying examination, typically offered the last week of September, is to be taken by each doctoral degree student within the first three semesters of study. In the qualifying examination, the student is expected to demonstrate their competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to candidacy after passing the qualifying examination as well as the defense of dissertation proposal.
3. There is no foreign language requirement.
4. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.
5. The candidate may, if he/she so desires, pursue for their dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

**Curriculum Requirements**

For students who joined the program in Spring 2009 or after:

**For students with a M.S. degree in Engineering:**

- Minimum 18 credits of course work + 12 credits of dissertation.
- At least 6 credits must be at the 700 level.
- Expected duration of the program: 3 years.

**For students with only a B.S. degree in Engineering:**

- Minimum 36 credits of course work + 12 credits (or more) of dissertation.
- At least 12 credits must be at the 700 level.
- Expected duration of the program is 4 years.

**For Ph.D. students with a non-engineering degree:**

- Required credits and the expected duration of the program as specified in the assistantship offer letter.

In order to register for courses and/or dissertation in each semester, students are required to select the courses and/or dissertation credits by consulting their respective dissertation (research) advisors. They must also see the Graduate Advisor of the Department (Chair of the Department) for approval and signature.

Please note that the number of credits to be taken in various semesters is stated in each student's Ph.D. assistantship offer letter.

**For Dissertation Credits**

- Register as MAE 830 before passing both parts of the Qualifying Exam
- Register as MAE 840 after becoming a PhD candidate (usually after PhD proposal is passed)
- Register as MAE 850 Research in residence (after completing the required 12 credits of dissertation through MAE 830 and MAE 840).

**Qualifying Exam**

Ph.D. students are required to pass a 2-part Qualifying Exam.

**Part 1 of the Qualifying Exam:**

It consists of a written examination (no oral exam). Each student is required to select three areas, including Methods of Analysis, out of the following six areas:

- Methods of Analysis (Level of MAE 601) – compulsory for all students
- Mechanics of Solids (Undergraduate level)
- Fluid Mechanics (Undergraduate level)
- Heat Transfer (Undergraduate level)
- Materials (Undergraduate level)
- Control and dynamics (Undergraduate level)

A list of topics in each course will be given to the student at least one month before the Exam. All three areas will be covered in one exam of 6-hour duration (2 hours for each of the three areas) with a 30-minute break. It is expected that each student passes Part 1 of Qualifying Exam within the first year. If a student fails in one or more areas, a second chance may be given (within 3 months of the first exam).

**Part 2 of the Qualifying Exam:**
It consists of an oral exam before the student’s Dissertation Committee.

- The student presents a research proposal (in the form of a written report) to the Dissertation Committee after completing some preliminary research work including the Literature Review.
- Part 2 of the Qualifying Exam is to be taken within 2 years if the student has a Master’s degree in Engineering and 2.5 years if the student has only a B.S. degree in Engineering.

**Mission**

The mission of the graduate program is to prepare students to become knowledgeable and skilled engineers and researchers with an understanding of the ethical and other professional aspects of mechanical engineering.

**Goals**

**Student Learning Outcomes**

- Students will demonstrate competence in the theoretical and practical knowledge of mechanical engineering.
- Students will demonstrate the ability to communicate effectively the scientific and technical research in writing and oral presentations.
- Graduates will demonstrate the ability to conduct independent research and contribute to existing knowledge.

**Ocean Engineering**

**About the Program**

The University of Miami has a long history in Ocean Engineering. The University of Miami’s College of Engineering together with the Rosenstiel School of Marine and Atmospheric Science offered a Master of Science degree in Ocean Engineering. The program and others of its kind in the nation, were popular in the 1970s and 1980s.

In the past decade, several major incidents – the 2010 Deep Water oil spill in the Gulf of Mexico, a series of devastating hurricanes in 2003-2005 and 2017, and the Japan Tsunami have turned our collective attention to the vulnerability of the nation’s coastal infrastructure. Furthermore there have been significant demands for an increased emphasis on port and harbor security since September 11, 2001. These events have led to a renewed interest in the field of Ocean Engineering, albeit with a new focus and broader scope. Our program offers an MS degree for students not interested in a research based education but rather a practical skills-based training in real world applications of engineering theory.

**Ocean Engineering**

Ocean Engineering concentrates on problems associated with human interaction with the ocean.

- The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
- The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.
- The areas of faculty specialization in this program include coastal engineering, off-shore engineering, structures, turbulence, computer modeling of fluids, acoustics, remote sensing and maritime security.
- Tracks offered in the program include Coastal Engineering and Remote Sensing

**Additional Information**

For additional information on this program, including curriculum requirements, please visit: [https://graduate.rsmas.miami.edu/graduate-programs/ocean-engineering/](https://graduate.rsmas.miami.edu/graduate-programs/ocean-engineering/)

M.S. in Ocean Engineering (p. 2305)

**M.S. in Ocean Engineering**

**Overview**

The MS in Ocean Engineering provides participants with a combination of engineering skills and strong scientific knowledge in the marine sciences, preparing them to address a variety of ocean-related engineering concerns (e.g. prepare coastal communities for a changing climate; port and harbor security; coastal observation networks; coastal infrastructure; etc.) in a rational and responsible manner.

The program is open to students who want to pursue a career in engineering or marine science and professionals who have responsibilities in engineering, marine science, business and law fields and want to further their knowledge and skills. According to the U.S. Bureau of Labor Statistics, Ocean Engineering is projected to grow 9% from 2014-2024.

The program has two tracks:
Coastal engineering
Remote sensing and maritime security
Both tracks build upon the unique world-class resources available through the University of Miami’s Center for Southeastern Tropical Advanced Remote Sensing (https://www.cstars.miami.edu/) (CSTARS) satellite receiving facility and Surge Structure Atmosphere Interaction Facility (http://sustain.rsmas.miami.edu/) (SUSTAIN) wind-wave laboratory.

Curriculum Requirements
The curriculum is divided into three groups. The first group of four core courses (12 cr) provides an introduction to the field, as well as analytical tools and theoretical background in the fundamental areas of fluid dynamics and wave propagation.

Requirement for those students entering this program without an engineering background are three terms of Calculus, Ordinary Differential Equations, Physics II, Statics and Dynamics.

The initial semester of the program is designed to introduce students to the different subjects encompassed within modern Ocean Engineering and to provide the fundamental knowledge in oceanic applications of mathematics and fluid mechanics necessary to excel in the later courses.

The student then elects one course (3 cr) from a group focusing on computational (numerical) methods and one course (3cr) from a group focusing on experimental methods. These courses give the student the additional tools needed in the profession.

- Track B: Remote Sensing and Maritime Security

Mission
The mission of the MS Ocean Engineering degree is to educate students with a combination of strong applied scientific knowledge in the marine sciences and engineering. These students will possess the skills needed to address a range of marine related concerns in a rational and responsible manner.

Goals
Within this context, the objective of the MSOE program is to educate and train students who, upon completion of their degree, are prepared to assume positions in industry, government, academic, and non-governmental institutions that require advanced scientific training and engineering skills in the fields of Applied Remote Sensing and coastal/ocean engineering.

Student Learning Outcomes
- Students will demonstrate competency in applying the applied scientific and engineering knowledge required for employment in the broad field of ocean engineering in the industrial or governmental sector.
Students will demonstrate oral and written communication skills required for employment in the broad field of ocean engineering in the industrial or governmental sector.

**Interdisciplinary**

**Interdisciplinary Degrees**

M.A. in Environment, Culture, & Media (p. 2307)

M.P.S. in Environment, Culture, & Media (p. 2311)

Ph.D. in Environmental Science Policy (p. 2315)

**M.A. in Environment, Culture, & Media**

**Overview**

The Abess Center’s MA in Environment, Culture, & Media enables students to tap into synergistic research networks across a range of schools and colleges at the University of Miami, including the College of Arts and Sciences, the Rosenstiel School of Marine and Atmospheric Science, the Miller School of Medicine, the School of Law, School of Education, School of Architecture, and the College of Engineering. This graduate programs draw upon existing interdisciplinary collaborations that have been created by the Abess Center. For more information: [https://abess.miami.edu/academics/masters-degrees/index.html](https://abess.miami.edu/academics/masters-degrees/index.html)

The Master of Arts in Environment, Culture, and Media (ECM) integrates the study of the environment with emerging screen technologies, digital culture, cultural theory, and ethics. For new scientists, the defining creative and intellectual challenge of the 21st century exists in the use and design of digital content aimed at engaging an increasingly participatory media culture. Comparable in its cultural complexity and historical significance to the invention of the book, interactive digital content has become the dominant means of contemporary communication. In today’s leading 21st century career fields, theoretical proficiency with digital and visual culture has become a necessary skill. The proliferation of screen technologies has opened new opportunities and challenges for communicating environmental information. Governmental, non-profit and private sector organizations that deal with a range of scientific issues are scrambling to develop an effective digital presence. Responding to this demand, the ECM program has been designed to address the practical and theoretical aspects of this new environmental culture, preparing students for an expanded and innovative sector of employment opportunities.

This innovative program is the first and only graduate degree of its kind intersecting environmental studies, emerging screen technology, and cultural studies. Surveying public perspectives of the environment across cultures, the ECM program will investigate how societies have perceived natural phenomena in differing ways, and the implications this has had on popular thought and the comprehension of scientific issues. Students in the program will benefit from the Abess Center’s affiliated faculty across UM’s schools, in disciplines such as biology, geology, marine conservation, computer science, archaeology, ecology, and communication.

Students will examine the ways in which various forms of visual media such as Internet blogging, ethnographic film, television, social media, documentary video, user generated content [YouTube], reality TV and so forth affect the reception of scientific media messages in popular culture, international politics, education, and law. The goal of the program is to advance and innovate societal engagement through understanding visual forms of scientific communication, research strategies, public outreach, and education concerning ecosystem science and issues of sustainability.

**Practical aspects will vary based on personal goals, but may include:** negotiating problems in representation of cultures and environments through media, digital media curation, understanding the political economy shaping the production and distribution of environmental media worldwide, designing innovative forms of science communication, research into the social practice of screen use across cultures (from western iPhone addiction to viral videos in South Korea), and analyzing the practical consequences of the media’s representation of specific scientific issues.

This unique program is aimed at a diverse range of students, offering scientific insights to those with social science or humanities backgrounds, and anthropological perspectives to those with science backgrounds. This graduate program will provide students with a foundation in the science that underlies environmental issues, and the ability to integrate media theory with practical use. Students will evaluate the histories and limitations of both analog and digital visual culture as tools of research and communication. By investigating various media forms, students will explore emerging theoretical debates around digital culture and the role of visual artifacts in shaping societal values and perceptions of the environment. Students will be exposed to ethical issues through an anthropological lens that examines and contextualizes how knowledge and culture are created, transmitted, and maintained through visual culture.

Employment opportunities in this field require an advanced degree. **Students in the MA track will be required to complete a research thesis, they are not required to complete an internship, but may also pursue an internship during their studies.** The program is designed to prepare graduates of the MA for a range of careers, including for example: environmental media consultant (Google), digital content curator (U.S. National Parks), climate and energy campaigner (Greenpeace), and director of green initiatives campaigns (Toyota). **Graduates of the MA program will be prepared to go on to doctoral studies and other research related employment.**
One of the central challenges we face as a society is an array of complex, large scale environmental problems. The ECM program will train students with diverse backgrounds in the use and conceptual design of visual and digital content for engaging an increasingly participatory media culture to address these challenges.

**Curriculum Requirements**

*For more info:* [http://abess.miami.edu/cesp/academics/ecm/degree-program-requirements/](http://abess.miami.edu/cesp/academics/ecm/degree-program-requirements/)

**Degree Requirements for the ECM MA**

Completion of the MA will take 18 months (three semesters).

Prerequisite: students admitted into the program must have earned a Bachelor’s degree with a minimum 3.0 GPA.

**Core Courses and Credit Requirements**

Students must complete 18 credits worth of coursework in the following core courses:

- ECS 609  Contemporary Media Representations of the Environment
- ECS 610  Technology and Human Behavior
- ECS 611  Nature, the Anthropocene, and Visual Anthropology
- ECS 612  Environmental Communication, New Media & Policy

6 credits  Research Thesis (MA) or Internship Report (MPS)

The 12 remaining credits are chosen electives that align with each student’s interest.

**Mission**

The media play a major role in influencing public perception of environmental problems and solutions. Effective understanding of the global and local drivers of consumption and risk perception require crosscultural understanding of the interpretation of print and visual media. Complementing an understanding of the media’s influence in environmental issues is a pressing need to create effective communication strategies, and products for education, entertainment, and warning. Successfully communicating probabilistic scientific information is a particularly critical and challenging endeavor. The mission of this program is to prepare a new generation of students for the hybrid role of science-communicator, a position for which the current generation of academics is under-equipped.

**Goals**

The MA degree will provide excellent preparation for employment on local, regional, and international levels in areas of interactive media curation, sustainability awareness, science education, government and non-profit work, and corporate marketing strategies.

**Student Learning Outcomes**

- Thorough understanding of the theories, processes, and interactions of media and environmental studies, policy, and justice.

**ECS 601. Interdisciplinary Environmental Research: Introduction to the Why and the How. 3 Credit Hours.**

The why and the how of developing and implementing interdisciplinary environmental research; research objectives and design choices informed by philosophies of knowledge and policy relevance. Assignments include development of research questions, a preliminary literature review, a draft dissertation proposal, and oral communication of research. Course is structured around peer critique and discussion of work in progress.

*Components:* DIS.
*Grading:* GRD.
*Typically Offered:* Fall.

**ECS 603. Interdisciplinary Environmental Methods. 3 Credit Hours.**

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

*Requisite:* Plan of Ecosystem Science and Policy.
*Components:* SEM.
*Grading:* GRD.
*Typically Offered:* Fall.
ECS 605. Interdisciplinary Environmental Law and Policy. 3 Credit Hours.
Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies will cover authorization, appropriations and oversight functions of Congress and state legislatures; the role of the executive, federal and state, in initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in resolving disputes and advancing or thwarting environmental policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 607. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.
Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.
Requisite: Plan of Ecosystem Science and Policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 608. Interdisciplinary ECS Seminar. 1-3 Credit Hours.
Seminar centering on research and case studies illustrating cutting edge human-environment research, and including both qualitative and quantitative methods. Intensive reading and writing related to relevant topics in the field.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

ECS 609. Contemporary Representations of the Environment. 3 Credit Hours.
This course will combine media studies, environmental studies, and critical theory to give students a broad introduction to ways in which screen media are used today to represent both the natural world and also environmental issues such as climate change, animal extinction, and natural resource use. From more conventional media such as feature fiction films (e.g. Wall-e, The Day After Tomorrow, Avatar), documentary films (e.g. An Inconvenient Truth, HBO's Gasland), and television news coverage, to more niche formats like Google Earth's global mapping and in-dash monitors that depict miles-per-gallon, screen technology has long been and is increasingly used to mediate our relationship with surrounding ecosystems. Students will look at mainstream television channels (e.g. Discover, National Geographic, and the Weather Channel) alongside the digital campaigns of agencies and institutions directly aimed at conservation efforts, including the ecotourism industry, non-profit environmental groups, and governmental bodies such as the National Parks Service. In addition, this course will investigate the increasing role of interactive media in museums and science centers, as well as the rising power of social media in disseminating news regarding environmental issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ECS 610. Technology and Human Behavior. 3 Credit Hours.
This course will explore the social aspects of technology use and cultural adaptation through cross-cultural ethnographic research on science and traditional beliefs. From the adoption of chainsaws in Amazonian forestry to the use of smart watches in Japanese cities, technological choice will be examined through psychological theories of behavior, socio-cultural perspectives, and institutional and economic forces. Reflecting the rising social, cultural, scientific, and political importance of emerging digital culture (e.g. virtual reality, smart devices, artificial intelligence), a key focus of the second half of the course will focus on philosophical notions of post-human cyborgism. Students will be introduced to recent research on the cognitive issues of social media use and consumption, including social media addiction and other neurological impacts of chronic screen use. Coursework will connect historical understandings and larger social analysis of digital media use and encourage students to participate in an ongoing exploration of their own technological choices and media practices. Students will also be exposed to multidisciplinary theories and research on risk perception and the psychology and effectiveness of environmental messaging in order to address how various media technologies impact individual and collective thinking and action.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
ECS 611. Nature, the Anthropocene, and Visual Culture. 3 Credit Hours.
Different cultural and historical contexts have conceived of humanity's relationship to the natural world in vastly different ways, from 'sacred and part of' to 'separate from' and 'steward over.' A culture's techniques of representation, use of imagery, and ways of seeing are a key part of the shaping of its worldview and cognitive framework of shared ideas and beliefs. This course is an opportunity for students to use an anthropologist's eye to actively engage with the human production of knowledge about the natural world through visual culture. Rather than approaching visual anthropology with its usual divide between 'anthropological content' and 'aesthetic composition,' this course will foster both approaches as it examines human perceptions of the environment from prehistoric cave paintings to modern day street art. Key elements of visual anthropology will be introduced, including symbols and symbolism, reflexivity, visual data of everyday life, art analysis, ethics, society-as-text paradigm, urban visual data, and ways of conceiving systems of visual representation. Representations of Other will be analyzed through theories of the exotic, gender, race, post-colonialism, nationalism, and heritage studies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 612. Environmental Communication, New Media, and Policy. 3 Credit Hours.
Facebook and Twitter to the rhetorical film essay documentaries that have waged ideological wars over the past twenty years, screen and new media are an increasingly powerful force in the shaping of policy, political awareness, and popular ideological views of the environment. This course will draw on critical approaches of media theory, rhetoric, and political science to study and interpret the political use of visual media. Just as FDR's WPA used film to propagandize the agricultural importance of public works, and Hollywood has been harnessed for ecological causes from natural conservation to climate change, today screen and digital media (e.g. television commercials, podcasts, social media blasts) are the driving force of PR campaigns for both governmental bodies and private companies that greatly impact environmental understanding and policy. From information to misinformation, viral content streams constantly onto screens across the world, whose apps are also used for activism and citizen science—students will look at what strategies of circulation and rhetoric are used to wage digital campaigns to communicate and shape ecological values and policy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ECS 615. Environment, Culture, and Media Internship. 3-6 Credit Hours.
This course is for hands-on experience and research culminating in a final Master's internship report. Students will enroll in 3-6 credits while completing their internship and researching their final project for the ECM Masters of Professional Science.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECS 672. Special Topics in ECS. 0-3 Credit Hours.
Content varies by semester and is indicated in parentheses following course number and title in class schedule.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 680. Field Studies. 1-4 Credit Hours.
This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.

ECS 725. Problems in Environmental Science and Policy. 1-6 Credit Hours.
Content and prerequisites announced when offered. Course may be repeated for credit if content varies.
Requisite: Plan of Ecosystem Science and Policy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 790. Directed Readings. 1-3 Credit Hours.
Individually supervised readings on special topics. Offered by arrangement with the instructor. May be retaken for credit.
Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

ECS 814. Environment, Culture, and Media Thesis. 3-6 Credit Hours.
This course is for research culminating in a Master’s thesis. Students will enroll in 3-6 credits while researching and writing their final project for the ECM Masters of Arts.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
Theoretical debates around digital culture and the role of visual artifacts in shaping societal values and perceptions of the environment. Students will both analog and digital visual culture as tools of research and communication. By investigating various media forms, students will explore emerging underlies environmental issues, and the ability to integrate media theory with practical use. Students will evaluate the histories and limitations of anthropological perspectives to those with science backgrounds. This graduate program will provide students with a foundation in the science that underlies environmental issues, and the ability to integrate media theory with practical use. Students will evaluate the histories and limitations of both analog and digital visual culture as tools of research and communication. By investigating various media forms, students will explore emerging theoretical debates around digital culture and the role of visual artifacts in shaping societal values and perceptions of the environment. ECS 820. Master's Research. 0-9 Credit Hours.
Individual study for students exiting the doctoral program without a successful dissertation proposal.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

ECS 830. Pre-Candidacy Research. 1-9 Credit Hours.
Research for ECS Ph.D. students who have not attained candidacy.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ECS 840. Doctoral Dissertation. 1-12 Credit Hours.
Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 13 credits total. No more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ECS 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Ph.D. in Environmental Science and Policy
Dept. Code: ECSD

Through the Graduate School, the Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website (http://www.cesp.miami.edu/). Doctoral students are supported by research assistantships, which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for two terms as teaching assistants in the Abess Center undergraduate program.

Prerequisite
Students admitted to the program must have earned a bachelor’s or master’s degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Proposed Additional Courses ¹

Additional Courses to get to 60 Credits
Examinations ²
Dissertation ³

Total Credit Hours

1 By the end of their second semester, students must submit a proposed group of additional courses, totaling at least 18 hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student’s advisor and the Director of Graduate Studies.
Mission

The Environmental Science and Policy (ECS) graduate program was formulated in response to increasing societal demand for academicians and practitioners at the Ph.D. level with interdisciplinary training aimed at addressing complex problems concerning the impact of human activity and global climate change on so-called linked social-ecological systems. Our graduate program targets top caliber students whose demonstrated skills and interests bridge science and social science, and who seek the theoretical and analytical skills to address human-environment problems from academic and applied perspectives.

Student Learning Outcomes

- Students will demonstrate command of interdisciplinary environmental policy literature.
- Students will demonstrate the ability to perform sound interdisciplinary analyses of environmental problems and formulate sound interdisciplinary research approaches.
- Students will exhibit an ability to communicate effectively in oral presentations and in writing.

Marine and Atmospheric Science

The Rosenstiel School of Marine and Atmospheric Science (RSMAS) was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation's leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami.

Today, RSMAS has a faculty of 70 scientists who conduct sponsored research while offering graduate studies leading to the Master of Professional Science, Master of Science, and Doctor of Philosophy degrees. The School offers graduate programs in Atmospheric Sciences, Marine Ecosystems and Society, Marine Biology and Ecology, Marine Geosciences, Meteorology and Physical Oceanography, Ocean Engineering, and Ocean Sciences. Undergraduate programs leading to a Bachelor of Science in Marine and Atmospheric Science (with majors in Marine Science, and Meteorology), and a Bachelor of Arts in Marine Affairs are also offered.

RSMAS uses multiple laboratory and high-performance computing facilities and a state-of-the art catamaran. The Marine Technology and Life Sciences Seawater Complex (MTLSSC), opened in 2014, houses studies that rely on seawater for observing air-sea interactions in a controlled environment and for holding, spawning and rearing marine organisms. This complex is the centerpiece of an updated RSMAS campus. The catamaran, named the F. G. Walton Smith, in honor of the founder of the Rosenstiel School has been in service since 2000. The 96-foot-long catamaran is able to explore the deep ocean as well as normally inaccessible shallow environments such as reefs, mangroves and grassbeds.

Academic Programs

The Rosenstiel School is made up of seven academic programs:

- Atmospheric Sciences (p. 2328)
- Marine Biology and Ecology (p. 2353)
- Marine Ecosystems and Society (p. 2371)
- Marine Geosciences (p. 2423)
• Meteorology and Physical Oceanography (p. 2436)
• Ocean Engineering (p. 2305)
  • The College of Engineering and the Rosenstiel School offer a joint program that leads to a non-thesis M.S. degree in Ocean Engineering.
• Ocean Sciences (p. 2450)

General Degree Requirements
Master of Professional Science (M.P.S.) Program
The Master of Professional Science (M.P.S.) degree offers many tracks within the departments of Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, and Ocean Sciences. The curriculum is structured to allow students to complete their degree in as little as 12 months (for select tracks), with the training and real-world experience necessary to prepare them for careers in today's professional science job market.

Checklist
All M.P.S. students should follow the M.P.S. Checklist (https://mps.rsmas.miami.edu/our-students/form/), which indicates all the milestones that must completed in order to graduate from the Rosenstiel School.

Credit Hour Requirements
M.P.S. students must complete 30 credits of graduate coursework, with a minimum, cumulative GPA of 3.0 to graduate with the M.P.S. degree. These credits are typically distributed as follows: 24 course credits and maximum 6 internship credits. All RSMAS students are required to complete the Research Ethics course (RSM 700).

Academic Advisor and Committee Chair
Students will be assigned an Academic Advisor during their first semester in residence. The advisor must hold an appointment in the department representing each student's track. This individual will offer guidance regarding University expectations, coursework, registration, program details, and graduation requirements. At the beginning of the first semester, the student and the Academic Advisor will establish the curriculum to be followed, based on the student's personal and professional goals and M.P.S. track requirements. During a student's second semester in residence (Fall or Spring), each student will begin forming their internship committee, starting with the committee chair. This person can be different from the student's academic advisor. The Committee Chair acts as a resource to the student regarding career guidance and the selection of an appropriate internship, as well as providing guidance during the internship and report/presentation creation. Any RSMAS graduate faculty member may act as a committee chair, but it should be someone with relevant experience in the students chosen career/internship path. Students should identify their chair no later than the end of the second semester.

Committee
All M.P.S. students must have a graduate committee of at least 3 members. This committee will include a committee chair from the RSMAS faculty (described above), an additional faculty member from UM, and one outside committee member, who is usually the direct supervisor at the student's internship. Each member should be an expert in the student's chosen track, and more specifically, the topic of their final report. Though deviations from these guidelines are possible, they must be approved by the M.P.S. Associate Dean and Program Director. The Appointment to Student Committee (https://mps.rsmas.miami.edu/our-students/form/) form solidifies the committee and is due 1 week after starting an internship.

Comprehensive Examination
Students must respond to and successfully pass 4 comprehensive exams during his or her time in residence. The exams will be written and will be based on core course content. Your overall evaluation for all 4 comprehensive exams is cumulative. The Program Director will collect the exams from your course instructors and submit your comprehensive exam's final report (indicating your overall result) to you via email upon completion of your 4th comprehensive exam. The Comprehensive Exam form (https://mps.rsmas.miami.edu/our-students/form/) will be used to indicate your overall result. In the event of a failure, a student may be re-examined once, or choose a different course's exam. Successful completion of 4 comprehensive exams is a requirement for graduation.

Pre-Internship
Before commencing an internship, a student must:

• Submit the Internship Commitment Form (https://mps.rsmas.miami.edu/our-students/form/) including a 1-page summary of the proposed project, highlighting the timeline, goals, expectations, and objectives of your internship.
• Complete at least 12 graduate-level credits with a minimum GPA of 3.0.
• Removal all I (Incomplete), NG (No Grades), grades lower than C-, and deficiencies such as: failure to submit items listed on student's Certificate of Admission; failure to complete online courses (RSM 700); failure to successfully pass 4 comprehensive exams.

Internship
Each student will be required to complete an internship with an organization engaged in some activity associated with marine and/or atmospheric science and identify an Internship Supervisor. Such organizations can be national or international agencies, private corporations, or foreign governments with clearly defined marine and/or atmospheric-oriented programs or activities. Internships can be either paid or unpaid by the organization, or interns can complete the internship by formal participation in a University-sponsored program in some area of marine
or atmospheric science. The Internship Commitment Form (https://mps.rsmas.miami.edu/our-students/form/) is due no later than 2 weeks after the start of an internship, but should ideally be completed before the internship begins. Additionally, a detailed synopsis of a proposed contribution to the hosting organization is required as a formal proposal no later than 1 month after the start date. The internship proposal will include: an introduction to the topic (i.e., a literature review), a statement of the problem, the purpose of the study, methods and materials (i.e., the proposed activities and analyses), a timeline, and plans for disseminating the information. The internship proposal template and guidelines are available on the M.P.S. website (https://mps.rsmas.miami.edu/our-students/form/).

Institutions may release an intern before the end of the proposed time commitment, and an intern may also terminate the position with an institution at any time, provided there are significant reasons not to proceed. In either case, due process will include a conference with the intern, the supervisor, and the student’s academic committee members. The resolution of any problems should occur during this meeting. However, should the problems continue, or are deemed to be irreparable/irrevocable, the internship may be terminated, and the plans for the involved student will be reevaluated by the student’s committee.

Internship Report
The final grade (Pass/Fail) will be based on a written report and an oral presentation. The final assessment will be based on a written report and an oral presentation. The internship report is not a summary of involvement but rather a contributory assessment of the experience, including developmental insight and a summary of any research performed. Copies of the final, approved report should be distributed as follows:

- One electronic copy to each member of student’s committee
- One copy for the representative agency, institution, or business (electronic and/or hard copy, at their request)
- One electronic copy (as a Word document file), plus the fully-signed title page (PDF or hard copy is accepted) submitted via e-mail to the M.P.S. Office

Oral Presentation
A strict requirement for the completion of the M.P.S. degree is an oral presentation. Oral presentations should be no longer than 30 minutes in length (includes time for Q&A from the committee and other attendees), should include a visual component (e.g., PowerPoint, Prezi, etc.), and may not be scheduled until all committee members have edited at least one draft of the internship report. Additionally, the PowerPoint (or equivalent) must be reviewed and edited by your Committee Chair, and all committee members must be invited to the presentation, to attend either in person or virtually (e.g., Skype, GoToMeeting, etc.). If presenting at RSMAS, please coordinate with your committee to identify a mutually agreeable time and date, and then follow the instructions and deadlines on the M.P.S. Graduation Checklist (https://mps.rsmas.miami.edu/our-students/form/). If presenting off-campus or at a different UM campus (e.g., Coral Gables, Medical, etc.), follow the instructions above as well as those listed on the checklist. Hosting an oral presentation and submitting its visual content (e.g., PowerPoint, Prezi, PDF) to the M.P.S. Office is a requirement for graduation.

Conference Attendance
Though not mandatory, M.P.S. students are strongly encouraged to attend a scientific conference during their academic residency at RSMAS.

Graduation
Students must be registered for at least 1 graduate-level credit during the semester in which they plan to graduate. Also, all students must have at least a 3.0 cumulative GPA, all passing grades, 30 graduate level credits total on his/her graduate record in order to graduate from the M.P.S. program. All M.P.S. students, including joint J.D./M.P.S. students, must apply to graduate via CaneLink during the semester in which they intend to graduate. Application deadlines for graduation are available on the Academic Calendar (https://registrar.miami.edu/dates-and-deadlines/academic-calendars/). If you applied to graduate, and then elected to defer graduation to a future term, you must apply for graduation again. Students who applied for Spring graduation but chose to defer to Summer graduation must notify the M.P.S. Office via email.

J.D./M.P.S. students can only apply to graduate from the UM School of Law via CaneLink. J.D./M.P.S. students must email the M.P.S. Office of his or her intent to graduate and indicate the semester for graduation.

All M.P.S. students, regardless of track, must follow the deadlines and instructions listed on the M.P.S. Graduation Checklist (https://mps.rsmas.miami.edu/our-students/form/) for successful clearance by the M.P.S. Office. Students who fail to complete the requirements listed on the M.P.S. Graduation Checklist (https://mps.rsmas.miami.edu/our-students/form/) will not be cleared for graduation. Clearance delays will delay the release of a student’s degree/ diploma.

Master of Science (M.S.) Program
The Master of Science (M.S.) degree is offered in Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, Marine Geosciences, Meteorology and Physical Oceanography, and Ocean Sciences. The expected time to completion for the M.S. degree is two years of full-time study.

Checklist and Academic Plan
Each student should follow the RSMAS Checklist for Defense and Graduation (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/), which will guide the student through all the milestones required in order to graduate from the Rosenstiel School. This begins with an Academic Plan (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) that identifies the number of courses a student must complete to be eligible for graduation, according to Program Handbook. Part I should be reviewed and
completed by the student and Program Director during the first semester; Part II must be completed at least one semester before expected graduation.

**Credit Hour Requirements**

M.S. students are required to take a minimum of 30 credit hours, which consists of 24 graduate course credits (of which 18 must be taken at UM) and 6 research credits, PGM 810 (“PGM” is the program abbreviation). All RSMAS students are required to complete the Research Ethics course (RSM 700).

M.S. students with prior graduate coursework from another accredited institution may transfer up to 6 course credits (with grades of "B" or above) with approval from the Program Director. Credit hours that pertain to or have been counted toward another degree cannot be transferred. Work taken more than six years prior to transfer will not be accepted; all work transferred is subject to examination by the program. Students must have an approved Academic Plan (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) on file prior to completing the Graduate School’s Petition for Transfer of Credit (https://grad.miami.edu/policies-and-forms/forms/).

Any student whose cumulative Grade Point Average (GPA) falls below 3.0 will receive written notice from their Program with copies to the Graduate Studies Office (GSO) stating that they are on academic probation. Any graduate student who receives this warning letter must meet the full standards of academic progress set forth by the University by the end of the subsequent semester. Students who fail to meet the cumulative GPA requirement have failed to meet the satisfactory academic progress standards established by the university and are no longer eligible to receive any graduate assistantship, fellowship or tuition scholarship and are subject to dismissal from the school.

**Committee**

The “Thesis Committee” described in the UM Graduate Student Handbook (https://www.grad.miami.edu/policies-and-forms/) is commonly known as the student’s “Committee” at RSMAS. Specific requirements for committee formation are set by the UM Graduate School (https://www.grad.miami.edu/policies-and-forms/); individual programs may have additional requirements.

The thesis committee will consist of not less than three members. The committee chair must be regular faculty (https://www.grad.miami.edu/graduate-education/graduate-faculty/) from the student’s program or department of concentration (this includes secondary appointments). In addition to the chair, one of the remaining members must also be regular faculty or have graduate faculty status (https://www.grad.miami.edu/graduate-education/graduate-faculty/) in the student’s program or department of concentration; the third member must be an outside member.

Once the Committee is formed (typically by the end of the first year), the Appointment to Student’s Committee (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form should be completed, approved by all members and the Program Director, then submitted to GSO. The Committee should meet regularly to review the student’s progress, and prepare a short report on research directions with the student. Proposed changes to the membership of a committee must be approved by the Committee Chair and must carry the endorsement of the Program Director. Approved changes to the Committee must be submitted to GSO using the Change to Student’s Committee (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form.

**Comprehensive Examination**

A comprehensive examination may be required by the end of the first year. Whether or not to host the exam, as well as the required content and format, is at the discretion of each program. The Comprehensive Exam (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director.

**Thesis Proposal and Proposal Defense**

The thesis proposal, containing the items listed below, must be defended and approved by the student’s Committee. The purpose of the proposal defense is to certify the readiness of the student to conduct thesis research, as well as facilitate an open discussion regarding the objectives of the thesis and the relevant experimental approach.

1. Tentative title
2. Statement of the problem and objectives
3. Methodology, including equipment and facilities required
4. Timetable

The Thesis Proposal (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form must be approved by the members of the student’s Committee and Program Director. The completed form must be submitted to GSO with the approved copy of the proposal.

**Thesis Defense**

Before scheduling the defense, a student must fulfill the following requirements:

- Have an approved committee on file
- Pass the comprehensive exam (if applicable)
• Submit and successfully defend the thesis proposal
• Have a minimum 3.0 GPA in all credits earned
• Remove all incomplete grades or deficiencies

The defense must occur by the "Deadline to Defend" during the semester a student intends to graduate. Students must be enrolled for research credits during the semester of defense. The Announcement of Defense form must be submitted to GSO at least 14 days prior to the defense date. The student is responsible for reserving the room and obtaining approvals from all Committee members and Program Director. Each committee member must be given no less than 14 days to review material prior to approving the Announcement of Defense. Thus, the student must provide the Committee with a complete version of the dissertation at least 1 month prior to the desired defense date. If a student is receiving a stipend, the Student Payroll End Date form should accompany the Announcement of Defense. The Committee Chair should notify GSO of the outcome of the defense via the Completion of Defense memo and Defense Rubric.

Thesis Submission
All graduating students must adhere to the ETD guidelines provided by the Graduate School. In addition to submitting an electronic copy of their manuscript to the UM Scholarly Repository, students must complete the following forms by the deadlines specified in the Academic Calendar.

1. Certificate of Defense Approval: This form is the student's proof of successful defense. Students must prepare this form at least one week before the defense date for committee members to electronically sign after the successful defense.
2. ETD Final Content Approval Form: This form replaces the signed hard copy of the signature page to formally document the Committee's approval of the content in the final manuscript. Students must complete this form prior to uploading the final manuscript to the Scholarly Repository.
3. ETD Availability Agreement Form: This form informs the Graduate School of the availability option for the final manuscript in the UM Scholarly Repository.

Graduation Clearance and Submission Deadlines
A student must apply for graduation during the semester in which they intend to graduate. Applications must be submitted online through Canelink by the deadline specified on the Academic Calendar. The defense and submission deadlines are set by the Graduate School. If a student applies for graduation and does not meet the Deadline for Completion, they must reapply for graduation for the following semester. A graduating student must submit a Clearance Form to GSO prior to the last day of the semester. In order to be cleared for graduation, the student must satisfy the minimum degree requirements set by the Program and Graduate School; fulfill all milestones noted on the RSMAS Checklist for Defense and Graduation; and complete the Graduate School's form must be submitted by the identified deadlines. The Clearance Form must be returned to GSO prior to the last day of the semester.

Doctor of Philosophy (Ph.D.) Program
The Doctor of Philosophy (Ph.D.) degree is offered in Atmospheric Sciences, Marine Biology and Ecology, Marine Ecosystems and Society, Marine Geosciences, Meteorology and Physical Oceanography, and Ocean Sciences. The expected time to completion for a Ph.D. degree is five years. A student in residence in the program beyond 8 years requires approval by the Program Director and Associate Dean.

Checklist and Academic Plan
Each student should follow the RSMAS Checklist for Defense and Graduation, which will guide the student through all the milestones required in order to graduate from the Rosenstiel School. This begins with an Academic Plan that identifies the number of courses a student must complete to be eligible for graduation, according to the Program Handbook. Part I should be reviewed and completed by the student and Program Director during the first semester; Part II must be completed at least one semester before expected graduation.

Credit Hour Requirements
Each program sets their own requirements with regard to course and research credits. PGM 830 (where "PGM" is the program abbreviation), as stated in the Program Handbook, as long as a minimum of 60 total credits are taken. The Graduate School requires at least 24 credit hours and a minimum of 12 dissertation credit hours taken in residence at UM. It is up to each program to determine, upon admission whether a student requires more course credits to fulfill the Ph.D. requirements. Ph.D. students entering with a Master's Degree from another accredited university may apply up to 24 course credits toward their Ph.D. degree at the discretion of the Graduate Program Director. Individual programs may require
more course credits to remove deficiencies. Of the 36 remaining credits needed for the Ph.D., a minimum of 12 must be taken as research credits (PGM 830). All RSMAS students are required to complete the Research Ethics course (RSM 700).

Ph.D. students with prior graduate coursework from another accredited institution and have not earned a graduate degree may transfer up to 9 course credits (with grades of "B" or above) with approval from the Program Director. Students must have an approved Academic Plan (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) on file prior to completing the Graduate School's Petition for Transfer of Credit (https://grad.miami.edu/policies-and-forms/forms/). Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program.

Any student whose cumulative Grade Point Average (GPA) falls below 3.0 will receive written notice from their Program with copies to GSO stating that they are on academic probation. Any graduate student who receives this warning letter must meet the full standards of academic progress set forth by the University by the end of the subsequent semester. Students who fail to meet the cumulative GPA requirement have failed to meet the satisfactory academic progress standards established by the university and are no longer eligible to receive any graduate assistantship, fellowship or tuition scholarship and are subject to dismissal from the school.

Committee
The "Supervisory Committee" and "Dissertation Committee" described in the UM Graduate Student Handbook (https://www.grad.miami.edu/policies-and-forms/) are commonly known as the student's "Committee" at RSMAS, and are normally the same committee. Specific requirements for committee formation are set by the UM Graduate School (https://www.grad.miami.edu/policies-and-forms/); individual programs may have additional requirements.

The dissertation committee is composed of at least four members; this includes the committee chair (i.e. the primary research mentor/ advisor), who may or may not be from the student's program, department or school (this includes secondary appointments), and must be a permanent member of the graduate faculty. Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the graduate faculty, and one from outside the program or department of concentration. A program may require additional members.

Once the Committee is formed (typically in the second year), the Appointment to Student's Committee (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form should be completed, approved by all members and the Program Director, then submitted to GSO. The Committee should meet regularly to review the student's progress, and prepare a short report on progress and research directions with the student. Proposed changes to the membership of a committee must be approved by the Committee Chair and must carry the endorsement of the Program Director. Approved changes to the Committee must be submitted to GSO using the Change to Student's Committee (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form.

Comprehensive Examination
A comprehensive examination may be required by the end of the first year. Whether or not to host the exam, as well as the required content and format, is at the discretion of each program. The Comprehensive Exam (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director. In the event of a failure, a student may be re-examined once, upon the advice of the student's advisor and/or Committee, and at the discretion of the Program Academic Committee with advice from the Comprehensive Exam Committee. If granted, the re-examination must be given before the end of the following semester.

Dissertation Proposal and Proposal Defense
The dissertation proposal, containing the items listed below, must be defended and approved by the student's Committee. The purpose of the proposal defense is to certify the readiness of the student to conduct dissertation research, as well as facilitate an open discussion regarding the objectives of the dissertation and the relevant experimental approach.

1. Tentative title
2. Statement of the problem and objectives
3. Methodology, including equipment and facilities required
4. Timetable

The Dissertation Proposal (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form must be approved by the members of the student's Committee and Program Director. The completed form must be submitted to GSO with the approved copy of the proposal.

Qualifying Examination
The written qualifying examination is normally administered around the time of the proposal defense. In addition, an oral qualifying examination may be required by the program or the student's Committee. The Committee will prepare and administer the written examination (and oral examination, if required) within the program guidelines. The Qualifying Exam (https://www.graduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form notifying GSO of the outcome must be submitted by the Committee Chair and approved by the Program Director.
Admission to Candidacy
Before being admitted to candidacy, a student must fulfill the following requirements:

- Have an approved committee on file
- Pass the comprehensive exam (if applicable)
- Submit and successfully defend the dissertation proposal
- Pass the qualifying exam
- Have a minimum 3.0 GPA in all credits earned
- Remove all incomplete grades or deficiencies

The Application for Admission to Candidacy (https://grad.miami.edu/policies-and-forms/forms/) must be completed and approved by the Graduate School at least one semester prior to the expected semester of graduation. No student may receive the degree in the same semester or summer session in which they are admitted to candidacy. The student must be admitted to candidacy before the defense dissertation is scheduled. If there are any changes to the student’s Committee after this form is approved by the Graduate School, the student must submit a Committee Composition Change Request Form (https://grad.miami.edu/policies-and-forms/forms/) to the Graduate School and the Change to Student’s Committee (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form to GSO.

Dissertation Defense
The defense must occur by the "Deadline to Defend (https://www.grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines/"/ during the semester a student intends to graduate. Students must be enrolled for research credits during the semester of defense. The Announcement of Defense (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) must be submitted to GSO at least 14 days prior to the defense date. The student is responsible for reserving the room and obtaining approvals from all Committee members and Program Director. Each committee member must be given no less than 14 days to review material prior to approving the Announcement of Defense. Thus, the student must provide the Committee with a complete version of the dissertation at least 1 month prior to the desired defense date. If a student is receiving a stipend, the Student Payroll End Date (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) form should accompany the Announcement of Defense. The Committee Chair should notify GSO of the outcome of the defense via the Completion of Defense (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-handbooks/) memo and Defense Rubric (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/).

Dissertation Submission
All graduating students must adhere to the ETD guidelines (https://wwwgrad.miami.edu/electronic-thesis-and-dissertation/) provided by the Graduate School. In addition to submitting an electronic copy of their manuscript to the UM Scholarly Repository, students must complete the following forms by the deadlines specified in the Academic Calendar (http://www.miami.edu/index.php/registrar/calendar/). Additional requirements for Ph.D. students are listed in the UM Graduate Student Handbook (https://wwwgrad.miami.edu/policies-and-forms/). ETD guidelines (https://wwwgrad.miami.edu/electronic-thesis-and-dissertation/)

1. Certificate of Defense Approval: (https://wwwgrad.miami.edu/policies-and-forms/forms/) This form is the student’s proof of successful defense. Students must prepare this form at least one week before the defense date for committee members to electronically sign after the successful defense.
2. ETD Final Content Approval Form: (https://wwwgrad.miami.edu/policies-and-forms/forms/) This form replaces the signed hard copy of the signature page to formally document the Committee’s approval of the content in the final manuscript. Students must complete this form prior to uploading the final manuscript to the Scholarly Repository.
3. ETD Availability Agreement Form: (https://wwwgrad.miami.edu/policies-and-forms/forms/) This form informs the Graduate School of the availability option for the final manuscript in the UM Scholarly Repository.

Graduation Clearance and Submission Deadlines
A student must apply for graduation during the semester in which they intend to graduate. Applications must be submitted online through CaneLink by the deadline specified on the Academic Calendar (http://registrar.miami.edu/dates-and-deadlines/academic-calendars/). The defense and submission deadlines (http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines/) are set by the Graduate School. If a student applies for graduation and does not meet the Deadline for Completion (http://grad.miami.edu/electronic-thesis-and-dissertation/defense-and-submission-deadlines/), they must reapply for graduation for the following semester. A graduating student must submit a Clearance Form (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) to GSO prior to the last day of the semester. In order to be cleared for graduation, the student must satisfy the minimum degree requirements set by the Program and Graduate School; fulfill all milestones noted on the RSMAS Checklist for Defense and Graduation (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/); and complete the Graduate School’s (https://www.grand.miami.edu/electronic-thesis-and-dissertation/etd-process/) ETD Process (https://www.grad.miami.edu/electronic-thesis-and-dissertation/etd-process/) by the identified deadlines. The Clearance Form (https://wwwgraduate.rsmas.miami.edu/students/forms-guidelines-and-handbooks/) must be completed by the student then returned to GSO prior to the last day of the semester.

Educational Training Program (Teaching Assistants)
RSMAS Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree. A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). The mandatory TA program will
include training of new TAs, evaluation of their performance, and recognition of excellence. Faculty nominations for the RSMAS TA Excellence Awards are solicited each semester, and will be given at the end of the academic year.

The goal of the TA program goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses. RSMAS TAs must comply with the following requirements:

- Register for and complete the RSMAS TA training workshop, RSM 771
- Review the TA Resources posted on Blackboard
- Register for the Educational Training courses: RSM 772 and RSM 773
- Refer to the guidelines and course documentation provided with the TA appointment letters

### Master of Professional Science (M.P.S.) Programs

The M.P.S. degree prepares students for science careers in industry, government, and non-profit organizations, where employment demands are growing. M.P.S. degrees were developed and implemented nationally in response to employer demands for well-rounded, highly trained employees with a breadth of knowledge and practical skills to address emerging environmental issues and improve the management of natural and cultural resources. The curriculum is structured to allow students to complete their degree in as little as 12 months (for select tracks), with the training and real-world experience necessary to prepare them for careers in today's professional science job market.

- M.P.S. in Broadcast Meteorology (BME) (p. 2334)
- M.P.S. in Climate and Society (CS) (p. 2338)
- M.P.S. in Weather Forecasting (WFC) (p. 2342)
- M.P.S. in Marine Mammal Science (MMS) (p. 2359)
- M.P.S. in Tropical Marine Ecosystem Management (TME) (p. 2361)
- M.P.S. in Aquaculture (AQU) (p. 2390)
- M.P.S. in Coastal Zone Management (CZM) (p. 2394)
- M.P.S. in Exploration Science (ESC) (p. 2399)
- M.P.S. in Fisheries Management and Conservation (FMC) (p. 2403)
- M.P.S. in Marine Conservation (MCO) (p. 2408)
- M.P.S. in Underwater Archaeology (UA) (p. 2412)
- M.P.S. in Natural Hazards and Catastrophes (NHC) (p. 2463)

- J.D./M.P.S. in Marine Ecosystems and Society (MES) (p. 2388)

### Master of Science (M.S.) Programs

- M.S. in Atmospheric Sciences (ATM) (p. 2346)
- M.S. in Marine Biology and Ecology (MBE) (p. 2366)
- M.S. in Marine Ecosystems and Society (MES) (p. 2417)
- M.S. in Marine Geosciences (MGS) (p. 2430)
- M.S. in Meteorology and Physical Oceanography (MPO) (p. 2443)
- M.S. in Ocean Engineering (p. 2305)
- M.S. in Ocean Sciences (OCE) (p. 2468)
- M.S. in Data Science (MSDS) - Marine and Atmospheric Sciences track (p. 1701)
  - The Rosenstiel School coordinates the track in Marine and Atmospheric Sciences for the Master of Science in Data Science, an interdisciplinary degree offered in collaboration with the College of Arts & Sciences. Full details are available at [www.msdatascience.miami.edu](https://www.msdatascience.miami.edu/)

### Doctor of Philosophy (Ph.D.) Programs

- Ph.D. in Atmospheric Sciences (ATM) (p. 2349)
- Ph.D. in Marine Biology and Ecology (MBE) (p. 2368)
- Ph.D. in Marine Ecosystems and Society (MES) (p. 2420)
- Ph.D. in Marine Geosciences (MGS) (p. 2432)
- Ph.D. in Meteorology and Physical Oceanography (MPO) (p. 2446)
- Ph.D. in Ocean Sciences (OCE) (p. 2473)
RSM 600. Research Diving Techniques. 3 Credit Hours.
This course is designed to introduce students to the practices and policies of scientific diving. The object is to prepare students to use SCUBA as a research tool for the marine sciences. The course content will qualify students as scientific divers under the auspices of the UM/RSMAS Scientific Diving Program and will meet the standards set by the American Academy of Underwater Sciences (AAUS). Students must be certified as a recreational diver with a RSTC recognized certification agency; have a minimum of 10 logged open water dives, two dives within 6 months of starting the course; pass a swim test and complete a physical exam.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

RSM 601. Scientific Freediving. 3 Credit Hours.
This course is designed to provide students who have an interest in conducting underwater research with the skills and competencies to be certified as a University of Miami Scientific Freediver in accordance with the Standards for Scientific Freediving. This course will discuss and evaluate topics related to the history and evolution of freediving and the common techniques; marine mammals and human physiology in relation to freediving activities and adaptations; safety and problem management in the aquatic realm; the practical application of underwater research skills, techniques, and methodologies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 611. Principles of Mass Spectrometry and Applications to Marine, Atmospheric, and Environmental Science. 3 Credit Hours.
This course goes in depth into the principles and uses of mass spectrometry. It is intended for graduate students who use mass spectrometry to conduct their research. Concepts taught will include the components of mass spectrometers (vacuum systems, ionization methods, mass analyzers, detectors), different types of mass spectrometers and their uses, and coupling chromatography to mass spectrometry. Each student will be required to give presentations on new advances in mass spectrometry and an in-depth presentation on a mass spectrometer that they use and new findings in the literature relevant to their technique and personal research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 612. Statistics for Marine Scientists. 3 Credit Hours.
This course covers statistical theory, tools, and methods required for data analysis, emphasizing marine science applications.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

RSM 613. Statistical Modeling of Extreme and Rare Events. 3 Credit Hours.
The course will focus on rare events and extreme values observed in nature. In particular, students will learn: advanced statistical methods of data analysis, as well as concepts of probability and predictability; statistical modeling of rare and extreme events; and applications of these advanced techniques to real atmospheric and oceanic data.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 615. Marine Tourism and Conservation. 3 Credit Hours.
This course introduces students to critical concepts in the practice and management of marine tourism, and explores the potential of tourism to contribute to marine conservation across different geographical locations and taxa. Discussion, readings, and lectures encourage students to draw connections between the biology and ecology of organisms and ecosystems and existing human-environment relationships. We also consider the social context in which tourism is occurring, and how this may shape the success or failure of tourism operators in contributing to conservation. This course will also explore questions about "consumptive" and "non-consumptive" uses of marine resources. Discussion will evaluate both the potential and the limitations of marine tourism as a tool for environmental protection.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 616. Florida Topics in Environmental Law & Policy. 1 Credit Hour.
This course will provide an overview of environmental law at the state and local level in Florida. The course will include an analysis of relevant law, legislation, and emerging issues for Florida-specific environments. The course will focus on environmental themes that are of particular importance to marine professionals, such as Everglades restoration, coral reef protection, marine protected areas, coastal wetland regulation, water pollution litigation, home rule and state preemption, and climate change policies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
RSM 617. Instrument Design and Quick Prototyping for Marine Science. 2 Credit Hours.
Introduction to the principles and applications of 3D printing, scanning, and digital manufacturing for non-engineers. It will cover the basic principles and practice of: (1) computer-aided design and drafting (CAD); (2) digital manufacturing techniques, including 3D printing and CNC machining (milling and laser cutting); and (3) performance assessment of student-manufactured prototypes. This will be achieved through lectures and hands-on training in the RSMAS Makers Lab, whereby each student will be required to design, construct, and field-test a new piece of hardware that is relevant to their field and/or individual research.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

RSM 620. Climate and Society. 3 Credit Hours.
This course is designed to provide students from different disciplinary backgrounds with an overview of physical processes, general concepts and policy debates surrounding climate issues.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 621. Object-Oriented Programming and Agent-Based Modelling. 3 Credit Hours.
Hands-on training in object-oriented programming using Java, including Java statistical packages, and in the development of agent-based and individual-based simulation models for ecological, physiological, social, economic and physical sciences. Course includes introductions to cellular automata and models based on social and behavioral networks. No prior programming experience required.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 622. Data Management for Scientists. 2 Credit Hours.
This course will cover techniques used in data profiling, filtering, and archiving. Online tools will be used for elaborating data management plans and well-established database techniques for manipulating data. Participants will develop data management plans and introduce techniques for data manipulation, such as database design and implementation concepts, query coding, and data cleaning/importing/exporting. Course participants will be exposed to theoretical concepts and engage in hands-on activities throughout the semester. Participants are encouraged to bring their own data for processing or asked to select a dataset from the many online data repositories.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

RSM 645. Science Communication: Professional Writing. 1 Credit Hour.
This course introduces students interested in scientific research to various techniques for processing and presenting research data and information. Students will learn techniques to effectively present research to the general public and to the scientific community in written form, such as research papers, grant proposals, conference presentations and fact pages.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 646. Presentation Boot Camp. 1 Credit Hour.
This course focuses on presenting scientific concepts and research findings more effectively to both technical audiences and the general public.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

RSM 647. Methods for Marine and Atmospheric Education. 3 Credit Hours.
This course focuses on curriculum and instructional methods for teaching marine and atmospheric content in formal and informal settings. The course will introduce students to recent national science and engineering, climate, and ocean education standards and best curricula and instructional approaches for teaching and learning science. The course will also focus on identifying and analyzing research on marine and atmospheric education and effectively communicating scientific topics to different audiences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
RSM 648. Management and Leadership in Marine and Atmospheric Science. 3 Credit Hours.
The goal of this course is to become an effective leader/manager while leveraging the individual strengths of a team in the marine and atmospheric field. The course will use leadership theories and case studies to understand how decisions affect outcomes. Students will develop the ability to manage teams effectively amidst a changing world. Students discuss literature and case studies to explore the foundations of effective leadership and support task triage, decision-making, shared mental models, and appropriate executive styles. The course will introduce students to recent national science and engineering, climate, and ocean standards and best approaches when it comes to managing a staff in the marine and atmospheric sciences. The course will also focus on identifying and analyzing marine and atmospheric leadership and effectively communicating scientific topics to different audiences.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 649. Advanced Presentation Boot Camp. 1 Credit Hour.
This follow-up course builds upon the topics and approaches covered in the basic training session and focuses on advanced techniques for designing and delivering effective scientific presentations to both technical audiences and the general public. The course provides opportunities for students to expand and practice their critique language and hone their presentation evaluation and design skills.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

RSM 650. Data Management in the Research Environment. 2 Credit Hours.
This course covers theoretical and practical approaches to research data management in academic contexts. Theoretical aspects include overviews of information science, data policy and data governance. The practical approaches include skills and best practices in research data management, and basic command line computing for data analysis and visualization (python and R). The purpose of the course is to increase research productivity, to enable data stewardship, and to help the student exceed data management expectations/requirements in the research environment. This is a practical methods course with tangible products; students produce a data management plan for their specific research endeavor, or prepare and deposit data into a discipline specific repository (other projects subject to instructor approval will be considered). The class is open to all graduate students in all disciplines. There are no prerequisites and while the course is designed for the first or second year of a graduate program, students who are further along will benefit as well.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

RSM 665. Fish Ecology and Oceanography. 3 Credit Hours.
This course is intended to introduce students to key biological, ecological, oceanographic, and climatic processes of direct relevance to fishery species, with a view toward development of an ecosystem perspective.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

RSM 666. Polar Science. 3 Credit Hours.
The course covers the physical, chemical and biological components of the polar oceans, atmosphere and coastal regions. The interactions between ocean, ice, atmosphere and land are discussed in detail not only in terms of local relationships, with links to the climate system.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

RSM 667. Motorboat Operator Certification Course. 1-2 Credit Hours.
The MOCC course was developed and formalized by the United States Department of the Interior in the early 1990’s. This course is designed to give students broad academic knowledge and practical training running small boats (boats 26’ in length or shorter). In addition to the relevant theory, students will get hands-on training trailering small boats, launching and loading at boat ramps, slow and high speed maneuvering, marlinspike (knot tying), as well as in water emergency training and the use of flares and pyrotechnics. The MOCC certification is the training standard for occupational small boating and used by government organizations, public and private research organizations, public aquaria, etc. The certification is a marketable skill for students moving ahead in their careers in marine science. Students must have a valid U.S. driver’s license and good driving record (less than 6 points) to be eligible for training in this course.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
RSM 668. Techniques in Respirometry, Swim Performance and Behavior of Aquatic Organisms. 2 Credit Hours.
The objectives of this course is to give participants an understanding and overview of methods and hands-on with modern equipment. The emphasis of the course will be on marine fish, but the techniques can be used for freshwater fish and aquatic invertebrates as well. The course is based on lectures, lab exercises and plenary discussions. The final part of the course constitutes a written project based on data collected during the week.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

RSM 671. Special Topics. 1-4 Credit Hours.
Lectures and research projects in special topics related to Marine and Atmospheric Science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

RSM 672. Special Topics. 1-4 Credit Hours.
Lectures and research projects in special topics related to Marine and Atmospheric Science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

RSM 673. Special Topics. 1-3 Credit Hours.
Lectures and research projects in special topics related to Marine and Atmospheric Science.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

RSM 700. Research Ethics. 0 Credit Hours.
Online research ethics training, required for all graduate students.
Components: DIL.
Grading: SUS.
Typically Offered: Fall & Spring.

RSM 710. The Physical Environment of Marine Organisms. 3 Credit Hours.
The physical environment of the sea influences the growth, distribution, and survival of marine organisms. The physical processes that affect organisms occur in space and time, ranging from the molecular properties of water to basin-wide linkages between oceanic regime and climate shifts are discussed. Course emphasis is placed on how physical processes affect the life of plankton to nekton. Students are required to present reviews based on the literature.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

RSM 771. Educational Training 1. 0 Credit Hours.
Educational training workshop and presentations.
Components: WKS.
Grading: SUS.
Typically Offered: Fall & Spring.

RSM 772. Educational Training 2. 0 Credit Hours.
First semester of educational training.
Components: WKS.
Grading: SUS.
Typically Offered: Fall & Spring.

RSM 773. Educational Training 3. 0 Credit Hours.
Second semester of educational training.
Components: WKS.
Grading: SUS.
Typically Offered: Fall & Spring.

RSM 780. Directed Readings. 1 Credit Hour.
The goal of this directed readings course is to cover a wide range of current marine and atmospheric science topics, and to give students experience independently reading about recent advances in research. The course will also give the students an opportunity to practice presentation and communication skills. Students will be assessed based on their presentations and participation.
Components: DIS.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
Atmospheric Sciences

https://www.graduate.rsmas.miami.edu/graduate-programs/atmospheric-sciences/index.html

Dept. Code: ATM

The Atmospheric Sciences (ATM) program is designed to prepare students with the tools, training, and education necessary to tackle critical research problems in the atmospheric sciences today. Our faculty are experts in a wide range of research areas, including tropical meteorology, climate dynamics, cloud and aerosol processes, and atmospheric chemistry. Their expertise and guidance and our world-class facilities prepare our students for successful careers in the atmospheric sciences and related fields.

Degree Programs

• Master of Professional Science (M.P.S.) (p. 2328)
  • Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.

• Master of Science (M.S.) (p. 2328)
  • Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.

• Doctor of Philosophy (Ph.D.) (p. 2329)
  • Requires 60 credit hours, including a minimum of 25 course credit hours and a minimum of 12 research credit hours.

Research Areas

Atmospheric Chemistry

The atmospheric chemistry group in ATM is interested in understanding the atmospheric emissions, transport, and fate of gases and particles that influence air quality and climate. These interests are explored through laboratory studies and fieldwork. Using state-of-the-art instrumentation and techniques, ATM scientists take measurements in tropical and high-latitude oceans, in forests and urban centers, and at the critical air-sea and troposphere-stratosphere interfaces. These measurements are used in models to predict the impact of atmospheric chemistry on human health and climate.

Climate Dynamics & Prediction

Climate research in ATM includes numerical climate modeling at both regional and global scales, and analysis of satellite data, global data products, and observations. There is a large focus on the diagnosis and modeling of climate variability on interannual, decadal, and millennial timescales, the prediction and modeling of El Niño, and the observation and modeling of anthropogenic climate change.

Cloud & Aerosol Processes

Scientists in ATM study aerosols, clouds, their interactions with each other, with radiation, and with the larger-scale environment. We strive for a better understanding of the cloudy boundary layer structure, its processes, and the effects of atmospheric transport of aerosols such as dust, smoke, and air pollutants, upon both air quality and climate. A focus on marine aerosols and south Florida’s Cloud-Aerosol-Rain-Observatory (CAROb) takes advantage of Miami’s unique location on the edge of the Atlantic basin.

Tropical Meteorology & Hurricanes

One broad area of research in ATM is aimed at improving our understanding and prediction of tropical weather and hurricanes. Through a combination of field observations, modeling, and theory, faculty and students study the dynamics of hurricanes: their formation, rapid intensification, and how their behavior might change in a warming climate. Other research foci include the advancement of computer model forecasts of tropical cyclones, data assimilation schemes, and observation strategies. Other weather phenomena in the tropics are also investigated in ATM and through the Rosenstiel School, such as monsoons, the intertropical convergence zone, and the Madden-Julian Oscillation.

Other Research Areas

Researchers in ATM also perform research in a number of other areas including:

• Geophysical Fluid Dynamics
• Tornado Dynamics
• Atmospheric Boundary Layer
• Atmospheric Convection
• Model Parameterizations
Master of Professional Science (M.P.S.) Programs
There are three ATM tracks for the M.P.S. degree:

- M.P.S. in Broadcast Meteorology (BME) (p. 2334)
- M.P.S. in Climate and Society (CS) (p. 2338)
- M.P.S. in Weather Forecasting (WFC) (p. 2342)

Master of Science (M.S.) Program
- M.S. in Atmospheric Sciences (ATM) (p. 2346)

Doctor of Philosophy (Ph.D.) Program
- Ph.D. in Atmospheric Sciences (ATM) (p. 2349)

ATM 611. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves
turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 614. Introduction to Weather and Climate. 3 Credit Hours.
This course will cover the structure, physics, dynamics and thermodynamics of the atmosphere; including weather analysis, weather forecasting,
climate and climate change. Contemporary topics covered in this class will include global warming, the ozone hole, hurricanes, thunderstorms and
other severe weather phenomena.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 624. Applied Data Analysis. 3 Credit Hours.
The course is intended to jump-start students in strategies for fruitful computer interaction practices for careers in MPO areas of science. Academic
topics include key concepts in probability & statistics, issues of graphical evidence and inference, linear models and regression, spectral analysis, and
matrix decomposition. Practical topics include hands-on exercises in data analysis and the sharing of code+results and interpretation. Students do
projects on data from their research or interests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 632. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on
communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 633. Atmospheric Boundary Layer. 3 Credit Hours.
The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research
in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the
basic physical concepts, from observational, theoretical and modeling perspectives.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
ATM 634. Introduction to Atmospheric Chemistry. 3 Credit Hours.
This course covers the basic principles of atmospheric chemistry. Concepts taught will include gas phase reactions, the production and destruction of ozone, aerosol size and composition.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 636. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 637. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer terms effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 651. Introduction to Atmospheric Dynamics. 3 Credit Hours.
This course surveys the dynamics of atmospheric flow and the physically-grounded description and depiction of weather phenomena. It is intended to serve as core preparation for incoming PhD students whose research will be dynamical, while also serving as an accessible overview for students in other subdisciplines. For these reasons, it stresses phenomena and the essentials of our physical discourses about them (emphasizing useful approximations and lucid treatments), with enough exposure to the underlying full-complexity fundamentals to facilitate more advanced study in the future.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 652. Introduction to Atmospheric Physics. 3 Credit Hours.
The goal of this class is to develop an understanding of the fundamental physical processes governing cloud behavior and atmospheric radiative transfer, including atmospheric thermodynamics. The class will focus on processes with temporal scales of one day or less, and spatial scales of 1km or less, and will recognize the links to weather and climate, or through the student presentations. Students will learn about: cloud formation, lifetime, and dissipation, and how clouds interact with the aerosol, thermodynamic, and dynamic environments; about how clouds and clear skies interact with sunlight and infrared. This course is split into two sections: the first half will cover thermodynamics and cloud physics, and the second half will cover atmospheric radiation. Guest lectures by advanced graduate students and postdoctoral research associates will introduce students to current research areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 653. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 654. Climate Variability. 3 Credit Hours.
This class will cover the physical mechanisms that govern the earth's climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 660. Tropospheric Chemistry I. 3 Credit Hours.
Process-Oriented lower atmospheric chemistry. Topics include photochemical oxidant formation, nighttime chemistry, air-sea exchange, cloud droplet and aerosol reactions, physical properties of aerosols, and transport properties of the troposphere.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 662. Advanced Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor’easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 663. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 681. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 682. Special Topics. 3 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 683. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 684. Special Topics. 1-4 Credit Hours.
Lectures, special projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 685. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Atmospheric Sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

ATM 701. Seminar in Atmospheric Sciences. 1 Credit Hour.
Oral presentation of research and special topics by students, faculty, and visiting scientists.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

ATM 711. Geophysical Fluid Dynamics II. 3 Credit Hours.
The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

ATM 713. Predictability. 3 Credit Hours.
Introduction to concepts of predictability and error growth, beginning from the seminal papers of Ed Lorenz, and expanding into state estimation, data assimilation, forecast sensitivity and ensemble prediction.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
Atmospheric Sciences

ATM 716. Lagrangian Fluid Dynamics and Predictability. 3 Credit Hours.
The ash cloud produced by the eruption of Eyjafjallajokull in Iceland, the oil spill produced by the explosion of the Deepwater Horizon drilling rig in the Gulf of Mexico, and release of debris and radioactive contamination into the Pacific Ocean after the Fukushima nuclear reactor was hit by the Tohoku tsunami, are examples of events that have caused considerable impact to the environment. They all represent problems in Lagrangian ocean or atmospheric dynamics in which predicting where the material released into the environment will be transported by the ocean currents or winds is critical. A common approach to predict the outcome of an event like the above is to run an ocean or atmosphere circulation model simulations and then integrate the resulting velocity fields from a given release location to predict pollutant trajectories. An important drawback of such an approach is that the predictions are highly sensitive to small changes in the release time and location. Attempts to cope with the sensitivity to initial conditions include running several different models for the same scenario, but this typically leads to even larger distributions of advected tracers, hiding the key organizing structures of the flow. Improved understanding and forecasting requires novel notions and techniques capable of casting light on why material is transported the way it is by a given flow. The goal of this course is acquaint the student with a series of recent developments originated at the interface of nonlinear dynamics and fluid dynamics that have led to a number of novel such notions and techniques.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 731. Air-Sea Interaction. 3 Credit Hours.
Oceanic and atmospheric mixed layers including fluxes of heat, momentum, moisture and salt between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 732. Climate Dynamics. 3 Credit Hours.
Basic understanding of the Earth's Climate System and its variability on time scales ranging from weeks to millennia. Topics include internal atmospheric variability, coupled ocean-atmosphere interactions, and the theory, observations and modeling of climate change.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 750. Reaction Kinetics and Molecular Dynamics. 3 Credit Hours.
Theories and experimental techniques for studying kinetics in the gas-phase, association, unimolecular and bimolecular reactions, chain reactions, flames, statistical theories, potential energy surfaces, collision dynamics, kinetics in solution and the solid-state, experimental methods, diffusion-controlled processes, transition state theory, thermal decomposition, and nucleation are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 761. Atmospheric Chemistry II. 3 Credit Hours.
Advanced atmospheric chemistry.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 762. Computer Models in Fluid Dynamics. 3 Credit Hours.
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 765. General Circulation of the Atmosphere. 3 Credit Hours.
Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
ATM 767. Spectral and Finite Element Methods in Computational Fluid Dynamics. 3 Credit Hours.
The simulation of fluid flows in geometrically complex domains (like ocean basins) and/or with high fidelity requires the adoption of new discretization techniques that can simultaneously handle the complicated geometry and permit high accuracy solution. The finite element method has traditionally been used to tackle the geometric complexity while spectral methods have been developed to handle high accuracy in simple geometries. Here we present an approach to handle both complexity within a single framework, namely the spectral element method. The course starts by describing the weak formulation common to all finite element methods which, by design, are geometrically flexible. The second part of the course describe how high order polynomial can be implemented within the finite element framework to achieve high accuracy rates.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 768. ENSO Dynamics, Prediction, and Predictability. 3 Credit Hours.
This course will provide students with a comprehensive observational and mechanistic understanding of the El Nino and the Southern Oscillation (ENSO) phenomena and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean interactions; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

ATM 772. Vortex Dynamics. 3 Credit Hours.
This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 774. Advanced Studies. 1-4 Credit Hours.
Supervised study of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

ATM 805. MPS Internship. 1-6 Credit Hours.
The MPS internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 810. Master Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

ATM 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ATM 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
M.P.S in Broadcast Meteorology

Overview

The Master of Professional Science (MPS) in Broadcast Meteorology (BME) provides a greater understanding of the broad environmental issues of the 21st Century, and prepares students with the tools, training, and education necessary for careers in broadcast meteorology.

Admission Requirements

Prerequisites:

1. Bachelor of Science degree (B.S.) or Bachelor of Arts degree (B.A.)
2. One year of Calculus and a minimum of 12 credits in natural science strongly recommended

Note to students: Deficiencies in the required courses may be considered on a case by case basis for otherwise highly qualified students.

Accepting applications for Fall 2020 admissions:

• July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
• July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

• Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
• Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

• Online CollegeNet application
• Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
• Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
• Three (3) letters of recommendation
• Valid TOEFL or IELTS scores (for international applicants)
• Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

• Statement of Financial Responsibility Form (SFR) and corresponding bank letter
• Color copy of current visa (if available).
• Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.
Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- **Josef Silny & Associates (JS&A), Inc, International Education Consultants**, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- **Evaluation Fee -** Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Letters of Recommendation:**

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an email from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

**GRE:**

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE [http://www.ets.org/gre](http://www.ets.org/gre)) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

**TOEFL/IELTS (for Non-native English Speakers):**

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- **Paper Based TOEFL (PBT) -** minimum score is 550
- **Internet Based TOEFL (IBT) -** minimum score is 80
- **IELTS (Academic) -** minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement **may be waived** if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
· Belize
· Canada (except Quebec)
· Dominica
· Grenada
· Guyana
· Ireland
· Jamaica
· New Zealand
· Kitts and Nevis
· Lucia
· Vincent and the Grenadines
· Trinidad and Tobago
· United Kingdom

Intensive English Program (IEP)

The University of Miami’s Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers to graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

### Mission

The mission of the Master of Professional Science (MPS) in Broadcast Meteorology (BME) is to provide students with a solid foundation in the study of meteorology, as well as training for on-camera and behind-the-scenes careers in broadcast meteorology. In addition, the track’s mission is to provide experiential learning for the development and delivery of a professional weathercast, as well as the opportunity to develop the knowledge and training necessary to enter the broader field of science journalism.

### Goals

The goal of the Broadcast Meteorology (BME) track is to integrate graduate coursework in broadcast journalism from UM’s School of Communications with advanced courses in Meteorology from the Rosenstiel School of Marine and Atmospheric Science (https://www.rsmas.miami.edu/) (RSMAS) for
comprehensive training in the field of broadcast meteorology. Within this realm, students will receive hands-on training in UM's state-of-the-art digital studio and learn the proper techniques involved in preparing and presenting a complete and professional weathercast.

**Student Learning Outcomes**
- Students will learn to research, analyze, predict, and then graphically and verbally communicate local and national weather forecasts “on camera”.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a written, final report and give an oral presentation based on original work/research in their chosen field completed during their internship.

**M.P.S. in Climate and Society**

**Overview**
The Master of Professional Science (MPS) in Climate and Society (CS) emphasizes the relationship between weather, climate and societal impacts. This program provides advanced training for individuals seeking careers in government, insurance, energy, and a number of other weather-impacted industries. Students in this track are fluent in both the fundamentals of business and the physical sciences.

**Admission Requirements**

**Prerequisites:**
1. Undergraduate degree in Meteorology, or closely related field (e.g. Math, Physics, or Geosciences)

Note to students: Deficiencies in the required courses may be considered on a case by case basis for otherwise highly qualified students.

Accepting applications for Fall 2020 admissions:
- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:
- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

**Transcript from U.S. Academic Institutions:**

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts
will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).
If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

#### Credit Hours

12
**Mission**

The mission of the Master of Professional Science (MPS) in Climate and Society (CS) is to draw on UM’s breadth and depth in interdisciplinary climatological and meteorological research, addressing risk management in the human health, fisheries, agriculture, water management, natural hazards, and coastal zone sectors. Faculty from RSMAS, Miller School of Medicine, and Geography contribute to the climate and society theme with their analysis of both climate trends and hazards, while faculty at the Schools of Law, Architecture, and the College of Engineering focus on the legal, material, and aesthetic aspects of the built environment that influence the mitigation of vulnerability and development of more resilient urban systems. Within this realm, students in the CS track understand important scientific and socioeconomic challenges, both in terms of urban planning and management of financial risks, resulting from natural and anthropogenic climate change, rising sea levels, and extreme weather events.

**Goals**

The goal of the Climate and Society (CS) track is to provide students with an understanding of how social vulnerability, mitigation strategies, and adaptive capacity in the face of climate change are strongly mediated by legal, socioeconomic, policy, psychological, epidemiological and cultural factors, including housing and construction codes, environmental risk perception, and health management/delivery. Interdisciplinary studies provide students with advanced training in the analysis of both climate trends and hazards, and application of the legal, material, and aesthetic aspects of the built environment that influence the mitigation of vulnerability and development of more resilient urban systems.

**Student Learning Outcomes**

Students will be able to understand and assess financial consequences resulting from natural and anthropogenic climate change, rising sea levels, and extreme weather events.

- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a written, final report and deliver a final presentation based on the work completed in their internship.

**M.P.S. in Weather Forecasting**

**Overview**

The Master of Professional Science in Weather Forecasting (WFC) is designed for students who have an undergraduate degree in meteorology and seek graduate level training and experience in applied weather forecasting.

**Admission Requirements**

**Prerequisites:**

1. Undergraduate degree in Meteorology, or closely related field (e.g. Math, Physics, or Geosciences)

Note to students: Deficiencies in the required courses may be considered on a case by case basis for otherwise highly qualified students.

Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):
• Online CollegeNet application
• Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
• Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
• Three (3) letters of recommendation
• Valid TOEFL or IELTS scores (for international applicants)
• Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

• Statement of Financial Responsibility Form (SFR) and corresponding bank letter
• Color copy of current visa (if available).
• Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Applicants must request the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

• Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on
letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

**GRE:**

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE [http://www.ets.org/gre](http://www.ets.org/gre)) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

**TOEFL/IELTS (for Non-native English Speakers):**

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

**Intensive English Program (IEP)**

The University of Miami’s Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers
graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

**Personal Statement (statement of purpose):**

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

**MPS Mailing Address:**

University of Miami  
Rosenstiel School Campus, MPS Office, Room S/A 132  
4600 Rickenbacker Causeway

## Mission

The mission of the Weather Forecasting (https://mps.rsmas.miami.edu/degree-tracks/weather-forecasting/) track is to provide students who have an undergraduate degree in meteorology and seek graduate-level training and experience in applied weather forecasting. The curriculum includes graduate-level course work in the analysis and preparation of weather forecasts, the effective use of numerical models, satellite, Doppler radar, and upper air data, and the application of this information to support a variety of specialized end-users, including agriculture, utilities, insurance, transportation, construction and other weather-sensitive industries. This track also fosters skills in writing and public communication in the context of professional weather forecasting.

## Goals

Students will develop skills in different areas of service offered by the National Weather Service, including Severe Weather, Marine and Aviation Forecasts, Hydrology, and Tropical Cyclone Forecasting. Students will gain knowledge in the analysis and preparation of weather forecasts, the effective use of numerical models, satellite, Doppler radar, and upper air data, and the application of this information to support a variety of specialized end-users, including agriculture, utilities, insurance, transportation, construction and other weather-sensitive industries. This track also fosters skills in writing and public communication in the context of professional weather forecasting.

## Student Learning Outcomes

- Weather Forecasting students will be able to analyze and prepare weather forecasts using a variety of data models and apply this information to a variety of end-users.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

## M.S. in Atmospheric Sciences

The most competitive ATM applicants have a strong foundation in the physical sciences and a bachelor's and/or master's degree in physics, mathematics, chemistry, meteorology, atmospheric science, or other related sciences. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. A background in scientific programming is preferred though not required.
Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phd-assistanships/). Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html (https://www.applyweb.com/miamigrd/).

• The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
• Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
• Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
• Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender's email addresses for the RSMAS recommendation letter form to be sent to them.
• Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

• Official original diplomas and certificates in the original language
• Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
• NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required

• The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

• Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee.
Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report
• An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
• It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)
• International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
• An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
• A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents
• Ph.D. Applicants with a Prior Master’s Degree
  • Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.
• Financial Documents
  • Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Mailing Address:
Graduate Studies Office SLAB 130
Rosenstiel School of Marine and Atmospheric Science
University of Miami
4600 Rickenbacker Causeway
Miami, Florida 33149
Telephone: 305.421.4155
Facsimile: 305.421.4771
E-mail: gso@rsmas.miami.edu

Program Requirements
The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in this Handbook or by the Program Director.

All RSMAS courses are listed on the RSMAS website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the ATM Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the ATM Program Director.

ATM students have a common set of required core courses. Elective courses are chosen from offerings in ATM as well as other units of RSMAS and UM.

1. Minimum of 24 course credits and 6 thesis credits.
2. The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.
3. Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
   - Grade of Master's Pass, Pass or High Pass needed to fulfill requirement.
   - For full-time students, the Comprehensive Examination should be taken near the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.
   - The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed in the program.
   - The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions from those submitted, with a minimum of 1 question per course (up to the maximum of 4 questions). The oral part is administered by the ATM Graduate Program Director and one or more of the course instructors (or assignees), and may include questions from all the courses taken by the student. The oral exam lasts no longer than 2 hours for each student. The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
   - A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of High Pass, Pass, Master's Pass or Fail is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.
   - **High Pass**: For students with no identifiable relevant weaknesses.
   - **Pass**: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
   - **Master's Pass**: Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
   - **Fail**: Students with this result will have an opportunity to re-take the exam once.
4. Attendance to the ATM seminars is required every semester.
   - ATM M.S. students must give at least one 15-minute presentation each year after the Comprehensive Examination.

Mission

The Department of Atmospheric Sciences (ATM), started in 2016, seeks to advance knowledge and understanding of the physical, chemical, and dynamical processes that determine our weather, our climate, and their interactions with the oceans and the continents. We train graduate students and young scientists to be leaders in the atmospheric sciences and related fields. Through our distinct strengths in climate dynamics, tropical meteorology, and cloud and aerosol processes, we strive to achieve excellence in research and education that will better inform the public and policy makers on how to prepare for hazards and changes in the weather-climate system.

Goals

Student Learning Outcomes

- Students will demonstrate a broad understanding of atmospheric science and how scientific research in their topical areas relates to societal issues.
- Students will demonstrate the ability to conduct high-quality atmospheric science research as evidenced by their thesis research.
- Students will demonstrate oral and written communication skills commensurate with employment as a research scientist or equivalent professional level scientist.

Ph.D. in Atmospheric Sciences

The most competitive ATM applicants have a strong foundation in the physical sciences and a bachelor's and/or master's degree in physics, mathematics, chemistry, meteorology, atmospheric science, or other related sciences. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. A background in scientific programming is preferred though not required.
Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor's degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phd-assistanships/). Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html (https://www.applyweb.com/miamigrd/).

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
- Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
- Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required

- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee.
• Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report
• An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
• It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)
• International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
• An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
• A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents
• Ph.D. Applicants with a Prior Master’s Degree
  • Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu. (gso@rsmas.miami.edu)
• Financial Documents
  • Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Program Requirements
The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in this Handbook or by the Program Director.

All RSMAS courses are listed on the RSMAS website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the ATM Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the ATM Program Director.

ATM students have a common set of required core courses. Elective courses are chosen from offerings in ATM as well as other units of RSMAS and UM.

</tbody>
</table>
Minimum of 25 course credits and 12 dissertation credits.

The remaining course credits can be obtained by taking other graduate courses offered by ATM, RSMAS, or UM.

1. Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).
2. Grade of Pass or High Pass needed to fulfill requirement.
3. For full-time students, the Comprehensive Examination should be taken near the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the ATM Graduate Program Director and the instructors (or assignees) of the first year courses taken by the students.
4. The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed in the program.
5. The Comprehensive Examination will consist of an oral part and a written part. The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions from those submitted, with a minimum of 1 question per course (up to the maximum of 4 questions). The oral part is administered by the ATM Graduate Program Director and one or more of the course instructors (or assignees), and may include questions from all the courses taken by the student. The oral exam lasts no longer than 2 hours for each student. The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.
6. A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of High Pass, Pass, Master's Pass or Fail is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.

- High Pass: For students with no identifiable relevant weaknesses.
- Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student's academic career.
- Master's Pass: Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.
- Fail: Students with this result will have an opportunity to re-take the exam once.

These guidelines complement those given in the UM Graduate Student Handbook.

All students are expected to take the Qualifying Exam and Proposal Defense by the end of their third year in the program. If the student needs to take the Exam in their fourth year, they will need to write a petition to the ATM Faculty with an explanation. A second extension after the end of the fourth year will not be permitted, unless there are exceptional circumstances.

While the exact format is left to the discretion of the Ph.D. Committee, a typical Oral Qualifying Exam comprises an hour of questions from the written Qualifying Exam and other related questions, and a second hour in which the student presents their Dissertation Proposal. It is recommended that the presentation emphasizes future work and is not a review of previous results, which are in the written Proposal.

Expectations of the Qualifying Exam

a. Dissertation Proposal: Written by the student in clear English befitting the standard of writing in a peer-reviewed journal. The proposal should demonstrate the capability of the student to produce and present research that is of the quality suitable for a journal article. Emphasis needs to be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor, but the writing must be their own.

b. Oral Exam: Demonstration of oral communication skills in responding satisfactorily to questions raised by the Committee in relation to the written questions, and any other questions asked by the Committee members.

c. Written Exam: Written answers judged by each Committee member to demonstrate that the student has the ability to understand and investigate the concept asked in the question. The questions are usually related to the research described in the dissertation proposal.

Attendance to the ATM seminars is required every semester.

ATM Ph.D. students must give at least one 15-minute presentation each year after completing the Comprehensive Exam and a one-hour presentation after advancing to Ph.D. candidacy, and at least 6 months before the dissertation defense.

Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.

The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.

A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.

Specific requirements for TAs are outlined in the RSMAS Student Handbook.
Mission

The Department of Atmospheric Sciences (ATM), started in 2016, seeks to advance knowledge and understanding of the physical, chemical, and dynamical processes that determine our weather, our climate, and their interactions with the oceans and the continents. We train graduate students and young scientists to be leaders in the atmospheric sciences and related fields. Through our distinct strengths in climate dynamics, tropical meteorology, and cloud and aerosol processes, we strive to achieve excellence in research and education that will better inform the public and policy makers on how to prepare for hazards and changes in the weather-climate system.

Goals

- To train graduate students and young scientists to be leaders in the atmospheric sciences and related fields.

Student Learning Outcomes

- Students will demonstrate advanced knowledge of atmospheric science and how scientific research in their topical areas relates to societal issues.
- Students will demonstrate the ability to conduct high-quality research in atmospheric sciences as evidenced by their dissertation research.
- Students will demonstrate oral and written communication skills commensurate with employment as a research scientist or equivalent professional level scientist.

Marine Biology and Ecology

https://www.graduate.rsmas.miami.edu/graduate-programs/marine-biology-and-ecology/index.html

Dept. Code: MBE

The Marine Biology and Ecology (MBE) academic program focuses on a wide range of field, laboratory, and theoretical coursework in a range of research areas, such as as physiology, genetics, evolution, diseases, molecular biology, coral reef ecology, tropical marine ecosystem conservation, fish biology, ecology, conservation and management, and biological oceanography.

MBE faculty, students, and their many international collaborators participate in multi-institutional, multi-disciplinary research programs. The UM Rosenstiel School hosts many research centers and groups, such as the experimental hatchery, the Rescue-a-Reef citizen science initiative, and the world-renowned NIH/University of Miami National Resource for Aplysia.

Graduate students can choose from a diversity of research areas and coursework taught by internationally recognized scientists studying animal behavior and physiology, coastal ecosystem ecology, coral reef biology and ecology, fisheries biology and management for sustainability, genomics, mangrove and marshland ecology, marine life population dynamics, microbiology, marine toxins, and marine organism diseases, zoogeography and invertebrate systematics, and zooplankton and phytoplankton ecology.

Degree Programs

- Master of Professional Science (M.P.S.) (p. 2354)
  - Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 2354)
  - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.) (p. 2354)
  - Requires 60 credit hours, including a minimum of 24 course credit hours and a minimum of 12 research credit hours.

Research Areas

Coral Reef and Coastal Ecology

Employs ecological, physiological and molecular approaches to understand, conserve, manage, and restore coral reefs, seagrasses, mangroves and their associated biota.

Marine Organismal and Biomedical Science

Focuses on how marine organisms respond to their environment on physiological and evolutionary time scales. This research integrates whole animal and cellular studies of physiology, biochemistry, neurobiology, genomics, molecular biology, aging, pathology and toxicology to understand factors controlling these responses and to develop these systems as models for human health.

Biological Oceanography

Focuses on adaptations, ecological interactions, food webs, and biogeochemical cycles of the ocean.
Fisheries Science
Studies the direct and indirect impacts of living marine resource exploitation on marine populations, communities and habitats and investigates solutions to the problems of unsustainable, habitat-damaging and/or inefficient fishing, including the minimization of bycatch and food web disruption.

Master of Professional Science (M.P.S.) Programs
There are two MBE tracks for the M.P.S degree:

- M.P.S. in Marine Mammal Science (MMS) (p. 2359)
- M.P.S. in Tropical Marine Ecosystem Management (TME) (p. 2361)

Master of Science (M.S.) Program
- M.S. in Marine Biology and Ecology (MBE) (p. 2366)

Doctor of Philosophy (Ph.D.) Program
- Ph.D. in Marine Biology and Ecology (MBE) (p. 2368)

MBE 604. Biology of Marine Mammals. 3 Credit Hours.
The purpose of this class is to introduce students to the biology, evolution, taxonomy, physiology, natural history, behavior, conservation, and management of marine mammals.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 605. Marine Mammal Disease and Medicine. 3 Credit Hours.
This course will cover the basics (theory and application) of marine mammal disease and medicine. Applications will focus on the medical management of managed care and wild populations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 606. Procedures in Marine Mammal Health and Disease. 1 Credit Hour.
The aim of this course is to provide the student with more in-depth exposure and study of various practical health related techniques/skills that are integral to marine mammal health and disease assessment. While the procedures are most applicable to marine mammals in managed care, several of the procedures can be adapted and/or are used in study of wild marine mammals. Health and disease assessment procedures will be divided into the following five categories/areas: physical examination and behavioral assessment; multimodal and advanced diagnostics (eg., electrocardiogram, ultrasound, etc.); sample collection (types, procedures); clinical pathologic (eg., hematology, biochemistry, serology) interpretation; gross and histopathologic necropsy techniques and interpretation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 607. Marine Mammal Applied Behavior Analysis and Managed Care. 3 Credit Hours.
This course involves a thorough examination of specific aspects of marine mammal managed care and conservation programs, with an emphasis on behavior management, analysis, and modification as a basis for adaptive response to changing environments both in-situ and ex-situ. Coursework will also focus on health management and assessment, emergency handling and transportation, government regulations, and wildlife conservation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 614. Tropical Marine Biology. 3 Credit Hours.
In this intensive one-week field course, students are introduced to the ecology, biology, and interconnections of all of South Florida’s major marine habitats through a combination of lectures and field excursions from UM’s remote private island research station in the Florida Keys.
Components: LEC.
Grading: GRD.
Typically Offered: Spring & Summer.
MBE 615. Tropical Marine Ecology. 3 Credit Hours.
Marine ecology with emphasis on tropical ecosystems and local habitats. Physical environmental and biotic adaptations, population, and community ecology are discussed. Field exercises in mangrove, sea grass, and coral reef ecosystems are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 618. Reef Coral Biology, Ecology, and Conservation. 3 Credit Hours.
Scleractinian (stony) corals are the principal builders of contemporary coral reefs and their unique biology underpins the ecological success of reef ecosystems in the world’s shallow tropical seas. This class covers the physiology and ecology of these critical organisms, the environmental factors governing their health, and their biotic interactions with other species. Examples of topics covered include algal symbiosis, calcification, reproduction, taxonomy, microbial ecology, competition with macroalgae, and herbivory, with insights at all levels from molecules to ecosystems. A special focus is on the decline of coral reefs due to anthropogenic stressors including climate change and coral bleaching, diseases, nutrient pollution, overfishing, and ocean acidification.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 621. Field Techniques and Instrumentation in Tropical Marine Ecology. 3 Credit Hours.
This course covers the instrumentation and field techniques commonly used to characterize the structure and function of the three dominant ecosystems in the tropics and subtropics, i.e. coral reefs, seagrass beds and mangroves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 622. Marine Microbial Dynamics. 3 Credit Hours.
An overview of the function of microbes in the ocean from a chemical perspective, building a quantitative understanding of cellular needs and metabolic functions, and the role these microbial processes play in controlling chemical fluxes and biogeochemical cycles in the ocean.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 629. Population Genetics and Genomics. 3 Credit Hours.
This course provides an introduction to population genetics, which examine the evolutionary processes that affect genomes of natural populations: mutation, genetic drift, natural selection, and gene flow.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 630. Marine Microbiology. 4 Credit Hours.
This course introduces the diversity, habitats and ecology of the marine microbial biosphere. Microbes drive many elemental cycles in the oceans. As primary producers and final degraders of organic matter they provide the foundations of marine trophic webs and biogeochemical processes. This course will place microbes into the context of marine ecosystem function and biogeochemistry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 632. Marine Mammal Research Techniques. 3 Credit Hours.
The goal of this course is to provide an overview of the field of marine mammal research (historic, current, and future), hands-on training in applied research skills relevant to the field of marine mammalogy, as well as an understanding of the biological and ecological significance of captive and wild research and contributions to management and conservation.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 635. Practical Computing for Biologists. 3 Credit Hours.
Biology is becoming far more computationally intensive, yet the undergraduate and graduate biology curricula have not kept pace with this new reality. Practical Computing for Biologists, based on Haddock's and Dunn's book of the same name, is a problem-centric course that provides resources for biologists to analyze the increasingly complex data sets generated by new technologies. We will cover flexible, scalable tools to accomplish a diversity of tasks using open source software. Topics will include: regular expressions, command line operations, Python programming, and bioinformatics pipelines. Exercises relevant to the students’ needs will be used to illustrate and develop new skills. After doing several assigned homework problems, students will have an opportunity to develop a bioinformatic analysis on their own data set.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MBE 639. Oceanic Productivity. 3 Credit Hours.
History, methods, and current topics relevant to studies of marine primary production. Magnitude and fate of primary production in the sea is essential to understand secondary production, the success of fisheries recruitment, and global climate.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 640. Marine Phytoplankton and Primary Productivity. 3 Credit Hours.
Ecology of marine phytoplankton and overview of major taxa including cyanobacteria. Distribution and magnitude of primary production in the sea and relationship to marine food webs and biogeochemical cycling is included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 641. Reef Restoration Techniques. 2 Credit Hours.
This course will provide a comprehensive background on the theory and practice of active coral reef restoration. This 5-day lab and field-intensive course will be structured with lectures and demos in the morning followed by lab or field activities in the afternoon. Readings for this class will include 2 restoration manuals and papers from the primary literature. Grades will be based on 1 exam, 2 quizzes, and 1 field monitoring report. Field activities will be carried out at sites around Key Biscayne. During these field trips, students will conduct hands-on restoration activities (e.g., nursery maintenance, equipment deployment, coral collections, coral planting, coral monitoring). The data collected during these activities will be used by the students to write a monitoring report.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MBE 642. Oceans and Human Health. 3 Credit Hours.
The objective of this interdisciplinary course is to provide students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and aquatic organisms on human health, and vice versa. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine and social sciences. The course covers harmful algal blooms, marine microbes, and global climate change as well as an overview of coastal impacts and remedies (e.g. drugs from the sea and marine models) through a series of coordinated lectures and case studies on human health, physical environment, and oceanographic processes. Prerequisite: Permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 643. Ecology, Conservation, and Ecotourism in the Galapagos. 3 Credit Hours.
This class takes place over three weeks in the Galapagos, Ecuador. It first gives a broad view of the physical/biological/ecological setting of the Galapagos Islands, and then analyzes the intersection between human development and nature in this fragile environment. It also provides an exploration of how tourism offers an alternative income source to unsustainable fisheries that once drove the local economy, and now has created a new set of pressures on the people and the environment.
Components: FLD.
Grading: GRD.
Typically Offered: Fall & Summer.

MBE 650. Analytical Techniques in Marine Biology. 2 Credit Hours.
Theory and applications of selected analytical techniques necessary to conduct quantitative research in marine biology (e.g., electrophoresis, metabolite assays, enzyme assays, radioisotope methodology). One hour lecture followed by three hour laboratory per week.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 670. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 671. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MBE 672. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 674. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Biology and Fisheries.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 676. Diseases of Marine Organisms. 3 Credit Hours.
Infectious, genetic, and environmentally induced diseases of marine fishes and invertebrates as well as diagnostic methods, cellular, and molecular pathology. Lecture, 3 hours.
Components: LEC.
Grading: GRD.

MBE 678. Evolutionary Genetics. 3 Credit Hours.
A Graduate course that presents and overview from "New Evolutionary Synthesis" (1900) to Evolutionary Genomics. The critical points to emphasize is the importance of standing genetic variation, the role of neutral evolutionary process versus evolution by natural selection and how a evolution perspective provides meaning insights into the biology.
Components: LEC.
Grading: GRD.

MBE 686. Fish Physiology. 3 Credit Hours.
Ecology, dispersal, and modes of life of fishes. Adaptations by larvae and adults to various habitats are covered as well as the effects of man on fish faunas and the importance of fishes to various ecological systems. Lecture, 3 hours.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 702. Marine Biology and Ecology Graduate Student Seminar. 1 Credit Hour.
Participation is required of all students in the Department of Marine Biology and Ecology every semester they are in residence, whether or not they are registered for the course, beginning in year 1 for PhD students with a MS, year 2 for PhD students without an MS, and approximately in their second semester in residence for MS students. Talks consist of one, 15-minute presentation per year on the research or research plan. The moderator assigns talk dates in May before the academic year. The course may be taken for credit once, but registration is not required.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

MBE 704. Biological Oceanography. 3 Credit Hours.
A comprehensive course in biological oceanography, including energy flow, biogeochemical cycles, planktonic and benthic ecosystem structure, the evolutionary ecology and adaptations of marine organisms, and paleoceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 707. Biochemical Toxicology. 3 Credit Hours.
Biochemical mechanisms of absorption, distribution, metabolism, and excretion of natural and synthetic environmental toxicants. Methods for evaluation of acute and chronic toxicity, carcinogenesis, mutagenesis, and teratogenesis including in vivo, isolated organ, tissue culture, and subcellular approaches to toxicity testing are included.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 710. Advanced Marine Mammal Biology. 3 Credit Hours.
The purpose of this class is to build upon foundational knowledge relevant to the biology, taxonomy, physiology, natural history, behavior, ecology, and conservation of marine mammals. Advanced concepts will include hydrodynamics, osteology and myology, respiratory system and diving physiology, circulatory/lymphatic systems, the nervous system, urinary/genital/reproductive systems, and neurobiology. Students must have 1 year of general biology/labs and general chemistry, 1 semester of calculus, and at least 9 credits in the natural sciences.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MBE 715. Advanced Topics in the Ecology of Coastal Tropical Marine Ecosystems. 3 Credit Hours.
This advanced class in tropical marine ecology is targeted at students in the MS and PhD programs as well as students in the MPS program with a strong background in marine ecology. The class describes the status, trends, and disturbance ecology of tropical coastal ecosystems and organisms, with a focus on coastal ecosystems of South Florida. In addition to reinforcing and expanding knowledge of basic ecological principles through lecture materials, students will be required to complete extensive readings on current topics relating to these ecosystems from the primary scientific literature. Students will participate in several paper discussions based on these readings. Additionally, students will complete two data analysis activities and write brief reports based on these analyses. Some prior knowledge of statistics is expected to complete these assignments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBE 716. Bayesian Statistics for Marine Scientists. 3 Credit Hours.
Bayesian methods are increasingly used in ecology, fisheries science and marine biology, as a statistically rigorous means to incorporate information from diverse sources into a single analysis, deal with missing or incomplete data, and directly estimate the probabilities of hypotheses or outcomes. This course will cover Bayesian methods from the theory to the practical use of the statistics packages OpenBUGS and JAGS for Bayesian analysis. Topics will include development of prior probability density functions, numerical methods for integrating posterior probability density functions, diagnostics of convergence, and methods for model selection and model averaging. Examples will be taken from ecology and marine science and will include Bayesian meta-analysis of life history parameters, fisheries stock assessment models, tag-recapture models, molecular biology, decision analysis and estimation of animal abundance from surveys. Students will be encouraged to read the peer reviewed literature critically, and evaluate whether the Bayesian methods that are commonly applied are being used and interpreted appropriately. After doing several assigned homework problems, students will have an opportunity to develop a Bayesian analysis on their own data set. Knowledge of the R language is useful but not required.
Prerequisite: RSM 612 Or MES 608.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBE 771. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 772. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 773. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 775. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 787. Biology and Systematics of Fishes. 3 Credit Hours.
Lectures and laboratories on comparative evolution, morphology, physiology, and ecology of fishes. Laboratory emphasis is placed on family level taxonomy and systematics of marine and estuarine fishes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MBE 805. MPS Internship. 1-6 Credit Hours.
The MPS internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MBE 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MBE 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MBE 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.P.S. in Marine Mammal Science

Marine Mammal Science ( MMS (https://mps.rsmas.miami.edu/degree-tracks/marine-mammal-science/))

Students in the Marine Mammal Science (https://mps.rsmas.miami.edu/degree-tracks/marine-mammal-science/) (MMS) track of the Master of Professional Science (MPS) program will prepare for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care. Please see our track web site (http://mps.rsmas.miami.edu/degree-program/marine-mammal-science/) for more information about this program.

### Mission

The mission of the Master of Professional Science degree in Marine Mammal Science (MMS) is to prepare students for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care. Coursework integrates topics such as marine mammal medicine and pathology, medical diagnostics and laboratory analysis, population assessment and management, state and federal regulations, applied ocean acoustics, research, education, and applied behavior analysis. The MMS track provides opportunities for students to interact with medical, training, and research experts in our community, as well as conduct an internship at one of many marine mammal rehab, managed care, or research facilities. As part of the practical training incorporated into the Marine Mammal Science curriculum, this track provides opportunities and training for students to participate in mark-recapture surveys, public education, wild health assessments, behavior analysis and modification studies, clinical care and diagnostics, necropsies, and regional and national conferences.

### Goals

The goal of the Master of Professional Science degree in Marine Mammal Science (MMS) is to prepare students for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care. Students develop an understanding of topics such as marine mammal medicine and pathology, medical diagnostics and laboratory analysis, population assessment and management, state and federal regulations, applied ocean acoustics, research, education, and applied behavior analysis. Students engage with medical, training, and research experts in our community, as well as participate in an internship at one of many marine mammal rehab, managed care, or research facilities for hands-on training, application of scientific strategies and tools, development of professional networks and communication skills, and advancement of related research. As part of the experiential learning curriculum, MMS students receive training and/or participate in mark-recapture surveys, public education, wild health assessments, behavior analysis and modification studies, clinical care and diagnostics, necropsies, and regional and national conferences.

### Student Learning Outcomes

- Students will have a strong foundation in marine mammal concepts and theories, with the ability to engage in productive academic and professional discussions with experts in the field.
- Students will be capable of evaluating specific threats to marine mammals and consider management objectives in light of cultural and socio-economic values, many of which will differ from their own.
• Students will be capable of thinking critically about question-based research and science-based management of marine mammals in the wild and in captivity, with an emphasis on ethics.
• Students will be able to effectively communicate marine mammal science to a variety of demographics, culminating in a meaningful and real-world contribution to outreach.
• Students will have a broader understanding of marine mammal managed care across various settings and will be capable of critically and strategically considering the intersection between animal care, welfare, management, and science.
• Students will demonstrate professionalism in all aspects of field and lab work during their internships.
• Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Tropical Marine Ecosystem Management

The Master of Professional Science in Tropical Marine Ecosystem (TME), a track within the Department of Marine Biology and Ecology (https://marine-biology-ecology.rsmas.miami.edu/) at the Rosenstiel School of Marine and Atmospheric Science (RSMAS), provides students with advanced training in the theoretical aspects of tropical marine ecology, as well as the practical aspects needed to begin a career in this field. Please refer to the MPS website (https://mps.rsmas.miami.edu/degree-tracks/tropical-marine-ecosystem-management/) for more information about the TME track.

Admission Requirements

Prerequisites:

1. Bachelor of Science degree (B.S.) or Bachelor of Arts degree (B.A.)
2. One year of General Biology + General Biology Labs
3. One year of General Chemistry
4. At least one semester of Calculus
5. 9 additional credits in natural science (Research in these fields may, in some cases, substitute for coursework hours.)

Note to students: Deficiencies in the required courses may be considered on a case by case basis for otherwise highly qualified students.

Accepting applications for Fall 2020 admissions:

• July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
• July 25th, 2019 - June 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

• Online CollegeNet application
• Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
• Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
• Three (3) letters of recommendation
• Valid TOEFL or IELTS scores (for international applicants)
• Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

• Statement of Financial Responsibility Form (SFR) and corresponding bank letter
• Color copy of current visa (if available).
• Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts
will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

**Transcripts from Non-U.S. Academic Institutions:**

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Letters of Recommendation:**

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

**GRE:**

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

**TOEFL/IELTS (for non-native English Speakers):**

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).
If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

Intensive English Program (IEP)

The University of Miami's Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

### Mission

The mission of the Master of Professional Science degree in Tropical Marine Ecosystem (https://mps.rsmas.miami.edu/degree-tracks/tropical-marine-ecosystem-management/) (TME) is to prepare graduates for technical positions in marine conservation, management, and marine ecosystem science at one of a number of state and federal agencies, institutions, and NGOs by providing students with advanced training in the theoretical and practical aspects of tropical marine ecology. This program introduces students to theoretical aspects of nearshore, benthic ecosystems common to tropical and subtropical regions worldwide (coral reefs, seagrasses, and mangroves) with an emphasis on threats facing these ecosystems. Practical aspects of the course expose students to field methods and techniques, taxonomy and identification of common vertebrates, invertebrates, algae and marine plants, GIS and remote sensing of shallow water marine environments, scientific diving (through the American Academy of Underwater Sciences), and small boat handling (through the Department of the Interior’s Motorboat Operator Certification Course).

### Goals

The goal of the Master of Professional Science degree in Tropical Marine Ecosystem (https://mps.rsmas.miami.edu/degree-tracks/tropical-marine-ecosystem-management/) is to introduce students to theoretical aspects of nearshore, benthic ecosystems common to tropical and subtropical regions worldwide (coral reefs, seagrasses, and mangroves) with an emphasis on threats facing these ecosystems. The TME program assists students in the development and application of scientific field methods and techniques, taxonomy and identification of common vertebrates, invertebrates, algae and marine plants, GIS and remote sensing of shallow water marine environments, scientific diving (through the American Academy of Underwater Sciences), and small boat handling (through the Department of the Interior’s Motorboat Operator Certification Course). The goal of the TME track is to prepare graduates for technical positions in marine conservation, management, and marine ecosystem science at one of a number of state and federal agencies, institutions, and NGOs by providing students with advanced training in the theoretical and practical aspects of tropical marine ecology.

### Student Learning Outcomes

- Students will be able to effectively identify, understand, assess, and manage various tropical marine ecosystems.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.
M.S. in Marine Biology and Ecology

Admission Requirements

The most competitive ATM applicants have a strong foundation in the physical sciences and a bachelor’s and/or master’s degree in physics, mathematics, chemistry, meteorology, atmospheric science, or other related sciences. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. A background in scientific programming is preferred though not required.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
- Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
- Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required

- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.
Where to Submit Documents for Evaluation

- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- **Evaluation Fee** - Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report

- An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)

- International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ using institution code 4862. There is no department code for either score submission.
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents

- **Ph.D. Applicants with a Prior Master’s Degree**
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.

- **Financial Documents**
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

¹ Minimum of 24 course credits and 6 thesis credits.

² No core courses are required. Students choose courses with the advice of their committee.

³ Additional requirement for minimum of 30 total credit hours.
 Attendance to the MBE seminars is required every semester.
 All MBE students must give a talk in the series annually after the first year.

Mission
The mission of the Marine Biology and Ecology (MBE) MS program is to train the next generation of scientists in the fundamental skills, knowledge, and practice of biology of the oceanic environment. Through coursework and independent research, we strive to prepare our students for positions in academia, government, or industry in jobs that leverage their skills in critical thinking, current technical knowledge such as statistical analysis and modeling, and understanding of the global marine environment. Our program commits to inspire graduates to continued scholarship, service, and innovation in an environment that is inclusive and diverse.

Goals
The goal is for MS students to demonstrate mastery of the fundamental skills, knowledge, and practice of biology of the oceanic environment, and commitment to scholarship, service, and innovation in an environment that is inclusive and diverse.

Student Learning Outcomes
Students will demonstrate a broad understanding of marine and atmospheric science and an awareness of how scientific research in their topical areas bears on current human and societal issues.

Ph.D. in Marine Biology and Ecology
Most successful applicants have a bachelor’s degree in biological sciences including a strong foundation in physical sciences (chemistry, physics, calculus) and basic biological sciences. However, applicants with a diversity of other degrees also are successful. Applicants should contact specific faculty to discuss mutual research interests. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. The advanced biology GRE is not required. Courses in marine biology and oceanography are not necessary for entrance into the program and are not recommended if taken in place of basic biology courses.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started
All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines
RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements
Online Application Form and Upload Supporting Documents
Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.
The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.

Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.

Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.

Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.

Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required

- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report

- An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)

- International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ using institution code 4862. There is no department code for either score submission.
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents

- Ph.D. Applicants with a Prior Master’s Degree
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.

- Financial Documents
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

---

1. Minimum of 24 course credits and 12 dissertation credits.  
2. No core courses are required. Students choose courses with the advice of their committee.  
3. • At the end of the second year, a written qualifying examination is required of all Ph.D. students that focuses on the subject matter needed to complete the research proposed for the dissertation.  
   • The purpose of the qualifying examination is to demonstrate that the MBE doctoral student has the necessary understanding and expertise in research and related fields to complete the dissertation research. The topic areas should be agreed upon by the student, chair, and the dissertation committee soon after the proposal defense. The student is strongly encouraged to discuss the specific topics with each member of the dissertation committee, well in advance of the examination, to clarify the expected questions. The committee is encouraged to provide specific reading or areas of knowledge they will test the student on.  
   • The qualifying exam is 4-5 partial days (4 hours per day) on questions written by their committee. It is the advisor’s responsibility to provide the test and to have the student’s committee grade it in a timely manner. The scheduling of the exam sessions is the responsibility of the student’s advisor, but in all cases the written portion of the examination shall be completed within one week.  
   • An additional oral qualifying examination may be required by the student’s committee, but may not serve as a substitute for the written examination, which is a Graduate School requirement.  
   • The decision of passing or failing the qualifying examination rests with the dissertation committee. The qualifying examination (written and, if required, oral) must be successfully completed, as documented by the dissertation committee, before the student can be admitted to candidacy.  
   • In the event of a failure, a student may be re-examined once upon the recommendation of the student’s committee in consultation with the academic committee. If permitted, the reexamination must be given before the end of the following semester.  

4. • Attendance to the MBE seminars is required every semester.  
   • All MBE students must give a talk in the series annually after the first year.  
      • Students entering the MBE Ph.D. program with a Master’s degree begin to give seminars in their first year.  

5. • Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.  
   • The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.  
   • A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.  
   • Specific requirements for TAs are outlined in the RSMAS Student Handbook.

---

**Mission**

The mission of the Marine Biology and Ecology (MBE) PhD program is to train the next generation of scientists in the fundamental skills, knowledge, and practice of biology of the oceanic environment. Through coursework and independent research, we strive to prepare our students for positions
in academia, government, or industry in jobs that leverage their skills in critical thinking, current technical knowledge such as statistical analysis and modeling, and understanding of the global marine environment. Our program commits to inspire graduates to continued scholarship, service, and innovation in an environment that is inclusive and diverse.

Goals
The goal is for PhD students to demonstrate mastery of the fundamental skills, knowledge, and practice of biology of the oceanic environment, and commitment to scholarship, service, and innovation in an environment that is inclusive and diverse.

Student Learning Outcomes
• Students will demonstrate a broad understanding of marine and atmospheric science and an awareness of how scientific research in their topical areas bears on current human and societal issues.
• Students will be able to critically evaluate scientific literature, review previous knowledge on a topic, formulate testable hypotheses, and skillfully use available data and tools to advance knowledge in a topical area. They will be able to conduct high-quality, doctoral research as evidenced by their dissertation research.
• Students will demonstrate advanced oral and written communication skills, and be able to effectively communicate scientific information to a peer audience.

Marine Ecosystems and Society
https://www.graduate.rsmas.miami.edu/graduate-programs/marine-ecosystems-and-society/index.html

Dept. Code: MES

Students enrolled in the Marine Ecosystems and Society (MES) program work at the intersection of science and society, committed to assessing, managing, and conserving marine resources through innovation and research. Although course selections are tailored to match individual research and career objectives, our graduates acquire knowledge and expertise critical to ensuring the sustainability of natural resources.

MES faculty expertise spans quantitative and qualitative disciplines that integrate the biological, ecological, economic, and social dimensions of marine resources and how they are shaped by policy and regulatory frameworks. The essence of the MES program lies in the diversity of our faculty and curriculum, fostering the cross- and interdisciplinary collaborations necessary to solve some of the world’s most challenging ocean conservation issues. The goal of our Ph.D. and M.S. program is to prepare students as future leaders in the fields of marine fisheries science, ecosystem modeling, aquaculture, conservation, ecosystem science, coastal geography, socioeconomics, cultural and natural resource management, climate change, environmental law, and marine policy.

Degree Programs
• Master of Professional Science (M.P.S.)
  • Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
• Master of Science (M.S.) (p. 2372)
  • Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
• Doctor of Philosophy (Ph.D.)
  • Requires 60 credit hours, including a minimum of 27 course credit hours and a minimum of 12 research credit hours.

Program Concentrations
• Aquaculture and Fisheries Science
• Climate Science and Policy
• Coastal Zone Management
• Ecosystem Modeling and Sustainability
• Exploration Science
• Fisheries Management Science
• Marine Mammal Science
• Marine Population Dynamics
• Marine Resource Economics
• Ocean Law and Policy
• Shark Ecology and Conservation
• Underwater Archaeology
Master of Professional Science (M.P.S.) Programs

There are eight MES tracks for the M.P.S. degree:

- B.A./M.P.S. in Marine Ecosystems and Society (MES) (p. 2382)
- J.D./M.P.S. in Marine Ecosystems and Society (MES) (p. 2388)
  - The School of Law and the Rosenstiel School offer a joint degree program (https://www.law.miami.edu/academics/jd-mps-marine-ecosystems-and-society/) in law and marine ecosystems and society. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and M.P.S. degree in Marine Ecosystems and Society from RSMAS.
- M.P.S. in Aquaculture (AQU) (p. 2390)
- M.P.S. in Coastal Zone Management (CZM) (p. 2394)
- M.P.S. in Exploration Science (ESC) (p. 2399)
- M.P.S. in Fisheries Management and Conservation (FMC) (p. 2403)
- M.P.S. in Marine Conservation (MCO) (p. 2408)
- M.P.S. in Underwater Archaeology (UA) (p. 2412)

Master of Science (M.S.) Program

- M.S. in Marine Ecosystems and Society (MES) (p. 2417)

Doctor of Philosophy (Ph.D.) Program

- Ph.D. in Marine Ecosystems and Society (MES) (p. 2420)

MES 601. Political Ecology of Marine Management. 3 Credit Hours.
Course provides a grounding in political ecology as an important theoretical approach to resource policy and management. The social analysis of resource use, social change, and development are discussed. Models of development and concepts of nature relate to resource use and policy formation are also included. Within this framework, ethnicity, class, and the politics of conservation are explored.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 602. Economics of Natural Resources. 3 Credit Hours.
Course brings together the approaches of natural resource and environmental economics to provide a comprehensive overview of the economics of national, international, and global environmental problems. A unifying theme throughout the course is the concept of sustainable development, defined as maximizing the net benefit to economic development while maintaining the services and quality of natural resources over time. Economic reasoning is used to examine the causes and consequences of environmental and resource problems and measures for dealing with them.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 603. Interdisciplinary Environmental Research: Introduction to the Why and the How. 3 Credit Hours.
The why and the how of developing and implementing interdisciplinary environmental research; research objectives and design choices informed by philosophies of knowledge and policy relevance. Assignments include development of research questions, a preliminary literature review, a draft dissertation proposal, and oral communication of research. Course is structured around peer critique and discussion of work in progress.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 604. Fieldwork in Coastal Management: Tourism, Conservation, and Development. 3 Credit Hours.
This course will select a coastal research site and explore its physical geography, culture, legal framework and institutions, and tourist development/conservation conflicts. In addition, we will examine different methodologies for diagnosing the site’s socioeconomic, governance, and environmental characteristics. Participants will meet weekly throughout the semester in Miami to discuss background readings and develop a group research field project that course participants will carry out during a Spring Break trip to the research site. Upon return to the University of Miami, the class will prepare manuscripts and presentations based on the field data that course participants have collected during the trip.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MES 605. Fieldwork in Coastal Cultures. 3 Credit Hours.
Field course in which the student participates in a social and economic analysis of a coastal culture (i.e., stone crab fishermen in Everglades City, spiny lobster fishermen in Key West, boat builders and commercial divers in the Abacos, Bahamas). Preliminary lectures and reading introduce the theory and method which the student then practices during a week-long field trip.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 606. Advanced Fieldwork in Coastal Cultures. 3 Credit Hours.
This ethnographic fieldwork course lets you experience coastal cultures first-hand in Miami and the Keys. Learning the political ecology approach in the field, you keep an in-depth field journal, complimenting entries with photography as visual anthropology. We will be interacting with some of Miami’s wealth of ethnic communities, both Latino and Haitian.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 608. Biometrics in Marine Science. 3 Credit Hours.
Applied statistical analysis in marine biology and biological oceanography. Descriptive statistics, probability distributions, and hypothesis testing are discussed. Concepts of analysis of variance, simple linear regression, and computer statistical distribution-free methods are also included as well as principles and procedures with computer statistical packages for data analysis. Lecture and laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 610. Environmental Planning and the Environmental Impact Statement. 3 Credit Hours.
Course takes a broad view of environmental planning and analysis while focusing specifically on the preparation of environmental impact statements. Statutory requirements and procedures at the federal level are examined. Judicial opinions are studied that reflect environmental disputes and controversies. The course also considers some of the substantive requirements of environmental impact analyses such as the assessment of physical and biological environment and socioeconomic impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 612. Aquaculture I. 3 Credit Hours.
This course examines the various strategies of resource exploitation and utilization related to aquaculture development. It focuses on environmental, technological, management, social and economic aspects of sustainable aquaculture. Advanced, emerging technologies and management strategies are examined, both at the hatchery and growout levels. The course also covers systems and all stages of planning and development, from site and species selection to feasibility studies, evaluation and sustainable use of natural resources, advanced hatchery and growout technologies. Emphasis is given on environmental sustainability as well as technical and economic feasibility of aquaculture projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 613. Aquaculture II Lab. 3 Credit Hours.
This course covers basic science and advanced aquaculture technologies, with emphasis on production. It encompasses reproduction, spawning, larval husbandry, nursery and growout techniques of commercially important species of fish, crustaceans, mollusks, algae, non-traditional species and the production of live feeds such as microalgae, rotifers, Artemia spp. and other zooplanktonic organisms. The course also covers ontogeny, nutrition, physiology, bioenergetics and growth, environmental monitoring, disease prevention and control (prophylaxis, probiotics and vaccines), water quality management and growout technologies such as recirculating aquaculture systems (RAS), bioflocs and offshore surface and submerged cages. The course addresses advanced technology and proper management practices for sustainable aquaculture development. Aquaculture II is primarily a lab course, with a great deal of hands-on experience at the experimental hatchery and are required to conduct experimental trials and assist with ongoing projects. Course requires a background in either aquaculture and biological sciences or business.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 614. Underwater Archaeology Field Techniques. 3 Credit Hours.
This course is designed to provide students the practical and scientific tools necessary to conduct archaeological investigations in underwater contexts. Critical skills such as baseline mapping, trilateration, artifact illustration, photography, and others are discussed, practiced, and ultimately applied over the course of the semester. The in-field practicum portions of the course will take place on nearby shipwrecks within Biscayne National Park. Please note that there is a significant amount of diving to complete this this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MES 615. Marine Archaeological Survey and Technology. 3 Credit Hours.
This course is designed to provide students with an introduction to current technologies and marine remote sensing tools utilized in archaeological survey. Instruction in the use of technology such as the magnetometer, sidescan sonar, sector scan sonar, scanning lasers, and other tools are covered. The use of data acquisition software and the post processing of data are also key elements of this course. The bulk of this course takes place at the Broad Key Research Station over the week of spring break. In addition to the week, students meet several times before and during the semester to in order to prepare for the week and also draft a final group report for submission. There is a significant component of this course utilizing boats and also a smaller diving component.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 616. Ocean Policy and Development and Analysis. 3 Credit Hours.
Ocean policy development and analysis of issues such as: offshore oil drilling, fisheries resource conflicts, marine mammal protection, ocean dumping and incineration, multiple use conflicts in marine protected areas, pollution from land based sources, and oil spill contingency planning.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 617. Aquaculture IV: Aquaculture Business, Regulatory, and Environmental Considerations. 3 Credit Hours.
This course examines the substantive business, regulatory, and environmental issues concerning Aquaculture from offshore and coastal projects to land-based systems. Legal and regulatory considerations related to Aquaculture project development and operation will be covered. Aspects of business planning for different species and production systems will be examined. The interdisciplinary approach to Aquaculture will combine business and legal considerations with biological and environmental limitations.
Prerequisites: MES 612 and MES 613.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 618. Coastal Zone Management. 3 Credit Hours.
Development of a framework for formulation and assessment of coastal zone policy. Analysis of issues and conflicts in coastal zone management (CZM), such as: zoning and planning, coastal and beach protection, ecosystem protection, the federal flood insurance program, adaptations to sea level rise, coastal pollution from land-based sources, and tourism impacts.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 619. Aquaculture III. 3 Credit Hours.
Aquaculture III will complement Aquaculture I and II-Lab. It is a field course conducted simultaneously with an annual UM-IATTC Tuna Workshop at the world renowned Achotines Laboratory in Panama, Central America. Students will be able to apply most of the topics taught in MES 512/612 and MES 513/613. It covers reproduction and larval development of commercially and ecologically important marine fish species, focusing on tuna. Topics include physiology, biology, ecology, genetics, nutrition and environmental issues related to marine fish aquaculture. The course covers and requires participating in capture, handling, transportation, maturation, spawning, larval husbandry, nursery and growout techniques. Participants will learn about the research projects being conducted by the IATTC with yellowfin tuna, Thunnus albacares, and will visit and spend time at Open Blue Offshore farm in the Atlantic Ocean side of Panama.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MES 620. Environmental Law and Policy. 3 Credit Hours.
This course will provide an overview of environmental law and its practical applications at the federal, state, and local level. The course will also include an introduction to the United States legal system, the administrative state, environmental regulations, and current issues in environmental law and policy. Finally, the course will focus on environmental themes that are of particular importance to marine professionals, such as marine mammal protection, marine protected areas, coastal wetland regulation, water pollution litigation, and environmental justice.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MES 621. Water Resources in China and Vietnam: Science and Policy. 3 Credit Hours.
The course examines Water Resources from broad perspectives (water quality and quantity, ground water, international river management, watershed management, coastal issues). Additionally, it compares management strategies and problems in three countries: China, Vietnam, and the USA. The course is also highly interdisciplinary - combining natural science, policy, and the social sciences. We spend half of the time in Vietnam and the other half in China, and in both countries have long-term established cooperation with three universities: Hanoi University of Mining and Geology (HUMG), Hanoi University of Natural Resources and the Environment (HUNRE) and Yunnan University, Asian International Rivers Centre (AIRC). In both countries, we arrange lectures and discussions with local students at these universities for one week. The other week is dedicated to field work and travel.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MES 622. Principles and Practices of Marine Social Science Research. 3 Credit Hours.
This course will introduce students to the theory of marine social science methods, focusing on how the methods relate to the design, planning, implementation, analysis, and reporting of marine social science research. The course will be divided into three sections: theory, design, and planning; statistical analysis; and spatial data construction and analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 623. Applied Environmental Economics. 3 Credit Hours.
The objective of this course is to familiarize students with economic arguments and methods applied to environmental problems, such as environmental quality, natural resource management, and conservation. The course will cover economics and computer programing, but the emphasis will be set on developing communication skills to inform policy making. The class is intended for graduate students seeking to develop intuition and the skills necessary for the discussion of environmental policies.
Prerequisite: MES 624.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 624. Statistics and Data Analysis for Environmental Science and Policy. 3 Credit Hours.
The objective of this class is to provide students with applied skills that will allow them to understand, discuss, and perform general quantitative analyses related to environmental science and policy. The course will cover required statistical background and methods, as well as an introduction to advanced topics and challenges in population and causal inference. Students will also be trained on how to use computing programming tools to manipulate data and perform analyses. The class is intended for graduate students seeking to learn the foundation of modern methods and techniques for quantitative analysis of environmental problems, as well as their application in science and policy making. Students should have a background in undergraduate statistics and algebra or permission of the instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 625. Fisheries Socioeconomics and Management. 3 Credit Hours.
The course covers both conceptual and practical aspects dealing with the management of commercial and recreational fisheries. The first part of the course offers an introduction to micro-economic principles, focusing on efficient resource allocation. Building on these principles, we develop bio-economic models to illustrate the interactions between the resource, harvesting sector and environment. We also review the theory and practice of unregulated open access, limited entry and rights-based management. Last, we study the economics of the recreational sector and explore a number of contemporary fishery management challenges.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 626. Submerged Cultural Resource Management. 3 Credit Hours.
This course discusses various aspects and details of managing underwater cultural heritage/submerged cultural resources. Topics will include ethics, policies and procedures, marine protected areas, and federal, state, and international laws governing management of submerged archaeological sites. Specific focus is placed on examining the variety of management concepts and frameworks utilized both in the U.S. and internationally. Finally, the role and value of public archaeology in management is also presented and discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MES 627. Exploration Science Field Studies. 3 Credit Hours.
This course will be held as a sailing expedition to the Channel Islands in California traveling aboard the sailing vessel Sea Dragon. This course provides students with an opportunity to gain field experience by being part of an expedition team that is tasked with observing, documenting, and communicating discovery, which are the hallmarks of exploration. Students will be tasked with collecting data and producing media while learning to travel and work as an expedition team. They will learn expedition skills including navigating and sailing a circumnavigation class 72-foot sailing vessel. In addition to the week of spring break, students meet throughout the semester to work on logistics, background research, and presentations.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 628. Seafood Market and Marketing. 3 Credit Hours.
This course aims at educating the next generation of professionals in the seafood business and present future managers of an aquaculture business with the necessary knowledge in the packaging, pricing, placement, promotion and distribution of their finished product to give them the best return on their investment. The course covers basic theories but it is primarily a practical approach to the production, marketing and distribution of seafood products in the U.S. and the world market.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 629. Biology, Ecology, and Management of Mangrove Ecosystems. 3 Credit Hours.
This course is intended to introduce students to mangrove ecosystems, one of the most productive, and biologically diverse, ecosystems in the world, and one of South Florida's key coastal ecosystems. The principal objective is to explain how our scientific understanding of mangrove ecosystems has been unfolding and how today they are considered paramount not only for their organic carbon contributions to coastal areas, but as protectors of the coast, mitigators of global climate change, reservoirs of biodiversity, and supporters of the livelihoods of millions of inhabitants throughout the world. The course will consist of lectures, class discussions, and presentations of student assignments. The lectures will follow an open seminar format in which all students are expected to actively participate in the discussion of the presented material. Two lectures will take place during field trips to local mangrove areas.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 630. Port Operations and Policy. 3 Credit Hours.
The course will include: Introduction to ports; port geography; port operations; port administration; Federal port policy; free ports/free zones; port investment/tariffs; port marketing; Coastal Zone Management and ports; case studies, CZM; fostering economic development; and Port planning and development.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 631. Marine and Coastal Protected Area Theory, Planning, Management, and Issues. 3 Credit Hours.
This course shall present the study and analysis of marine and coastal protected areas in an interdisciplinary manner, commencing with an overview of conservation biology and protected area principles (ex. island biogeography), a survey of coastal and marine protected area (MPA) theory, and the influence of ecological parameters on MPA design. Another critical component of the course will be a historical review on MPAs and MPA management, how the concept developed and proliferated, and its present status. The course will next address the human dimensions and socioeconomic impacts of MPAs, including the economic performance and financing mechanisms of MPAs, stakeholder engagement, participation, and conflicts, and management approaches. Finally, the course will review a series of MPA case studies, which incorporate the aforementioned topics in a 'real world' environment and demonstrate how the concept has been applied across the world.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 632. Theory and Method in Underwater and Maritime Archaeology. 3 Credit Hours.
This course covers archaeological theory and methodologies used to interpret underwater and maritime sites in both prehistoric and historic contexts. The interconnection of theoretical constructs with submerged archaeological remains is emphasized, providing a broad toolset that can be used to better understand and explain the archaeological assemblage and associated data sets acquired from the investigation of these sites.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MES 633. Decision Analysis: Natural Hazards and Catastrophes. 3 Credit Hours.
This course addresses the behavioral factors (cognitive biases, heuristics, risk perception, social influences, and past experiences) that together help explain why people tend to underprepare for potential natural and man-made disasters. Implications for science communication and public policy are emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 634. Shark Behavioral Ecology and Conservation. 3 Credit Hours.
Within a semester, students will learn core concepts in shark behavioral ecology and key aspects of shark biology needed for the holistic understanding and study of shark behavioral ecology and conservation, including shark sensory, reproductive, physiological, movement and foraging ecology. These concepts will be used to link shark behavioral ecology to its consequences for conservation and management. Students will also be given the unique opportunity to interact with and be trained in advanced technologies used to study shark behavioral ecology, such as biotelemetry (acoustic and satellite tags). Through demonstrations and in-class exercises, students work with real shark biotelemetry data and are taught basic spatial analyses of shark satellite tracking data, such as home range analysis. Students will also participate on a shark research trip out of Miami with UM's Shark Research and Conservation Program, where they will be shown shark research survey, sampling and tagging techniques as well as gain hands-on experience in ongoing research.
Pre or Corequisite: MSC 460 or MES 560 or MES 660.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 645. Marine Population Assessment Surveys and Analysis. 3 Credit Hours.
In spite of global conservation efforts, marine animal populations show increasingly critical low levels of abundance. Marine population assessment techniques are mostly based on fishery-dependent data for those species that are commercially exploited. Population assessment techniques based on these types of data usually lack spatial resolution and they do not provide spatial-temporal patterns of species diversity and community structure. Conversely, direct resource surveys aim to provide representative estimates of the relative abundance and population structure of the species (and community) of interest. These surveys can generate multi-species population databases that are fundamental for the modeling and understanding of important ecosystem-wide mechanisms of resource conservation. Multi-species indices of relative abundance are also important in the “tuning” of modern stock assessment and conservation methods. In this course, students will learn about experimental sampling concepts and designs, instrumentation, survey implementation and statistical methods to directly assess size-structured population abundance (i.e., density estimates scaled to survey area), and of exploited and non-target species (e.g. sea turtles, marine mammals, etc.) in the ecosystem. Students will analyze real data from various surveys carried out in the past using statistical techniques to estimate valid population parameters and variances. Comparative analyses of survey designs are discussed based on an ample literature on the subject matter, which will be made available to the students.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 646. Marine Population Biology Processes and Modeling. 3 Credit Hours.
The course examines some of the fundamental life history processes that control wild aquatic populations and uses mathematics to help describe and understand such processes. Mathematical models, developed for each process following a series of simplifying assumptions, should be an adequate description of the biological traits of interest. In this course, students will learn basic population biology concepts, models to describe and estimation methods for population parameters included in such models. The course focuses on ageing determination, individual growth, survival, migration, reproduction and feeding. The course also covers the data requirements and statistical validation of statistical model fits such that students will develop an ability to integrate and summarize complex biological knowledge through a set of well-defined mathematical and statistical methods. It uses examples of a broad range of marine taxa including harvested species and protected species (marine mammals, sea turtles and corals).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 660. Introduction to Marine Geographic Information Systems. 3 Credit Hours.
Marine Geographic Information Systems are emerging as a distinct subset of GIS, due to fundamental differences between terrestrial and underwater spatial information (2-D vs. 3-D, multiresolution, synoptic data collection, time depth (4-D) modeling). Approximately the first half of this course is a brief review of basic GIS, and the second half concentrates on aspects of marine data acquisition and manipulation in the GIS context.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MES 661. Introduction to Marine Geographic Information Systems - Laboratory. 0 Credit Hours.
Introduction to Marine Geographic Information Systems - Laboratory introduces students to the basic methods and technology in Marine Geographic Information Systems. The course is taught with hands-on laboratory exercises following the evolution of Marine Geographic Information Systems, from basic cartography to topological and network modeling to internet access and application.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Summer.

MES 662. Intermediate Spatial Analysis. 3 Credit Hours.
This is an advanced GIS course and is intended for students who have taken an introductory course in GIS. The course will consist of raster data modeling, spatial analysis, introductory concepts in remote sensing and geostatistical analysis. Additionally, we will be using modules or scripts for more GIS functionality. The course will have a lecture part and laboratory part to advance the student’s knowledge in spatial analysis. Students will also be assigned journal readings showing practical applications of raster data modeling. The students will use ArcGIS Pro 2.2 and with several extensions to complete the lab exercises and the required GIS project.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 664. Citizen and Participatory Science. 3 Credit Hours.
The Citizen and Participatory Science course will focus on preparing students for designing and implementing citizen and participatory science projects aimed at addressing questions and problems around specific environmental issues. As social networks grow, open data comes online and mobile technologies proliferate and advance, the opportunity to tap into eager and interested citizens to collect data for research and documentation purposes is quickly rising. This program will look at history of citizen science, which is over 100 years old, and will analyze current and past projects. Students will be exposed to how citizen science projects are designed and implemented and how they can be best leveraged to gain useful data for research. Guests lecturers will be invited for virtual and in-person presentations. A key component of the course will be for students to design a citizen science project using best practices. These projects can provide the baseline for launching real projects with organizations interested in applying citizen science to their work. The course will look at both technology driven projects as well as low-tech projects to expose students to the range of work being done in this rapidly evolving area.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 665. Science and Natural History Media Production. 3 Credit Hours.
The emphasis of this course is on documentary video production using a variety of technologies and methods. As video becomes increasingly used in communication, this course will provide an overview of the production process (pre-production, production, post-production) for those with backgrounds in science, education, and outreach. A variety of films will be reviewed and the process of science storytelling will be examined. In addition, the course will touch on mobile, mapping, imaging, ROV and UAV (drone) technologies as they relate to media production.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 670. Conservation and Management of Marine Mammals. 3 Credit Hours.
This course explores current and pressing threats to large marine vertebrates, particularly mammals, and the relative legislation in place to protect them. Additionally, we will explore the methods and tools used to assess, manage, and conserve marine mammal populations, including case studies that exemplify both successes and failures. Discussions will include anthropogenic impacts, the Marine Mammal Protection Act/IWC/ESA/Florida Manatee Sanctuary Act/IUCN, a stock as a management unit, OSP/PBR, mark-recapture and other methodologies integral to wild population management, marine mammal strandings response, and the ethics of human intervention as it relates to the management of marine ecosystems as a whole. Emphasis will also be placed on the acquisition of relevant skill sets, such as communication of conservation messages using social media, advocacy with integrity, grant writing, and stranding and rehabilitation procedures and certifications.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 671. Marine Conservation Biology. 3 Credit Hours.
Until now, fisheries management has used a species-specific approach to conservation, focusing attention on economically important species that people consume. There has been some research on charismatic mega-fauna, particularly whales, seabirds and sea turtles. To this day, fishery biologists are concerned mainly with assessing stocks of commercially harvested species to maintain biomass production, rather than maintaining and restoring biological integrity: species composition, habitat structure and ecosystem function. It is only in the past few years that a new biodiversity-focused, ecosystem-based, multidisciplinary scientific approach to marine conservation has emerged. This new paradigm is known as Marine Conservation Biology.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MES 672. The Archaeology of Seafaring. 3 Credit Hours.
Ships and seafarers have had considerable influences on civilization throughout history. The ship typically represents the pinnacle of a society's understanding of many disciplines: astronomy, geography, metallurgy, physics, warfare, et cetera. No other process similarly spread the delights and devastation of the world so effectively. This course studies man's evolutionary relationship with the sea from early civilization through the 20th century. Emphasis will be on archaeological and ethnographical investigations concerning shipwrecks and maritime epicenters supporting maritime culture. This will be a lecture course supported by visual, audible, and hands-on presentations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MES 673. Marine Conservation Outreach. 3 Credit Hours.
This course will explore the concepts, theories and practices of creating and evaluating effective Marine Conservation Outreach. The course will cover the project life cycle from planning to implementation to evaluating effectiveness.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 674. From Gold to Glory: History and Ethics of Exploration. 3 Credit Hours.
This course will address changes in motivation and approaches to exploration with a focus on risk perception, physiological limitations, and social-cultural context, including how past colonial legacy is still influencing perceptions of the current generation of scientists, explorers, and the groups they interact with. Assignments will include critical readings of source materials and case studies of particular expeditions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 676. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to marine affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 677. Management and Conservation of Marine Ecosystems. 3 Credit Hours.
In this course students will learn how marine ecosystem management operates to achieve its objectives of sustainable use, optimization and allocation of resources. The primary focus is on how fisheries interactions with marine ecosystems are monitored, assessed and regulated. It examines how fisheries management achieves its objectives through different operational strategies. As the ecosystem-based approach to fisheries management requires seeing fisheries as integrated systems within the broader ecosystem, the course puts management in the context of impacts of all human activities not just fisheries. Particular attention is given to management of habitats, harvested and protected species. Impacts of marine transport, tourism, and mineral extraction are also considered albeit in less detail. The course includes individual chapter introductions to all components of ecosystem management and policy including, ecological sustainability, governance, social, economics and legal aspects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 678. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to marine affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 679. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to marine affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 680. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to marine affairs.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 681. Special Topics. 1-3 Credit Hours.
Lectures, research projects, or directed readings in special topics related to Marine Ecosystems and Society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MES 682. Special Topics. 1-3 Credit Hours.
Lectures, research projects, or directed readings in special topics related to Marine Ecosystems and Society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MES 683. Special Topics. 1-3 Credit Hours.
Lectures, research projects, or directed readings in special topics related to Marine Ecosystems and Society.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MES 690. Acoustic Measurement of Nekton, Plankton and Underwater Habitat. 3 Credit Hours.
This is an introductory course on the theory, history and applications of acoustics to measure nekton, plankton and underwater habitat. It was designed for those students who wish to learn how to make quantitative measures of organisms and structure underwater. It is a prerequisite for MES 790, which focuses on data acquisition in the field and laboratory signal processing. This course is essential for students who need to make precise and accurate underwater measurements for their research.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 691. Maritime Archaeology Field Study. 3 Credit Hours.
This field-based course focuses on the acquisition of data from shipwreck sites and subsequent interpretation and analysis. Topics of study include shipwrecks from the 16th century to World War II era. Students will learn about historic maritime activity and be exposed to analyzing both the archaeological and historical record in examination of these sites. This course will be taught in collaboration with partners at the National Park Service and/or NOAA, and dives will take place in Biscayne National Park, Dry Tortugas National Park, or the Florida Keys National Marine Sanctuary. Students must be approved UM divers to take this course.
Components: FLD.
Grading: GRD.
Typically Offered: Summer.

MES 692. Archaeological Study of Submerged Pre-Contact Sites. 3 Credit Hours.
This is a field-based course with a focus on submerged pre-contact or prehistoric archaeological sites within North America, Latin America, and the Caribbean. Students will learn about the past human activity, settlement patterns, and habitation of various regions and sites, while conducting fieldwork. Focus will be placed on topics such as the peopling of the Americas over 13,500 years ago, human adaptation to environmental change, and the location and investigation of now-inundated coastal sites and submerged caverns and caves. Techniques and methods of data acquisition relevant to these site types will be taught, and students will receive hands-on experience in specific methodologies. Students must be approved UM divers to take this course.
Components: FLD.
Grading: GRD.
Typically Offered: Summer.

MES 693. Maritime Archaeology and the Conquest of Mexico. 3 Credit Hours.
This course will allow students to experience firsthand the archaeological and historical sites associated with the conquest of Mexico and to participate in archaeological fieldwork investigating maritime archaeological sites associated with this seminal historic event. Site-based learning experiences will include world-renowned museums and very significant archaeological sites, both prehistoric and historic, which will provide perspective on cultural transition and conflict over time within the prehistoric societies in Mesoamerica and the eventual collision of cultures and civilizations at the height of the Aztec empire and the advent of Spanish colonialism. The fieldwork portion of the course will take place in the town of Villa Rica de la Vera Cruz and will be conducted from a borderlands/landscape lens, incorporating both terrestrial and underwater efforts. Students will participate in the archaeological study of and search for ships scuttled by Hernán Cortés in 1519 and 1520.
Prerequisite: RSM 500 or RSM 600.
Components: FLD.
Grading: GRD.
Typically Offered: Summer.
MES 710. International Ocean Law and Governance. 3 Credit Hours.
This course shall track the history and development of international ocean law, from a series of bi-lateral and multi-lateral treaties, the evolving customary law framework, and coastal and maritime state claims to the codification and proliferation of international legal agreements addressing the panoply of ocean use and management issues. Applying a chronological approach, the course shall identify and discuss key developments in international ocean law, leading to the drafting of the Third United Nations Law of the Sea Convention (UNCLOS III). By evaluating the multifold themes addressed under the convention, the course will analyze the effects of convention in a post UNCLOS III world, especially in the fields of environmental protection, the management of marine fisheries and living resources, the allocation of seabed and subsoil resources, issues affecting the high seas, and polar regions.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 713. Marine Population Dynamics. 3 Credit Hours.
This course introduces students to the mathematical and statistical models that underpin the study of the fluctuations of marine populations. It focuses on the understanding and theory of the dynamics of marine harvested and protected species (marine mammals, sea turtles, and other endangered taxa). Particular attention is given to understanding these dynamics with the support of data related to marine fisheries. Whereas MES 646 focuses on basic processes (ageing, growth, reproduction, migration) MES 713 focuses on how understanding of these basic processes can help develop population models. The first half of MES 713 is devoted to the estimation of abundance from surveys, fishery data and mark recapture experiments. The second part of the course covers the study of population models that explain abundance fluctuations. The last part of the course covers forecasting models that can be used to provide advice to resource managers.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 714. Population Modeling and Management. 3 Credit Hours.
Mathematical and computer-intensive models of exploited populations fish, shell fish, marine mammals, and sea turtles. Stock production (surplus production), structured analytical yield (yield-per-recruit and age-size structured assessments), stock and recruitment, simulation modeling, adaptive control theory, risk assessments, and decision theoretic analyses are discussed. Techniques of management, concepts of resource allocation, and fishery management institutions with case studies are also included. Lecture and computer-based laboratory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 715. Advanced Biometrics in Marine Science. 3 Credit Hours.
An introduction to advanced statistical analysis of multivariate empirical observations with primary emphasis on applications in the assessment and interpretation of the dynamics of marine populations and communities in marine biology, biomedical sciences, fisheries, and biological oceanography. Advanced methods in linear, multiple and nonlinear regression analysis, probability and estimation theory, multiple partial correlation, ANCOVA, GLIM, general additive models, nonlinear optimization, multivariate statistics (classification and ordination), and sampling techniques. Exploratory data analysis and modeling are emphasized using the software SAS, S-PLUS, and MATLAB.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MES 720. Coastal Law and Policy. 3 Credit Hours.
Course examines the authority of different levels and agencies of government to make decisions affecting the coastal zone. Course also explores the coastal problems of shoreline use and development, uses of water areas and the seabed, and the related questions of environmental protection.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MES 774. Advanced Studies in Marine Ecosystems and Society. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MES 790. Advanced Acoustic Measurement of Nekton, Plankton, and Underwater Habitat. 3 Credit Hours.
This is the second course in a series on the acoustic measurement of nekton, plankton and underwater habitat. This course will focus on the acquisition and processing of plankton, nekton and marine habitat data using sonar hydrophones. Students will also review and discuss the classic papers that have been published on this topic. This class was designed for those students who wish to learn how to make quantitative measures of organisms and underwater habitat structure for their research.
Prerequisite: MES 590 Or MES 690.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MES 805. MPS Internship. 1-6 Credit Hours.
The MPS internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MES 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MES 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAF 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MES 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MES 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MES 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

B.A./M.P.S. in Marine Ecosystems and Society

B.A. / M.P.S.
The Department of Marine Ecosystems and Society (https://marine-ecosystems.rsmas.miami.edu/) (MES), in cooperation with the Undergraduate Marine and Atmospheric Science Program (https://undergraduate.rsmas.miami.edu/), also offers a five-year B.A./M.P.S (https://undergraduate.rsmas.miami.edu/academics/majors/marine-affairs/) Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn a Master of Professional Science (https://mps.rsmas.miami.edu/) (M.P.S). with only one additional year.

Admission Requirements
Conditional acceptance to the M.P.S program is based on the student's GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

Prerequisites:
1. Underwater Archaeology applicants should refer to Dr. Hanselmann’s Underwater Archeology Track Guide (https://mps.rsmas.miami.edu/_assets/pdf/dr-hanselmanns-underwater-archeology-track-guide.pdf)

Accepting applications for Fall 2020 admissions:
• July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
• July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:
• Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
• Now until November 1st, 2020 (International Applicants)
An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

**Transcript from U.S. Academic Institutions:**

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu, mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

**Transcripts from Non-U.S. Academic Institutions:**

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Letters of Recommendation:**

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant's file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet requesting the online submission of the required documentation (questionnaire + letter of recommendation).
Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:
Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

TOEFL/IELTS (for Non-native English Speakers):
To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).
- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:
- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

Intensive English Program (IEP)
The University of Miami’s Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

**Personal Statement (statement of purpose):**

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

**MPS Mailing Address:**

University of Miami  
Rosenstiel School Campus, MPS Office, Room S/A 132  
4600 Rickenbacker Causeway  
Miami, FL 33149  
Email: mps@rsmas.miami.edu  
Website: https://mps.rsmas.miami.edu/index.html  
Phone: (305) 421-4340  
Fax: (305) 421-4246

**Curriculum Requirements**

Students must follow the curriculum corresponding to their respective track in the MPS program. A list of courses (required and elective) are listed on each track page of the MPS website (https://mps.rsmas.miami.edu/degree-tracks/).

See specific MPS track curriculum for course listing.

Total Credit Hours  
                      150-152

1 At least 6 of which must be at the 300-level or higher. MSC 204 (http://bulletin.miami.edu/search/?P=MSC%20204) does not satisfy the MSC elective requirement but does satisfy the Statistics requirement. With the approval of the MPS advisor (Track Leader), students in MPS may enroll a different graduate-level course if statistics was successfully completed and passed at the undergraduate level. Completion of graduate-level statistics is a requirement for select tracks in the MPS program.

2 General Biology BIL 150 (http://bulletin.miami.edu/search/?P=BIL%20150) and Evolution and Biodiversity BIL 160 (http://bulletin.miami.edu/search/?P=BIL%20160) must be passed with a grade of "C-" or higher.

3 Chemistry for the Biosciences must be passed with a grade of "C-" or higher.

* 600-level courses offered through the graduate Marine Ecosystems and Society programs at the Rosenstiel School may be taken by Junior or Senior students with permission:

**Application for Undergraduates to Take a Graduate Course**

Click here (https://www.grad.miami.edu/policies-and-forms/forms/application-for-undergraduates-to-take-a-graduate-course-revised-mar-2020.pdf) to download the form.

University of Miami undergraduate students within 30 credits of meeting the requirements for the baccalaureate degree may take and receive credit for graduate courses, while completing the requirements for the baccalaureate degree. No more than six (6) graduate credits may be taken in one semester, and no more than a total of twelve (12) graduate credits may be taken as an undergraduate. The student should be enrolled in at least 12 undergraduate credits each semester to avoid eligibility issues for some aid programs. Students may take no more than 15 credit hours of combined undergraduate and graduate credits. Admission to take graduate courses does not automatically admit the student to a graduate degree program at the University of Miami. The graduate credits earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

Undergraduate students who request to take graduate coursework must complete the Application for Undergraduates to Take a Graduate Course and then email the completed form and a completed drop/add form (https://www.grad.miami.edu/policies-and-forms/forms/drop-add-form_9-25-2018.pdf) to the Graduate School, at gradforms@miami.edu, for final approval. Once the form is signed by the Graduate School representative, the student will receive it signed via email. The student then must send that form and the associated drop/add form to the Office of the Registrar, at registrar@miami.edu, for processing.

*For forms on fellowships and grants, please visit the Financial Aid and Funding Opportunities (https://www.grad.miami.edu/costs-and-funding/financial-aid-and-funding-opportunities/internal-fellowships-and-scholarships/) section under the Costs & Funding tab.

**Sample Plan of Study**

Students must follow the curriculum corresponding to their respective track in the MPS program. A list of courses (required and elective) are listed on each track page of the MPS website (https://mps.rsmas.miami.edu/degree-tracks/).

J.D./M.P.S. in Marine Ecosystems and Society

Overview

The University of Miami School of Law and the Rosenstiel School of Marine and Atmospheric Science (RSMAS) offer a joint degree program in law and Marine Ecosystems and Society (MES). Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Professional Science in Marine Ecosystems and Society (https://www.law.miami.edu/academics/jd-mps-marine-ecosystems-and-society/) from RSMAS.

The M.P.S. degree allows students to focus their coursework in one of four areas:

1. Aquaculture Track: Focuses on the environmental, technological, social, economic, legal and political aspects of sustainable aquaculture.
2. Coastal Zone Management Track: Gain exposure to the legal and governance frameworks associated with the management of near-shore waters. These areas present unique challenges to resource managers in the shipping, tourism, development, fisheries, aquaculture and oil industry.
3. Marine Conservation Track: Design a curriculum around personal career goals while focusing on innovative solutions to current marine ecosystem threats. This track combines science, law, economics, and policy to foster the conservation awareness of marine ecosystems.
4. Underwater Archaeology: (https://mps.rsmas.miami.edu/degree-tracks/underwater-archeology/) Focuses on the theory, field techniques, and management practices necessary to work within the field of archaeology and the broader general field of marine sciences. Coursework integrates topics such as site mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology. Underwater Archaeology (UARCH) students receive training as AAUS Science Divers during their first semester in the MPS Program. Students will have opportunities to work side-by-side with professional archaeologists through internships and field projects with private, public, or non-governmental agencies, both nationally and internationally, and conduct relevant fieldwork. UARCH applicants and students should be aware of and follow the guidelines (https://mps.rsmas.miami.edu/_assets/pdf/dr-hanselmanns-underwater-archeology-track-guide.pdf) outlined by UARCH faculty Track Leader, Dr. Frederick Hanselmann. (https://people.miami.edu/profile/fhanselmann@rsmas.miami.edu)

Admissions

- Students who apply for the joint J.D./M.P.S. program must apply to both the School of Law and to Master of Professional Science program at the Rosenstiel School of Marine and Atmospheric Science (RSMAS).
- Prospective students must achieve a qualifying score on the Law School Admissions Test (LSAT) and on the General Graduate Record Examination (GRE) for admission to the respective schools. A minimum, combined score of 297 (Verbal + Quantitative only) is required to be considered for MPS.
- Three (3) letters of recommendation are required for admission to RSMAS. An applicant may use letters submitted to his/her law school application for consideration into RSMAS. Applicants must submit a written request to the law school in order to release his/her letters of recommendation to the MPS office for his/her RSMAS application.
- Applicants must submit official transcripts from all previous and current academic institutions, even if credits were not awarded. Applicants must submit a written request to the law school in order to release his/her transcripts to the MPS office for his/her RSMAS application. University of Miami (UM) alumni and/or current students are not required to submit an official transcript from UM as part of the application process; the MPS office at RSMAS has access to UM transcripts.
- An applicant must notify both schools that he or she is applying for the joint J.D./M.P.S. program and, in order to remain in the joint program, must meet the minimum standards of both schools.

Credits
A student may complete requirements for both degrees within seven regular semesters or, subject to course availability, in an intensive program of six regular semesters and two full summers. The joint degree program saves a student 12 credits over earning the degrees separately. An individual would essentially complete 82 credits (rather than the normal 88) in law courses and 24 credits (rather than the normal 30) in marine and atmospheric science courses for a total of 106 credits in order to receive the J.D. and the M.P.S. degrees. A maximum of 6 credits from the law school must be petitioned and approved for transfer to the student's graduate record in order to meet the 30-credit minimum for a master's degree. Prior to submitting a formal petition to the Graduate School, a student's academic advisor from the law school and the MPS Director/Associate Director must approve the credits requested for transfer.

**Curriculum**

The student's work in the joint degree program, whether connected with a course, seminar or individual research project at the School of Law or the Rosenstiel School, must result in a substantial research project of publishable quality in marine law or policy or related scientific issues. Students may use their required upper-class research paper at the School of Law to fulfill this requirement. JD/MPS students should follow the MPS Checklist (https://mps.rsmas.miami.edu/our-students/form/), which outlines requirements for all JD/MPS students regardless of track.

**Requirements: Juris Doctor (J.D.)**

Students must complete at least 12 credits from among the following courses or seminars:

**Requirements: RSMAS courses are identified and organized by each MPS track (https://mps.rsmas.miami.edu/degree-tracks/)**

**A student must complete 24 credits of courses from RSMAS:**

Courses (https://graduate.rsmas.miami.edu/students/course-schedules/) will be updated from time to time and students should consult with a faculty advisor, or other designated person, prior to registering for any course not specifically listed above, or to ensure a course not listed will be credited toward this degree. RSMAS, Department of Marine Ecosystems and Society, makes no representation that all of the above courses will be available to any given student at all times during the course of his or her studies.

**Admission Requirements**

- Students who apply for the joint J.D./M.P.S. program must apply to both the School of Law and to the Master of Professional Science (MPS) program at the Rosenstiel School of Marine and Atmospheric Science (RSMAS).
- Prospective students must achieve a qualifying score on the Law School Admissions Test (LSAT) and on the General Graduate Record Examination (GRE) for admission to the respective schools. A minimum, combined score of 297 (Verbal + Quantitative only) is required to be considered for MPS.
- Three (3) letters of recommendation are required for admission to RSMAS. An applicant may use letters submitted to his/her law school application for consideration into RSMAS. Applicants must submit a written request to the law school in order to release his/her letters of recommendation to the MPS office for his/her RSMAS application.
• Applicants A maximum of 6 credits from the law school must submit official transcripts from all previous be petitioned and current academic institutions, even if credits were not awarded. Applicants must submit approved for transfer to the student’s graduate record in order to meet the 30-credit minimum for a written request to the law school in order to release his/her transcripts master’s degree. Prior to the submitting a formal petition to the Graduate School, a student’s academic advisor from the law school and the MPS office for his/her RSMAS application. Director/Associate Director must approve the credits requested for transfer. University of Miami (UM) alumni and/or current students are not required to submit an official transcript from UM as part of the application process; the MPS office at RSMAS has access to UM transcripts.
• An applicant must notify both schools that he or she is applying for the joint J.D./M.P.S. program and, in order to remain in the joint program, must meet the minimum standards of both schools.

Curriculum Requirements
Curriculum within the MPS program will be decided on a case-by-case basis during academic advising. However, students select from a variety of multidisciplinary courses across many departments and schools at RSMAS/UM, in a holistic effort to meet their personal and professional goals. JD/MPS students may follow the Plan of Study Grid corresponding to their respective area of focus, which identifies required and elective courses. Students must enroll in graduate level courses during their time a RSMAS; no credit will be awarded for undergraduate courses.

- Aquaculture Track (https://mps.rsmas.miami.edu/degree-tracks/aquaculture/)
- Coastal Zone Management Track (https://mps.rsmas.miami.edu/degree-tracks/coastal-zone-management/)
- Marine Conservation Track
- Underwater Archaeology

Plan of Study
JD/MPS students may follow the Plan of Study Grid corresponding to their respective area of focus. The Plan of Study Grid identifies required and elective courses for each area of focus; however, a student’s schedule will be decided on a case-by-case basis during academic advising. JD/MPS students select from a variety of multidisciplinary courses across many departments and schools at RSMAS/UM, in a holistic effort to meet their personal and professional goals.

- Aquaculture Track (https://mps.rsmas.miami.edu/degree-tracks/aquaculture/)
- Coastal Zone Management Track (https://mps.rsmas.miami.edu/degree-tracks/coastal-zone-management/)
- Marine Conservation Track
- Underwater Archaeology

M.P.S. in Aquaculture
Overview
The Master of Professional Science (MPS) in Aquaculture focuses on the environmental, technological, social, economic, legal, and political aspects of sustainable aquaculture. The program covers all stages of planning and development, from site and species selection to feasibility studies, resource evaluation, hatchery and grow-out technology, and commercialization. Please see our departmental website (https://marine-ecosystems.rsmas.miami.edu/) for more information about this program.

Admissions Requirements
Accepting applications for Fall 2020 admissions:
• July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
• July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:
• Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
• Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):
• Online CollegeNet application
• Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
• Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
• Three (3) letters of recommendation
Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

GRE:

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.
The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

**TOEFL/IELTS (for Non-native English Speakers):**
To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).
- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:
- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

**Intensive English Program (IEP)**
The University of Miami's Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

**Personal Statement (statement of purpose):**
Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include
information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

**MPS Mailing Address:**

University of Miami

Mission
The mission of the Aquaculture (https://mps.rsmas.miami.edu/degree-tracks/aquaculture/) track is to provide students with an interdisciplinary study of sustainable aquaculture and related industries, as well as advanced training on environmental, technological, social, economic, legal, and political aspects of marine aquaculture. Emphasis is placed on the environmental sustainability of commercially important marine fish species, as well as shrimp and mollusks. The program combines classroom lessons with experiential learning at the University of Miami Experimental Hatchery (https://www.rsmas.miami.edu/research/projects/hatchery/) (UMEH) to prepare students for careers in marine aquaculture.

Goals
The goal of this track is to advance sustainable marine aquaculture and address issues affecting seafood industries. Within this realm, students will be exposed to all stages of planning and development, from site and species selection to feasibility studies, resource evaluation, hatchery and grow-out technology, and commercialization. In addition, students will learn to develop and/or improve an aquaculture business.

Student Learning Outcomes

- Students will be able to effectively plan and execute an aquaculture operation including all related aspects of rearing, harvest, storage, shipping, and marketing.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Coastal Zone Management

Overview: Coastal Zone Management (CZM (https://mps.rsmas.miami.edu/degree-tracks/coastal-zone-management/))

Students will be introduced to the legal and governance frameworks on topics such as coastal fisheries management, marine protected areas, port management, tourism development, environmental impact assessment, and oil exploration.
Admission Requirements

Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report (https://www.grad.miami.edu/apply/on-campus-graduate-programs/rosenstiel-school-of-marine-and-atmospheric-sciences-international-applicants/rsmas.html) from an approved international credentialing agency (https://www.naces.org/members/) (for non-U.S. academic institutions).
- Graduate Record Examination (https://www.ets.org/gre/)(GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Color copy of current visa (if available) (https://www.bus.miami.edu/_assets/pdfs/mba-masters/memba-sample-bank-letter.pdf)
- Color copy of valid passport (must include picture page and barcode page)
- Copy of most recent I-94 Travel Record (https://i94.cbp.dhs.gov/I94/#/home) (if applicable)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card) (https://www.uscis.gov/greencard/).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree (https://mps.rsmas.miami.edu/about/program-requirements/) before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website’s Contact Us (https://mps.rsmas.miami.edu/contact/) page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official and will not be accepted for full admissions purposes.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency (https://www.naces.org/members/). Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency (https://www.naces.org/members/). Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.
Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information, including the Application for Evaluation of Foreign Educational Credentials.

Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.

Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.

Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination Test (GRE http://www.ets.org/gre (https://www.ets.org/gre/)) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education (https://mps.rsmas.miami.edu/about/financing-your-education/) page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
Intensive English Program (IEP):

The University of Miami's Division of Continuing and International Education offers a fully-accredited Intensive English Program (https://iep.dcie.miami.edu/) (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that the IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, results, and your role in relation to this.

</tr>
</thead>
<tbody>
<tr>
<td>MES 610</td>
<td>Environmental Planning and the Environmental Impact Statement</td>
<td>30</td>
</tr>
</tbody>
</table>

Coastal Zone Management (MES 618) is the only required class for this track, all other classes are selected on a case by case basis during academic advisement. Enrollment in 2-6 internship credits required during a student’s time in MPS. Completion of less than 2 internship credits must be approved by MPS Director. Typically 2 semesters are needed to complete all aspects of the internship phase of MPS.

Potential Courses

- MES 601: Political Ecology of Marine Management
- MES 602: Economics of Natural Resources
- MES 604: Fieldwork in Coastal Management: Tourism, Conservation, and Development
- MES 606: Advanced Fieldwork in Coastal Cultures
- MES 610: Environmental Planning and the Environmental Impact Statement
- MES 612: Aquaculture I
- MES 613: Aquaculture II Lab
- MES 619: Aquaculture III
- MES 618: Coastal Zone Management
- MES 620: Environmental Law and Policy
Plan of Study

The Coastal Zone Management (CZM) track requires completion of one core course, MES 618, Coastal Zone Management (http://bulletin.miami.edu/search/?search=MES+618). The rest of the curriculum will be decided on a case-by-case basis during academic advising. However, students select from a variety of multidisciplinary courses across many departments and schools at RSMAS/UM, in a holistic effort to meet their personal and professional goals. A list of suggested electives is available on the CZM track page of the MPS website (https://mps.rsmas.miami.edu/degree-tracks/). Completion of 2-6 internship credits are required during a student’s time in the MPS program; exceptions to this must be approved by the Chair of the student’s committee and the MPS Director.

Mission

This track provides students with interdisciplinary training in the theoretical aspects of marine science and conservation, as well as advanced knowledge of the legal and governance frameworks for careers in environmental consulting, marine Geographical Information Systems (GIS), assessment and management of coastal ecosystem, resources, and related industries.

Goals

The goal of the Coastal Zone Management track exposes students to the development of environmental impact statements, advanced knowledge of coastal and/or ocean law and policy, and training in statistics for environmental management. By selecting courses from various departments at RSMAS and other schools within UM, and participation in an internship, students learn applications of the legal and governance frameworks for areas such as coastal fisheries management, marine protected areas, port management, tourism development, environmental impact assessment, and oil exploration.

Student Learning Outcomes

• Students will be able to understand the legal and governance frameworks related to coastal fisheries and other marine resource management, tourism development, environmental impact assessment, and oil exploration, for the development and application of comprehensive marine conservation strategies and policies.
Students will demonstrate professionalism in all aspects of field and lab work during their internships.

Students will submit a final written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Exploration Science

Overview: Exploration Science (ESC) (https://mps.rsmas.miami.edu/degree-tracks/exploration-science/)

Exploration Science is the applied practice and study of field research using a variety of methods, technologies, and approaches to drive question-based scientific endeavors. This field fosters scientific inquiry and the application of expedition skills within a context that acknowledges the cultural and ethical implications of exploration.

This track is being offered at RSMAS in partnership with UM’s Abess Center for Ecosystem Science and Policy (http://www.cesp.miami.edu/). The Abess Center fosters innovative, interdisciplinary initiatives that bridge the gap between science and environmental policy.

Admission Requirements

1. Bachelor of Science degree (B.S.) or Bachelor of Arts degree (B.A.)

Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website’s Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:
All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Mission
The mission of the Master of Professional Science in Exploration Science (ESC) is to foster scientific inquiry and the application of expedition skills within a context that acknowledges the cultural and ethical implications of exploration. The ESC track exposes students to citizen science project design, exploration technology applications, and field-based skills training, while receiving essential background information on the history, ethics and risks related to exploration. This program prepares students to lead and conduct professional exploration initiatives and expeditions in a variety of environments. A flexible curriculum allows students to focus on courses and subjects that best fit their interests and goals for careers in environmental education, surveying, resource management, citizen science, conservation, media production, government agencies, museums, and ecotourism companies among others. This track is being offered at RSMAS in partnership with UM’s Abess Center for Ecosystem Science and Policy. The Abess Center fosters innovative, interdisciplinary initiatives that bridge the gap between science and environmental policy.

Goals
The goal of the Master of Professional Science in Exploration Science (ESC) is to introduce and help students understand citizen science project design, exploration technology applications, and field-based skills training, while receiving essential background information on the history, ethics and risks related to exploration. Tailored class selection and experiential learning helps students obtain the skills and scientific knowledge needed to lead and conduct professional exploration initiatives and expeditions in a variety of environments. Through this integrative process, students are better prepared for careers related to environmental education, surveying, resource management, citizen science, conservation, media production, government agencies, museums, and ecotourism companies. In addition, some have continued their formal education in PhD programs.

Student Learning Outcomes
- Exploration Science (ESC) students will develop and execute citizen science project design, identify and engage exploration technologies where applicable, implement field-based skills training, and lead and conduct professional exploration initiatives in a variety of environments.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Fisheries Management and Conservation

The MPS in Fisheries Management and Conservation (https://mps.rsmas.miami.edu/degree-tracks/fisheries-management-and-conservation/) (FMC) allows students to develop the professional skills required to be a fisheries scientist with curriculum options in various relevant areas of interest, such as fisheries management, fisheries surveys, and quantitative fisheries.

Admission Requirements
1. Bachelor of Science degree (B.S.) or Bachelor of Arts degree (B.A.)

Accepting applications for Fall 2020 admissions:
- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:
- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):
- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
• Three (3) letters of recommendation
• Valid TOEFL or IELTS scores (for international applicants)
• Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

• Statement of Financial Responsibility Form (SFR) and corresponding bank letter
• Color copy of current visa (if available).
• Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

• Josef Silny & Associates (JS&A), Inc., International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:
Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

Intensive English Program (IEP)

The University of Miami's Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):
Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

### Mission

Fisheries Management and Conservation (FMC) supports the management of marine resources by providing society with quantitative knowledge and modeling of the natural and anthropogenic processes that regulate the dynamics and functioning of fishery ecosystems and by providing predictions on the future behavior of such systems. The FMC track is a unique, academic program that allows students to develop the professional skills required to be a fishery scientist. This program fosters critical thinking and provides a comprehensive study of the science and skills needed for employment in government agencies such as the National Marine Fisheries Service, state agencies, Fishery Councils, regional NOAA laboratories, as well as Non-Governmental Organizations (NGO).

### Goals

The goal of the Fisheries Management and Conservation (FMC) track is to assist students in the development of professional skills required to be a fishery scientist and provide guidance for studies in relevant areas of interest such as fishery management, fishery surveys, and quantitative fisheries. Advisors and course instructors help students understand the processes influencing fisheries management and the development of fisheries policy alternatives, develop knowledge about the statistical design and implementation of fishery surveys and monitoring programs, and apply advanced statistical and mathematical modeling tools in support of fishery stock assessments.

### Student Learning Outcomes

- Fisheries Management and Conservation (FMC) students will be able to understand the processes influencing fisheries management and the development of fisheries policy alternatives, develop knowledge about the statistical design and implementation of fishery surveys and monitoring programs, and apply advanced statistical and mathematical modeling tools in support of fishery stock assessments.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Marine Conservation

Overview

The Master of Professional Science in Marine Conservation (https://mps.rsmas.miami.edu/degree-tracks/marine-conservation/) provides students with advanced training in the theoretical aspects of marine science and conservation, as well as the practical aspects required to begin a career in this field. This degree track is unique in that students design a curriculum that emphasizes their personal goals and interests, while focusing on innovative solutions to current marine ecosystem and organism threats.

Admission Requirements

Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report (https://www.grad.miami.edu/apply/on-campus-graduate-programs/rosenstiel-school-of-marine-and-atmospheric-sciences-international-applicants/rmas.html) from an approved international credentialing agency (https://www.naces.org/members/) (for non-U.S. academic institutions).
- Valid Graduate Record Examination (https://www.ets.org/gre/) (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card) (https://www.uscis.gov/greencard/).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree (https://mps.rsmas.miami.edu/about/program-requirements/) before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us (https://mps.rsmas.miami.edu/contact/) page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency (https://www.naces.org/members/). Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.
Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency (https://www.naces.org/members/). Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre (https://www.ets.org/gre/)) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education (https://mps.rsmas.miami.edu/about/financing-your-education/) page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
- Kitts and Nevis
- Lucia
- Vincent and the Grenadines
- Trinidad and Tobago
- United Kingdom

**Intensive English Program (IEP)**

The University of Miami's Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

**Personal Statement (statement of purpose):**

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

### Suggested Plan of Study

#### Year One

##### Fall

- MES 671: Marine Conservation Biology
  - Credit Hours: 3
- RSM 612 or MES 608: Statistics for Marine Scientists
  - Credit Hours: 3
- MBE 615: Tropical Marine Ecology (or ELECTIVE)
  - Credit Hours: 3
- MES 620, 720, or 616: Environmental Law and Policy
  - Credit Hours: 3
- or Coastal Law and Policy
- or Ocean Policy and Development and Analysis

- Credit Hours: 12

##### Spring

- MES 710 or 618: International Ocean Law and Governance (or ELECTIVE)
  - Credit Hours: 3
- MES 660 & MES 661: Introduction to Marine Geographic Information Systems
  - Credit Hours: 3
- (Can be taken in Fall or Spring)
- MES 673: Marine Conservation Outreach (or ELECTIVE)
  - Credit Hours: 3
- RSM 671: Special Topics (Science Communication: Professional Writing OR ELECTIVE)
  - Credit Hours: 1-3

- Credit Hours: 10-12
Mission
This mission of the Marine Conservation (https://mps.rsmas.miami.edu/degree-tracks/marine-conservation/) track is to provide students with an interdisciplinary study of marine science and conservation, as well as advanced training in scientific field techniques, scientific literacy and communication, public outreach and integration, and education within the marine realm. A flexible curriculum allows students to concentrate on subjects and applications required for careers in marine conservation.

Goals
The goal of this track (https://mps.rsmas.miami.edu/degree-tracks/marine-conservation/) is to advance conservation efforts, scientific literacy and communication, public outreach and integration, and education within the marine realm. Practical aspects of the program will vary between individuals but may include exposure to field methods and techniques, GIS and remote sensing of shallow water marine environments, shark behavioral ecology and conservation, the development of environmental impact statements, coastal law, the development of social media, scientific communication, and statistics for environmental management.

Student Learning Outcomes

• Students will be able to formulate comprehensive marine conservation plans for marine organisms and ecosystems from planning, through implementation, assessment, and outreach.
• Students will demonstrate professionalism in all aspects of field and lab work during their internships.
• Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Underwater Archaeology

Overview: Underwater Archaeology (UA) (https://mps.rsmas.miami.edu/degree-tracks/underwater-archeology/)

The MPS Underwater Archaeology (https://mps.rsmas.miami.edu/degree-tracks/underwater-archeology/) track (UARCH) is a two-year program that focuses on the theory, field techniques, and management practices necessary to work within the field of archaeology and the broader general field of marine sciences. Coursework integrates topics such as site mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology. UARCH students receive training as AAUS Science Divers during their first semester. Students will have opportunities to work side-by-side with professional archaeologists through internships and field projects with private, public, or non-governmental agencies, both nationally and internationally, and conduct relevant fieldwork.

Admission Requirements

• BA/BS in Anthropology, History, or related field
• Meet minimum RSMAS diving standards as outlined by the RSMAS Dive Office.
  • Minimum open water scuba certification with a minimum of 10 logged dives
  • Ability to complete the required swimming test:
    • 400 yard swim in 12 minutes
    • 25 yard underwater swim on 1 breath (no push off)
    • 15 minute float and/or tread
    • 400 yard swim with mask/snorkel/fins in 8 minutes (no arms/hands)
    • Free dive to 15 feet to retrieve 5 pound weight
• Certified divers with more than 50 logged dives, especially those with prior scientific diving training, may qualify for the Experienced Diver Checkout and not be required to take RSM 600

Recommended:

• Participation in an archaeological field school prior to commencing the UARCH program
• Volunteer for terrestrial archaeological projects
Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

Transcripts from Non-U.S. Academic Institutions:

All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant's file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Canada (except Quebec)
- Dominica
- Grenada
- Guyana
- Ireland
- Jamaica
- New Zealand
Intensive English Program (IEP)

The University of Miami’s Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

Mission
Underwater archaeology is the study of the remains of past human activity through the exploration, documentation, and study of a variety of submerged sites, from shipwrecks to caves and springs to lakes and rivers. The Underwater Archaeology track helps students understand how archaeological sites and artifacts can play a large role in education, community cohesion, national identity, economic development, sustainable tourism, conservation, and, of course, entertainment among others. This program focuses on the theory, field techniques, and management practices necessary to work within the field of archaeology and the broader general field of marine sciences. This program provides training in the areas of mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology.

Goals
Students in the MPS Underwater Archaeology (https://mps.rsmas.miami.edu/degree-tracks/underwater-archeology/) track (UARCH) will learn the theories, field techniques, and management strategies necessary to work on a variety of submerged fresh and saltwater sites.

Student Learning Outcomes
• Students in the MPS Underwater Archaeology track (UARCH) will learn site mapping and documentation, interpretation of shipwrecks and submerged sites, best management practices, marine protected areas, and marine survey technology to effectively apply these skills and knowledge to submerged fresh and saltwater sites.
• Students will demonstrate professionalism in all aspects of field and lab work during their internships.
• Students will submit a final, written report and deliver a final presentation based on the work completed in their internship.

M.S. in Marine Ecosystems and Society
Overview
Students enrolled in the Marine Ecosystems and Society (MES) program work at the intersection of science and society, committed to assessing, managing, and conserving marine resources through innovation and research. Although course selections are tailored to match individual research and career objectives, our graduates acquire knowledge and expertise critical to ensuring the sustainability of natural resources.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)
Getting Started
All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phy-assistships/). Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines
RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements
Online Application Form and Upload Supporting Documents
Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html (https://www.applyweb.com/miamigrd/).
• The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
• Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
• Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
• Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
• Non-refundable application fee ($85).

**Official Transcripts of All College and Graduate Level Work**

**US APPLICANTS**
While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

**INTERNATIONAL APPLICANTS**
Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

**Type of Evaluation Required**
- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**
- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- **Evaluation Fee** - Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Official GRE Score Report**
- An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

**Official TOEFL or IELTS Score Report (International Applicants Only)**
- International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

**Additional Supplemental Documents**
- **Ph.D. Applicants with a Prior Master’s Degree**
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu. (gso@rsmas.miami.edu)
- **Financial Documents**
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

1. Minimum of 24 course credits and 6 thesis credits.
   • All M.S. students are required to complete at least 12 course credits in MES.
   • A formal request for an exception to this rule can be submitted in writing to the Committee Chair, and any/all exceptions will be made at the discretion of the MES Academic Committee.

2. Course enrollment and scheduling is defined by the student and their Chair.
   • Students are affiliated with one or more of the MES tracks, and will be expected to adhere to all relevant academic requirements.

3. Students are expected to attend all MES student seminars.

4. All MES students are expected to compose a full proposal, including a thorough literature review, clearly outlined objectives, a summary of the significance of their proposed project (including broader impacts, if relevant), a detailed research plan, and a budget.
   • A proposal template will be provided, and all M.S. students are required to attend a proposal writing seminar during their second semester in residence.
   • Following the written proposal vetting process by the committee, students are required to formally defend their proposal. The purpose of the proposal defense is to ensure that each student possesses the requisite knowledge and expertise to successfully execute the proposed research project, as well as facilitate an open discussion regarding the stated objectives and experimental approach.
   • Students must submit and defend their proposal before the start of their fourth semester in residence.

Mission

The Department of Marine Ecosystems and Society (MES) fosters innovative, collaborative and multidisciplinary research and education centered on the conservation and sustainability of marine ecosystems and the services they provide to society.

Goals

Students acquire knowledge and expertise critical to ensuring the sustainability of natural resources. Tailored to their career objectives, students develop expertise in quantitative and qualitative disciplines for integrating the human and natural dimensions of environmental resources and understanding the implications of policy and regulatory frameworks.

Student Learning Outcomes

• Students will demonstrate an advanced understanding of a range of marine related disciplines, specifically relevant to their research (proposed and executed).
Ph.D. in Marine Ecosystems and Society

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phd-assistanships/). Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
- Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender's email addresses for the RSMAS recommendation letter form to be sent to them.
- Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required

- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.
Where to Submit Documents for Evaluation

- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- **Evaluation Fee** - Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report

- An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)

- International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents

- **Ph.D. Applicants with a Prior Master’s Degree**
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu. (gso@rsmas.miami.edu)

- **Financial Documents**
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

**Total Credit Hours**: 60

1. Minimum of 27 course credits and 12 dissertation credits.
   - 6 course credits must be taken at the 700-level.

2. Course enrollment and scheduling is defined by the student and their Chair.
   - Students are affiliated with one or more of the MES tracks, and will be expected to adhere to all relevant academic requirements.

3. MES Ph.D. students must take a comprehensive exam at the end of their second semester in residence.
   - The exam format and content is defined by the Committee Chair and members. The exam is graded as pass/fail.
   - If a student fails the exam, the option to pursue remediation occurs at the sole discretion of the Committee and the Program faculty. A failed Comprehensive Exam with no endorsement to retake the exam will result in immediate dismissal from the MES graduate program.

4. At the end of the second year in residence, all Ph.D. students must take a written qualifying exam, which emphasizes subject matter critical to the execution of the proposed dissertation research. The purpose of the qualifying examination is to demonstrate that MES doctoral students possesses the requisite knowledge and expertise to be successful. The topic areas are established and agreed upon by the student, Chair, and the dissertation Committee at the proposal defense.
   - The Committee is encouraged to provide direction and readings for study, as well as establish a clear format for the exam. It is the Chair's responsibility to host the exam and organize and distribute grades (pass/fail) in a timely manner. Students must pass the qualifying exam in order to be admitted to candidacy.
   - In the event of a failure, a student may be reexamined once upon the recommendation of the Committee, in consultation with the MES Academic Committee. If approved, the reexamination must occur before the end of the subsequent semester.
   - A supplemental oral qualifying examination may be required by the student's Committee but cannot serve as a substitute for the written examination, which is a Graduate School requirement.

5. Students are required to attend all MES student seminars.
   - MES Ph.D. students must host one seminar during their fourth semester at RSMAS and every year thereafter, with the exception of the semester in which they defend their dissertation.

6. All MES students are expected to compose a full proposal, including a thorough literature review, clearly outlined objectives, a summary of the significance of their proposed project (including broader impacts, if relevant), a detailed research plan, and a budget. Following the written proposal vetting process by the committee, students are required to formally defend their proposal. The purpose of the proposal defense is to certify the readiness of the student to conduct dissertation research, as well as facilitate an open discussion regarding the objectives of the dissertation and the relevant experimental approach.
   - The dissertation proposal is the foundation for the qualifying exam, and both must be completed no later than the end of the second year in residence.

7. Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
   - The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
   - A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
   - Specific requirements for TAs are outlined in the RSMAS Student Handbook.

**Mission**

The goal of the Marine Ecosystems and Society department is to educate, inspire, and train students to respond to the complex challenges associated with human utilization of and dependency upon vulnerable marine ecosystems. Our goal is to help our students better understand the emerging role they can play in shaping and ensuring the sustainability of marine resources, including strategic management efforts coupled with the highest standards of resource governance. Students will develop an interdisciplinary perspective through exposure to a wide breadth of intrinsically linked disciplines, including but not limited to fisheries ecosystem management, resource economics, mariculture, habitat restoration, climate change, anthropology, and social science. This facilitates their development as future leaders of the institutions and organizations charged with the responsibility of defining, utilizing, and conserving the marine environment and its resources.

**Goals**

To help our students better understand the emerging role they can play in shaping and ensuring the sustainability of marine resources, including strategic management efforts coupled with the highest standards of resource governance.
Student Learning Outcomes

- Students will demonstrate an advanced understanding of a range of marine related disciplines, specifically relevant to their research (proposed and executed).
- Students will demonstrate critical thinking skills through the development and execution of an original research plan, including the application of appropriate methodologies.
- Students will demonstrate the ability to communicate ideas effectively and professionally, both in writing and orally.

Marine Geosciences

https://www.graduate.rsmas.miami.edu/graduate-programs/marine-geosciences/index.html

Dept. Code: MGS

The Marine Geosciences (MGS) graduate program is focused on studying the geology, geophysics, and geochemistry of the earth system, beneath, within, and above the oceans.

Students work closely with faculty at the forefront of research on marine sedimentary systems, earthquakes, volcanoes, plate tectonics, and paleoclimate. MGS faculty and students also emphasize interdisciplinary study where geological phenomena interact with or are influenced by processes generally studied in other disciplines, such as ocean currents, climate, and biological evolution.

MGS research uses pioneering remote sensing techniques to assess the earth's crustal movement and sedimentation in coastal zones. MGS degree programs are at the forefront of understanding carbonate depositional systems, stromatolites, reefs and deep sea sediments to learn more about past climate change by studying the interaction between biological and geological processes. Ocean observing systems, such as hydrological observatories, play prominent roles in research efforts as well.

Degree Programs

- Post-Bachelor's Certificate (p. 2423)
  - Offered for working professionals who seek specialization in Applied Carbonate Geology.
  - Requires 16 course credit hours for successful completion.
- Master of Science (M.S.)
  - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
  - Interdisciplinary studies with expertise in physics, chemistry, mathematics, and/or biology are encouraged.
- Doctor of Philosophy (Ph.D.) (p. 2423)
  - Requires 60 credit hours, including a minimum of 30 course credit hours and a minimum of 12 research credit hours.
  - Interdisciplinary studies with expertise in physics, chemistry, mathematics, and/or biology are encouraged.

Post-Bachelor's Certificate Program

The goal of the certificate program is to provide first-rate continuing education to professionals or geology students who want to become experts in carbonate geology. To reach this goal courses are offered in carbonate sedimentology, seismic stratigraphy, petrophysics, and geochemistry for an advanced knowledge and understanding in carbonate systems. A successful completion of the program will require 16 course credits to be taken. There are ten electable 2-credit or 3-credit courses in the program. Participants will not write a thesis but the courses are structured in a way that classroom knowledge is directly used in subsequent laboratory classes and projects.

- Certificate in Applied Carbonate Geology (https://marine-geosciences.rsmas.miami.edu/academics/certificate-program/)

Master of Science (M.S.) Program

- M.S. in Marine Geosciences (MGS) (p. 2430)

Doctor of Philosophy (Ph.D.) Program

- Ph.D. in Marine Geosciences (MGS) (p. 2432)
**MGS 601. Oceanography I (Geological). 2 Credit Hours.**
The first section of the core course curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography II - Physical (MPO 502), Oceanography III - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MGG majors only.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**MGS 611. Earth Surface Processes. 3 Credit Hours.**
An introduction into the sedimentologic, geomorphic, biotic, and hydrologic processes on the Earth surface from the terrestrial to the marine environment and their resultant sedimentary product with the goal to be able to read the rock record and make interpretation on the depositional processes in each environment.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**MGS 613. Introductory Geochemistry. 3 Credit Hours.**
Fundamentals of atomic structure and quantum mechanics applied to Chemistry. Topics include origin and distribution of the elements, chemical bonding and substitution, basic thermodynamics of solids, liquids, and gases. Applications of these concepts to such geochemical processes as magmatic differentiation, rock-water interactions, low temperature aqueous geochemistry, and the geochemical cycling of the elements is also included.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**MGS 614. Geophysics. 3 Credit Hours.**
Course topics include seismology, gravity, heat flow, thermal history, geomagnetism, plate tectonics, and their importance in understanding the Earth's crust, mantle, and core.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**MGS 619. Field Studies of Geobiology in Tropical Marine Environments. 3 Credit Hours.**
Geobiology is an interdisciplinary field that explores interactions between the physical Earth and the biosphere. Biological processes are, for example, critical to the formation of carbonate sediments and sedimentary structures in shallow tropical marine environments. This class will conduct field studies to investigate geobiological processes involved in carbonate sedimentation, maximizing the learning process through a combination of field work, lectures and independent research.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring & Summer.

**MGS 625. Applied Environmental Geophysics. 3 Credit Hours.**
Application of subsurface geophysical tools to environmental problems. Course includes the theory and application of shallow refraction and reflection seismology, conducting field experiments and processing both marine and land seismic data, other marine survey techniques such as side-scan sonar surveying, potential field techniques (gravity, magnetics, EM), ground penetrating radar, and borehole geophysics.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**MGS 634. Hydrological Hazards. 3 Credit Hours.**
This course will explore the causes, effects, and societal response to hydrological hazard.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**MGS 635. Geological Hazards. 3 Credit Hours.**
This course will explore the hazards related to the dynamic solid Earth. We will look at the physics, causes and effects of earthquakes, volcanic eruptions and tsunamis, their societal impacts, and on measures available to reduce the disaster risks.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.
MGS 641. Field Evaluation of Fossil Platforms, Margins, and Basins. 2 Credit Hours.
Field investigation of classic rock sequences formed within ancient platform, margin, and basin environments. The use of ancient exposures as a guide to the interpretation of modern marine environments.
Components: FLD.
Grading: GRD.
Typically Offered: Spring.

MGS 642. Field Evaluation of Fossil Platforms, Margins, and Basins II. 2 Credit Hours.
The course is a field investigation of rock sequences of ancient platforms margins and basins. Students will learn how to read the rock record in an outcrop, including recognition of lithology, sedimentary structures, tectonic units, and stratigraphic relationships; how to prepare a field campaign, geological guidebook, and how to record the field observations for scientific analysis; and illustrate how ancient strata can be a source for deciphering depositional, tectonic and environmental processes.
Components: FLD.
Grading: GRD.
Typically Offered: Spring.

MGS 650. Mathematical Methods for Geoscientists. 3 Credit Hours.
Background mathematics needed to solve problems in the geosciences. Applications in tectonics, geodynamics, structural geology, seismology, and hydrology. Topics include linear inverse problems, least squares, linear algebra, matrix theory, vectors, dimensional analysis, probability and scientific inference, continuum mechanics, transform and numerical methods to solve differential, and partial differential equations.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 670. Continental Tectonics. 3 Credit Hours.
Reviews major research techniques used in the study of the structure and evolution of continental crust and topical discoveries, with an emphasis on the Neogene to Recent time. The course begins with brief introductions to the fields of structural geology, seismology, and geodesy as they relate to continental tectonics. New research in areas such as the rheology of the lithosphere, plate motion models, deformation of continental crust in plate boundary zones, oblique subduction, and earthquake hazard assessment are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 679. Plate Tectonics. 3 Credit Hours.
The theory of plate tectonics, sea floor spreading, and continental drift. Mathematical description of plate motions, finite and instantaneous rotation poles, consequences of plate tectonics, mountain building, rifting, erosion, and recycling of continental materials are also discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MGS 680. Geological and Environmental Remote Sensing. 3 Credit Hours.
This one semester course will cover major remote sensing techniques used in the geological and environmental sciences. The course will begin with an introduction to the basic physics of remote sensing, followed by a review of major remote sensing techniques used in aircraft and satellite platforms, including IR and near IR, optical and microwave systems. We will then discuss specific terrestrial and coastal applications using a case history approach, including geologic, soil and biomass mapping, environmental monitoring, and natural hazard assessment. The course is aimed at graduate students and senior undergraduates with some background in math and physics. Grades are based on problems sets (a minimum of three), a mid-term test, and a report or lab exercise involving image processing, due at the end of the semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 681. Petroleum Geology. 4 Credit Hours.
Students will learn the basics of hydrocarbon generation, migration and entrapment using a variety of tools and real subsurface datasets. Participants should be comfortable with sedimentary geology, stratigraphy, structural geology. Some basic geophysics is helpful but not necessary. At the end of the course, students will be able to use ARCGIS and other software tools to build risk maps of hydrocarbon prospectively, assess exploration potential of an area and understand the basics of reserve estimation, prospect level risk assessment and ways to estimate yet-to-find volumes for a basin using a variety of statistical as well as geological techniques. The course stresses an understanding of practical applications of petroleum geochemistry, source rock and fluids characterization, burial history and oil and gas show evaluation to predict new accumulations and appraise discoveries. Basic principles of rock property analysis, coupled with an understanding of subsurface pressures, seals and ways to recognize hydrocarbons on electric logs are also covered. Lastly, seismic stratigraphy and plate tectonics are touched upon. A large for number of subsurface datasets are used and the opportunity exists to learn additional software packages for those interested. Many subsurface problems will involve small teams of students working together to make final presentations simulating real work-place discussions and processes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MGS 682. Introduction to Seismology. 3 Credit Hours.
This class provides an approachable and concise introduction to seismic theory.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 683. Scanning Electron Microscopy. 2 Credit Hours.
Theory and practical application of the SEM and the electron probe to research problems. Lectures and laboratory with emphasis on independent operation of the SEM, special preparation techniques, and interpretation of results are included. Course is designed to provide students with a broad and thorough background in scanning electron microscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 684. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 685. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 686. Special Topics. 1-3 Credit Hours.
Lectures, research projects or directed readings in special topics related to Marine Geology and Geophysics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 687. Facies Succession of Great Bahama Bank. 2 Credit Hours.
To illustrate the vertical and horizontal variability of facies and rock properties in carbonate platforms and to illustrate the processes that create these variabilities.
Bachelor degree Or equivalent.
Components: FLD.
Grading: GRD.
Typically Offered: Summer.

MGS 688. Heterogeneity of a Windward Margin. 2 Credit Hours.
The seminars will illustrate the processes, facies relationships and dimensions along a high-energy platform margin with a special emphasis on the impact of sea-level fluctuations on the margin system.
Bachelor degree Or equivalent.
Components: FLD.
Grading: GRD.
Typically Offered: Summer.

MGS 691. Research Methods in Electron Microscopy. 2 Credit Hours.
This course will utilize the theory/methods students acquire in the introduction to EM course MGS 583/683 and focus on student research projects utilizing Scanning Electron Microscopy (SEM), Energy Dispersive Spectroscopy (EDS) and Backscattered Electron Imaging (BSE).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 701. Seminar in Marine Geosciences. 1 Credit Hour.
Oral presentation and discussion of research and special topics by students, faculty, and visiting scientists. Students receiving credit are required to present a seminar.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
MGS 720. Satellite Radar Interferometry in the Earth Sciences. 3 Credit Hours.
Spaceborne interferometric Synthetic Aperture Radar is an important technique for various disciplines in the Earth Sciences, such as geodesy, glaciology and hydrology. This course reviews the principles of radar, synthetic aperture radar of interferometric and differential radar interferometric techniques.

Components: LEC.
Grading: GRD.

MGS 721. Petroleum Geology of Carbonates. 2 Credit Hours.
The main purpose of the course is to understand the petroleum system in carbonates and learn to evaluate their hydrocarbon potential and reduce risk in exploration. The course would be taught with a number of hands-on exercises and workshops using real data.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 722. Geophysical Inverse Theory. 3 Credit Hours.
This course covers the principles of geophysical inverse theory as applies to problems in the Earth Sciences. Inverse theory is a set of mathematical techniques used to obtain inferences about the Earth from physical measurements. The focus of this class will be on formulating and solving inverse problems, and understanding the non-uniqueness and resolution associated with inversions. The emphasis will be on geodetic data (obtained from GPS and InSAR measurements).

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 723. Geodynamics. 3 Credit Hours.
This course is a quantitative discussion of the physical properties of earth materials and dynamic processes in the solid Earth.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 724. Seismic Interpretation of Carbonate Systems. 2 Credit Hours.
This course provides the students with the principles and workflow of interpretation of subsurface seismic data in carbonates.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 725. Petrophysics of Carbonates. 2 Credit Hours.
This course will provide an overview of carbonate rock physics principles and equations and introduce the modern geophysical tools that are used to measure these properties.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 726. Carbonate Diagenesis and Petrography. 2 Credit Hours.
This course will integrate thin section and hand sample description with geochemical principals and data. Students will examine rocks using petrographic and SEM methods and then analyze the same samples to establish paragenetic pathways. At the end of the class, students should be able to confidently use a petrographic microscope, apply staining methods for mineral identification, and use cathodoluminescence.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 727. Analysis of Carbonate Cores and Logs. 2 Credit Hours.
The recognition of ancient carbonate depositional systems in the subsurface as recorded in core borings, thin sections, and geophysical logs. The examination and analysis of a diverse suite of carbonate facies types from an extensive University core archive. This laboratory-based course will examine depositional and diagenetic features in core borings, petrographic thin sections, and downhole logs to interpret the history and extrinsic controls of deposition.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 728. Advanced Seismology. 3 Credit Hours.
This is an advanced level course designed to involve students into seismological research.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MGS 729. Crustal Deformation. 3 Credit Hours.
This course addresses how the Earth’s crust deforms in response to stressing by tectonic and magmatic forces. The course reviews the fundamentals of continuum mechanics and of rock mechanics, elastic, visco-elastic and plastic deformation, the development of rock fractures and fluid flow through the crust.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 750. Stable Isotopes in Biogeochemical Processes. 3 Credit Hours.
Theory of stable isotope fractionation, methods of measurement, and application of results to geological, biological, and oceanographic processes. Hands-on experience in the stable isotope laboratory is provided utilizing a range of techniques. A project chosen either by the student or instructor is required. All students who wish to use the stable isotope facility should take this course. Lecture, 2 hours; laboratory, 3 hours. Prerequisite: Permission of instructor.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 761. Sedimentary Petrology. 3 Credit Hours.
Composition, texture, fabric, and structures of sediments and sedimentary rocks. The occurrence and properties of the major clans of detrital and chemical sediments from a petrologic and historical perspective is discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MGS 762. Comparative Sedimentology. 3 Credit Hours.
The use of modern sediments to decipher processes of origin, accumulation, and early diagenesis as the basis for interpreting environments and architecture of ancient deposits in outcrop and in the subsurface. Evaluation of the sedimentary record of climate and sea level changes is included as well as the application of facies models for interpretation of seismic and log data.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 766. Diagenesis of Carbonate Sediments. 3 Credit Hours.
Application of geochemical, mineralogical, and petrological principles to the behavior of carbonate minerals in sediments. Physical and chemical conditions responsible for cementation, dolomitization, and aragonite-calcite phase transitions are emphasized. Types of depositional and diagenetic information which may be preserved in carbonate sediments. Laboratory studies of sediments are included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 772. Basin Analysis and Seismic Interpretation. 3 Credit Hours.
The processes of basin formation and filling. The principles of seismic facies analysis, seismic sequence stratigraphy, and their applications in basin analysis, groundwater management, and exploration for hydrocarbons are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MGS 776. Paleoclimatology. 3 Credit Hours.
Climatic variables and their effects on geological and biological processes. The development of the paleoclimatic record, modeling of present climate, and the extrapolation to past and future climates are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MGS 777. Physical Volcanology. 3 Credit Hours.
Volcanology is the study of volcanoes of the Earth and planets. On Earth, volcanoes occur on land and under the sea. Eruptions vary in size, duration, and frequency, and in the composition of eruptive rocks and volatiles. Proximity to centers of population makes some of them extremely dangerous. This course covers the principles of physical volcanology, including introductory petrology, mineralogy, geology, magma physics, the fluid dynamics of magmas, and volcanic hazards. Course logistics: Lectures supplemented by homework. Homework will be designed to illustrate physical processes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 781. Advanced Studies. 1-4 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 782. Advanced Studies. 1-4 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 783. Advanced Studies. 1-4 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MGS 784. Advanced Studies. 1-3 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 785. Advanced Studies. 1-3 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 786. Advanced Studies. 1-3 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 787. Advanced Studies. 1-3 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 788. Advanced Studies. 1-3 Credit Hours.
Special study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MGS 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MGS 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MGG 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Marine Geosciences

Admission Requirements
The undergraduate student wishing to prepare for graduate work in the marine geosciences must be well trained in the basic sciences. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550. According to the special interests of the individual, the undergraduate major and minor should be in geology, physics, chemistry, and/or mathematics.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started
All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor's degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines
RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements
Online Application Form and Upload Supporting Documents
Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.

• The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
• Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
• Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
• Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
• Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work
US APPLICANTS
While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS
Submit the following educational documents to an approved international credentialing evaluation service for evaluation:
• Official original diplomas and certificates in the original language
• Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
• NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required
• The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation
• Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee.
• Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report
• An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
• It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)
• International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ using institution code 4862. There is no department code for either score submission.
• An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
• A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents
• Ph.D. Applicants with a Prior Master's Degree
  • Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.
• Financial Documents
  • Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

All MGS students must complete two of the following courses:
Ph.D. in Marine Geosciences

The undergraduate student wishing to prepare for graduate work in the marine geosciences must be well trained in the basic sciences. Applicants must take the GRE, and those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at
least 550. According to the special interests of the individual, the undergraduate major and minor should be in geology, physics, chemistry, and/or mathematics.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor's degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
- Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
- Non-refundable application fee ($85).

Total Credit Hours 60

1. Minimum of 30 course credits and 12 dissertation credits.

2. • The intent of these course requirements is to ensure preparation across the range of subfields within MGS. These requirements may be waived by permission of the MGS Program Academic Committee.
   • If a student does not follow the above requirements and performs poorly in one of these subfields on the comprehensive exam, it may trigger a requirement to enroll in the respective course as a condition for further advancement in the MGS program.

3. • All students who enroll in the MGS academic program starting in fall semester are required to take a comprehensive examination by the end of their second semester. Students who enroll in spring semester may be advised to take the comprehensive exam at the end of the following spring semester.
   • The purpose of the comprehensive examination is to evaluate the student’s understanding of fundamental principles, reasoning skills, and to determine if any basic deficiencies are present in the student’s background after two semesters of classes.
   • The examination will consist of a written part, which usually lasts about 6-8 hours, and an oral part, which lasts about 1 hour. The results of the written portion of the exam and performance of the oral exam determine the grade given by the examining board.
   • For a Ph.D. student, a grade of either PASS or FAIL is given.
     • A PASS indicates that the student may proceed with additional course work, research proposal development, and preparation to take the qualifying examination.
     • Failure of the exam will require the student to retake the exam at a time to be determined by the Exam Committee and the MGS Academic Committee. This retake is usually scheduled no later than the end of the following semester. If failure occurs on the second attempt, the student can be dismissed from the MGS program.

4. • The qualifying examination should be taken by the end of the third year. The scheduling of the exam should be discussed with the Committee Chairperson and Dissertation Committee. A completed dissertation proposal demonstrating the ability to formulate and test a hypothesis must be submitted at least two weeks before the exam.
   • The purpose of the exam is to determine knowledge of (a) general principles of geology, geochemistry, and geophysics, (b) knowledge of the student’s individual specialty, and (c) peripheral and supporting disciplines.
   • The Dissertation Committee administers a written examination on the subjects outlined above. An oral examination may follow the written exam if necessary to clarify answers, as judged by the Dissertation Committee.
   • Upon satisfactory completion of the qualifying exam, the student enters into candidacy for the Ph.D., provided all other requirements have been met.
   • If the qualifying exam is failed, the student may, at the discretion of the Dissertation Committee, be allowed one opportunity to be re-examined, but in this case no later than the end of the following semester.
   • No “partial passes” of the qualifying exam are allowed.

5. • All MGS students are required to register for MGS 701 at least once and attend all meetings of the course throughout their tenure in the MGS program.
   • Students are required to give presentations and actively participate in the course.

6. • All MGS students are expected to attend the department weekly seminar Geotopics.
   • The diverse lecture series presents recent and ongoing research by RSMAS faculty and visiting scientists. These presentations help provide a broad, well-rounded view of research topics in the earth sciences.

7. • Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
   • The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
   • A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
   • Specific requirements for TAs are outlined in the RSMAS Student Handbook.

**Mission**

The mission of the MGS Ph.D. program is to educate and train students to become the next generation of scientists conducting research in and teaching marine geology and geophysics, geochemistry, and environmental geosciences. The program emphasizes coursework during the first year, then development of and independent conduct of original research that leads to preparation of peer-reviewed publications and a publicly defended Ph.D. dissertation.

**Goals**

• To educate and train students to become the next generation of scientists conducting research in and teaching marine geology and geophysics, geochemistry, and environmental geosciences.
Student Learning Outcomes

- Students in the MGS Ph.D. program will demonstrate a broad comprehension of marine and Earth science, and then use this knowledge to develop an independent scientific research topic of sufficient quality and originality to lead to a Ph.D. dissertation.
- Each student will prepare an original Ph.D. dissertation that demonstrates his/her ability to critically evaluate scientific literature, comprehend previous knowledge on a topic, formulate testable hypotheses, and independently use available data and tools to produce a significant original contribution on the topic.
- Students will demonstrate good oral communication skills, and be able to effectively communicate and defend their scientific findings to a peer audience.

Meteorology and Physical Oceanography

https://www.graduate.rsmas.miami.edu/graduate-programs/meteorology-and-physical-oceanography/index.html

Dept. Code: MPO

The Meteorology and Physical Oceanography (MPO) graduate program was founded on the premise that oceanic and atmospheric dynamics are governed by a set of similar physical principles, and that much insight can be gained by studying their dynamics from a common perspective.

The MPO program requires students to develop expertise in both systems, and prepares students to conduct leading-edge research using a complementary set of theoretical, observational, and modeling approaches.

The MPO curriculum forms a strong foundation for research on a broad spectrum of topics that include air-sea interaction, the global thermohaline circulation, tropical cyclones, El Niño, the Madden-Julian Oscillations, and the evolution of the Earth’s climate.

Degree Programs

- Master of Science (M.S.) (p. 2437)
  - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.)
  - Requires 60 credit hours, including a minimum of 30 course credit hours and a minimum of 12 research credit hours.

Research Areas

The MPO program has a strong foundation in several areas in atmospheric and ocean sciences, including those presented below. Research is conducted using a variety of techniques from direct observation to theoretical and numerical modeling. Students come from a diverse range of educational backgrounds, including marine science, meteorology, physics, mathematics, and engineering.

Climate Variability and Change

Research covers a wide range of topics, both global and regional. We study climate variations on time scales from sub-seasonal to interannual to decadal, as well as ancient (paleo) climates and future climate changes. Efforts include analysis of satellite data, field observations and global data products, and a large focus on numerical climate modeling.

Large-Scale Ocean Circulation

Research covers a variety of topics, highlighting the ocean’s role in climate, including dynamics and variability of boundary currents, meridional overturning and tropical circulations, as well interaction between large-scale, mesoscale and submesoscale circulations. Particular strengths include experimental oceanography, numerical modeling with a variety of comprehensive and conceptual models, data analysis and assimilation, and theoretical studies.

Tropical Dynamics

The tropics have global impacts, from weather effects and hurricanes to El Niño and other climate variations. Research involves the myriad interactions of water vapor and clouds with air and wind and the underlying tropical oceans and landscapes.

Hurricanes

RSMAS/MPO is ideally situated for the study of hurricanes through its location in Miami and its proximity to the NOAA Hurricane Research Division and National Hurricane Center. The research includes high-resolution coupled atmosphere-wave-ocean modeling, hurricane dynamics, and novel adaptive observing and data assimilation methods.

Regional and Coastal Oceanography

Studies focus on key processes in coastal and shelf areas, with special interest in regional seas around South Florida, the Gulf of Mexico and the Caribbean. Particular projects address events following the Deepwater Horizon oil spill, air-sea interaction associated with hurricanes, shelf
dynamics, mixing, submesoscale variability, biological-physical interactions in ecosystems, coral reef studies and the Everglades Restoration. The research involves high-resolution numerical modeling, experimental studies and data assimilation.

Clouds, Aerosol, Precipitation, and Radiation Interactions (CAPRI)
The cloud microphysical processes important to the global energy balance occur at spatial and time scales of seconds and meters. MPO studies such processes with aircraft and surface-based remote sensing, in situ field measurements, and large-eddy simulations, and reconciles them with analyses done at the larger scales of satellites and regional climate models.

Satellite Remote Sensing
RSMAS hosts a real-time satellite reception and analysis facility. MPO is involved with retrieval algorithm development, validation and analysis of sea surface temperature, ocean color, sea surface topography and surface winds. These are analyzed in the context of climate research.

Master of Science (M.S.) Program
• M.S. in Meteorology and Physical Oceanography (MPO) (p. 2443)

Doctor of Philosophy (Ph.D.) Program
• Ph.D. in Meteorology and Physical Oceanography (MPO) (p. 2446)

MPO 602. Oceanography II (Physical). 2 Credit Hours.
The second section of the course core curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography I - Geological (MGG 501), Oceanography I II - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MPO majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 603. Physical Oceanography. 3 Credit Hours.
Introduction to properties of seawater, instruments and methods, heat budget, general ocean circulation, formation of water masses, dynamics of circulation, regional oceanography, waves, tides, and sea level. A mathematical and problem solving course for majors in MPO.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 611. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 624. Applied Data Analysis. 3 Credit Hours.
The course is intended to jump-start students in strategies for fruitful computer interaction practices for careers in MPO areas of science. Academic topics include key concepts in probability & statistics, issues of graphical evidence and inference, linear models and regression, spectral analysis, and matrix decomposition. Practical topics include hands-on exercises in data analysis and the sharing of code+results and interpretation. Students do projects on data from their research or interests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 632. Broadcast Meteorology. 3 Credit Hours.
Students will learn the proper techniques involved in preparing and presenting a complete and professional weathercast with a heavy emphasis on communication skills, computer graphics, and on-camera delivery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 633. Atmospheric Boundary Layer. 3 Credit Hours.
The boundary layer is the lowest 1-2 km of the atmosphere, where we live. It is necessary to understand boundary layer processes to pursue research in clouds and radiation, weather and climate, air/sea/land interaction, and chemistry of the lower atmosphere. In this course, students will learn the basic physical concepts, from observational, theoretical and modeling perspectives.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MPO 636. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 637. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer term effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 642. Physics of Remote Sensing I - Passive Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on optical and passive systems. Topics include orbital dynamics, sampling issues, fundamental laws of electromagnetic waves, passive remote sensing in the visible, infrared and microwave parts of the electromagnetic spectrum, a survey of satellite sensors and summary of the derived geophysical variables.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 643. Physics of Remote Sensing II - Active Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on active and radar systems. Topics include electromagnetic theory, radar equation, antenna theory and pulse compression, radar scattering physics; sea surface processes relevant to radar imaging, scatterometry, synthetic aperture radar (SAR), altimetry, HF Doppler radar, marine radar, satellite orbits, brief overview of passive remote sensing techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 651. Introduction to Atmospheric Dynamics. 3 Credit Hours.
This course surveys the dynamics of atmospheric flow and the physically-grounded description and depiction of weather phenomena. It is intended to serve as core preparation for incoming PhD students whose research will be dynamical, while also serving as an accessible overview for students in other subdisciplines. For these reasons, it stresses phenomena and the essentials of our physical discourses about them (emphasizing useful approximations and lucid treatments), with enough exposure to the underlying full-complexity fundamentals to facilitate more advanced study in the future.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 652. Introduction to Atmospheric Physics. 3 Credit Hours.
The goal of this class is to develop an understanding of the fundamental physical processes governing cloud behavior and atmospheric radiative transfer, including atmospheric thermodynamics. The class will focus on processes with temporal scales of one day or less, and spatial scales of 1km or less, and will recognize the links to weather and climate, or through the student presentations. Students will learn about: cloud formation, lifetime, and dissipation, and how clouds interact with the aerosol, therodynamic, and dynamic environments; about how clouds and clear skies interact with sunlight and infrared. This course is split into two sections: the first half will cover thermodynamics and cloud physics, and the second half will cover atmospheric radiation. Guest lectures by advanced graduate students and postdoctoral research associates will introduce students to current research areas.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 653. Climate Change. 3 Credit Hours.
Overview of the physical processes which regulate the earth's climate and response to forcing.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MPO 654. Climate Variability. 3 Credit Hours.
This class will cover the physical mechanisms that govern the earth’s climate and climate variability. It is intended for beginning graduate students in marine and atmospheric science, and upper-level undergraduate physical science students. Must have 2 years of both college physics and calculus, and some undergraduate coursework in atmospheric science is preferred.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 662. Advanced Weather Forecasting. 3 Credit Hours.
Students will learn the skills needed in researching and preparing a professional weather forecast. There is a plethora of forecast resources available online. Students will learn about using these forecast resources and share resources of their own. Specifically, we will cover topics such as the basics of atmospheric meteorology, large and small scale weather forecasting, operational weather forecasting, tropical weather, severe weather, nor’easters, lake effect snow, oscillations and various other weather phenomena. During the course of the semester a couple of Guest speakers in various parts of the field will visit to discuss relevant topics.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 663. Mesoscale Meteorology and Severe Storms. 3 Credit Hours.
Course topics include the structure and dynamics of clouds, thunderstorms, and mesoscale convective systems, radar and satellite observations of clouds and precipitation, severe storm forecasting, mesoscale disturbances, frontal and orographic clouds, and precipitation.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 681. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 682. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 683. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 684. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 685. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics related to Meteorology and Physical Oceanography.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 686. Applied Remote Sensing. 3 Credit Hours.
Provides a detailed overview of applications of passive remote sensing using visible, infrared and microwave radiometers. Orbit and satellite characteristics are discussed. Hands-on data processing and analysis using readily accessible image processing software is included. Access to satellite data archives is explained. Students are also expected to attend Physics of Remote Sensing I - Passive Systems, and Physics of Remote Sensing II - Active Systems, which focus on the theory of remote sensing. The companion course, Applied Radar Remote Sensing, is offered in the spring semesters.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MPO 687. Applied Radar Remote Sensing. 3 Credit Hours.
This course complements Physics of Remote Sensing II with additional lectures and exercises tailored specifically to the needs of MPS students. Topics covered: Active vs. passive remote sensing, satellite station operations, how to work with satellite radar images, imaging geometry and sampling characteristics, introduction to IDL, hands-on SAR data analysis examples, hands-on marine radar data analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 701. Seminars in Meteorology and Physical Oceanography. 1 Credit Hour.
Oral presentation of research and special topics by students, faculty, and visiting scientists.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

MPO 711. Geophysical Fluid Dynamics II. 3 Credit Hours.
The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 712. Large Scale Ocean Circulation: Models and Observations. 3 Credit Hours.
Course topics include theoretical models of the oceanic current systems, wind-driven and thermohaline circulation, effects of bottom topography, and lateral bounding.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 713. Predictability. 3 Credit Hours.
Introduction to concepts of predictability and error growth, beginning from the seminal papers of Ed Lorenz, and expanding into state estimation, data assimilation, forecast sensitivity and ensemble prediction.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 716. Lagrangian Fluid Dynamics and Predictability. 3 Credit Hours.
The ash cloud produced by the eruption of Eyjafjallajokull in Iceland, the oil spill produced by the explosion of the Deepwater Horizon drilling rig in the Gulf of Mexico, and release of debris and radioactive contamination into the Pacific Ocean after the Fukushima nuclear reactor was hit by the Tohoku tsunami, are examples of events that have caused considerable impact to the environment. They all represent problems in Lagrangian ocean or atmospheric dynamics in which predicting where the material released into the environment will be transported by the ocean currents or winds is critical. A common approach to predict the outcome of an event like the above is to run an ocean or atmosphere circulation model simulations and then integrate the resulting velocity fields from a given release location to predict pollutant trajectories. An important drawback of such an approach is that the predictions are highly sensitive to small changes in the release time and location. Attempts to cope with the sensitivity to initial conditions include running several different models for the same scenario, but this typically leads to even larger distributions of advected tracers, hiding the key organizing structures of the flow. Improved understanding and forecasting requires novel notions and techniques capable of casting light on why material is transported the way it is by a given flow. The goal of this course is acquaint the student with a series of recent developments originated at the interface of nonlinear dynamics and fluid dynamics that have led to a number of novel such notions and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 721. Waves and Tides I. 3 Credit Hours.
The focus of this course is on the kinematics, dynamics and energetics of wave motions in the ocean and atmosphere from both theoretical and observational perspectives. We examine the internal wave spectrum ranging from the buoyancy frequency to the inertial frequency including the WKBJ scaling of the momentum by the buoyancy frequency. The IW spectrum often contains both the semidiurnal and diurnal tidal frequencies where the former is often referred to as internal tide that are excited along continental margins by barotropic tides. Within the context of normal modes, Kelvin and topographically Rossby waves are also present in this regime known as coastal trapped (also known as continental shelf waves). The course then goes into the equatorial wave guide that supports these motions (except for near-inertial motions). This is followed by the forced wave motions by atmospheric fronts and cyclones where Green's functions are introduced to derive analytical expressions for the 3-D current structure.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
MPO 724. Statistical Modeling of Geophysical Fields. 3 Credit Hours.
An advanced course in statistical modeling, analysis, and assimilation of geophysical data. Emphasis is placed on practical applications, computer software, and new nonstandard techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 731. Air-Sea Interaction. 3 Credit Hours.
Oceanic and atmospheric mixed layers including fluxes of heat, momentum, moisture and salt between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 732. Climate Dynamics. 3 Credit Hours.
Basic understanding of the Earth’s Climate System and its variability on time scales ranging from weeks to millennia. Topics include internal atmospheric variability, coupled ocean-atmosphere interactions, and the theory, observations and modeling of climate change.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 733. Marine Atmospheric Boundary Layer. 3 Credit Hours.
The marine atmospheric boundary layer plays a key role in the two-way interaction between the atmosphere and the ocean. This course will focus on describing and explaining marine atmospheric boundary layer structure and its evolution. This will include an emphasis on the cloud-topped boundary layer (marine stratocumulus) and the trade-wind boundary layer. Thus, in addition to turbulence, the physical processes considered in this treatment of the marine boundary layer will include shallow moist convection and radiation. The course will start with a basic description of the atmospheric boundary layer that will include a review of the relevant dynamics and thermodynamics. More advance topics will be covered in the second half of the course. Although the course will be a series of formal lectures, students will independently research selected topics, prepare a short review paper, and give an oral summary class.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MPO 750. Coastal Ocean Circulation. 3 Credit Hours.
The oceanography of the continental margins are where tides, winds and waves interact on a spectrum of temporal and spatial scales in driving the shelf circulation from the shelf break to the inner shelf. The effects of baroclinicity, topography (and bottom stresses) will be explored in this course. We will highlight fundamental differences between wide versus narrow shelves, and those where boundary currents impact the shelf circulation such as the Loop Current on the west Florida shelf, Florida Current and Gulf Stream along the east coast; and the weaker and broader California Current along the US west coast.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 762. Computer Models in Fluid Dynamics. 3 Credit Hours.
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 765. General Circulation of the Atmosphere. 3 Credit Hours.
Course topics include structure and behavior of planetary scale motions, energy, momentum, and moisture budgets of the general circulation, and models of the general circulation and climatic change.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MPO 767. Spectral and Finite Element Methods in Computational Fluid Dynamics. 3 Credit Hours.
The simulation of fluid flows in geometrically complex domains (like ocean basins) and/or with high fidelity requires the adoption of new discretization techniques that can simultaneously handle the complicated geometry and permit high accuracy solution. The finite element method has traditionally been used to tackle the geometric complexity while spectral methods have been developed to handle high accuracy in simple geometries. Here we present an approach to handle both complexity within a single framework, namely the spectral element method. The course starts by describing the weak formulation common to all finite element methods which, by design, are geometrically flexible. The second part of the course describe how high order polynomial can be implemented within the finite element framework to achieve high accuracy rates.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 768. ENSO Dynamics, Prediction, and Predictability. 3 Credit Hours.
This course will provide students with a comprehensive observational and mechanistic understanding of the El Nino and the Southern Oscillation (ENSO) phenomena and how ENSO impacts the natural variability of the global climate system. Topics will include: Observations and theories of the seasonal and interannual changes in the ocean circulation and temperature, and interactions with the atmosphere; equations of motion and theories of tropical ocean and atmosphere circulation; tropical wave dynamics; large scale air-sea coupling; mechanisms for ENSO: delayed oscillator theory, recharge oscillator theory, slow SST modes; ENSO prediction and predictability; ENSO-monsoon-Indian Ocean interactions; Global climate response to ENSO; decadal ENSO variability; ENSO in a changing climate. This course has a phenomenological focus, which complements current MPO course offerings. In particular, students who have taken dynamic and physical meteorology, ocean general circulation or geophysical fluid dynamics will be exposed to how general theory (e.g., wave dynamics) relates to particular phenomena and current research foci. In addition, student will have the opportunity to design and implement numerical hypothesis testing experiments.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MPO 771. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 772. Vortex Dynamics. 3 Credit Hours.
This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 773. Advanced Studies. 1-4 Credit Hours.
Supervised study in areas of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 774. Advanced Studies. 1-4 Credit Hours.
Supervised study of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 775. Advanced Studies. 1-4 Credit Hours.
Supervised study of special interest to graduate students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MPO 776. Mesoscale Oceanography. 3 Credit Hours.
The course will present a current view of our understanding of ocean mesoscale variability, including its properties in different oceanic regimes, the dynamics governing its origin and development, and its overall role in the oceans and climate. Lectures will present material covering theory, observations (both in situ and satellite), and numerical model results. Students will learn basic concepts on ocean mesoscale processes and perspectives on current research topics from lectures, assignments and research papers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MPO 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MPO 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of MPO 830 may be taken in a regular semester, nor more than 6 in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Meteorology and Physical Oceanography
Admission Requirements
Students wishing to pursue a graduate degree in MPO must have strong quantitative skills and a solid foundation in one of the physical, mathematical or computational sciences. A bachelor's or master's degree in one of the science disciplines - such as physics, mathematics, or engineering - usually provide the requisite background. In addition to good academic training, applicants should bring an unbridled enthusiasm and intense curiosity for the natural world in order to succeed and enjoy their experience at the Rosenstiel School.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)
Getting Started
All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor's degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines
RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements
Online Application Form and Upload Supporting Documents
Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
- Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
- Non-refundable application fee ($85).
Official Transcripts of All College and Graduate Level Work

US APPLICANTS
While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS
Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

- Official original diplomas and certificates in the original language
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
- NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

Type of Evaluation Required
- The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation
- Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report
- An official score of the Graduate Record Examination Test (GRE): [http://www.ets.org/gre](http://www.ets.org/gre) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents
- Ph.D. Applicants with a Prior Master's Degree
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.
- Financial Documents
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Mailing Address:
Graduate Studies Office SLAB 130

University of Miami
4600 Rickenbacker Causeway
Miami, Florida 33149
Telephone: 305.421.4155
Facsimile: 305.421.4771
E-mail: gso@rsmas.miami.edu

Curriculum Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in Handbook or by the Program Director.

All RSMAS courses are listed on the RSMAS website. All courses taken by students should be approved by their advisors. Students are recommended to consult with their advisors and the MPO Program Director regarding their choices of courses. Deviations from the requirements must be approved by the advisor and the MPO Academic Committee.

</table>

1 Minimum of 24 course credits and 6 thesis credits.

2 The remaining 12 course credits can be obtained by taking other graduate courses offered by MPO, RSMAS, or UM.

MPO M.S. candidates are not required to take a class outside MPO.

3 Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).

Grade of Master’s Pass, Pass or High Pass needed to fulfill requirement.

All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the MPO Graduate Program Director and the instructors (or their assignees) of the first year courses taken by the students.

The purpose of this examination is to evaluate students’ understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.

The Comprehensive Examination will consist of an oral part and a written part.

The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions; at least one of the questions from GFD I and II must be answered.

The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.

The Comprehensive Exam grade, together with his/her cumulative grade point average, will determine whether the student is eligible for the DirectPh.D. program.

Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student’s academic career.

High Pass: for students with no identifiable relevant weaknesses.

Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student’s academic career.

Master’s Pass: Students with this result will be required to defend a Master’s thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.

Fail: Students with this result will have an opportunity to re-take the exam once.

4 Attendance to the MPO seminars is required every semester.

MPO M.S. students must give at least one 15-minute presentation each year after the Comprehensive Examination.
**Mission**

The Meteorology and Physical Oceanography (MPO) program prepares students to conduct research in meteorology and physical oceanography. It seeks to advance students' knowledge and understanding of the physical and dynamical processes in the atmosphere and ocean. We prepare our graduates to develop into research leaders in the fields of meteorology and physical oceanography, and thereby contribute to better informing the public and policy makers on how to prepare for hazards and changes in the Earth's atmosphere and oceans.

**Goals**

- To advance students’ knowledge and understanding of the physical and dynamical processes in the atmosphere and ocean.

**Student Learning Outcomes**

- Students will demonstrate knowledge in meteorology and physical oceanography.
- Students will demonstrate their ability to conduct research in meteorology and physical oceanography.
- Students will demonstrate knowledge of the discipline, critical thinking, and application of knowledge and methodology.

**Ph.D. in Meteorology and Physical Oceanography**

**Admission Requirements**

Students wishing to pursue a graduate degree in MPO must have strong quantitative skills and a solid foundation in one of the physical, mathematical or computational sciences. A bachelor's or master's degree in one of the science disciplines - such as physics, mathematics, or engineering - usually provide the requisite background. ¹ • Minimum of 30 course credits and 12 dissertation credits.  
• Minimum 9 course credits should be taken from 700 level courses.  
• The credit transfer and waiver of required courses should be done during the first year of graduate study at RSMAS with approval from the graduate advisor and the MPO Academic Committee.

² • The remaining course credits can be obtained by taking other graduate courses offered by MPO, RSMAS, or UM.  
• MPO Ph.D. students are required to take at least one 3-credit course outside the MPO program, unless they have arrived with an M.S. degree from another institution.  
• Courses with the ‘RSM’ designation count as an outside course.
Material from the required core courses will appear on the Comprehensive Examination (along with material from other courses from the first year).

Grade of Pass or High Pass needed to fulfill requirement.

All M.S. and Ph.D. students are required to take the Comprehensive Examination. For full-time students, the Comprehensive Examination should be before the end of their first year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee which comprises the MPO Graduate Program Director and the instructors (or their assignees) of the first year courses taken by the students.

The purpose of this examination is to evaluate students' understanding of materials in the courses completed up to the time of the examination and their capability of integrating these materials, and to determine whether the students are permitted to proceed to the M.S. or Ph.D. program.

The Comprehensive Examination will consist of an oral part and a written part.

The written part, which lasts no longer than 8 hours, consists of closed-book questions in the courses taken in the first year by each individual student. Each student must choose to answer four questions; at least one of the questions from GFD I and II must be answered.

The oral part, which lasts no longer than 2 hours for each student, may include questions from all the courses taken by the student.

The GPA comprises 20% of the Comprehensive Exam grade, and the written and oral parts of the Comprehensive Exams comprise 40% each.

A student's performance in this examination, together with his/her cumulative grade point average, will determine whether the grade of High Pass, Pass, Master's Pass or Fail is given by the Comprehensive Exam Committee. The examining board consists of faculty whose questions are answered by the student and any other RSMAS faculty who wish to participate.

High Pass: for students with no identifiable relevant weaknesses.

Pass: Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those. This information can be used to help plan the next steps in the student’s academic career.

• NOTE: This is a new category where a student is NOT required to defend a Master's thesis as was the case previously, but the student and advisor may of course still decide that a Masters in the appropriate next step.

Master's Pass: Students with this result will be required to defend a Master's thesis before considering whether to pursue a Ph.D. Students and advisors will receive feedback from the Comprehensive Exam committee on the strengths and weaknesses of the student, and possible recommendations of how to address those.

Fail: Students with this result will have an opportunity to re-take the exam once.

These guidelines complement those given in the UM Graduate Student Handbook.

All students are expected to take the Qualifying Exam and Proposal Defense by the end of their third year in the program. If the student needs to take the Exam in their fourth year, s/he will need to write a petition to the MPO Academic Committee with an explanation. A second extension after the end of the fourth year will not be permitted, unless there are exceptional circumstances.

While the exact format is left to the discretion of the Ph.D. Committee, a typical Oral Qualifying Exam comprises an hour of questions from the written Qualifying Exam and other related questions, and a second hour in which the student presents their Dissertation Proposal. It is recommended that the presentation emphasizes future work and is not a review of previous results, which are in the written Proposal.

• Expectations of the Qualifying Exam

1. Written Exam: Written answers judged by each Committee member to demonstrate that the student has the ability to understand and investigate the concept asked in the question. The questions are usually related to the research described in the dissertation proposal.

2. Oral Exam: Demonstration of oral communication skills in responding satisfactorily to questions raised by the Committee in relation to the written questions, and any other questions asked by the Committee members.

3. Dissertation Proposal: Written by the student in clear English befitting the standard of writing in a peer-reviewed journal. The proposal should demonstrate the capability of the student to produce and present research that is of the quality suitable for a journal Article. Emphasis needs to be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the proposal with the advisor, but the writing must be his/her own.

Attendance to the MPO seminars is required every semester.

MPO Ph.D. students must give at least one 15- minute presentation each year after completing the Comprehensive Exam, and a one-hour presentation after advancing to Ph.D. candidacy, and at least 6 months before the dissertation defense.

Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.

The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.

A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.

Specific requirements for TAs are outlined in the RSMAS Student Handbook.

Mission

The Meteorology and Physical Oceanography (MPO) program prepares students to conduct research in meteorology and physical oceanography. It seeks to advance students' knowledge and understanding of the physical and dynamical processes in the atmosphere and ocean. We prepare our graduates to develop into research leaders in the fields of meteorology and physical oceanography, and thereby contribute to better informing the public and policy makers on how to prepare for hazards and changes in the Earth’s atmosphere and oceans.

Goals

• To advance students' knowledge and understanding of the physical and dynamical processes in the atmosphere and ocean.
Student Learning Outcomes

- Students will demonstrate knowledge in meteorology and physical oceanography.
- Students will demonstrate their ability to conduct research in meteorology and physical oceanography.
- Students will demonstrate knowledge of discipline, appropriate methodology, application of knowledge, methodology to original research, critical thinking, as well as effective written and oral communication.

Ocean Sciences

https://www.graduate.rsmas.miami.edu/graduate-programs/ocean-sciences/index.html

Dept. Code: OCE

The mission of the Ocean Sciences (OCE) graduate program is to provide our students with specialized knowledge in important ocean science sub-disciplines as well as a broad understanding of the ocean as a key component of the Earth System. Our students advance the understanding of physical, chemical, and biological processes in the ocean and their interactions. Students learn first-hand about instrumentation and methods to measure the ocean using both in-situ and space-based sensors, and about laboratory, analytical, and numerical models to understand oceanic processes. Our graduates develop into international leaders of ocean research, into teachers and communicators of ocean sciences, and into leaders and advisors of marine education, policy, and conservation.

OCE offers opportunities for students to participate in research cruises and join field campaigns aboard our research vessel Walton Smith and aboard other vessels around the world, to perform experiments in our state-of-the-art wind-wave-storm surge simulator (SUSTAIN), and to run ocean and climate model simulations using our supercomputer facility. The OCE faculty excels in a wide range of topics including ocean circulation and climate, ocean carbon cycle, air-sea interaction, remote sensing, and marine ecosystem dynamics.

Degree Programs

- Master of Professional Science (M.P.S.) (p. 2451)
  - Requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.
- Master of Science (M.S.) (p. 2451)
  - Requires 30 credit hours, including 24 course credit hours and 6 research credit hours.
- Doctor of Philosophy (Ph.D.) (p. 2451)
  - Requires 60 credit hours, including a minimum of 27 course credit hours and a minimum of 12 research credit hours.

Research Areas

When admitted to the OCE graduate program, students will choose a research concentration based on their research interests.

Ocean Dynamics

This concentration covers the study of how the ocean moves on all scales, from turbulence and eddies to ocean gyres and the global thermohaline circulation, and how these motions impact and interact with Earth's climate. Scientists in OCE approach studies of Ocean Dynamics through sea-going experimentation and data analysis, development of conceptual modeling tools, data assimilation, numerical simulations, ocean prediction, and forecasting. Research topics include the dynamics and variability of boundary currents like the Gulf Stream, basin-wide meridional overturning and heat transport, mesoscale and submesoscale dynamics and stirring, turbulence, water mass formation and ventilation, oil spills, and coastal and continental shelf processes.

Air-Sea Interaction & Remote Sensing

The focus of this concentration is on sub-millimeter to mesoscale processes at and across the air-sea interface, from the oceanic thermocline to the atmospheric boundary layer. Research topics include surface fluxes and turbulent mixing events, wind-wave-current interactions, hurricane intensity changes, storm surge predictions, coupled tropical dynamics, underwater acoustics, internal and surface gravity waves, and coastal processes. OCE faculty, research staff, and students approach these studies using our unique wind-wave laboratory (SUSTAIN) and satellite-data facilities (CSTARS), and through field experimentation using ship-, buoy-, land-, and aircraft-based instrumentation. Coupled ocean-atmosphere modeling studies provide a framework to understand these observations, where one of the foci is tropical weather and hurricanes. Many of our research efforts have societal relevance in areas such as severe weather and wave forecasting, disaster monitoring and mitigation response, climate change, renewable energy developments, marine transportation and ship tracking, search and rescue, and pollutant dispersion.

Marine Biogeochemistry

Studies in this concentration focus on the physical, chemical, biological, and geological processes controlling the oceanic cycling of carbon, macronutrients (nitrogen, phosphorus, and silicon), and trace elements (e.g., iron). We conduct our work throughout the global ocean using advanced analytical and modeling techniques to assess the dynamics of these elements. Research topics include ocean acidification, nutrient...
limitation of productivity, global distributions of biogeochemical variables, tracers for time scales of water mass formation and circulation, air-sea exchange of materials, carbon fluxes, microbial processes, and speciation, distribution, and isotopic ratio of dissolved trace metals.

**Biophysical Interactions**

This concentration addresses the study of ocean productivity, the distribution, transport, and behavior of planktonic organisms, and their complex interactions with higher trophic levels. Researchers in OCE take a multi-prong approach, coupling the development of biophysical models with experimental field and laboratory work. OCE scientists develop new techniques and instrumentation to observe and model planktonic organism behavior and their responses to environmental signals. Research topics include the study of harmful algal blooms, plankton distribution and patchiness, trophic interactions, larval dispersal and population connectivity, biological control of physical constraints, microbial dynamics, bioacoustics, and animal navigation.

**Master of Professional Science (M.P.S.) Programs**

There are two OCE tracks for the M.P.S. degree:

- M.P.S. in Natural Hazards and Catastrophes (NHC) (p. 2463)

**Master of Science (M.S.) Program**

- M.S. in Ocean Sciences (OCE) (p. 2468)

**Doctor of Philosophy (Ph.D.) Program**

- Ph.D. in Ocean Sciences (OCE) (p. 2473)

**OCE 602. Oceanography II (Physical). 2 Credit Hours.**

The second section of the course core curriculum designed as an integrated and multidisciplinary view of ocean processes, covering the major disciplines of marine science and their applications to the study of the marine environment. To be taken in sequence with Oceanography I - Geological (MGG 501), Oceanography I II - Chemical (MAC 501), and Oceanography IV - Biological (MBF 502). This course is for non-MPO majors only.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**OCE 603. Physical Oceanography. 3 Credit Hours.**

Introduction to properties of seawater, instruments and methods, heat budget, general ocean circulation, formation of water masses, dynamics of circulation, regional oceanography, waves, tides, and sea level. A mathematical and problem solving course for majors in MPO.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**OCE 608. Introduction to Ocean Systems Engineering. 3 Credit Hours.**

This course will provide a survey introduction to various aspects of ocean systems engineering. This is a required course for all students enrolled in the Master of Science (non-thesis) in Ocean Engineering Program. It is intended to be taught in the first term of their studies, before they have fully refined their courses. It could also be of interest to graduate students in OCE and upper level undergraduate engineering, marine science or mathematics majors who are seeking to inform themselves on the breadth of study in ocean engineering.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**OCE 609. Coastal Physics and Engineering. 3 Credit Hours.**

Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, nearshore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include longshore and cross-shore transport, equilibrium beach profiles, coastal processes models, Pelnard-Considere model for shoreline change, and Escoffier model for inlet stability.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.
OCE 610. Ocean Biogeochemistry. 3 Credit Hours.
Introductory course to understand the ocean as a system. It will cover the interactions between biological, chemical, and geological processes in the environment, all within the context of physical controls. In the ocean, biogeochemistry includes the cycling of both major (e.g., C, N, P, Si, O) and minor elements (such as Fe). Tracing the spatial and temporal variability of these elements provides insights on the biological and geochemical processes at work, as well as the hydrographic and other controls on those processes. In this course, the physical ocean system is introduced in the context of its controls on the biological system, which in turn controls distributions of bioactive elements. Considered here are the major processes controlling ocean productivity, its roles as a carbon sink, organic matter production and consumption, the cycling of nutrients, the inorganic carbon system, and biogeochemistry of the sediments.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 611. Geophysical Fluid Dynamics I. 3 Credit Hours.
The basic equations of state, continuity, and motion. Topics include wave motions, group velocity, theory of stratified fluids and internal waves and turbulence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 612. Marine Organic Geochemistry. 3 Credit Hours.
Broad introduction to the chemical constituents comprising organic matter in marine environments. This course will address how biological origins, dietary and detrital reworking, and physical phase influence the distribution and fluxes of organic matter in the marine carbon cycle, on both short and long timescales. Topics will address both the water column and sediments, in open-ocean and coastal environments. Students may choose topics of specific interest to their research for presentations and writing assignments (subject to instructor approval). The first half of the course will focus on the chemistry and physical phases of organic matter; the second half will focus on discussing the application of organic geochemical tools to environmental questions via the primary literature.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 615. Tracers of Oceanographic Processes. 3 Credit Hours.
Course describes the various tracer techniques used by oceanographers to understand water transport and mixing, sedimentation, gas exchange, nutrient recycling, and transport. Tracers used are both natural occurring and anthropogenic. This course is of interest to students from various disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 622. Marine Microbial Dynamics. 3 Credit Hours.
An overview of the function of microbes in the ocean from a chemical perspective, building a quantitative understanding of cellular needs and metabolic functions, and the role these microbial processes play in controlling chemical fluxes and biogeochemical cycles in the ocean.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 624. Applied Data Analysis. 3 Credit Hours.
The course is intended to jump-start students in strategies for fruitful computer interaction practices for careers in MPO areas of science. Academic topics include key concepts in probability & statistics, issues of graphical evidence and inference, linear models and regression, spectral analysis, and matrix decomposition. Practical topics include hands-on exercises in data analysis and the sharing of code+results and interpretation. Students do projects on data from their research or interests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 631. Ocean Data Analysis. 3 Credit Hours.
Useful and widely used ocean data analysis techniques are discussed. Topics covered include: a review of statistical concepts and linear algebra; time series analysis; least squares and regression techniques; principal component analysis; optimization and inverse methods; and simple models of ocean processes. Computational methods are emphasized. Choice of the material covered is dictated in part by student interests.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
OCE 635. Introduction to Underwater Acoustics. 3 Credit Hours.
Course topics include sound waves and pulses, harmonic analysis, sound propagation in the ocean, sonar systems, scattering and absorption, acoustic measurement of marine life and sea-floor properties, sound transmission in waveguides, ambient noise, transducers, and hydrophones.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 636. Hurricanes. 3 Credit Hours.
This course is intended to provide a broad overview of tropical cyclones, starting from the basic structure, dynamics and thermodynamics, then expanding through to observations, modeling, forecasting and impacts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 637. Natural Hazards: Atmosphere and Ocean. 3 Credit Hours.
This course is designed to provide students with an understanding of natural hazards in both the atmosphere and ocean. In the atmosphere, we will explore both weather events such as storms and hurricanes and tornadoes as well as longer term phenomena such as monsoons and excess rainfall in the tropics. Oceanographically, the course will address hazards such as storm surge and flooding, rogue waves, rip currents, and tsunamis that occur on short time scales as well as the longer term effects such as sea level rise and the impacts of El Niño and La Niña oceanographic conditions on weather conditions. Thus, the course focus is on hazards and their impacts around the globe.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 642. Physics of Remote Sensing I - Passive Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on optical and passive systems. Topics include orbital dynamics, sampling issues, fundamental laws of electromagnetic waves, passive remote sensing in the visible, infrared and microwave parts of the electromagnetic spectrum, a survey of satellite sensors and summary of the derived geophysical variables.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 643. Physics of Remote Sensing II - Active Systems. 3 Credit Hours.
Course discusses basic physical principles of remote sensing with emphasis on active and radar systems. Topics include electromagnetic theory, radar equation, antenna theory and pulse compression, radar scattering physics; sea surface processes relevant to radar imaging, scatterometry, synthetic aperture radar (SAR), altimetry, HF Doppler radar, marine radar, satellite orbits, brief overview of passive remote sensing techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 651. Applied Ocean Acoustics and Marine Mammals. 3 Credit Hours.
The objective of this course is to provide a basis in the fundamental of sound in the sea and on the effects of sound on marine mammals.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 668. Marine Isotopic Processes. 3 Credit Hours.
The use of isotopic methods in geology, geochemistry, and geophysics including oceanography and meteorology. General laws governing isotopic effects in chemical and physical processes are discussed as well as specific problems in dating, tracing, and paleotemperatures.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 673. Applied Underwater Acoustics. 3 Credit Hours.
Course topics include sonar systems and operating characteristics, scattering and reverberation, target strength, signal processing, transducers and arrays, detection and noise, and acoustic telemetry.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
OCE 675. Fluid Mechanics. 3 Credit Hours.
The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 676. Wave Propagation in the Ocean Environment. 3 Credit Hours.
Review of vector analysis, basic principles of fluid mechanics, equations of surface gravity waves, linear dispersion relation, phase and group velocity, wave dispersion, orbital motions, wave refraction, diffraction, reflection, ray tracing, frequency and wavenumber spectra, fundamentals of wave modeling, action balance equation, wave generation, wave dissipation, wave-wave interaction, wave-current interaction, Stokes drift, internal waves.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 680. Transport and Mixing Process in the Marine Environment. 3 Credit Hours.
Heat and constituent transport and mixing processes in the marine environment. Derivation of the fundamental equations governing heat and constituent transport and mixing processes, steady and unsteady state heat transfer by conduction, laminar and turbulent convection, and radiation, steady and unsteady state constituent transfer by diffusion and laminar and turbulent convection, mixing and flushing in tidally driven coastal waters are also discussed.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 681. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 682. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 683. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 684. Special Topics. 1-4 Credit Hours.
Lectures, research projects or directed readings in special topics.

Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 686. Applied Remote Sensing. 3 Credit Hours.
Provides a detailed overview of applications of passive remote sensing using visible, infrared and microwave radiometers. Orbit and satellite characteristics are discussed. Hands-on data processing and analysis using readily accessible image processing software is included. Access to satellite data archives is explained. Students are also expected to attend Physics of Remote Sensing I - Passive Systems, and Physics of Remote Sensing II - Active Systems, which focus on the theory of remote sensing. The companion course, Applied Radar Remote Sensing, is offered in the spring semesters.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
OCE 687. Applied Radar Remote Sensing. 3 Credit Hours.
This course complements Physics of Remote Sensing II with additional lectures and exercises tailored specifically to the needs of MPS students. Topics covered: Active vs. passive remote sensing, satellite station operations, how to work with satellite radar images, imaging geometry and sampling characteristics, introduction to IDL, hands-on SAR data analysis examples, hands-on marine radar data analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 701. Mathematical Methods in Marine Physics. 3 Credit Hours.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 705. Chemical Oceanography. 3 Credit Hours.
This course will introduce students to the chemistry of the oceans, descriptive chemical oceanography of the components of ocean waters (metals, gases, organic compounds and nutrients), and biogeochemical cycles in oceanic systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 711. Geophysical Fluid Dynamics II. 3 Credit Hours.
The focus of this course is on the effects of stratification, on time variable phenomena, and on the interaction between large-scale circulation and mesoscale eddies. Course topics include quasi geostrophic scale analysis, Rossby waves, barotropic and baroclinic instability, wave-mean flow interaction and non-geostrophic waves.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 712. Large Scale Ocean Circulation: Models and Observations. 3 Credit Hours.
Course topics include theoretical models of the oceanic current systems, wind-driven and thermohaline circulation, effects of bottom topography, and lateral bounding.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OCE 716. Lagrangian Fluid Dynamics and Predictability. 3 Credit Hours.
The ash cloud produced by the eruption of Eyjafjallajokull in Iceland, the oil spill produced by the explosion of the Deepwater Horizon drilling rig in the Gulf of Mexico, and release of debris and radioactive contamination into the Pacific Ocean after the Fukushima nuclear reactor was hit by the Tohoku tsunami, are examples of events that have caused considerable impact to the environment. They all represent problems in Lagrangian ocean or atmospheric dynamics in which predicting where the material released into the environment will be transported by the ocean currents or winds is critical. A common approach to predict the outcome of an event like the above is to run an ocean or atmosphere circulation model simulations and then integrate the resulting velocity fields from a given release location to predict pollutant trajectories. An important drawback of such an approach is that the predictions are highly sensitive to small changes in the release time and location. Attempts to cope with the sensitivity to initial conditions include running several different models for the same scenario, but this typically leads to even larger distributions of advected tracers, hiding the key organizing structures of the flow. Improved understanding and forecasting requires novel notions and techniques capable of casting light on why material is transported the way it is by a given flow. The goal of this course is acquaint the student with a series of recent developments originated at the interface of nonlinear dynamics and fluid dynamics that have led to a number of novel such notions and techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 720. Marine Physical Chemistry. 3 Credit Hours.
Physical-chemical principles applied to the marine environment, based on thermodynamics and the study of rate processes.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
**OCE 721. Waves and Tides I. 3 Credit Hours.**
The focus of this course is on the kinematics, dynamics and energetics of wave motions in the ocean and atmosphere from both theoretical and observational perspectives. We examine the internal wave spectrum ranging from the buoyancy frequency to the inertial frequency including the WKBJ scaling of the momentum by the buoyancy frequency. The IW spectrum often contains both the semidiurnal and diurnal tidal frequencies where the former is often referred to as internal tide that are excited along continental margins by barotropic tides. Within the context of normal modes, Kelvin and topographically Rossby waves are also present in this regime known as coastally trapped (also known as continental shelf waves). The course then goes into the equatorial wave guide that supports these motions (except for near-inertial motions). This is followed by the forced wave motions by atmospheric fronts and cyclones where Green’s functions are introduced to derive analytical expressions for the 3-D current structure.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**OCE 724. Statistical Modeling of Geophysical Fields. 3 Credit Hours.**
An advanced course in statistical modeling, analysis, and assimilation of geophysical data. Emphasis is placed on practical applications, computer software, and new nonstandard techniques.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**OCE 731. Air-Sea Interaction. 3 Credit Hours.**
Oceanic and atmospheric mixed layers including fluxes of heat, momentum, moisture and salt between the ocean and atmosphere; vertical distribution of energy sources and sinks at the interface including the importance of surface currents; forced upper ocean dynamics, the role of surface waves on the air-sea exchange processes and ocean mixed layer processes.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**OCE 735. Life in Moving Fluids. 3 Credit Hours.**
The physical characteristics of fluids are described and quantified in relation to various flow phenomena that play a part in life functions. Adaptations of forms and functions reflect the different properties of the media. Energy conversion and transfer limit form and function and enable a wide variety of survival strategies. This course is mainly about the adaptation of marine organisms to moving fluids, small scale movement ecology, and diversity in physical constraints and adaptation in marine ecosystem.

Prerequisite: OCE 701.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**OCE 736. Modeling of Physical-Biological Interactions. 3 Credit Hours.**
The course is designed to teach students the basics components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**OCE 750. Coastal Ocean Circulation. 3 Credit Hours.**
The oceanography of the continental margins are where tides, winds and waves interact on a spectrum of temporal and spatial scales in driving the shelf circulation from the shelf break to the inner shelf. The effects of baroclinicity, topography (and bottom stresses) will be explored in this course. We will highlight fundamental differences between wide versus narrow shelves, and those where boundary currents impact the shelf circulation such as the Loop Current on the west Florida shelf; Florida Current and Gulf Stream along the east coast; and the weaker and broader California Current along the US west coast.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**OCE 752. Vortex Dynamics. 3 Credit Hours.**
This course will cover fundamental to advanced topics in vortex dynamics. A review of fluid dynamics and vorticity in two dimensions will be followed by studies of vortex dynamics in three-dimensional, incompressible flow and in three-dimensional, stratified flow.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.
OCE 762. Computer Models in Fluid Dynamics. 3 Credit Hours.
Course topics include numerical techniques of dealing with dynamic problems in meteorology and oceanography. Dynamic prediction models, initial data conditioning, computational stability, and error estimates are also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 763. Environmental Photochemistry. 3 Credit Hours.
Introduction to the principles of photochemistry and their application to understanding sunlight initiated processes in the region of the ocean-atmosphere interface. Organic and inorganic photochemical reactions and subsequent thermal reactions in solution, gas, and solid media are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 764. Atmospheric and Oceanic Turbulence. 3 Credit Hours.
Structure and dynamics of planetary boundary layers, turbulent transport processes, Fickian and statistical theories of turbulence, influence of stratification, and rotation on turbulent motion are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 767. Spectral and Finite Element Methods in Computational Fluid Dynamics. 3 Credit Hours.
The simulation of fluid flows in geometrically complex domains (like ocean basins) and/or with high fidelity requires the adoption of new discretization techniques that can simultaneously handle the complicated geometry and permit high accuracy solution. The finite element method has traditionally been used to tackle the geometric complexity while spectral methods have been developed to handle high accuracy in simple geometries. Here we present an approach to handle both complexity within a single framework, namely the spectral element method. The course starts by describing the weak formulation common to all finite element methods which, by design, are geometrically flexible. The second part of the course describe how high order polynomial can be implemented within the finite element framework to achieve high accuracy rates.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 768. Marine Trace Element Geochemistry. 3 Credit Hours.
This course includes an in-depth discussion on all major aspects of oceanic trace element cycle and their application in oceanography and climate studies. The discussed topics include distribution, controlling processes, trace element speciation, isotopes, the role of trace elements in oceanic cycle of major nutrients and the application in the studies of past ocean history and climate. New data and major findings of the on-going GEOTRACES program will also be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OCE 770. Seminar in Ocean Sciences. 1 Credit Hour.
Oral presentation of research and special topics by students, faculty, and visiting scientists.
Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

OCE 772. Advanced Underwater Acoustics. 3 Credit Hours.
Analysis and numerical modeling of sound propagation in the ocean: geometrical acoustics, normal mode theory, and the parabolic equation method. Recent advances in underwater acoustics: effects of oceanic variability, signal fluctuations, random medium propagation, ocean bottom interactions, and shallow water propagation are also examined.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

OCE 776. Mesoscale Oceanography. 3 Credit Hours.
The course will present a current view of our understanding of ocean mesoscale variability, including its properties in different oceanic regimes, the dynamics governing its origin and development, and its overall role in the oceans and climate. Lectures will present material covering theory, observations (both in situ and satellite), and numerical model results. Students will learn basic concepts on ocean mesoscale processes and perspectives on current research topics from lectures, assignments and research papers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
OCE 780. Capstone Independent Study of Coastal Engineering (MSOE). 3 Credit Hours.
OCE 780 is an independent study course in the field of Coastal Engineering that is intended to be a final semester capstone project in the MS in Ocean Engineering program. The student will work with the instructor to select a laboratory or field experimental project of interest related to coastal oceanographic engineering. The student will review the background of similar studies, design the project applying appropriate scaling laws (in the case of the laboratory studies), design the measurements to be taken and the protocols for doing so. The student will assist in model construction as required. Data will be collected, analyzed and archived. A report will be prepared and presented at an open seminar on campus.

Components: IND.
Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

OCE 786. Advanced Ocean Measurements. 2 Credit Hours.
Theory and techniques of ocean measurements, ocean data systems, and processing and ocean data transmission are discussed. Lecture, 2 hours.

Components: LEC.
Grading: GRD.

Typically Offered: Offered by Announcement Only.

OCE 790. Mechanics and Thermodynamics of the Air-Sea Interface. 3 Credit Hours.
This course deals with the theory and practice of air-sea interaction. Two hours of lectures and one hour in the wind-wave laboratory provide an appropriate mix of theory and experiment. The topics covered include: thermodynamics of the interface; conservation equations; wave generation, propagation, and dissipation; boundary layer turbulence; heat, mass, and momentum transfer; energy dissipation, intermittency; turbulence closure; and wave prediction models.

Components: LEC.
Grading: GRD.

Typically Offered: Spring.

OCE 795. Advanced Studies. 1-3 Credit Hours.
Supervised study in areas of special interest to graduate students.

Components: SEM.
Grading: GRD.

Typically Offered: Offered by Announcement Only.

OCE 805. MPS Internship. 1-6 Credit Hours.
The Master of Professional Science internship is an approved, supervised internship project with an organization engaged in activities associated with the student's degree track. The internship results in a collaborative project, written report, and oral presentation on a topic approved by the student's advisory committee. Up to 6 credits are necessary for graduation

Components: PRA.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

OCE 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

OCE 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of OCE 830 may be taken in a regular semester, nor more than 6 in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.
Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

M.P.S. in Applied Remote Sensing
Overview
The routine use of remote sensing techniques has become an indispensable element of many activities in our modern world. A huge variety of sensors on satellites, airplanes, unmanned aerial vehicles ("drones"), and other platforms provide data for a variety of applications on a regular
basis. The MPS in “Applied Remote Sensing” (https://mps.rsmas.miami.edu/degree-tracks/applied-remote-sensing/) offered by the University of Miami’s Rosenstiel School of Marine and Atmospheric Science (RSMAS) and Center for Southeastern Tropical Advanced Remote Sensing (https://www.rsmas.miami.edu/research/centers/cstars/) (CSTARS) provides theoretical knowledge and experiential learning for careers in the field of remote sensing in both public and private sectors. Working professionals in this field may also acquire additional training to expand their current knowledge and skillset.

**Admission Requirements**

Students entering this track need to have a Bachelor’s degree in Mathematics, Physics, Geosciences, or Engineering or an equivalent degree from an accredited U.S. institution of higher education.

Prerequisites:

1. Bachelor of Science degree (B.S.) in Mathematics, Physics, Geosciences, Engineering or an equivalent degree.
2. Successful completion of the following (or equivalent) undergraduate courses: Calculus, Statistics, Physics, Computer Programming (Matlab, IDL, C, or Fortran).

Note to students: Deficiencies in required coursework may be considered on a case by case basis for otherwise highly qualified students or those demonstrating experience with these skills.

Accepting applications for Fall 2020 admissions:

- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:

- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

**Transcript from U.S. Academic Institutions:**

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website’s Contact Us page. If an applicant is not able to submit an unofficial transcript with his/her application, the applicant may submit unofficial transcripts via email to mps@rsmas.miami.edu. Unofficial transcripts are accepted for review purposes only, not for admission. If admission to the MPS program is granted, it will be contingent upon receipt of all official records. Please be advised, official transcripts will only be accepted if they are sent to us directly from the academic institution. Transcripts sent by you or issued to you (even if they are in a sealed envelope) are not considered official.

**Transcripts from Non-U.S. Academic Institutions:**
All graduate applicants who received degrees or are currently enrolled in a degree-seeking program from a college or university outside the United States (except applicants to Law* and Nursing**) must submit official transcripts and diplomas (if available) from all colleges and universities to an approved international credentialing agency. Applicants attending a non-U.S. institution for non-credit must also submit academic records to an approved evaluation agency.

Transcripts in a language other than English must be provided in that language and must be accompanied by a certified English translation. International applicants must also submit a copy of his/her diploma in the official language of the country from which the degree was awarded and provide a certified English translation of the diploma. Submit these items to an approved international credentialing agency. Follow the specific instructions of the selected evaluation agency to request a course-by-course evaluation with degree equivalency and grade point average (GPA) calculation. Applicants must request that the evaluation report and copy of all the official documents used in the evaluation are sent directly from the approved evaluation agency to the MPS office mps@rsmas.miami.edu.

- Josef Silny & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
- Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to mps@rsmas.miami.edu.
- Evaluation Fee - Applicants are responsible for the evaluation fee. Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Letters of Recommendation:

Three (3) letters of recommendation are required for admissions consideration. Each applicant must request letters of recommendation from three (3) different references using the guidelines provided in the online application. Applications from CollegeNet may be submitted without letters of recommendation. However, an applicant’s file will not be reviewed by Track Leaders until all required admissions materials (including letters of recommendation) are received by the MPS office. Upon completion of the application, your references will receive an e-mail from CollegeNet, requesting the online submission of the required documentation (questionnaire + letter of recommendation).

Academic references are ideal and highly preferred, but we will accept letters from employers and/or supervisors. Please do not request letters from friends, family, ministers, or coaches. If your references have trouble using the online submission portal, they may e-mail their letters (signed and on letterhead) to the MPS office at mps@rsmas.miami.edu. We cannot accept letters that are not signed. Letters sent by the applicant or forwarded to the MPS office by the applicant will not be accepted.

GRE:

Due to COVID-19, the GRE requirement is suspended for Fall 2020 admissions only.

The MPS office must receive your official Graduate Record Examination test (GRE http://www.ets.org/gre) scores directly from ETS. Please use institution code 7690 (department code) when submitting your request with ETS. This code indicates delivery of test scores to the RSMAS campus, home of the MPS office.

A minimum, combined score of 297 (Verbal + Quantitative only) is required for admissions consideration. Applicants must also complete the Analytical Writing section of the GRE. However, the Analytical Writing score will not be calculated into your combined score, nor will it be used for tuition waiver eligibility. To learn about our merit-based partial tuition waivers, please visit our Financing Your Education page.

TOEFL/IELTS (for Non-native English Speakers):

To prove language proficiency, students must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

- Paper Based TOEFL (PBT) - minimum score is 550
- Internet Based TOEFL (IBT) - minimum score is 80
- IELTS (Academic) - minimum score is 6.5

Please use institution code 2919 (no department code). This institution code is for the TOEFL only; please note that the GRE institution code is different (see above).

If English is not your native language, the TOEFL/IELTS requirement may be waived if you hold an undergraduate or graduate degree from an academic institution within the United States or from one of the following English-speaking countries:

- Antigua and Barbuda
Australia
· Bahamas
· Barbados
· Belize
· Canada (except Quebec)
· Dominica
· Grenada
· Guyana
· Ireland
· Jamaica
· New Zealand
· Kitts and Nevis
· Lucia
· Vincent and the Grenadines
· Trinidad and Tobago
· United Kingdom

Intensive English Program (IEP)

The University of Miami’s Division of Continuing and International Education offers a fully-accredited Intensive English Program (IEP) to prepare individuals to understand and use English in a variety of academic, professional, and personal situations. Some of the services that IEP offers graduate students include an international teaching assistant training course, customized classes, LL.M. Intensive English, and volunteer opportunities.

Personal Statement (statement of purpose):

Please indicate your track of choice, and all relevant field, lab, and work experience (past and present) in your personal statement. Include your academic and professional goals, and how you envision the MPS program contributing to those goals. We strongly encourage you to include information and/or links to relevant publications, organizations, research projects, supervisors, collaborators, project results, and your role in relation to this.

Mission
MPS Applied Remote Sensing (https://mps.rsmas.miami.edu/degree-tracks/applied-remote-sensing/), in conjunction with the Center for Southeastern Tropical Advanced Remote Sensing (https://www.rsmas.miami.edu/research/centers/cstars/) (CSTARS) provides students with theoretical knowledge and practical, real-world experiences geared towards a successful career in the field of remote sensing in both public and private sectors. This program is also appropriate for those already in the workforce who require additional training or are looking to expand upon their knowledge and skills.

Goals
The goal of the Applied Remote Sensing (ARS) track is to provide students with theoretical knowledge and advanced training of remote sensing technology in an effort to acquire high-resolution satellite images and near-real-time measurements of sea surface temperatures, currents, wave heights, wind speeds, atmospheric temperature profiles, clouds, aerosols, and more. In relation to disaster response after hurricanes, earthquakes, floods, oil spills, monitoring ship traffic, floating sea ice, and more, students obtain an understanding of remote sensing technologies and applications, as well as training for the interpretation of the collected data.

Student Learning Outcomes
- Applied Remote Sensing students will learn theoretical knowledge and practical skills using a variety of remote sensing instruments to produce, measure, and interpret data from high-resolution satellite images for application to various end-users in the private and public sectors.
- Students will demonstrate professionalism in all aspects of field and lab work during their internships.
- Students will write up a final report and deliver a final presentation based on the work completed in their internship.

M.P.S. in Natural Hazards and Catastrophes

Overview
The University of Miami’s Rosenstiel School of Marine and Atmospheric Science conducts world-class research on the earth systems responsible for natural disasters, including the atmosphere, the ocean and solid earth. To meet society’s need for a skilled workforce, the Natural Hazards and Catastrophes (https://mps.rsmas.miami.edu/degree-tracks/natural-hazard-and-catastrophes/) track, within the Master of Professional Science (MPS) program, offers an educational opportunity for students seeking to fill positions offered by the private and civil sectors to assess risks and exposures associated with natural hazards.

Admission Requirements
Prerequisites:
1. Bachelor of Science degree (B.S.) or Bachelor of Arts degree (B.A.)
2. At least one of the following: one semester of Statistics or Calculus or 6 credits in Geoscience

Note to students: Deficiencies in required coursework may be considered on a case by case basis for otherwise highly qualified students or those demonstrating experience with these skills.

Accepting applications for Fall 2020 admissions:
- July 25th, 2019 - July 20th, 2020 (U.S. Citizens and Permanent Residents)
- July 25th, 2019 - June 1st, 2020 (International Applicants)

Accepting applications for Spring 2021 admissions:
- Now until December 1st, 2020 (U.S. Citizens and Permanent Residents)
- Now until November 1st, 2020 (International Applicants)

An application to the MPS program consists of the following (fall & spring admissions only):
M.P.S. in Natural Hazards and Catastrophes

- Online CollegeNet application
- Transcripts from all past/present academic institutions (colleges and universities), including all study abroad and community colleges and, if applicable, a transcript evaluation report from an approved international credentialing agency (for non-U.S. academic institutions).
- Valid Graduate Record Examination (GRE) scores. NOTE: GRE requirement suspended for Fall 2020 admissions only due to COVID-19.
- Three (3) letters of recommendation
- Valid TOEFL or IELTS scores (for international applicants)
- Personal statement (statement of purpose)

If admission to the MPS program is granted, it will be contingent upon receipt of all items listed above (including official transcripts and test scores) and the following for international applicants:

- Statement of Financial Responsibility Form (SFR) and corresponding bank letter
- Color copy of current visa (if available).
- Color copy of valid passport (must include picture page and barcode page)

Permanent Residents must provide a color copy of Permanent Resident Card (Green Card).

Previous graduate and undergraduate scholastic performance, work and volunteer experience, valid test scores (GRE, TOEFL/IELTS), and the letters of recommendation are all considered in evaluating an applicant.

 Transcript from U.S. Academic Institutions:

Please make sure you possess the required undergraduate coursework and/or degree before applying. Official transcripts must be mailed or e-mailed directly from the relevant academic institution (Office of the Registrar) to the MPS office. Our email is mps@rsmas.miami.edu; mailing address is available on the MPS website's Contact Us page. ### Mission

The mission of the Natural Hazards and Catastrophes track is to provide students with the skills and knowledge necessary to understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and the data analytics tools required to assess the associated risks. The strategic selection of electives exposes students to legal and regulatory knowledge, communication and media training, and the development of project management skills, all designed to prepare them to address these challenges as future global leaders. MPS Natural Hazards and Catastrophes prepares its students for employment in several sectors, including insurance and re-insurance industry, architecture, emergency management, engineering, public health and science.

### Goals

The goal of the Natural Hazards and Catastrophes track is to provide students with the knowledge necessary to understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and provide training of data analytics tools (e.g. statistics, data management, programming, GIS, and remote sensing) for the assessment of associated risks. With this training and advanced knowledge of natural earth system hazards, students are better prepared for employment in several sectors, including insurance and re-insurance industry, architecture, emergency management, engineering, public health and science.

### Student Learning Outcomes

- Students will understand earth system natural hazards (atmospheric, oceanic, geological and hydrological) and apply data analytics tools (e.g. statistics, data management, programming, GIS, and remote sensing) required to assess associated risks. In addition, students will develop project management skills, understand the legal and regulatory frameworks and regulations, apply communication and media training to address earth system natural hazards. 
• Students will demonstrate professionalism in all aspects of field and lab work during their internships.
• Students will submit a written, final report and deliver a final presentation based on the work completed in their internship.

M.S. in Ocean Sciences

Admission Requirements

The best OCE applicants have a strong foundation in science, with a bachelor’s and/or master’s degree in physics, mathematics, chemistry, biology, engineering, geophysics, oceanography, marine science, or a related field. Applicants must take the GRE. Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application. In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships. Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html.

• The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
• Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
• Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
• Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
• Non-refundable application fee ($85).

Official Transcripts of All College and Graduate Level Work

US APPLICANTS

While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

INTERNATIONAL APPLICANTS

Submit the following educational documents to an approved international credentialing evaluation service for evaluation:

• Official original diplomas and certificates in the original language
• Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
• NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.
Type of Evaluation Required
• The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation
• Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
• Evaluation Fee - Applicants are responsible for the evaluation fee.
• Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

Official GRE Score Report
• An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
• It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

Official TOEFL or IELTS Score Report (International Applicants Only)
• International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ using institution code 4862. There is no department code for either score submission.
• An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
• A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents
• Ph.D. Applicants with a Prior Master’s Degree
  • Students applying to the Ph.D. program with a prior Master's degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu.
• Financial Documents
  • Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Mailing Address:
Graduate Studies Office SLAB 130
Rosenstiel School of Marine and Atmospheric Science
University of Miami
4600 Rickenbacker Causeway
Miami, Florida 33149
Telephone: 305.421.4155
Facsimile: 305.421.4771
E-mail: gso@rsmas.miami.edu

Curriculum Requirements
The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in the OCE Handbook or by the OCE Graduate Program Director. Any uncertainties regarding the procedures and requirements should be clarified with the OCE Graduate Program Director and the RSMAS Graduate Studies Office (GSO).

All RSMAS courses are listed on the RSMAS website. Students should consult their advisors and the OCE Graduate Program Director regarding their choices of courses; courses taken by students should be approved by their advisors. Any deviations from the requirements listed below must be approved by the advisor and the OCE Graduate Program Director.

OCE students follow one of four academic tracks: Ocean Dynamics, Air-Sea Interaction and Remote Sensing, Marine Biogeochemistry, or Biophysical Interactions.

1. Minimum of 24 course credits and 6 thesis credits.
2. Required courses are normally taken during the student’s first full year of study (beginning in the fall semester). The Comprehensive Examination will focus on the required courses.
3. The remaining course credits can be obtained by taking other graduate courses offered at RSMAS or, with permission of the advisor, at other departments of UM.
4. All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee comprised of the OCE Graduate Program Director and the instructors (or their assignees) of the required courses taken by the students.
5. The purpose of this examination is to evaluate students’ understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.
6. The comprehensive examination consists of oral and written components.
   a. The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed-book questions on the material covered in up to four of the required courses taken by each student (to be selected by the student and the OCE Graduate Program Director if the student’s academic track has more than four required courses).
   b. The oral component, which lasts no longer than 2 hours for each student, may include questions related to all the courses taken by the student.
7. Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
8. The outcome of the exam, which is determined by the Comprehensive Examination Committee, is based on the student’s performance on this examination, together with consideration of the student’s first year academic record. Possible exam outcomes are:
   a. **PhD-Pass**: Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, they may complete a M.S. degree before pursuing a Ph.D.
   b. **MS-Pass**: Students with this result are required to defend a M.S. thesis and get approval from their M.S. committee before pursuing a Ph.D.
   c. **Fail**: Students with this result will have an opportunity to re-take the exam once.
9. A grade of **PhD-Pass** or **MS-Pass** is required for M.S. students.
10. Regular attendance of the COMPASS seminar series (combined OCE, MPO, ATM seminar series) is expected; each student is required to attend at least 10 seminar sessions per semester.
11. In the same seminar series, each M.S. student is expected to give at least one 15-minute presentation each year after the student passes the comprehensive examination.

### Mission

The Department of Ocean Sciences (OCE) seeks to advance knowledge and understanding of physical, chemical and biological processes in the oceans. We train graduate students and young scientists to be leaders in ocean-science-related fields. With distinct strengths in ocean dynamics, air-sea interactions and remote sensing, ocean biogeochemical cycles, biophysical interactions and coastal processes, we strive to achieve excellence in research and education. We seek to promote, among the public and policy makers, responsible science-based stewardship of the oceans. Our program commits to inspire graduates to continued scholarship, service, and innovation in an environment that is inclusive and diverse.

### Goals

To train graduate students and young scientists for positions in ocean-science-related fields.

### Student Learning Outcomes

- **Proof of Fundamental Knowledge**: Students will demonstrate a broad understanding of fundamentals of ocean science and an awareness of how scientific research in their topical areas relate to current societal issues.

- **Capability to Explain and Defend Own Work**: Students will demonstrate a comprehensive understanding of their field of work and the ability to explain their work and defend their results in oral and written communication in a way adequate for employment as a research scientist or equivalent professional level scientist.

- **Capability to Give Short Presentations**: Students will demonstrate the ability to explain their work and defend their key results in a short oral presentation in an environment similar to a session at a scientific conference or a professional project meeting.

### Ph.D. in Ocean Sciences

The best OCE applicants have a strong foundation in science, with a bachelor’s and/or master’s degree in physics, mathematics, chemistry, biology, engineering, geophysics, oceanography, marine science, or a related field. Applicants must take the GRE. Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

### Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

#### Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.
The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phd-assistanships/). Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

**Dates and Deadlines**

RSMAS accepts applications year round. - Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
- Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
- **Evaluation Fee -** Applicants are responsible for the evaluation fee.
- Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Official GRE Score Report**

- An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
- It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.
Official TOEFL or IELTS Score Report (International Applicants Only)

- International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ielts.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
- An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
- A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

Additional Supplemental Documents

- Ph.D. Applicants with a Prior Master’s Degree
  - Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu. (gso@rsmas.miami.edu)

- Financial Documents
  - Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Mailing Address:

Graduate Studies Office SLAB 130
Rosenstiel School of Marine and Atmospheric Science
University of Miami
4600 Rickenbacker Causeway
Miami, Florida 33149
Telephone: 305.421.4155
Facsimile: 305.421.4771
E-mail: gso@rsmas.miami.edu

The best OCE applicants have a strong foundation in science, with a bachelor’s and/or master’s degree in physics, mathematics, chemistry, biology, engineering, geophysics, oceanography, marine science, or a related field. Applicants must take the GRE. Those whose first language is not English must pass the Test of English as a Foreign Language (TOEFL) with a score of at least 550.

Application for Admission to the Rosenstiel School of Marine and Atmospheric Science (Ph.D. and M.S.)

Getting Started

All applicants should review undergraduate preparation requirements and recommendations for a competitive application (https://graduate.rsmas.miami.edu/admissions/undergraduate-prep/). In addition to satisfactory scores (as judged by the graduate program) on the appropriate tests, the general requirement for admission is a bachelor’s degree from an accredited college or university with a 3.0 GPA average. If you have any questions about these requirements, please contact the Graduate Program Director for the program you are interested in.

When submitting an application, prospective students must indicate the program(s) of interest. The online application will allow you to submit one application to multiple RSMAS graduate programs with no additional application fee.

The online application will ask you to identify up to 5 faculty with whom you would be interested in meeting if you are offered the opportunity to interview. We encourage you to review faculty associated with various research areas and the list of available research assistantships (https://graduate.rsmas.miami.edu/admissions/phd-assistanships/). Please note your application will be considered regardless of your selection. Applicants are welcome to contact faculty via email before and during the application process, but this is not required.

Dates and Deadlines

RSMAS accepts applications year round. For best chances of fall admission into one of our PhD or research based Masters of Science programs, your complete application including all supporting documents must be received in the application period of November 1st - January 10th. However, complete applications received by December 1st will have the highest chance of being invited to our on-site annual recruitment weekend visit in early February.

Application Requirements

Online Application Form and Upload Supporting Documents

Please use the online application which can be found at https://www.applyweb.com/miamigrd/index.html (https://www.applyweb.com/miamigrd/).

- The application will ask you to identify up to 5 faculty with whom you are interested in. See above statement for more details on this.
- Upload PDF of Statement of Purpose identifying your goals and objectives in pursuing a graduate degree. If you have already identified RSMAS faculty you are interested in, please be sure to include this information here as well.
- Upload PDF of unofficial transcripts (for review purposes only). See below statement on transcripts for more details on this.
• Three letters of recommendation from persons well situated to evaluate your qualifications for graduate study. The online application will ask you to enter your recommender’s email addresses for the RSMAS recommendation letter form to be sent to them.
• Non-refundable application fee ($85).

**Official Transcripts of All College and Graduate Level Work**

**US APPLICANTS**
While the online application will allow you to upload unofficial transcripts for review purposes, RSMAS must receive official transcripts before an offer of admission can be released. You are strongly encouraged to request the registrar of each institution attended to send transcripts directly to the University of Miami, RSMAS, Graduate Studies Office (address below). For any institution allowing electronic transfer of the official transcript, please use gso@rsmas.miami.edu as the delivery address.

**INTERNATIONAL APPLICANTS**
Submit the following educational documents to an approved international credentialing evaluation service for evaluation:
• Official original diplomas and certificates in the original language
• Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
• NOTE: Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement, but do not replace the official documents.

**Type of Evaluation Required**
• The Rosenstiel School requires international applicants to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**
• Josef Silney & Associates (JS&A), Inc, International Education Consultants, is the preferred evaluation vendor for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here (https://www.jsilny.org/services.aspx/#foreign_anchor) for more information including the Application for Evaluation of Foreign Educational Credentials.
• Please note that international applicants are not required to use the services of JS&A. The international credential evaluation services of any approved vendor may be used. Click here (https://www.naces.org/members/) to view a list of approved vendors.
• Please be sure the vendor sends your evaluation directly to gso@rsmas.miami.edu.
• **Evaluation Fee** - Applicants are responsible for the evaluation fee.
• Please note that failure to comply with these instructions may cause significant delays in the review and processing of your application, and therefore also significant delays in the processing of your I-20.

**Official GRE Score Report**
• An official score of the Graduate Record Examination Test (GRE): http://www.ets.org/gre (https://www.ets.org/gre/revised_general/scores/) must be submitted using institution code 7690 (there is no department code). The University of Miami requires a minimum score of 297 (total of verbal + quantitative) for acceptance into any Graduate School program. The Rosenstiel School does not have a minimum score requirement of its own (other than the UM minimum) for the verbal and quantitative sections, but most admitted applicants score approximately in the 80th percentile or better. In addition, applicants must have a minimum of 3.5 on the analytical writing section.
• It is only recommended, not required, that applicants to the Graduate Program in Marine Biology and Ecology submit the score of the Subject Test in Biology.

**Official TOEFL or IELTS Score Report (International Applicants Only)**
• International applicants whose native language is not English must submit official results of the Test of English as a foreign language (TOEFL): http://www.ets.org/toefl/ (https://www.ets.org/toefl/) using institution code 2919 or the International English Language Testing System (IELTS) http://www.ieltsgov.org/ (https://www.ielts.org/) using institution code 4862. There is no department code for either score submission.
• An exception to this rule is an international student who will have earned a US degree prior to enrollment at RSMAS.
• A minimum score of 550 (paper-based test), 213 (computer-based test), 80 (iBT), or 6.5 for the IELTS is required for admission.

**Additional Supplemental Documents**
• **Ph.D. Applicants with a Prior Master’s Degree**
  • Students applying to the Ph.D. program with a prior Master’s degree must include with their application an abstract of the thesis or reprints or manuscripts of scientific work. Applicants can email this to gso@rsmas.miami.edu. (gso@rsmas.miami.edu)
• **Financial Documents**
  • Applicants who have already secured an external fellowship, scholarship, sponsorship or other funding to finance the degree should email financial documents directly to gso@rsmas.miami.edu.

Curriculum Requirements

The applicable requirements will be those in effect during that academic year when the student first registered in the Program, unless stated otherwise in the OCE Handbook or by the OCE Graduate Program Director. Any uncertainties regarding the procedures and requirements should be clarified with the OCE Graduate Program Director and the RSMAS Graduate Studies Office (GSO).

All RSMAS courses are listed on the RSMAS website. Students should consult their advisors and the OCE Graduate Program Director regarding their choices of courses; courses taken by students should be approved by their advisors. Any deviations from the requirements listed below must be approved by the advisor and the OCE Graduate Program Director.

OCE students follow one of four academic tracks: Ocean Dynamics, Air-Sea Interaction and Remote Sensing, Marine Biogeochemistry, or Biophysical Interactions.

### Ocean Dynamics Track

Total Credit Hours 60

1. Minimum of 27 course credits and 12 dissertation credits.
   - Minimum of 9 course credits should be taken from 700-level courses.
   - Required courses are normally taken during the student’s first full year of study (beginning in the fall semester). The Comprehensive Examination will focus on the required courses.

2. The remaining course credits can be obtained by taking other graduate courses offered at RSMAS or, with permission of the advisor, at other departments of UM.

3. All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee comprised of the OCE Graduate Program Director and the instructors (or their assignees) of the required courses taken by the students.
   - The purpose of this examination is to evaluate students’ understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.
   - The comprehensive examination consists of oral and written components.
     - The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed-book questions on the material covered in up to four of the required courses taken by each student (to be selected by the student and the OCE Graduate Program Director if the student’s academic track has more than four required courses).
     - The oral component, which lasts no longer than 2 hours for each student, may include questions related to all the courses taken by the student.
   - Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.
   - The outcome of the exam, which is determined by the Comprehensive Examination Committee, is based on the student’s performance on this examination, together with consideration of the student’s first year academic record. Possible exam outcomes are:
     - PhD-Pass: Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, they may complete a M.S. degree before pursuing a Ph.D.
     - MS-Pass: Students with this result are required to defend a M.S. thesis and get approval from their M.S. committee before pursuing a Ph.D.
     - Fail: Students with this result will have an opportunity to re-take the exam once.
   - A grade of PhD-Pass is required for Ph.D. students.
     - Ph.D. students earning a grade of MS-Pass may pursue a Ph.D. after completing the M.S. degree, subject to approval by their M.S. Committee.
Ph.D. students are expected to take the qualifying examination and dissertation proposal defense by the end of their third full year in the program. If a student needs to take the qualifying examination after that time, they will need to provide a written explanation to, and get approval from, the OCE Graduate Program Director.

The qualifying examination consists of a written and an oral component.

- While the exact format is left to the discretion of the Ph.D. Committee, a typical written qualifying examination consists of take-home questions from all Committee members, which need to be completed within three days. The questions are usually related to the research described in the dissertation proposal.
- A typical oral qualifying examination consists of an hour of questions based on the written questions and other related questions, and a second hour in which the student presents their dissertation proposal. It is recommended that the presentation emphasizes future work rather than a review of previous results, which are in the written dissertation proposal.

- Expectations of the Qualifying Examination:
  a. **Written Examination**: The student’s written answers should be judged by Ph.D. Committee members to demonstrate that the student has adequately addressed each question.
  b. **Oral Examination**: The student should demonstrate the ability to express themselves clearly while providing satisfactory responses to questions raised by the Ph.D. Committee that relate to the written examination questions, and any other questions asked by Committee members.
  c. **Dissertation Proposal**: The dissertation proposal should be written by the student in clear English. The Proposal should demonstrate the student’s capability to produce and present research of a quality that, when completed, is suitable for submission to a peer-reviewed journal. Emphasis should be placed on the proposed research: the questions and hypotheses to be tested, the data and methodology used to test the hypotheses, and some anticipated results (which may or may not be realized). A student is encouraged to discuss the Proposal with their advisor before submitting it to all Ph.D. Committee members.

- Possible Outcomes of the Qualifying Examination:
  - **Pass**: Meets all expectations.
  - **Fail**: Unsatisfactory written dissertation proposal or unsatisfactory oral proposal defense.

In some cases, the Ph.D. Committee may require revisions to a proposal or question/answer, or a retake of the oral part of the qualifying examination. Normally there is no need to retake the entire qualifying examination or have an additional full Ph.D. Committee meeting in such cases.

- Regular attendance of the COMPASS seminar series (combined OCE, MPO, ATM seminar series) is expected; each student is required to attend at least 10 seminar sessions per semester.
- In the same seminar series, each Ph.D. student is expected to give at least one 15-minute presentation each year after passing the comprehensive examination and at least one 45-minute presentation before defending the Ph.D.

- Ph.D. students are expected to be a Teaching Assistant (TA) for two courses while pursuing their degree.
- The mandatory TA program will include training of new TAs, evaluation of their performance, and recognition of excellence. The goal is to make the experience as valuable as possible for the TA, the faculty, and the students taking our courses.
- A training session and two teaching opportunities are offered as courses in educational training (RSM 771, RSM 772, RSM 773). Students will be registered accordingly.
- Specific requirements for TAs are outlined in the RSMAS Student Handbook.

The OCE Ph.D. degree requires 60 total credits. 1

1. The OCE Ph.D. degree requires 60 total credits.
The qualifying examination consists of a written and an oral component.

**Oral Examination:**
- Expectations of the Qualifying Examination:
- A grade of Ph.D-Pass is required for Ph.D. students.
- Ph.D. students earning a grade of MS-Pass may pursue a Ph.D. after completing the M.S. degree, subject to approval by their M.S. Committee.

**Written Examination:**
- The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed-book questions on the material covered in up to four of the required courses taken by each student (to be selected by the student and the OCE Graduate Program Director if the student’s academic track has more than four required courses).
- The oral component, which lasts no longer than 2 hours for each student, may include questions related to all the courses taken by the student.
- Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.

The outcome of the exam, which is determined by the Comprehensive Examination Committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
- **PhD-Pass:** Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. if the student chooses to, they may complete a M.S. degree before pursuing a Ph.D.
- **MS-Pass:** Students with this result are required to defend a M.S. thesis and get approval from their M.S. committee before pursuing a Ph.D.
- **Fail:** Students with this result will have an opportunity to re-take the exam once.
- A grade of PhD-Pass is required for Ph.D. students.
- Ph.D. students earning a grade of MS-Pass may pursue a Ph.D. after completing the M.S. degree, subject to approval by their M.S. Committee.

**Possible Outcomes of the Qualifying Examination:**
- **Pass:** Meets all expectations.
- **Fail:** Unsatisfactory written dissertation proposal or unsatisfactory oral proposal defense.

The OCE Ph.D. degree requires 60 total credits.  

1. Minimum of 27 course credits and 12 dissertation credits.  
   - Minimum of 9 course credits should be taken from 700-level courses.  
   - Required courses are normally taken during the student's first full year of study (beginning in the fall semester). The Comprehensive Examination will focus on the required courses.

2. The remaining course credits can be obtained by taking other graduate courses offered at RSMAS or, with permission of the advisor, at other departments of UM.

3. All M.S. and Ph.D. students are required to take the comprehensive examination. For full-time students, the comprehensive examination should be taken before the end of their first full year of graduate studies at RSMAS. This examination will be arranged by a Comprehensive Examination Committee comprised of the OCE Graduate Program Director and the instructors (or their assignees) of the required courses taken by the students.

4. The purpose of this examination is to evaluate students' understanding of materials in the required courses, and their ability to integrate and apply these materials. The outcome of the comprehensive examination determines whether students are permitted to proceed to the M.S. or Ph.D. program.

5. The comprehensive examination consists of oral and written components.

6. The oral component, which lasts no longer than 2 hours for each student, may include questions related to all the courses taken by the student.

- The written component, which lasts no longer than 8 hours, consists of a combination of open- and closed-book questions on the material covered in up to four of the required courses taken by each student (to be selected by the student and the OCE Graduate Program Director if the student's academic track has more than four required courses).

- Students and advisors will receive feedback from the comprehensive exam committee on the strengths and weaknesses of the student, and possible recommendations on how to address those.

- The outcome of the exam, which is determined by the Comprehensive Examination Committee, is based on the student's performance on this examination, together with consideration of the student's first year academic record. Possible exam outcomes are:
  - **PhD-Pass**: Students with this result may bypass the M.S. degree and start working toward earning a Ph.D. If the student chooses to, they may complete a M.S. degree before pursuing a Ph.D.
  - **MS-Pass**: Students with this result are required to defend a M.S. thesis and get approval from their M.S. committee before pursuing a Ph.D.
  - **Fail**: Students with this result will have an opportunity to re-take the exam once.

- A grade of **PhD-Pass** is required for Ph.D. students.

- Ph.D. students earning a grade of **MS-Pass** may pursue a Ph.D. after completing the M.S. degree, subject to approval by their M.S. Committee.
Mission
The Department of Ocean Sciences (OCE) seeks to advance knowledge and understanding of physical, chemical and biological processes in the oceans. We train graduate students and young scientists to be leaders in ocean-science-related fields. With distinct strengths in ocean dynamics, air-sea interactions and remote sensing, ocean biogeochemical cycles, biophysical interactions and coastal processes, we strive to achieve excellence in research and education. We seek to promote, among the public and policy makers, responsible science-based stewardship of the oceans. Our program commits to inspire graduates to continued scholarship, service, and innovation in an environment that is inclusive and diverse.

Goals
To train graduate students and young scientists to be leaders in ocean-science-related fields.

Student Learning Outcomes
- Proof of Fundamental Knowledge: Students will demonstrate a broad understanding of fundamentals of ocean science and an awareness of how scientific research in their topical areas relate to current societal issues.
- Capability to Explain and Defend Own Work: Students will demonstrate a comprehensive understanding of their field of work and the ability to explain their work and defend their results in oral and written communication in a way adequate for a continuing academic career and for employment as a highly qualified research scientist or equivalent professional level scientist.
- Capability to Give Short Presentations: Students will demonstrate the ability to explain their work and defend their key results in a short oral presentation in a competitive environment similar to a session at a scientific conference or a professional project meeting.

Medicine
Overview

Biochemistry and Molecular Biology are sciences at the epicenter of modern biomedical research. Understanding basic biochemical pathways is key to gaining new knowledge for the prevention and combating of disease, allowing for the expansion of current boundaries in medicine and science. In addition to medical applications, molecular biology is indispensable for the development of tools implemented for environmental and bionanotechnology problems. The Department of Biochemistry and Molecular Biology (BMB) at the University of Miami is committed to maintaining our discipline as a central science and strives for excellence by sustaining the current areas of strength, fostering interdisciplinary and clinical translational research, and expanding the research portfolio to evolving areas of inquiry and discovery. Our expertise in RNA biology, understanding DNA stability and repair, studying the biophysical nature of biomolecules, and gaining insight into cellular signaling pathways has been recently expanded by the arrival of researchers specialized in the design of natural and semi-synthetic biomolecules, as well as molecular-based devices that can be employed in translational medicine and other bionanotechnology applications. The commitment of the Miller School to increase growth in the basic sciences will continue to provide our department with new and exciting opportunities to enhance our prominence in biomedical research.

A chief mission of our department is to educate future generations of investigators and medical students to become critical thinkers and the leaders in their fields. The diverse composition of our department in regards to research interests creates a unique and intellectually stimulating learning environment for students at the undergraduate, graduate, and postgraduate levels. We offer a host of courses to fulfill the curriculum to obtain a BS in Biochemistry, a MS and a PhD in Biochemistry, as well as the basic science requirements for MD and MD / PhD students. Our courses address the basic principles of biochemistry and molecular biology as well as the emerging science and future of the fields.

The department serves the worldwide scientific community through leadership roles and active participation in national and international conferences, serving in study sections and on federal agency panels. Additionally, our department’s faculty roster encompasses editors of journals and members of editorial boards, as well as board members of national and international governmental centers and members of advisory boards of companies in the private sector. Moreover, the Department is committed to serve the community by participating in a variety of outreach events to promote awareness of the importance of science and technology in relation to public health and the environment.

Our department is also unique for hosting the internationally recognized annual Miami Winter Symposium, created by Professor William Whelan, the first leader and Chair of the Department. The Miami Winter Symposium is currently managed by Nature Publishing and features world-renowned speakers in emerging areas of science and technology. This event cements our department’s goal of furthering education and discovery in biochemistry and molecular biology on an international level.

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive Candidates Will Have the Following:

- Excellent academic record
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants Must Submit the Following:

- Online Application
- Application Fee
- Official Academic Transcripts
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found online (http://biomed.med.miami.edu/apply/).
Master's Programs
• M.S. in Biochemistry and Molecular Biology (p. 2492)

Doctoral Programs
• Ph.D. in Biochemistry and Molecular Biology (p. 2496)
• Executive Ph.D. in Biochemistry and Molecular Biology (p. 2490)

BMB 601. Research Journal Club. 1 Credit Hour.
All MS students must participate in the BMB Journal Club course. In this course, pre-doctoral trainees are required to critically review published paper(s) of their choice in the BMB topic area in Fall semester and present their research findings in Spring semester. The MS students will participate in this course and will write summary of the presentation.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 605. Principles of Biochemistry and Molecular Biology. 3 Credit Hours.
This course is divided into three parts. Part 1, examine the biochemical composition and structure of the four basic types of biological macromolecules: (i) carbohydrates, (ii) nucleic acids, (iii) proteins, and (iv) lipids. In addition, students will learn the composition and function of dietary nutrients and vitamins. Part 2, study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. A particular emphasis will be towards understanding control of gene expression by various epigenetic and signaling mechanisms. Part 3, learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 610. Advanced Topics in Biochemistry and Molecular Biology. 3 Credit Hours.
This is a special-topics course for graduate students and advanced undergraduate students. This course will focus on nanotechnology and its applications in medicine. This course offers an introductory concept of an interdisciplinary field of nanotechnology for students with physical, chemical, biological, medical, and engineering background. This course will be focused on nanomaterials, engineering of nanomaterials, cellular and intracellular interactions of nanoparticles, nanotechnology-based drug delivery systems, nano-based diagnosis, nanotoxicology, and clinical translational aspects of nanomedicines. Unique properties, which are offered by the materials at the nanoscale, will be discussed. Nanotechnology in sensing and diagnostics will be discussed. The topics to be discussed are of considerable interest across a broad range of areas in medicine, chemistry, biology, physics, pharmacy, medicine, mathematics, and engineering.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 612. Human Genetics. 3 Credit Hours.
This course will provide the learner with greater knowledge and current understanding the human genome, the mechanisms by which variations and environmental factors contribute to human phenotypes. Examples of potential topics include chromosome aberrations, phenotype-genotype correlations, cytogenetics, multifactorial traits, population genetics, risk assessment, multi-generation Epigenetics, reprogramming and gene therapy. Importantly, students will learn the new developments in Epigenetics. Epigenetics is considered by many to be the “new genetics”. The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. This course will discuss the overwhelming evidence of the contribution of non-genetic factors, such as nutrition, environment, and chemical exposure, on gene expression.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 614. Molecular Genetics. 3 Credit Hours.
There are 4 major sub-disciplines of genetics. This course will focus on the first three and leave assessment of quantitative traits as needed for students work. The sub-disciplines include, 1. transmission genetics: basic principles of genetics and how traits are passed from one generation to the next. 2. Molecular genetics: the chemical nature of genes and genomes; how genetic information is encoded, replicated, and expressed. It includes the cellular processes of replication, transcription, and translation - by which genetic information is transferred from one molecule to another – and gene regulation - the processes that control the expression of genetic information. 3. population genetics: the genetic composition of groups of individual members of the same species and how that composition changes over time and geographic space, and 4. quantitative genetics: deals with phenotypes that vary continuously (in characters such as height or mass) – as opposed to discretely identifiable phenotypes and gene-products (such as eye color, or the presence of a particular biochemical).
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.
BMB 615. Structural Biology and Applications to Drug Discovery (Masters). 2 Credit Hours.
This course provides an introduction to structural biology and illustrates how understanding the relationship between structure and function of biological macromolecules drives drug discovery. The course will be in three parts, with the first covering experimental and computational tools of structural biology – X-ray crystallography, cryo-electron microscopy and molecular modeling. The second part of the course will look at examples where structural biology has influenced drug design. The final part of this course will look at structures of nucleic acid (DNA and RNA) binding proteins and how they inform drug discovery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 617. Readings in Molecular Biology. 1 Credit Hour.
Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 618. Scientific Communications & Journal Review. 2 Credit Hours.
This course will train students in how to communicate science to different audiences. The lectures will focus on training students on how to make effective power point and poster presentations. Lectures will also guide on how to write manuscripts and grant applications. Training in data science as well as patents and inventions will be provided. Students will get understanding on academic career. Each student will prepare presentation on their research and will be guided by the instructor on how to improve it.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 619. Epigenetic Control of Gene Expression. 4 Credit Hours.
This course will provide thorough understanding of Epigenetics and the interaction of nutrients and the epigenome. Epigenetics is considered by many to be the new genetics because of the overwhelming evidence of the contribution of non-genetic factors such as nutrition, environment, and chemical exposure on gene expression. The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. Aberrations of epigenetics influence many diseases for which clinical intervention is already in place, and many novel epigenetic therapies for cancer, immune disorders, neurological and metabolic disorders, and imprinting diseases are on the horizon.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

BMB 630. Research in Biochemistry and Molecular Biology I. 1-9 Credit Hours.
This will form the most significant portion of the MS student’s degree program. Students will perform research with a mentor that they choose depending upon their research interest. A committee consisting of 3 faculty from the graduate program will be formed to evaluate student for the final oral comprehensive examination. The final oral exam will be scheduled in the last semester of the study. This oral comprehensive exam will involve the review of all experimental data and the entire presentation. During the examination, the mentor is responsible for allotting appropriate time for questions by all participants. Students are expected to understand the significance of their findings, display adequate knowledge of the relevant literature and know the theory and limitations of methods employed. Students must demonstrate the ability to independently design, execute and interpret original experiments. This group will make a decision to pass or fail a student’s oral comprehensive exam.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 631. Independent Studies in BMB Scientific Research. 1-6 Credit Hours.
The overall goal of the BMB research is to provide students with an opportunity for independent learning with exposure to scientific research. Special work, lecture, laboratory experience, or a combination of any of these, as determined by the student advisor in accord with the student’s individual scientific interest.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 632. Internship in Biochemistry and Molecular Biology. 1-9 Credit Hours.
Through this course, students in the industrial track will participate in an internship in industry. The students’ mentor/course instructor will help in identifying internship opportunities for students and monitor their progress.
Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
BMB 633. Capstone project in Biochemistry and Molecular Biology. 1-3 Credit Hours.
This course will help students learn how to prepare presentations as well as write reports and publications. Students will also learn about the latest advances in the biochemistry field and upcoming topics of interest to the field to help them prepare for their careers. Students will write a report-based on the industrial internship. They will also prepare a presentation about the work performed. The students' mentor/course instructor will provide guidance as needed in writing the report and presentation.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 641. Essentials of Biotechniques I. 1 Credit Hour.
Students will be introduced to variety of techniques used in biotechnology research. The course will be a combination of lectures and hands-on technique experience. The course will teach students both traditional and new techniques used in BMB.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

BMB 642. Essentials of Biotechniques II. 3 Credit Hours.
Students will be introduced to variety of techniques used in biotechnology research. The course will be a combination of lectures and hands-on technique experience. The course will teach students both traditional and new techniques used in BMB.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

BMB 645. Research Problems in Biochemistry, Cell and Molecular Biology. 2-3 Credit Hours.
Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 680. Responsible Conduct of Research. 1 Credit Hour.
In this course, ethical case studies are discussed, and an introduction to laboratory management is provided. Short lectures and discussion are conducted to provide students with the ability to tackle dilemmas and pitfalls associated with the responsible conduct of research. Information is provided on regulatory requirements of conducting research, including safety issues and the use of humans, animals, and radioactive/bio hazardous material. The obligations of scientists with respect to public policy and advocacy are also discussed. In addition, students will participate in an online RCR training course (RST-401/501/601 sections) offered by the Collaborative Institutional Training Initiative (CITI) Program at UM. A CITI Program RCR course typically requires around 4 hours to complete. These students receive an “S” (satisfactory) grade for a CITI RCR course after the completion of the online module. This online training course will serve as yearly continuation of RCR training after completion of the Research Ethics course. Additionally, every semester faculty in the department present a seminar related to topics in research ethics. Students also attend an online training in RCR. Several professional skills workshop such as grant writing workshop, career workshops, and seminars by professional scientists related to career are organized by the BMB department as well as the Office of Graduate studies. Students will attend these series of events.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

BMB 701. Research Journal Club.. 1 Credit Hour.
All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 702. Biochemical Science Seminar. 1 Credit Hour.
The Biochemistry and Molecular Biology (BMB) department has an active seminar program that meets on every Friday at noon. In this program seminars are presented by the BMB faculty (primary and secondary), invited speakers within the University of Miami and from other universities, government agencies, and industry. All BMB Graduate Students enrolled in this course will be required to attend this seminar and will have informal interactions with speaker, and exchange ideas at lunch on the seminar day.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
BMB 705. Principles of Biochemistry and Molecular Biology. 3 Credit Hours.
This course is divided into three parts. In Part 1, you will examine the biochemical composition and structure of the four basic types of biological macromolecules: (i) carbohydrates, (ii) nucleic acids, (iii) proteins, and (iv) lipids. In addition, you will learn the composition and function of dietary nutrients and vitamins. Most important, you will be introduced to nature's catalytic substances termed "enzymes", paying special attention to their mechanisms of action and regulation. In Part 2, you will study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. Here, you will give particular emphasis towards understanding control of gene expression by various epigenetic and signaling mechanisms. In Part 3, you will learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials. You are expected to finish this course with rigorous understanding of the biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids. This will enable you to read and understand advancing topics and applications in a vast array of biomedical specialties.

Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 709. Advanced Biochemistry and Molecular Biology. 3 Credit Hours.
This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 710. Advanced Topics in Biochemistry and Molecular Biology. 1-5 Credit Hours.
This course is offered by various faculty members in the department on a rotating basis depending upon their expertise. For example, an advanced topic course in Nanomedicine offered by Dr. Deo and Dr. Dhar covers these topics through lectures.

Components: DIL.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 711. Best Practices in BMB Instruction. 1-3 Credit Hours.
Graduate students in the basic sciences will explore different approaches to science course development, implementation and assessment. This includes identifying gaps in the curriculum, creating classroom structure that reflects the content and execution of classroom activities, identifying and gathering appropriate material from the primary research literature, instructing undergraduates in how to become highly interactive self-directed learners, providing formative feedback to improve student achievement throughout a course, proper design and implementation of assessment tools, student communication, classroom management and ethics.

Components: DIS.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 712. Human Genetics. 3 Credit Hours.
This course will provide the learner with greater knowledge and current understanding the human genome, the mechanisms by which variations and environmental factors contribute to human phenotypes. Examples of potential topics include chromosome aberrations, phenotype-genotype correlations, cytogenetics, multifactorial traits, population genetics, risk assessment, multi-generation Epigenetics, reprogramming and gene therapy. Importantly, students will learn the new developments in Epigenetics. Epigenetics is considered by many to be the "new genetics". The effects of epigenetics are vast, including tissue/organ regeneration, X-chromosome inactivation, and stem cell differentiation and genomic imprinting and aging. This course will discuss the overwhelming evidence of the contribution of non-genetic factors, such as nutrition, environment, and chemical exposure, on gene expression.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 714. Molecular Genetics. 4 Credit Hours.
This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic implementation, recombination, suppression, transposition, conjugation, transformation, transduction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, Drosophila, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in bio-medical research.

Components: DIL.
Grading: GRD.
Typically Offered: Spring.
BMB 715. Structural Biology and Applications to Drug Discovery. 2 Credit Hours.
This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the discoveries of new drugs.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BMB 716. Bioinformatics of Gene Regulation and Protein Function. 3 Credit Hours.
Among the skills required to become a successful interdisciplinary life scientist is the ability to navigate biological databases to better understand gene and protein function. Genome sequences contain the signals that guide differential gene expression and encode structural RNAs, regulatory RNAs and proteins. This course will introduce the tools, databases and evolutionary considerations that help us understand the regulation of gene expression and predict protein function. The biochemical and regulatory functions encoded in genomic DNA sequences will be explored using bioinformatics techniques including gene finding, BLAST searches, PubMed searches, high-throughput dataset mining, multiple alignments, phylogenetic analysis, identification of conserved functional domains and motifs, assessment of protein-protein and protein-ligand interactions, gene context and co-occurrence analysis, secondary and tertiary structural analysis, metabolic and cellular modeling, and phenotypic analysis. The databases, tools and tutorials available at websites developed by the National Center for Biotechnology Information, EMBL-EBI, the Protein Data Bank, and others will be used as supporting course materials. Each week will have a set of online videos and instructions to complete before the weekly live lecture. The live lecture consist of a one hour slide presentation and one half-hour of Q&A discussions. Competency in bioinformatics will be assessed by a midterm and a final exam.
Components: DIL.
Grading: GRD.
Typically Offered: Fall.

BMB 717. Nutrients, Enzymes, and Metabolic Flux. 3 Credit Hours.
Students learn how macronutrients (carbohydrates, protein, and lipids) and (ii) micronutrients (vitamins and minerals) are obtained in the diet, digested, absorbed, and assimilated. Then, students learn to formulate mechanisms of enzyme catalysis and inhibition. Such analytical skills are then used to more rigorously examine enzymes that control specific points of metabolic flux. Students finish this course with thorough mechanistic understanding of (i) macronutrient composition, intake, and energy production and (ii) requirements of micronutrients and hormones in controlling metabolic balance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BMB 718. Scientific Communication. 3 Credit Hours.
This course will train students in how to communicate science to different audiences. The lectures will focus on training students on how to make effective power point and poster presentations. Lectures will also guide on how to write manuscripts and grant applications. Training in data science as well as patents and inventions will be provided. Students will get understanding on academic career. Each student will prepare presentation on their research and will be guided by the instructor on how to improve it.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 719. Fundamentals of Epigenetics. 3 Credit Hours.
The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic variations, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary components. Students learn how to gather information about course topics and present their findings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

BMB 720. Research in Residence. 0 Credit Hours.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

BMB 731. Special Work. 1-3 Credit Hours.
Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student's individual interest.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
BMB 810. Master’s Thesis. 1-6 Credit Hours.
The student working on his/her master’s thesis enrolls for this credit. In most departments not to exceed six credits, as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

BMB 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BMB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by the Office of Graduate and Postdoctoral Studies.
Components: DIL.
Grading: SUS.
Typically Offered: Fall & Summer.

BMB 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Executive Ph.D. in Biochemistry and Molecular Biology
Overview

There are three different tracks in which students may enter and progress towards award of the Ph.D in Biochemistry and Molecular Biology. The first track involves admission through the Program in Biomedical Sciences (PIBS). Alternatively, students may apply and be directly admitted to the PhD program. Finally, the Executive PhD allows students to complete coursework and perform research at their place of work. In all cases, students are assisted in tailoring a program to match his or her interests. In general, students complete courses offered in a variety of formats, e.g., formal lectures, seminars, and workshops. Each BMB graduate program’s curriculum is designed to provide broad knowledge in the various aspects of molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student’s interests.

Mission
In agreement with the overall mission of both the University of Miami and the Miller School of Medicine, the BMB Executive PhD program strives to provide superior training in biochemical and molecular biological research and education to industrial and/or government laboratory professionals seeking a PhD degree. After the successful completion of this program, individuals will have a unique perspective on fundamental biochemical problems, resulting in more career options and increasing the likelihood that they will make important contributions to scientific progress and society.

Goals
Student Learning Outcomes
• Students will demonstrate an overall knowledge and understanding of the core concepts in biochemistry and molecular biology, including the essential skills to conduct research in biochemistry and molecular biology.
• Students will demonstrate critical thinking skills, the capability to develop hypotheses, and the ability to evaluate their hypotheses, paying attention to responsible conduct of research as appropriate.
• Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

M.S. in Biochemistry and Molecular Biology
Overview
The Master of Science in Biochemistry & Molecular Biology is a full time, 30 credit program, designed to be completed in one year. This degree offers laboratory-based training in an intellectually stimulating learning environment with opportunities for students to become critical thinkers. Students are taught by faculty members who are leaders in the field of Biochemistry and Molecular Biology and span a broad area of research within the scientific community.

This program may be advantageous to those seeking hands-on laboratory & research experiences; a gap year before applying to medical programs; opportunities to enter the scientific workforce faster by gaining employable skills, or those wanting to be better prepared to apply for PhD and MSTP programs.

This degree may be optionally combined with a Master of Business Administration to enhance career options. The MBA portion of the sequential program may be completed in one year and consists of 44 MBA credits. The degrees must be obtained sequentially. The admission and degree process for the MBA is separate and conducted by the Miami Herbert Business School.

Admission Requirements
• In order to be admitted to this program, eligible students must have a Bachelor of Science degree in a basic science or related discipline.
• A cumulative grade point average of 3.0.
• Additionally, applicants are required to submit three letters of recommendation and a personal statement.
• Applicants who have not received a degree from a university in the United States will need to satisfy the English proficiency requirements by submitting valid TOEFL scores.

Full application instructions can be found online (http://biomed.med.miami.edu/apply/).

Curriculum Requirements
The requirements for graduation with MS degree include the following:
• Successful completion of 15 credit hours of required courses and 15 credit hours of research work totaling 30 credit hours.
• A final oral comprehensive examination of the research performed. A student failing the comprehensive may be allowed one opportunity to retake it if the student’s committee so advises. The re-examination may not be taken during the same semester or summer session and must be taken within one calendar year.

M.S. in Biochemistry and Molecular Biology and Master of Business Administration Joint Degree

Overview

Students can pursue a joint Master of Science in Biochemistry and Molecular Biology and Master of Business Administration degree program. Students will complete a total of 74 credit hours: 30 credit hours in the M.S. in BMB program and 44 credit hours in the M.B.A. program.

Admission Requirements

M.S. Admission Requirements and Process

- In order to be admitted to this program, eligible students must have a Bachelor of Science degree in a basic science or related discipline.
- A cumulative grade point average of 3.0.
- Applicants must submit scores of their Graduate Record Examination (GRE) or the Medical College Admission Test (MCAT). Competitive score is required with a minimum score of 50 percentile.
- Additionally, the applicants will be required to submit two letters of recommendation and a personal statement.
- Applicants who have not received a degree from a university in the United States should also satisfy the English proficiency requirements by submitting TOEFL scores.
- The applications will be evaluated by the MS Admission committee.

M.B.A. Admission Requirements and Process

- BMB MS program director will prescreen MS students to verify their good academic standing. A cumulative grade point average of at least 3.0 is generally required. The names of approved students will be communicated to the Director of Graduate Business Full-Time Programs at the Miami Business School.
- Applicants must obtain a combined GMAT score of at least 660 prior to admission to the MBA program.
- Application process. The logistics of the application process will follow the same process as that of MD-MBA and PhD-MBA program and is outlined below.
  - The first step is to submit an application via our application portal: https://www.applyweb.com/miamibus/index.ftl
  - Documents to submit:
i. Online application
ii. Official transcripts
iii. GMAT scores (a minimum of 660 score is required)
iv. Resume
v. 3 letters of recommendation
vi. TOELF/IELTS for international students

- Once the application is submitted and the supporting documents are attached the candidate is contacted for an interview with an admission advisor.
- The file is then submitted for decision by the committee.
- The candidate is notified of the decision via email and a mailed letter.

- Students must apply to the MBA program by March 15 each year.

**Ph.D. in Biochemistry and Molecular Biology**

**Overview**

There are three different tracks in which students may enter and progress towards award of the PhD in Biochemistry and Molecular Biology. The first track involves admission through the Program in Biomedical Sciences (PIBS). Alternatively, students may apply and be directly admitted to the PhD program. Finally, the Executive PhD allows students to complete coursework and perform research at their place of work. In all cases, students are assisted in tailoring a program to match his or her interests. In general, students complete courses offered in a variety of formats, e.g., formal lectures,
seminars, and workshops. Each BMB graduate program's curriculum is designed to provide broad knowledge in the various aspects of molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests.

Admission Requirements
Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive Candidates Will Have the Following:
- Excellent academic record
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants Must Submit the Following:
- Online Application
- Application Fee
- Official Academic Transcripts
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found online (http://biomed.med.miami.edu/apply/).

Spring
BMB 840 Doctoral Dissertation- Post Candidacy 2
BMB 850 Research in Residence 1

Total Credit Hours 62

Mission
Our aim is to produce graduates who are thoroughly versed in the field of Biochemistry and Molecular Biology and who have a flexibility of approach that will allow them to take full advantage of new developments and techniques in other areas of research in whatever direction their career might lead them.

Goals
To provide students with:

- Training in discovery research and state-of-the-art biomedical technologies by fostering unique and innovative research and collaborative interdisciplinary interactions among scientists of diverse backgrounds;
- An understanding of fundamental concepts in BMB and training to formulate and conduct original research;
- An ability to communicate research within the broad field of BMB as well as the community;
- Training to become independent investigators.

Student Learning Outcomes

- Students will demonstrate an overall knowledge and understanding of the core concepts in biochemistry and molecular biology, including the essential skills to conduct research in biochemistry and molecular biology.
- Students will demonstrate critical thinking skills, the capability to develop hypotheses, and the ability to evaluate their hypotheses, paying attention to responsible conduct of research as appropriate.
- Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

Biomedical Sciences
biomed.med.miami.edu

Overview
The University of Miami's Miller School of Medicine is a research powerhouse, achieving international recognition for breakthroughs and advanced knowledge in diabetes, cancer, spinal cord injury, AIDS, marine science, and many other areas. Our centers of excellence are continually ranked among the nation’s best, including Bascom Palmer Eye Institute, The Miami Project to Cure Paralysis, and the Diabetes Research Institute. And our new institutes such as Interdisciplinary Stem Cell Institute, Miami Institute for Human Genomics, and the Center for Computational Sciences will further enhance research. The research conducted here continues to enrich the quality of life for people worldwide.
Master of Science in Biomedical Sciences

MiBS is a full-time program that packs a core curriculum in biochemistry, molecular biology, cell biology and physiology, along with several optional courses in three customized tracks — Medicine, Research or Drug Discovery. Our courses are taught by the same faculty that teach our medical and graduate students and will be tailored to meet your needs. In addition, students participate in physician and clinical shadowing or directed research to prepare you for a career in the biomedical sciences.

PhD Programs in Biomedical Sciences

The University of Miami Miller's School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

- Biochemistry & Molecular Biology (http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology/)
- Cancer Biology (http://biomed.med.miami.edu/graduate-programs/cancer-biology/)

Masters Program

M.S. in Biomedical Sciences (p. 2502)

Doctoral Program

Programs in Biomedical Sciences (p. 2506)

M.S. in Biomedical Sciences

Overview

Our Master of Science in Biomedical Sciences (MiBS) program is a full-time program that packs a core curriculum in biochemistry, molecular biology, cell biology and physiology, along with several optional courses in three customized tracks — Medicine, Research or Drug Discovery. Our courses are taught by the same faculty that teach our medical and graduate students and will be tailored to meet your needs. In addition, students participate in physician and clinical shadowing or directed research to prepare you for a career in the biomedical sciences.

MiBS prepares recent undergraduates for medical or graduate school or a career in the biomedical industry. Our master’s degree is an ideal way to use your gap year to build credentials and experience to propel yourself to any advanced degree. Students will have access to include hands-on faculty advising and mentoring to help you do your best and submit compelling applications. Students can begin our gap year program after their spring graduation and finish in time to start medical or graduate school the following August.

Contact Information

Arun Malhotra, PhD (amalhotra@med.miami.edu), Graduate Program Director
Christopher Presley, MEd (exp995@med.miami.edu), Graduate Program Manager
305-243-8745
mibs@miami.edu

Admission Requirements

Applicants to the MiBS program should have a bachelor’s degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisites, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry and biochemistry are encouraged. Applicants can submit applications here (http://biomed.miami.edu/apply/apply-biomedical-sciences-masters/).
Competitive candidates will have the following:

- Excellent academic record of 3.0 GPA or above
- Competitive GRE, MCAT or DAT exam scores
- Three strong letters of recommendation
- Motivation to learn biomedical sciences
- Personal statement focused on educational interests and career goals

Mission
The Miller School of Medicine offers an intensive 10-month Master of Science in Biomedical Sciences (MiBS) designed to fit perfectly in your gap year.

Our courses are taught by the same faculty that teach our medical and graduate students and are tailored to meet your needs. In addition, students participate in physician and clinical shadowing and laboratory research to prepare them for a career in the biomedical sciences.

Goals
1. Students will learn about various science disciplines such as biochemistry, molecular biology, cell biology, and physiology.
2. Students will focus in any of the three customized tracks – Medicine, Research or Drug Discovery.
3. Students will participate in physician and clinical shadowing or directed research to prepare them for a career in the biomedical sciences.

Student Learning Outcomes
1. Students will draw from advanced biomedical knowledge within specific science disciplines to investigate fundamental processes and mechanisms of health and disease.
2. Students will be able to critically evaluate the scientific literature pertinent to the field of study.
3. Students will demonstrate research skills, including the development of sound hypotheses, design of experiments, and interpretation of results.
4. Students will apply quantitative reasoning and statistical analysis techniques in the exploration and testing of theories and hypotheses.
5. Students will demonstrate knowledge of current and emerging technologies in their respective field of study.
6. Students will demonstrate problem-solving skills in addressing specific research problems.
7. Students will apply laboratory skills such as planning of experiments, data acquisitions, data management, analysis and interpretation to a specific research problem.

MBS 600. Journal Club. 1 Credit Hour.
To develop insights into the practice of biomedical research and medical practice, MBS students will be required to attend one research seminar, journal club or grand round of their choice per week. Students will prepare a written summary of the main points discussed in each event attended, and these will be monitored by their faculty advisor.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MBS 601. Biochemistry for the Biosciences. 3 Credit Hours.
MBS 601 covers Biochemistry in three parts. In Part 1, you will examine the biochemical composition and structure of the four basic types of biological macromolecules: carbohydrates, nucleic acids, proteins, and lipids. This part also introduces enzymes, and the composition and function of dietary nutrients and vitamins. In Part 2, you will study how genetic information flows from its storage as DNA sequence to its expression as functional RNA and protein molecules. In Part 3, you will learn how metabolic pathways are used to convert food molecules into energy and chemical intermediates used for biosynthesis of our own cellular materials
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Summer.

MBS 602. Molecular Biology for the Biosciences. 3 Credit Hours.
To introduce students to the molecular basis of life, this course is organized around the “mother of all biological questions” – How does life arise from stochastic associations between molecules acting in networks? While the course is organized around origins of life, it actually presents the basic properties of living things, the composition and properties of biomolecules, and how each individual property arises through diffusion, mass action and affinity.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBS 603. Gross Anatomy and Histology. 3 Credit Hours.
Designed to cover topics such as gross anatomy, histology, embryology, and neuroanatomy.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MBS 604. Advanced Molecular and Cell Biology. 3 Credit Hours.
Structure, function, biogenesis of cellular organelles, and the cytoskeleton including its regulation and dynamic interactions are discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MBS 605. Cell Physiology. 2 Credit Hours.
General principles of cell physiology, chemical and physical structure of membranes, membrane transport and electrical phenomena, action potentials, muscle contraction, energy transduction, nerve impulse conduction and synaptic transmission.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 606. Human Physiology. 2 Credit Hours.
Physiology of the human nervous system. Physiology of vision, taste, and smell. Mechanoreceptors, nociception and pain. Spinal reflexes, hypothalamus, and autonomic nervous system.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 607. Human Cardiovascular Physiology. 2 Credit Hours.
Physiology of the human cardiovascular systems. Heart as a mechanical pump, electrical activity of the heart, vascular system, regulation of blood pressure and response to stress.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 608. Basic Pathobiology. 3 Credit Hours.
This course will cover essential nomenclature, causes of disease, cell injury and adaption, tissue regeneration and repair, and neoplasia. The pathogenesis of diseases in major organs will be presented.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 611. Mechanisms of Drug Action. 2 Credit Hours.
Mechanisms underlying the therapeutical and pharmacodynamic properties of pharmacological agents. Emphasis is placed on cellular and molecular aspects and the quantitative factors governing equilibration within multicompartment systems and drug control of nervous and muscular function in relation to therapeutic action.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 612. Structural Biology and Drug Design. 2 Credit Hours.
This course provides an introduction to structural biology, and illustrates how understanding the relationship between structure and function of biological macromolecules drives drug discovery.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 613. Biostatistics for the Biosciences. 3 Credit Hours.
This course introduces students to the fundamentals of statistics from a biomedical perspective, with an emphasis on the practical application of statistical tools and the R software package for analysis and interpretation of biological datasets.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MBS 614. Bioinformatics for Biosciences. 3 Credit Hours.
This course introduces graduate students to basic bioinformatics data retrieval and analysis as relevant to biomedical research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MBS 631. Laboratory Research or Physician Shadowing. 1-3 Credit Hours.
This course will consist of rotations (minimum 2-3 hours per week for each credit hour) in selected laboratories or shadowing with UMMSM physicians. Students will be rigorously monitored for progress by faculty advisors, and present their work at a rotation symposium at the end of the semester.
Components: EXP.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MBS 680. Professional Development Workshop. 1 Credit Hour.
Survival Skills, Responsible Conduct of Research (RCR), Learning Skills, Lab & Animal Safety, Collaborative Institutional Training Initiative (CITI), Ethics
Components: WKS.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MBS 700. Biomedical Internship. 1-3 Credit Hours.
Students may earn academic credit through a pre-approved internship related to biomedical sciences. Requires the creation of a learning contract between the MSOM, the students, and the internship host.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Programs in Biomedical Sciences
http://biomed.med.miami.edu/graduate-programs/programs-in-biomedical-sciences-pibs

Overview
Programs in Biomedical Sciences (PIBS) at the University of Miami Miller’s School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

First–year students take a core curriculum that builds a solid foundation in the biomedical sciences. The common coursework in the first semester ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. Students have the flexibility to select breakout sessions that match their interests. The core curriculum also offers critical learning opportunities in biostatistics, genomic and analytical tools. In the second semester, students select individual modular courses offered in our eight disciplines. These courses cover topics of specific relevance to graduate programs or research topics. Students also complete a course in Biostatistics and a workshop in BioInformatics.

PhD Program Selection
During their first year in the umbrella program, students complete three to four laboratory rotations in various disciplines. This opportunity allows students to explore their interests before selecting a program and dissertation mentor. Students match with mentors in specific programs and achieve program affiliation at the end of their first year in one of the following programs (for years two through five):

- Biochemistry & Molecular Biology (http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology/)
- Cancer Biology (http://biomed.med.miami.edu/graduate-programs/cancer-biology/)
- Human Genetics & Genomics (http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics/)
- Microbiology & Immunology (http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology/)
- Molecular & Cellular Pharmacology (http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology/)
- Molecular Cell & Developmental Biology (http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology/)
- Neuroscience (http://biomed.med.miami.edu/graduate-programs/neuroscience/)
- Physiology & Biophysics (http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics/)

PIB 700. Journal Club. 1 Credit Hour.
All PIBS students are required to attend one journal club or seminar each week.

Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.

PIB 701. Introduction to Biomedical Sciences. 1-5 Credit Hours.
This course surveys fundamentals of molecular and cellular biology that underly all modern biomedical research. Lectures are organized into modules that cover Proteins and DNA, Gene Expression, Signaling and Membranes, Cells, and Development. A final module covers immunology, organ systems, and genetics. Experimental techniques are emphasized throughout, with the first week of the course devoted to a bootcamp on common biomedical methods.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PIB 702. Scientific Reasoning. 3 Credit Hours.
This course teaches scientific reasoning by critical reading of primary research papers in a small-group setting. Multiple small groups are offered every week and students can choose from different topics related to lectures in the companion PIB 701 course. Research papers are discussed in two 1-hour sessions each week.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PIB 705. Biostatistics for the Biosciences. 3 Credit Hours.
This is an introductory course that will cover the basics of applied statistics. The course will emphasize a practical understanding of statistical concepts: the goal is to prepare you to be able to properly analyze and interpret data from your research, not to turn you into a statistician. As such, the structure of the course is designed to give you lots of hands-on experience with data and statistical software, and to teach you how to proceed when you encounter novel problems in the future (e.g., data that you're not quite sure how to analyze). An overall goal of the course is to prepare you to be able to intelligently assess the statistics commonly encountered in journal articles within your field and provide you with the fundamental skills required for more advanced statistical methods when you later encounter the need.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PIB 706. Informatics for the Biosciences. 3 Credit Hours.
PIB 706 is designed to teach problem solving using the Python programming language. No prior programming knowledge is needed. Students will learn to write their own original Python programs to parse, manipulate, and analyze big data sets containing genomic, proteomic, and structural information. As the course progresses, students will be encouraged to apply their emerging programming knowledge to tackle scientific problems of their interest. The course culminates with each student designing a final project related to their research. This is a hands-on course with in-class interactive programming. Therefore, students are required to have their own Mac or PC laptop in good working condition for every class—no exceptions.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PIB 731. Laboratory Research. 1-6 Credit Hours.
Laboratory rotations familiarize students with a variety of modern techniques in biomedicine and potential mentors for their dissertation projects. One credit is awarded per rotation.
Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PIB 780. Research Ethics. 1 Credit Hour.
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of scientific integrity. This program should be an integral part of the proposed training effort.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PIB 782. Professional Development: Skills for Success I. 1 Credit Hour.
This workshop will teach students the basics on how to: manage your career, choose a rotation lab / mentor, read a scientific paper, write a lab report and present in the journal club and lab meetings.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

PIB 783. Professional Development: Skills for Success II. 1 Credit Hour.
This workshop will teach students the basics on how to: write a fellowship and scientific paper as well as the proper and ethical handling of research data.
Components: LEC.
Grading: SUS.
Typically Offered: Spring.

PIB 784. Practical Graduate Teaching. 1 Credit Hour.
Senior graduate students have the opportunity to participate in Graduate School teaching by evaluating presentations, teaching in small groups, and mentoring first-year graduate students in the Program in Biomedical Sciences. The overarching goal is to prepare future academicians in the complex process of training accomplished, well-rounded scientists. The activities required from the students would be: Participate in the mentoring program; read and evaluate abstracts of PIBS student rotations; participate of PIBS rotation presentations, ask questions; provide feedback of rotation presentations (abstracts and oral) to PIBS students within small groups; and provide mentoring to PIBS students in PIB701 topics.
Prerequisite: PIB 701.
Components: FLD.
Grading: SUS.
Typically Offered: Fall & Spring.

PIB 785. PIBS Bioinformatics Workshop. 1 Credit Hour.
The aim of this workshop is to introduce graduate students to basic bioinformatics data retrieval and analysis as relevant to bio-medical research. The sessions will include discussion on focused topics and hands-on, project-based exercises. Only publicly available databases and web-tools will be used, no programming will be taught.
Components: WKS.
Grading: SUS.
Typically Offered: Summer.

PIB 830. Doctoral Dissertation. 1-12 Credit Hours.
Required for all PhD candidates. First-year students generally take one credit of doctoral dissertation in their first summer semester then continue in program specific dissertation credit through graduation.
Components: THI.
Grading: SUS.
Typically Offered: Summer.
Biostatistics

http://www.biostat.med.miami.edu/

Dept. Code: BST

Degree Programs

• Master of Science in Biostatistics (MS)
• Doctor of Philosophy in Biostatistics (PhD)

The Graduate Programs in the Department of Public Health Sciences at the University of Miami Miller School of Medicine are at the forefront of public health science with emphasis on research, education, and evidence based public health service. The Graduate Programs promote an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Public Health Sciences is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.

Masters Program in Biostatistics

• M.S. in Biostatistics (p. 2513)

Doctoral Program in Biostatistics

• Ph.D. in Biostatistics (p. 2515)

**BST 603. An Introduction to Probability Theory and Its Applications. 3 Credit Hours.**
This is an elementary introduction to probability theory. Its goal is to present the logic and the mathematics behind the theory, supply it with many examples and techniques, and to infuse these results in the student through many, many, exercises  
Requisite: Academic Plan: BSTS_PHD or BSTS_MS. 
Components: LEC. 
Grading: GRD. 
Typically Offered: Fall.

**BST 605. Statistical Principles of Clinical Trials. 3 Credit Hours.**
This course is designed for individuals interested in the statistical aspects of clinical trials. Topics include types of clinical research, study design, treatment allocation, randomization and stratification, quality control, sample size requirements, patient consent, and interpretation of results. This course will additionally cover strengths and limitations of alternative study designs such as quasi-experiments and observational studies. Common sources of bias in these alternative study designs will be described along with design approaches to minimize bias. 
Components: LEC. 
Grading: GRD. 
Typically Offered: Spring.

**BST 610. Introduction to Statistical Collaboration. 3 Credit Hours.**
This course gives students exposure to issues arising in biostatistics consulting and collaboration. Students will learn how to identify the scientific objectives of a study and to develop a statistical strategy appropriate for those objectives. The student will become familiar with problems arising in consulting situations, specifically relating to identification of study objectives and framing of research questions, study design, power and sample size determination and choice of analytical approach. The student will learn to communicate through presentation of oral and written reports, and through student and faculty critiques of these reports. This course is open only to MS and PhD Biostatistics students or instructor's permission. 
Requisite: Academic Plan: BSTS_PHD or BSTS_MS. 
Components: LEC. 
Grading: GRD. 
Typically Offered: Summer.

**BST 625. Survey of Statistical Computing. 3 Credit Hours.**
This three credit course aims to familiarize students with the basic use of SAS and R for routine statistical analysis and prepare them for more advanced courses and/or thesis research. Statistical computation will be illustrated with examples in medical research, biological study and business. The focus of the course is on the computing environment, therefore a thorough discussion of statistical theories will not be provided. It is expected that students will already be prepared statistically. 
Components: LEC. 
Grading: GRD. 
Typically Offered: Fall.
BST 630. Longitudinal and Multilevel Data. 3 Credit Hours.
This course offers students an introduction to linear and generalized linear models for the analysis of multi-level and longitudinal biomedical data. The course will also provide students with the opportunity to develop the skills necessary to perform analysis of these types of data using statistical software packages.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BST 640. Modern Numerical Multivariate Methods. 3 Credit Hours.
This course covers multivariate topics from both a classical as well as modern perspective. Topics to include: Multivariate Normal Distribution; Spectral Decomposition; Principal Component Analysis; Canonical Correlation Analysis; Newton's Method; Steepest Descent; Gradient Boosting; Coordinate Descent Algorithms; Trees; Forests; Discriminant Analysis. The R programming language (http://www.r-project.org) will be used extensively throughout the course for computation and statistical analysis.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BST 649. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: IND.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BST 650. Topics in Biostatistical Research. 1 Credit Hour.
The course consists of a series of research level presentations in contemporary biostatistics research (broadly defined) by diverse outside speakers as well as faculty in the Division of Statistics or in other units on campus who are hosting presentations in biostatistics research. The emphasis will be on new methodologies and new developments in existing methodologies. However, recent developments on the implementation and comparison of methodology and on data types may also be included.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

BST 660. Spatial Statistics. 3 Credit Hours.
Spatial data commonly arise from many fields including business, ecological, and health studies. This course will cover advanced techniques to tackle the spatial correlation. Topics include variogram estimation, spatial prediction, spatial point pattern analysis, estimating function based methods and others. Real data examples will be used to motivate and illustrate the use of the methods.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BST 665. Design and Analysis of Clinical Trials. 3 Credit Hours.
This first part of this course is an advanced treatment of the key ideas undergirding the design and analysis of contemporary clinical trials. By the end of the course, students will have learned the statistical foundations of Phase I, II, and III trials from the standpoint of classical Frequentist, Bayesian, and adaptive designs. In addition, students will learn the usual mechanisms for preparing a clinical trial protocol, data safety and monitoring, interim analysis, and proper close out of a trial.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

BST 670. Bayes Data Analysis: Theory and Computing. 3 Credit Hours.
This first part of this course is an advanced and comprehensive treatment of the foundations of Bayesian theory. Beginning with the Bayesian alternative to sampling theory, the course covers Savage's axioms, the standard Bayesian inference procedure, subjective Bayes interpretation and prior selection, the minimax and complete class theorems, a variety of Bayesian principles (likelihood, stopping time etc.), and a selection of standard parametric and non-parametric examples. The second part focuses on the computational implementation of Bayesian inference, namely Gibbs sampling, Metropolis-Hastings, and other Markov-Chain-Monte Carlo techniques for obtaining the posterior and posterior quantities. Computational examples will be illustrated using R and WinBUGS. Special topics will include approximate Bayes computing (ABC) and particle methods.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

BST 675. Intermediate Probability. 3 Credit Hours.
This course covers the basic foundations of probability to limit theorems at an intermediate level. Topics to include are events, random variables and their distributions, discrete and continuous random variables, generating functions, markov chains and convergence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
**BST 676. Introduction to Generalized Linear Models. 3 Credit Hours.**
This course provides a unifying framework for formulation, estimation and inference using generalized linear models and towards the end examines some modern day extensions. Throughout the course, real data applications from medicine will be used and extensive use will be made of the R programming language.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**BST 680. Advanced Statistical Theory. 3 Credit Hours.**
The first part of this course is a searching treatment of many of the key ideas undergirding hypothesis testing and estimation. In particular, several of the main theorems in mathematical statistics will be stated and proved in full detail. By the end of the course, students will have acquired enough background material for the treatment of a special topic, through a mix of lectures and assignments. Topics will include asymptotic expansions, information theory and non-parametrics.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**BST 690. Theory of Survival Analysis. 3 Credit Hours.**
Survival analysis is an important tool of statistic with many applications. In this course, without losing sight of such applications, we will give special emphasis to the probabilistic foundations, in terms of counting processes and martingales. Topics include: Failure time models, inference in parametric models, Cox models, counting processes and martingales, likelihood, competing risks and analysis of recurrent event data. The R programming language will be used.

**Prerequisite:** MTH 524, MTH 525, and BST 680.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**BST 691. High Dimensional and Complex Data. 3 Credit Hours.**
This course will cover some salient topics in high dimensional data analysis focusing on the uniqueness of the problem and discussing various analyses including error rate control methods, model based shrinkage, prediction, set analysis, cluster analysis, bump hunting and (if time permits), graphical models.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**BST 692. Data Science and Machine Learning for Health Research. 3 Credit Hours.**
BST 692 (3-credits) will teach computational data science techniques using end-to-end data processing pipelines. It will focus on applied data analysis problems that the faculty are actively trying to solve. Students will be presented with data that the faculty are working on and will be asked to apply programming knowledge that they have learned in previous classes. They will then study and apply new data acquisition, data processing, and machine learning methods to handle problems that are not well handled by the common techniques. The goal of the class is to give students the opportunity to deploy a complete data science pipeline. Students will apply their data acquisition and exploration skills to real world problems; study modern machine learning methods; contrast traditional and new methods to deal with large, complex and messy data; and learn to disseminate results through online, interactive displays.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Summer.

**BST 695. Special Topics. 3 Credit Hours.**
The course is designed to allow the listing of special topics within the Division of Biostatistics degree programs and cross list topics with other department's offerings.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.

**BST 830. Doctoral Dissertation (pre-candidacy). 1-12 Credit Hours.**
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 730 may be taken in regular semester, nor more than six in a summer session.

**Components:** THI.
**Grading:** SUS.
**Typically Offered:** Fall, Spring, & Summer.
BST 840. Doctoral Dissertation (Post-Candidacy). 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credits as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 740 may be taken in regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

BST 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the PhD, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.S. in Biostatistics
http://www.biostat.med.miami.edu/academics/ms-in-biostatistics/

Overview
The Master of Science (MS) in Biostatistics is an applied graduate program intended for students seeking training in applied biostatistics. The program emphasizes applications and understanding of statistical concepts rather than theoretical and mathematical principles. The program is meant to be a terminal degree providing students with the necessary background for applying good biostatistical practices in real-world settings. Students will gain practical skills that can be applied immediately to a variety of data settings, which includes, but not limited to, the biological life sciences public health, medical studies, and health services outcome research.

The degree consists of 33 credits in a 10-month period (3 semesters) covering introductory probability and mathematical statistics, regression modeling, statistical computing, design and analysis of clinical trials, survival analysis, machine learning and fundamentals of epidemiology and public health. Enrichment will be provided by a statistical practicum and a seminar course varying with special topics.

Pre-requisites include:
1. Introductory calculus
2. Introductory computing
3. Introductory statistics/biostatistics

Admission Requirements
- Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS.
- Transcripts – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.
- Standardized Test Scores - The Graduate Record Exam (GRE) is not required for the MS in Biostatistics degree program.
- English Proficiency Exam - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.
- Resume/Curriculum Vitae – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.
- Statement of Purpose/Personal Statement – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.
- Letters of Recommendation – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.
For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

Mission
The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

Goals
Upon completion of the Master of Science (MS) in Biostatistics degree, all graduates will be able to:

• Describe the core disciplines of public health and how they apply to improving population health.
• Apply statistical and epidemiological methods to the measurement and study of population health and the prevention of infectious and chronic disease.
• Describe concepts in probability theory, random variation and commonly used statistical distributions and mathematical statistics.
• Develop sample size and statistical power calculations for different study designs including those from clinical trials and observational studies.
• Perform a variety of basic and advanced statistical analyses methods (estimation and inference) including explanatory data analysis, graphical visual displays, analysis of variance (ANOVA), univariate and multivariable regression models, general linear modeling, multivariate analysis, survival analysis, design of experiments and clinical trials, machine learning techniques, various new techniques from statistical methods arising from applications, analyze cross-sectional and longitudinal data from observational and clinical trials.
• Apply quantitative and reasoning skills, as well as content-area knowledge, to analyze data from epidemiological, clinical, observational, laboratory, and experimental studies.
• Interpret results from explanatory and descriptive data analysis and advanced statistical analyses to draw relevant conclusions from data.
• Develop a high level of competency in statistical programming both with SAS and R for both managing and analyzing data from different sources.
• Communicate effectively by producing summary reports, statistical analysis sections of applied papers, graphical summaries and tabular summaries of the data.
• Interact with different public health, health care and medical and biomedical professionals to address statistical aspects of their research studies as a part of statistical consultation.
• Recognize potential ethical issues and implement the concepts of ethical conduct of research.

Student Learning Outcomes

• Students will develop and demonstrate effective written and oral communication skills in the presentation of public health information.
• Students will demonstrate mastery of applied statistical data analysis techniques.
• Students will develop and demonstrate the ability to make scholarly contributions to the biomedical sciences through effective statistical collaborating efforts.
• Students will master at least one statistical analysis software for data management and statistical analysis techniques.

Ph.D. in Biostatistics
Overview
The PhD in Biostatistics, offered through the Division of Biostatistics in the Department of Public Health Sciences at the Miller School of Medicine, provides a flexible curriculum to cover the basics.

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high-level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students. The PhD program consists of 37 credits of core coursework, 6 credits of introductory public health coursework, 12 credits of electives, and 12 credits of dissertation research for a total of 67 credits to complete the degree. PhD students are expected to pass a first-year written diagnostic exam at the end of their first year of study. A second oral and written exam will be administered at the end of the third year.

To obtain detailed program curricula on the PhD in Biostatistics, please visit our website. ([http://www.biostat.med.miami.edu/](http://www.biostat.med.miami.edu/))

Admission Requirements

• Application - Applicants must submit their application online through SOPHAS ([https://sophas.org/](https://sophas.org/)), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) ([https://www.aspph.org/](https://www.aspph.org/)). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MD/PhD programs must apply through AMCAS ([https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/](https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/)).

• Transcripts – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the
transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit a Graduate Record Exam, GRE general exam scores (http://www.ets.org/gre/revised_general/about/), taken within the last five years.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

BST 650 is taken for 1 credit in Fall and Spring during the first 2 years of study

Sample Plan of Study

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high-level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students.

The PhD in Biostatistics program consists of 37 credits of core coursework, 6 credits of introductory public health coursework, 12 credits of electives, and 12 credits of dissertation research for a total of 67 credits to complete the degree. Students complete structured coursework (core and elective credits) during the first three years of study. PhD students are expected to pass a first-year written diagnostic exam at the end of their first year of study. A second oral and written exam will be administered at the end of the third year of study.

This is a sample plan of study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine appropriate course selection.

Mission
The Doctorate Program in Biostatistics prepares students who have demonstrated excellence in mathematics, statistics, and the natural or social sciences to become research biostatisticians in academia, industry, or government positions, with a general focus on biostatistical applications, big data, and data science.

Goals
Upon completion of the doctoral degree in Biostatistics, all graduates will be able to:

• Describe the core disciplines of public health and how they apply to improving population health
• Apply epidemiological methods to the measurement and study of population health and the prevention of infectious and chronic disease
• Develop novel statistical methodology
  • identify the limitations of existing methodology and standard techniques for adapting existing methodology to new data settings
  • identify settings where techniques beyond modification of existing techniques are necessary (i.e. new methodology)
  • use advanced theory and computation to develop new methodology for addressing research problems in scientific settings
• Analyze complex data from biomedical, medical, informatics and public health settings with subject matter collaborators using cutting edge statistical techniques
  • read, understand and use the most recent literature in biostatistics
  • formulate a plan for data gathering, data management and statistical analysis
  • carry out plan effectively to answer questions of substantive interest in scientific settings
• Communicate findings verbally (with collaborators and at conferences) and in writing (journal articles)
  • prepare a seminar for presentation to statistical audiences
  • develop the skill of learning a substantive application when working with subject matter specialists
  • integrate statistical concepts into presentations for scientific audiences in forms that they will find useful and intelligible
  • prepare clear reports, analysis plans for grant applications and statistical sections of journal articles
• Demonstrate cognate field expertise
  • develop enough knowledge in a specific subject domain to communicate easily with scientists in that domain
  • use this background to formulate new biostatistical problems to solve (the dissertation is the primary example of this)
• Teach graduate students from statistics and biostatistics and public health
  • learn how to organize a large sequence of lectures so that they follow logically and provide an overview of a topic area in statistics or biostatistics
  • combine diverse teaching techniques and materials so that students with different learning styles can master the material
• Recognize potential ethical issues and implement the concepts of ethical conduct of research
Student Learning Outcomes

• Students will demonstrate an overall knowledge and understanding of the core concepts in biostatistics, including the essential skills to conduct research in biostatistics.
• Students will demonstrate critical thinking skills, the capability to develop conjectures, and the ability to make scholarly contributions.
• Students will demonstrate mastery of research competencies.

Cancer Biology

http://biomed.med.miami.edu/

Overview

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal, the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship, students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

The core course in Cancer Biochemistry and Molecular Biology is a prerequisite for all CAB courses. Other required courses include Tumor Biology, Translational to Clinical Research, Student Seminars, Special Topics in Cancer Research, Dialogues with Cancer Clinicians, and Logic and Reasoning in Translational Cancer Research. (Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology with permission of the CAB Director. After joining the program and choosing a research mentor, students formulate a proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.)

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

• Excellent academic record
• Competitive GRE exam scores
• Research experience in a laboratory setting
• Publications of abstract and / or papers
• Co-authorship in a peer-reviewed journal is recommended
• Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research

**APPLICANTS MUST SUBMIT THE FOLLOWING:**

• Online Application
• Application Fee
• Official Academic Transcripts
• GRE General Test
• English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume / CV

Full application instructions can be found online (http://biomed.med.miami.edu/apply/).

**Doctoral Programs**

• Ph.D. in Cancer Biology (p. 2522)

**Course Descriptions (Per Subject)**

**CAB 701. CAB Student Seminar. 1 Credit Hour.**

This course (required of 2nd and 3rd year students) offers instruction on the fundamental elements of scientific speaking. The ability to communicate effectively is essential for scientists. All CAB students are required to present their research each year as a 25 min (2nd year students) or 55 min seminar (3rd year and above). Students who are 4th year+ give seminars but are not enrolled.

**Components:** LEC.
**Grading:** SUS.
**Typically Offered:** Fall & Spring.

**CAB 705. Translational to Clinical Research. 1.00 Credit Hour.**

Beginning in the fall of their second year, students participate in "Translational to Clinical Research", which spans years two through four of the program. Students are introduced to clinical trials, pathology reviews, tumor boards, the protocol review process and have an opportunity to interact with physicians who care for cancer patients and conduct clinical trials. The student's Physician Mentor advises and directs the student in the most relevant activities to attend and discusses the student's experience with them every semester. Students are required to attend 2 meetings each semester for a total of 12 meetings in addition to discussion with their Physician Mentors. A short written report of each review meeting of the student's experience is required. Didactic seminars are not accepted.

**Components:** DIS.
**Grading:** SUS.
**Typically Offered:** Fall & Spring.

**CAB 710. Cancer Biochemistry & Molecular Biology. 3 Credit Hours.**

This is an entry-level lecture course designed to introduce students to the major concepts and principles of cell growth deregulation in cancer with a major emphasis on molecular mechanisms. Topics include: oncogenes, tumor suppressors, mechanisms of uncontrolled cell growth, receptors and intracellular signal transduction pathways.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**CAB 712. Special Topics in Cancer Research - Viral Oncology and Tumor Immunology Module. 2 Credit Hours.**

This module emphasized state of the art knowledge of each discipline, student participation in a problem based learning context. Topics include viral carcinogenesis and epidemiology, Hepatitis, Herpes, Epstein Barr and Human Papilloma Viruses, Kaposi's Sarcoma, viral induced lymphomas, viral oncolysis, and mechanisms of anti-tumor immunity.

**Components:** LEC.
**Grading:** SUS.
**Typically Offered:** Spring.

**CAB 713. Special Topics in Cancer Research - Molecular Cancer Therapeutics Module. 2 Credit Hours.**

This module explores the signal transduction pathways critical for cancer cell proliferation and survival that may provide new therapeutic targets, approaches for identification and validation of molecular targets within these pathways. Students are introduced to the strategies used in the discovery and design of biological and drug based therapies, and the implementation of clinical trials.
CAB 714. Integrated Cancer Epidemiology and Prevention and Biobehavioral Oncology. 2 Credit Hours.

This module explains the goals and techniques of researchers in the fields of bio-behavioral oncology and cancer epidemiology. The following themes in bio-behavioral oncology are explored: health behavior change in persons at risk for and diagnosed with cancer; adaptation to cancer diagnosis and treatment, psychosocial intervention, bio-behavioral processes, and quality of life (QOL); translation of behavioral and psychosocial intervention to the community; predictors of QOL and late effects of cancer treatment and development of preventative interventions.

The themes for cancer epidemiology and prevention include understanding the genetic, environmental, social, and biological reasons for cancer disparities among different populations. Cancer epidemiologists seek to define the molecular and genetic mechanisms of cancer risk and progression with the aim of developing predictive models in cancer risk and treatment response.

CAB 715. Special Topics in Cancer Research - Breast and Genitourinary Cancers Module. 2 Credit Hours.

This module highlights key aspects of the cellular and molecular mechanisms of breast, prostate, renal and bladder cancers as well as providing an overview of cancer detection, diagnosis, and therapy. Emerging research opportunities are identified. Topics include estrogen receptor and androgen receptor signaling, cancer progression, endocrine therapies and resistance. Key signaling pathways and the biology of metastasis will be discussed.

CAB 720. Dialogues with Cancer Clinicians (PIBS Module). 1 Credit Hour.

This module features physician mentors of the Cancer Biology Graduate Program who will discuss clinical aspects of cancer treatment with an emphasis on continuity of care of newly diagnosed patients between disciplines and will articulate unmet clinical needs and research. Mentors will provide clinical perspectives on their areas of specialization as it relates to patient care including diagnosis, staging, therapy, and outcomes.

CAB 750. Logic and Reasoning in Translational Cancer Research: Bench to Bedside Part 1. 3 Credit Hours.

An important facet of the Cancer Biology Ph.D. Program is the training of students in the interrelationships between basic research and clinical medicine, i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course is designed to help students integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. Students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis, and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic are emphasized. Students also learn the key role of clinical observation in identifying basic research problems.

CAB 830. Dissertation Research - Pre Candidacy. 2 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credits as determined by the Office of Graduate Studies but not less than a total of 24. Not more than six in the summer. If a student has a) passed qualifying exam(s) and b) is engaged in an assistantship, he/she may still take the maximum allowable credits.

CAB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all Ph.D. candidates. Grade will remain IP until student dissertation is accepted by Graduate School.
Ph.D. in Cancer Biology

Overview

The Sheila and David Fuente Graduate Program in Cancer Biology is a university-wide interdisciplinary training program that draws upon clinical and basic sciences from multiple departments and medical school divisions of the University of Miami.

The scientific focus is broadly cancer research with an emphasis on fundamental cellular processes, their deregulation in cancer, the identification of novel diagnostics and therapeutic targets. In addition to training in technical aspects, the curriculum places a strong emphasis on scientific reasoning as the most important and portable aspect of PhD training.

The cross-disciplinary training includes novel concepts and state-of-the-art techniques of molecular biology, biochemistry, genetics, genomics, proteomics, structural biology, cell biology, pharmacology, and molecular medicine. This training is integrated into the extensive clinical and translational research programs of the Sylvester Comprehensive Cancer Center (SCCC).

Research in Cancer Biology stands out by the scale and rate at which basic science translates into tangible changes in the treatment of patients. At the same time, information flows back rapidly from the clinic to direct the next frontier in basic science and innovation.

To make maximum use of this exciting research environment, scientists need training in the relevant clinical concepts to translate questions and research needs back into their own setting and engages in collaborative efforts. To facilitate this training, cancer biology graduate students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor provides a clinical perspective in cancer biology including issues of diagnosis, management, and treatment of cancer patients and clinical research.

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

**Total Credit Hours**: 61-63

Students are encouraged to take pertinent elective courses under guidance of their Dissertation Committee and research mentor. Electives must be approved by CAB graduate program director.

- **Required course credits**: 36 cr. [700 level courses (required or elective)]
- **Dissertation research**: 24 cr.

**Mission**

The Graduate Program in Cancer Biology offers graduate training leading to a Ph.D. in Cancer Biology. It is the mission of the program to provide our students with 1) an understanding of the central concepts in cancer biology and basic biomedical science coupled with an understanding of clinical aspects of cancer including prevention, diagnosis, prognosis and therapeutic interventions and 2) the ability to formulate, conduct, analyze and communicate original research within the broad field of cancer biology including fundamental cellular processes and their derangement in cancer etiology / progression; identification and mechanisms of novel cancer therapeutics and preventative agents; and identification of novel therapeutic targets, diagnostic and prognostic markers.

**Student Learning Outcomes**

- At the end of the program, students will demonstrate an overall knowledge and understanding of the core concepts in cancer biology, including the essential skills to conduct cancer biology research.
• Upon completion of the program, all students will demonstrate critical thinking skills, the capacity to develop hypotheses, the ability to evaluate their hypotheses through appropriate experimental design and analysis paying attention to responsible conduct of research as appropriate.
• Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

Cellular Physiology and Molecular Biophysics
biomed.med.miami.edu

Overview

Cellular Physiology and Molecular Biophysics is focused on how human organisms function by applying principles of physics to the underlying molecules and cells. The training and research emphasis in the Graduate Program in Cellular Physiology and Molecular Biophysics at the University of Miami School of Medicine is directed at determining the molecular mechanisms underlying physiological functions, such as how does the heartbeat, how does the brain work, and how do we see, smell, and taste, using biophysical techniques and analyses. More specifically, research facilities and guidance for graduate work are available in developmental neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, mechanisms of ion channel gating, selectivity and conductance, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, axonal growth, neurotrophic factors, cytokines, gene targeting, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

The Graduate Program in Cellular Physiology and Molecular Biophysics trains its students to use and develop state-of-the-art biophysical techniques that address fundamental questions related to molecular and cellular physiology and biophysics and developmental and molecular neuroscience. In addition, the students receive training in related biological disciplines and also in systemic physiology in order to obtain a broad viewpoint. This training prepares the students for future careers in research and teaching in academic institutions and also for careers in industry.

Doctoral Programs
Ph.D. in Cellular Physiology and Molecular Biophysics (p. 2526)

Ph.D. in Cellular Physiology and Molecular Biophysics

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:
• Excellent academic record
• Competitive GRE exam scores
• Research experience in a laboratory setting
• Publications of abstract and / or papers
• Co-authorship in a peer-reviewed journal is recommended
• Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research
APPlicants must submit the following:

• Online Application
• Application Fee
• Official Academic Transcripts
• GRE General Test
• English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume / CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply/).

During the first year, the students choose several laboratories in which to do brief, introductory research projects (rotations). After the student’s selection of a faculty mentor the main emphasis of training shifts to the design and proposal of a dissertation research project, and, with its approval, laboratory research. Students report periodically on their research in discussions with other students and the faculty.

Since the Department aims to prepare its graduates for careers in research and teaching, all students in the Department are expected to participate in teaching; these teaching activities typically require no more than 1-2 weeks per year.

---

1 Students in this program take PIB 700 twice for a total of 2 credits. Please see the Plan of Study for more information.

2 Students in this program take PHS 700 four times for a total of 4 credits. Please see the Plan of Study for more information.

Program Plan

The Department of Cellular Physiology and Molecular Biophysics’ PhD program trains highly qualified students for successful careers in research, teaching and industry. A high faculty to student ratio assures that each student receives individualized help from the faculty together with access to the latest scientific instrumentation.

Student training is enhanced by research seminars and student-oriented discussions presented by world-renowned visiting scientists, as well as by participation in research seminars and research discussion groups. We seek to provide a congenial and supportive environment in which each student
Ph.D. in Cellular Physiology and Molecular Biophysics

devotes to the fullest thier abilities to reason critically, design and conduct incisive experiments, and communicate research results effectively in both written and oral formats. Our faculty's wide collective experience as successful researchers, teachers, journal editors, and peer reviewers is available to help graduates prepare for and attain research and teaching positions in academia and industry.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

### Mission

The Physiology & Biophysics Ph.D. program offers training in physiological and biophysical research and education to students seeking a Ph.D. degree. The mission of the program is to provide to our students 1) the knowledge of the relevant literature in molecular and cellular physiology, the ability to formulate hypotheses about physiological functions in humans and animal models under healthy and disease states, to critically evaluate data and draw the appropriate conclusions from the data, and the ability to present hypotheses and data in written and oral presentations, 2) training in different biophysical techniques to have the technical ability to conduct experiments to study diseases at the molecular and cellular level, to have the quantitative and computational knowledge to analyze the data, and to use the appropriate statistical methods to evaluate the data.

### Student Learning Outcomes

- Students will demonstrate an overall knowledge and understanding of the core concepts in Physiology and Biophysics, including the essential skills to conduct research in Physiology and Biophysics.
- Students will demonstrate critical thinking skills, the capability to develop hypotheses, and the ability to evaluate hypotheses, paying attention to responsible conduct of research as appropriate.
- Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

### PIB 700. Journal Club. 1 Credit Hour.

All PIBS students are required to attend one journal club or seminar each week.

**Components:** SEM.

**Grading:** SUS.

**Typically Offered:** Fall & Spring.

### PIB 701. Introduction to Biomedical Sciences. 1-5 Credit Hours.

This course surveys fundamentals of molecular and cellular biology that underly all modern biomedical research. Lectures are organized into modules that cover Proteins and DNA, Gene Expression, Signaling and Membranes, Cells, and Development. A final module covers immunology, organ systems, and genetics. Experimental techniques are emphasized throughout, with the first week of the course devoted to a bootcamp on common biomedical methods.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.
PIB 702. Scientific Reasoning. 3 Credit Hours.
This course teaches scientific reasoning by critical reading of primary research papers in a small-group setting. Multiple small groups are offered every week and students can choose from different topics related to lectures in the companion PIB 701 course. Research papers are discussed in two 1-hour sessions each week.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PIB 705. Biostatistics for the Biosciences. 3 Credit Hours.
This is an introductory course that will cover the basics of applied statistics. The course will emphasize a practical understanding of statistical concepts: the goal is to prepare you to be able to properly analyze and interpret data from your research, not to turn you into a statistician. As such, the structure of the course is designed to give you lots of hands-on experience with data and statistical software, and to teach you how to proceed when you encounter novel problems in the future (e.g., data that you're not quite sure how to analyze). An overall goal of the course is to prepare you to be able to intelligently assess the statistics commonly encountered in journal articles within your field and provide you with the fundamental skills required for more advanced statistical methods when you later encounter the need.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PIB 706. Informatics for the Biosciences. 3 Credit Hours.
PIB 706 is designed to teach problem solving using the Python programming language. No prior programming knowledge is needed. Students will learn to write their own original Python programs to parse, manipulate, and analyze big data sets containing genomic, proteomic, and structural information. As the course progresses, students will be encouraged to apply their emerging programming knowledge to tackle scientific problems of their interest. The course culminates with each student designing a final project related to their research. This is a hands-on course with in-class interactive programming. Therefore, students are required to have their own Mac or PC laptop in good working condition for every class—no exceptions.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PIB 731. Laboratory Research. 1-6 Credit Hours.
Laboratory rotations familiarize students with a variety of modern techniques in biomedicine and potential mentors for their dissertation projects. One credit is awarded per rotation.

Components: LAB.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PIB 780. Research Ethics. 1 Credit Hour.
The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of scientific integrity. This program should be an integral part of the proposed training effort.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PIB 782. Professional Development: Skills for Success I. 1 Credit Hour.
This workshop will teach students the basics on how to: manage your career, choose a rotation lab / mentor, read a scientific paper, write a lab report and present in the journal club and lab meetings.

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

PIB 783. Professional Development: Skills for Success II. 1 Credit Hour.
This workshop will teach students the basics on how to: write a fellowship and scientific paper as well as the proper and ethical handling of research data.

Components: LEC.
Grading: SUS.
Typically Offered: Spring.
PIB 784. Practical Graduate Teaching. 1 Credit Hour.
Senior graduate students have the opportunity to participate in Graduate School teaching by evaluating presentations, teaching in small groups, and mentoring first-year graduate students in the Program in Biomedical Sciences. The overarching goal is to prepare future academicians in the complex process of training accomplished, well-rounded scientists. The activities required from the students would be: Participate in the mentoring program; read and evaluate abstracts of PIBS student rotations; participate of PIBS rotation presentations, ask questions; provide feedback of rotation presentations (abstracts and oral) to PIBS students within small groups; and provide mentoring to PIBS students in PIB701 topics.
Prerequisite: PIB 701.
Components: FLD.
Grading: SUS.
Typically Offered: Fall & Spring.

PIB 785. PIBS Bioinformatics Workshop. 1 Credit Hour.
The aim of this workshop is to introduce graduate students to basic bioinformatics data retrieval and analysis as relevant to bio-medical research. The sessions will include discussion on focused topics and hands-on, project-based exercises. Only publicly available databases and web-tools will be used, no programming will be taught.
Components: WKS.
Grading: SUS.
Typically Offered: Summer.

PIB 830. Doctoral Dissertation. 1-12 Credit Hours.
Required for all PhD candidates. First-year students generally take one credit of doctoral dissertation in their first summer semester then continue in program specific dissertation credit through graduation.
Components: THI.
Grading: SUS.
Typically Offered: Summer.

PHS 610. Cell Physiology Biophysics. 2 Credit Hours.
General principles of cell physiology, chemical and physical structure of membranes, membrane transport and electrical phenomena, action potentials, muscle contraction, energy transduction, nerve impulse conduction and synaptic transmission.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PHS 611. Neurophysiology. 2 Credit Hours.
Physiology of the mammalian nervous system. Course is intensive, adapted to the schedule of the medical curriculum and comprising roughly five hours of lecture and four hours of conference weekly for five to six weeks. A lecture course coordinated with neuroanatomy.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHS 612. Systemic Physiology. 4 Credit Hours.
Physiology of the mammalian cardiovascular, respiratory, renal, digestive, endocrine, and reproductive systems. Course is intensive and adapted to the schedule of the medical curriculum, occupying the equivalent of about two days a week for most of semester. Lecture and laboratory are included.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHS 620. Neurophysiology. 3 Credit Hours.
Physiology of the mammalian nervous system. The course will consist of both didactic lectures and discussions of current research literature.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PHS 669. Nerve and Synapse. 2 Credit Hours.
An advanced seminar course in the basic mechanisms underlying the propagated nerve impulse and synaptic transmission.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PHS 700. Research Seminar in Membrane Biophysics and Neurobiology. 1 Credit Hour.
The student may be required to present a short talk on a research area of interest. All students in the Department of Physiology and Biophysics are required to register for this seminar. For other students, permission of the Departmental Graduate Studies Committee is required.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
Clinical and Translational Investigation

http://miamictsi.org/education/masters-program
Overview
The Master of Science in Clinical and Translational Investigation (MSCTI) at the University of Miami offers a structured educational program that trains students in the principles and practice of translational science and clinical research. Our multidisciplinary program has been designed to prepare practitioners and researchers to adapt to translational science and to overcome the perceived bottlenecks that inhibit translational research. We equip our students with the tools to navigate the complexities of translational research design, methodology, regulatory and ethical challenges.

Drawing upon the University of Miami Miller School of Medicine's mission to educate the next generation of medical leaders and to lead life-changing discoveries that transform patient care through innovative research, the Master of Science in Clinical and Translational Investigation (MSCTI) degree program's mission is to educate the next generation of investigators who demonstrate the ability to review, design, and conduct high-quality, multidisciplinary clinical and translational research independently.

Our educational objective is to provide an instructor-led educational curriculum that introduces students to key areas of clinical and translational research, and to produce graduates who demonstrate core competencies in clinical and translational research. Students will learn how to design independent and collaborative research projects and become well-versed in key aspects of clinical and translational investigation.

Course of Study
The Masters in Clinical and Translational Investigation can typically be completed in 4-6 consecutive terms (Fall, Spring, Summer) depending on the goals and professional responsibilities of the student. The 30 credit-hour program includes completion of structured taught courses and completion of a master's thesis which may take the form of a completed research grant proposal or publishable manuscript. Successful completion of the MSCTI requires students to maintain a GPA of 3.0 or greater with no grade below C in any courses and successful completion of the master’s thesis.

Students who intend to complete the MSCTI program part-time must discuss their plan with their employer and make adjustments as needed to attend course lectures. Students who are studying with an F1 visa must enroll in a minimum of nine credits per semester.

Admissions Requirements

Admission Requirements
We accept applications from individuals who meet any of the following criteria:

- Individuals who have completed terminal healthcare degrees (e.g., MD, PhD, DO, RN) who are interested in pursuing additional formal didactic training to become independent investigators in clinical and/or translational science;
- Individuals who have completed terminal scientific degrees (e.g., Ph.D., DSci) who are interested in pursuing additional formal didactic training to improve knowledge and skills related to translation of basic to clinical applications; and
- Individuals who are currently enrolled in a terminal degree program (e.g., MD, PhD) who are interested in adding a year to their program to obtain a MCTSI concurrent with their terminal degree.
- Students who have completed a Bachelor's degree who have outstanding academic credentials and an interest in obtaining a MS prior to a career in clinical translational research or a graduate program will also be eligible.

Detailed information about the application package requirements can be found here (http://biomed.miami.edu/apply/apply-mscti/).

Master's Programs
- M.S. in Clinical and Translational Investigation (p. 2534)

Course Descriptions
CTI 602. Writing for Translational and Clinical Science. 2 Credit Hours.
This introductory core course will be taught by the Masters of Science in Clinical and Translational Investigation (MSCTI) Program Directors, as well as various guest lecturers. The focus of the course will be on developing grant and manuscript writing skills in the area of clinical and translational science across the translational science spectrum.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

Mission
Drawing upon the University of Miami Miller School of Medicine's mission to educate the next generation of medical leaders and to lead life-changing discoveries that transform patient care through innovative research, the Master of Science in Clinical and Translational Investigation (MSCTI) degree program’s mission is to educate the next generation of investigators who demonstrate the core competencies necessary to review, design, and conduct high-quality, multidisciplinary clinical and translational research independently.

Goals
Our educational objective is to provide an instructor-led educational curriculum that introduces students to key areas of clinical and translational research, and to produce graduates who demonstrate core competencies in clinical and translational research. Students will learn how to design independent and collaborative research projects and become well-versed in key aspects of clinical and translational investigation.

Student Learning Outcomes
- 100% of students who complete CTI 605 Introduction to Clinical and Translational Research’ should demonstrate the following competencies with at least intermediate proficiency:
  - Summarize evidence from the literature on a translational research problem;
  - Critique clinical and translational research questions using data-based literature searches;
  - Assess the strengths and weaknesses of possible study designs for a given clinical or translational research question; and
  - Describe future implications of published studies on team science and translational science.
- Students who complete CTI 602 Writing for Clinical and Translational Research’ should demonstrate the following competencies:
  - Write introduction to a translational research manuscript or a grant specific aims page;
  - Understand the grant review process from the perspective of an applicant and a reviewer; and
  - Understand the key components of how to put together an NIH-style grant.
- The overall goal of the Capstone Project is to provide students with an opportunity for hands-on exposure to clinical/translational research. Students who complete the CTI 805 ‘Capstone Project/Masters Thesis’ of the MSCTI Program will demonstrate the following competencies:
  - Ability to plan a research activity;
  - Ability to prepare, draft, finalize, and submit all sections of a grant application;
  - Knowledge and motivation to carry out the planned research activity;
  - Ability to analyze the results of the research;
  - Ability to complete a written description of the work in the form of a well-written, properly organized thesis;
  - Ability to complete a thesis with potential for presentation at and/or participation in professional meetings and/or publication in scholarly journals; and
  - Ability to identify and work with a mentor on their project.

Dermatology
Overview
The Department of Dermatology and Cutaneous Surgery (http://dermatology.med.miami.edu/master-of-science-in-skin-biology/) offers a unique Master of Science in Skin Biology and Dermatological Sciences (MS-SBDS) program. The program prepares students for careers and leadership in skin science and industry. The curriculum covers basic science and laboratory techniques, as well as management skills, grant & regulatory issues, enterprise issues, and clinical problems.

The Master of Science in Skin Biology and Dermatological Sciences program (MS in SBDS) is unique in its depth and breadth because it covers basic science research and laboratory techniques. In addition, the degree considers a variety of additional skills to help you succeed in industry and academia, for it considers management skills, grant writing, regulatory issues, enterprise formation issues, and clinical problems.

Skin biology includes many biological processes: development, perpetual differentiation and barrier maintenance, stem cell biology, tissue repair and regeneration, neogenesis, native and adapted immunity, and genetic disorders just to name a few. The areas represented in our research base include aging, microbiology, inflammation, immunology, genomics, pharmacology, biochemistry, cell and stem cell biology as well as clinical research using areas of a variety of skin disorders, aging, aesthetics, cancer, and wounds as a clinical touchpoint.

Training in all these aspects is currently not provided by any single program in the United States. Thus, a Master’s degree in Skin Biology and Dermatological Sciences will impart a unique skill set and research background. There is a growing need for knowledgeable health care professionals. Health care providers, policy makers, research scientists, academic practices in the US and in the rest of the world, as well as makers of skin and skin
care products from devices, drugs and cosmeceuticals and their workers need trained personnel. The coursework in this degree program will offer essential scientific knowledge, management, and administrative skills that will be helpful for individuals desiring a skin sciences oriented career.

Program Options
Master of Science (MSc.) in Skin Biology and Dermatological Sciences (MS in SBDS), offers a Thesis path and Non-Thesis path.

- Thesis Path: The MSc. with thesis path requires completion of a laboratory research project and thesis. This option is tailored for students interested in doing research or contemplating work for a Ph.D. degree or academic career.
- Non-Thesis Path: The MSc. without thesis option is designed for students who wish to improve their knowledge in Skin Biology and related sciences through a rigorous series of courses. The program may fit for people from industries or organizations.

Both thesis and non-thesis options are also helpful for students seeking to apply to medical school or a dermatology residency program.

MS in Skin Biology and Dermatological Sciences
305 243 6875

M.S. in Skin Biology and Dermatological Sciences (p. 2542)

DER 600. Cutaneous Biochemistry, Cell Biology and Genetics. 3 Credit Hours.
This course will bring students to basic, fundamental and integrated sciences of human skin in biochemistry, cellular and molecular biology, and genetics. The course will cover various topics from skin cellular and molecular structure, function and biology, to their genes, DNA, RNA and protein, biochemical reactions, metabolism, and genetic processes that transmit biological information and regulation. This course will help students to understand the fundamental concepts on and connection between genes, structure and functions of human skin. The course is specifically designed and required for students who do not have strong background in human biochemistry and/or cell biology. Other students may elect this course to prepare for the subsequent vigorous studies in the MS degree program in Skin Biology and Dermatological Sciences. This is a hybrid course therefore students are required to attend campus-based classroom lectures (28 hours) and online sessions of live lectures or pre-recorded presentations (20 hours).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 601. Introduction to Dermatology. 1 Credit Hour.
The aim of the course is to familiarize participants with the basic subject of dermatology and the most common terminology. Students will be introduced to the subject of dermatology, subspecialties in dermatology, structure of the skin (basic anatomy and physiology), terminology (primary and secondary cutaneous lesions), and examples of the most common dermatological conditions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 602. Skin Anatomy and Histology. 1 Credit Hour.
This course familiarizes students with the structure and morphology of the skin and its appendages. Students will be exposed to the basic aspects of skin anatomy and histology, of skin epidermis, dermis, dermal-epidermal junction and subcutaneous tissue, skin appendages of hair, sebaceous gland, sweet glands, and skin microvasculature and sensitive nerve endings, and to the relationships between structures, functions and diseases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 603. Skin Biology and Pathophysiology. 3 Credit Hours.
This course helps students to understand the fundamental concepts on and connection between structure and function of the skin. The course will include biology of major skin cell types of keratinocytes, fibroblasts, endothelial cells, melanocytes and Langerhans cells. It will cover biology of skin metabolism, skin appendages, skin matrix, cutaneous vasculature, neuroendocrine system and major processes required for cutaneous barrier function during normal and pathophysiological states. Molecular and cellular mechanisms of cutaneous wound healing, matrix remodeling, tissue regeneration and skin ageing will be also included into coursework.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 604. Microbiology of the Skin. 1 Credit Hour.
This course covers skin microbiota/microbiome in health and disease, and bacterial species that cause most common skin infections such as Staphylococcus aureus (folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. It addresses bacterial biofilms and their importance in skin infections.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 605. Microbiology and Immunology of the Skin. 3 Credit Hours.
This course covers skin microbiota and immune components of the skin in healthy and disordered states. The microbiology will cover bacterial species that cause most common skin infections such as Staphylococcus aureus (folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. The bacterial biofilms and their importance in skin infections will also be addressed. The skin hosts the same immunocompetent cell types found throughout the body -T cells, B cells, macrophages, eosinophils, neutrophils, etc. -as well as its own skin-specific subpopulations-Langerhans cells, keratinocytes, and dermal dendrocytes. The second part of the course will cover the biology of immunology of the skin in normal functioning and underlying both intradermal allergic reactions and skin-specific autoimmune disorders (alopecia areata, vitiligo, psoriasis), as well as the standard treatments for each. Further, this course addresses unique immune environments within the skin, such as the immune privilege of the hair follicle, and wound infection.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 606. Dermato-epidemiology. 2 Credit Hours.
Students will be introduced to the emerging discipline in skin epidemiology or Dermatoepidemiology, to obtain an overview of incidence rates and time trends of skin disorders in the US and in the world, learn biostatistical tools in data analysis including descriptive statistics, hypothesis testing, analysis of variance, and regression analysis. Students gain an appreciation for disparity in the disease outcomes among populations and various barriers contributing to current disparity. Students will also learn about various state and national registries for skin cancer and some other skin disorders available for database research.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 607. Dermatopharmacology. 2 Credit Hours.
This course familiarizes students with the mechanisms of drug action, FDA-indications, off-label uses, safety and efficacy, side effects and necessary monitoring and important drug interactions relevant to topical and systemic medications used in dermatology. The course covers skin barrier and transdermal drug delivery (structure of the skin barrier, factors affecting the skin barrier, strategies to enhance transdermal drug delivery), major drugs used in dermatology including glucocorticosteroids, retinoids, antimicrobials, immunomodulators, agents used in oncology, hormonal therapy, other systemic medications (antimalarials, colchicine, dapsone, leukotriene inhibitors, antiglucorticosteroids, thalidomide) and topical medications.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 608. Photobiology and Photomedicine. 1 Credit Hour.
This course discusses fundamental concepts on photobiology and phototherapy with Ultraviolet light (UV) B, Excimer Laser, UV A, PUV A (psoralen + UV A), Photopheresis, and Photodynamic therapy. The course will cover photobiology, photochemistry and mechanisms of actions. Treatment protocols with clearing phase and maintenance phase, indications, adverse effects and complications, practice and techniques and future directions will be also included into coursework.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 609. Skin Carcinogenesis. 2 Credit Hours.
This course considers the etiology, pathophysiology, epidemiology, types, prognosis and various treatment of the most common types of skin cancers will be covered. Skin cancer is by far the most common type of cancer affecting the humans. More than 50% of all the cancers combined are skin cancers. The most common skin cancer is Basal Cell Carcinoma (BCC). The second most common type is Squamous Cell Carcinoma. One of the most serious form of skin cancer is Melanoma. There are other types of skin cancers that affect us. One in 5 Americans develop skin cancer during their lifetime.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
DER 610. Clinical Skin Diseases. 2 Credit Hours.
This course gives students a clinical overview of the common skin disorders encountered by society. It discusses the most common skin diseases such as acne, seborrheic dermatitis, and xerosis, with an emphasis on pathogenesis, and current research in these conditions. Older treatments will be compared to newer treatments with respect to efficacy as well as cost to patients.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 611. Visualizing the Skin. 2 Credit Hours.
This course covers basic and advanced techniques of visual examination and digital photography of the skin and hair. Topics include macrophotography of the skin and scalp, dermatoscopy, processing of biopsies for histology, routine and special histological staining, microscopy with regular and special lights, immunohistochemistry and immunofluorescence, and recent advances of non-invasive methods of visualizing the skin in depth such as optical coherence tomography and in vivo confocal microscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 612. Grant Writing. 1 Credit Hour.
The course presents approaches and important aspects of preparation of some major grant applications to including government funding from National Institute of Health (NIH) such as Research grants (R formats) for academia and Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants for industries and grants from Department of Defense. Major sources, tools and policies for grant application and management will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 613. Techniques in Skin Research. 1 Credit Hour.
This course will cover different areas of research techniques employed in studying skin biology/pathophysiology that span from in vitro cell based assays, ex vivo skin or reconstructed skin equivalents to in vivo animal models to study skin biology and skin diseases, and will integrate various molecular, cellular and tissue based methods. The course will balance multiple teaching methods from traditional didactics to individual and group "hands-on" laboratory experience and training. Its main approach will be using skin specimen (human or animal) as a major source and starting point. It will follow progression from simple methods (cell-based) to more complex (organotypic and tissue-based techniques) to in vivo animal models in pre-clinical trials. The course will also cover high throughput approaches in skin genomics, genetics and proteomics, and use and analysis of big data as well.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 614. Innovation in Dermatology. 1 Credit Hour.
The aim of this course is to familiarize the participants with the tools of innovation. It will cover the strategic processes of how to ideate, formulate, innovate and push through new ideas-from concept to implementation. This course will also cover the issues related to patent and how to protect the intellectual property.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 615. Dermatology Health Care Delivery. 1 Credit Hour.
This course prepares students for positions of leadership in skin care and skin health-related industrials and organizations. The course focuses on the educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. The course considers practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the skin care industry; with emphasizes in the development of business; technical, administrative, and leadership concepts as they apply to the clinical practice and skin care industry. TeleHealth, TeleDermatology and Clinical Outreach will also be discussed. This course considers the topics on the development of business, technical, administrative, and leadership concepts as they apply to the health care industry. Students will consider issues pertaining to animal use and protection and human subject in research, regulatory requirements and allied issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 622. Introduction to Dermatopathology. 1 Credit Hour.
This course is the continuation of the course DER 602 Skin Anatomy and Histology and or DER 603 Skin Biology and Pathophysiology. The aim of the course is to give students a general introduction to clinical histopathology in common skin disorders. The course will familiarize students with basic terms of histopathological changes in skin tissue, basic characteristic pattern recognitions, clinic-pathologic correlations, and histopathologic features of common skin diseases.
Prerequisite: DER 602 or DER 603.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 623. Techniques in Skin Research- II. 1 Credit Hour.
This course is the continuation of the course DER 613 Techniques in Skin Research-I. It will teach students how to approach and solve research problems with different strategies and methods. Various research models specific to skin research will be discussed including angiogenesis, aging, cancer, endocrinology, hair, itching and sensation, wound repair and tissue regeneration, therapeutic research in drug transdermal and systemic deliveries, and clinical skin disease research and therapeutic trials as well. Students will also consider issues pertaining to animal use and protection and human subject in research and allied issues.
Prerequisite: DER 613.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 631. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up with advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 632. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up with advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 633. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up with advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 641. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
DER 642. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion, and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows, and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 643. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion, and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows, and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.

Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 661. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.

Components: LAB.
Grading: GRD.
Typically Offered: Fall.

DER 662. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.

Components: LAB.
Grading: GRD.
Typically Offered: Spring.

DER 663. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.

Components: LAB.
Grading: GRD.
Typically Offered: Summer.

DER 670. Dermatology Clinical Shadowing. 1-3 Credit Hours.
This course will consist of shadowing with a clinical faculty dermatologist in clinics in the Department of Dermatology and Cutaneous Surgery at the University of Miami (minimum 2-3 hours per week for each credit hour). This course is for students who are interested in clinical dermatology or medicine. It will give students firsthand experience in clinical dermatology. Students will be rigorously monitored for progress by clinical faculty mentors. Student will be required to write a case report or present a case report at the end of the semester.
Prerequisite: DER 601.

Components: CLN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 700. Thesis. 1-6 Credit Hours.
A 6-credit research thesis course will be required for students who choose M.S. Thesis track. Research work will be performed in fall semester in the second year. For timing reasons, students will choose a mentor’s lab by the end of the second semester and select a thesis proposal after rotation through 1-2 prospective mentors’ labs. Students will be required to provide a proposal to a thesis committee drawn from members of program faculty. The majority of these mentoring faculty are members of the UM Graduate Faculty with a track record of graduate level teaching, research funding, and/or have (had) graduate students in their labs. The thesis proposal should be written such that the data collection will be completed within one semester. Mentors will provide support for students with necessary reagents, supplies, and equipment, etc. needed for completion of the thesis project. The committee will monitor the student closely and will also identify an alternate lab, should the project did not make satisfactory progress within first two months. The committee will also evaluate by the end of the first year prior to the start of thesis work to determine if students have spent time rotation with prospective mentor’s lab, evaluated the prospect of a project, and worked towards defining and completing a thesis project. A thesis requires an oral defense and a written paper evaluated and approved by the thesis committee convened for that purpose. The oral defense is open to the university community and the public. The student should distribute the thesis paper to the thesis committee for preliminary approval at least 10 days prior to the oral defense. The written paper should be of quality to be submitted for publication as first author or a co-author. Students may request to extend the length of thesis work and/or later date of thesis defense with the approval of the thesis committee and the program committee.

Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 808. Research Thesis. 1-6 Credit Hours.
A 6-credit research thesis will be required for students who choose the Thesis Path. For the timing reasons, students will choose a mentor’s lab by the end of the first year and select a thesis proposal after rotation through 1-3 research labs (DER 661, DER 662, or DER 663). Students are required to conduct campus-based thesis research in the second year in the research laboratories with faculty mentors in the Department of Dermatology and Cutaneous Surgery. The length of the thesis research, including written thesis paper and oral defense, usually takes 12 months. Students need to discuss with their thesis mentor research topic, thesis committee, duration and expectation.
Prerequisite: DER 661 or DER 662 or DER 663.

Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

*Can be taken as DER 661 in the Fall Semester or DER 662 in the Spring Semester*
Mission
Our mission is to foster future generations of skin scientists, physician scientists and industrial leaders in skin sciences, skin care as well as skin related drug and device development.

Goals
In alignment with the university’s strategic vision, the Goals of the programs are:

- Train Master’s students in a focused knowledge area of Skin Biology and Dermatological Science; and
- Train Master’s students in requisite research and research management skills.

Student Learning Outcomes
- Students will demonstrate advanced knowledge of the fundamentals of skin biology.
- Students will demonstrate advanced knowledge of dermatological science and disorders.
- Students will demonstrate advanced knowledge of innovation, technology and regulations in the field of Skin Biology.

DER 600. Cutaneous Biochemistry, Cell Biology and Genetics. 3 Credit Hours.
This course will bring students to basic, fundamental and integrated sciences of human skin in biochemistry, cellular and molecular biology, and genetics. The course will cover various topics from skin cellular and molecular structure, function and biology, to their genes, DNA, RNA and protein, biochemical reactions, metabolism, and genetic processes that transmit biological information and regulation. This course will help students to understand the fundamental concepts on and connection between genes, structure and functions of human skin. The course is specifically designed and required for students who do not have strong background in human biochemistry and/or cell biology. Other students may elect this course to prepare for the subsequent vigorous studies in the MS degree program in Skin Biology and Dermatological Sciences. This is a hybrid course therefore students are required to attend campus-based classroom lectures (28 hours) and online sessions of live lectures or pre-recorded presentations (20 hours).
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 601. Introduction to Dermatology. 1 Credit Hour.
The aim of the course is to familiarize participants with the basic subject of dermatology and the most common terminology. Students will be introduced to the subject of dermatology, subspecialties in dermatology, structure of the skin (basic anatomy and physiology), terminology (primary and secondary cutaneous lesions), and examples of the most common dermatological conditions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 602. Skin Anatomy and Histology. 1 Credit Hour.
This course familiarizes students with the structure and morphology of the skin and its appendages. Students will be exposed to the basic aspects of skin anatomy and histology, of skin epidermis, dermis, dermal-epidermal junction and subcutaneous tissue, skin appendages of hair, sebaceous gland, sweat glands, and skin microvasculature and sensitive nerve endings, and to the relationships between structures, functions and diseases.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 603. Skin Biology and Pathophysiology. 3 Credit Hours.
This course helps students to understand the fundamental concepts on and connection between structure and function of the skin. The course will include biology of major skin cell types of keratinocytes, fibroblasts, endothelial cells, melanocytes and Langerhans cells. It will cover biology of skin metabolism, skin appendages, skin matrix, cutaneous vasculature, neuroendocrine system and major processes required for cutaneous barrier function during normal and pathophysiological states. Molecular and cellular mechanisms of cutaneous wound healing, matrix remodeling, tissue regeneration and skin ageing will be also included into coursework.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 604. Microbiology of the Skin. 1 Credit Hour.
This course covers skin microbiota/microbiome in health and disease, and bacterial species that cause most common skin infections such as Staphylococcus aureus ( folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. It addresses bacterial biofilms and their importance in skin infections.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 605. Microbiology and Immunology of the Skin. 3 Credit Hours.
This course covers skin microbiota and immune components of the skin in healthy and disordered states. The microbiology will cover bacterial species that cause most common skin infections such as Staphylococcus aureus ( folliculitis, impetigo, abscesses, pyoderma, toxic-shock syndrome, staphylococcal scalded skin syndrome, wound infections); Streptococcus pyogenes (impetigo, erysipelas, cellulitis, necrotizing fasciitis, rheumatic fever, scarlet fever, wound infections), and Corynebacterium spp. (wound infections), etc. The bacterial biofilms and their importance in skin infections will also be addressed. The skin hosts the same immunocompetent cell types found throughout the body -T cells, B cells, macrophages, eosinophils, neutrophils, etc. -as well as its own skin-specific subpopulations-Langerhans cells, keratinocytes, and dermal dendrocytes. The second part of the course will cover the biology of immunology of the skin in normal functioning and underlying both intradermal allergic reactions and skin-specific autoimmune disorders ( alopecia areata, vitiligo, psoriasis), as well as the standard treatments for each. Further, this course addresses unique immune environments within the skin, such as the immune privilege of the hair follicle, and wound infection.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 606. Dermato-epidemiology. 2 Credit Hours.
Students will be introduced to the emerging discipline in skin epidemiology or Dermatoepidemiology, to obtain an overview of incidence rates and time trends of skin disorders in the US and in the world, learn biostatistical tools in data analysis including descriptive statistics, hypothesis testing, analysis of variance, and regression analysis. Students gain an appreciation for disparity in the disease outcomes among populations and various barriers contributing to current disparity. Students will also learn about various state and national registries for skin cancer and some other skin disorders available for database research.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 607. Dermatopharmacology. 2 Credit Hours.
This course familiarizes students with the mechanisms of drug action, FDA-indications, off-label uses, safety and efficacy, side effects and necessary monitoring and important drug interactions relevant to topical and systemic medications used in dermatology. The course covers skin barrier and transdermal drug delivery (structure of the skin barrier, factors affecting the skin barrier, strategies to enhance transdermal drug delivery), major drugs used in dermatology including glucocorticosteroids, retinoids, antimicrobials, immunomodulators, agents used in oncology, hormonal therapy, other systemic medications (antimalarials, colchicine, dapsone, leukotriene inhibitors, antihistamines, thalidomide) and topical medications.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 608. Photobiology and Photomedicine. 1 Credit Hour.
This course discusses fundamental concepts on photobiology and phototherapy with Ultraviolet light (UV) B, Excimer Laser, UV A, PUV A (psoralen + UV A), Photopheresis, and Photodynamic therapy. The course will cover photobiology, photochemistry and mechanisms of actions. Treatment protocols with clearing phase and maintenance phase, indications, adverse effects and complications, practice and techniques and future directions will be also included into coursework.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 609. Skin Carcinogenesis. 2 Credit Hours.
This course considers the etiology, pathophysiology, epidemiology, types, prognosis and various treatment of the most common types of skin cancers will be covered. Skin cancer is by far the most common type of cancer affecting the humans. More than 50% of all the cancers combined are skin cancers. The most common skin cancer is Basal Cell Carcinoma (BCC). The second most common type is Squamous Cell Carcinoma. One of the most serious form of skin cancer is Melanoma. There are other types of skin cancers that affect us. One in 5 Americans develop skin cancer during their lifetime.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
DER 610. Clinical Skin Diseases. 2 Credit Hours.
This course gives students a clinical overview of the common skin disorders encountered by society. It discusses the most common skin diseases such as acne, seborheic dermatitis, and xerosis, with an emphasis on pathogenesis, and current research in these conditions. Older treatments will be compared to newer treatments with respect to efficacy as well as cost to patients.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 611. Visualizing the Skin. 2 Credit Hours.
This course covers basic and advanced techniques of visual examination and digital photography of the skin and hair. Topics include macrophotography of the skin and scalp, dermatoscopy, processing of biopsies for histology, routine and special histological staining, microscopy with regular and special lights, immunohistochecmistry and immunofluorescence, and recent advances of non-invasive methods of visualizing the skin in depth such as optical coherence tomography and in vivo confocal microscopy.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 612. Grant Writing. 1 Credit Hour.
The course presents approaches and important aspects of preparation of some major grant applications to including government funding from National Institute of Health (NIH) such as Research grants (R formats) for academia and Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants for industries and grants from Department of Defense. Major sources, tools and policies for grant application and management will be discussed.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 613. Techniques in Skin Research. 1 Credit Hour.
This course will cover different areas of research techniques employed in studying skin biology/pathophysiology that span from in vitro cell based assays, ex vivo skin or reconstructed skin equivalents to in vivo animal models to study skin biology and skin diseases, and will integrate various molecular, cellular and tissue based methods. The course will balance multiple teaching methods from traditional didactics to individual and group "hands-on" laboratory experience and training. Its main approach will be using skin specimen (human or animal) as a major source and starting point. It will follow progression from simple methods (cell-based) to more complex (organotypic and tissue-based techniques) to in vivo animal models in pre-clinical trials. The course will also cover high throughput approaches in skin genomics, genetics and proteomics, and use and analysis of big data as well.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 614. Innovation in Dermatology. 1 Credit Hour.
The aim of this course is to familiarize the participants with the tools of innovation. It will cover the strategic processes of how to ideate, formulate, innovate and push through new ideas-from concept to implementation. This course will also cover the issues related to patent and how to protect the intellectual property.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 615. Dermatology Health Care Delivery. 1 Credit Hour.
This course prepares students for positions of leadership in skin care and skin health-related industrials and organizations. The course focuses on the educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. The course considers practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the skin care industry, with emphasizes in the development of business; technical, administrative, and leadership concepts as they apply to the clinical practice and skin care industry. TeleHealth, TeleDermatology and Clinical Outreach will also be discussed. This course considers the topics on the development of business, technical, administrative, and leadership concepts as they apply to the health care industry. Students will consider issues pertaining to animal use and protection and human subject in research, regulatory requirements and allied issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 622. Introduction to Dermatopathology. 1 Credit Hour.
This course is the continuation of the course DER 602 Skin Anatomy and Histology and or DER 603 Skin Biology and Pathophysiology. The aim of the course is to give students a general introduction to clinical histopathology in common skin disorders. The course will familiarize students with basic terms of histopathological changes in skin tissue, basic characteristic pattern recognitions, clinic-pathologic correlations, and histopathologic features of common skin diseases.
Prerequisite: DER 602 or DER 603.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 623. Techniques in Skin Research- II. 1 Credit Hour.
This course is the continuation of the course DER 613 Techniques in Skin Research-I. It will teach students how to approach and solve research problems with different strategies and methods. Various research models specific to skin research will be discussed including angiogenesis, aging, cancer, endocrinology, hair, itching and sensation, wound repair and tissue regeneration, therapeutic research in drug transdermal and systemic deliveries, and clinical skin disease research and therapeutic trials as well. Students will also consider issues pertaining to animal use and protection and human subject in research and allied issues.
Prerequisite: DER 613.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 631. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up with advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

DER 632. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up to date in advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 633. Advances in Dermatology. 1 Credit Hour.
This hour-long seminar course is held in conjunction with Dermatology Grand Rounds, which will be the basis of this course. The purpose is to help students to keep up to date in advances in investigative dermatological research and patient care. The lectures are delivered by Dermatology full time faculty, voluntary faculty, visiting dermatologists/investigators, and physicians and investigators from related disciplines at the University of Miami. This series covers various aspects of skin biology, dermatology, and related disciplines.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 641. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
DER 642. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

DER 643. Frontiers in Sciences. 1 Credit Hour.
This course will be in conjunction with Dermatology Journal Clubs. Students will participate in the presentation, discussion and critiques of the publications in peer-reviewed journals in both basic sciences and clinical aspects, not limited to the field of dermatology, with emphasis in translational research and research applications. In addition, this course will be run in conjunction with Dermatology Research Conferences. It will provide the most recent updates on various aspects of dermatological sciences ranging from molecular mechanisms of normal skin regeneration and repair to pathologies such as impaired healing disorders and skin cancer. Faculty, fellows, and students from each research laboratory will present their research discoveries. Each MS thesis track student will be required to present their own research projects during their thesis period.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

DER 661. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

DER 662. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

DER 663. Research Rotation. 1 Credit Hour.
This elective course will be offered in all three semesters in the first year. Thesis Path students will elect to take this course during the first year. Students will rotate through 1-3 research labs to explore a variety of potential topics for thesis. Thesis path students are required to take at least 1 lab rotation (1 credit) prior to their lab selection for thesis by the end of 2nd semester. Non-thesis path students will have the option to take this elective course as an opportunity to get hands-on experience in laboratory research and learn research techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Summer.

DER 670. Dermatology Clinical Shadowing. 1-3 Credit Hours.
This course will consist of shadowing with a clinical faculty dermatologist in clinics in the Department of Dermatology and Cutaneous Surgery at the University of Miami (minimum 2-3 hours per week for each credit hour). This course is for students who are interested in clinical dermatology or medicine. It will give students firsthand experience in clinical dermatology. Students will be rigorously monitored for progress by clinical faculty mentors. Student will be required to write a case report or present a case report at the end of the semester.
Prerequisite: DER 601.
Components: CLN.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
DER 700. Thesis. 1-6 Credit Hours.
A 6-credit research thesis course will be required for students who choose M.S. Thesis track. Research work will be performed in fall semester in the second year. For timing reasons, students will choose a mentor’s lab by the end of the second semester and select a thesis proposal after rotation through 1-2 prospective mentors’ labs. Students will be required to provide a proposal to a thesis committee drawn from members of program faculty. The majority of these mentoring faculty are members of the UM Graduate Faculty with a track record of graduate level teaching, research funding, and/or have (had) graduate students in their labs. The thesis proposal should be written such that the data collection will be completed within one semester. Mentors will provide support for students with necessary reagents, supplies, and equipment, etc. needed for completion of the thesis project. The committee will monitor the student closely and will also identify an alternate lab, should the project did not make satisfactory progress within first two months. The committee will also evaluate by the end of the first year prior to the start of thesis work to determine if students have spent time rotation with prospective mentor’s lab, evaluated the prospect of a project, and worked towards defining and completing a thesis project. A thesis requires an oral defense and a written paper evaluated and approved by the thesis committee convened for that purpose. The oral defense is open to the university community and the public. The student should distribute the thesis paper to the thesis committee for preliminary approval at least 10 days prior to the oral defense. The written paper should be of quality to be submitted for publication as first author or a co-author. Students may request to extend the length of thesis work and/or later date of thesis defense with the approval of the thesis committee and the program committee.

Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

DER 808. Research Thesis. 1-6 Credit Hours.
A 6-credit research thesis will be required for students who choose the Thesis Path. For the timing reasons, students will choose a mentor’s lab by the end of the first year and select a thesis proposal after rotation through 1-3 research labs (DER 661, DER 662, or DER 663). Students are required to conduct campus-based research thesis in the second year in the research laboratories with faculty mentors in the Department of Dermatology and Cutaneous Surgery. The length of the thesis research, including written thesis paper and oral defense, usually takes 12 months. Students need to discuss with their thesis mentor research topic, thesis committee, duration and expectation. Prerequisite: DER 661 or DER 662 or DER 663.

Components: THE.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

Human Genetics and Genomics
http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics

Overview
The Interdepartmental PhD Program in Human Genetics and Genomics is a multi-disciplinary program aimed at training scientists broadly in areas of human genetics and genomics relevant to human health and disease. The emerging practice of “precision medicine” whereby clinical treatment decisions are based in part on an individual’s genomic profile, depends on “genomic literacy” among practitioners, researchers and patients. Human Genetics and Genomics is a multidisciplinary field that requires training in three core competencies: clinical, molecular, and statistical genetics. Individuals earning PhDs in Human Genetics and Genomics will have various career options, including research laboratory, computational research, or clinical laboratory (after fellowship training and board certification), in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Variation & Disease and Family Studies & Genetic Analysis. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select a dissertation advisor and area of research. In the summer after PIBS, students take a short course in R, which is a prerequisite for other courses.

During the second year, the curriculum focuses on core coursework in population genetics, bioinformatics, study design and analysis, ethics, and seminars and journal clubs.

Also, during the second year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Advanced Topics in Molecular Genetics while the Computational Genetics track students take a second course in biostatistics.

During the second and third years of study, students formulate and defend a dissertation proposal. All students participate in a 1-credit hour clinical rotation and complete a teaching practicum any time after passing the Qualifying Examination.

University of Miami, Miller School of Medicine
Applying to the Program

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive candidates will have the following:

• Excellent academic record
• Competitive GRE exam scores
• Research experience in a laboratory setting
• Publications of abstracts and/or papers
• Co-authorship in a peer-reviewed journal is recommended
• Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

• Online Application
• Application Fee
• Official Academic Transcripts
• GRE General Test
• English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume/CV

Full application instructions can be found at: biomed.med.miami.edu/apply (http://biomed.med.miami.edu/apply/)

Doctoral Programs

• Ph.D. in Human Genetics and Genomics (p. 2553)

HGG 601. Seminar/Journal Club. 1 Credit Hour.

All active HGG students participate in the Seminar/Journal Club each semester. Sessions rotate between seminar, journal club, and research-in-progress. Twice per month, students attend the HGG seminar speaker series. Once per month, students present their own work in short research-in-progress talks. Once per month, students participate in a journal club, featuring student-led discussions of published papers.

Components: SEM.
Grading: SUS.
Typically Offered: Fall & Spring.
HGG 621. Design and Analysis of Human Genomic Studies. 3 Credit Hours.
This course covers study designs and analytic approaches commonly used in human genetic and genomic studies. Major topic areas include 1) study designs for genetic epidemiology; 2) experimental designs for assessing variation in DNA sequence, RNA expression, and epigenetic marks; 3) analytic approaches for genetic association, gene expression, and epigenetic data; 4) evaluation of epistasis, gene-environment interaction, and application of systems biology approaches to high-dimensional genomic data. Class sessions will feature a mixture of lecture, discussion of primary literature, and hands-on computational workshops. Prerequisite: HGG 661-Introduction to R Programming.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

HGG 630. Variation and Disease. 2 Credit Hours.
This course provides an overview of the science of genetics, including historical and modern approaches, with emphasis on the underlying mechanisms of human genomic variation and their relation to human disease. After taking this course, the student will be able to list the different types of human genomic variation, explain the mechanism by which each occurs, and discuss the consequences of the variations. Where appropriate, specific examples of human disorders will be related to the variations. Topics include: chromosomal, biochemical, and DNA sequence variation, mitochondrial genome variation and epigenetic effects. The course structure consists of a combination of lectures and discussion of primary literature. Course includes two 1.5 hour lectures and a 1.5 hour computer lab.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HGG 631. Genes in Populations. 3 Credit Hours.
This class is a survey of topics in population and statistical genetics. Basic concepts and methods will be covered including: Hardy-Weinberg equilibrium, sources of variation, population substructure (drift, fixation, differentiation, inbreeding and F statistics), relatedness and heritability, quantitative and qualitative trait loci, selection (natural and artificial), and molecular evolution. The course is lecture-based but will include readings from the text and primary literature.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

HGG 640. Family Studies and Genetic Analysis. 2 Credit Hours.
The focus of this course is the use of families in the study of genetic disorders and traits. Both qualitative and quantitative phenotypes will be studied. Major topics covered include: heritability, heterogeneity, segregation analysis and linkage analysis. By the end of the course, the student will be able to design and carry-out a family based mapping study. The course consists of two 1.5 hour didactic lectures and a 1.5 hour computer lab during which students will obtain practical experience in running the relevant computer programs using data from various studies.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

HGG 650. Advanced Topics in Molecular Genetics. 3 Credit Hours.
Topics will include human microRNAs, the neurobiology of aging, structural variation, modern genome technology, among others. The course structure will consist primarily of discussions and analysis of primary literature.
Components: DIS.
Grading: GRD.
Typically Offered: Spring.

HGG 660. Bioinformatics Theory and Practice. 3 Credit Hours.
In this course, we will focus on application of high throughput genomic technologies in a variety of biological contexts. The expectation would be to achieve the following course learning objectives: 1) Gain familiarity with the technologies and techniques available for high throughput genomic studies; 2) Understand the data outputs and how to store/manipulate/analyze/interpret results; 3) Work with high performance computing in the area of genomic analysis; 4) Become aware and be able to use tools for genomic data storage, annotation, and curation; 5) Critically plan and perform quality control of analysis pipelines and results; 6) Share results of genomic data through communication and visualization techniques. Prerequisites: HGG 661-Introduction to R Programming. Familiarity with basic genetics, genome structure, and the methods and approaches of molecular biology are necessary. Please ask for primers on these topics if you do not have a Biology background. In addition, basic knowledge in the Unix environment and basic operations is required. Materials will be distributed in the first week of class to address.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
HGG 661. Introduction to R Programming for the Biomedical Sciences. 2 Credit Hours.
This course provides an introduction to the R statistical programming language, with an emphasis on analysis of biomedical data. Topics will include R syntax, logic, and data types as well as statistical analyses, plotting and figures, environment management and administration, and other topics. Applications and examples will focus on biomedical data, including genetics and genomics. Familiarity with computer programming logic (i.e., boolean operations, if/then/else logic, for/while loops) is recommended, but previous experience with R is not required. Prerequisite: PIB 705 or equivalent statistical analysis course is required.
Prerequisite: PIB 705 or equivalent statistical analysis course is required. Familiarity with computer programming logic is recommended. Permission of Instructor.
Components: PRA.
Grading: SUS.
Typically Offered: Summer.

HGG 680. Genome Ethics and Public Policy. 3 Credit Hours.
This course will explore current and future applications of human genetics as they pertain to the health and identity of individuals and society. Topics will include the ethical dilemmas facing clinicians, researchers, and the public pertaining to the use of genetic information in healthcare; the role of the media and other extemporaneous factors in influencing the use of human genetic information, and responsible conduct of research specifically with regard to issues unique to genetics. The emphasis will be on real examples and experiences, with a primary goal of helping students explore how their role as a researcher and/or citizen will influence and be influenced by genetic information. The course is largely discussion based and includes extensive readings from the literature and online videos.
Components: DIS.
Grading: GRD.
Typically Offered: Summer.

HGG 681. Human Genetics Clinical Rotation. 1 Credit Hour.
HGG students participate in medical genetics clinic post clinical rounds, metabolic-sign out and journal clubs. During clinic, students observe clinical evaluations and counseling, and participate in weekly didactic sessions with faculty and residents. This can be completed any time after passing the Qualifying Examination in Fall of Year 3, and Admission to Candidacy is achieved, and will be graded as a one-credit pass-fail course.
Components: CLN.
Grading: SUS.
Typically Offered: Fall & Spring.

HGG 689. Human Genetics and Genomics Teaching Practicum. 1 Credit Hour.
HGG students serve one semester as a teaching assistant for a core course. This experience will include giving at least one lecture, leading small group discussions, and holding regular office hours to discuss student questions. This can be completed any time after passing the Qualifying Examination in Fall of Year 3, and Admission to Candidacy is achieved, and will be graded as a one-credit pass-fail course.
Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

HGG 830. Doctoral Dissertation - Pre-Candidacy. 1-12 Credit Hours.
1-12 credit course for Doctoral candidates working on pre-candidacy dissertation.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

HGG 840. Doctoral Dissertation - Post Candidacy. 1-12 Credit Hours.
1-12 credit course for Doctoral Candidates working on dissertation post candidacy.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

HGG 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for Ph.D. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

PIB 785  PIBS Bioinformatics Workshop  1
PIB 830  Doctoral Dissertation  1

Human Genetics & Genomics Required Courses
HGG 601  Seminar/Journal Club  1
HGG 630  Variation and Disease ((taken during PIBS year))  2
HGG 631  Genes in Populations  3
HGG 640  Family Studies and Genetic Analysis ((taken during PIBS year))  2
HGG 660  Bioinformatics Theory and Practice  3
HGG 680  Genome Ethics and Public Policy  3
HGG 681  Human Genetics Clinical Rotation  1
HGG 689  Human Genetics and Genomics Teaching Practicum  1

Computational / Molecular Track Course Requirements  3-6
HGG 621  Design and Analysis of Human Genomic Studies  3
EPH 602  Biostatistics II  3
HGG 650  Advanced Topics in Molecular Genetics  4

Research Credits
HGG 830  Doctoral Dissertation - Pre-Candidacy  18-24
HGG 840  Doctoral Dissertation - Post Candidacy
HGG 850  Research in Residence

Total Credit Hours  55-68

1  HGG 601 is required for all HGG students - 1 semester credit each fall and spring semester.
2  All students must complete course requirements for either Computational or Molecular track.
3  HGG 621 / EPH 602: Required for Computational Track students only (may be taken as elective otherwise).
4  HGG 650: Required for Molecular Track students only (may be taken as elective otherwise).

*  The molecular track requires a minimum of 62 credits. The computational track requires a minimum of 65 credits.

Program Plan

The PhD in Human Genetics and Genomics (HGG) curriculum allows candidates to pursue a track in molecular or computational genetics by their second year of training; however, all students complete a core curriculum in the first three years of graduate study. Students will also participate in seminars and journal clubs in the fall and spring semesters, through all years of study.

First-year students interested in Human Genetics and Genomics are strongly encouraged to take two introductory HGG short courses in the spring semester: HGG 630 – Variation and Disease and HGG 640 – Family Studies and Genetic Analysis which are requirements for completing the HGG degree. Courses in computational / quantitative skills, including biostatistics and bioinformatics will also form part of the first year PIBS curriculum. Each PIBS student completes at least three lab rotations of nine weeks each and chooses a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation may be possible, and in this case a laboratory choice may be deferred until June. All first year students will make short presentations to a group of faculty after each lab rotation. For these presentations the students will be divided into four groups with related research interests.

After choosing a mentor and laboratory at the end of the first year, a student becomes a member of the HGG Program. Students select and follow a track in molecular genetics or computational genetics in the first semester of year 2. At this point course requirements differ slightly between these two paths: Students in the molecular genetics track take Advanced Topics in Molecular Genetics (HGG 650) in the second semester, while the computational genetics track students take a second course in biostatistics (EPH 602) and a course in Design and Analysis of Human Genomic Studies (HGG 621).

In addition to the required core courses, all students participate in a clinical rotation and serve one semester as a teaching assistant for a core course any time after passing the Qualifying Examination.
It is expected that on average, students will complete the program in five years. Please review the complete course descriptions on the COURSE tab above. The general core curriculum is shown in the Plan of Study below:

**Plan of Study - Molecular Track**

**Mission**

The Interdepartmental PhD Program in Human Genetics and Genomics (HGG) aims to train scientists broadly in areas of human genetics and genomics relevant to human health and disease. Human genetics is a multidisciplinary field that requires training in three core competencies: clinical, molecular, and statistical genetics. This broad training differentiates human genetics graduate programs from other programs in molecular biology, biochemistry, epidemiology, or statistics that focus training on one of the three core areas. The mission of the HGG is to prepare the next generation of genomic scientists to conduct research in molecular, statistical and clinical genetics and to translate these research results into improved medical care and public health interventions.

**Goals**

**Student Learning Outcomes**

- Students will demonstrate an overall knowledge and understanding of the core concepts in Human Genetics and Genomics, including the essential skills to conduct research in Human Genetics and Genomics.
- Students will demonstrate critical thinking skills, the capability to develop hypotheses, and the ability to evaluate their hypotheses, paying attention to responsible conduct of research as appropriate.
- Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

**MD Program**

**General Information**

The University of Miami Miller School of Medicine enrolls approximately 198 students each year. One-hundred and fifty will be in the MD program and 48 in the 4-year, combined degree, MD-MPH Program. It has been a long-standing policy of the School of Medicine to admit students with diverse backgrounds. Therefore, qualified non-traditional students, women, socio-economically disadvantaged students, and minorities underrepresented in medicine, are especially encouraged to apply.

**U.S. Citizenship**

All applicants must be US citizens or permanent residents of the United States with an alien registration receipt (green) card in their possession at the time they complete the AMCAS application. Applicants who apply as permanent residents will be required to submit a photocopy of their alien registration receipt card.

**Florida Residents**

Since the School of Medicine is no longer subsidized by the State of Florida, Florida residents are not given preference in admissions decisions. For tuition purposes, a Florida resident is one whose parents or guardians (or the applicant, if independent) have established legal residence in, and resided permanently in, the State of Florida for twelve consecutive months immediately prior to the first day of classes. Applicants can not claim Florida residency simply on the fact that they lived in Florida coincident with attending a college or university. To receive initial consideration as a Florida resident, applicants must declare Florida as their state of residence on their AMCAS application. Exceptions to this requirement will not be granted.

**Residents of Other States**

The Miller School of Medicine has made a significant commitment to enroll more students from outside the state of Florida. This departure from previous policy reflects the growing national prominence of the School of Medicine and the national and international reputation of our clinical facilities and specialty centers, and our outstanding research programs.
Financial Assistance Information

The University of Miami Miller School of Medicine is a private medical school. It has been a priority of the medical school to keep the tuition and fees very reasonable. Please visit our Financial Assistance Website. (http://mededu.med.miami.edu/contact-us/student-financial-assistance/)

Curriculum Requirements

The NextGenMD curriculum is divided into 3 phases:

**Phase 1** is grounded in the foundational and translational sciences that are taught and learned in a case-based format that incorporates laboratory and clinical science, health systems science, social determinants of health, core clinical skills, and professionalism. Phase 1 is completed over 14 months, inclusive of 2 months of summer capstone work. Phase 1a is 4 weeks and largely under the Medicine as a Profession longitudinal theme (see later). Phase 1b is 12 weeks and is comprised of foundational, translational, and health systems sciences taught in the context of the healthy patient. Phase 1C is 30 weeks and incorporates foundational, translational, and health systems sciences taught in a symptom-based format.

**Phase 2** consists of integrated clinical clerkships, where continued themes of foundational, translational, and health systems sciences are embedded within clerkships; this provides students ample experience to plan their future areas of concentration. Phase 2 is completed over 12 months and begins with an introductory bootcamp to the clerkship curriculum that covers core content areas: defining the medical student role, interprofessional teamwork, basic procedural skills, basic documentation skills, self-directed learning techniques, and how to be an effective learner in the clinical setting. Additionally, the bootcamp covers content that is reinforced throughout the entire phase including social determinants of health, patient safety, leadership and health advocacy, wellness promotion, and quality improvement. Phase 2 is divided into four, 12-week integrated clerkships:

All clerkships begin with an introductory week of interprofessional simulation exercises between medical, nursing, and other health professions students at sites including the Simulation Hospital at our School of Nursing and Health Studies. Basic science content is delivered using multiple modalities including online learning and interactive large group sessions, in addition to case-based collaborative learning that occurs in the introductory week and continues weekly during each clerkship block.

Between Phases 2 and 3, students are provided dedicated time to prepare for and take USMLE Steps 1 and 2CK.

**Phase 3** occurs over 17 months and allows all students to develop a personalized pathway of excellence in a specialized area of interest, including scholarly work, dual-degree pursuits, or an early transition to residency. All students are required to select a pathway of emphasis for their scholarly work, or obtain a dual degree from a selection of existing 4-6-year dual degrees in addition to new 4-year dual degrees being developed. A select group of students who meet defined competencies can enter residency early after 3 years. The accelerated pathway to residency will be available to no more than 10% of the class and includes residency programs within our institutions.

Plan of Study

Mission

The NextGenMD curriculum strives to empower learners to transform lives and inspire learners to serve the global community. The curriculum will produce transformational leaders who will shape the future of medicine, direct health systems, and champion discovery and its translation into clinical interventions.

Goals

The NextGenMD curriculum emphasizes:

- Active, case-based, collaborative learning with early clinical experiences
- Integration of basic sciences, clinical medicine, and health system sciences throughout all phases of the curriculum
- Personalized areas of scholarly concentration including options for a 4-year dual degree or an accelerated transition to residency
- Opportunities to study social and cultural determinants of health in South Florida to address health disparities

Graduates of the program will demonstrate knowledge, skills, and attitudes/behaviors in four core domains:
1) Professionalism and Interpersonal Skills; 2) Health Systems Sciences; 3) Biomedical Knowledge and Clinical Care; and 4) Practice Based Learning

Student Learning Outcomes

- Students will demonstrate master of biomedical knowledge (i.e., anatomy, biochemistry, immunology, etc.) required to practice clinical medicine.
- Students will demonstrate clinical skills proficiency, such as performing a complete physical examination. Student competency in performing a physical examination and in clinical skills is evaluated by student performance on end of year 1 and 2 competency exercises.
- Students will demonstrate application of knowledge and skills to clinical decision-making and the practice of medicine, including formulating differential diagnoses, and a diagnostic and therapeutic plan. Student competency in organizing clinical data, synthesizing clinical information and formulating management plans is demonstrated by performance on the United States Medical Licensing Step 2 Clinical Skills Examination.

MD/JD Program

Overview

The University of Miami School of Law (http://www.law.miami.edu/) in partnership with the University’s Miller School of Medicine propose to offer a joint MD/JD degree program. The law curriculum prepares medical students for careers in health sector law, leadership and policy. It also prepares future physicians for legal aspects of running a private medical practice or heading a group practice.

This joint program allows students to obtain both MD and JD degrees in six years. The first two years are spent in the MD program. Years three and four are focused on the JD degree and the final two years are spent completing the MD degree and the final JD credits.

In the third year, students will complete the standard first year J.D. curriculum at the School of Law for a total of 32 credits. During the fourth year, it is expected that students will complete a total of 33 credits. There are an additional 12 credits of coursework to be completed in the School of Law which will take the form of summer courses and/or intersession courses. The total number of credits to be completed through coursework at the Law School for the JD degree is 77. The remaining 11 of the 88 required JD credits will be transferred from the Medical School course work and will be double-counted toward both degrees. These credits may include co-listed courses, such as the Idea of a Hospital, an interdisciplinary course co-listed in both the Law School and Medical School (as well as other UM Schools). Students will be able to take co-listed courses and register in the program where the student would like the credits to apply. Of course, co-listed courses are particularly suitable to double-counting for the J.D. degree when taken as a Medical School course.

The Law School expects the list of recommended courses to expand in the future. Opportunities for practicums and externships will be developed as part of this program. Students will receive their J.D. degree during the May graduation of their sixth year of the joint program because some of the credits to be transferred from the School of Medicine will be taken their 6th year when electives are built into the medical school curriculum. An elective course offering which will be required for this joint degree is the Medical Legal Clinic (offered as either a 2-credit or 4-credit course) sponsored by the Law School and offered through the School of Medicine. Students who have completed all but the last five credits may walk at Law School graduation with their law school cohort. (Please note that the 11 credits from the Medical School to be transferred to the J.D. program may not be from any Medical School courses taken prior to matriculation in the Law School.)

Admission Requirements

To be admitted to this program, students must be admitted to the Miller School of Medicine M.D. program and be in good standing. Students apply to the Law School during the fall of their 2nd year of the M.D. program and are encouraged to take the LSAT during the summer after Year 1 of Medical
School, and no later than December of their second year of Medical School. The LSAT is offered four times annually: February, June, October and December.

**Sample Plan of Study**

This sample plan of study is based on several assumptions:

1. Students will begin in the MD program;
2. The program will be promoted to MD students in their first year of Medical School;
3. Students will apply to Law School no later than January 1st of their second year of Medical School;
4. Students must take the USMLE Step 1 exams between May and June of their second year of medical school;
5. Students will complete the third year clinical psychiatry clerkship before enrolling in the law school in August of year 3;
6. Students will be required to complete 77 credits of coursework (including law clinics, practicum, externships, and/or intersession courses) in the Law School with 11 credits being applied from coursework in the M.D. program

</tbody>
</table>
Students complete the first two years of medical school curriculum, sit for USMLE Step 1 examination, and begin the third year MD curriculum (Transition to the Clerkships one-week 2 course and the six-week Psychiatry clerkship, and then have a two-week vacation before beginning law studies in August of year three.

After completing the first year law curriculum, students take 5-6 law credits during summer session; they then have 2 weeks of vacation before starting their second year of law studies.

Students will take 16-17 credits each semester during their second year of law school. After completing second year law curriculum students will take 5-6 law credits during summer session following their second year. At the end of their second summer of Law School, each student must have completed a total of 77 JD credits at the Law School.

**MD/MBA Program**

**Overview**

The University of Miami Herbert Business School (http://bus.miami.edu) offers a joint M.D./M.B.A. degree program in partnership with the Miller School of Medicine. The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, as well as prepare medical students for careers in health sector management, leadership and policy.

The M.D./M.B.A. program adds an additional year to the four-year medical school curriculum. The M.B.A. coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD/MBA candidates have the option of choosing a Research Track (project based which provides practical hands on experience) or an Elective Track (provides business electives). Please refer to the curriculum for details.

Questions about the M.D. portion of the program should be directed to Senior Associate Dean Alex Mechaber, M.D., at the Miller School of Medicine, AMechabe@med.miami.edu (MOConnell@med.miami.edu), while questions about the MBA portion should be directed to Admission Advisors at the Miami Herbert Business School, 305-284-2510 or mba@miami.edu.

M.D. students are required to submit a Full-Time (https://www.applyweb.com/apply/miamibus/) MBA online application to be considered for the M.D./M.B.A. Program.

The application deadline for this program is April 1st of each year.

To obtain detailed program admission information, please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/md-mba/).

**Admission Requirements**

- Completed application for admission submitted through BusinessCAS
- A baccalaureate degree from an accredited institution
  - Official academic transcripts from all previously attended post-secondary institutions must be submitted directly to BusinessCAS.
  - International applicants must have their educational credentials from institutions outside of the United States verified by an approved international credentialing evaluation service such as World Education Services to confirm degree equivalency and GPA calculation.
- Statement of purpose and short-essay responses to the career goal and program-related questions in BusinessCAS
• A current resume
• At least one letter of recommendation (up to three allowed) may be submitted through the BusinessCAS portal by including recommender contacts within the Program Materials section of the application.
• Official GMAT (or GRE) score to be sent directly to the University of Miami Herbert Business School by using the relevant code below.
  • GMAT Institution Code is 7NV-S1-92
  • GRE institution Code is 5815
• An official TOEFL or IELTS score is required as proof of English proficiency for international applicants who did not receive a degree in the United States or a foreign country where English is the primary language. The following minimum score is required for admission to a graduate business degree program.
  • TOEFL - 94 or above (iBT only)
  • IELTS - 7.0 or above

If you do not yet have a GMAT or GRE score or TOEFL or IELTS score (international candidates only), you may complete and submit your application prior to taking the exam by indicating your approximate date within the Standardized Tests tab in the Academic History section. Select "Add Test Score" by the relevant test, then indicate that you have not yet taken the exam and add your estimated test date in the section provided.

We encourage candidates to upload unofficial transcripts and test scores (if required) with their BusinessCAS application in order to expedite the review of their file while official documents are processed.

QUESTIONS?

Connect with Miami Herbert Business School's graduate enrollment advisors at (305) 284-2510 or by email at mba@miami.edu.

MD/MPH Program

Overview
The educational mission of the University of Miami Miller School of Medicine interdisciplinary MD/MPH dual degree program is to graduate physicians with the ability and desire to improve the health of all populations, especially those most vulnerable and underserved, by alleviating suffering and eliminating healthcare disparities through their leadership in patient care, research, education, health care administration and the community.

Four-Year MD-MPH Program:
The University of Miami Miller School of Medicine (UMMSM) MD/MPH program is unique in several ways. There are very few four-year MD/MPH dual degree programs offered at medical schools in the United States. Our program integrates significant components of the MPH coursework into the curriculum beginning in the first year and culminating in a required four-week clerkship in Public Health. In addition, the medical school has partnered with the Palm Beach County Health Department http://www.pbchd.com. This partnership provides opportunities to work with public health professionals in one of the country’s most academic and comprehensive public health departments.

The program is designed to provide graduates with the clinical and research skills required to approach health problems from a population and prevention perspective by integrating the roles of the biological sciences and clinical practice into the broader sets of knowledge and practices used in public health. We will graduate physicians who are provided the academic knowledge and skills, as well as the clinical experience to improve the health of all populations, especially those most vulnerable and underserved.

The MD/MPH dual degree program is an educational track at the UMMSM that will provide:

• Both degrees in four years
• Integrated and innovative training in both clinical medicine and public health
• In depth training in public health that provides the skills needed to reduce death and disability at the population level
• The program includes studies at the Miami campus and at our regional medical campus in Palm Beach and Broward Counties working in our community teaching hospitals and clinics and with Department of Health professionals and faculty physicians in community settings
• Sustainable partnerships that provide opportunities to assess and improve public health, working with Public Health physicians in clinical and public health activities during clinical rotations
• Opportunities for community-based research to complete the required special project for the MPH degree (capstone)

Admissions
Applications are accepted through the American Medical College Application Service® (AMCAS®). The MSOM Secondary Application will give you the option to apply to only the MD/MPH program, or to both the MD and the MD/MPH program. Selecting either of these choices will provide you with specific questions about your interest and experience in public health. The criteria for eligibility and academic prerequisites for the MD/MPH program are the same as those for the regular MD program. For more information, visit admissions.med.miami.edu or contact the Office of Admissions at med.admissions@miami.edu or 305.243.3234.

**MD/MS in Genomic Medicine**

**Be a part of the future of genomic and personalized medicine!**

This 4-year concurrent master's degree in Genomic Medicine will provide you with the background, knowledge, and understanding to integrate the ever-expanding field of genomics into your practice. No matter which medical specialty you choose, genomic medicine is increasingly becoming an integral part of patient care with the use of predictive clinical sequencing, pharmacogenetics, and whole genome analysis.

**Educational Mission of the MD/MS Program in Genomic Medicine**

The educational mission of the program is to graduate clinicians with the ability to integrate genomic knowledge into their clinical practice. In collaboration with the Hussman Institute for Human Genomics, graduates will be trained in human genetics, family history, diagnostic genomic tests, high throughput sequencing, pharmacogenomics and the newest genomic concepts and approaches. The MD/MS degree will prepare students to be leaders in the adoption and integration of these methods in routine clinical care.

**The MD/MS degree program in Genomic Medicine will provide:**

- Both degrees obtained during 4 year MD degree
- Integrated and innovative training in both clinical and human genomics
Online coursework coupled with small group learning sessions for smooth integration into your schedule

Hands-on experience analyzing and interpreting genome sequence data

Capstone experience featuring clinical case descriptions, journal club, and individual research projects

Applying for the MD/MS Program in Genomic Medicine: Online application (http://biomed.med.miami.edu/apply/apply-md-ms-in-genomic-medicine/)

- Applicants must be accepted first-year medical students in the UM Miller School of Medicine. The first block of MS courses begin in the 2nd academic semester (spring) of the first year.
- Applications are due by November 1st of each year.
- The academic prerequisites are the same as those for the regular MD program.
- Graduate Record Exam (GRE) test scores are not required to apply to the program.
- Applicants will be notified of their acceptance status in late November or early December for coursework that will begin in the Spring semester of the first year of medical school.
- Acceptance is contingent upon successful completion of first semester coursework.
- Tuition is equal to UM Miller School of Medicine dual degree tuition.

For additional information (http://medgen.med.miami.edu/education/msgm/), please contact Dori McLean, Manager of Programs, DMclean@med.miami.edu.

Curriculum Requirements

The curriculum below outlines the additional course work required to earn the Master’s in Genomic Medicine (MSGM). Students enrolling prior to Fall 2020 will complete the MD curriculum in place when they began their studies. Students enrolling in Fall 2020 or later will follow the NextGenMD curriculum which is outlined in detail under the MD Program curriculum tab (p. 2559). Please review additional information under the Plan of Study tab. (p. 2567)

Plan of Study- Medical

Students enrolling prior to Fall 2020 will complete all GNM courses and the MD curriculum in place when they began their studies. Students enrolling in Fall 2020 or later, will complete all GNM courses and follow the NextGenMD curriculum listed on the MD Program curriculum tab. (p. 2559)

Plan of Study- Genomic Medicine

The Master’s in Genomic Medicine (MSGM) coursework is concurrent with the UM Miller School of Medicine MD Program beginning in Spring semester of the first year and ending upon completion of the MD program in the 4th year. Each course is made up of self-guided online instruction and reading and in-person small group work. In the first two years, self-guided instruction is expected to require approximately 3 hours per week of time commitment. Small group work is an additional 3-hour block of time per week that will be determined upon the MD program schedule for that semester. Up to 3 additional hours per week may be required for assignments, projects, and review. Years 3 and 4 contain a clinical clerkship elective and the MSGM Capstone that will culminate in a written portfolio and public presentation of the Capstone experience.
Mission
The educational mission of the Master of Science in Genomic Medicine (MSGM) program at the University of Miami Miller School of Medicine (UMMSM) is to graduate clinicians with the ability and desire to integrate genomic knowledge into clinical practice. Graduates will be trained in the use of detailed family genetic history, diagnostic genomic tests, high throughput sequencing, and pharmacogenomics, and will develop an understanding of the ethical and policy implications of genomic medicine.

Goals
The MSGM degree will prepare students to be leaders in the adoption and integration of these methods in routine clinical care. While multidisciplinary, this degree program's core emphasis is on clinical and translational research skills. Students completing this program will continue on to graduate medical training and future careers in medicine, incorporating the tools of genomic medicine into their clinical practices.

Student Learning Outcomes

- Students will demonstrate an overall knowledge and understanding of the core concepts in Genomic Medicine, including the essential skills to evaluate research in the field and apply results to the practice of medicine.
- Students will demonstrate critical thinking skills, the capability to develop clinical research hypotheses, and the ability to evaluate these hypotheses, paying attention to the responsible conduct of research as appropriate.
- Students will demonstrate the ability to write effective research reports and present results orally.

GNM 602. Clinical Applications of Genomic Medicine II. 3 Credit Hours.
The Clinical Applications of Genomic Medicine series provides genomic medicine case studies and systems-based learning. Topics covered in the fall include cardiovascular, respiratory, renal/urinary, gastrointestinal/nutritional systems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
GNM 605. Research Ethics. 1 Credit Hour.
This course introduces foundational concepts in research ethics in preparation for conducting the genomic medicine practicum. Online Human Subjects Research and Responsible Conduct of Research training through the CITI program website will be supplemented with three hours of in-person discussion sessions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GNM 610. Clinical Applications of Genomic Medicine I. 3 Credit Hours.
This course provides introductory background for understanding genomics, genomic techniques as well as provides genomic medicine case studies and systems-based learning. Initial topics include basic concepts of genomic medicine, genomic techniques involved in clinical applications, integration of genomic medicine into clinical setting, importance of translational research, benefits for patient and physician, transitioning with the medical curriculum into case studies. This course is focused on complex genetic disorders, and use of web-based tools to use in clinical work.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GNM 630. Clinical Applications of Genomic Medicine III. 4 Credit Hours.
The primary objective of this course is to prepare students to evaluate the clinical utility of a genetic test and apply that information in a clinical setting. Illustrations of these concepts are drawn from the systems-based curriculum spanning December (ophthalmology and dermatology) and spring (rheumatology, infection & immunity, hematology & oncology, diabetes & metabolism, endocrinology & reproductive medicine). The class will meet once each week (2 hours each session), for literature-based discussion sessions and case-based learning.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GNM 631. Genomic Medicine Laboratory. 3 Credit Hours.
Students will rotate in the molecular genetics and biochemical genetics diagnostic laboratories, gaining experience with genomic testing in a clinical setting and interpretation and communication of results.
Components: LAB.
Grading: CNC.
Typically Offered: Spring.

GNM 660. Computational Methods for Genomic Medicine. 3 Credit Hours.
The objective of this course is to gain a working knowledge of computational methods utilized in primary and secondary analysis of genomic technologies and apply these to a clinical setting. This will prepare students to perform practical data analysis in the GNM 631 course offered in Spring.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

GNM 680. Genomic Ethics and Public Policy. 3 Credit Hours.
This course provides an introduction to the scientific, socio-ethical and policy issues arising in the context of genomic medicine. It is designed to improve your critical thinking and give you the tools to evaluate the wide range of challenges that genomic medicine brings to individuals and societies alike. We will cover a broad spectrum of topics, from the history of eugenics, to genetic testing and screening through the life cycle (i.e. pre-implantation and pre-natal testing, newborn, population and carrier screening, direct-to-consumer genetic testing), as well as bioethical (i.e., informed consent, privacy, confidentiality, etc.), policy (i.e., professional duties, patents, discrimination, etc.), and societal issues (i.e. health disparities).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

GNM 690. MSGM Capstone. 6-12 Credit Hours.
The purpose of the Capstone Segment is to provide the research and clinical application aspects of training. It can be initiated at any point after admission to the MSGM Program, and results in 6 credits earned in Spring of Year 4. All components (case reports, mentored research project, genomic medicine education) will be summarized in a portfolio of work and presented at the end of the Capstone.
Components: LAB.
Grading: SUS.
Typically Offered: Spring.

Medical Scientist Training Program (MD/PHD)
http://mdphd.med.miami.edu/
Overview
The Miller School of Medicine Medical Science Training Program (MD-PhD Program) provides a unique training environment for exceptionally qualified individuals who want to pursue careers in academic medicine and research. The curriculum comprises the school's outstanding preclinical and clinical training, rigorous PhD graduate training and several elements, including professional development workshops and other activities, specifically designed to enhance the MSTP training experience. There has been a long tradition of research excellence and physician scientist training at the Miller School of Medicine. With the opportunities for basic and clinical research here, Miami's diverse population and access to Latin America and the Caribbean, the backdrop of a vibrant city, make the Miller School a unique place for MSTP training.

PhD Programs
The following doctoral programs, described elsewhere in this bulletin, participate in the MSTP. The MSTP office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry & Molecular Biology (http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology/)
- Biomedical Engineering (p. 2234)
- Biostatistics (http://www.biostat.med.miami.edu/academics/phd-in-biostatistics/)
- Cancer Biology (http://biomed.med.miami.edu/graduate-programs/cancer-biology/)
- Epidemiology (http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology/)
- Human Genetics & Genomics (http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics/)
- Microbiology and Immunology (http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology/)
- Molecular Cell & Developmental Biology (http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology/)
- Molecular and Cellular Pharmacology (http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology/)
- Neuroscience (http://biomed.med.miami.edu/graduate-programs/neuroscience/)
- Physiology and Biophysics (http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics/)
- Prevention Science & Community Health (http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science/)

1600 NW 10th Avenue, Room 1129
Miami, Florida 33101-6189
MSTP@miami.edu (mdphd@miami.edu)

Admission Requirements
Admission to the MSTP is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Applicants must complete the minimum course requirements (http://admissions.med.miami.edu/md-programs/general-md/prerequisites/) of the MD Program to be considered for the MSTP. The Graduate Record Examination (GRE) is not required for matriculation into the MSTP.

Competitive applicants will have the following:

- Completed AMCAS & Secondary Application for MSTP
- Excellent academic record
- Strong MCAT scores
- Significant research experience
- Co-authorship on abstracts and / or peer-reviewed papers is desirable
- Strong letters of recommendation from research mentors and other scientists who can specifically address the applicant's potential as a physician scientist
- Motivation to pursue a career as a physician scientist

Applications from under-represented groups, including minorities, individuals with disabilities and women, are encouraged.
All MSTP applicants are reviewed by both the MD Program Admissions Committee and the MSTP Program Admissions Committee. These evaluations proceed independently, and a student will still be considered for the MD program even after an unfavorable review by the MSTP. A successful applicant is granted admission to both the MD Program and the MSTP.

Full application instructions can be found here (http://mdphd.med.miami.edu/Admissions/).

**Microbiology and Immunology**

http://biomed.med.miami.edu
Overview

Microbiology and Immunology is a multidisciplinary program encompassing the areas of cellular and molecular immunology, virology, microbial genetics, and pathogenic bacteriology.

The goals of the department’s graduate program are to provide each student with the opportunity to acquire the theoretical background and conceptual framework with the technical research skills necessary to attain a PhD. During the first year of study, a broad educational base in all disciplines together with laboratory rotations introduce students to the diverse array of research topics. Students then choose one area of concentration for their research. The varied interests of the faculty provide numerous opportunities for student participation and a broad choice in dissertation research.

Active research in immunology includes the areas of cytotoxicity, programmed cell death, cytokine receptor signaling, clinical and experimental bone marrow transplantation, stem cell biology, gene therapy for cancer treatment, antigen recognition, cell differentiation and communication, aging of the immune system, interleukins, genetic control of immunoglobulin production, gene activation, and evolution of the immune response. Research in other areas includes molecular biology of virus-host interaction in both animal and human systems, control and regulation of bacterial pathogenesis, selective tumor chemotherapy and radiation therapy, and therapy of parasitic infections.

Goals

The goals of the MIC Graduate Program include training and acquisition of:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology
- Technical skills required for experiments in the area of specialization
- Presentation skills required for teaching, scientific talks, manuscripts, and grants
- A preparation for a scientific career in academia, industry, or teaching within 5 ½ years

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive Candidates will have the following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume / CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply/).

**Doctoral Programs**

- **Ph.D. in Microbiology and Immunology** (p. 2576)

**MIC 202. Your Health and Immune System/ Microbiome. 3 Credit Hours.**
Recent advances in the prevention and treatment of diseases that we and loved ones’ experience. Many of these advances in prevention, diagnosis, and treatment strategies are our based on immunological principles. The course will examine how advances in our understanding of the immune system are having unprecedented effects on both health care and society. The immune system must shield us from bacterial, fungal, and viral invasion while harmoniously co-existing with beneficial microbes in our Microbiotas. The immune system is also a surveillance system that recognizes and kills the emerging enemies within: cancer cells. The course will discuss recent advances in immunology, genetic manipulation, and the Microbiota; their consequences on emerging notions of personalized health and medications; the creation of tailored biological therapies against cancer and other maladies; and what all this means for the cost healthcare, the difficult choices, and the politics of medicine. We will critically examine popular representations of these medical advances, being careful to distinguish fact from fiction and accurate representation from exaggerated claims.
Requisite: Not for Microbiology and Immunology Majors or Minors.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**MIC 601. Medical Microbiology. 5 Credit Hours.**
Course discusses the nature of microbial agents of infectious disease as well as relationship of virulence to host resistance and fundamental immunologic concepts. Microbial physiology and genetics, the structure, design, and mechanism of action of antimicrobials.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Offered by Announcement Only.

**MIC 623. Mechanisms of Microbial Virulence. 2 Credit Hours.**
This course will focus on the mechanisms employed by bacterial and viral pathogens to produce disease in animals and humans. The course is divided into two 3 week modules. The first module (1 credit) will cover bacterial pathogens with an emphasis on the bacteria-host cell interaction. Specific topics will include: bacterial attachment and invasion of eukaryotic cells, virulence gene regulation, secretion of virulence factors, bacterial toxins and obligate intracellular bacterial pathogens. The second module (1 credit) will cover viruses and human viral diseases with an emphasis on viral replication, gene expression, virus-host cell interactions and viral oncology. Classes will consist of a mixture of lectures and discussions of recent or classic papers. There will be one exam per module.
Prerequisites: MIC 775 and MIC 755.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Spring.

**MIC 705. Faculty Research and Discussions. 1 Credit Hour.**
Forum for the discussion of the current research projects and interests of the faculty. This course provides students with the opportunity to exchange ideas about important scientific questions and the technologies being applied to experimentally address the hypotheses being tested.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall.

**MIC 711. Accelerated Basic Science Medical Curriculum. 1-18 Credit Hours.**
Beginning in the latter part of June each year, extending to the middle of February of the ensuing year, the following accelerated and intensive complete basic science medical curriculum is offered: Embryology, Gross Anatomy, Histology, Biochemistry, Neuroanatomy, Biophysics and Neurophysiology, Systemic Physiology, Pathology, Medical Microbiology, and Pharmacology. single grade will be entered on the graduate transcript for this course.

**Components:** LEC.
**Grading:** GRD.
**Typically Offered:** Fall & Spring.
MIC 716. Advanced Molecular Biology. 3 Credit Hours.
The molecular basis of cellular function and regulation in both procaryotic and eucaryotic systems. The molecular genetics and biochemistry of
the genetic material and its utilization during replication, transcription, translation, cellular growth, division, and differentiation. Recombinant DNA
technology and molecular genetics are discussed. This course is designed for graduate students in biological sciences. A good background in biology
or biochemistry is recommended.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIC 726. Laboratory Experimentation. 4 Credit Hours.
One or two laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology,
molecular biology, and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing
research projects.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIC 727. Laboratory Experimentation. 6 Credit Hours.
Two or three laboratory training sessions of 6-12 weeks each. Each student rotates through faculty research laboratories in the areas of immunology,
molecular biology and microbiology, (bacteriology, virology, parasitology) where they receive "hands on" experience by participating in ongoing
research projects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIC 728. Principles of Immunology. 3 Credit Hours.
This team-taught course will present core concepts in immunology and scientific reasoning in immunological research. The course is offered with
seven weekly modules. Each module has a common theme and consists of three lectures on fundamental immunological concepts and one session
where students present and discuss a research paper related to the theme of each module. The paper discussion session will include the use of
disease models as a portal to understand the function of immune system in health and disease. The module topics are: (1) Molecular basis of immune
recognition, (2) Innate immunity, (3) Lymphoid cell development, (4) Initiation of immune responses, (5) T cell differentiation and interaction with other
immune cells, (6) B cell immunity and tolerance, and (7) T cell tolerance. There will be one exam following the first four modules and the second exam
after the remaining three modules. One credit can be awarded for completion of any three modules and their related exam questions. On credit can
also be awarded for completion of any two modules, their related exam questions, and a self study of a current research article on immunology or
immune-based therapy using a self-designed question list in a format similar to that used in the paper discussion sessions.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIC 731. Special Work. 1-5 Credit Hours.
With the guidance of a faculty advisor, students will choose a focused topic in the area of immune therapy, survey the research findings from the
literature and write a review article. Students may then design a translation or clinical study that can be integrated as an Aim or a sub-Aim into their
thesis proposal.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MIC 751. Advance Topics in Microbiology and Virology. 1-3 Credit Hours.
This advanced level course is intended to explore complex interactions of microbial pathogens and hosts at the systemic, cellular, subcellular and
molecular levels. This course consists of three modules focusing on the following topics: (1) Ubiquitin molecules at the host/pathogen interface and
inflammasomes (1 credit); (2) Microbes, emergency hematopoiesis and autoimmunity (1 credit); and (3) The role of microbes in cancer initiation,
progression and therapy (1 credit).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIC 755. Microbiology and Immunology Research- Career Skills and Proficiencies. 1-6 Credit Hours.
This is a longitudinal training course delivered throughout all years of training. Students start taking it upon joining the Microbiology and Immunology
Program to perform research under the mentorship of participating faculty. Up to six credits may be awarded commensurate with attendance and
participation in the four modules. The four modules include: Teaching assistance (TA) experience (3 credits); Attendance and participation in the
weekly departmental seminars and completing written assignments on the seminars topics (1 credit); Attendance, participation and presentation in
Journal Clubs (1 credit); Research Forums on Responsible Conduct of Research (RCR) and career skills (1 credit).
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MIC 761. Advanced Topics in Molecular Biology of Animal Viruses. 2 Credit Hours.
This course is organized around four major themes of virological studies: (i) viral genome transcription, replication, and virus assembly; (ii) viral pathogenesis; (iii) virus cell interactions; and (iv) antiviral strategies. Most recent research developments in these areas are covered through lectures by participating faculty members as well as paper presentations by students.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MIC 775. Advanced Topics in Immunology. 1-3 Credit Hours.
This course will explore in depth the current and advanced concepts and topics in selected areas of Immunology. We will cover recent advances and cutting edge experimental approaches in cellular and molecular immunology and also expose students to concepts and themes that link the various cell types into an effective immune system. The classes will consist of a mixture of lectures and discussions of recent papers and be divided into three modules: (1) Cellular and molecular networks of Immune System (1 credit); (2) Molecular regulation of Adaptive Immunity (1 credit); (3) Immunopathologies and Immunotherapies (1 credit).
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIC 780. Research Ethics. 1 Credit Hour.
The focus of this course will be on the principles of scientific integrity, in particular how to optimize rigor and reproducibility in study designs, experimentations / trials, data collection, data management, and reporting. The class will discuss how biological variables such as sex and age impact the interpretation of research outcomes, and how those variables should be considered in experimental model systems as well as in human subject recruitment and protections in clinical trials. The course will be offered in a mixed format of lectures, seminars, small group discussion and / or workshops. Throughout the class, students will initiate dialogs with clinicians who are involved in treating patients and / or clinical trials with immune therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MIC 799. Advanced Topics. 1-3 Credit Hours.
This team-taught course will present core concepts in immune therapy and scientific reasoning underlying the therapeutic approaches. The focus will be the mechanistic understanding of the mode of action (MOA) for the major types of immune-based therapeutic agents in autoimmune diseases, cancer and infectious diseases. The types of immune therapy discussed in this class will include molecular targeting with antibodies, fusion proteins or aptamers, cell therapy and gene therapy. The course will also include the use of human diseases as a portal to understand the function of human immunology. This course will be offered in a mixed format of lectures, seminars, problem-based learning in small groups, student-led discussion of a research and/or clinical trial article on immune-based therapy, with the guidance of faculty facilitator.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MIC 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

MIC 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MIC 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MIC 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MIC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MIC 840. Doctoral Dissertation - Post Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by their advisor/Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall.

MIC 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Ph.D. in Microbiology and Immunology

Overview
Microbiology and Immunology is a multidisciplinary program encompassing the areas of cellular and molecular immunology, virology, microbial genetics, and pathogenic bacteriology.

The goals of the department’s graduate program are to provide each student with the opportunity to acquire the theoretical background and conceptual framework with the technical research skills necessary to attain a PhD. During the first year of study, a broad educational base in all disciplines together with laboratory rotations introduce students to the diverse array of research topics. Students then choose one area of concentration for their research. The varied interests of the faculty provide numerous opportunities for student participation and a broad choice in dissertation research.

Active research in immunology includes the areas of cytotoxicity, programmed cell death, cytokine receptor signaling, clinical and experimental bone marrow transplantation, stem cell biology, gene therapy for cancer treatment, antigen recognition, cell differentiation and communication, aging of the immune system, interleukins, genetic control of immunoglobulin production, gene activation, evolution of the immune response and immune therapy against cancer, infection and autoimmune diseases. Research in other areas includes molecular biology of virus-host interaction in both animal and human systems, control and regulation of bacterial pathogenesis, selective tumor chemotherapy and radiation therapy, and therapy of parasitic infections.

1 Students in this program take PIB 700 twice for a total of 2 credits. Please see Plan of Study for more information.

2 **Bioinformatics Requirement:** All graduate students are required to complete a bioinformatics workshop or course before they graduate. This requirement can be met by taking either the PIB 706 (Bioinformatics for the Biomedical Sciences) or HGG 660 (Bioinformatics Theory and Practice), both tentatively offered every Spring. Students can also take Bioinformatics Workshops that are offered periodically.

3 Students accepted as Direct Admit into the Accelerated B.S. to Ph.D. track will be eligible to waive PIB 700 and PIB 701 and to replace those courses with other courses suitable for their academic background and training goals.

---

1. Students accepted as Direct Admit into the Accelerated B.S. to Ph.D. track will be eligible to waive PIB 700 and PIB 701 and to replace those courses with other courses suitable for their academic background and training goals.
Mission
The mission and objectives of the Microbiology and Immunology Ph.D. Graduate Program are to train students who wish to attain the Ph.D degree by active engagement in the design and performance of basic Microbiology and Immunology research with a Biomedical Focus that is intended to provide each Ph.D student with:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology with a focus on its application in human health;
- Creative, technical, analytical and ethical skills required for carrying out and interpreting experiments in a responsible manner in the area of Microbiology and Immunology;
- The ability to successfully design, produce and publish scientific discoveries emanated from their own research in Microbiology and Immunology; and
- The ability to respond to the increasing demands of collaborative and interdisciplinary research, presentation and communication skills required for presenting results in scientific talks, writing manuscripts and seeking funding through grants and proposals, teaching skills and experience, and professional preparation for a scientific career in academia, industry, health care, patent law or teaching within five years or less.

Goals
The goals of the MIC Graduate Program include training and acquisition of:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology
- Technical skills required for experiments in the area of specialization
- Presentation skills required for teaching, scientific talks, manuscripts, and grants
- A preparation for a scientific career in academia, industry, or teaching within 5 ½ years

Student Learning Outcomes

- Students in the Microbiology and Immunology graduate program will complete their training within 5 years of starting graduate school with mastery in "Knowledge of Discipline", "Responsible Conduct of Research", "Use of Appropriate Methodology", "Application of Knowledge/Methodology", Critical Thinking", Effective Written Communication", and "Effective Oral Communication".
- Students will demonstrate critical thinking skills and the application of the Scientific Method by showing the capability to develop hypotheses, and the ability to evaluate their hypotheses, paying attention to responsible conduct of research as appropriate.

Ph.D. in Molecular and Cellular Pharmacology
http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology

Overview
Scientists in the Molecular and Cellular Pharmacology Ph. D. Program apply knowledge and techniques from diverse areas of biology, chemistry, physics, and informatics to study the action of drugs on fundamental processes in living systems.

The goals of the research in this GRADUATE PROGRAM are:

- to identify new targets, mechanisms and pathways for development of therapeutics
- to use drugs and other bioactive molecules as tools in the study of basic biological processes
- to develop and study agents that may be beneficial in the treatment of disease

Research in this program is highly multidisciplinary, encompassing diverse fields, including genetics, biochemistry, biophysics, molecular and cell biology, imaging, computational modeling, bioinformatics and genetically engineered yeast, fly, and mouse models. The faculty are a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art approaches to important biomedical problems. Research interests of the faculty include:

Drug Discovery and Computational Pharmacology:
Investigators in this area focus on the use of bioinformatics, high-throughput assay development, medicinal chemistry, in vivo animal testing, and other tools to identify and develop novel molecular probes and possible lead candidates to address various therapeutic needs of interest including cancer, diabetes, cardiovascular, kidney and neurodegenerative diseases. Current research is focused on G-protein coupled receptors (GPCRs), protein kinases, regulation of gene expression, protein-protein interactions, and other post-translational modifications.

Cardiovascular Pharmacology / Muscle Contraction
Studies of cardiac muscle contraction and the effect of disease-causing mutations in the contractile apparatus of the heart on heart performance are being pursued. Current research areas include structure/function relationships in the proteins in health and disease, cardiotoxicity of chemotherapy agents, the role of microRNAs in cholesterol biosynthesis and smooth muscle cell plasticity, and the stem cell-based therapy for cardiac disease. In addition to cardiac myocytes, researchers investigate fibroblasts, endothelial and smooth and skeletal muscle cells.
Neuroscience / Endocrinology
Investigators in this area study the function, pharmacology, development and diseases of the nervous system. Current research interests include neuronal signaling, control of physiological functions by neurons, endocrine pancreas and kidney; the genetic and cellular basis of neural development and degeneration using the fruit fly Drosophila melanogaster as a model system.

Cell Biology / Cancer
Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, posttranslational modification and degradation of proteins, stem cells, and novel therapeutics targeting receptors and protein kinases.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; control of cell polarity and morphogenesis; molecular basis of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; and physiochemical and metabolic aspects of drug design.

Model Systems
Model organisms used in these studies include transgenic and knock-out/knock-in mouse, fly (Drosophila), and yeast models. Yeast and Drosophila are important models because of the powerful molecular and genetic approaches and tools available. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity and development. Because most of these processes are conserved in evolution, investigators are using these systems to screen for therapeutic agents and to identify targets of pharmacologically relevant compounds.

Office of Graduate and Postdoctoral Studies
1600 NW 10th Avenue (M-857), Suite 1128-A
Miami, Florida 33136
305 243-2492

Admission Requirements
Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:
• Excellent academic record
• Research experience in a laboratory setting
• Publications of abstract and / or papers
• Co-authorship in a peer-reviewed journal is recommended
• Strong letters of recommendation from research scientists who know the candidate well
• Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:
• Online Application
• Application Fee
• Official Academic Transcripts
• English Proficiency Exam (non-native speakers)
• Statement of Purpose
• Resume / CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply/).

Total Credit Hours: 68-92

---

1. Students in this program take PIB 700 twice for a total of 2 credits. Please see the Plan of Study for more information.
2. Students in this program take MCP 701 four times for a total of 8 credits. Please see the Plan of Study for more information.
3. The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. Nearly all of the student's time is spent on original laboratory research – with a minimum total of 24 credit hours of research for graduation.
4. MCP 743 is a pre-requisite requirement which must be completed prior to enrolling in MCP 704 & MCP 753.

Plan of Study

In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development.

In subsequent semesters, students take core courses encompassing Mechanisms of Drug Action MCP 704, Neuropharmacology MCP 768, Cardiovascular Pharmacology MCP 732, Python Programming for Bioscientists MCP 743, Systems Biology and Approaches in Pharmacology MCP 752, and Computational Pharmacology and Fundamentals of Drug Design MCP 753. A variety of elective courses are offered by this program and other basic science programs at the Miller School of Medicine.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MCP program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. By the beginning of the spring semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the scientific proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student and mentor in the process of obtaining extramural funds to support the student's stipend.
The thesis proposal is expected to be passed during the third year, Fall semester. It is important to note that in the MCP program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Mission
The Graduate Program in Molecular and Cellular Pharmacology (MCP) offers graduate training leading to a Ph.D. in Pharmacology. The mission of the program is to endow our students with the skills for research work in the area of life science.

Goals
Our students learn:

- To understand central concepts in pharmacology and basic biomedical science;
- To identify existing gaps in current knowledge about molecular and cellular pharmacology and formulate scientific hypotheses; and
- To design sound research plans, perform original laboratory or computational research, analyze data and effectively disseminate the results.

Student Learning Outcomes
- Students demonstrate the ability to produce original research data, and publish it in peer-reviewed international scientific journals.
- Students learn to be flexible in applying their knowledge base to the rapidly changing employment environment.

MCP 701. Seminar. 2 Credit Hours.
Review of related literature, discussion of special topics, student presentations and attendance of faculty/department seminars. Course may be repeated for a total of eight credits.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
MCP 704. Mechanisms of Drug Action. 3 Credit Hours.
This course consists of a combination of lectures, problem sessions and student presentations. Students will be given in-depth exposure to the fundamental principles of Pharmacology. The mechanism of action of some specific drug classes will be examined in detail.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCP 731. Special Topics. 1-6 Credit Hours.
Directed readings on subjects not ordinarily treated in depth in specific courses. Course may also consist of special laboratory problems.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCP 732. Cardiovascular Pharmacology. 2-3 Credit Hours.
The course covers cardiovascular pharmacology, necessary cardiovascular physiology and anatomy and the function and pharmacology of the autonomic nervous system. The students learn about the function and energetics of the heart and how it is changed in cardiac disease.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCP 743. Introductory Python Programming for Bioscientists. 3 Credit Hours.
The course is designed to teach the basic of the Python programming language. Students will learn to use code to solve problems related to biological datasets such as genomes, proteomes, and molecular structures.
Components: DIS.
Grading: SUS.
Typically Offered: Spring.

MCP 752. Systems Biology and Approaches in Pharmacology. 3 Credit Hours.
In this course students will discuss the biochemical structure and function of signaling pathways that are most frequently targeted by the pharmaceutical industry. Students will be exposed to novel concepts and findings, in particular with regards to innovative therapeutic applications. Each week will address a different pathway or signaling network, its biological targets and functions, and specific drugs that target it. Each week includes one lecture and one class where students and instructor convene to discuss articles, technical approaches or fundamental questions in the field.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCP 753. Computational Pharmacology and Fundamentals of Drug Design. 3 Credit Hours.
In pharmacology, the importance of computation and bio- and chemo-informatics cannot be overestimated. This course is collectively taught by the MCP faculty and addresses the following four distinct areas. (1) Computer-based analysis of drug-receptor interactions. Students learn principles and specific software packages for in silico docking of drugs to proteins, predict structure-activity relationships and become familiar with programming tools required for such tasks. (2) Using on-line databases to study biological activity, therapeutic indexes, toxicity and other characteristics of drugs and other chemicals. Similarly, they learn to analyze the vast information available for drug targets such as receptor proteins and enzymes. (3) Students learn about pharmacogenomics, an area essential for personalized medicine. Here, they learn, for example, how to predict the reaction of certain populations to particular treatments. (4) Students learn about the drug development pipeline, starting with the design, through screening chemical libraries and to the basics of FDA approval.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MCP 768. Neuropharmacology. 2-3 Credit Hours.
An intensive course covering the regulation of neural processes by drugs that target neurotransmitter signaling at the level of GPCRs, G proteins, second-messengers and ion channels.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MCP 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MCP 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the thesis for the master’s degree after the student has enrolled for the permissible cumulative total in MCP 710 (usually six credits). Credit not granted. May be regarded as full time residence.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MCP 830. Dissertation Research-Pre-Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by their advisor/Office of Graduate and Postdoctoral Studies. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MCP 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required for all PhD candidates. The student will enroll for credits as determined by their advisor/Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MCP 850. Research in Residence. 1 Credit Hour.
Student must be registered in the semester they plan to defend. Used to establish research in residence for the PhD after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Student may be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

Molecular Cell and Developmental Biology
http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology

Overview
The graduate program in Molecular Cell and Developmental Biology offers graduate training towards the PhD degree in the fields of molecular cell biology, cell biology, developmental biology and cancer biology. In order to provide a wide range of current research opportunities, this program is interdisciplinary, comprised primarily of faculty from the department of Cell Biology and includes additional faculty from several other Departments and Centers at the Miller School of Medicine. These include: the Departments of Microbiology & Immunology, Molecular & Cellular Pharmacology, Medicine, Ophthalmology, Urology, Surgery, Neurosurgery and Neurology, the Sylvester Comprehensive Cancer Center, and the Miami Project to Cure Paralysis.

Students have the opportunity to do research in the many areas of modern cell, molecular and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer biology, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, PhD level researchers and educators, in both academic institutions and in the biotechnology industry and other venues.

Admission Requirements
Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic
chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

**COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:**

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and/or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

**APPLICANTS MUST SUBMIT THE FOLLOWING:**

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume/CV

Full application instructions can be found here (http://biomed.med.miami.edu/apply/).

Total Credit Hours 60

¹ Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (on select Wednesdays at noon), and student presentations (on Wednesdays at noon).

² may be replaced by any graduate level course in human disease or neuronal cell biology
Plan of Study

The program's Graduate Studies Committee assists each entering student in tailoring a program to match his/her interests. First year students take courses in a core curriculum taught by faculty from the medical basic science departments. Courses are taught not only by formal lectures, but also as seminars and informal discussions. The curriculum is designed to provide broad knowledge in the various aspects of modern cell biology, developmental biology, molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests. In the remaining years of study, nearly all of the student's time is spent on original laboratory research. Students are usually admitted in the Fall semester.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MDB program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

Mandatory courses for the program include Biostatistics (PIB 705 (http://bulletin.miami.edu/search/?P=PIB%20705)), Advanced Cell Biology: Approaches to Molecular Medicine (MDB 751 (http://bulletin.miami.edu/search/?P=MDB%20751)), Current Topics in Mammalian Development (MDB 752 (http://bulletin.miami.edu/search/?P=MDB%20752)), Histology (MDB 753 (http://bulletin.miami.edu/search/?P=MDB%20753)), and *Tumor Biology (MDB 765 (http://bulletin.miami.edu/search/?P=MDB%20765)). The latter may be replaced by any graduate level course in human disease or neuronal cell biology. *These courses are electives for MD/PhD students.

Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (select Wednesdays at noon), and student presentations (on Wednesdays at noon).

The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. At the end of the Fall semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the scientific proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student and mentor in the process of obtaining extramural funds to support the student’s stipend.

The thesis proposal is expected to be passed during the second year, Summer semester. It is important to note that in the MDB program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 6-9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Mission

The mission of the Graduate Program in Molecular Cell and Developmental Biology is to educate students in molecular cell and developmental biology and to train highly qualified scientists for independent careers in scientific research and education.

Goals

The program objectives is to provide our students with:

- A solid foundation in the fundamentals of modern molecular, cell and developmental biology through formal courses;
- An understanding of scientific theory, methods, and current research literature through scientific seminars and journal clubs; and
- Intellectual and technical expertise in modern methods of cell and molecular biology through structured laboratory research and scientific writing skills for both scientific papers and grant applications.

Student Learning Outcomes

- Students will demonstrate an overall knowledge and understanding of the core concepts in Molecular Cell and Developmental Biology, including the essential technical skills to conduct research in the Molecular Cell and Developmental Biology.
- Students will demonstrate critical thinking skills, the capability to develop conjectures, the ability to evaluate their Hypotheses, paying attention to responsible conduct of research as appropriate.
- Students will demonstrate the ability to write effective scientific reports and to present scientific results orally.

MDB 701. Seminar. 1-2 Credit Hours.
Students are required to present their research findings as well as attend Department Faculty seminars.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MDB 710. Readings in Cell Biology. 1-6 Credit Hours.
Current and classical research papers in cell, developmental, and molecular biology. Critical evaluation of papers and the methodologies used is included.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MDB 713. Topics in Cell Biology. 1-6 Credit Hours.
Formal seminar course in which each student presents a lecture relating to a specific theme. Topic areas include cell, developmental, and molecular biology with the subject changing each term.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MDB 751. Advanced Cell Biology Approaches to Molecular Medicine. 2-3 Credit Hours.
Structure, function, and biogenesis of cellular organelles and the cytoskeleton, including their regulation and dynamic interactions. The course is taught in seminars, followed by student-led discussion of recent relevant papers in the literature. The goal of the course is to lead the students to in-depth conceptual and methodological analysis of selected topics up the understanding of current leading-edge research in specific topics in Cell Biology. The course is designed to cover knowledge beyond the text books and to enable the students to design and criticize experimental approaches in Cell Biology acceptable for current peer-review criteria.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
**MDB 752. Current Topics in Mammalian Development. 2-3 Credit Hours.**
The course will cover central emerging topics in mammalian development today including embryonic stem cells, micro RNA gene regulation, and organogenesis. The class will have an interactive format, starting with basic lecture in mammalian development; subsequent sessions will include an overview of the selected topic by faculty, followed by round table discussions of current paper(s) in the field.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

**MDB 753. Histology. 1 Credit Hour.**
This course will offer the student a virtual slide collection of histology with interactive lectures to support image-based learning. The course covers basic tissues, organs, and systems (vascular; heart; pancreas; eyes; brain; spinal cord; liver; lung; mouse embryo; GI track). The course will meet once a week for one hour.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Spring.

**MDB 763. Stem Cell Biology and Genetic Engineering for Regenerative Medicine. 3 Credit Hours.**
This course is designed to provide a current overview on the cell and molecular biology of stem cells, their identification and analysis, and the current status of their use for the repair and regeneration of a variety of tissues including heart, lung, muscle, pancreatic, neuronal and others.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MDB 765. Tumor Biology. 3 Credit Hours.**
This course, comprised of lectures and student-led literature discussion, is intended to provide broad-based instruction on the modern molecular and cellular aspects of cancer biology, basic and translational research. The course highlights multiple areas including cell cycle, apoptosis, epidemiology, angiogenesis, and meets two times weekly.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall.

**MDB 810. Master's Thesis. 1-6 Credit Hours.**
Current and classical research papers in cell, developmental, and molecular biology. Critical evaluation of papers and the methodologies used is included.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MDB 820. Research in Residence. 1-6 Credit Hours.**
Direct laboratory experience as determined by the Departmental Graduate Committee.

**Components:** LEC.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MDB 830. Doctoral Dissertation. 1-12 Credit Hours.**
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MDB 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

**Components:** THI.

**Grading:** SUS.

**Typically Offered:** Fall, Spring, & Summer.

**MDB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.**
Required for all PhD candidates. The student will enroll for credits as determined by their advisor/ Office of Graduate and Postdoctoral Studies but not less than a total of 24. No more than 12 hours of research may be taken in a regular semester, and no more than six in a summer session.

**Components:** THI.

**Grading:** SUS.

**Typically Offered:** Fall, Spring, & Summer.

**MDB 850. Research in Residence. 1 Credit Hour.**
Student must be registered in the semester they plan to defend. Used to establish research in residence for the PhD after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Student may be regarded as full-time residence as determined by the Dean of the Graduate School.

**Components:** THI.

**Grading:** SUS.

**Typically Offered:** Fall, Spring, & Summer.
Ph.D. in Neuroscience
http://biomed.med.miami.edu/graduate-programs/neuroscience

Overview
The Neuroscience Program was formed in 1989 by a committee of neuroscientists led by the Provost and organized as a university-wide program. A representative steering committee was established, and Dr. Richard Rotundo was appointed as the first chair. In 1992, the Neuroscience Program became an independent, PhD-granting entity. Neuroscience research is a major focus at the University of Miami and the Neuroscience Graduate Program (NGP) is currently composed of 30 graduate students and 78 faculty members with diverse research interests, but also with some areas of commonality. Areas of concentration include neurotrauma such as stroke, spinal cord injury and traumatic brain injury, mechanisms of addiction, neurodegenerative diseases such as multiple sclerosis and Alzheimer’s disease, and sensory transduction of the somatosensory, visual, auditory, olfactory and gustatory systems. The Neuroscience Graduate Program faculty are from 19 different departments and distributed across three University of Miami campuses: Miller School of Medicine (MSOM) campus, Rosenstiel School of Marine and Atmospheric Science (RSMAS) campus and the Coral Gables (CG) campus. This comprehensive, diverse group of faculty, students and scientists that make up the Neuroscience Graduate Program is a cornerstone of research and graduate education in biomedical sciences at the University of Miami.

Admission Requirements
Admission to the Neuroscience Program is through the common umbrella of Programs in the Biomedical Sciences (PIBS), for all biomedical PhD programs.

For more information, please visit this website (http://biomed.med.miami.edu/graduate-programs/programs-in-biomedical-sciences-pibs/).

Curriculum Requirements
Graduate training is the major goal of the program, with emphasis on cellular, molecular, and genetic approaches to Neuroscience. A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Developmental Neuroscience, Membrane Biophysics, Introductory Neuroscience, Neural Systems, and Neuroanatomy. The core courses are supplemented with a variety of Special Topics Short Courses. Students also attend research seminars and a scientific journal club. The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on, their progress is supervised by individually tailored dissertation committees.

### Mission

The Neuroscience Graduate Program offers training leading to a Ph.D. in Neuroscience. The program's mission is to provide students with 1) an understanding of the central concepts in neuroscience and basic biomedical science and 2) the ability to formulate, carry out, and communicate original research in neuroscience.

### Goals

- Ensure that students obtain fundamental knowledge of the central concepts in neuroscience and basic biomedical science
- Ensure the students obtain the ability to formulate, carry out, and communicate original research in neuroscience
- Equip students with an understanding of rigorous experimental design, statistical methodology, and quantitative literacy in neuroscience
- Provide rigorous training for writing and orally presenting neuroscience
- Develop student's ability to write a successful grant application
- Nurture a student's ability to teach others neuroscience and to collaborate to achieve common research goals
- Promote publishing of original research performed with high ethical and rigorous standards that make a substantial contribution to neuroscience
• Provide students with access to career development advising and knowledge of the career opportunities in neuroscience
• Prepare students effectively for their chosen career route
• Increase diversity of the neuroscience workforce
• Ensure that students obtain fundamental knowledge of the central concepts in neuroscience and basic biomedical science
• Ensure the students obtain the ability to formulate, carry out, and communicate original research in neuroscience
• Equip students with an understanding of rigorous experimental design, statistical methodology, and quantitative literacy in neuroscience
• Provide rigorous training for writing and orally presenting neuroscience
• Develop student's ability to write a successful grant application
• Nurture a student’s ability to teach others neuroscience and to collaborate to achieve common research goals
• Promote publishing of original research performed with high ethical and rigorous standards that make a substantial contribution to neuroscience
• Provide students with access to career development advising and knowledge of the career opportunities in neuroscience
• Prepare students effectively for their chosen career route
• Increase diversity of the neuroscience workforce

Student Learning Outcomes

• Students should demonstrate overall knowledge and understanding of the core concepts in neuroscience, including the essential skills necessary for conducting research in the field of neuroscience.
• Students should demonstrate critical thinking skills, the capability to develop hypotheses, and the ability to evaluate their hypotheses, paying attention to responsible conduct of research as appropriate.
• Students should demonstrate the ability to write effective scientific reports and to present scientific results orally.
• Students should, in honing research capabilities throughout their graduate careers, publish original research in peer-reviewed journals.
• Students should submit for extramural fellowships, the receipt of which will prove valuable to the student, the program, and the university.
• Students should be encouraged to formulate, carry out, and defend dissertation research in a timely manner, keeping the program's mean time from matriculation to defense low so that the student can take the next step in his or her career.

NEU 721. Principles of Membrane Physiology and Biophysics I Chemical and physical structure of membranes, model systems, permeability and transport, membrane potential, ionic channels, excitability in nerve and muscle, ionophores, active transport, and membrane receptors. (2 credits)

NEU 722. Principles of Membrane Physiology and Biophysics II Osmosis and cell volume, permeability and compartmentation, cable properties, Hodgkin-Huxley formalism, Na, K, and Ca ion channels, regulation of cellular Na, Ca activities, single-channel analysis, chemical synapses, membrane receptors, cell junctions, excitation and E-C coupling in muscle. Prerequisite: NEU 721. (2 credits)

NEU 761. Neuroscience I – Molecular and Cellular Neuroscience An eight-week introduction to the cellular and molecular biology of the nervous system. The course is an intensive, interactive discussion of experimental method, data analysis regarding neurons, synapses, sensory cells, glia and learning/memory. (2 credits)

NEU 762. Systems Neuroscience Sensory, motor and integrative neuroscience at the level of functional systems. The course concentrates on the experimental basis for our understanding of nervous system function using didactic lectures and student discussions of research literature. Students are expected to have a working knowledge of synaptic transmission, excitable cell membranes, and ion channels from previous coursework in NEU 721/722 and NEU 761. [Prerequisites: NEU 721/22 and NEU 761, or in exceptional cases, permission of instructors]. (4 credits)

NEU 763. Developmental Neuroscience This course will explore nervous system development from early neural induction and neurogenesis to the construction of neural circuits. Cellular and molecular mechanisms of neurulation and CNS patterning, neural progenitor migration, neural crest and ectodermal placodes, programmed cell death, construction of neural circuits and axon guidance, and synaptogenesis will be covered. (2 credits)

NEU 797. Neuroanatomy Functional neuroanatomy for neuroscience research. Emphasis is on gross anatomy, identification of pathways and circuits, and a description of the physiological functions of neuroanatomical systems. Each lecture will contain some clinical examples and/or case histories, and a laboratory segment for study of human and sheep brains. Brain models and online tools including 3-dimensional rotations are included. (2 credits)

NEU 731. Advanced Topics in Neuroscience A seminar course with guided readings and discussions based on research literature. The course is taught by faculty in areas related to their research topics. The course may include writing assignments or homework exercises. All NEU program students are required to pass this course at least once before requesting sufficiency. Not available every semester. Announcements for this course are sent by email to all NEU students. (1 credit)

NEU 750. Modeling CNS Injury and Repair (elective) An overview of a number of complex modeling systems using in CNS Injury and Repair biomedical research. The course examines models, such as spinal cord injury, traumatic brain injury, ischemic/stroke injury, experimental autoimmune
encephalomyelitis (EAE) model of multiple sclerosis, axon regeneration in retinal nerve and spinal cord, and drosophila models of degeneration. The course will consist of both lectures and hands-on laboratory components. Not available every academic year. (1 credit)

**NEU 700.** Seminars in Neuroscience  Required each Fall and Spring for all NEU students, emphasizes student research presentations (30 min each for 2nd year students; 60 min each for 3rd year on). Attendance at neuroscience related seminars is also required. (1 credit)

**NEU 830.** Doctoral Dissertation – Pre Candidacy  Dissertation Research before requesting Admission to Candidacy (i.e. before Qualifying Exam). No more than 6 (six) of these credits may be taken prior to completion of the Qualifying Exam. (variable credits)

**NEU 840.** Doctoral Dissertation – Post Candidacy  Dissertation Research after Admission to Candidacy. (variable credits)

**NEU 850.** Research in Residence – Defense Semester  Dissertation Research after the student has defended their dissertation but is preparing dissertation for final submission to Graduate School, or has accumulated the permissible total in doctoral research credits.

**Ophthalmology**

http://biomed.miami.edu/graduate-programs/ms-in-vision-science-and-investigative-ophthalmology

**Overview**

Bascom Palmer Eye Institute is pleased to offer a unique graduate degree, the Master of Science in Vision Science and Investigative Ophthalmology (MVSIO). This innovative program, the first of its kind in the world, offers comprehensive training in ophthalmic translational research, problem-based learning, management and a skill set available only at Bascom Palmer Eye Institute.

The MVSIO program focuses on science and laboratory research, including the disciplines of electrophysiology, biochemistry and molecular biology, as well as exposure to ocular clinical details and ocular pathology. It will prepare students for a planned Ph.D. graduate program in vision science and investigative ophthalmology as well as for industry jobs and future residency training.

In addition, the multidisciplinary program builds management, administrative, and entrepreneurial skills for professionals desiring a vision science-oriented career in startup companies, management of non-profit organizations, academic practices, government regulatory agencies, and medical device and pharmaceutical companies.

Led by Bascom Palmer Eye Institute’s world-class faculty and supported by leading-edge technology, the MVSIO program opens the door to new career opportunities for medical school graduates, clinicians and other professionals.

M.S. in Vision Science and Investigative Ophthalmology (p. 2597)

**M.S. in Vision Science and Investigative Ophthalmology**

**Overview**

The Master of Science in Vision Science and Investigative Ophthalmology (MVSIO) at the University of Miami is an innovative program, the first of its kind in the world, which offers comprehensive training in ophthalmic translational research, problem-based learning, management, and a skill set available only at Bascom Palmer Eye Institute.

The MVSIO program focuses on science and laboratory research, including the disciplines of electrophysiology, biochemistry and molecular biology, as well as exposure to ocular clinical details and ocular pathology. It will prepare students with furtherance of their careers in vision science and investigative ophthalmology.

In addition, the multidisciplinary program builds management, administrative and entrepreneurial skills for professionals desiring a vision science-oriented career in medical practice, startup companies, management of non-profit organizations, academic practices, government regulatory agencies, and medical device and pharmaceutical companies. Led by Bascom Palmer Eye Institute’s world-class faculty and supported by leading-edge technology, the MVSIO program opens the door to new career opportunities for medical school graduates, clinicians and other professionals.

For five decades, many of the most important innovations that have revolutionized global ophthalmology have come from Bascom Palmer Eye Institute. Bascom Palmer is recognized as one of ophthalmology’s foremost resources providing advanced patient care, vision research and education. As the Department of Ophthalmology at the University of Miami Leonard M. Miller School of Medicine, it is committed to the protection and preservation of the treasured gift of sight.
Admission Requirements

All individuals with strong background education in biology, biochemical, or biological sciences are eligible to submit an application; having taken courses in anatomy and physiology is advantageous. We strongly encourage the following to apply:

- Candidates with medical degrees (M.D.) from U.S. or foreign institutions.
- Candidates who have a bachelor’s degree in experimental sciences encompassing any area of biological or biochemical sciences, provided they have the equivalent of a 3.5 or higher grade point average.
- Students with a cumulative grade point average of 3.5 and above (or U.S. equivalent) in their undergraduate degree, provided they have relevant work experience.
- Medical degree students: Step 1 United States Medical Licensing Examination (USMLE) - score greater than 245 is preferred.

Mission
By training graduate students in research, research management skills and enterprise management, the goal of the MVSIO degree is to educate the next generation of leaders in vision science.

Goals
Consistent with the university’s strategic vision, the goals of the programs are:

• Train Master’s students in research and research management skills; and
• Prepare students for a future PhD-level program in Vision Science and investigative Ophthalmology.

Student Learning Outcomes
By training graduate students in research, research management skills and enterprise management, the goal of the MVSIO degree is to educate the next generation of leaders in vision science, including:

• Science graduates who want to extend their intellectual horizons
• College graduates who intend to improve their medical education prior to entering medical school
• Professionals in industry, academic research settings, regulatory bodies and philanthropic organizations
• Prospective entrepreneurs in the growing field of vision care
• Medical school graduates interested in joining an ophthalmology residency program

Clinician and non-clinician graduates with medical degrees from foreign countries

**OPH 610. Anatomy and Physiology of the Eye. 1 Credit Hour.**
This course introduces the major anatomical and physiological regions of the eye, including cornea, lens, retina, optic nerve, cranial nerves and extraocular tissues. Emphasis is placed on the relationship between the eye and others systems. Demonstrations include eye dissection, visual testing and visual perception experimentation.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

**OPH 615. Pathology of Eye Diseases. 1 Credit Hour.**
This course covers in detail the major pathologies of the eye, including congenital diseases and syndromes, infectious diseases, tumors and adult-onset degenerations. Emphasis is placed on pathophysiological mechanisms contributing to pathology, and also covers examination of the eye, diagnostic features, and management of major eye diseases. Demonstrations include histological sections, OCT, visual field and angiogram, and associated diagnostic criteria.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.
OPH 620. Ocular Pharmacology, Epidemiology, and Biostatistics. 1 Credit Hour.
Course will teach local anesthetics, anti-infectious, anti-allergic agents, control of ocular pain, adverse ocular and systemic reactions caused by therapeutic agents will be part of the course. Ocular therapeutic principles (pharmacokinetics and pharmacodynamics, toxicity), sources of drug information, new drug development, drug regulations as applicable to different areas of operation including prescription writing will be discussed. An introductory course in epidemiologic and biostatistics methodology covering study design for investigation of both infectious and chronic diseases of the eye; screening programs and health services research will also be discussed. Outbreak investigation, natural history of infectious diseases, validity of clinical tests, survival analysis, and clinical trial and etiologic studies will be discussed. Methods of biostatistician evaluation of experiment design and analyses of data to decipher significant non-significant results and general tools for statistical analyses will be reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OPH 625. Microbiology and Immunology of the Eye. 1 Credit Hour.
Students will learn concepts and terminologies of immunology, bacteriology, virology, parasitology and mycology with an emphasis on mechanisms of microbial disease transmission and host defense mechanisms. Students become familiar with the types of organisms responsible for human disease, the mechanisms by which they produce disease, and the application of this knowledge to the treatment of patients. This course integrates the biomedical disciplines of immunology and medical microbiology. Infectious and immunological diseases with relevance to the clinical setting and pharmacological approaches will be presented. A basic understanding of the classification and characteristics of infectious microorganisms, the mechanisms by which infectious agents cause disease, and methods of both prevention and treatment are highlighted. Causes and treatment of immune diseases will also be presented. Concepts of inflammation, sepsis, cell injury, tissue repair, hemodynamic disorders, genetic disorders, environmental and nutritional pathology, immunodeficiency diseases, autoimmune and metabolic diseases will be presented. Throughout the course, small group tutorials and interactive clinical correlations based on clinical cases linking basic science concepts to clinical medicine will be presented. Tutorials, clinico-pathological correlations and laboratories emphasize problem-solving skills, integration of knowledge and independent learning.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OPH 630. Ophthalmic Genetics. 1 Credit Hour.
This course provides an overview of the influence of genetics in ophthalmology with respect to understanding pathogenic mechanisms of eye diseases, and the development of novel therapeutic strategies. The course will provide an introduction to complex and Mendelian genetics, and research strategies involved in identifying disease-associated genetic changes. Specific topics include hereditary retinal diseases, genetic associations in age related macular degeneration and glaucoma, genetics of myopia and optic nerve diseases, and mitochondrial disorders affecting the eye. Additional discussions include current gene therapy clinical trials.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OPH 635. Electrophysiology of the eye. 1 Credit Hour.
This course will introduce the basic principles of electrophysiology of the eye, identify neural signals, neurotransmitters, molecular signaling within neurons. Additionally, the sensation and sensory systems. Emphasis is placed on the relationship between the eye and other signals and senses.
Corequisite: OPH 663.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OPH 640. Vision and Optics. 2 Credit Hours.
This course will provide an introduction to the principles of geometrical optics and its application to the study and assessment of the visual system. Topic covered will include fundamental of geometrical optics, principles of optical system components (lenses, mirrors, prisms, light sources), optics of the eye and vision correction, basic principles of visual optical instruments (loupe, microscopes, telescopes), and principles and applications of ophthalmic diagnostic and imaging systems, including ophthalmoscopes, retinoscopes, slit-lamp, keratometers, corneal topography systems, aberrometers and optical coherence tomography.
Corequisite: OPH 662.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

OPH 645. Biochemistry, Cellular and Molecular Ophthalmology. 2 Credit Hours.
An introduction to biochemistry with emphasis on ocular clinical applications. Topics will include nutrition, cellular biology, biochemistry of tears, conjunctiva, and cornea. The structure and functions of proteins and enzymes as well as metabolism of carbohydrates and lipids will be discussed. Case studies and journal articles will be used to demonstrate the useful applications of these principles to ocular health-related issues.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
OPH 661. LAB: Basic Biochemistry, Microbiology, and Pathology. 3 Credit Hours.
Experiments related to molecular biology (includes PCR, DNA cloning, hybridization analysis, restriction mapping, and DNA sequence analysis),
protein purification and analysis (salt fractionation, ion exchange chromatography, affinity chromatography, SDS-PAGE, and immuno-blotting), and
determination of enzyme kinetic parameters.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

OPH 662. Lab: Basic and Applied Optics and Statistics. 1 Credit Hour.
This laboratory course serves as a companion to the Vision and Optics course. It will include practical hands-on examples of the application of
geometrical optical theory to the design and calculation of optical systems, provide an initial hands-on experience with basic optical system setup
on an optical bench, and provide basic hand-on training or demonstration of ophthalmic diagnostic techniques and instruments, including refraction,
opthalmoscopy, retinoscopy, slit-lamp examination, aberrometry, corneal topography and optical coherence tomography.
Corequisite: OPH 640.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

OPH 663. Lab: Electrophysiology, Clinical Testing and Applications. 1 Credit Hour.
This laboratory work will introduce the students to novel clinical recording techniques, electrophysiologic tests, and clinical applications of ERG, EOG,
and VEP. Emphasis is placed on novel and specialized clinical applications and recordings. The course will be divided in two sections. Section one
ends with focus on the effects of maturation, aging, and testing in infants. Section two will conclude with electrophysiologic findings of many clinical
conditions and clinical applications of ERG, EOG, and VEP of various eye disorders/diseases.
Corequisite: OPH 635.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

OPH 691. Clinical Ophthalmology Update. 2 Credit Hours.
Society, Science and Medicine. History and evolution of medicine, Seminars on different aspects of medicine including a broad spectrum view of
career options. The emphasis will be how medicine has been developed historically, its efficacy, and the future outlook. For example, antibiotic
resistant bacteria was discovered in 12,000 year old underground caves that makes us realize that antibiotic resistance is an old problem and we need
to have an outlook bearing that in mind.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

OPH 771. PBL: Advanced and High Throughput Approaches in Science. 2 Credit Hours.
The Problem-Based Learning Method (PBL) was designed to teach students in small groups to identify specific techniques that will yield the
answers to the problems. Content will include the underlying norms and principles that shaped these concepts. The courses also include plenary
session presentations by experts on relevant topics and their use in preparing manuscripts and grant applications and policies regarding conduct of
experiments using these techniques.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

OPH 772. PBL: Management skills and Tools for Academia and Enterprises. 2 Credit Hours.
This Problem-Based learning course will introduce grant writing, pre-award preparation, post-award management and will be taught using problem-
based modules. Federal and non-federal extramural grants will be used as modules specific aspects of different segmental grants will be presented.
Major research grant, training and fellowships, grants-in-aid will be taught. In addition, small business innovation research (SBIR) or STTR will be
covered. Students will learn techniques to analyze markets, identify optimal opportunities, develop plans to sell their vision in order to attract talent
and stakeholders. A series of problem-based lectures integrates modern business concepts from an entrepreneurial approach.
Components: ENS.
Grading: GRD.
Typically Offered: Spring.
**OPH 773. PBL: Animal Models, Regulatory issues, and Research Methods. 2 Credit Hours.**

Part I: The aim of this Problem-Based learning course is to provide students the basic understanding and expertise pertaining to generation and implementation of preclinical research IACUC protocol. This course consists of a problem based learning module with a focus on developing students' understanding of various animal models in preclinical research and how to refine animal research models that meet the requirement of IACUC regulation. Part II: The purpose of this course is to provide clinical research regulatory expertise with an aim to create future leaders in the drug development industry. This regulatory science course uses a multidisciplinary approach and encompasses course work in regulatory writing techniques, quality systems, and medical device and pharmaceutical regulation. The concentration is designed to develop the student's understanding of how to meet regulatory oversight requirements as they relate to the conduct of clinical studies. This course will prepare students to play critical roles throughout the lifecycle of pharmaceuticals, medical devices, and biologics. They provide strategic, tactical and operational direction, and support for working within regulations to expedite the development and delivery of safe and effective healthcare products to individuals around the world. The regulatory professional's services can be utilized in research and development, clinical trials, extension of premarket approvals, manufacturing, labeling and advertising, and post-market surveillance. Knowledge of clinical research conduct and management which involves the design, execution and management of clinical trials as well as quality assurance and compliance principles are important to regulatory professionals. Course also provides highlight on how to effectively partner with experts such as writers drafting pre- and post- approval regulatory FDA submission documentation (INDs, NDAs, PMAs etc.) for product clearance or licensure, IRB reviewers and investigational Pharmacists to enhance the development of healthcare products.

**Components:** ENS.

**Grading:** GRD.

**Typically Offered:** Spring.

**OPH 810. Ophthalmology Research Thesis. 1-7 Credit Hours.**

The course allows the student to work full-time on a research project of interest under the supervision of research/clinical faculty or a team of faculty members.

**Components:** THE.

**Grading:** SUS.

**Typically Offered:** Fall.

---

**PhD in PIBS/MBA Program**

The growing potential to make life-saving discoveries in an ever-changing global economy make this an exciting time to enhance your biomedical science PhD with an MBA! Many ambitious students are now looking to an MBA as a useful enhancement to their biomedical research experience and expand their career options.

An MBA is an investment in the future careers of biomedical graduate students. We know our alums will be future college presidents, department chairs, entrepreneurs, government officials, patent holders and CEOs of biomedical companies. This program will ensure they leave us not only as cutting-edge scientists, but also prepared for the leadership challenges they will face regardless of what lies ahead.

Regardless of career trajectory, PhDs can benefit from pursuing a business education. From a practical standpoint, the managerial skills, business acumen and financial literacy one develops from an MBA program are useful for managing labs, staff, grants or even starting a business. The biomedical industry and higher education are increasingly influenced by legal issues and shifting healthcare policy, both of which are covered by the MBA curriculum. Students will expand their networks by taking classes alongside CEO’s and business leaders enrolled in the Executive MBA program.

The immediate financial advantages of a PhD / MBA option at UM are substantial. Not only will accepted students receive 100% tuition waivers for the doctoral portion of their studies, they will receive shared credit savings and a 50% scholarship from the School of Business Administration for their MBA. In the long-term, students with MBA's can expect to have greater earnings over the lifetime of their careers.

**Contact Information**

ogps@miami.edu

**Curriculum Requirements**

PhD students in the biomedical sciences programs at the Miller School of Medicine may choose to pursue a Master of Business Administration degree immediately following their doctoral studies. The MBA portion of the sequential degree may be completed in one year and consists of 44 MBA credits. The degrees must be obtained sequentially.

Admission Requirements

Prescreening by OGPS
PhD students wishing to enroll in the PhD/MBA program should notify the Director of the Office of Graduate and Postdoctoral Studies (OGPS) and the Senior Associate Dean for Graduate and Professional Studies and the Senior Associate Dean for Graduate and Professional Studies at the MSOM of their desire to apply no later than January 3 each year. OGPS will verify students have GRE Verbal and Quantitative scores at the 80th percentile or better and are in good standing. Students who need prescreening criteria will be notified they may apply for admission to the MBA program. Names of approved students will be communicated to the Director of Graduate Business Programs at the Miami Herbert Business School.

GMAT Requirement
PhD students must take the GMAT. GRE scores will not be accepted. Applicants must obtain a score of at least 660.

Application Process
Students must apply to the program by March 15th each year. Contact the OGPS for more information at ogps@miami.edu.

Physical Therapy
http://www.pt.med.miami.edu

Dept. Code: PTS

The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care, rehabilitation, outpatient settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.

The Mission of the Department of Physical Therapy (revised in December, 2000; re-affirmed in 2012) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

Doctor of Philosophy in Physical Therapy (PhD)

Application Requirements
Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify an area of interest and contact a faculty mentor involved in that area. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies Committee. Stipend and tuition support is potentially available for qualified applicants.

The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:
• Direct entry into the PhD program is dependent upon having any of the degrees below:
  • An entry-level Master’s Degree in Physical Therapy
  • An advanced Master’s Degree with a Bachelor’s Degree in Physical Therapy
  • A Bachelor’s Degree in Physical Therapy.

• An applicant with a Bachelor’s Degree in Physical Therapy, though able to commence course work in the PhD Program, will be required to complete additional credit hours before final admission to the PhD Program.

• Official Transcripts of all college work.

• Three completed recommendation forms with at least one form completed by a physical therapist.

• A letter indicating career goals and objectives.

• Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).

• GRE scores current within the past 5 years (see minimum requirements below)

Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Graduate Admissions will be using this concordance table when reviewing exam scores. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 4.0 on the analytical section is also required. International applicants must submit a complete application and have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information on the PhD degree contact:
Kathryn E. Roach, PhD, PT, Graduate Program Director
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
phone: 305-284-4535
email: keroach@miami.edu

Degree Programs
Doctor of Physical Therapy (entry level DPT)
The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.

Doctor of Philosophy in Physical Therapy (PhD)
The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions:

1. Expertise in a specified content area;
2. Advanced knowledge and skill in research methods, design, and implementation of analysis and communication of results; and
3. Proficiency in instructional design, teaching methods, and evaluation.

The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas:
• Concentration Core
• Research Core
• Education Core

They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared to perform original research aimed at developing new knowledge to enhance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.

Doctoral Programs in Physical Therapy
• D.P.T. Doctor of Physical Therapy (Entry Level) (p. 2619)
• Ph.D. in Physical Therapy (p. 2623)

PTS 601. Advanced Clinical Practice: Counterstrain 1. 1 Credit Hour.
This seminar course will provide an in depth discussion of the history, physiologic rationale, and fundamentals of the Strain Counterstrain method of manual therapy. Newer concepts of facial science will also be explored. Counterstrain I will stress palpation skills as the foundation for any manual therapist and will teach advanced palpatory anatomy techniques. 30-50 Counterstrain techniques spanning the whole body and consisting of the musculoskeletal, neurovascular, and visceral systems will be taught through lecture, demonstration, and lab.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

PTS 602. LAGO Local Pro-Bono Clinic Elective. 1 Credit Hour.
This course is designed to provide physical therapy students with an integrated clinical experience under the supervision of licensed physical therapist. The students work in a pro-bono clinic located at University of Miami Hospital. Students will have the opportunity to participate in the full spectrum of physical therapy care with a population of uninsured patients in need of a broad range of health care and health care education services. Students will have an opportunity to apply previously learned knowledge and skills as it applies to the needs assessed in the community for pro bono service. Health risk issues related to prevention will be assessed and physical therapy services applicable to the needs will be designed. Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

PTS 603. Introduction to Principles of Orthotic Fabrication and Prescription. 1 Credit Hour.
This seminar course is designed to introduce the art of custom orthotic making. We will explore the various categories within custom orthotics; static, dynamic, serial static, and static progressive. A comparison of the features of pre-fabricated orthoses vs. custom made will be made. The application of clinical reasoning to decision making will equip the Therapist with the necessary information to assist them when considering the orthotic options to achieve the best possible outcome for their patients.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 604. Rehabilitation Technology for Physical Therapists. 1 Credit Hour.
This course will introduce current advancements in diagnostic and therapeutic equipment used by physical therapists in clinical practice. The emphasis will be on latest rehabilitation technology such as virtual reality, neural stimulation and rehabilitation robotics. Students will observe the equipment being used on patients, get a basic understanding of its operation and have an opportunity for hands-on learning.
Components: LEC.
Grading: CNC.
Typically Offered: Fall.
PTS 605. Physical Therapy Private Practice Management. 1 Credit Hour.
Course focuses on establishing a private physical therapy practice, including initial development through marketing and management.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 606. Issues in Women's Health: Gynecology. 1 Credit Hour.
Introduction to physical therapy practice for evaluation and treatment of pelvic floor dysfunction.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 607. Issues in Women's Health: Obstetrics, Osteoporosis and Breast Health. 1 Credit Hour.
Introduction to physical therapy practice for evaluation and treatment of problems related to pregnancy, osteoporosis, and other disorders specific to women.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 608. Nutrition for Physical Therapists. 1 Credit Hour.
A presentation of nutrition content that will benefit the professional skills of physical therapists.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: SUS.
Typically Offered: Spring.

PTS 609. Advances in Amputee Rehabilitation and Prosthetic Technology. 1 Credit Hour.
This course is designed to provide interested students with educational materials about amputations surgery, prosthetic technology and rehabilitation that will augment the information presented in other courses. A select faculty of experts have been invited to present on topics of interest that provide greater depth of knowledge for those physical therapy students who are interested in the field of prosthetics and amputee care. Students will be encouraged to actively participate during each presentation with thought provoking dialog regarding how technology, evidence-based rehabilitation and disciplines involved in prosthetic rehabilitation can work together as a team to generate a better than satisfactory outcome for people with limb loss.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

PTS 610. Introduction to Pilates - Gateway. 1 Credit Hour.
This course provides in-depth instruction in the use of Pilates Mat to supplement physical therapy practice. This course covers the history of Pilates and Polestar education, biomechanics, and the many uses of Pilates in physical practices, as well as instruction in 18 Pilates mat exercises. Students learn to perform and teach the exercises and 4 unique class sequences.
Components: LEC.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

PTS 611. Advanced Clinical Practice: Topics in Pediatrics. 1 Credit Hour.
The course will focus on advanced topics in pediatric physical therapy. Through lecture, seminar discussion and lab experiences, topics will include: typical and atypical development over the first year and examination and evidence-based intervention strategies used in early intervention strategies.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: SUS.
Typically Offered: Fall.

PTS 612. Sports Physical Therapy. 1 Credit Hour.
An overview of the general aspects of sports physical therapy practice will be provided. Topics will include the various settings, evaluations, interventions, and techniques involved in Sports physical therapy practice.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PTS 613. Advanced Clinical Practice: Evaluation and Treatment of the Foot and Ankle. 1 Credit Hour.  
This course will review the anatomy, normal and abnormal kinesiology/biomechanics, pathology and imaging of the foot and ankle and discuss physical therapy evaluation and intervention based on evidence based practice. It will include an introduction to evaluation and negative casting for orthotics.  
Requisite: Physical Therapy Majors Only.  
Components: LEC.  
Grading: SUS.  
Typically Offered: Fall.  

PTS 614. Certified Strength and Conditioning Specialist Preparation (NSCA). 1 Credit Hour.  
Evaluation and exercise planning of athletes to help them achieve their maximum physical performance without incurring injury. Case studies, a problem-solving approach, and integration of previously learned material are emphasized. Classroom instruction, exercise performance, video analysis, and case studies are utilized.  
Requisite: Physical Therapy Majors Only.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Summer.  

PTS 615. Advance Clinical Practice: Taping for the Orthopedic Population. 1 Credit Hour.  
This seminar course is designed to introduce the participant to the concepts of taping for various musculoskeletal pathologies commonly seen in the athletic population. Athletic taping and kinesiotaping principles and uses in rehabilitation will be introduced. A lab component will allow participants to practice the various taping techniques demonstrated.  
Requisite: Physical Therapy Majors Only.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.  

PTS 616. Clinical Research I. 3 Credit Hours.  
This course provides a foundation for evidence based practice as a physical therapist. It presents the principles, concepts and basic skills required to identify, evaluate, create and apply research evidence to the practice of physical therapy. Topics covered include levels of research evidence, health/disability models, searching for research literature including electronic data bases hypothesis testing, critical review of research literature, measurement, statistical analysis, research design, sampling, bias, and statistical computing.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Fall.  

PTS 617. Abdominal Anatomy. 1 Credit Hour.  
Course analyzes abdominal anatomy emphasizing structure and function. Cadaver dissection is included.  
Requisite: Physical Therapy Majors Only.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Summer.  

PTS 618. Critical Care Physical Therapy. 1 Credit Hour.  
A review of the literature on physical therapy in the intensive care unit. Organizing and synthesizing information from the patient's medical record. Evaluation and treatment planning for patients in the intensive care unit. Review of standardized and validated measures for patients with critical illness. Case studies across a variety of patients with critical illness (i.e. medical, surgical, cardiac, neurological, and oncology) will be incorporated to reinforce didactic lecture.  
Components: LEC.  
Grading: SUS.  
Typically Offered: Summer.  

PTS 619. Pelvic Anatomy. 1 Credit Hour.  
Course analyzes the anatomy of the human pelvic area. Cadaver dissection is included.  
Requisite: Physical Therapy Majors Only.  
Components: LEC.  
Grading: GRD.  
Typically Offered: Summer.  

PTS 620. Spanish for Physical Therapists. 1 Credit Hour.  
This course is designed to familiarize the physical therapy student with different aspects of the Spanish speaking culture. This course is also designed to assist the student in developing the basic communication skills in Spanish needed in the clinical setting when working with Spanish speaking patients.  
Components: LEC.  
Grading: SUS.  
Typically Offered: Summer.
PTS 621. Advanced Topics in Neurologic Physical Therapy: Vestibular Rehabilitation. 1 Credit Hour.
This course will expand on knowledge and skills developed in prior courses (Neuroscience, Neuro Examination, and Neurorehabilitation) to focus on the clinical management of an individual with a vestibular disorder from identification of dysfunction through comprehensive clinical management. Through lecture, seminar discussion, and lab experiences, topics will include: Comprehensive vestibular examination and evaluation, Clinical management and intervention strategies, Competency skills checklist, Implementation of treatment
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: SUS.

PTS 623. Myofascial Release. 1 Credit Hour.
Introduction to Myofascial Release technique in rehabilitation.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 624. Myofascial Release II. 1 Credit Hour.
A follow up to the introductory course MFR I. This course focuses on a review of bioenergy followed by practice of release techniques for trunk, extremities and head and neck. Cranial techniques and rebounding are also taught.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 625. Introduction to Dry Needling Theory and Technique. 1 Credit Hour.
Course introduces the participant to the concepts of dry needling, its neuro-functional principles, and its use in a physical therapy setting. Emphasis on comparing and contrasting dry needling to acupuncture, as well as the safety, indications and contraindications of dry needling. A lab component will allow participants to practice various introductory dry needling techniques.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 627. Gateway Pilates II. 1 Credit Hour.
This two-day Pilates course will teach how to provide four new basic Pilates Mat classes. A total of 18 Gateway 2 preparatory exercises and original Pilates Mat exercises will be taught. The instructor will provide ample experiences for real time practice of each of the 4 Pilates Mat sequences, and will provide feedback to each participant pertaining to additional training and practice to become proficient teachers of the Gateway Introductory Mat work.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 629. Evaluation and Treatment of Spinal Dysfunctions I. 3 Credit Hours.
This course provides an in-depth exploration of the evaluation and treatment of various dysfunctions of the spine. The lumbar and sacro-iliac regions will be explored. Thorough evaluation procedures will be emphasized as they relate to specific diagnosis. Treatment for the respective diagnoses will include therapeutic exercise, soft tissue stretching, and postural re-education.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 630. Foundations of Physical Therapy. 3 Credit Hours.
Historical development, philosophical foundations and contemporary practice of a physical therapist as an educator, consultant, researcher, administrator, and model of healthy behaviors. Health as indicated by global fitness measures will be demonstrated and experienced. Medical terminology mastered.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 631. Gross Anatomy for Physical Therapy I. 3 Credit Hours.
Gross anatomy with emphasis on the musculoskeletal systems and a survey of other systems that are relevant to physical therapy practice. Cadaver dissection.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
PTS 632. Gross Anatomy for Physical Therapy II. 3 Credit Hours.
Gross Anatomy with emphasis on the musculoskeletal systems and a survey of other systems that are relevant to physical therapy practice. Cadaver dissection.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 633. Communication in Physical Therapy Practice. 2 Credit Hours.
Course provides an analysis of communication skills in physical therapy clinical practice. Emphasis is placed on instruction of patients and their families, supportive staff, and health care team members. In-depth examination of patient-therapist interactions is included. Prerequisite: Open to Physical Therapy majors only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 640. Neuroscience I. 3 Credit Hours.
This course will explore the human nervous system with an emphasis on the relationship between structure and function. The gross structures of the central and peripheral nervous systems will be discussed, and basic neurophysiological and neuropsychological constructs regarding the function of the nervous system will be explored. Particular emphasis is placed on the systems involved in human motor control and function, its assessment, and the basis for diagnosis and treatment selection by physical therapists.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 641. Neuroscience II. 3 Credit Hours.
Basic neurophysiological and neuropsychological constructs regarding the function of the nervous system are explored. Analyses of normal systems are contrasted with abnormal systems. Particular emphasis is placed on the systems involved in human motor control and function, its assessment, and the basis for diagnosis and treatment selection by physical therapists.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 642. Electrotherapy. 3 Credit Hours.
This course presents the physiological rationale, indications, contraindications and the application of electrical modalities, including electrical stimulation, thermal modalities, sound modalities, compressive devices, mechanical machinery, and light therapy.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 643. Medical Pathology Seminar I. 1 Credit Hour.
Lectures and seminar discussion on medical and surgical management of pathological conditions, with particular emphasis on musculoskeletal disorders.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 644. Medical Pathology Seminar II. 1 Credit Hour.
Lectures and seminar discussion on pathological conditions with particular emphasis on neuromuscular and musculoskeletal disorders.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 645. Medical Pathology Seminar III. 1 Credit Hour.
This course provides lectures and seminar discussion on medical and surgical management of pathological conditions, with particular emphasis on regenerative medicine, neuromuscular disorders and women's health.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
PTS 646. Medical Pathology Seminar IV. 1 Credit Hour.
Lectures and seminar discussion of pathological conditions with particular emphasis on cardiorespiratory and pediatric disorders.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 650. Pharmacology. 2 Credit Hours.
Basic principles of pharmacology and pharmacotherapeutics. Contemporary drug therapies and their effects on patients undergoing rehabilitation are discussed.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 670. Clinical Skills in Physical Therapy. 3 Credit Hours.
This course is specifically designed to provide each student with the necessary and basic clinical skills to function within a variety of patient settings. Utilizing a combination of lecture and the associated co-requisite laboratory, this course will cover proper body mechanics, patient positioning and draping, massage, daily patient documentation, vital signs, range of motion, basic wheelchair management and measurement, bed mobility and transfers, tilt table benefits and management, ambulatory assistive devices and gait training with assistive devices.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 671. Therapeutic Physiology. 2 Credit Hours.
This course will require the student to analyze and apply physiologic principles to promote optimal patient evaluation and management. A variety of tests and measures will be reviewed and will be integrated with specific physiologic principles in order for the student to better understand the role of therapeutic interventions for patients referred to physical therapy. The focus of the course will revolve around several related themes including (1) interpreting the cardiorespiratory response to exercise, (2) understanding energy production and regulation, (3) integrating the cardiovascular, pulmonary, and muscular systems to better understand and interpret cardiorespiratory function as well as energy production, regulation, and homeostasis, and (4) examining the effects of de-conditioning and re-conditioning using different forms of exercise for individuals who are healthy or diagnosed with a medical disorder.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 672. Clinical Kinesiology and Biomechanics. 3 Credit Hours.
A study of musculoskeletal structure and function, physiological and biomechanical factors, and principles underlying the kinematics and kinetics of normal and abnormal human motion.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 674. Clinical Examination. 3 Credit Hours.
This course will present the basic examination skills for patients with various diseases and dysfunctions of the neuromusculoskeletal system. The skills emphasized are patient interviewing, palpation, reflex/sensory testing, cranial nerve testing, coordination testing, manual muscle testing, goniometric measurement with assessment of end feels, upper and lower quarter screening, postural assessment, and documentation of findings.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 675. Clinical Decision Making I. 2 Credit Hours.
This course presents components of physical therapist practice with an emphasis on evidence-based decision making related to interviewing patients, selecting appropriate tests and measures, arriving at a physical therapy diagnosis and developing a plan of care within the physical therapist's scope of practice. Documentation formats as they relate to clinical decision making are presented. The Physical Therapist Guide to Practice patient/client management model, International Classification of Function, and practice patterns are presented. The process of physical therapy diagnosis is presented. Students will be given an opportunity to practice with case studies.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
PTS 676. Medical Screening in Physical Therapy. 1 Credit Hour.
This course presents content related to screening for medical conditions in order to make clinical decisions about appropriateness for physical therapy and need for medical referral for patients presenting for physical therapy management.
Component: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 695. Selected Topics in Physical Therapy. 1-3 Credit Hours.
Topics in contemporary physical therapy clinical practice with focus on specialty areas such as neonatal pulmonary care, balance/vestibular dysfunction, geriatrics, pediatrics, obstetrics, and gynecology.
Requisite: Physical Therapy Majors Only.
Component: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 706. Neurological Evaluation. 2 Credit Hours.
Comprehensive evaluation of the patient with neurological dysfunction. Emphasis is placed on decision making, differential diagnosis, selection, and interpretation of examination components.
Requisite: Physical Therapy Majors Only.
Component: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 708. Human Gait and Locomotion. 1 Credit Hour.
This course is an in-depth study of the fundamental mechanisms of normal human gait and locomotion. Students will be instructed on the terminology, normal joint range of motion and muscle function of the lower limbs during gait. Mechanisms of observational and instrumented analyses of gait will be discussed. Identification of common gait deviations, using observational gait analysis skills, will be briefly discussed.
Component: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 710. Clinical Experience I. 2 Credit Hours.
This is the first eight-week clinical experience following the fourth semester of didactic course work and is performed in an ambulatory/outpatient setting with emphasis on musculoskeletal diagnoses. During this experience the student concentrates on the clinical application of the basic examination, evaluation, diagnosis, prognosis, and intervention and outcome assessment that they have learned thus far in the academic setting. The student is expected to demonstrate good documentation skills, good communication skills and to develop their professionalism according to the APTA Core Values and Code of Ethics expected of the professional physical therapist.
Component: CLN.
Grading: SUS.
Typically Offered: Fall.

PTS 711. Clinical Experience II. 2 Credit Hours.
This is the second eight-week clinical experience following the completion of all didactic course work. It is the first of three sequential and summative clinical experiences. This clinical experience can be completed in an ambulatory/outpatient setting, acute care hospital, and rehabilitation hospital or unit or specialty practice such as pediatrics, sports, or women's health. Even though this clinical experience is unique, it is part of a sequence in which professional development and growth is expected. During this experience the student concentrates on the clinical application of the patient/client management model. This includes the examination, evaluation, diagnosis, prognosis, and intervention and outcome assessment within the context of the clinical setting. The student is expected to demonstrate good documentation skills, good communication skills and to develop their professionalism according to the APTA Core Values and Code of Ethics expected of the professional physical therapist.
Component: CLN.
Grading: SUS.
Typically Offered: Fall.

PTS 714. Neurorehabilitation. 3 Credit Hours.
Evidence-based practices in the treatment of individuals with neurological involvement are explored. Emphasis is placed upon the integration and application of theoretical constructs, prognostic indicators, examination and evaluation findings, and therapeutic intervention strategies utilized by physical therapists in neurological rehabilitation across disease course and practice settings.
Component: LEC.
Grading: GRD.
Typically Offered: Spring.
PTS 715. Rehabilitation of the Complex Patient. 3 Credit Hours.
The course will instruct students on the management of individuals with complex pathology that has additional complex social and environmental factors. Emphasis will be placed on the principles of assessment, treatment, discharge planning, and referral in the Acute Care environment. Topics covered include: early mobilization in the ICU, management of patients with multiple lines, drains, and tubes, multiple trauma, cancer, hospice and palliative care, bariatrics, solid organ transplantation, patient safety, collaboration with healthcare team members, and use of acute care appropriate outcome measures. The course includes hands on transfer labs, patient evaluation and simulation experiences, and a practical examination on assessment and mobilization of a simulated complex patient.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 717. Clinical Research II. 3 Credit Hours.
This course is a continuation of Clinical Research I that provides the student with continued guidance in the completion of the faculty led research project begun as part of Clinical Research I. A series of lectures also provide exposure to additional topics relevant to clinical research in Physical Therapy. Potential lecture topics include data analysis, design, error, philosophy of science, and research reporting.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 718. Physical Therapy Practice Management, Professional Issues and Advancement. 3 Credit Hours.
This course provides an introduction into the many facets of administration in physical therapy. The course has three primary areas of exploration: physical therapy administration and practice management, the current healthcare environmental influences, and personal administration and career entry preparation. These focal points are selected to assist the new graduate physical therapist in navigating early career activities, opportunities and environments. An organizational perspective will be the dominant context for this course, but mention of entrepreneurial activities will be included during the course of discussion and may be explored as part of the group projects.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 720. Biomechanical Basis of Human Movement. 3 Credit Hours.
A study of the basic biomechanical principles underlying the kinetics and kinematics of normal and abnormal human motion as well as the measurement of human movement.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 721. Measurement of Impairment and Function in Human Movement. 3 Credit Hours.
A study of measurement tools utilized in the analysis of normal and abnormal human motion.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 722. Pathobiology of Human Function I. 3 Credit Hours.
Pathophysiology of musculo-skeletal processes that impair human function including skeletal muscle; skin, tendons, ligaments, cartilage; bone; and cardiorespiratory.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 724. Cardio-Respiratory Physical Therapy. 3 Credit Hours.
The skills necessary for the evaluation and treatment of patients with various cardio-respiratory diseases and dysfunctions. Inpatient and outpatient cardiac and respiratory rehabilitation is included. Research on prevention of cardio-respiratory diseases and dysfunctions as it relates to evaluative, and therapeutic methods is also discussed.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PTS 726. Therapeutic Exercise. 3 Credit Hours.
This course will be a comprehensive approach for the evaluation and management of patients with various orthopaedic pathologies and their related dysfunction(s). An emphasis will be placed on evidence-based practice, critical thinking, treatment algorithms, as they all inter-relate to therapeutic exercises. The general focus of this course is to possess entry-level skills in the cognitive, affective, and psychomotor domains as they relate to the treatment of a wide-variety of orthopaedic conditions.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 727. Prosthetics and Orthotics. 3 Credit Hours.
This course offers a comprehensive approach to the evaluation, treatment and management of people who require the intervention of prosthetic or orthotic appliances. Identification and application of appropriate therapeutic management alternatives are integrated with self-help appliances to assist with the goal of returning the client to the community and/or the highest level of social interaction.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 728. Musculoskeletal Examination and Manual Treatment I. 3 Credit Hours.
In-depth examination of differential diagnosis of various extremity dysfunctions with principles of examining soft tissue, bony and post-surgical problems relevant to the shoulder, elbow, wrist/hand, hip, knee, ankle, and foot. Manual therapy/joint mobilizations for each joint will also be introduced.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 729. Evaluation and Treatment of Spinal Dysfunctions II. 3 Credit Hours.
This course provides an in-depth exploration of the evaluation and treatment of various dysfunctions of the spine. The cervical, thoracic, suboccipital regions and TMJ will be explored. Students will review the lumbar and sacro-iliac dysfunctions. Students are expected to critically review and investigate the literature relevant to the cervical, thoracic, and head-neck regions. Treatment for respective diagnoses will include therapeutic exercise, soft tissue stretching and manual therapy techniques. Clinical competence in manual evaluation and treatment procedures are to be developed.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 730. Pediatric Physical Therapy. 2 Credit Hours.
This course is designed to provide students with an entry level knowledge, attitudes and skills essential for working with children with movement dysfunction. Examination and evidence-based practices utilized by physical therapists in the treatment of children with musculoskeletal, neuromuscular, cardiopulmonary, integumentary and/or cognitive/affective issues will be emphasized.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 731. Geriatric Physical Therapy. 2 Credit Hours.
A case-based clinical approach to factors and issues related to examination, evaluation, diagnosis, prognosis, and intervention of aging adults by physical therapists. Topics covered include age-related versus activity related changes to body systems; use of standardized functional assessments appropriate for aging adults; successful aging; musculoskeletal, neuromuscular, cardiopulmonary, cognitive and psychiatric disorders in the elderly; fall risk assessment and fall prevention; home and environmental adaptations/modifications; health care delivery sites/systems; nutrition; polypharmacy; Medicare rules and regulation related to rehabilitation; frailty/sarcopenia; and strength training and exercise prescription in the aging adult. Focused discussion centers on clinical decision making across multiple geriatric settings.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 743. Measuring Health Outcomes. 3 Credit Hours.
An in depth analysis of the use and construction of health outcome measures. Topics covered include creating and selecting items, scaling responses, scale construction, response bias, reliability, validity, responsiveness and methods of administration.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PTS 744. Integrated Sports and Leisure. 3 Credit Hours.
Course promotes the integration of students with the physically challenged by working together to learn common recreational activities. Sailing and camping activities are used as an educational tool for students to learn the capabilities, physical resources, and assistance required by physically challenged individuals.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 745. Integumentary Disorders and Treatment. 2 Credit Hours.
The course will instruct students on the management of individuals with open wounds, burns, and other dermatologic pathology from a patient focused perspective. Emphasis is placed on clinical decision making as it relates to the principles of assessment, treatment, referral, and prevention. Topics covered include: wound assessment and documentation, debridement, electrical stimulation and ultrasound for wounds, dressing selection, skin breakdown and pressure ulcer prevention, support surface selection, burns, skin grafts and muscle flaps, evaluation of arterial and venous circulation, nutrition, and the identification of melanoma, basal cell and squamous carcinoma, psoriasis, impetigo, shingles and other dermatological pathology. The course includes labs for wound evaluation, measurement, debridement, dressing selection and application, pressure mapping and support surface selection.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 748. Musculoskeletal Examination and Treatment II. 3 Credit Hours.
Advanced examination, evaluation, functional assessment and treatment of patients in selected specialty areas of musculoskeletal physical therapy, with emphasis on functional outcomes and evidence based treatment throughout the life span.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 755. Neuromuscular Basis of Movement. 3 Credit Hours.
Concepts of neuromuscular production and regulation of movement with emphasis on neurophysiologic substrates and mechanisms underlying motor behavior.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 760. Theories of Movement Science. 3 Credit Hours.
An in-depth review of classical theories and recent research in the movement sciences, to include the study and analysis of system theory and neurobiological substrates.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 761. Motor Learning. 3 Credit Hours.
The factors relating to, and affecting, the acquisition and performance of motor skills. Qualification of skill acquisition and performance are explored.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 762. Advanced Topics in Neurodevelopment. 3 Credit Hours.
Classical research and systems models of neurodevelopment is reviewed, analyzed, and related to current research on various areas of human development throughout the lifespan.
Requisite: Physical Therapy PHD Majors Only.
Components: THI.
Grading: GRD.
Typically Offered: Offered by Announcement Only.
PTS 764. Seminars in Neuroscience. 3 Credit Hours.
This course explores the role and organization of the key units of the central and peripheral nervous systems at the molecular and cellular levels. The integrated functional physiology of systems neuroscience and behavioral neuroscience will be studied with special emphasis on neural contributions to involuntary and voluntary motor functions, perception, cognition, and learning. PREREQUISITE: For Physical Therapy PhD students only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 765. Health Promotion and Disease Prevention. 2 Credit Hours.
The role of physical therapists in health promotion and disease prevention.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

PTS 766. Rehabilitation of the Amputee. 3 Credit Hours.
This course examines the scientific evidence related to the evaluation, treatment and management of clients who require intervention for diabetic foot and/or dysvascular limb potentially leading to amputation, amputation surgery, prosthetic appliances, functional assessment and amputee rehabilitation. Upper limb prosthetic management will also be examined.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 767. Prosthetic Technology and Amputee Rehabilitation. 3 Credit Hours.
This course examines the current scientific evidence related to prosthetic devices with regard to evaluation, fabrication, materials, fitting and functional outcomes. Emphasis is on state-of-the-art technology and the future of prosthetic designs.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 768. Rehabilitation Engineering and Assistive Technology. 3 Credit Hours.
This course is designed for graduate students interested in developing an understanding of complementary roles of clinicians and engineers in assisting individuals with disabilities in all areas of life.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 769. Seminars in Orthotics and Prosthetic Rehabilitation. 3 Credit Hours.
Examination of current scientific evidence and clinical issues related to upper and lower limb amputees, and prosthetic and orthotic componentry and related technology. Students will discuss case studies and design appropriate devices to address the needs of the individuals in the cases.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 770. Education Principles in Physical Therapy. 1 Credit Hour.
Principles of education, as they apply to the educational setting, and in patient care. Students are instructed in basic educational principles and methods to prepare materials and instruct and evaluate learning for patients, families, caretakers, students, colleagues, and others, in the classroom, clinic and community.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 771. Complementary Therapies in Rehabilitation. 2 Credit Hours.
Historical development and evidence-based approach to complementary therapies in rehabilitation.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
PTS 774. Role of Academic Faculty in Physical Therapy. 3 Credit Hours.
Introduction to the faculty roles in an institution of higher education, including faculty development and evaluation systems, educational leadership, and student advising, initiation of a research career and educational administration of physical therapy programs at the entry-level and post-graduate level.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

PTS 775. Clinical Decision Making II. 3 Credit Hours.
This course will require the student to utilize: the patient management model, the ICF model, the role of disablement and enablement in the provision of physical therapy, all clinical and basic science course work, professional and third party documentation requirements, knowledge of healthcare delivery systems and legal/regulatory requirements, as well as the research literature to plan and document evidence-based care of patients in a variety of settings spanning the continuum of care. Cases will represent a sample of ages, diagnoses, and patient acuity and complexity.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 777. Instructional Methods in Physical Therapy Education. 3 Credit Hours.
Overview of research in the professional education field, with specific applications to physical therapy academic and clinical education. Emphasis is placed on curriculum development, competency-based instructional design, testing, and instructional evaluation methods.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 778. Teaching Practicum. 1-3 Credit Hours.
Supervised instructional design, teaching and evaluation of entry level physical therapy students. Students participate as course instructors in entry-level master’s degree physical therapy curriculum.
Requisite: Physical Therapy PHD Majors Only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 784. Human Neuroanatomy. 3 Credit Hours.
Detailed exploration of the human nervous system with an emphasis on structure-function relationship and clinical applications. This course is designed for Physical Therapy graduate students with an interest in a professional career in teaching the anatomical sciences to students of the health professions including medical students.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

PTS 785. Medical Diagnostic Tests. 2 Credit Hours.
This course is designed to provide the Physical Therapy student with the basic skills in understanding and interpreting the imaging techniques of Plain film x-ray, Magnetic Resonance Imaging, Computed Tomography, Bone Scans, Real Time Ultrasound, Electrodiagnostic Tests, selected Laboratory Tests and Fluoroscopy. Special emphasis will be placed on the understanding of where the interpretation of these images falls in physical therapy Differential Diagnosis and evidence based practice.
Requisite: Physical Therapy Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 790. Models of Physical Therapy Practice. 3 Credit Hours.
Study of the integration of didactic knowledge, clinical skills, clinical problem solving and the intuitive process into the formation of a clinical diagnosis which will direct treatment in physical therapy. Diagnosis as a process in physical therapy is compared to diagnosis in nursing, psychiatry and medicine, and is distinguished from similar processes such as assessment, examination and screening. Various models of physical therapy practice currently being taught and published will be explored, including the ICF model, the Patient/Client management model, and the Movement System. Recommendations for a Model of PT Diagnosis and Decision making will be made by students.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
PTS 795. Clinical Research Methods I. 3 Credit Hours.
An overview of measurement and sampling research design relevant to clinical research in physical therapy.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

PTS 796. Applied Statistics in Physical Therapy. 3 Credit Hours.
Basic statistics taught from an applied perspective which includes statistical computing using SAS or SPSS and interpretation and presentation of data analysis.
Requisite: Physical Therapy PHD Majors Only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 798. Research Practicum. 3 Credit Hours.
Practicum designed to familiarize the student with an area of research, to implement a pilot study in an area of interest, and to develop working relationship with a sponsoring faculty member.
Requisite: Physical Therapy PHD Majors Only.
Components: RSC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 799. Independent Study in Physical Therapy. 1-3 Credit Hours.
Each course is designed to meet the needs of graduate students for in-depth study in a particular area of special interest.
Requisite: Physical Therapy Majors Only.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 802. Special Internship. 1-3 Credit Hours.
Supervised clinical education emphasizing clinical skills.
Requisite: Physical Therapy Majors Only.
Components: CLN.
Grading: SUS.
Typically Offered: Offered by Announcement Only.

PTS 803. Clinical Experience III. 2 Credit Hours.
This is the third eight-week clinical experience following the completion of all didactic course work. It is the third of three sequential and summative internships. This internship can be completed in an ambulatory/outpatient setting, acute care hospital, and rehabilitation hospital or unit or specialty practice such as pediatrics, sports, or women's health. Even though this internship is unique, it is part of a sequence in which professional development and growth is expected. During this experience the student concentrates on the clinical application of the patient/client management model. This includes the examination, evaluation, diagnosis, prognosis, and intervention and outcome assessment within the context of the clinical setting.
Components: CLN.
Grading: SUS.
Typically Offered: Spring.

PTS 804. Clinical Experience IV. 2 Credit Hours.
This is the fourth eight-week experience following the completion of all didactic course work. It is the fourth of three sequential and summative experiences. This experience can be completed in an ambulatory/outpatient setting, acute care hospital, and rehabilitation hospital or unit or specialty practice such as pediatrics, sports, or women's health. Even though this experience is unique, it is part of a sequence in which professional development and growth is expected. During this experience the student concentrates on the clinical application of the patient/client management model. This includes the examination, evaluation, diagnosis, prognosis, and intervention and outcome assessment within the context of the clinical setting. The student is expected to demonstrate good documentation skills, good communication skills and to develop their professionalism according to the APTA Core Values and Code of Ethics expected of the professional physical therapist.
Components: CLN.
Grading: SUS.
Typically Offered: Spring.

PTS 830. Pre-candidacy Dissertation. 1-6 Credit Hours.
To be used for pre-candidacy PhD dissertation research.
Requisite: Physical Therapy PHD Majors Only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
PTS 840. Post-candidacy Dissertation. 1-12 Credit Hours.
The student will enroll for credits as determined by his/her advisor, but not for less than a total of 12. No more than six hours may be taken in a regular semester, nor more than three in a summer session. When a student has passed his/her qualifying exams and is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.
Requisite: Physical Therapy PHD Majors Only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

PTS 843. Measuring Health Outcomes. 3 Credit Hours.
An in depth analysis of the use and construction of instruments designed to measure health outcomes. Topics covered include creating and selecting items, scaling responses, scale construction, response bias, reliability, validity, measuring change, and methods of administration.
Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

PTS 850. Research in Residence. 1 Credit Hour.
To establish residence for the PhD, or DPT, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research or clinical practice. Credit not granted, may be regarded as full-time residence as determined by the Dean of the Graduate School.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

D.P.T. Doctor of Physical Therapy (Entry Level)
Overview
To receive the Doctor of Physical Therapy degree, the candidate must:

1. Complete all required coursework (103 credit hours) with an overall GPA of 3.0 or better.
2. Complete at least 3 credit hours of Elective coursework, in addition to the 103 credit hours.
3. Successfully complete the clinical internships (I-IV) required.

Admission Requirements
Applicants should have a baccalaureate degree in a related field and 3.0, or “B” average or better in the following courses:

Application Procedure
We are accepting applications through Physical Therapist Centralized Application Service (PTCAS). Click here (http://www.ptcas.org/) to apply.

The next application cycle will open on July 1. The application deadline is October 15; we encourage you to apply early. Classes begin in May of each year. Application requirements consist of the following:

1. Submission of all application materials to PTCAS. Completion of prerequisites or plan to complete by time of matriculation, with a minimum GPA of 3.0 on a 4.0 scale.
2. Demonstration of knowledge concerning the physical therapy profession by submitting:
   • A minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.
   • This experience must be substantiated in writing by a registered/licensed physical therapist. The name and email of the physical therapist(s) is required for verification.
3. Submission of three to four (3-4) letters of recommendation from people who can address both the applicant’s moral character and potential as a physical therapist.
   - At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.

4. An on-site interview is required and will be offered to those applicants who have met the admission criteria.

5. Graduate Record Exam (GRE). Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 3.0 on the analytical section is also required.

6. International students are to complete the PTCAS application and submit official transcripts to the DPT program instead of PTCAS. Transcripts that are not in English must include an official translation. International applicants must have all transcripts evaluated by the University of Miami’s Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation. International applicants must meet ALL the necessary requirements to qualify for a student visa.

1. Students are required to complete a minimum of 3 elective credits in addition to the required courses. For a list of elective courses, please visit [http://pt.med.miami.edu/Documents/ELECTIVES.pdf](http://pt.med.miami.edu/Documents/ELECTIVES.pdf).

2. The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country. Distant internships may incur additional expenses for the student.

### Mission

The mission of the UMMSOM Department of Physical Therapy is to:

- Educate, develop and nurture the next generation of leaders in physical therapy;
- Deliver high-caliber, compassionate physical therapy care in a wide variety of settings;
- Create and disseminate new knowledge in support of the evidence based practice of physical therapy;
- Provide service to our local community and beyond; and
- Create an educational and clinical environment that embodies diversity of people and perspectives.
Goals
Specific goals and objectives for the DPT Program are the development and application of:

- The principles and practices of the professional discipline;
- Clinical decision making skills; and
- Education, leadership, management and research capability.

Thus, our graduates are prepared for future professional and societal obligations through providing leadership and contributing to both the growth of the profession, and the clinical research agenda.

Student Learning Outcomes
- DPT students will demonstrate professional behaviors appropriate for an entry level physical therapist in their interactions with all people.
- DPT Students will demonstrate clinical decision making skills appropriate for an entry level physical therapist in a variety of patient care settings.
- DPT students will demonstrate an overall knowledge and understanding of the core concepts in evidence-based practice in physical therapy including the essential critical inquiry skills necessary to utilize research literature as a foundation for the practice of physical therapy.

Ph.D. in Physical Therapy
Overview
The Doctor of Philosophy in Physical Therapy prepares physical therapists for leadership positions in academic and research settings. To accomplish this, students are required to complete coursework and structured experiences in “Teaching and Faculty Leadership” and “Research.” Students develop expertise in a specific area of concentration under the guidance of their faculty mentor by developing an individual plan of study that may include both coursework and independent study and by completing their dissertation research.

Prior to admission to the PhD in Physical Therapy program, prospective students are required to identify a faculty member with research interests compatible with those of the applicant. This faculty member must agree to mentor the potential student before the PhD Committee will make a decision to admit the applicant. For applicants accepted to the program, the faculty member who agreed to mentor the student will serve as the Chair of the student's Supervisory Committee. The Supervisory Committee Chair and the student are responsible for creating an individualized plan of study for each student. The plan of study includes mandatory coursework in:

Preparation for Teaching and Faculty Leadership
- PTS774 Role of Academic Faculty in PT (3 credits)
- PTS777 Instructional Methods in Physical Therapy Education (3 credits)
- PTS778 Teaching Practicum (3 credits)
- PTS790 Theoretical Models in Physical Therapy (3 credits)

Preparation for Research
- PTS795 Clinical Research Methods I (3 credits)
- PTS796 Applied Statistics in Physical Therapy (3 credits)
- PTS798 Research Practicum (3 credits)
- PTS843 Measuring Health Outcomes (3 credits)
- Two graduate level courses in statistics (6 credits)

Preparation in Individual Area of Concentration:
- Students typically take 18 credits of coursework in this area. This may include coursework offered by the Department of Physical Therapy, coursework offered outside the Department, and Independent Study.

Qualifying Examination
Every PhD student must take a written qualifying examination at the time that the student and the Chair of the student’s Supervisory Committee deem appropriate. Students can sit for the qualifying examination when they have completed their research practicum and all courses with the exception of an elective. The student must have a 3.0 GPA for all courses taken in the PhD program. The qualifying examination includes questions in four content areas: 1) Area of Concentration, 2) Teaching and Leadership, 3) Research, 4) Dissertation Specific Content.

Dissertation
After passing the qualifying examination, students form a dissertation committee and enter candidacy. The program requires PhD students to submit a written dissertation proposal and orally defend the proposal within 4 months of admission to candidacy. Students are required to take a minimum
of 15 Dissertation credits. The program requires students to submit at least one article from their dissertation research for publication in a peer reviewed journal prior to the final public oral defense of the dissertation. Immediately following the public defense of the dissertation, the members of the dissertation committee excuse all non-committee members and further interrogate the candidate. The committee then deliberales in private to determine whether the candidate has successfully defended the dissertation. The typical time to complete a PhD in Physical Therapy is 5 years.

**Mission**

The University of Miami, Doctor of Philosophy in Physical Therapy is designed to prepare physical therapists for leadership positions in academic and research settings.

**Goals**

We believe that this preparation should include:

- Proficiency in instructional design, teaching methods, and evaluation;
- Advanced knowledge and skill in research methods, design, implementation of analysis and communication of results; and
- Expertise in a specified content area.
Student Learning Outcomes

• Students from the Physical Therapy PhD Program will demonstrate their proficiency in instructional design, teaching methods and evaluation.
• Students from the Physical Therapy PhD Program will demonstrate advanced knowledge and skill in research methods, design, data analysis and communication of results.
• Students from the Physical Therapy PhD Program will demonstrate expertise in a specified content area.

Public Health

http://publichealth.med.miami.edu/

Dept. Code: EPH

Degree Programs

• Accelerated Master of Public Health (MPH)
• Certificate in Public Health
• Master of Public Health (MPH)
• Master of Science in Public Health (MSPH)
• Master of Science in Climate and Health (MSCH)
• Master of Science in Prevention Science and Community Health (MS PSCH)
• Doctor of Philosophy in Epidemiology (PhD)
• Doctor of Philosophy in Prevention Science and Community Health (PhD)

The Graduate Programs in the Department of Public Health Sciences at the University of Miami Miller School of Medicine are at the forefront of public health science with emphasis on research, education, and evidence based public health service. The Graduate Programs promote an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Public Health Sciences is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.

Joint Degree Programs

Joint degree programs (http://publichealth.med.miami.edu/graduate/academic-programs/) are also offered in conjunction with the School of Medicine (MD/MPH, MD/PhD), School of Law (JD/MPH), College of Arts and Sciences (MPA/MPH), (MAIA/MPH), (MLAS/MPH), and School of Nursing and Health Studies (4+1 BSPH/MPH).

• Medical Doctorate/Master of Public Health (MD/MPH)
• Medical Doctorate/Doctorate of Philosophy (MD/PhD)
• Juris Doctorate/Master of Public Health (JD/MPH)
• Master of Public Administration/Master of Public Health (MPA/MPH)
• Master of Arts in International Administration/Master of Public Health (MAIA/MPH)
• Master of Latin American Studies/Master of Public Health (MLAS/MPH)
• Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MPH)
• Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MSPH)

Admission Requirements

Admissions requirements are specified for each degree program within this Bulletin.

Masters Programs in Public Health

• M.P.H. Master of Public Health (p. 2646)
• M.S.P.H. Master of Science in Public Health (p. 2667)
• M.S.P.S.C.H. Master of Science in Prevention Science and Community Health (p. 2665)
• M.S.C.H. Master of Science in Climate and Health (p. 2661)

Doctoral Programs in Public Health

• Ph.D. in Epidemiology (p. 2672)
• Ph.D. in Prevention Science and Community Health (p. 2674)
EPH 600. Introduction to the Science & Practice of Public Health. 3 Credit Hours.
This introductory course will provide students with the opportunity to explore and analyse contemporary public health issues and provide a history and a context that will allow students to better understand the field of public health, its core disciplines and their role as future public health professionals. Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 601. Medical Biostatistics I. 4 Credit Hours.
Introduction to probability and statistics including descriptive statistics, tests of hypothesis, regression analysis, contingency tables, nonparametric tests, and life tables. Students gain hands-on experience in the analysis of medical data using several computer systems and at least one of the different statistical packages such as: BMDP, SAS, PSTAT, SYSTAT, and Minitab. Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 602. Biostatistics II. 3 Credit Hours.
Continuation and elaboration of EPH601. Topics include design of factorial experiments, analysis of variance and variance components, multiple linear regression, and life tables.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 603. Medical Biostatistics. 3 Credit Hours.
This course is a hands-on introduction to biomedical research with a focus on collecting and analyzing patient data. Topics covered include: data security, visualization and analysis. Statistical topics include: probability, frequentist and Bayesian thinking, and both parametric and non-parametric statistical methods. Methods covered include: regression, contingency tables, and survival analysis techniques. Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 604. Clinical Trials. 3 Credit Hours.
The Clinical Trials course is directed specifically at providing an overview of the broad area of clinical trials. Specifically, this course presents principles that underlie the design and conduct of clinical trials, statistical methods used in clinical trials, and ethical considerations in clinical trials and research. The course uses lectures, case studies, board discussions, written assignments, and applied exercises. The course is designed to focus on practical aspects of designing and conducting randomized clinical trials in a real-world public health settings. Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 607. Interdisciplinary Health Communication. 3 Credit Hours.
Health communication is a critical tool for protecting and improving the health of people and their communities and is most effective when developed collaboratively using expertise from many disciplines. The focus of this course is the development of written, oral, and multimedia communication skills that will enable you to effectively communicate concepts and evidence-based scientific findings to diverse communities and professionals in health and other fields. Class time will largely be devoted to the development of these skills in the context of working effectively in interprofessional teams of approximately 5-6 students. Working collaboratively, students will develop teamwork skills and an awareness for the diversity of expertise that underpins effective interprofessional communication teams.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 608. Professional Development. 2 Credit Hours.
This 2-credit seminar will be dedicated to providing students with opportunities to gain experiences and professional skills such as job interviewing, public speaking, preparing budgets, grant proposal writing, and working with community organizations. The course will be interactive, where I will talk about skills that are important in the public health workforce and students will then practice the skills in pairs or groups. There will be no exams or quizzes; rather, students will be graded on public speaking, performance in a mock job interview, ability to write a mock grant application, developing a grant proposal budget, preparation of a CV/resume, and disseminating research findings to community stakeholders. Class will meet every Tuesday from 1 to 3:30 in CRB 989. Students should come ready to participate and to give constructive feedback to their peers. Each topic will be covered across 2 (and sometimes 3) class sessions, so that everyone has sufficient time to practice their skills and receive feedback.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.
EPH 611. Mindfulness in Public Health and Medicine. 3 Credit Hours.
The stress of modern life can adversely impact physical and mental health functioning which may be ameliorated by the practice of mindfulness. Mindfulness is a mental state achieved by focusing one's awareness on the present moment, while calmly acknowledging and accepting one's feelings, thoughts, and bodily sensations. This practice is derived from Buddhist traditions more than 2,500 years old. In recent decades these practices have been adopted for use in United States and elsewhere and evidence is growing that these practices can reduce psychological symptomatology (e.g., symptoms of depression and anxiety), enhance resiliency in response to stressors, enhanced pain coping ability, and enhanced attentional regulation, among other benefits. The first half of this course will be devoted to the completion of an 8-week Mindfulness-Based Stress Reduction Course (MBSR) that will involve in-class activities and daily at-home mindfulness practice assignments. Students will maintain a journal documenting their "first-person" encounter with the practice of mindfulness. The second half of the course will be organized around a lecture format with weekly brief quizzes. Anonymous questionnaire data will be collected before, during and after completion of the MBSR course. These data will be used by student teams to evaluate the impact of MBSR on multiple outcomes. Groups will prepare a written report and present their findings to the class at the end of the semester.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 612. Global Health. 3 Credit Hours.
This seminar examines current global public health issues, governance and decision-making challenges for the 21st Century across developing, transitioning, and developed countries. Topics of discussion include new actors for world health in the era of globalization; linking human development, poverty and health inequities; social, cultural and ethical considerations for health planning; role of industry, trade and public health; evidence based research for improved global health initiatives; foreign policy and health security challenges associated with emergence and re-emergence of infectious diseases and public and private partnerships in global health. Open only to EPH majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 613. Emerging Challenges in Global Health Systems. 2-3 Credit Hours.
Health systems around the world must respond to an evolving landscape of health risk and disease burden that is increasingly dominated by complex, chronic illness. Contrary to what is often espoused, chronic and non-communicable diseases affect both poor and rich. Yet, access to health services is highly inequitable creating immense divides and equity imperatives that have largely been ignored in global health. This course examines how global and national health systems - particularly in low and middle-incomes countries – can better face the changing burden of disease with a focus on equity and universal coverage.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 614. Global Outbreak. 3 Credit Hours.
This seminar examines current global public health issues and provides an overview of global outbreak investigations and disease surveillance. Participating in epidemiological/outbreak investigations in international settings provides unique opportunities to learn about health challenges in different ecologic, cultural and resource limited settings. This seminar will also allow students to gather insight into public health surveillance and understand the utility of the ongoing systematic collection, analysis and interpretation of data for use in planning and evaluation of public health intervention programs.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 616. Global Health and Global Justice. 3 Credit Hours.
Global health has emerged as a field distinct from older visions of international health, by focusing on macro-level problems caused by globalization whose origin and solution must transcend national boundaries. Yet global health has also challenged ethics to develop new accounts of justice in this changing world. This course will analyze global health from the lens of ethics. The course will introduce core theories of public health ethics (e.g. utilitarianism, statism and cosmopolitanism) to make sense of the rise of global justice as a distinct field of ethical inquiry. Armed with this conceptual foundation, we will then examine some of the central problems of global health, as well as proposed solutions to those problems. Such skills in argumentation will be increasingly critical for future public health leaders, yet too few public health students are exposed to ethical analysis. By applying ethical frameworks to analyze global health problems, students will gain critical skills in how to integrate distinct forms of knowledge, how to develop cogent normative arguments, and how to articulate and defend an account of fair decision-making and just policies in global health.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPH 617. Disease Prevention and Health Promotion. 3 Credit Hours.
This course will introduce students to the science of prevention and health promotion. More specifically, through didactic presentations, group discussions, article readings and critiques, and a term project, this course will focus on providing students with an overview of: the top preventable causes of disease in the U.S., the etiology of disease (with a focus on the top preventable causes of disease in the U.S.) across the lifespan, the role of prevention theories in the development of preventive interventions, and the role of methodology in prevention science. The course will also provide an overview of efficacious/effective preventive interventions, including (but not limited to): family community, and school level interventions. Examples from the fields of obesity, drug use, smoking, and HIV will be used to illustrate the course learning objectives detailed below.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 620. Health Education and Behavior. 3 Credit Hours.
Educational processes with special emphasis on the social and cultural determinants of health behavior, health education as a process of social change, and community based health education organizations. Open only to EPH majors.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 621. Fundamentals of Epidemiology. 3 Credit Hours.
Principles and methods of epidemiology. Descriptive epidemiology, environmental and other risk factors, detection of outbreaks, basic demography, and etiologic studies.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 622. Obesity and Public Health. 3 Credit Hours.
Nearly two thirds of the United States is now considered overweight or obese and the associated medical costs are placing an unsustainable burden on our health care system. However, the issue of overweight/obesity extends beyond behavioral choices and medical costs. This course will take a deeper look at the complex interactions between our environment, behaviors, and policies, and how they jointly contribute to the obesity epidemic. This course will provide an interdisciplinary perspective of the biological, psychosocial, ecological, and economic determinants that contribute to obesity and the resulting pathways to chronic disease and disability. Finally, current evidence-based public health programs currently will be discussed to stimulate critical thinking necessary to implement effective obesity prevention and control programs.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 623. Determinants of Health and Health Disparities Across the Life Course. 3 Credit Hours.
This course builds on the concepts and methods examined in EPH 614, delving further into risk and protective processes related to health outcomes across the life course, from the prenatal period to older adulthood. Class readings and discussions will examine examples of common risk pathways contributing to various diseases, from the prenatal period to older adulthood. Class readings and discussions will examine examples of common risk pathways contributing to various diseases, including pathways hypothesized to be related to health inequities and disparities, such as: economic and educational disadvantage, stress, sedentary behavior and poor behavioral regulation, social isolation. Common protective pathways that promote health are also reviewed, such as: positive parenting and family relations, and social support.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 624. Applied Epidemiology: Theory and Practice. 3 Credit Hours.
This course will demonstrate how to apply traditional epidemiological methods for determining disease etiology to real life problems in public health and health services research. It will introduce students to the field of applied epidemiology, the division of epidemiology that involves the detection, response, control, and prevention of public health issues in the population. It will focus on the practice of epidemiology in government agencies and community settings, providing a contrast to epidemiologic work conducted in research settings and academic institutions. Upon completion of this course, students will understand the role and methodologies of applied epidemiologists and learn skills that will prepare them for future work as public health practitioners.
Prerequisite: EPH 621.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.
EPH 625. Research Ethics in Public Health. 3 Credit Hours.
The course identifies and analyzes ethical issues in epidemiologic practice and research. Issues include data acquisition and management, confidentiality, valid consent, advocacy, public policy, subgroup stigma, research sponsorship, conflicts of interest, communication of risk, and international and intercultural difference.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 626. Health Equity. 3 Credit Hours.
The goal of this course is to cover health disparities from multiple perspectives and levels of analysis. We know that the same ethnic, social, and cultural groups are characterized by disparities in many different health outcomes—including “voluntary” behaviors such as crime, violence, sexual risk taking, and substance abuse as well as “involuntary” outcomes such as diabetes, cancer and heart disease. These disparities are rooted in the same structure of how groups relate to each other, in the physical built environment, in the quality of education provided to children, and in access to quality health care. We will cover all of these (and other) determinants in this course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 631. Public Health Administration. 3 Credit Hours.
An overview of the historical background, philosophy, and purpose of public health. Relationship between government, law, and public health. Organization, management, and intergovernmental relationships of public health agencies in the United States at the federal, state, and local level. Basic principles of management, decision making, and prioritizing in public health are discussed. Overview of programs and services provided by public health organizations with emphasis on current public health issues and problems are also included. Open only to EPH majors.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 632. U.S. Health Systems. 3 Credit Hours.
This course provides an introduction to the multiple systems that define, describe, and shape the delivery of health care in the United States. Using case studies and presentations of major issues, this course will give the learner an appreciation of the dilemma confronting policy makers, providers, and patients: how to balance cost, quality, and access.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 633. Policy & Management of the Health Effects of Climate. 3 Credit Hours.
Using a health-centered approach, the course will provide critical review of the existing policies aimed at managing the health effects of climate/weather, identify potential gaps in the policies needed to improve and protect health effects of short- and long-term trends of climate and weather and extreme weather. Students will be exposed to real-world preparation and adaption strategies to manage health effects of climate, and develop understanding of and skills in the cost-benefit analysis of evidence-based policies. As a part of the course, students will develop and evaluate (evidence-based) policies to manage a selected health outcome with respect to a selected (in)direct climate/weather related condition(s).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 639. Ecology and Control of Vector-Borne Diseases. 3 Credit Hours.
The course will provide students with an overview of the epidemiology of major vector-borne diseases in the U.S. (e.g., Lyme Disease, West Nile Virus) and globally (e.g., malaria, dengue, filariasis, leishmaniasis, and other arboviruses), field and lab-based methodologies for vector studies to incriminate vector species and assess transmission dynamics, vector and disease surveillance, and “cutting-edge” vector control technology. A major focus will be on the ecology of vectors in their local environments and how transmission dynamics are affected by changes in land use, urbanization, and climate. Students will learn about new WHO-approved strategies for integrated Vector Management (IVM) and how they are applicable for the prevention and control of all vector-borne diseases.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 640. Urban Environment and Public Health. 3 Credit Hours.
Where we live, where we work, where we go, and how we get there may all impact our behaviors and ultimately our health and well-being. This course examines the urban environment - in particular, those aspects of urban/suburban/semi-rural environments created by humans. This includes how homes, neighborhoods, cities and regions impact public health challenges such as obesity, chronic disease, mental health, infectious disease, and injuries. This course will teach students to translate scientific findings to design healthy communities, and develop interventions to promote urban health. Students will learn how to map neighborhood characteristics such as food outlets, parks and walkability, and to develop recommendations for policymakers.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 641. Environmental Health. 3 Credit Hours.
Interdisciplinary scope of environmental health problems. Development of a practical, dynamic model for integrating fundamental concepts from a variety of environmental disciplines. Open only to EPH majors.
Requisite: Must be in either Program Plan, BSTS, EPID, EPID1, PREV, MDRP.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 643. Introduction to Occupational Health. 3 Credit Hours.
This course offers a general introduction to major concepts and issues in occupational health and safety from local to global, addressing fundamental topics and current controversies. The course covers core topics that prepare students to more fully understand and address occupational health issues: toxicology, exposure assessment, occupational epidemiology, risk assessment/risk management, prevention of workplace injury and disease, health promotion of adults and protection of worker populations from environmental hazards.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 644. Fundamentals of Program Evaluation. 3 Credit Hours.
Fundamentals of Program Evaluation was developed as a survey course directed specifically at providing an overview of the broad area of program evaluation. At its base, program evaluation is the investigator of a program's characteristics and merits. In context of health care, the purpose of program evaluation is to provide information in the effectiveness of programs or interventions so as to optimize the outcomes, efficiency and quality of health care. Evaluation of a program is an essential part of the successful implementation and conduct of any health care project or intervention, and should ideally be designed along with the project itself. Program evaluation activities can use a wide range of methodologies (e.g., qualitative, quantitative), analyze different aspects of a program (e.g., structure, activities, organization), and have a large number of intended outcomes (e.g., achievement or program's goals objectives, extent of program impact, program cost).

Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 646. Climate and Health. 3 Credit Hours.
There is an intricate relationship between climate and health. Climate changes directly affect health and well-being but also mediate the effects of socio-physical and biochemical changes in the environment on health and well-being. This course will help students unravel this intricate relationship between climate and health. A range of topics will be covered including: a) the etiology of disease with respect to climate change, b) shifting burden of disease and disability with respect to changing climate and climate-mediated changes in the environment, and c) application areas of climate-health linkages: unintentional injuries and climate change, vector-borne disease and climate change, heat-related mortality, disease of metabolic syndrome and climate change, cardiopulmonary, allergy and immunology disease due to bioaerosols and air pollution.

Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 647. Community Based Participatory Research. 3 Credit Hours.
Community-based participatory research (CBPR) is methodology, increasingly popular in public health and other disciplines, which invites community collaboration throughout the research process from conceptualization of study focus to dissemination of findings. This course will provide an opportunity for medical and graduate students to better understand the process by which community members and academic researchers work collectively to address health disparities and influence social change.
Prerequisite: EPH 621 and EPH 617 or EPH 620. And Requisite: Must be in a Plan of BSTS or EPID or PREV or MDRP.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 648. Climate, Cool Cities, Healthy Communities. 3 Credit Hours.
In the current era of climate change and rapid urbanization, an understanding of the impacts of urban design, planning and policies on climate and human health in urban and suburban areas is critical. Drawing on diverse disciplinary perspectives, including public health, architecture, planning, and public policy and government and non-profit sectors, the course provides students with the ability to comprehend, synthesize, communicate, and apply evidence-based urban design principles in relation to current and future challenges of climate and health. Additionally, in accordance with the adage, “Think globally, act locally,” students will have the opportunity to interact with local experts who will share their knowledge of national and international policies and programs in the area of urban design, climate and health – while applying their learning to measure current challenges and inform policies of climate and health in the urban/suburban localities of the South Florida region.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 650. Health Economics for Evaluation and Policy. 3 Credit Hours.
This course centers on a discussion of the criteria used to evaluate the allocation of resources and analyze the behavior of two of the principal actors—consumers and firms. The principles of microeconomics are presented in the context of health care systems and markets. Numerous real-world issues and case studies are used to demonstrate economic decision-making techniques, especially for health care organizations and consumers.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 651. Research Methods. 3 Credit Hours.
Purpose of the course is to provide students with a sound understanding of the fundamental concepts and methods for conducting public health research. After a brief introduction to the philosophy of science, the major emphasis in the early portion of the course is on research conceptualization, design and measurement, with a particular focus on the logic of minimizing rival alternative explanations of finding for experimental and quasi-experimental studies.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 652. Health Policy. 3 Credit Hours.
Part I will examine seven models encompassing different perspectives on public health: philosophy, political theory and politics, law, economic, science and information culture and religion, and organization and management, including how they relate and their relevance in formulating, implementing, and evaluating public policy. Part II will examine the policy making process including how issues reach the government agenda, how laws are formulated, and how the process affects substance. Part III describes the core elements of policy analysis including: problem definition; background; political, economic, and social landscape; development of policy options; and recommendation. It will also include discussions of how to find and analyze documents and data as well as discuss the financing of health care.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

EPH 653. Leading Change in Population Health—Moving From Talk to Action. 3 Credit Hours.
Addressing the public health challenges of the 21st century will require public health leaders to be facile in leading change efforts (on the individual, organizational and system levels) and multi-stakeholder collaborations for measurable results. This transition course at the end of the MD/MPH second year will prepare MD/MPH students for their more advanced experiences in community and public health in the third and fourth years. The objective of this course is to provide students with an opportunity to develop essential skills in leading change in public health while linking their academic work in epidemiology and public health for real world application in public health practice. Students will receive didactic presentations on topics such as leading change, mobilizing multi-stakeholder leaders for aligned action, interest-based negotiation, leading from the middle, leveraging conflict to advance adaptive challenges, communicating /framing your message(s), systems change, as well as lectures on health disparities and the social determinants of health. These lectures will be integrated with interactive discussions and hands-on small group exercises to explore how practitioners can translate public health and community knowledge into sustainable solutions. Leading Change in Population Health—Moving From Talk to Action will provide students with 21st-century leadership skills that prepare them to tackle public health issues in our society from the most simple to very complex. Participants will be challenged to think differently on many levels (systems thinking, interplay between relationships and results, etc.) and prepare them to be agents of change for future generations.
Requisite: Academic Plan: BSTS, EPID, EPID1, PREV, MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 655. Health Economics and Financing. 3 Credit Hours.
Health economics studies economic principles, methods of decision making, and the allocation of resources within health care systems and markets. This course will provide students with an understanding of the flow of funds and services throughout the U.S. health care system and how the structure and financing of health care impacts population health status. We will use numerous real-world issues and case studies to demonstrate economic decision-making techniques, especially for health care organizations and consumers (patients, providers). Students are not expected to have familiarity with economic concepts and principles prior to taking this course. In addition, students are not expected to use calculus in this course. However, students are expected to have an understanding of basic algebra, and graphical analysis will be used often throughout the class.
Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 656. Qualitative Research Methods. 3 Credit Hours.
The purpose of this course is to introduce students to the philosophical underpinnings of qualitative research and its practical application to the field of public health. Students will 1) develop an understanding of the significance and use of qualitative research methods in public health; 2) differentiate between numerous qualitative research approaches, including phenomenology, grounded theory, and ethnography; 3) describe different methods for collecting qualitative data, including interviews and focus groups; 4) develop skills in the collection, analysis and reporting of qualitative data; and 5) develop a basic understanding of how qualitative and quantitative research may be combined in mixed methodological approaches. The course will include a combination of lectures, presentations of applied qualitative research studies by guest experts, student presentations, and assignments designed to foster students’ skills in formulating appropriate qualitative research questions, designing qualitative studies, collecting and analyzing qualitative data, and summarizing findings for publication. More specific details on the topics to be covered in this course are provided below.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 657. Toxicology: Climate and Health. 3 Credit Hours.
The course will train students in developing an understanding of and skills in assessing the mechanism of the effects of climate, weather and climate and weather mediated effects of environment on biophysiological responses. For example, changes in levels of bronchoconstriction due to change in temperature is a direct effect of weather, and increase in allergies and asthma due to increase in bioaerosols in response to increase in precipitation and temperature is an indirect effect. Students will be exposed to general principles of toxicology and toxicological experimental design, including in-vitro and in-vivo experiments, designs needed to understand and investigate the health effects of climate, weather and climate mediated environmental conditions. The course objectives are to (1) understand general principles of toxicology, (2) understand biophysiological responses to climate, weather and weather anomalies, (3) develop an understanding of and skills in in-vitro and in-vivo experimental designs to assess toxicity of climate, and (4) characterize and quantify biophysiological responses in response to the trends and anomalies of weather and climate.
Prerequisite: BIL 150 or BMB 401 or CHM 111 or CHM 112 or CHM 201 or CHM 202.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 658. Analysis of the Health Effects of Climate. 3 Credit Hours.
The course will train students in analytical skills needed to quantify the health risks associated with climate, weather and weather anomalies (or extreme weather) adjusting for confounding factors and time-space hierarchical structures. The course will include quantification of time-space lagged exposure estimation, spatial, temporal and spatiotemporal analyses, exposure and risk uncertainty analyses.
Prerequisite: EPH 727.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 659. Public Health Seminar I. 1 Credit Hour.
The EPH 659-02 Public Health Seminar Series is designed to explore contemporary issues, problems, and controversies in public health through an interdisciplinary perspective. This course is designed to help you develop and sharpen the skills which are the primary building blocks of a successful career in consulting (as well as many other areas of business), namely (1) analysis, (2) presentation, and (3) teamwork. This class will help you to develop rigorous skills in each of these areas through (i) discussion of the principles underlying best practices and (ii) application and feedback in a series of exercises and cases.
Prerequisite: MD/MPH Four Year/Regional Med Camp.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
EPH 660. Public Health Seminar II. 2 Credit Hours.
The Public Health Seminar is designed to explore contemporary issues, problems, and controversies in public health through an interdisciplinary perspective. Upon the completion of the course students will be able to: 1) understand key public health problems, their distribution, and prevention strategies, 2) examine the complex tapestry of social, economic, political, and environmental factors that affect public health outcomes, 3) understand the complexities inherent in improving health locally and on a global scale, 4) examine the major determinants of, and responses to, poverty and health, 5) analyze public health disparities through a social justice perspective, 6) understand and analyze the roles and agendas of major stakeholders in local, state, national, and global public health, 7) understand the link between global and local health issues, 8) discuss selected interdisciplinary, cross-cutting issues in public health, 9) explain the interrelationships among the five core areas of public health. This course is only open to MD/MPH students.
Requisite: MD/MPH Four Year/Regional Med Camp and EPH 659.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

EPH 661. Public Health Nutrition. 3 Credit Hours.
This course provides a dynamic, interactive approach to public health designed to prepare students in basic policy, epidemiology, and health education related to nutrition. Recognizing the multiple social, cultural, environmental, and physiological factors leading to nutritional disease. The course includes experts from a variety of disciplines. Public health nutrition addresses issues germane to the public's health by elucidating their extent, determinants and consequences, and the policies and programs to address them. Open only to EPH majors.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 662. Child Policy. 3 Credit Hours.
This course will focus on U.S. federal child policy. This course has been designed to provide a comprehensive, multi-disciplinary (e.g., public health, public policy and social work), and cross-sector perspective (e.g., government, private and philanthropic sectors) on child and family policies. Sessions will cover varying approaches and include presentations from a wide range of experts.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 663. Hospital Health Care Services and Access: An Interdisciplinary Inquiry. 3 Credit Hours.
Hospitals play a vital role in the health of the communities they serve. Yet, their accessibility and availability to those communities is often unequal, and significant racial and ethnic disparities exist in the utilization of hospital services, quality of care provided, health outcomes and patient experiences. Attention has been increasingly focused on creating sustainable solutions to attenuating these disparities. Initial steps include the examination of community and hospital data to identify inequalities in disease distribution, as well as utilization of care. Such data provides evidence to define critical areas of concern and provides a starting point for engagement with the community. The real work begins when hospitals work with community partners to engage in authentic and collaborative partnerships to address the needs and the health of the local citizens. This process, known as Community-Based Participatory Research (CBPR), can harness resources and build capacity to address health issues relevant to the community. This course will discuss the change that hospitals can achieve when they facilitate community-academic partnerships that bring together knowledge, expertise and interest of community partners with the research and training of clinicians and academic researchers.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 671. Maternal and Child Health. 3 Credit Hours.
Preventative and therapeutic concepts pertinent to the reduction of morbidity and mortality among mothers and their children.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 678. CAPSTONE PRACTICUM EXPERIENCE AND PROJECT PREPARATION. 1 Credit Hour.
This course is available only for MD/MPH students. This is the first of two courses required to complete the MPH capstone project. Students will spend the summer between their first and second year of medical school identifying a community health issue of interest and developing a proposal using evidence-based methodology to address the issue. They will obtain practical field experience in a public health setting related to their capstone project area of interest. They will also identify relevant stakeholders who would benefit from the capstone project and can serve as mentors in completion of the project.
Requisite: Plan Code MDRP_MD.
Components: PRA.
Grading: GRD.
Typically Offered: Spring.
EPH 679. Learning Collaboratory. 3 Credit Hours.
This course is the first semester of a 4-semester program titled the "Public Health Learning Collaboratory". The mission of this Department of Public Health Sciences (DPHS) program is to transform the learning experience of master of public health students by providing opportunities to develop core skills necessary for effective public health practice, while completing their capstone or thesis in the community. Organized in small groups around 4 thematic areas, students learn about substantive areas (e.g., prevention with children and families, access to health care, urban health, health in Latin America), while building competencies to successfully develop and implement projects in collaboration with community health organizations (e.g., community engagement, needs and capacity assessments, researching evidence based practices, teamwork and problem-solving skills, project planning, development and implementation skills).

Components: LEC.
Grading: SUS.
Typically Offered: Fall.

EPH 680. Practical Field Experience. 3 Credit Hours.
Practical field experience requirement for MPH students. Students are placed in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student.

Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 681. Capstone Experience Project. 3 Credit Hours.
The capstone project is intended to build upon EPH 680 field work and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems.

Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 682. Generalist Capstone Project. 2 Credit Hours.
The Capstone Experience Project Special is intended to build upon EPH 680 field-work (or equivalent course) and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems. As part of the project, the student will generate a 10-15 page written report using evidence-based practice (EBP) that clearly addresses a public health problem. Capstone Projects may be: • Continued collaborations with the same community partner as the field experience addressing public health needs identified at the site; or • Collaborations with a different community partner but with similar population or public health topic from the field experience; or • Collaborations with a different community partner and with different population and/or public health topic from the field experience.

Components: FLD.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 684. Special Topics. 1-3 Credit Hours.
This course is designed to allow the listing of special topics withing the Department of Epidemiology and Public Health and cross-list topics with other departments' offerings.

Components: LEC.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPH 691. Transdisciplinary Environmental Health Seminar. 1 Credit Hour.
Environmental health is concerned with how both the natural and built environment affect human health by looking at the impact of physical, chemical and biological factors external to humans. Individuals working in environmental health fields are concerned with preventing diseases or other illnesses by assessing and controlling environmental factors that pose a threat to human health whether it involves air quality, natural disasters, radiation, water quality, UV exposure, indoor air pollutants, climate change, healthy communities and work environments, or the effects of toxic substances. The purpose of this transdisciplinary environmental health seminar course is to promote critical thinking and expose public health students to a broad range of environmental and occupational research, practice, and policy issues. The student will attend a weekly seminar that is presented by an invited speaker in the field of environmental and occupational health sciences. Meetings will include critical review of topics from the literature, student presentations, and presentations by UM faculty and outside speakers related to environmental health sciences. The content of the seminar will advance public health students’ analytic assessment, communication, leadership, and systems thinking skills. Enrolled students will prepare and co-lead discussions following the speaker presentation about current environmental and occupational health practice or policy related research, a national, state, or local program or issue. Further, the seminar will provide networking opportunities for prospective employers, colleagues, students and faculty.

Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 698. MSPH Thesis Proposal. 3 Credit Hours.
This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and the Faculty Advisor. The purpose of this course is to develop the MSPH Thesis Proposal, form a thesis committee with at least two members: 1st reader (an expert in the field) and 2nd reader (the faculty advisor) and obtain proposal approval from the committee members. This MHPS Thesis Proposal is required and must be approved prior to start data collection and analysis.
Components: THE.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 699. MSPH Thesis. 3 Credit Hours.
This is an independent study course. Students in the MSPH track may register for this course with an approval from the Capstone Manager and faculty advisor. The purpose of this course is to collect and analyze the data per thesis proposal, to prepare and write the thesis and deliver an oral presentation.
Components: LEC.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 700. Professional Development Seminar. 1 Credit Hour.
This course covers fundamental topic areas in professional development for PhD students in the public health sciences. Topic areas include: presenting research at conferences, writing manuscripts for publication, preparing the dissertation, the PhD comprehensive exams, effective teaching and mentoring, and getting a job in academia. Through interactive workshops, in-class exercises, brief presentations and assignments, students will have an opportunity to practice and strengthen necessary skills, including effective communication (oral and written), conflict resolution, and developing collaborations.
Requisite: Academic Program Plan: BSTS, EPID, PREV.
Components: LEC.
Grading: SUS.
Typically Offered: Fall & Spring.

EPH 701. Innovations in Prevention Science Methodology. 1 Credit Hour.
This course is a part of series "Innovations in Prevention Science Methodology" which covers specialized topics in prevention science that have been identified as moving the field forward.
Prerequisite: PSY 633 with a B or Higher. and Requisite: Plan BSTS or EPID or EPID1 or PREV or MDRP.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 703. Advanced Statistical Methods I. 4 Credit Hours.
Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Mantel-Haenszel chi-square, interaction, standardization of rates, incidence density, logistics regression, and other special topics.
Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 705. Advanced Statistical Methods II. 3 Credit Hours.
Continuation and elaboration of EPH 703. Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Kappa statistics, life tables, survival analyses, logistic regression, Poisson regression, log linear models, clusters, meta-analysis, and other special topics.
Prerequisite: EPH 703.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 711. Cancer Epidemiology. 3 Credit Hours.
This course covers the basic epidemiology of cancer. Major sites and exposures are stressed, highlighting descriptive, etiologic and preventive aspects. A major course project and one final exam are included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPH 717. Integrating Behavior Health Theories and Models. 3 Credit Hours.
This course is designed to provide an opportunity for synthesis and integration of knowledge regarding the phenomenon of health behavior. The focus is on critical examination of theoretical and empirical work in the area of health behavior from a public health perspective.
Prerequisite: EPH 617 or EPH 620.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 720. Cardiovascular Disease Epidemiology and Prevention. 3 Credit Hours.
Course aims to teach and train MPH students in the epidemiology and prevention of cardiovascular and cerebrovascular diseases which are the leading causes of morbidity and mortality among the adult U.S. population. Essential knowledge for those working in the area of public health is emphasized.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 722. Infectious Diseases Epidemiology and Control. 3 Credit Hours.
This course emphasizes surveillance, investigation, and control of infectious diseases that constitute important national and global health problems. Each class will use one or more specific infectious diseases to illustrate core principles of infectious diseases epidemiology. A major organizing principle of the course will be how to determine whether a disease should be controlled, eliminated, or eradicated, and how those determinations can change over time.
Prerequisite: EPH 621.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 723. Epidemiology and Public Health Aspects of Diabetes Mellitus. 3 Credit Hours.
This course presents an overview of the epidemiology and public health impact of an important chronic disease, diabetes mellitus (DM). Topics include the classification and descriptive epidemiology of DM and associated health complications, disease screening, evaluation of risk factors, methodological issues associated with DM research, DM among special populations, and the public health impact of DM in the U.S.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 724. Molecular and Genetic Epidemiology. 3 Credit Hours.
This course covers the theoretical concepts and practical issues involved in conducting molecular and genetic epidemiology research involving human populations. Specifically, students will learn about: molecular and genetic technology; evaluating disease-associated genes, and their interaction with environmental factors; clinical research; and data mining techniques. Ultimately, students will develop a framework for study design, statistical power and sample consideration, assay evaluation and validation, and data interpretation using molecular and genetic epidemiology tools in their research.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 727. Climate, Environment, and Health: Data Integration and Management. 3 Credit Hours.
The course will introduce: a) different research designs needed to understand the linkages between climate/weather and health, and b) sources and types of data needed for different research designs. The course will train students in: a) the integration and management of weather/climate, environment and health data sets that have different spatiotemporal scales, b) assessment of errors and uncertainty in the collocation of these data sets, and c) visualization, interpretation and presentation of these data sets, including covariance structure in these data sets.
Prerequisite: EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 728. Social Epidemiology. 3 Credit Hours.
This course provides an overview and understanding of key concepts and theoretical frameworks relevant to the study of social determinants of population health and health disparities. The interdisciplinary course will cover methodological considerations and methods relevant to the field of social epidemiology, such as lifecourse epidemiology and multilevel determinants of health. A major emphasis will be on biological pathways by which social factors “get under the skin”, and the role of social policies in improving population health. The course will involve lectures, presentation of epidemiologic research by faculty researchers, class discussions, and class projects.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
EPH 731. Developing, Adapting and Evaluating Interventions. 3 Credit Hours.
This course builds on the substantive and methodological competencies acquired in preceding prevention science courses by preparing students to
develop and adapt preventive interventions.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 732. Introduction to Dissemination and Implementation Science. 3 Credit Hours.
This course provides an introduction to the theory and practice of Dissemination and Implementation (D&I) Sciences. Topics include the importance
and language of D&I science; designs, methods and measures; differences and similarities across clinical, public health, and policy settings; selected
tools for D&I research and practice; and future issues. The focus of this course will be on implementing prevention programs, strategies and policies
that are ready for application, testing and scale up, rather than developing interventions from scratch.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 740. Basic Pathology and Patho-physiology. 3 Credit Hours.
The course emphasizes basic patho-physiological mechanisms and diseases of particular interest to students of public health. Students obtain an
understanding of basic pathological processes, nomenclature of pathological findings, and common natural and unnatural diseases affecting various
body systems. Observations of autopsies and the gross pathology of selected organs are also incorporated in the course.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

EPH 751. Survival Analysis in Clinical Trials. 3 Credit Hours.
Statistical methods for analysis and interpretation of survival data arising from clinical trials. Topics include survival curves, estimation of sample size,
survival curves, proportional-hazard models, time dependent variables, and prognostic indices.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 752. Advanced Research Methods. 3 Credit Hours.
This is a survey course in advanced quantitative methods for research and evaluation in prevention science. The course will provide students with
an introduction to research methodology, matching research questions to specific methods, applying methods to real world data, and presenting the
application of a method to a broader audience.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

EPH 772. Design & Implementation of Epidemiologic Studies. 3 Credit Hours.
This is the second epidemiology course after completion of the Fundamentals of Epidemiology. This course will assume knowledge of basic study
designs and the basic principles of internal validity (random error, systematic error, and confounding). The concepts, principles, and methods of
epidemiologic study designs (beyond basic designs) and the practical issues in the design and conduct of epidemiologic studies will be discussed.
The emphasis will also include the application of the epidemiologic methods in the forms of journal article critique of epidemiologic study designs,
study design project and/or research proposal development. The course has two intended audiences. PhD students or early career researchers and
advanced master's students who wish to add depth to their understanding of some of the fundamental issues in epidemiology. Doctoral students in
epidemiology may take this course to fulfill one of the “research method courses” for the PhD in Epidemiology degree. Students who are not in the PhD
in Epidemiology program and who wish to take this course require instructor's evaluations (pre-test) and permission.
Prerequisite: EPH 621 and must have already taken or be currently enrolled in EPH 601.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 774. Epidemiologic Methods and Reasonings. 3 Credit Hours.
This course will discuss epidemiological methods (e.g., study designs) and concepts (e.g., confounding, bias, interaction, random error) required to
evaluate the totality of evidence in etiologic research. It will also discuss theoretical models of etiologic research and techniques for quantifying the
magnitude of disease or other health indicators as well as the magnitude of study errors specific to study designs.
Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
EPH 776. Methods in Epidemiology. 3 Credit Hours.
This course will discuss principles of epidemiologic methods. Introduction to causal inference and advanced epidemiologic topics will be covered. This course will be theoretical and quantitative and will include, when applicable, illustrative data examples using various statistical softwares. Prerequisite: EPH 601 and 621. And pre or corequisite: EPH 602.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

EPH 782. Advanced Individual Study. 1-3 Credit Hours.
Individual work on a special project under faculty guidance.
Components: THI.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

EPH 825. Continuous Registration--Master's Study. 1 Credit Hour.
To establish residence for MPH students who are preparing for project presentation. Credit not granted. Regarded as full time residence.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.
Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

EPH 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence for the PhD, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

B.S.P.H. Bachelor of Science in Public Health /M.P.H. Master of Public Health Joint Degree

Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MPH)
The University of Miami's School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Public Health (MPH). SONHS academically-qualified juniors are eligible to apply to the MPH program. If accepted, students complete the combined bachelor's and master's degrees in 5 years.

Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

Accepted students take 12 credits of master's level (600) Public Health courses during their undergraduate senior year, not to exceed 6 credits per semester. These 600 level credits count towards the MPH degree. Students must achieve a minimum GPA of 3.0 in the graduate level courses in order to matriculate into the MPH program. The summer following the completion of the BSPH degree, students may take 3 to 6 graduate-level credits at the 600 level Public Health courses and then take the required the following fall and spring semesters to complete the 45 credit MPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.
Admission Requirements
SONHS academically-qualified juniors are eligible to apply to the MPH program. Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

BSPH degree
This is only a sample. There are numerous ways students can create plans of study for the public health major. Students should feel empowered to use the information listed in the Academic Bulletin and the Student Handbook (http://www.miami.edu/sonhs/index.php/sonhs/current_students/student_handbooks/) to take charge of their education, pursue their own academic interests, and create their own, unique plans of study.

The School of Nursing and Health Studies (SONHS) recommends students create their own plan of study that accounts for their ENG, MTH, and modern language placements and incorporates their major, minor, and cognate interests. Once students draft their initial plan of study, they are encouraged to meet with an academic advisor in the Office of Student Services (OSS) (http://www.miami.edu/sonhs/index.php/sonhs/office_of_student_services/) to review their plan, address any questions or concerns, discuss areas for improvement, and brainstorm ways to integrate research experiences, study abroad opportunities, global initiatives, graduate school requirements, and career preparation experiences.

The sample plan of study listed below is based on the following ENG, MTH, and modern language placement information and major, minor, and cognate selections:

- **ENG placement:** ENG 105
- **MTH placement:** MTH 101
- **Modern Language placement:** SPA 101
- **Major(s):** Public Health
- **Minor(s):** None
- **Cognates**
  - **Art & Humanities:** Popular Culture (RAU = English)
  - **People & Society:** Public Health major (RAU = Nursing & Health Studies)
  - **Science, Technology, Engineering, and Mathematics (STEM):** Biology and Chemistry for Pre-Health Sciences (RAU = Chemistry)

MPH degree
BSPH students will complete 12 of 45 graduate-level credits (6 in spring and 6 in fall) for the MPH during their senior year of undergraduate studies. This requires special permission from advisors and deans. The remaining MPH credits will be completed during the summer, fall, winter intersession, spring, and summer semesters immediately following graduation from the BSPH program.
## Sample Plan of Study

### Freshman Year

**Credit Hours**

**Total Credit Hours**

(W) = Course is designated as writing-intensive

(*) = Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 367, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480

§ MPH Graduate Program: BSPH students will complete 12 of 45 graduate-level credits (6 in spring and 6 in fall) for the MPH during their senior year of undergraduate studies. This requires special permission from advisors and deans. The remaining MPH credits will be completed during the summer, fall, winter intersession, spring, and summer semesters immediately following graduation from the BSPH program. In this Study Plan sample, **Year One** refers only to the the summer immediately following completion of your undergraduate degree; **Year Two** begins with the fall semester of full-time graduate courses.

**B.S.P.H. Bachelor of Science in Public Health /M.S.P.H. Master of Science in Public Health**

Bachelor of Science in Public Health/Master of Public Health (4+1 BSPH/MSPH)
The University of Miami’s School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Science in Public Health (MSPH). SONHS academically-qualified juniors are eligible to apply to the MSPH program. If accepted, students complete the combined bachelor’s and master’s degrees in 5 years.

Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/ MSPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MSPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

Accepted students take 12 credits of master’s level (600) Public Health courses during their undergraduate senior year, not to exceed 6 credits per semester. These 600 level credits count towards the MSPH degree. Students must achieve a minimum GPA of 3.0 in the graduate level courses in order to matriculate into the MSPH program. The summer following the completion of the BSPH degree, students may take 3 to 6 graduate-level credits at the 600 level Public Health courses and then take the required the following fall and spring semesters to complete the 45 credit MSPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the MSPH program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

### Admission Requirements

SONHS academically-qualified juniors are eligible to apply to the MPH program. Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MSPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MSPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MSPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

Total Credit Hours 165-166

---

* The public health major may be used to fulfill this cognate area.
** Students may choose an elective from the following courses: APY 205, BPH 301, BPH 303, BPH 306, BPH 317, BPH 319, BPH 355, BPH 365, BPH 402, BPH 419, BPH 461, BPH 487, BTE 450, BSL 460, COS 324, COS 325, COS 426, COS 427, COS 472, GEG 231, GEG 241, GEG 334, GEG 336, GEG 341, GEG 343, GEG 345, GEG 346, GEG 348, GEG 366, GEG 412, INS 570, INS 571, INS 572, INS 573, INS 599, KIN 155, MGT 270, MKT 388, and SOC 480
*** Students must take at least five designated writing-intensive courses to complete this requirement; unless students choose to take additional credits to complete this requirement, it is highly recommended students select courses that are designated as writing-intensive and will double count toward this area and their other requirements.
**** The number of electives students take may vary due to differences in placement scores, transfer credits, course and cognate selections, etc.
1 List of approved Method Courses - Select 2 courses from this list: BST 605, BST 625, BST 630, BST 692, EPH 604, EPH 644, EPH 647, EPH 651, EPH 656, EPH 703, EPH 705, EPH 722, EPH 727, EPH 751, EPH 752, EPH 772, EPH 774, EPH 776
2 After completion of core courses, the student may select courses to fit his/her own area of interest. This allows for personal tailoring of the academic program to fit the student’s individual needs and career goals.
3 The MSPH Thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty advisor and thesis project committee during their investigation. Formal MSPH Thesis project oral presentation is required.

Certificate in Public Health

http://publichealth.med.miami.edu/graduate/academic-programs/public-health-graduate-certificate

Overview
The Public Health Certificate Program is offered through the Graduate Programs in Public Health. The Public Health Certificate Program covers the core content of the Master of Public Health degree program in the areas of epidemiology, biostatistics, environmental health, administration and health education and behavior. The Public Health certificate program provides a foundation in public health training for interested students in other disciplines, and earned certificate credit may be used towards completion of the MPH or MSPH degree programs at the University of Miami.

The curriculum includes 5 courses (16 credits)

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements
In order to be considered for this post-baccalaureate certificate, you must be a U.S. citizen or permanent resident who holds an earned bachelor degree.

- **Application** - Applicants must submit their application online through SOPHAS EXPRESS, the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). Please note that the application and review process for certificates are separate from the application process. Students admitted to the certificate program that later decide to complete an MPH or MSPH must submit a complete and full SOPHAS application and be considered by the faculty admission committee.

- **Transcripts** - Applicants must submit official transcripts from all previously attended colleges and universities. Upload scanned PDF files of your official documentation in the attachments section of the online application. Students who are admitted to the certificate program will be asked to supply official transcripts upon enrollment.

- **Standardized Test Scores** - Certificate applicants are not required to submit GRE exam scores.

- **Resume/Curriculum Vitae** - Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** - Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, training, education or other related qualifications. Applicants should discuss how earning the certificate will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.
Letters of Recommendation—Applicants must provide one letter of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

Mission
The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

Goals
Upon completion of the Public Health Certificate Program, all graduates will be able to:

- Apply statistical reasoning and quantitative methods for the purpose of analyzing public health data and participating in population-based research;
- Explain the role of multi-level occupational and environmental conditions which directly or indirectly impact the health of individuals, communities and populations;
- Apply epidemiologic methods to the measurement and study of population health and the prevention of infectious and chronic disease;
- Examine the main components and issues of the organization, financing and delivery of health services and public health systems; and
- Identify social and behavioral concepts, models and theories that form the foundation of health promotion and disease prevention.

Student Learning Outcomes

- Students will develop and demonstrate effective written and oral communication skills in the presentation of public health information.
- Students will demonstrate critical thinking skills in the core subject areas of public health.
- Students will demonstrate mastery of public health competencies.

M.P.H. Master of Public Health

Overview
The MPH degree is a professional degree for students who require a broad general academic experience in public health. Students will acquire competency in the fundamental public health disciplines. This includes research design and conduct, data analysis and policy analysis, communications, program planning and administration, public health systems and the organization of health services in the United States and Latin America, recognition and analysis of ethical issues in public health and professional practice, the needs of special populations, and the integration of
these core disciplines in public health decision making. The MPH degree is a 45-credit hour program that is accredited by the Council on Education for Public Health.

Full-time students can expect to complete the MPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

**Accelerated MPH**

The Accelerated MPH program follows the same 45-credit curriculum as the MPH program but is completed in one calendar year from summer to summer. Accelerated MPH students start the program in the summer semester, continue in fall semester, take courses during winter inter-session, continue in spring and spring inter-session, and end in the following summer semester. The course load per semester for accelerated students is greater than for traditional students; to ensure completion of the requirements within the shortened time frame, accelerated students must follow the program plan designed under the supervision of their assigned faculty advisor from the start of the program. Students interested in the Accelerated MPH program must apply via SOPHAS selecting this program as there are unique admissions requirements. Visit the Application Process (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/) and FAQs (https://graduatestudies.publichealth.med.miami.edu/admissions/frequently-asked-questions/) on the Admissions page to learn more about the Accelerated MPH application process and admission requirements.

**4+1 BSPH and MPH**

The University of Miami’s School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Public Health (MPH). SONHS academically qualified juniors are eligible to apply to the MPH. Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students. If accepted, students complete the combined bachelor’s and master’s degree in 5 years. Accepted students take 12 credits of graduate level public health courses during their undergraduate senior year, then 3 to 6 graduate level credits the summer after completing the bachelors and the rest of graduate courses in the subsequent fall and spring semesters to complete the 45 credit MPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

**Admission Requirements**

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MD/MPH program must apply through AMCAS (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/). Applicants to other MPH joint degrees must apply to each program separately.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related
qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

**Total Credit Hours** 45
The Capstone Field Experience and the Capstone Project are both vital components of the MPH program, and together form the Capstone Program. The Capstone Field Experience is designed to provide students with real world work experience in the field of public health. This experience places students in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student. The Capstone Project is intended to build upon this fieldwork and is geared toward providing the student with an opportunity to apply public health academic theory and acquired skills to community health problems. Students are encouraged to build their Capstone Program in such a way that supports their academic and professional interests as they advance in their careers as public health professionals.

**Sample MPH program = 2 years**

This is a sample Plan of Study to complete the MPH degree in 2 years. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings.

Students should meet with their academic advisor each semester to determine the appropriate course selection.

1 Select one of these courses. These are 1-week condensed courses offered during "Winter InterSession" the week prior to the start of the spring semester.

2 Select one of these courses. These are 1-week condensed courses offered during "Spring InterSession" which take place during Spring Break within the spring semester.

### Mission

The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

### Goals

Upon completion of the Master of Public Health (MPH) degree, all graduates will be able to:

- Apply epidemiological methods to the breadth of settings and situations in public health.
- Select quantitative and qualitative data collection methods appropriate for a given public health context.
- Analyze quantitative and qualitative data using biostatistics, informatics, computer-based programming and software, as appropriate.
- Interpret results of data analysis for public health research, policy or practice.
- Compare the organization, structure and function of health care, public health and regulatory systems across national and international settings.
- Discuss the means by which structural bias, social inequities and racism undermine health and create challenges to achieving health equity at organizational, community and societal levels.
- Assess population needs, assets and capacities that affect communities' health.
- Apply awareness of cultural values and practices to the design or implementation of public health policies or programs.
- Design a population-based policy, program, project or intervention.
- Explain basic principles and tools of budget and resource management.
• Select methods to evaluate public health programs.
• Discuss multiple dimensions of the policy-making process, including the roles of ethics and evidence.
• Propose strategies to identify stakeholders and build coalitions and partnerships for influencing public health outcomes.
• Advocate for political, social or economic policies and programs that will improve health in diverse populations.
• Evaluate policies for their impact on public health and health equity.
• Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making.
• Apply negotiation and mediation skills to address organizational or community challenges.
• Select communication strategies for different audiences and sectors.
• Communicate audience-appropriate public health content, both in writing and through oral presentation.
• Describe the importance of cultural competence in communicating public health content.
• Perform effectively on inter-professional teams, and
• Apply systems thinking tools to a public health issue.

Generalist Concentration
• Produce graphical displays of data that effectively summarize descriptive and analytical findings.
• Utilize reproducible research techniques and concepts.
• Apply mixed methodological approaches that combine qualitative and quantitative research methods.
• Generate a research/evaluation question and the appropriate analysis plan.
• Design health communication messaging and employ effective multi-media strategies for health communications.

Student Learning Outcomes
• Students will develop and demonstrate effective written and oral communication skills in the presentation of public health information.
• Students will develop and demonstrate the ability to make scholarly contributions to the field.
• Students will develop the skills and professional knowledge necessary to gain employment in public health practice.

M.P.H./J.D. Master of Public Health / Juris Doctorate Dual Degree
Overview
The University of Miami School of Law and the Miller School of Medicine's Department of Public Health Sciences offer a joint degree program in law and public health. Upon completion of the programs, a student earns the Juris Doctor degree from the School of Law and a Master of Public Health degree from the School of Medicine. The average length of this joint program is 3.5 years (seven semesters plus 2 summer sessions). Law students begin MPH classes after completing the first year of law school.

Students who apply for the joint JD/MPH program must apply both to the School of Law and to the Graduate Programs in Public Health Sciences.

Admission Requirements
• **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Students who apply for the joint JD/MPH program must apply both to the School of Law and to the Graduate Programs in Public Health Sciences separately.

• **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

• **Standardized Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

• **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

• **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.
· **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

· **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

¹ Students must complete three specific health law courses (9 credits)

² Students must complete four law courses (12 credits) from a specified set of offerings in the School of Law
Plan of Study

The average length of the joint JD/MPH program is 3.5 years (seven semesters plus 2 summer sessions). Law students begin MPH classes after completing the first year of law school.

Students who apply for the joint JD/MPH program must apply both to the School of Law and to the Graduate Programs in Public Health Sciences.

M.P.H./L.A.S. Master of Arts in Latin American Studies Joint Degree

Overview

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. The MPH/LAS joint degree program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2.5 years, (5 semesters)
Number of required credits: 54 (+6 for non-native speakers)

Admission Requirements

· Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MPH/LAS joint degree must apply to both, the Department of Public Health Sciences MPH program and the College of Arts and Sciences Master of Arts in Latin America Studies program separately.

· Transcripts - Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

· Standardized Test Scores - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

· English Proficiency Exam - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

· Resume/Curriculum Vitae – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

· Statement of Purpose/Personal Statement – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

· Letters of Recommendation – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

1 Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing one course taught in the target language at the 600-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits, or Defense Language Proficiency Test).

2 Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG, among others. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida), or a cross-cutting thematic focus (e.g. Caribbean religions, Latin American Social Movements) rather than a specific country focus. The LAS Academic Director may approve courses from other departments.

## Sample Plan of Study

The MPH/LAS joint degree program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

M.P.H./M.A.I.A Master of Arts in International Administration Joint Degree

Overview

The Master of Arts in International Administration/Master of Public Health (MAIA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. The MPH degree with a second master's degree in international administration is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development.

M.P.H. Admission Requirements

- Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS.
Applicants to the joint degree MPH/MAIA must apply to both Department of Public Health Sciences MPH program and to the College of Arts and Sciences MAIA program separately to be accepted to the joint degree program.

- **Transcripts** — Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** — Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- **English Proficiency Exam** — International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** — Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** — Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** — Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

For further information, please contact:

Andria L. Williams, MBA  
Director of Admissions  
Department of Public Health Sciences  
University of Miami Miller School of Medicine  
1120 N.W. 14 Street, Room 905 (R-669)  
Miami, Florida 33136  
Tel: 305-243-0291  
Email: publichealthadmissions@miami.edu

**M.A.I.A. Admission Requirements**

The Master of Arts in International Administration (MAIA) program accepts rolling admissions. Interested students may apply to the program at any time.

- **Online Application**  
  - Please complete the online application by clicking here (https://www.applyweb.com/miamigrd/).

- **Application Fee**  
  - An $85.00 non-refundable application fee is paid online upon submission of the application.

- **Statement of Purpose**  
  - The statement of purpose is the most important element of your application packet. This letter needs to reflect who you are, your goals and why you would be an asset to the MAIA program. It is very important to ensure it is grammatically correct and as detailed as possible. The statement of purpose should be no more than two pages in length. Please review before you submit.

  Below is a link to help you get started:

  OWL Statement of Purpose Guidelines (https://owl.purdue.edu/owl/purdue_owl.html).

- **Letters of Recommendation**  
  - Three letters of recommendation must be provided. One letter should be from a faculty member. Two letters should be from an employer, colleague, or other professional source.

- **Official Transcripts**
• You must provide official transcripts from each post-secondary institution attended. Official transcripts in languages other than English must also be submitted with a certified English translation.

• Resume
  • Please provide a copy of your resume if it is available.

• Admissions Interview
  • The admissions interview may be conducted in person, over the phone, or via video conference.

• Grade Point Average (GPA)
  • A minimum overall undergraduate grade point average (GPA) of 3.0 on a 4.0 scale.

• Official TOEFL (or IELTS) Score
  • All international students are required to take this exam in order to demonstrate sufficient English competency. The "Test Of English As A Foreign Language (TOEFL)" exam is offered as a paper-based test (PBT) or an internet-based test (IBT). A score of 550 is required for the PBT; a score of 80 is required for the IBT.

  • Students may also take the "International English Language Testing System (IELTS)" exam to demonstrate sufficient competency in English. A score of 6.5 or higher is required.

  • All international students must provide a copy of their results on either exam.
  • International students from countries whose primary language is English are not required to take this exam.

M.P.H./M.P.A. Master of Public Administration Joint Degree

Master of Public Administration Joint Degree (MPA/MPH)

The Master of Public Administration/Master in Public Health (MPA/MPH) degree is offered jointly by the University of Miami College of Arts and Sciences and the Miller School of Medicine's Department of Public Health Sciences. The joint degree is designed for students who seek an in-depth knowledge of public health with training in management and public policy administration. Students may complete the requirements for the MPA and MPH degrees consecutively or in succession.

Applicants must be admitted into the MPH and MPA programs on a separate basis, based on the admissions requirements and procedure of each individual program. Acceptance by one program does not in any way indicate or guarantee acceptance by the other degree program.

Average Program Duration: 2.5 years
Number of required credits: 66

Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MPH/MPA joint degree must apply to both, the Department of Public Health Sciences MPH program and to the College of Arts & Sciences MPA program separately.

- **Transcripts** - Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MPH degree programs only. Applicants to the MPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** - Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** - Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** - Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

**M.S. in Climate and Health**

**Master of Science in Climate and Health**

The Master of Science in Climate and Health (MSCH) degree is offered in partnership with the Department of Public Health Sciences (Miller School of Medicine) and the Department of Atmospheric Sciences (Rosenstiel School of Marine and Atmospheric Sciences). The MSCH program will prepare future generations of professionals, research analysts, planners, decision-makers and leaders, who will have a deep understanding of the intricate relationship between human health and climate change, weather and weather anomalies ($C^2W^2$), and the ability to decipher and quantify this relationship at multiple scales ranging from gene-expression, to individual’s susceptibility to community response to region-wide morbidity and mortality burden.

The MSCH program has three specific aims. First, to provide students with conceptual, theoretical and applied understanding of the direct and indirect impacts of $C^2W^2$ on human health. Second, to train students in understanding, evaluating, and assessing short- and long-term climate and weather changes, and their direct and indirect impact on disease and disability burden across different communities. And third, to prepare students to develop adaptation, mitigation, healthcare and communication strategies in the light of adaptation and infrastructure capacity of different communities to manage the health effects of $C^2W^2$.

The degree offers the following MSCH tracks. Students must choose a track with approval from their academic advisor:

- Public Health Sciences
- Marine and Atmospheric Sciences
Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - The Graduate Record Exam (GRE) is not required for the Master of Science in Climate and Health degree program.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

Plan of Study
This is a sample plan of study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

The degree offers the following MSCH tracks. Students must choose a track with approval from their academic advisor:
- Public Health Sciences
- Marine and Atmospheric Science
- Climate and Health - Analytical
- Toxicology

Mission
As global warming intensifies, not only will it result in a shifting burden of disease and disability, but it will also result in unprecedented changes in the physical and biochemical characteristics of the environment. The MSCH graduate program will prepare future generations of research analysts, planners, decision-makers and leaders who will have deep understanding of the intricate relationship between climate and health, and ability to decipher this relationship.

Goals
The MSCH program has three specific aims:
- Provide students conceptual and theoretical understanding of the direct and indirect impacts of short- and long-term climate changes on health and well-being;
- Train students in evaluating and assessing short- and long-term climate changes and their direct impact, in turn, on the burden of disease and disability, and indirect impact on burden of disease and disability through the physical and biochemical changes in the environmental characteristics due to climate changes, and
• Prepare students to evaluate (existing) and develop adaptation, mitigation, communication and healthcare strategies to manage the health effect of C\textsuperscript{\textdegree}W\textsuperscript{2} across different populations with respect to their differential health risks, infrastructure and adaptation capacity.

### Student Learning Outcomes

Upon completion of the Master of Science in Climate and Health (MSCH) degree, all graduates will be able to:

- Understand the basic physical processes that control global and regional climate, and global and regional weather patterns and extreme weather patterns;
- Understand the interplay between health and C\textsuperscript{\textdegree}W\textsuperscript{2}, the burden of disease/disability different communities and populations associated with weather and climate, and weather and climate mediated changes in the environment;
- Understand the bio-physiological responses with respect to short- and long-term climate changes and weather patterns;
- Develop skills in collecting, managing and analyzing health, climate and associated data sets to quantify the health effects of climate incorporating hierarchical (including individual, community and region-specific) socio-physical environmental characteristics;
- Understand the structure and administration of public health organizations and the policies that impact health programs and health services for different communities, and identify direct and indirect roles of different stakeholders in the surveillance and management of the health effects of climate, and develop skills in evaluating the role strategies to reduce greenhouse gas emissions and associated health effects; and
- Understand disparities in the health outcomes in communities and the attribution of climate change effects on vulnerable populations, and individual responses (from various socio-economic backgrounds) to different warning and surveillance of weather conditions that pose threat to health and well-being.

### M.S. in Prevention Science and Community Health

#### Overview

The Master of Science degree program in Prevention Science and Community Health is a 33 credit hour program that is intended to provide students with training in the fundamentals of prevention science, including (a) the assessment of risk and protective factors that predict and modify health and behavior outcomes; (b) the development of preventive interventions that target these risk and protective factors; and (c) the implementation and evaluation of these interventions. Students in the program will develop skills in translating prevention research into demonstrable preventive action, and to successfully partner with communities and organizations for the implementation of evidence-based preventive interventions with fidelity and sensitivity to communities’ diversity and unique strengths.

The focus of this program is in line with the seven priority areas of the U.S. National Prevention Strategy (e.g., tobacco-free living, preventing drug abuse and excessive alcohol use, healthy eating, active living, injury and violence-free living, reproductive and sexual health, and mental/emotional well-being), as implemented through the Strategy's strategic directions of creating healthy and safe communities, eliminating health disparities, providing clinical and community prevention services, and empowering people. The program is in intended to prepare students for research or technical positions in government, industry, academia, or private institutions, as well as to pursue future doctoral studies in medicine and public health.

#### Admission Requirements

- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS.
- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.
- **Standardized Test Scores** - The Graduate Record Exam (GRE) is not required for the MS in Prevention Science and Community Health program.
- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.
- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.
- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.
Letters of Recommendation—Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

Plan of Study

The Master of Science in Prevention Science and Community Health curriculum consists of required coursework in prevention science and public health, required coursework in statistics/research methodology, credit hours in elective coursework (chosen in consultation with the program advisor), and required credit hours dedicated to proposing and completing a research thesis. The average time to completion is 2 years.

Mission

The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

The Master of Science in Prevention Science and Community Health (MS-PSCH) degree is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions.

Goals

Upon completion of the Master of Science in Prevention Science and Community Health (MS-PSCH) degree, all graduates will be able to:

- Describe the core disciplines of public health and how they apply to improving population health;
- Apply research methods to the measurement and study of prevention science;
- Describe the origins, foundations, and standards of prevention science;
• Design and carry out empirical research studies that contribute to the literature on risk and protective factors, and their influence on associated with health and behavior outcomes across the lifespan;

• Demonstrate knowledge of evidence-based preventive interventions and understand how to apply prevention science to the design, implementation, adaptation, and evaluation of preventive interventions;

• Integrate knowledge of research design, quantitative and qualitative methods, data analysis, and multi-method, multi-domain assessment methods commonly used in prevention science;

• Demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional/ academic writing; and

• Demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior.

Student Learning Outcomes

• Students will demonstrate effective written and oral communication skills in the presentation of prevention science and related areas.

• Students will develop and demonstrate the ability to make scholarly contributions to the field.

• Students will demonstrate mastery of research competencies.

M.S.P.H. Master of Science in Public Health

Overview

The Master of Science in Public Health (MSPH) is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the Master of Public Health (MPH) degree with an additional emphasis on advanced research methods and quantitative, computational analysis skills. The MSPH program is a 45 credit hour program that is accredited by the Council on Education for Public Health.

Full-time students can expect to complete the MSPH degree requirements within 2 years. An elective credit waiver may be available for students who enter the MSPH degree program with an earned advanced degree (e.g., MD, DDS, DVM, JD).

4+1 BSPH and MSPH

The University of Miami’s School of Nursing and Health Studies (SONHS) and the Department of Public Health Sciences (DPHS) offer a 4+1 program that combines a Bachelor of Science in Public Health (BSPH) and a Master of Science in Public Health (MSPH). SONHS academically-qualified juniors are eligible to apply to the MSPH program. Applicants must be enrolled in the BSPH program with the SONHS and apply separately into the 4+1 BSPH/MSPH. Applicants must be in good academic standing as defined by the School of Nursing at the time of submission. Acceptance into the BSPH program does not in any way indicate or guarantee acceptance to the MSPH degree program. The Graduate Record Exam (GRE) admissions requirement is waived for the BSPH students. If accepted, students complete the combined bachelor’s and master’s degree in 5 years. Accepted students take 12 credits of graduate level public health courses during their undergraduate senior year, then 3 to 6 graduate level credits the summer after completing the bachelors and the rest of graduate courses in the subsequent fall and spring semesters to complete the 45 credit MSPH degree.

BSPH students must apply through SOPHAS during the undergraduate junior year by March 1 to start the program in the fall. Admission decisions regarding the entry of BSPH students into the MSPH program are made solely by the Admissions Committee of the Department of Public Health Sciences.

BSPH students interested in pursuing the 4+1 program must meet with their undergraduate advisor to develop an academic plan. The advisor will also explain the policies and procedures of the program and link the student with the graduate program advisor.

Admission Requirements

• Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS.

• Transcripts – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

• Standardized Test Scores - Applicants are required to submit GRE general exam scores (http://www.ets.org/gre/revised_general/about/) taken within the last five years. Alternatively, MCAT and LSAT scores are acceptable for the MSPH degree programs only. Applicants to the MSPH program who hold advanced degrees (MD, JD, PhD, MBBS, and other doctoral degrees) are encouraged, but not required to submit test scores. Standardized test waivers are available on a case-by-case basis.
· **English Proficiency Exam** – International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

· **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

· **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

· **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

---

1 List of approved Method Courses. Select 2 courses from this list: BST 605, BST 625, BST 630, BST 692, EPH 604, EPH 644, EPH 647, EPH 651, EPH 656, EPH 703, EPH 705, EPH 722, EPH 727, EPH 751, EPH 752, EPH 772, EPH 774, EPH 776

2 After completion of the core courses, the student may select courses to fit his/her own area of interest. This allows for personal tailoring of the academic program to fit the student's individual needs and career goals.

3 The MSPH Thesis project requires an individual investigation of a current public health problem and allows the student to demonstrate competency in the development and implementation of a research question. Students will work closely with a faculty advisor and thesis project committee during their investigation. Formal MSPH thesis project presentation is required.
## Sample MSPH Study Plan to complete in 2 years

This is a sample Plan of Study for the MSPH. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

## Mission

The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

The MSPH degree is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for research or technical positions in government, industry, academia or private institutions. Studies will include the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative, computational analysis skills.

## Goals

Upon completion of the Master of Science in Public Health (MSPH) degree, all graduates will be able to:

- Apply statistical reasoning and quantitative methods for the purpose of analyzing public health data and participating in population-based research
- Identify and apply the most appropriate statistical tests for the purpose of performing hypothesis-driven research to solve public health problems
- Explain the role of multi-level occupational and environmental conditions which directly or indirectly impact the health of individuals, communities and populations
- Apply epidemiological methods to the measurement and study of population health and the prevention of infectious and chronic disease
- Examine the main components and issues of the organization, financing, and delivery of health services and public health systems
• Identify social and behavioral concepts, models and theories that form the foundation of health promotion and disease prevention
• Analyze the effects of political, social, and economic policies on public health systems at the local, state, national and international level
• Recognize sociocultural factors that promote and inhibit health in vulnerable and underserved populations
• Differentiate between qualitative and quantitative evaluation methods in relation to their strengths, limitations and appropriate uses and emphases on reliability and validity
• Identify public health research questions and hypotheses, analyze data and communicate findings effectively to diverse stakeholders
• Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities
• Assess the strengths and limitations of various research designs in collecting, analyzing and interpreting information from public health studies
• Use statistical software effectively to analyze complex public health data and convert the results into publishable reports and presentations.

Student Learning Outcomes
• Students will develop and demonstrate effective written and oral communication skills in the presentation of public health information to a diverse audience.
• Students will develop and demonstrate the ability to make scholarly contributions to the field.
• Students will demonstrate mastery of research competencies.

MD/MPH Program
Overview
The educational mission of the University of Miami Miller School of Medicine interdisciplinary MD/MPH dual degree program is to graduate physicians with the ability and desire to improve the health of all populations, especially those most vulnerable and underserved, by alleviating suffering and eliminating healthcare disparities through their leadership in patient care, research, education, health care administration and the community.

Four-Year MD-MPH Program:
The University of Miami Miller School of Medicine (UMMSM) MD/MPH program is unique in several ways. There are very few four-year MD/MPH dual degree programs offered at medical schools in the United States. Our program integrates significant components of the MPH coursework into the curriculum beginning in the first year and culminating in a required four-week clerkship in Public Health. In addition, the medical school has partnered with the Palm Beach County Health Department http://www.pbchd.com. This partnership provides opportunities to work with public health professionals in one of the country's most academic and comprehensive public health departments.

The program is designed to provide graduates with the clinical and research skills required to approach health problems from a population and prevention perspective by integrating the roles of the biological sciences and clinical practice into the broader sets of knowledge and practices used in public health. We will graduate physicians who are provided the academic knowledge and skills, as well as the clinical experience to improve the health of all populations, especially those most vulnerable and underserved.

The MD/MPH dual degree program is an educational track at the UMMSM that will provide:
• Both degrees in four years
• Integrated and innovative training in both clinical medicine and public health
• In depth training in public health that provides the skills needed to reduce death and disability at the population level
• The program includes studies at the Miami campus and at our regional medical campus in Palm Beach and Broward Counties working in our community teaching hospitals and clinics and with Department of Health professionals and faculty physicians in community settings
• Sustainable partnerships that provide opportunities to assess and improve public health, working with Public Health physicians in clinical and public health activities during clinical rotations
• Opportunities for community-based research to complete the required special project for the MPH degree (capstone)

Admissions
Applications are accepted through the American Medical College Application Service® (AMCAS®). The MSOM Secondary Application will give you the option to apply to only the MD/MPH program, or to both the MD and the MD/MPH program. Selecting either of these choices will provide you with specific questions about your interest and experience in public health. The criteria for eligibility and academic prerequisites for the MD/MPH program are the same as those for the regular MD program. For more information, visit admissions.med.miami.edu or contact the Office of Admissions at med.admissions@miami.edu or 305.243.3234.

Ph.D. in Epidemiology

Overview
The Doctor of Philosophy (PhD) in Epidemiology is an intensive research-training program for students with prior training in Epidemiology or related disciplines. It provides advanced education and training for students seeking a professional career in medical and health-related research, as well as for physicians and other persons who have attained professional degrees and are seeking to integrate epidemiological research and methods into their ongoing careers.

As a research-focused degree, students are given the skills necessary to approach health problems to generate consequential research questions and use the most appropriate epidemiological methods to address them. The methodologically rigorous training comprises both formal classroom education and guided research with faculty mentors. Key research areas include: chronic disease epidemiology, including cancer, diabetes, heart disease, and obesity; behavioral epidemiology relating to substance abuse and HIV/AIDS, occupational disease epidemiology; and health disparities.

Admission Requirements
- **Application** - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MD/MPH and MD/PhD programs must apply through AMCAS (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/). Joint degree applicants must apply to each program separately.

- **Transcripts** – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

- **Standardized Test Scores** - Applicants are required to submit a Graduate Record Examination, GRE general exam scores (http://www.ets.org/gre/revised_general/about/), taken within the last five years.

- **English Proficiency Exam** - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

- **Resume/Curriculum Vitae** – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

- **Statement of Purpose/Personal Statement** – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

- **Letters of Recommendation** – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommender are recent professors, researchers or employers in a related field. Letters must be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommender will be sent an online form to complete via email.

For more information about our application process, please click here (https://graduatestudies.publichealth.med.miami.edu/admissions/application-process/). To obtain detailed curricula on all our program offerings, please visit our website (http://publichealth.med.miami.edu/).

</thead>
</table>
Plan of Study

Prerequisites: The program is primarily designed for persons who have completed an MPH degree, as well as for physicians and others who have a master or doctoral degree in a related discipline. At a minimum, students should have successfully completed a graduate-level, foundation of epidemiology course as well as two graduate-level biostatistics courses.

All PhD in Epidemiology students are required to complete 64 credit hours. These include core courses in epidemiology and biostatistics, elective coursework and the dissertation. Students complete the structured coursework (core and elective courses) during their first two years of study and sit for comprehensive examinations during their second summer semester in the program. After successful completion of the comprehensive examinations, students advance to candidacy for the degree and complete their dissertation research.

Mission

The mission of the Graduate Programs in Public Health is to develop leaders who can translate knowledge into policy and practice to promote health and prevent disease in human populations.

The PhD program in Epidemiology is an intensive research-training program for students with prior training in epidemiology or related disciplines. All PhD students in our program have extensive contact with faculty members, in part because the program is explicitly designed to be small and interactive. The program takes advantage of South Florida’s unique opportunities for epidemiologic research, including our ever-changing mix of race, ethnicity, and cultures. In fact, many of our research programs could not be conducted elsewhere. Furthermore, because the program is located within the Miller School of Medicine, interactions with basic scientists and clinicians provide opportunities for epidemiologists to develop translational and interdisciplinary research.

Goals

Upon completion of the Doctorate in Epidemiology (PhD) degree, all graduates will be able to:

- Describe the core disciplines of public health and how they apply to improving population health;
- Recognize potential ethical issues and implement the concepts of ethical conduct of research in epidemiologic studies;
- Design epidemiologic studies applying sound methodology and assess the validity of results;
- Develop and implement data collection/management methods and tools needed for performing epidemiology investigations;
- Apply quantitative and reasoning skills, as well as content-area knowledge to analyze data from epidemiological studies;
• Utilize the application of statistical methods that are critical to epidemiologic inquiry; manage and manipulate data sets in statistical analysis software packages including, but not limited to, SAS and R;
• Identify major chronic and infectious diseases, their general pathophysiology, descriptive epidemiology and risk factors;
• Critically evaluate scientific literature and synthesize the outcomes across studies, balancing limitations and contributions of each study;
• Articulate research questions that advance scientific knowledge and develop a proposal for extramural research funding;
• Present data at academic and professional meetings and submit scientific papers for publication in high-impact peer-reviewed journals;
• Convey epidemiologic concepts to students and peers; effectively communicate epidemiological information to scientists, policy makers and the public;
• Conduct an advanced original research project and demonstrate mastery of the topic area;
• Read, plan, develop and present epidemiologic data outside their area of mastery; and
• Provide consultation to health professionals in conducting epidemiological research; and be prepared to work collaboratively with scientists and practitioners in other fields.

Student Learning Outcomes

• Students will develop effective written and oral communication skills in the presentation of public health information.
• Students will develop and demonstrate the ability to make scholarly contributions to the field.
• Students will demonstrate mastery of research competencies.

Ph.D. in Prevention Science and Community Health

Overview

The PhD in Prevention Science and Community Health will prepare students with the necessary expertise and interdisciplinary background to contribute to 21st century prevention and community health research. Students will be trained in both traditional and innovative areas of prevention science. These include etiology, intervention design and evaluation, innovative data collection and analyses, and implementation science.

The Prevention Science program offers students the unique opportunity to interact with faculty who specialize in all stages of the intervention development and evaluation process, as well as in various methodologies such as community-based participatory research and mixed-methods research. Program faculty are experts in cultural diversity and health disparities. They are focused on acculturation; cultural predictors of health disparities; and efficacious methods, strategies, and programs for reducing health disparities locally, nationally, and internationally. Key research areas include: substance use, HIV, cancer, diabetes, obesity, delinquency and depression.

Please visit our website (http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science/) for additional information.

Admission Requirements

• Application - Applicants must submit their application online through SOPHAS (https://sophas.org/), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (https://www.aspph.org/). All application materials, including transcripts, test scores, statement of purpose/personal statement, resume/CV, and letters of recommendations, must be submitted directly through SOPHAS. Applicants to the MD/PhD programs must apply through AMCAS (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/). Joint degree applicants must apply to each program separately.

• Transcripts – Applicants must submit official transcripts from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-U.S. transcripts must be evaluated by the World Education Service (https://www.wes.org/) (WES) using ICAP course-by-course evaluation service.

• Standardized Test Scores - The Graduate Record Exam (GRE) is not required for the PhD in Prevention Science and Community Health program.

• English Proficiency Exam - International students whose native language is not English and/or did not graduate from an English-teaching institution are required to submit TOEFL (https://www.ets.org/toefl/) or IELTS (https://www.ielts.org/en-us/) scores.

• Resume/Curriculum Vitae – Applicants must include a detailed resume including employment, public health experiences, community service, research, and academic or professional honors.

• Statement of Purpose/Personal Statement – Applicants are required to submit a statement of purpose that details their academic interest in the program. The statement should discuss any experiences in public health including field experience, research, training, education or other related qualifications. Applicants should discuss how earning the degree will contribute to their future professional and career goals, as well as to the future of public health. Applicants should also address any academic deficiencies, if applicable.

• Letters of Recommendation – Applicants must provide three letters of recommendation from individuals who are best able to assess their ability to be successful in a graduate degree program. Ideally, recommenders are recent professors, researchers or employers in a related field. Letters must
be signed and on letterhead. Applicants will be asked to include the contact information of their recommenders on the SOPHAS application and recommenders will be sent an online form to complete via email.

1 Students complete the Professional Development Seminar in Years 1 and 2.
Students complete the Innovation Seminar in Years 3 and 4.

Plan of Study
All PhD in Prevention Science students are required to complete 75 credit hours. These include course courses in intervention design, implementation science and statistics, elective coursework and the dissertation. Students are expected to complete their structured (core and elective) courses during their first two years of study. Students sit for comprehensive examinations their second summer semester in the program, and then with successful completion of the exams, advance to dissertation research for the remainder of the program (years 3-5), with seminar courses included in years 3-4.

Mission
The vision of the PhD program in Prevention Science and Community Health is to become an epicenter for scholarship on etiology, intervention development and evaluation, and intervention implementation. The mission of the program is to produce prevention science and community health scholars who promote health and prevent illness at the individual, family, community, national, and global levels.

Goals
The PhD program in Prevention Science and Community Health trains prevention scientists and community health scholars through rigorous theoretical, methodological, and applied training. The program prepares scholars for careers in academia, research, and public policy. We aim to train the next generation of prevention scientists who will help to promote wellness, ameliorate the burden of disease, and create health equity.

Upon completion of the doctoral degree in prevention science and community health, all graduates will be able to:
- Describe the core disciplines of public health and how they apply to improving population health
- Apply epidemiological methods to the measurement and study of population health and the prevention of infectious and chronic disease
- Articulate research questions that advance scientific knowledge and develop a proposal for extramural research funding
- Develop and implement data collection/management methods and tools needed for prevention science and community health research
- Design and adapt a preventive intervention based on available etiological research
- Master principles of designing, conducting, and analyzing data from a randomized clinical trial of a preventive intervention
- Master techniques for designing and carrying out procedures for translating evidence-based interventions into community practice
- Apply state-of-the-science statistical methods and manage/manipulate datasets in statistical software such as SPSS, SAS, M Plus and R
- Provide consultation to health professionals in conducting prevention or community research, and be prepared to work collaboratively with scientists and practitioners in other fields
- Recognize potential ethical issues and employ ethical conduct of research in prevention science/community health studies

The University is currently instituting an audit process to ensure students only take courses that are required for their degree program. Such audits will be specific to students who are receiving federal financial aid, such as federal student loans. If a student is found to be enrolled in courses not required for the degree program, federal aid may be adjusted for that student. In essence, the aid may be reduced, as aid will not be given for courses outside the degree program. Moreover, the University could incur sizable fines if federal aid is used to pay for courses outside the degree program.

Degree Programs

1. Doctor of Philosophy – Deg. Code: PhD
   a. Music Education – Conc. Code: MEDU

   a. Choral Conducting – Conc. Code: MCDC

5. Master of Science – Deg. Code: MSMET

   a. Instrumental Conducting – Conc. Code: MCDI
   b. Instrumental Performance – Conc. Code: MIPF
   d. Vocal Performance – Conc. Code: MVPF

**Entrance Exams**

The Frost School of Music requires certain incoming graduate students to take an entrance exam in Music Theory. Graduate students are expected to be well-prepared for this exam. Masters students who do not pass this exam must fulfill a remediation requirement prior to completion of the final project as required for the degree. Doctoral students who do not pass the entrance exam must fulfill a remediation requirement prior to applying for Doctoral Committee Approval. Please access this link for more information.

Degree Requirements: Doctoral Degrees

**Doctor of Musical Arts (DMA)**

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, Vocal Pedagogy and Performance, and Conducting, the candidate must meet all the general requirements for the PhD degree with respect to residence, total minimum credit hours, and qualifying examinations. The main distinction between the two degrees pertains to the required creative activity. The DMA emphasizes performance ability, as well as performance-related research. These creative efforts replace the dissertation requirements traditionally found in the PhD. In addition to specific courses and credit hours listed in the following pages, students pursuing the DMA must meet the requirements listed below.

**Doctoral Committee for the DMA**

This committee can be the same or different from the student’s recital committee. The committee should consist of four members, including three members from the student’s major area (one of whom is the committee chair), and one member from another department of the Frost School. The committee chair will be Regular Faculty and/or hold a doctoral degree (i.e., DMA or PhD) as well as graduate faculty status. Two other committee members will be Regular Faculty or members of the Graduate Faculty. At least one member of the committee must hold a doctoral degree (i.e., DMA or PhD). Committees are first approved by the committee chair and then the Associate Dean of Graduate Studies in the Frost School before students apply for candidacy. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Responsibilities of the committee shall include the following:

- Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final defense. In cases where special faculty expertise is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the doctoral committee is approved first by the Associate Dean of Graduate Studies in the Frost School and subsequently by the Dean of the Graduate School.

**Doctoral Cognates**

Within the 60 credit hours required for the degree, DMA students may select a formal area of study known as the cognate. A total of 12 credit hours are devoted to the cognate. If a cognate is not selected, the student should work with the advisor to select a meaningful collection of elective music courses that complement the student’s discipline.

The cognate allows the student to obtain specialized knowledge and skill in an additional area of music. For example, a student pursuing the DMA in instrumental performance may wish to obtain a cognate in musicology or music business. Completion of a cognate should give the student a heightened level of understanding in this topic area, and could give the student a competitive advantage when pursuing post-graduation opportunities. When completed, cognates are listed on the student’s official transcript.

Cognates are offered in a number of Departments within the Frost School. Students must apply to the cognate Department for acceptance. This process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credits will be considered electives and the cognate will not be granted. In order to ensure completion of the cognate in a timely manner, students should decide on a cognate no later than the end of their second semester of full-time study.
No credits that are otherwise required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Faculty In-Charge of the selected cognate, as well as the Associate Dean of Graduate Studies. One course substitution is allowed per cognate.

**Procedures for Completing a Doctoral Cognate**
See Procedures for Completing a Cognate on this website (https://admissions.frost.miami.edu/graduate/current-students/doctoral-cognates/):

1. Contact the Office of Graduate Studies to obtain a complete listing of required courses in a selected cognate.
2. Contact the faculty in-charge for the desired cognate.
3. Complete the application process for that cognate.
4. The designated faculty member must then complete and sign a Doctoral Cognate Acceptance Form and submit it to the Frost School Office of Graduate Studies.
5. Complete all required courses in the cognate with a grade of C- or higher. The cognate can then be listed on the student’s official transcript at time of degree conferral.

**List of Cognates, Respective Departments, and Faculty in Charge:**
- **Arts Presenting and Live Entertainment Management**, Department of Music Media and Industry, Gary Wood
  - Collaborative Piano, Department of Keyboard Performance, Santiago Rodriguez
  - Conducting: Choral, Department of Vocal Performance, Corin Overland
  - Conducting: Instrumental, Department of Instrumental Performance, Robert Carnochan
  - Instrumental Performance, Department of Instrumental Performance, Margaret Donaghue, Ross Harbaugh, Richard Todd, Svet Stoyanov
- **Jazz Performance**, Department of Studio Music and Jazz, John Daversa
  - Keyboard Pedagogy, Department of Keyboard Performance, Naoko Takao
- **Music Business**, Department of Music Media and Industry, Serona Elton
- **Music Education**, Department of Music Education and Music Therapy, Stephen Zdzinski
- **Music Technology**, Department of Music Theory and Composition, Will Pirkle
- **Music Theory**, Department of Music Theory and Composition, Charles Mason
- **Musicology**, Department of Musicology, David Ake
  - Vocal Accompanying, Department of Vocal Performance, Alan Johnson

**DMA Qualifying Examinations**
Qualifying examinations represent a significant milestone in the doctoral degree. All students pursuing the Doctor of Musical Arts degree must pass Doctoral Qualifying Examinations prior to proposing the DMA Essay, and prior to applying for candidacy. These exams represent a comprehensive and in-depth assessment of graduate student knowledge and skill level in the major discipline as acquired over a lifetime of academic and practical experience. Depending on the degree program, qualifying examinations may consist of timed written exams, take-home projects, performance-based examinations of musical skill, and oral exams.

Students who fail a qualifying exam (or a portion of the exam) can re-take the exam one time with Departmental approval. A student who fails a qualifying examination (or portion of the exam) for a second time will be dismissed from his/her respective degree program.

Discipline-specific qualifying exam procedures for each DMA degree can be found on our Graduate Studies website (https://admissions.frost.miami.edu/graduate/current-students/). All DMA students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

**Admission to Candidacy**
Doctoral students may apply for candidacy after successfully defending the Doctoral Essay or Lecture Recital proposal. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

**Performance and Creative Requirements**
DMA students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying examination (provided they have passed their qualifying recital). Before the second or third recital, depending upon program, students must have passed the Qualifying Examinations. All recitals are to be presented during either Fall or Spring semesters when classes are in session.
Performance Majors
Students accepted into the program must present three full-length (60 minute) doctoral recitals, and may choose from these options as decided in consultation with their studio teacher:

1. Three solo recitals
2. Two solo recitals and one chamber recital
3. Solo recitals may also include some chamber music which features the student's instrument or voice
4. One doctoral recital may consist of an Orchestral Mock Audition

Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors
Students must present three full-length recitals.

Conducting Majors: Choral
No less than two approved full recitals shall be presented by each candidate.

Conducting Majors: Instrumental
Three approved public recitals (or the equivalent) with suitable performing groups must be given during the period of residency and prior to the oral examination.

Composition Majors
1. The candidate will be required to compose a piece of substantial proportions.
2. The candidate will be required to write a doctoral essay. The text will either detail the doctoral composition or discuss another topic as approved by the doctoral committee chair.
3. A public presentation of the candidate's compositions will be required. A series of smaller performances presented each semester on- or off-campus, a larger festival performance(s), or a cumulative solo recital at the terminal stages of the degree exemplify how this requirement can be fulfilled. Other options are possible with faculty approval.

DMA Final Project
By means of a written Doctoral Essay or Lecture Recital, all DMA candidates are expected to demonstrate their ability to conduct an original scholarly investigation and present its results in an articulate manner. All DMA students must pass a public oral defense of the Doctoral Essay or Lecture Recital. Detailed information on these projects and defense procedures is provided in the Frost School of Music Graduate Student Handbook (https://admissions.frost.miami.edu/graduate/current-students/).

Doctor of Philosophy (PhD)
The Doctor of Philosophy degree is offered in Music Education, and Music Education with Music Therapy Emphasis. This rigorous curriculum prepares students to become innovative researchers, scholars, and outstanding leaders in these disciplines. Graduates are uniquely-prepared for careers in higher education, research, and administration. Candidates must meet all general requirements for the PhD degree as defined by the Graduate School of the University of Miami with respect to residence, total minimum credit hours, and qualifying examinations. In addition to specific courses and credit hours listed in the following pages, students pursuing the PhD must meet the requirements listed below.

PhD Qualifying Examination
All PhD students must complete a qualifying examination that includes two components. The first component consists of writing three scholarly papers that are independent of or significant extensions of documents written as part of other coursework. The second component consists of a one-hour, oral examination focusing on the written papers. After successfully completing this exam, students can apply for Doctoral Committee Approval, defend the dissertation proposal, and apply for Doctoral Candidacy. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam, with committee approval. A student who fails a qualifying examination (or portion of the exam) twice will be dismissed from the degree program.

Qualifying exam procedures for the PhD degree can be found on our Graduate Studies website (https://admissions.frost.miami.edu/graduate/current-students/). PhD students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

Doctoral Committee for the PhD
All students pursuing the Doctor of Philosophy degree must establish a Doctoral Committee to oversee the dissertation. The committee should consist of five members, including three members from the student’s major area (one of whom is the committee chair), and one other member from another department within the Frost School, and one faculty member from outside the Frost School. The committee chair and two other members
must be members of the Graduate Faculty. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Admission to Candidacy
Doctoral students may apply for candidacy after successful completion of all qualifying examinations as well as a successful defense of the dissertation proposal. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

PhD Final Project: the Dissertation
The culminating project for the PhD is the Doctoral Dissertation. A PhD is traditionally considered a research-oriented academic degree, thus the dissertation should consist of independent, original research that demonstrates the candidate’s mastery of both subject matter and scholarly method. All PhD students must pass a public oral defense of the Dissertation. Detailed information, including defense procedures, is provided in the Frost School of Music Graduate Student Handbook (https://admissions.frost.miami.edu/graduate/current-students/).

Degree Requirements: Masters Degrees
Credit Hours and Grades
All masters degrees require a minimum of 30 credit hours. However, many masters degrees in the Frost School require more than 30 credit hours. Students are therefore advised to carefully read the respective bulletin pages for their chosen degree program. To graduate, students must have a cumulative GPA of 3.0 (B average). Grades below C- are not considered passing.

Master of Music Degree (MM) in:
• Conducting, Choral or Instrumental
• Instrumental Performance
• Keyboard Performance
• Jazz Performance
• Vocal Performance

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Ensemble Requirements
The curricula for Master of Music degrees in performance and conducting include participation in one ensemble during each semester that a student is registered for 7 credit hours or more. Certain performance degrees have additional ensemble requirements as found on the respective bulletin pages.

Conducting Recital Guidelines
Master’s Recital
A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters’ experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

Master’s Advanced Recital
A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

Performance Recital Guidelines
Master’s Recital
A full-length recital performed publicly by the student that may include chamber music in which the student’s instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

Master’s Second Recital
With advisor approval, masters students in performance may give a second recital. In the Department of Instrumental Performance, this second recital may take the form of an Orchestral Mock Audition.

Final Projects
All masters degrees in performance and conducting require the successful completion of a final, culminating project. For example, in some performance degrees, students must perform and defend an extended comprehensive jury. In other performance degrees, students must complete a scholarly document in the form of either a Recital Paper or Extended Program Notes which must be defended before the masters recital committee.
Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (https://admissions.frost.miami.edu/graduate/current-students/).

Students are advised to carefully read the respective bulletin pages and consult with their assigned advisor to obtain more information on the required final project for their degree program.

**Master of Music Degree (MM) in:**
- Composition
- Jazz Pedagogy
- Keyboard Performance and Pedagogy
- Media Writing and Production
- Musicology
- Music Education
- Music Therapy
- Studio Jazz Writing

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

**Masters Thesis or Masters Project**
Students in these Master of Music degree programs must complete either a thesis or masters project and must pass a public, oral defense of their work. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook (https://admissions.frost.miami.edu/graduate/current-students/).

**Comprehensive Examinations**
Certain masters degree programs also require students to take written Comprehensive Examinations. Students should contact their advisors to obtain specific details regarding comprehensive examination requirements. The exam is typically written and evaluated by a committee of faculty members in the student's department who are familiar with the student's discipline.

Per Graduate School policy, students who fail the comprehensive exam may be given one opportunity to retake the exam, with the committee's approval. The re-take of the comprehensive exam may not be taken during the same semester as the original exam, or during a summer session. Additionally, the re-take must be completed within one calendar year of the original exam.

**Master of Music Degree (MM) in:**
- Music Business and Entertainment Industries

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

**Cumulative Exit Exam**
Students must pass a cumulative exit exam as part of the Master of Music degree in Music Business and Entertainment Industries or Jazz Pedagogy.

**Master of Arts Degree (MA) in:**
- Arts Presenting and Live Entertainment Management

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Arts degree must meet all requirements listed below.

**Cumulative Exit Exam**
Students must pass a cumulative exit exam as part of the Master of Arts degree in Arts Presenting and Live Entertainment Management.

**Master of Science Degree (MS) in:**
- Music Engineering Technology

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Science degree must meet all requirements listed below.

**Masters Research Project**
Students pursuing the Master of Science degree in Music Engineering Technology must complete a substantial final project in the form of independent research that is defended before a faculty committee. Detailed information on this project and defense procedures are provided in the Frost School of Music Graduate Student Handbook (https://admissions.frost.miami.edu/graduate/current-students/).
Degree Requirements: Artist Diploma

Artist Diploma (AD) in:
- Instrumental Conducting
- Instrumental Performance
- Keyboard Performance
- Vocal Performance

The Artist Diploma is an intensive, one-year immersion in performance or conducting study for candidates with highly-developed skills. In addition to specific courses and credit hours listed in the following pages, students pursuing the AD program must also complete two, full-length (60 minute) recitals. In the Department of Instrumental Performance, one of the Artist Diploma recitals may take the form of an Orchestral Mock Audition.

Instrumental Performance
https://instrumental.frost.miami.edu/

The Frost School of Music's Department of Instrumental Performance has programs tailored to meet the needs and interests of students -- like you -- who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).

Doctoral Programs in Instrumental Performance
- D.M.A. in Instrumental Conducting (p. 2704)
- D.M.A. in Instrumental Performance (p. 2708)
- D.M.A. in Multiple Woodwinds (p. 2713)

Masters Programs in Instrumental Performance
- M.M. in Instrumental Conducting (p. 2717)
- M.M. in Instrumental Performance (p. 2721)
- M.M. in Multiple Woodwinds (p. 2725)

Artist Diploma in Instrumental Performance
- A.D. in Instrumental Conducting (p. 2697)
- A.D. in Instrumental Performance (p. 2700)

MIP 0B5. Oboe. 1-4 Credit Hours.
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 0B6. Oboe. 1-2 Credit Hours.
Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 087. Oboe. 1-2 Credit Hours.
Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 640. Reed Making and Maintenance for Oboe and Bassoon. 0 Credit Hours.
One hour week class detailing and experiencing the processing of cane and making of reeds for oboe and bassoon, and the maintenance of those instruments.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 641. Bassoon Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the bassoon since 1600.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 642. Clarinet Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the clarinet since 1600.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 643. Flute Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the flute since 1600.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 644. Oboe Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the oboe since 1600.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 645. Brass Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of brass instruments since 1600.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 646. Percussion Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of percussion instruments since 1600.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 647. Saxophone Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the saxophone since 1600.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 648. Guitar Repertoire and Pedagogy. 1-2 Credit Hours.
Solo and small ensemble literature of the guitar since 1600.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.
MIP 649. String Repertoire and Pedagogy. 1-2 Credit Hours.
An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 650. Bach Cello Suites. 1 Credit Hour.
The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 680. Orchestral Audition Preparation. 1 Credit Hour.
The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for cr
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 693. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 694. Special Topics in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: ENS.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 701. MM Recital Program Notes Preparation. 1 Credit Hour.
Students prepare extensive, original program notes, with bibliography. These notes will be made available to the audience of the second Masters recital. The notes may focus on the historical, analytical and performance aspects of the repertoire for this recital. Required in MM two-recital degree programs.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIP 710. Graduate Conducting Seminar. 1 Credit Hour.
The graduate conducting seminar is an advanced study of conducting and rehearsal techniques combined with score and ensemble topics. Specific topics vary each semester. May be repeated for credit.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 720. Concepts and Processes of Classical Improvisation. 1 Credit Hour.
Concepts and Processes of Improvisation in classical music
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 730. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Class is taught as a workshop.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 731. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.
The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 735. Percussion Contemporary Chamber Music. 1 Credit Hour.
Mandatory for all classical percussionists, this course focuses on the contemporary unconduted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 738. Trombone Choir. 1 Credit Hour.
The study and performance of literature for small and large trombone ensembles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 740. Flute Choir. 1 Credit Hour.
Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 741. Saxophone Ensemble. 1 Credit Hour.
The study and performance of classical and jazz literature for small saxophone ensembles.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 743. Chamber Music. 1 Credit Hour.
Exploring the chamber music repertoire as represented by various combinations of instruments.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 755. Seminar in Baroque Performance. 1 Credit Hour.
Students will present research on compositions representative of the Baroque period. Presentations will include interpretation, style, and historical context of both the composer and the work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIP 756. Seminar in Classical Performance. 1 Credit Hour.
Students will present research on compositions representative of the classical period. Presentations will include interpretation, style, and historical context of both the composer and the work.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MIP 757. Seminar in Romantic Performance. 1 Credit Hour.
Students will present research on compositions representative of the Romantic period. Presentations will include interpretation, style, and historical context of both the composer and the work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MIP 758. Seminar in Contemporary Performance. 1 Credit Hour.
Students will present research on compositions representative of the Contemporary music. Presentations will include interpretation, style, and historical context of both the composer and the work.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MIP 770. Marching Band. 1 Credit Hour.
The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.
Components: ENS.
Grading: GRD.
Typically Offered: Fall.

MIP 771. Symphonic Winds. 1 Credit Hour.
Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 774. Brass Choir. 1 Credit Hour.
Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 776. Wind Ensemble. 1 Credit Hour.
This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 780. Symphony Orchestra. 1 Credit Hour.
The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified graduate students by audition.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 781. Instrumental Conducting Workshop. 2 Credit Hours.
This course provides practical procedures and materials for beginning and advancing conducting students. Students enrolled in the four-semester sequence demonstrate basic conducting techniques, demonstration of instruments and instrumentation of the wind band and orchestra, and analyze scores for conception, interpretations, rehearsal, and performance.
Components: LAB.
Grading: GRD.
Typically Offered: Fall.

MIP 782. Instrumental Conducting II. 2 Credit Hours.
This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.
Prerequisites: MIP 781 or MIP 317.
Components: LAB.
Grading: GRD.
Typically Offered: Spring.

MIP 790. SYMPHONY ORCHESTRA, WIND ENSEMBLE AND ENSEMBLE IBIS. 1 Credit Hour.
Frost Symphony Orchestra (FSO), Frost Wind Ensemble (FWE), and Ensemble Ibis (EI) are the premiere large ensembles that perform significant repertoire for strings, winds, and percussion. They are open to all qualified undergraduate and graduate students at the Frost School of Music and University of Miami by way of a successful audition. Following placement auditions, decisions will be made by the faculty to determine which ensembles each student will be assigned. These decisions will be based on the student’s ability and educational need, as well as the need of the specific repertoire programmed for each ensemble throughout the season.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 791. Tuba Ensemble. 1 Credit Hour.
The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP 792. Classical Guitar Ensemble. 1 Credit Hour.
This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercise, scales, and diverse repertoire.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP 793. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 794. Special Projects in Instrumental Performance or Conducting. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MIP 811. Master's Recital Paper. 1-3 Credit Hours.
The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MIP 812. Master's Recital. 1 Credit Hour.
A masters recital lasting at least 60 minutes that may include some chamber works but consists primarily of solo pieces. Students are required to write Program Notes.
Components: PRA.
Grading: SUS.
Typically Offered: Fall & Spring.

MIP 813. Master's Second Recital. 1 Credit Hour.
The second recital for those taking the two-recital option in the Master of Music in Instrumental Performance degree.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MIP 814. Artist Diploma Recital. 1 Credit Hour.
The student enrolls for recital credit during the semester in which he/she presents the Artist Diploma Recital.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MIP 815. Masters Advanced Recital. 2 Credit Hours.
The second recital in the masters degree when students choose Extended Program Notes as the final project.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MIP 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MIP 831. Doctoral Essay. 1-12 Credit Hours.
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MIP 731 may be taken in a regular semester, nor more than six in a summer session.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.
MIP 832. Doctoral Recital. 1-2 Credit Hours.
Required of all candidates for the D.M.A.
Components: PRA.
Grading: SUS.
Typically Offered: Fall & Spring.

MIP 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MIP BA5. Bassoon. 1-4 Credit Hours.
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BA6. Bassoon. 1-2 Credit Hours.
Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BA7. Bassoon. 1-2 Credit Hours.
Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP BAX. Secondary Bassoon - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CD5. Conducting. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CD6. Conducting. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CD7. Conducting. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP CDX. Secondary Instrumental Conducting - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CL5. Clarinet. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CL6. Clarinet. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CL7. Clarinet. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP CLX. Secondary Clarinet - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DB5. Double Bass. 1-4 Credit Hours.
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DB6. Double Bass. 1-2 Credit Hours.
Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DB7. Double Bass. 1-2 Credit Hours.
Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP DBX. Secondary Double Bass - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP EUS. Euphonium. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU6. Euphonium. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EU7. Euphonium. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP EUX. Secondary Euphonium - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FH5. French Horn. 1-4 Credit Hours.
Emphasis will continue to be the advancement of repertoire experience and skill assessment. Preparation and presentation of a solo recital will be the main focus of repertoire study. In-depth study of Orchestral Literature will also begin this semester.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FH6. French Horn. 1-2 Credit Hours.
Emphasis will be on an assessment of students' skills, needs and repertoire experience. Materials will be explored from the standard etude and solo literature that is relevant to the students' level and skill needs. Exploration will begin to choose material for a solo recital in the Spring semester.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FH7. French Horn. 1-2 Credit Hours.
Students' skills needs will be assessed and a course of study developed for any remedial needs. An in-depth study of appropriate literature for both solo and chamber recitals will be undertaken in preparation for a long-term degree plan. Advanced study of Orchestral Literature will begin, including listening and score study. Repertoire for an initial recital and the Qualifying Recital will be chosen and prepared.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FHX. Secondary French Horn - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP FL5. Flute. 1-4 Credit Hours.
Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FL6. Flute. 1-2 Credit Hours.
Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FL7. Flute. 1-2 Credit Hours.
Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP FLX. Secondary Flute - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GU5. Guitar. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GU6. Guitar. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GU7. Guitar. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP GUX. Secondary Guitar - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP HA5. Harp. 1-4 Credit Hours.
Advanced study of solo harp literature.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HA6. Harp. 1-2 Credit Hours.
Advanced study of solo harp literature.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HA7. Harp. 1-2 Credit Hours.
Advanced study of solo harp literature.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP HAX. Secondary Harp - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP OBX. Secondary Oboe - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PE5. Percussion. 1-4 Credit Hours.
Second semester of the Masters Degree in percussion performance. The main area of focus is first recital; to be performed this semester. Exploration into solo and ensemble performance needs will continue through this semester.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PE6. Percussion. 1-2 Credit Hours.
First semester of the Master's Degree in percussion performance. Emphasis on assessment of students' skills needs and repertoire experience. Materials covered to include standard solo and ensemble repertoire and technical work. First recital repertoire chosen from works supplementing students' needs.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PE7. Percussion. 1-2 Credit Hours.
First of six semesters of study for a DMA in percussion performance. Students' needs assessed, and a course of study devised. Solo and ensemble works studied in-depth accordingly. Works for an initial and qualifying recital chosen.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP PEX. Secondary Percussion - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP SA5. Saxophone. 1-4 Credit Hours.
Graduate level private study in classical saxophone is geared toward the individual’s needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SA6. Saxophone. 1-2 Credit Hours.
Graduate level private study in classical saxophone is geared toward the individual’s needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SA7. Saxophone. 1-2 Credit Hours.
Graduate level private study in classical saxophone is geared toward the individual’s needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP SAX. Secondary Saxophone - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TB5. Trombone. 1-4 Credit Hours.
Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Boutry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student’s technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TB6. Trombone. 1-2 Credit Hours.
Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Boutry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student’s technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
**MIP TB7. Trombone. 1-4 Credit Hours.**
Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Bountry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student’s technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TBX. Secondary Trombone - Graduate. 1 Credit Hour.**
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TP5. Trumpet. 1-4 Credit Hours.**
Applied lesson and studio class for Artist Diploma students.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TP6. Trumpet. 1-2 Credit Hours.**
Applied lesson and studio class for Masters students.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TP7. Trumpet. 1-2 Credit Hours.**
Applied lesson and studio class for Doctoral students.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TPX. Secondary Trumpet - Graduate. 1 Credit Hour.**
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TU5. Tuba. 1-4 Credit Hours.**
Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Alphonse, Sear, Kraft, Kelleway, and others.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.

**MIP TU6. Tuba. 1-2 Credit Hours.**
Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Alphonse, Sear, Kraft, Kelleway, and others.

Requisite: Frost School of Music only.

**Components:** LSN.

**Grading:** GRD.

**Typically Offered:** Fall & Spring.
MIP TU7. Tuba. 1-2 Credit Hours.
Private lessons that focus on development of embouchure, breathing, and articulation, with emphasis on orchestral excerpts on Cinema, Snedecor, Wilder, Gould and others.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP TUX. Secondary Tuba - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VA5. Viola. 1-4 Credit Hours.
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VA6. Viola. 1-2 Credit Hours.
Mastery of technical aspects of viola performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VA7. Viola. 1-2 Credit Hours.
Continued mastery of technical aspects of viola performance. Preparation of qualifying recital and DMA recitals and oral defense. Preparation of repertoire for audition for further study or professional placement.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VAX. Secondary Viola - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VC5. Violoncello. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VC6. Violoncello. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VC7. Violoncello. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MIP VCX. Secondary Violoncello - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNS. Violin. 1-4 Credit Hours.
Applied lesson and studio class for Artist Diploma students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VN6. Violin. 1-2 Credit Hours.
Applied lesson and studio class for Masters students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VN7. Violin. 1-2 Credit Hours.
Applied lesson and studio class for Doctoral students.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MIP VNX. Secondary Violin - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

A.D. in Instrumental Conducting
Overview
Entrance to the program is limited to those individuals who have demonstrated exceptional skills in performance or conducting by audition. A fully enrolled student can complete the 18 credit hour program in one year.

*This program is not eligible for federal or state financial aid. Contact the Office of Student Financial Assistance and Employment (https://finaid.miami.edu/) for further assistance.

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.
Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.
Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty for specific GRE information
• TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements. Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

**Step 3 - Audition/Interview/Upload Portfolio**

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.

**Music, Media, & Industry Application Deadlines**

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/ portfolios are due by this date

**International Applicants**

• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants.

• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**

Submit the following educational documents to an approved international credentialing evaluation service:
a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

Sample Plan of Study

Year One
Fall
- MIP XX5 Applied Lessons 4
- Performance Ensemble 1
- MIP 814 Artist Diploma Recital 1
- Approved Studies in Music 3
- Total Credit Hours 9

Spring
- MIP XX5 Applied Lessons 4
- Performance Ensemble 1
- MIP 814 Artist Diploma Recital 1
- Approved Studies in Music 3
- Total Credit Hours 9
- Total Credit Hours 18

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission

The mission of the Artist Diploma in Instrumental Conducting program is:

- To provide students with the highest quality training possible to bridge academic training with technical preparation (score reading, rehearsal technique, and physical technique) that is necessary for an entry-level career as a professional artist;
- To provide students with performance opportunities that develop and demonstrate their ability to integrate musicianship and performance practice with limited academic requirements;
- To assist students with identifying opportunities and preparation for competitions, internships, apprenticeships, and other professional venues for the classical artist including contact strategies and specific competition preparation strategies.

Student Learning Outcomes

- Students will develop instrumental Technique to an artist level. They should have the tools necessary to continue graduate study at elite level music schools or pursue professional careers as classical instrumentalists.
- Students will develop instrumental Expression to an artist level. They should develop their Expression to pursue professional careers as classical instrumentalists.
- Students will develop Creativity to professional performing artist level. They should have the tools necessary to create compelling and relevant performances that are on par with professional performing artists. The creativity will be based on aspects such as presentation, venue, staging, and collaboration.

A.D. in Instrumental Performance

Overview

Entrance to the program is limited to those individuals who have demonstrated exceptional skills in performance or conducting by audition. A fully enrolled student can complete the 18 credit hour program in one year.
**Admission Requirements**

**On-Campus Programs**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

**Step 1 - Apply**

- Apply online through CollegeNET
- Upload a prescreening (if applicable) through SlideRoom – check the Audition/Portfolio Requirements page for specific information

**Step 2 - Submit Supplemental Materials**

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

For information regarding specific program requirements, please see Application & Program Requirements.

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

**Step 3 - Audition/Interview/Upload Portfolio**

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.
Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission
The mission of the **Artist Diploma in Instrumental Performance** is to:
• To stimulate the student’s awareness and artistic creativity in the field of instrumental performance
• To provide students public performance opportunities in a supportive and encouraging environment
• To provide students with the performance skills necessary to allow them to pursue professional orchestra auditions, chamber music careers, national/international competitions, continued graduate study, and any other performance objectives necessary for a career as a classical instrumentalist.

Student Learning Outcomes
• Students will develop instrumental Technique to an artist level. They should have the tools necessary to continue graduate study at elite level music schools or pursue professional careers as classical instrumentalists.
• Students will develop instrumental Expression to an artist level. They should develop their Expression to pursue professional careers as classical instrumentalists.
• Students will develop Creativity to professional performing artist level. They should have the tools necessary to create compelling and relevant performances that are on par with professional performing artists. The creativity will be based on aspects such as presentation, venue, staging, and collaboration.

D.M.A. in Instrumental Conducting
Overview
Candidates for the Doctor of Musical Arts in Instrumental Conducting at the Frost School of Music must possess and demonstrate a gift of musical leadership based upon broad experience with instrumental ensembles and a strong foundation of skills from previous training. Admission requirements include baccalaureate and masters degrees in music and practical experience in conducting a variety of ensembles. Enrollment is only by special permission after completion of the application and audition process.

As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/ MMI-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately
The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- April 1 - All JD/MM and JD/MA applicants
- June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- February 1 - Priority portfolio deadline
- April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.
Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:
Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610
or electronically to:
fsom.graddocs@miami.edu

• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

**Mission**

The mission of the Doctor of Musical Arts Degree in Instrumental Conducting is:

- To provide students with the highest quality training possible to bridge academic training into entry-level careers as professional artists;
- To provide students with performance opportunities that develop and demonstrate the integration of musicianship and performance practice;
- To assist students with identifying opportunities and preparation for competitions, internships, apprenticeships and other professional venues for the classical artist;
- To ensure that students have acquired the type of writing and research abilities required of a terminal degree from a leading research university, enabling them to pursue successful careers as teachers, performers, and researchers at the university level.

**Student Learning Outcomes**

- Students will demonstrate advanced rehearsal techniques and post-rehearsal assessment and reflection as adequate for beginning a career as a professional musician.
- Students will demonstrate advanced technical and musicianship skills as well as the selection of appropriate repertoire adequate for beginning a career as a professional musician with a Chamber Orchestra or Wind Ensemble.
- Students will demonstrate advanced technical and musicianship skills as well as the selection of appropriate repertoire adequate for beginning a career as a professional musician with a Full Symphony Orchestra or Band.

**D.M.A. in Instrumental Performance**

**Overview**

The Frost School of Music’s Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
  • Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
  • Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mini-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to: fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.*

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.*
Mission
The mission of the Doctor of Musical Arts Degree in Instrumental Performance is to:

- Provide students the highest quality of education available in the areas of instrumental performance and musicianship that will provide them the ability to pursue successful professional performance careers as classical instrumentalists.
- To stimulate the student’s awareness and artistic creativity in the field of instrumental performance
- To provide students public performance opportunities in a supportive and encouraging environment
- To ensure that students have acquired the type of writing and research abilities required of a terminal degree from a leading research university, enabling them to pursue successful careers as teachers, performers, and researchers at the university level.

Student Learning Outcomes

- Students will develop instrumental Technique to a professional level. They should develop their Technique to pursue professional careers as classical instrumentalists.
- Students will develop instrumental Expression to a professional level. They should develop their Expression to pursue professional careers as classical instrumentalists.
- Students will develop Scholarship Skills required of a terminal degree from a leading research university, enabling them to pursue successful careers as teachers, performers, and researchers at the university level.

D.M.A. in Multiple Woodwinds
Overview
The Frost School of Music’s Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/ MMI-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.
Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School %20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

*Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

**M.M. in Instrumental Conducting**

**Overview**

Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with instrumental ensembles. Advanced orchestration must be included in the program. Admission requirements include a baccalaureate degree in conducting or performance, accumulated practical experience with instrumental ensembles, and experience equivalent to an undergraduate requirement in orchestration. Enrollment in this major is only by special permission.

**On-Campus Programs**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/ MMI-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

**Step 1 - Apply**

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

**Step 2 - Submit Supplemental Materials**

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
- Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
M.M. in Instrumental Conducting

- An official transcript is required for every school attended, even if it was only a single class
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications-supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study. Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation
Josef Silny & Associates (JS&A), Inc. International Education Consultants, is the preferred evaluation service for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information, including the Application for Evaluation of Foreign Educational Credentials (http://www.jsilny.org/pdf/universityofMIAMI-graduate.pdf).

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

- Please click here for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

*This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.*
Mission
The mission of the Master of Music Degree in Instrumental Conducting is to prepare musicians to enter the music conducting profession and/or pursue doctoral studies. The Master of Music degree program in Instrumental Conducting provides students with opportunities for advanced instrumental study, analysis of style, development of technique and musicianship demonstrated through the ability to conduct ensembles. Our principal focus is on the development of high-level performance skills that will enable a student to pursue a career as a professional conductor/musician.

Goals
The program objectives are:

• To provide students with the highest quality training possible to bridge academic training into entry-level careers as professional artists;
• To provide students with performance opportunities that develop and demonstrate the integration of musicianship and performance practice;
• To assist students with identifying opportunities and preparation for competitions, internships, apprenticeships and other professional venues for the classical artist.

Student Learning Outcomes

• Students will demonstrate advanced technical and musicianship skills as well as the selection of appropriate repertoire adequate for beginning a career as a Secondary School Teacher or College Professor with a Chamber Orchestra or Wind Ensemble.
• Students will demonstrate advanced technical and musicianship skills as well as the selection of appropriate repertoire adequate for beginning a career as a Secondary School Teacher or College Professor with a Full Symphony Orchestra or Band.
• Students will demonstrate advanced rehearsal techniques and post-rehearsal assessment and reflection as adequate for beginning a career as Secondary School Teacher or College Professor.

M.M. in Instrumental Performance

Program Overview
The Frost School of Music’s Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/ross-except-arts-presenting/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
Applicants with international transcripts, please click here for specific instructions about approved evaluation services. An official transcript is required for every school attended, even if it was only a single class. Current University of Miami students applying to a new degree program must provide an official University of Miami transcript. Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately. Resume - attached to the application at the time of submission. This does not need to be sent separately.

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty for specific GRE information.
- TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information.
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements.

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.

Music, Media, & Industry Application Deadlines

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants.
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:
a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission
The mission of the Master of Music Degree in Instrumental Performance is to:

• Provide students the highest quality of education available in the areas of instrumental performance and musicianship that will provide them the skills required to lead a professional performance career as a classical instrumentalist.
• To stimulate the student's awareness and artistic creativity in the field of instrumental performance
• To provide students public performance opportunities in a supportive and encouraging environment
• To provide students the writing and research skills needed in order to adequately prepare them for study at the doctoral level.
• To provide students with essential knowledge of repertoire, in all its facets, in order that they be conversant and readily able to apply it in their performance field.

Goals
As an instrumental performance major (https://instrumental.frost.miami.edu/), you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance (https://instrumental.frost.miami.edu/).

Student Learning Outcomes
• Students will develop instrumental Technique necessary to a master level. They should develop their Technique to continue graduate study at elite level music schools or pursue professional careers as classical instrumentalists.
• Students will develop instrumental Expression necessary to a master level. They should develop their Expression to continue graduate study at elite level music schools or pursue professional careers as classical instrumentalists.
• Students will demonstrate comprehensive performance skills required of a master's degree from a leading performance music school, preparing them to pursue professional performance careers or continue study at the doctoral level.

M.M. in Multiple Woodwinds

Overview
The Frost School of Music's Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.
Step 1 - Apply

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/nni-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date
International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.

The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.

Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

Keyboard Performance

https://piano.frost.miami.edu/

The Department of Keyboard Performance at the Frost School of Music is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study (https://piano.frost.miami.edu/). A degree from the Frost School will ensure broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers. For more information, please visit the website for the department of Keyboard Performance (https://piano.frost.miami.edu/).

Doctoral Programs in Keyboard Performance

• D.M.A. in Keyboard Performance and Pedagogy (p. 2744)
• D.M.A. in Keyboard Performance (p. 2739)

Masters Programs in Keyboard Performance

• M.M. in Keyboard Performance and Pedagogy (p. 2754)
• M.M. in Keyboard Performance (p. 2749)

Artist Diploma in Keyboard Performance

• A.D. in Keyboard performance (p. 2735)

MKP 0R5. Organ. 1-4 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 0R6. Organ. 1-2 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of masters degree. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP 0R7. Organ. 1-2 Credit Hours.
Requires successful completion of a graduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on organ-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 612. Seminar in Romantic Performance. 1 Credit Hour.
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 647. Keyboard Pedagogy. 3 Credit Hours.
Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 648. Intermediate to Advanced Repertoire. 3 Credit Hours.
A class dedicated to a survey and discussion of a wide range of teaching materials including teaching exercises, etudes, and performance literature both well known and under appreciated. Topics include reference literature and web resources, piece assigning considerations and leveling, and detailed discussion of selected materials with specific teaching and remedial strategies. Annotated bibliography with MIDI-file attachments of incipits to be submitted at the end of the semester for a grade.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKP 649. Keyboard Pedagogy II: Keyboard Pedagogy Diagnostics. 3 Credit Hours.
1st class of each week: round-table discussion of private teaching strategies using video taped performance excerpts of students at various levels. 2nd class of each week: a focus on a wide range of teaching repertoire covering intermediate to advanced levels with an emphasis on problem prevention and solving.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 650. Keyboard Pedagogy III: Practice Strategies. 3 Credit Hours.
Focus on practice strategy at the keyboard using Philip Johnston's Practice Revolution as a springboard for discussion. Topics also include recent findings and leading researchers in cognitive neuroscience and "brain-based learning," as well as resources available for musician wellness and injury prevention.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 689. Keyboard Accompanying Program in Salzburg, Austria. 0 Credit Hours.
Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKP 693. Special Projects in Keyboard Performance. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MKP 694. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 710. Seminar in Baroque Performance. 1 Credit Hour.
This course is designed as a performance class for graduate DMA piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall.

MKP 711. Seminar in Classical Performance. 1 Credit Hour.
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MKP 712. Seminar in Romantic Performance. 1 Credit Hour.
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 713. Seminar in Contemporary Music. 1 Credit Hour.
This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Spring.

MKP 747. Seminar in Keyboard Pedagogy. 3 Credit Hours.
Focus on college-level teaching and professional development for a pianist. Topics include group piano teaching materials and strategies, syllabi and exam-objective rubric creation, pedagogy curriculum building, pedagogy text survey, administrative duties overview, preparation for the job market including job search and interview process, and C. V. building avenues such as publication, workshop/lecture presentation, editing teaching repertoire, and training in music technology.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MKP 750. Keyboard Pedagogy Research Seminar. 1 Credit Hour.
Research, reading and writing in keyboard pedagogy on topics either historical or current. An in-depth research or project on a topic as approved by KPED faculty culminates in a written paper with annotated bibliography. Course may be repeated for credit.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 780. Keyboard Pedagogy Internship. 1 Credit Hour.
The student team-teaches a piano class or a private student with an instructor. The Program Director observes and critiques the student, and the student videotapes lessons and offers critiques of their own teaching following a guideline.
Requisite: Frost School of Music only.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP 785. Musical Theatre Accompanying. 1 Credit Hour.
A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 786. Vocal Accompanying I. 1 Credit Hour.
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.

MKP 787. Vocal Accompanying II. 1 Credit Hour.
Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 788. Graduate Seminar in Accompanying. 1 Credit Hour.
Study and performance of major vocal and chamber music literature as related to the accompanist and chamber musician. Course may be repeated for credit.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 789. Accompanying, Level I. 1 Credit Hour.
Development of sightreading skills and score preparation.
Requisite: Frost School of Music only.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 790. Accompanying, Level II. 1 Credit Hour.
Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.
Requisite: Frost School of Music only.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 791. Accompanying, Level III. 1 Credit Hour.
Progressive development of all types of accompaniment skills including clef and score reading, transposition, possible recital, opera theater, choral ensemble, and/or orchestral accompanying.
Requisite: Frost School of Music only.
Components: ENS.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP 793. Special Projects in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.
Requisite: Frost School of Music only.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MKP 794. Special Topics in Keyboard Performance or Pedagogy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member’s expertise and students’ areas of interest.
Requisite: Frost School of Music only.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MKP 811. Master’s Recital Paper. 1-3 Credit Hours.
The student working on his/her master’s recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MKP 812. Master’s Recital. 1 Credit Hour.
The student enrolls for recital credit during the semester in which he/she presents the master’s recital.
Requisite: Frost School of Music only.
Components: PRA.
Grading: SUS.
Typically Offered: Fall & Spring.

MKP 813. Master’s Pedagogy Project. 1-3 Credit Hours.
The student working on his/her master’s pedagogy project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MKP 814. Artist Diploma Recital. 1 Credit Hour.
The student enrolls for recital credit during the semester in which s/he presents the Artist Diploma recital.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MKP 815. Masters Second Recital. 1 Credit Hour.
The second recital in the masters degree as an elective option as approved by an advisor. The program should consist of memorized solo piano repertoire, with an optional inclusion of representative chamber or concerto repertoire instead of, or in combination with, the solo repertoire.
Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.

MKP 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master’s degree after the student has completed the required hours of thesis or project credit.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MKP 831. Doctoral Essay. 1-12 Credit Hours.
Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MKP 731 may be taken in a regular semester, nor more than six in a summer session.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MKP 832. Doctoral Recital. 1-2 Credit Hours.
Required of all candidates for the D.M.A.
Requisite: Frost School of Music only.
Components: PRA.
Grading: SUS.
Typically Offered: Fall & Spring.
MKP 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the DMA after the student has completed the required hours of doctoral essay credit.
Requisite: Frost School of Music only.
Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MKP HC5. Harpsichord. 1-4 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HC6. Harpsichord. 1-4 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Masters Degree. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HC7. Harpsichord. 1-2 Credit Hours.
Requires successful completion of a graduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on harpsichord-related performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP HCX. Secondary Harpsichord - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP ORX. Secondary Organ - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP P15. Piano. 1-4 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student’s advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of Artist Diploma. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student’s performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.
Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.
MKP P16. Piano. 1-2 Credit Hours.
Requires successful completion of an undergraduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of masters degree. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP P17. Piano. 1-2 Credit Hours.
Requires successful completion of a graduate degree in piano performance, and approval of student's advisor (studio teacher). Course may be taken for 2 credits (1-hour lesson) or 1 credit (30-minute lesson) as part of doctoral degree. The course covers private instruction on performance techniques and repertory. The level of repertory will be determined by instructor based on the student's performance level. A jury examination in front of a faculty committee is required each semester for students taking the course for 2 credits.
Requisite: Frost School of Music only.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

MKP PIX. Secondary Piano - Graduate. 1 Credit Hour.
Secondary lessons at the graduate level are designed for students who are either non-performance majors or who wish to pursue applied study on an instrument or voice that is not their primary focus. Students enroll in 1 credit and receive one 30-min lesson per week.

Components: LSN.
Grading: GRD.
Typically Offered: Fall & Spring.

A.D. in Keyboard Performance

Overview
Candidates for the Artist Diploma in Keyboard Performance must possess highly-developed pianistic and musical skills. Enrollment is only by select audition process. Candidates must submit a DVD (preferred) or a CD recording for pre-screening and to receive an acceptance for a live audition in front of a faculty committee. Candidates for the Artist Diploma degree are not considered for Teaching Assistantship awards although—only in very special circumstances—a candidate may be recommended by the department to receive a tuition scholarship.

The curriculum is designed for the student seeking an intensive, one-year immersion in keyboard performance. The faculty of the Keyboard Performance department is composed of world-class artists/teachers who are dedicated to the principle that the individuality and talent of every student must be recognized, respected, and nurtured, for these qualities form the essence of successful careers in music.

The AD degree requires two solo recitals by the end of the one-year curriculum. A performance Forum is held every week where students who are ready to present new repertoire are given the opportunity to do so in front of the faculty and their classmates. Students may also have the opportunity to perform with two of our renowned ensembles: the Frost Symphony Orchestra and the Frost Wind Ensemble. Both groups have featured piano students in concerto performances conducted by members of our illustrious faculty as well as by guest artists such as Leon Fleisher. The opportunity to collaborate with other talented instrumentalists and vocalists at the Frost School is also readily available and encouraged.

Many performance venues in the greater-Miami area host our students in solo and chamber music performances. All of our students also benefit greatly from Miami's rich cultural life, which includes solo, and collaborative concerts by world-famous recitalists and chamber groups, as well as orchestral performances by the New World Symphony and the visiting Cleveland Orchestra. The piano department presents master-classes by visiting artists and pedagogues throughout the year.

The competitive reality of the market for performers and teachers has never been more demanding. We are proud that many of our students have gone on to win awards at piano competitions, have been invited to publish in recognized periodicals, and are currently in teaching positions both in the U.S. and abroad.

Our current and past FSOM piano students have participated and won prizes at competitions such as:

- Tchaikovsky Competition
- Queen Elizabeth Competition
- Van Cliburn Competition
- Sydney International Piano Competition
- Paderewski Piano Competition

Our mission at the Frost School of Music is to have you join them!
Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

Step 1 - Apply
- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
  - Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
  - Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:
- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

No all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio
Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.
Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu
• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School %20of%20Music%20International%20Applicants.html) for additional details.

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.
Mission
The mission of the Artist Diploma (a one-year program) in Keyboard Performance is to:

• Provide students the highest quality of education available in the areas of piano performance and musicianship that will provide the foundation for continued academic work, and which could also lead toward a professional performance career as a classical pianist.
• To stimulate the student’s awareness and artistic creativity in the field of piano performance
• To provide students public performance performance opportunities in a supportive and encouraging environment
• To provide students performance skills necessary for graduate degree auditions and national/international piano competitions.

Student Learning Outcomes

• Students will develop technical pianistic skills necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.
• Students will develop musicianship skills and knowledge of a large selection of the piano repertory necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.
• Students will develop performance and artistic presentation skills necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.

D.M.A. in Keyboard Performance

Overview

Although requirements vary among degrees, three solo recitals and one chamber recital of broad keyboard repertoire performed at the highest level of technical mastery and artistic expression are required during the three-year residency. Each candidate must also complete a D.M.A. Essay containing intensive research on a relevant topic of study.

The competitive reality of the market for performers and teachers has never been more demanding. We are proud that many of our students have gone on to win awards at piano competitions, have been invited to publish in recognized periodicals, and are currently in teaching positions both in the U.S. and abroad.

Our current and past FSOM piano students have participated and won prizes at competitions such as:

• Tchaikovsky Competition
• Queen Elizabeth Competition
• Van Cliburn Competition
• Sydney International Piano Competition
• Paderewski Piano Competition

Our mission at the Frost School of Music is to have you join them!
Visti and Like us on our Facebook page (https://www.facebook.com/FSMPiano/) where you will see the latest on our current and past students from the Department of Keyboard Performance.
For FSOM Graduate admission information and financial support, please click here (https://admissions.frost.miami.edu/).

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs.

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) — check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- April 1 - All JD/MM and JD/MA applicants
- June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- February 1 - Priority portfolio deadline
- April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Total Credit Hours** 60

---

*At least one MTC courses above 700 should be taken during the 1st year of study to satisfy the MTC portion of the Qualifying Process for MKP DMA students.

** Two 3-credit MTC courses (in total) are needed to satisfy the requirement. The 2nd MTC course can be taken at any time during the 3-year course of study.

***Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.
* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

**Mission**

The mission of the Doctor of Musical Arts degree in Keyboard Performance is to:

- Provide students the highest quality of education available in the areas of piano performance and musicianship that will provide the foundation for a successful teaching career at an institution or private studio, and which could also lead toward a professional performance career as a classical pianist.
- To stimulate the student's awareness and artistic creativity in the field of piano performance.
- To provide students public performance performance opportunities in a supportive and encouraging environment.
- To provide students performance skills necessary for careers in teaching, success at national/international piano competitions, and to further their skills in performance.

**Student Learning Outcomes**

- Students will develop technical pianistic skills necessary for fostering a professional career as solo pianists.
- Students will develop musicianship skills and knowledge of a large selection of the piano repertory necessary for fostering a professional career as solo pianists.
- Students will develop performance and artistic presentation skills necessary for fostering a professional career as solo pianists.
- Students will develop the necessary research and writing skills for completing a Doctoral essay.

**D.M.A. in Keyboard Performance and Pedagogy**

**Overview**

If you are an accomplished pianist with curiosity and open mind to delve into the study of piano pedagogy to further performance and teaching aspirations, then this is the place for you. In addition to majoring in Keyboard Performance and Pedagogy at the DMA level, there is an option for DMA non-pedagogy students to choose a 12-credit Cognate in Keyboard Performance and Pedagogy.

DMA in Keyboard Performance and Pedagogy consists of 60 credit hours of graduate study beyond the Master of Music in piano-related degrees such as solo performance, pedagogy, or collaborative piano. It is designed to prepare students for varied professional settings such as performance, research, or college teaching.

Consistent with our school-wide belief in the value of “experiential” learning, our graduate curriculum in Keyboard Performance and Pedagogy (KPED) is uniquely designed to integrate theoretical studies with performance to the maximum extent possible. All KPED students will have the opportunity to request for performance study with any one of our piano faculty members, and our flexible curriculum affords customized program of pedagogical study based on background and interest of each student. Students are strongly encouraged to select a 12-credit Cognate area of study (such as Music Theory, Musicology, or Music Education), which would further enhance credentials for the current competitive job market.

In addition to traditional pedagogy offerings—covering topics such as historical and modern private teaching methodologies, didactic repertoire and sequencing, diagnostics, group piano teaching, injury prevention, and peak performance strategies—our curriculum strives to reflect the most current needs as well as resources gleaned from the job market and related disciplines. For example: students may learn about pianist-specific professional preparations including effective use of technology and higher-education teaching, or learn from the rapidly growing field of cognitive neuroscience as it relates to practicing, performing, and teaching.

A wide variety of options exist for hands-on teaching and learning, and our Preparatory Division provides the platform for those interested in a teaching internship for young students. Research ability is deemed an essential skill for graduate-level study. Students have the opportunity to hone their skills in critical thinking and independent research both through various courses in addition to the culminating DMA project.

The competitive reality of the market for performers and teachers has never been more demanding. We are proud that many of piano students (both KPED and MKP) have gone on to win awards at piano competitions, have been invited to publish in recognized periodicals or present at conferences, and are currently in teaching positions both in the U.S. and abroad.

For more information, please contact:

Naoko Takao, DMA
Program Director, Keyboard Performance and Pedagogy
n.takao@miami.edu (%20n.takao@miami.edu)
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
  • Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
  • Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines ([https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/))

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- **December 1** - International applicants and priority domestic applicants
- **April 1** - All JD/MM and JD/MA applicants
- **June 1** - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- **December 1** - International applicants and priority domestic applicants
- **February 1** - Priority portfolio deadline
- **April 1** - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

**International Applicants** ([https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/))

- **TOEFL/IELTS** - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants ([https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/](https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here ([https://www.wes.org/](https://www.wes.org/)) for more information, including the Application for Evaluation of Foreign Educational Credentials ([https://www.wes.org/#get-started](https://www.wes.org/#get-started)).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list ([http://naces.org/members.html](http://naces.org/members.html)).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

- **Frost School of Music**
  PO Box 248165
  Coral Gables, FL 33124-7610

or electronically to:

fsom.graddocs@miami.edu

• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

Doctoral Essay  
Credit Hours  
Total Credit Hours  

* One MTC course at the 700 level should be taken during the first year of study to satisfy the MTC portion of the Qualifying Process for MKP DMA students.

** If choosing to play a third recital, replace the last 2 items with 2 credits of MKP 832 Recital, and adjust the third year spring courses accordingly.

*** This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

****Doctoral Qualifying Exams must be complete prior to the defense of the Doctoral Essay/Dissertation proposal.

**Mission**

The mission of the Doctor of Musical Arts degree in Keyboard Performance and Pedagogy is to educate students in:

- Teaching strategies for all levels of piano students
- Knowledge of methods, materials, and standard teaching repertoire for all levels of piano students
- Career preparations for college-level teaching as a pianist including professional development and use of technology
- The performance of piano, building musicianship and technical ability to an advanced level
- Research skills on original topics in the field of keyboard pedagogy

**Goals**

Graduates of the program are prepared for careers as college or university faculty, performers, and teachers/proprietors of private and group teaching studios.

Student Learning Outcomes

- Students will synthesize musicianship and technical ability to an advanced level of piano performance.
- Students demonstrate effective research skills in the field of keyboard pedagogy and improve writing skills to prepare for the final project, and eventually, professional presentations beyond the program of study.
- Students will demonstrate the practical career-related knowledge requisite for college-level teaching as a pianist. The topics include professional development, classroom teaching preparation, and use of technology.

**M.M. in Keyboard Performance**

**Overview**

Individual instruction, ensemble experience, master classes, teaching opportunities, as well as performance opportunities both on and off-campus enhance private study with internationally renowned artist teachers. Supporting academic instruction, now with an additional courses available focusing on artist development, enriches the performance experience, which culminates with a final recital.

The competitive reality of the market for performers and teachers has never been more demanding. We are proud that many of our students have gone on to DMA studies, win awards at piano competitions, have been invited to publish in recognized periodicals, and are currently in teaching positions both in the U.S. and abroad.

Our current and past FSOM piano students have participated and won prizes at competitions such as:

- Tchaikovsky Competition
- Queen Elizabeth Competition
- Van Cliburn Competition
- Sydney International Piano Competition
- Paderewski Piano Competition

Our mission at the Frost School of Music is to have you join them!

Visit and Like us on our Facebook page (https://www.facebook.com/FSMPiano/) where you will see the latest on our current and past students from the Department of Keyboard Performance.

For admission information and financial support, please click here (https://admissions.frost.miami.edu/).
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**

- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* Select one course from each of the 4 categories listed in the Academic Bulletin: MTC, MCY, MKP, and Artist Development courses. Exceptions may be made only with Advisor approval.

**Refer to Academic Bulletin for suggested 1-credit music electives

*** This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission

The mission of the Master of Music degree in Keyboard Performance is to:

- Provide students the highest quality of education available in the areas of piano performance and musicianship that will provide the foundation for continued academic work, and which could also lead toward a professional performance career as a classical pianist.
- To stimulate the student’s awareness and artistic creativity in the field of piano performance
- To provide students public performance performance opportunities in a supportive and encouraging environment
- To provide students performance skills necessary for graduate degree auditions and national/international piano competitions.

Student Learning Outcomes

- Students will develop musicianship skills and knowledge of a large selection of the piano repertory necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.
Students will develop technical pianistic skills necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.

Students will be able to develop performance and artistic presentation skills necessary for acceptance into a variety of graduate study institutions offering a DMA in performance and for fostering a professional career as solo pianists.

Students will be able to develop the necessary research and writing skills for completing a MM Recital paper.

M.M. in Keyboard Performance and Pedagogy

Overview

If you are an accomplished pianist with curiosity and an open mind to delve into the study of piano pedagogy to further performance and teaching aspirations, then the Frost School of Music is the place for you.

The Master of Music in Keyboard Performance and Pedagogy consists of 30 credit hours of graduate study beyond the Bachelor of Music degree in piano-related degrees, such as solo performance, pedagogy, or collaborative piano. This degree program prepares students for advanced teaching as independent studio teachers or for continued doctoral-level study in related disciplines.

Consistent with our school-wide belief in the value of “experiential” learning, our graduate curriculum in Keyboard Performance and Pedagogy (KPED) is uniquely designed to integrate theoretical studies with performance to the maximum extent possible. All KPED students have the opportunity to request performance study with any one of our outstanding piano faculty members. Furthermore, our flexible curriculum affords a customized program of pedagogical study based on the background and interests of each student.

Our innovative curriculum includes both traditional and progressive offerings. Our traditional pedagogy offerings cover topics such as historical and modern private teaching methodologies, didactic repertoire and sequencing, group piano teaching, injury prevention, and peak performance strategies. To help students acquire and maintain a competitive edge, our curriculum also addresses relevant knowledge in other disciplines, such as latest findings about the cognitive process or sport psychology, while providing every opportunity possible to guide students through the process of professional preparation.

A wide variety of options exist for hands-on teaching and learning, and our Preparatory Division provides the platform for those interested in a teaching internship for young students. Research ability is deemed an essential skill for graduate-level study. Students have the opportunity to hone their skills in critical thinking and independent research both through various courses in addition to the Master's Thesis.

The competitive reality of the market for performers and teachers has never been more demanding. We are proud that many of our piano students (both KPED and MKP) have gone on to DMA studies, won awards at national and international piano competitions, or invited to publish in recognized periodicals or present at conferences.

If you would like to know the latest on our current and past students, please visit and Like us on our Facebook page. (https://www.facebook.com/FSMTPiano/)

For more information about the program, please contact:
Naoko Takao, DMA
Program Director, Keyboard Performance and Pedagogy
n.takao@miami.edu

Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/undi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official

• Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services

• An official transcript is required for every school attended, even if it was only a single class

• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript

• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately

• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information

• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information

• Teaching/Conducting Sample

• Writing Sample

• Prescreening/Audition/Interview

• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants

April 1 - All JD/MM and JD/MA applicants

June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants

February 1 - Priority portfolio deadline

April 1 - Final application and portfolio deadline - all applications-supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).

• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.
Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

• Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
• Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

** May be a performance recital or a lecture recital.

### Mission

The mission of Master of Music degree in Keyboard Performance and Pedagogy is to educate students in:

- Teaching strategies for private and group piano lessons
- Knowledge of methods, materials, and standard teaching repertoire for beginning and intermediate students
- The use of music technology available for use in teaching
- The performance of piano, building musicianship, technical ability, and the ability to assimilate a large cross-section of recital repertoire
- Research skills on original topics in the field of keyboard pedagogy.

### Goals

The Master of Music degree will prepare students for careers as performers, private music teachers, entry-level positions in community colleges and some four-year institutions, and to pursue advanced degrees in music-related fields.

Student Learning Outcomes

- Students will learn teaching strategies for private and group lessons, and will be able to successfully teach in these arenas.
- Students will demonstrate knowledge and proficiency with "method" books and standard teaching repertoire for beginning and intermediate students.
- Students will build musicianship and technical ability and will assimilate a large cross-section of recital repertoire.
- Students will be able to appropriately assign repertoire and etudes with clear understanding of challenges inherent in the material and according to the need of each student.
- Students will develop skills researching an original topic in the field of keyboard pedagogy.

### Music Education and Music Therapy

The Department of Music Education and Music Therapy boasts two of the most innovative programs in the country and is committed to the preparation of outstanding music educators, music therapists, and scholars at all degree levels. The department faculty members are cutting-edge scholars and researchers, holding leadership positions in internationally-prominent organizations. Their contributions to research, scholarship, and pedagogy consistently inspire their students while informing the profession at large.

#### Music Education

A basic premise of the Music Education ([https://musiced.frost.miami.edu/](https://musiced.frost.miami.edu/)) program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. Carefully coordinated courses emphasize sequencing of instruction in terms of student's musical development and incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. The program seeks to transcend all areas of music teaching and learning, from birth to older adulthood, and from public schools to community programs, allowing the principles of pedagogy to be applied broadly in a wide variety of contexts. For more information, please visit the website for the Music Education program ([https://musiced.frost.miami.edu/](https://musiced.frost.miami.edu/)).

#### Music Therapy

Music therapy ([https://musictherapy.frost.miami.edu/](https://musictherapy.frost.miami.edu/)) involves using music as a tool to help people regain or develop important life skills, such as communication, physical movement, attention and memory, emotional growth or social skills. Therapeutic techniques are based on scientific knowledge regarding how the human brain and body respond to and utilize musical stimuli. Music therapists work with individuals of all ages who require treatment due to deficits in physical, cognitive or social/emotional functioning. Potential employment sites include medical or psychiatric hospitals, clinics, nursing homes, rehabilitation centers, special education or early intervention school settings, hospices, or correctional settings.
Music therapy can be a rewarding career for the individual who has a strong musical background and who is interested in a health care profession. For more information, please visit the website for the Music Therapy (https://musictherapy.frost.miami.edu/) program.

**Doctoral Program in Music Education and Music Therapy**
- Ph.D. in Music Education (p. 2788)

**Masters Programs in Music Education and Music Therapy**
- M.A.T. in Music Education (p. 2766)
- M.M. in Music Education (p. 2768)
- M.M. in Music Education with Teaching Certification (p. 2772)
- M.M. in Music Therapy (p. 2778)
- M.M. in Music Therapy with Undergraduate Equivalency (p. 2783)

**MED 615. Music Education Certification Forum. 0 Credit Hours.**
A weekly forum for sharing information about issues, current developments, and other matters related to music education. Required for all graduate music education certification students.
- Components: FOR.
- Grading: SUS.
- Typically Offered: Fall & Spring.

**MED 642. Teaching General Music. 3 Credit Hours.**
Curriculum, methods, and materials designed for elementary music, K-6. Observation, planning, and teaching experience are emphasized
- Components: LEC.
- Grading: GRD.
- Typically Offered: Fall.

**MED 643. Teaching Instrumental Music. 3 Credit Hours.**
A study of elementary and secondary instrumental music instruction including program organization, teaching techniques, materials, and field experiences of music instruction in schools.
- Components: LEC.
- Grading: GRD.
- Typically Offered: Spring.

**MED 644. Teaching Modern Music. 3 Credit Hours.**
This course will provide students with fundamentals of teaching general music at the secondary (middle and high school) level. Focus will be placed on developing 21st century musical curricula across a variety of musical disciplines; engaging students through several instructional paradigms; and for presenting instruction using conventional educational strategies.
- Components: LEC.
- Grading: GRD.
- Typically Offered: Fall.

**MED 645. Music in Rehabilitation. 3 Credit Hours.**
Review of development and functioning for neurologically-based sensorimotor behavior. Survey of disabilities and diseases that typically result in sensorimotor deficits is included. Demonstration and practice of therapeutic techniques for sensorimotor deficits are also covered.
- Components: LEC.
- Grading: GRD.
- Typically Offered: Spring.

**MED 646. Music in Psychotherapy. 3 Credit Hours.**
Survey and practical application of music as therapy in the treatment of psychiatric disorders and in promoting mental health.
- Requisite: Plan MTYP_MM or MTYPE_MM or Instructor Consent.
- Components: LEC.
- Grading: GRD.
- Typically Offered: Spring.

**MED 648. Music for Special Learners. 3 Credit Hours.**
This course is designed for music educators who will be working in schools with children and youth who have various disabilities. The purpose of this course is to acquaint students with the characteristics of children and youth with disabilities, and introduce adaptive strategies in music education, K-12, for instructing children and youth with disabilities.
- Components: LEC.
- Grading: GRD.
- Typically Offered: Spring.
MED 649. Teaching Vocal Music. 3 Credit Hours.
Course covers curriculum, vocal/rehearsal techniques, and literature. Teaching music in secondary schools through the medium of choral performance.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 651. Music Therapy Research Methods. 3 Credit Hours.
This course is designed to help music therapy students: 1) integrate research findings into their clinical and/or educational practice, 2) implement research techniques into their work (e.g., through data collection or scholarly writing), and 3) become familiar with research procedures.
Components: LEC.
Grading: GRD.

MED 655. Elementary Music Workshop. 3 Credit Hours.
Course is designed for in-service elementary school classroom teachers and music supervisors. Survey and experience with contemporary methodology and materials in elementary school music education is emphasized.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

MED 656. Secondary General Music Workshop. 3 Credit Hours.
Course is designed for teachers of general music classes in middle, junior high, and senior high schools. Practical experience with methods and materials designed for non-performance music classes, grades 7-12 is emphasized.
Components: SEM.
Grading: GRD.
Typically Offered: Summer.

MED 662. Psychology of Music I. 3 Credit Hours.
Psychological foundations of music with an emphasis on problems of perception, experimental esthetics, functional music, and measurement and diagnosis of musical ability and achievement. Related literature of experimental investigation is reviewed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 675. Preschool Music Workshop. 1-3 Credit Hours.
Workshop is designed to prepare class members to initiate, administer, and teach music programs for preschool children. Materials which address the teacher, the child, and the parent are used. The daily schedule includes demonstration classes with children, lectures, and active participation of and discussion with class members. Emphasis is placed on working with a planning guide for teachers which offers articles on the major areas of the curriculum and clear, succinct statements focusing on the central issues of each lesson.
Components: LEC.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 676. Music and Development. 3 Credit Hours.
Review of development in cognitive, communication, and musical domains. Survey of developmental disabilities most commonly found in child populations is included as well as demonstration and practice of therapeutic techniques for cognitive and communication deficits.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 681. Teaching Classroom Guitar I. 2 Credit Hours.
This class is designed for students and teachers, guitarist or non-guitarist, w who wish to initiate, enhance, and teach guitar in a multi-level classroom setting. The course includes demonstration classes with elementary and secondary students. Topics include organization and teaching performance materials in a hands-on setting.
Components: LEC.
Grading: GRD.
Typically Offered: Summer.

MED 693. Special Projects in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member’s area of expertise and student’s area of interest. This course includes a culminating project.
Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.
MED 694. Special Topics in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.
Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MED 700. Psychoacoustical Foundations of Music. 2 Credit Hours.
Production, transmission, and reception of simple and complex tones. Examination of physical properties and psychoacoustical response to tonal stimuli is also included.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 701. Recital Paper Preparation. 1 Credit Hour.
Supervised preparation of the recital paper required for the Master of Music degree in classical performance.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 702. DMA Essay Proposal. 1 Credit Hour.
Supervised preparation of the DMA proposal for the Doctor of Musical Arts in Performance, Conducting, or Accompanying and Chamber Music.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 710. Graduate Forum in Music Therapy. 0 Credit Hours.
Forum for graduate students to discuss topics relevant to advanced music therapy practice, engage in experiential therapeutic techniques, and to share student efforts of scholarship in the field.
Components: FOR.
Grading: SUS.
Typically Offered: Fall & Spring.

MED 715. Graduate Forum. 0 Credit Hours.
Forum for masters and doctoral students to discuss various topics of relevance to music education practice and to share efforts of scholarship in the field.
Components: FOR.
Grading: SUS.
Typically Offered: Fall & Spring.

MED 720. International Music Education. 3 Credit Hours.
Students study music instruction systems in other countries, including public and private school, community music programs, private music instruction, music conservatory instruction, informal instructional systems, and university work in music. Students compare music instruction systems in the United States and other countries through readings and presentations by native informants. An optional on-site field experience examining music education in another country may be arranged to coincide with this course.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 725. Cultural Diversity in Music Education. 3 Credit Hours.
Examination of major issues and central concepts in cultural diversity, multiculturalism, and social justice in music education.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 729. Advanced Music Therapy Practice I. 3 Credit Hours.
Review of research literature in clinical topic areas, such as music and cognition, or music and affective processing. Presentation of research findings through writing and discussion is emphasized as well as the application of research findings through practice and demonstration of therapeutic techniques.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.
MED 730. Advanced Music Therapy Practice II. 3 Credit Hours.
Review of research literature in clinical topic areas, such as music and sensorimotor processing or music in biofeedback. Presentation of research findings through writing and discussion is emphasized as well as the application of research findings through practice and demonstration of therapeutic techniques.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 732. Vocal Methods and Materials in Music Education. 2 Credit Hours.
Survey of latest vocal methods and publications for use in public schools.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 733. Seminar for Teaching Associates. 2 Credit Hours.
Discussion of teaching, rehearsal techniques, and the organization of music materials related to the internship experience. To be taken in conjunction with internship, MED 771.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 735. Social Issues Music Learn. 3 Credit Hours.
Survey of major issues in the social psychology and sociology of music related to music learning and music teaching.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 740. Woodwind Techniques. 1 Credit Hour.
Group instruction in woodwind instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Requisite: MED GRAD STUDENTS ONLY.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 741. Brass Techniques. 1 Credit Hour.
Group instruction in brass instruments with emphasis on basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Requisite: MED GRAD STUDENTS ONLY.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 742. Percussion Techniques. 1 Credit Hour.
Group instruction in percussion (snare drum, mallet-keyboard percussion, timpani, drumset, and small accessory instruments) with emphasis upon basic skills of performance as well as the appropriate teaching techniques, methods, and materials necessary for public school pedagogy.
Prerequisite: MEDU majors only.
Components: LAB.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 743. String Techniques. 1 Credit Hour.
The study of stringed instruments (violin, viola, cello, bass) in a heterogeneous class with emphasis on general principles of string playing and teaching methods for use in beginning and intermediate instruction in the schools.
Requisite: MED GRAD STUDENTS ONLY.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 744. Vocal Techniques. 1 Credit Hour.
Class instruction in fundamentals of singing, breath control, tone production, and solo singing for music majors.
Requisite: MED GRAD STUDENTS ONLY.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.
MED 745. Folk and Modern Instrumental Techniques. 1 Credit Hour.
Group instruction in folk and modern instruments, including but not limited to guitar, ukulele, recorder, and drums, with emphasis on basic skills of performance and classroom uses, as well as the appropriate teaching techniques, methods, and materials.
Requisite: MED GRAD STUDENTS ONLY.
Components: LAB.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 747. Seminar in Instrumental Music Education. 2 Credit Hours.
Practical study of the development of school band programs with special consideration given to the selection of training and concert materials, rehearsal techniques and administrative procedures.
Components: LEC.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 750. Community Music Programs. 3 Credit Hours.
A seminar designed to generate ideas about contemporary theory and practice in community music. Students engage in readings and discussion. The course is open to all graduate music majors, but is intended for music education doctoral students.
Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 755. The Teaching Artist. 3 Credit Hours.
Course presents fundamental issues of music teaching and learning. Through projects, readings, and discussions, students will learn how to create effective music learning across a variety of situations.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 757. Music Therapy Graduate Practicum 1. 2 Credit Hours.
In a clinical setting, gain skill in observation and co-leading under the supervision of a music therapist.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 758. Music Therapy Graduate Practicum 2. 2 Credit Hours.
In a clinical setting, gain skill in observation and co-leading under the supervision of a music therapist.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 759. Music Therapy Graduate Practicum 3. 2 Credit Hours.
In a clinical setting, independently design and apply therapeutic techniques based on scientific evidence.
Components: PRA.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 760. Philosophy of Music Education. 3 Credit Hours.
The history of Western music education beginning with the ancient Greeks is surveyed to the present. Incorporated in the survey is the evolution of philosophical thought about music and its role in educational practice. From this grounding, current philosophical views of music education are presented.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 762. Music Learning and Curriculum. 3 Credit Hours.
Survey of theories of music learning and their application to music instruction, curriculum development, and instructional design in music.
Components: LEC.
Grading: GRD.

MED 763. Music Research Methods. 3 Credit Hours.
An introduction to descriptive, experimental, philosophical, qualitative, and historical research in music education and music therapy, with particular reference to data collection, research design, and effective research procedures. Students prepare critiques of research material and are guided in designing original research projects related to their own area of interest.
Components: LEC.
Grading: GRD.
MED 764. Music Assessment. 3 Credit Hours.
Presentation of methods for assessing musical behavior in studios, classrooms, and concert halls. Strategies for the objectification of performance quality, musical learning, capacity, and potential uses of contemporary measurement techniques are provided.
Components: LEC.
Grading: GRD.

MED 765. Seminar in Music Education. 2 Credit Hours.
Survey of literature, bibliography, and contemporary trends in music education. Course may be repeated for credit by doctoral students with consent of instructor.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 773. Seminar on Music in Childhood. 2 Credit Hours.
Seminar addresses music in the lives of children by examining the musical cultures of childhood, music transmission processes, and formal through informal learning. Implication from music teaching will be considered.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 774. Seminar in General Music. 2 Credit Hours.
Course provides curriculum, methods, and materials designed for instruction for the general music student, grades K-12.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 775. Practicum in Music Education. 7 Credit Hours.
Students enrolled in the Master of Music with Certification Option Degree may complete the required internship with this course.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 776. Practicum in Teaching College Students. 1-3 Credit Hours.
Supervised practicum for teaching music education courses at the college level.
Components: PRA.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 780. Doctoral Seminar. 1 Credit Hour.
A seminar designed to generate ideas about contemporary theory and practice in music. Students engage in discussion of general research topics, but from the perspective of their particular discipline. Enrollment is intended for those doctoral students who have satisfactorily completed the qualifying examinations and until receiving approval of the doctoral paper proposal. The course is open to all majors, but is required of all music education doctoral students.
Components: SEM.
Grading: GRD.
Typically Offered: Offered by Announcement Only.

MED 781. Seminar in Qualitative Research in Music. 2 Credit Hours.
Examination of various approaches to qualitative research in the field of music education. Hands-on experiences designing research, collecting data, and presenting findings.
Components: LSN.
Grading: GRD.
Typically Offered: Spring.

MED 782. Seminar in Quantitative Research in Music. 2 Credit Hours.
Examination of advanced topics in quantitative music research, including statistical analysis techniques, results reporting, computer-based analysis, scholarly critiquing, and peer review of research. Dissertation development will also be addressed.
Components: LEC.
Grading: GRD.
Typically Offered: Spring.

MED 784. Music Therapy Seminar. 1 Credit Hour.
Doctoral seminar in music therapy to address practical and professional issues pertaining to teaching and research in music therapy. Possible topics include: Teaching and Clinical Supervision, Philosophical Research, and Historical Research.
Components: SEM.
Grading: GRD.
Typically Offered: Fall & Spring.
MED 790. Teaching Music in College. 1 Credit Hour.
An overview of college music curriculum, patterns of administrative organization, traditional and innovative content, styles and resources used in teaching at the college level, evaluation and grading techniques used in classes, lessons, and ensembles.

Components: LEC.
Grading: GRD.
Typically Offered: Fall.

MED 793. Special Projects in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced individual instruction pertaining to faculty member's area of expertise and student's area of interest. This course includes a culminating project.

Components: IND.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MED 794. Special Topics in Music Education and Music Therapy. 1-3 Credit Hours.
Advanced group/classroom instruction pertaining to faculty member's expertise and students' areas of interest.

Components: SEM.
Grading: GRD.
Typically Offered: Fall, Spring, & Summer.

MED 795. Doctoral Research Project. 1 Credit Hour.
Small scale research project in music education or music therapy, suitable for publication. This project could serve as pilot work for the dissertation.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 796. Doctoral Research Project. 1 Credit Hour.
Small scale research project in music education or music therapy, suitable for publication. This project could serve as pilot work for the dissertation.

Components: THI.
Grading: GRD.
Typically Offered: Fall & Spring.

MED 802. Internship in Music Therapy. 1-3 Credit Hours.
Course provides students with a six month opportunity as a music therapy intern in an approved training facility.

Components: PRA.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MED 805. Master's Project. 1-3 Credit Hours.
Culminating project for Master of Music in music education students not completing a thesis or recital.

Components: THI.
Grading: SUS.
Typically Offered: Fall.

MED 810. Master's Thesis. 1-6 Credit Hours.
The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MED 820. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the master's degree after the student has completed the required hours of thesis or project credit.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

MED 830. Doctoral Dissertation. 1-12 Credit Hours.
Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MED 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.
Grading: SUS.
Typically Offered: Fall & Spring.
MED 850. Research in Residence. 1 Credit Hour.
Used to establish research in residence and maintain full-time enrollment for the Ph.D. in Music Education after the student has completed the required hours of dissertation credit.

Components: THI.
Grading: SUS.
Typically Offered: Fall, Spring, & Summer.

M.A.T. in Music Education

Overview
This accelerated degree program is designed for individuals who hold a prior music degree (not in music education) and provides them with a plan of study so they can subsequently pursue Florida K-12 music teaching certification. In the program, students complete all course content as required to pursue music teaching certification in the state of Florida. Following graduation, alumni then secure a teaching position in a Florida School through the State of Florida Professional Development Certification Program. After completing one year of supervised teaching, individuals complete certification examinations and apply to the Florida Department of Education for certification.

Admission Requirements
Students applying for the MAT program must have completed a Bachelor’s degree in music which includes at least 14 credit hours of music performance, 12 credit hours of music theory, 3 credit hours of conducting, 6 credit hours of music history, and credit hours in performance ensembles, similar to the entrance requirements for the MM with Certification Degree program. Applicants must submit their application, 3 letters of recommendation, transcripts, a resume, and video that demonstrates musicianship in their primary music performance area.

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

* Students select 3 courses from MED 642/643/644/649 (3 credits each)

** Students select 3 courses MED 740/41/42/43/44/45 (1 credit each)

### Mission

The mission of the Frost music education program (part of the department of music education and music therapy) is to provide for the education of future music teachers, including music teachers in K-12 settings, as well as advanced studies in music learning, music pedagogy, and music therapy. The music education program offers an undergraduate Bachelor of Music with music teaching certification, a Master of Music in Music Education (for experienced/certified teachers), a Master of Music in Music Education with Certification (2-year degree), and a Ph.D. in Music Education with emphases in Music Education and Music Therapy.

The MAT in Music Teaching is a 1-year alternative to the Master of Music with Music Teaching Certification 2-year program, designed for professional musicians with a music degree outside of music education. This program provides required coursework in order to prepare students to pursue Florida K-12 music teaching certification. After graduation, completing of Florida State Teacher Certification Examinations, and teaching in a Florida School under the supervision of a school administrator for one year, graduates of the program would be able to obtain a Florida Music Teaching Certificate.

### Student Learning Outcomes

Outcome #1: Students will apply knowledge of music learning theoretical content by completing a Theoretical Applications Paper in well-conceived position paper.

Outcome #2: Students in the MAT Program will demonstrate competence in assessing music learning.

Outcome #3: Students in the MAT Program will demonstrate a competence in curriculum development and implementation.
M.M. in Music Education

Overview
Master’s degree students typically join the program after several years of teaching in public or private school settings, and already possess music teacher certification. Students study directly with music faculty who are noted for their outstanding teaching, research, performance, and leadership in the field. The program is customized to suit individual student interests, allowing for either a research or practical orientation in focus. The music education program prepares advanced students to become deep thinkers, dynamic teachers, and innovative leaders. Graduates of the program have become leaders in music education in K-12, preschool, and community settings as music teachers or music administrators throughout South Florida, the United States, and in countries around the world.

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/ mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  • Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  • An official transcript is required for every school attended, even if it was only a single class
  • Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).
Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)
- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
Decisions
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines
• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

* Courses taken to fulfill Music Electives can be from MCY, MIP, MKP, MMI, MSJ, MTC, or MVP

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.
Mission
The Department of Music Education and Music Therapy offers graduate degrees in Music Education and in Music Therapy that prepare students for professional careers as teachers and therapists. The mission of the Master of Music degree program in music education at the Frost School of Music is to:

• Provide the highest quality of music education expertise
• Foster advanced professional development in music teaching practice as well as music education research
• Serve the music education profession as a resource for music teachers, the education community, and the university community, locally, regionally, nationally, and internationally.

Goals
The Objectives of the MM program in Music Education are for students to:

• Apply knowledge of music education philosophy or music learning theoretical content;
• Apply knowledge of music assessment practices; and
• Demonstrate synthesis of studies through a capstone project in research (thesis and project tracks) or curriculum development (certification track).

Student Learning Outcomes

• Students in the Master of Music Program will apply knowledge of music education philosophy or music learning theoretical content in a well-conceived position paper.
• Students will apply knowledge of music assessment practices in a music assessment creation project.
• Students in Thesis and Project tracks of the MM Program will demonstrate knowledge of music education research, while students in the Certification Track will demonstrate knowledge of curriculum development and implementation.

M.M. in Music Education with Teaching Certification

Overview
This program is designed for the individual who has already completed a university degree in another area of music (i.e., musicology, music performance, studio music and jazz, music business, music engineering, music therapy, or the B.A. in music). The degree includes a full semester of student teaching in a K-12 setting. Graduates obtain a Florida Music Teaching Certificate, and become music teachers and administrators in K-12, preschool, or community settings throughout South Florida, the United States, and around the world. Job placement has been consistently strong for graduates seeking positions in schools.

Admission Requirements

On-Campus Programs
The application priority deadline is December 1st.
The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
An official transcript is required for every school attended, even if it was only a single class.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript.
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately.
• Resume - attached to the application at the time of submission. This does not need to be sent separately.

The following supplemental materials may be required for some applicants:
• GRE Score - Please contact your program faculty for specific GRE information.
• TOEFL/IELTS Score - Please click here for more specific TOEFL/IELTS information.
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements.

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

Step 3 - Audition/Interview/Upload Portfolio
Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.

Music, Media, & Industry Application Deadlines
If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:
December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:
December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants
• TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants.
• Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and
b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Other Studies in Music**

Non-MED Music Electives (MCY, MIP, MKP, MMI, MSJ, MTC, MUS, MVP) 9

**Music Education Electives**

Select from the following Techniques Courses 3

- MED 740 Woodwind Techniques
- MED 741 Brass Techniques
- MED 742 Percussion Techniques
- MED 743 String Techniques
- MED 744 Vocal Techniques
- MED 745 Folk and Modern Instrument Techniques

Elementary Methods Courses* 3

- MED 642 Teaching General Music
- MED 643 Teaching Instrumental Music

Secondary Methods Courses (select 2)* 6

- MED 643 Teaching Instrumental Music
- MED 644 Teaching Modern Music
- MED 648 Music for Special Learners**
- MED 649 Teaching Vocal Music

Comprehensive Review#

Total Credit Hours 45

* One Elementary and one Secondary Methods course required for certification

** May substitute for Secondary Methods course

*** A student holding a B.M. degree in music may work toward certification in Music Education concurrently with the M.M. degree in Music Education. The B.M. degree must have included at least 14 credit hours of music performance, 12 credit hours of music theory, 3 credit hours of conducting, 6 credit hours of music history, and credit hours in performance ensembles. The culminating project for this degree takes place within MED 775. This program is approved by the Florida Department of Education and leads to initial certification as a music teacher for grades K-12.

# For the Comprehensive Review, students will (1) design a curriculum unit for a K-12 classroom during their student teaching semester, (2) implement this unit during their student teaching semester, and (3) measure the impact of instruction on their students’ learning. Students will write a full report and give an oral presentation to an MED committee.

**Mission**

The Department of Music Education and Music Therapy offers graduate degrees in Music Education and in Music Therapy that prepare students for professional careers as teachers and therapists. The mission of the Master of Music degree program in music education with teaching certification at the Frost School of Music is to:

- Provide the highest quality of music education expertise
- Foster advanced professional development in music teaching practice as well as music education research
- Serve the music education profession as a resource for music teachers, the education community, and the university community, locally, regionally, nationally, and internationally.
Goals
The Objectives of the MM program in Music Education are for students to:

- Apply knowledge of music education philosophy or music learning theoretical content;
- Apply knowledge of music assessment practices; and
- Demonstrate synthesis of studies through a capstone project in research (thesis and project tracks) or curriculum development (certification track).

Student Learning Outcomes
- Students in the Master of Music Program will apply knowledge of music education philosophy or music learning theoretical content in a well-conceived position paper.
- Students will apply knowledge of music assessment practices in a music assessment creation project.
- Students in Thesis and Project tracks of the MM Program will demonstrate knowledge of music education research, while students in the Certification Track will demonstrate knowledge of curriculum development and implementation.

M.M. in Music Therapy
Overview
The Master of Music degree in Music Therapy consists of 30 credit hours of graduate study beyond the Bachelor of Music degree in Music Therapy (or its equivalent). This degree program is designed for the individual who already holds an undergraduate degree in music therapy. It is designed to prepare students for either advanced-level clinical practice, or additional opportunities in research or college teaching. Although all masters music therapy students are prepared for advanced clinical practice they also specialize in either a clinical or a thesis track. The curriculum is built upon the clinical and research paradigm known as Neurologic Music Therapy (NMT). This model utilizes scientific evidence regarding the influence of music on human brain and behavior function to treat neurological, developmental, and medical needs. The NMT approach is becoming increasingly recognized and accepted by the medical community, which helps increase employment for our graduates. Masters students work closely with music therapy faculty for the duration of this rigorous program, thus they gain experience in all aspects of music therapy clinical practice, education, and research. The music therapy faculty are experienced researchers and distinguished educators who are known internationally for their research and service to the profession.

Admission Requirements
On-Campus Programs
The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply
- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials
All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:
- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
  - Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
  - An official transcript is required for every school attended, even if it was only a single class
  - Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately
The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
- Prescreening/Audition/Interview
- Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

**Step 3 - Audition/Interview/Upload Portfolio**

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.

**Music, Media, & Industry Application Deadlines** (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

**International Applicants** (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

**Documents Required**

Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.
**Type of Evaluation Required**
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

**Where to Submit Documents for Evaluation**

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**
Applicants are responsible for the evaluation fee.

**Submission of Evaluation**
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**
Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**
- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Mission**

The mission of the Master of Music degree program in Music Therapy at the Frost School of Music is to prepare students to develop:

- advanced and comprehensive musicianship
- independent research skill
- advanced level clinical knowledge and skill for the music therapy profession.

**Goals**

The Master of Music degree in Music Therapy is designed to help students achieve the following three goals:

1. To acquire specialized musicianship as needed for advanced performance and for clinical practice. Within the diverse and comprehensive Frost School of Music, students have the opportunity to study with faculty who perform and compose regularly in local, national and international venues. Consequently, the musical preparation of students here is unparalleled.

2. To achieve advanced clinical competencies by examining the scientific evidence that supports the use of music in a therapeutic context. Through this examination, students will gain an in-depth understanding of human behavior and further refine their clinical interaction skills. Students will then translate this knowledge into therapeutic interventions which are then applied to clinical populations. Clinical work and research can be conducted at multiple hospitals and agencies in the greater Miami area, including the world-famous Miller School of Medicine.
3. To develop independent research skills. Students have the opportunity to exercise their critical thinking skills and increase their knowledge of research topics, methodology, and analysis. Students who pursue the thesis will demonstrate the ability to design and conduct an independent research project. Students who pursue the clinical emphasis will apply research findings as they develop a clinically focused project within a specific clinical setting.

**Student Learning Outcomes**

- Students will demonstrate musical skills and knowledge of musical concepts for advanced clinical practice.
- Students will demonstrate advanced clinical knowledge and skill competency.
- Students will demonstrate independent research skill.

**M.M. in Music Therapy with Undergraduate Equivalency**

**Overview**

The Master of Music degree in Music Therapy with Undergraduate Equivalency is the ideal option for the individual who has already completed a bachelor's degree in some area of music (i.e., music performance, music education, etc.) and seeks training as a music therapist. Ultimately, this degree program is designed to prepare students for either advanced-level clinical practice, or additional opportunities in research or college teaching. Students in this specialized degree program complete one year of undergraduate prerequisite courses in music, music therapy, psychology, and biology. These courses provide the student with entry-level clinical competency. In years two and three, students complete graduate level coursework as required for the Master of Music degree in Music Therapy. The entire curriculum is built upon the clinical and research paradigm known as Neurologic Music Therapy (NMT). This model utilizes scientific evidence regarding the influence of music on human brain and behavior function to treat neurological, developmental, and medical needs. The NMT approach is becoming increasingly recognized and accepted by the medical community, which helps increase employment for our graduates.

**On-Campus Programs**

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

**Step 1 - Apply**

- Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
- Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

**Step 2 - Submit Supplemental Materials**

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

- Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
- Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
- An official transcript is required for every school attended, even if it was only a single class
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
- Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

- GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
- TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
- Teaching/Conducting Sample
- Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements. Applicants are responsible for tracking the status of their application materials and should do so on CaneLink. Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ.

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. Check the Audition/Portfolio Requirements page for specific requirements.

Music, Media, & Industry Application Deadlines

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- April 1 - All JD/MM and JD/MA applicants
- June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

- December 1 - International applicants and priority domestic applicants
- February 1 - Priority portfolio deadline
- April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants.
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required

Submit the following educational documents to an approved international credentialing evaluation service:

- Official original diplomas and certificates in the original language, and
- Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required

The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

Josef Silny & Associates (JSA), Inc. International Education Consultants, is the preferred evaluation service for international applicants to the University of Miami due to their competitive prices and high-quality service. Click here for more information, including the Application for Evaluation of Foreign Educational Credentials.
World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

**Evaluation Fee**

Applicants are responsible for the evaluation fee.

**Submission of Evaluation**

The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music  
PO Box 248165  
Coral Gables, FL 33124-7610  

or electronically to:  
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School  
%20of%20Music%20International%20Applicants.html) for additional details
- Applicants who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

**Decisions**

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

**Application Guidelines**

- Applications are accepted for the fall term only
- Applications are accepted for only one degree program
- Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
- Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
- The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
- Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
- Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
- For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

The first year of this program consists entirely of undergraduate prerequisite courses. Students must demonstrate successful completion of these courses, and earn with a minimum GPA of 3.0 each semester of the first year, before continuing to either equivalency-only courses or graduate level courses in the second year.

* In this program, students complete three years of courses, followed by 6 months of internship which is 6-month, full-time clinical training experience that is completed off-campus at an approved facility. The bulk of the thesis work should be completed to internship and the thesis defense may take place before or after the internship.

* This is a suggested Plan of Study. Your actual course sequence may vary depending on your previous academic experience as well as current course offerings. Students should meet with their academic advisor each semester to determine the appropriate course selection.

Mission
The mission of the Master of Music degree program in Music Therapy at the Frost School of Music is to prepare students to develop:

- advanced and comprehensive musicianship
- independent research skill
- advanced level clinical knowledge and skill for the music therapy profession.

Goals
The Master of Music degree in Music Therapy with Undergraduate Equivalency is designed to help students achieve the following three goals:

1. To acquire specialized musicianship as needed for advanced performance and for clinical practice. Within the diverse and comprehensive Frost School of Music, students have the opportunity to study with faculty who perform and compose regularly in local, national and international venues. Consequently, the musical preparation of students here is unparalleled.

2. To achieve advanced clinical competencies by examining the scientific evidence that supports the use of music in a therapeutic context. Through this examination, students will gain an in-depth understanding of human behavior and further refine their clinical interaction skills. Students will then translate this knowledge into therapeutic interventions which are then applied to clinical populations. Clinical work and research can be conducted at multiple hospitals and agencies in the greater Miami area, including the world-famous Miller School of Medicine.

3. To develop independent research skills. Students have the opportunity to exercise their critical thinking skills and increase their knowledge of research topics, methodology, and analysis. Students who pursue the thesis will demonstrate the ability to design and conduct an independent research project. Students who pursue the clinical emphasis will apply research findings as they develop a clinically focused project within a specific clinical setting.

Student Learning Outcomes
- Students will demonstrate musical skills and knowledge of musical concepts for advanced clinical practice.
- Students will demonstrate advanced clinical knowledge and skill competency.
- Students will demonstrate independent research skill.

Ph.D. in Music Education
Overview
The Doctor of Philosophy program is offered in Music Education, as well as in Music Education with Music Therapy Emphasis.

MUSIC EDUCATION
Highly customizable and rigorous, the Doctor of Philosophy in Music Education prepares students to become deep thinkers, researchers, scholars, and innovative leaders in the field. Students work closely with the faculty in order to shape both their own professional path and the field as a whole towards a progressive model of music education for the 21st Century. Placement rate for our Ph.D. graduates is outstanding, and alumni teach at prominent universities nationwide and internationally. Furthermore, alumni regularly serve on editorial boards of major music education journals, and continue to publish and present widely.

MUSIC THERAPY
The Doctor of Philosophy degree is also offered in Music Education with Music Therapy Emphasis. This degree is designed to prepare students for careers in music therapy-related research, college teaching positions in music therapy, or administrative positions. Doctoral students work closely with music therapy faculty for the duration of this rigorous program, gaining experience in all aspects of music therapy clinical practice, education, and research. Faculty are experienced researchers and distinguished educators known internationally for their research and service to the profession. Additionally, students further their musical skills by studying with faculty who perform, compose, and conduct regularly in national and international
Admission Requirements

On-Campus Programs

The application priority deadline is December 1st.

The supplemental materials deadline is January 1st.

Please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/mmi-applicants/) for special deadlines related to our Arts Presenting, Media Writing, Music Business, and Music Engineering programs

Step 1 - Apply

• Apply online through CollegeNET (https://www.applyweb.com/miamigrd/)
• Upload a prescreening (if applicable) through SlideRoom (https://fsomgrad.slideroom.com/#/Login) – check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific information

Step 2 - Submit Supplemental Materials

All supplemental materials must be submitted either via email to fsom.graddocs@miami.edu or via US Mail to PO Box 248165, Coral Gables, FL 33124.

Required for all applicants:

• Transcripts – an official transcript from ALL post-secondary schools attended, regardless of if a degree was granted or not, must be sent directly to the Frost School of Music from the issuing institution in order to be considered official
• Applicants with international transcripts, please click here (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) for specific instructions about approved evaluation services
• An official transcript is required for every school attended, even if it was only a single class
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Three letters of recommendation - sent through CollegeNet as part of application submission. These do not need to be sent separately
• Resume - attached to the application at the time of submission. This does not need to be sent separately

The following supplemental materials may be required for some applicants:

• GRE Score - Please contact your program faculty (https://www.frost.miami.edu/faculty/by-program/) for specific GRE information
• TOEFL/IELTS Score (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/) - Please click here for more specific TOEFL/IELTS information
• Teaching/Conducting Sample
• Writing Sample
• Prescreening/Audition/Interview
• Portfolio

Not all supplemental materials are required for all degree programs. Please see the Degree Program Requirements (https://admissions.frost.miami.edu/_assets/pdf/graduate/grad-admission-reqs-080819.pdf) for specific requirements.

For information regarding specific program requirements, please see Application & Program Requirements (https://admissions.frost.miami.edu/graduate/application-program-requirements/).

Applicants are responsible for tracking the status of their application materials and should do so on CaneLink (https://m.canelink.miami.edu/). Please allow at least two weeks for documents to be processed and marked as complete. If you are unable to access your CaneLink account, please check the CaneLink FAQ (https://canelink.it.miami.edu/faq/).

Step 3 - Audition/Interview/Upload Portfolio

Audition - If your program requires an audition, you will be contacted after the December 1st deadline to schedule a date. All performance programs require a prescreening and invitations to audition will be extended to those applicants approved by faculty review. Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements. Do not make travel plans until you receive a confirmation email from Frost Admissions.

Interview - If your program requires an interview, you will be contacted by department faculty to schedule a date.

Portfolio - If your program requires a portfolio, please upload it through SlideRoom. (https://fsomgrad.slideroom.com/#/Login) Check the Audition/Portfolio Requirements (https://admissions.frost.miami.edu/graduate/audition-requirements/) page for specific requirements.
Music, Media, & Industry Application Deadlines (https://admissions.frost.miami.edu/graduate/how-to-apply/nni-applicants/)

If you are applying to Music Business & Entertainment Industries, Arts Presenting & Live Entertainment Management, JD/MM, or JD/MA programs, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
April 1 - All JD/MM and JD/MA applicants
June 1 - Final application and supplemental materials deadline for domestic applicants

If you are applying to Music Engineering Technology or Media Writing and Production, the following deadlines apply:

December 1 - International applicants and priority domestic applicants
February 1 - Priority portfolio deadline
April 1 - Final application and portfolio deadline - all applications/supplemental materials/portfolios are due by this date

International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/)

- TOEFL/IELTS - Test scores are required for international applicants whose native language is not English and who have not received a degree from an accredited English-speaking institution. Additional information can be found under International Applicants (https://admissions.frost.miami.edu/graduate/how-to-apply/international-applicants/).
- Applicants must submit a copy of their passport before a decision can be made. The name on your passport must match the name with which you apply.

If accepted, you will be contacted by the Office of Admission to submit documentation of financial responsibility.

Documents Required
Submit the following educational documents to an approved international credentialing evaluation service:

a) Official original diplomas and certificates in the original language, and

b) Official original transcripts in the original language (names of courses, grades, and hours of instruction) for every year of study.

Documents in a language other than English must be accompanied by professional, certified English translations. Translations supplement but do not replace, the official documents.

Type of Evaluation Required
The Frost School of Music is requiring international applicants to their programs to complete a course-by-course evaluation with GPA.

Where to Submit Documents for Evaluation

World Education Services (WES) is the second preferred evaluation service for international applicants to the University of Miami. Click here (https://www.wes.org/) for more information, including the Application for Evaluation of Foreign Educational Credentials (https://www.wes.org/#get-started).

Please note that international applicants are not required to use the services of JS&A or WES exclusively, but the University of Miami requires that an international credential evaluation must be done by one of the approved evaluation vendors found on this list (http://naces.org/members.html).

Evaluation Fee
Applicants are responsible for the evaluation fee.

Submission of Evaluation
The evaluation vendor is required to send all official copies of related documents to:

Frost School of Music
PO Box 248165
Coral Gables, FL 33124-7610

or electronically to:
fsom.graddocs@miami.edu

- Please click here (http://grad.miami.edu/apply/on-campus-graduate-programs/frost-school-of-music-international-applicants/Frost%20School%20%20Music%20International%20Applicants.html) for additional details
Applications who are applying with a current degree in progress will be required to have their final transcripts and diploma evaluated upon arrival at the Frost School. If applicants use Josef Silny for the initial evaluation, the Frost School will cover the evaluation. If applicants choose a different vendor, they will be responsible for the cost of the re-evaluation.

Decisions

Students are recommended for admission to the Frost School of Music by the faculty and admission committees. Final acceptance to the Graduate program is made after all materials requested by the Frost School of Music have been received and evaluated. Scholarships and/or Assistantships are awarded based on faculty recommendation. Admission decisions are sent out starting in late March.

Application Guidelines

• Applications are accepted for the fall term only
• Applications are accepted for only one degree program
• Graduate applicants must have a minimum of a 3.0 cumulative GPA for consideration
• Applicants must be in-progress toward completing or have earned the appropriate prior music degree(s) from a regionally accredited institution in order to apply for a graduate level music program. If you are accepted and decide to attend the Frost School, you will be required to provide a final transcript showing a conferred degree.
• The MM in Music Business & Entertainment Industries and the MA in Arts Presenting & Live Entertainment Management do not require prior music degrees. The MS in Music Engineering Technology is open to students who have completed an undergraduate degree in an appropriate engineering/science field.
• Current University of Miami students applying to a new degree program must provide an official University of Miami transcript
• Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant
• For information on where to submit supplemental materials, please see our Contact Information (https://admissions.frost.miami.edu/contact-us/)

**Mission**

The mission of the Ph.D. program of the Frost School of Music is to:

- Provide the highest quality of music education and music therapy expertise
- Foster advancements in music teaching and music therapy practice, music education and music therapy research
- Serve the music education and music therapy professions as a resource for music teachers and music therapists, the music education/music therapy research community, the education community, and the university community, locally, regionally, nationally, and internationally.

**Goals**

The objectives of the Ph.D. program in Music Education are to:

- Develop highly competent, independent researchers in the fields of music education and music therapy capable of developing a sustained research program;
- Prepare Ph.D. students to provide instruction to both undergraduate and graduate programs in their area of specialty (music therapy, instrumental music education, string music education, choral music education, and general music education); and
- Develop future collegiate faculty in the areas of music education and music therapy who will become leaders in the profession.

**Student Learning Outcomes**

- Students will become well-qualified producers of research in music education or music therapy.
- Students will demonstrate application of fundamental and specialized knowledge related to music teaching or music therapy practice.
- Students will demonstrate the ability to write publishable scholarly papers in their discipline (music education or music therapy) for various professional audiences.

**Music Media and Industry**

**Music Business and Entertainment Industries**

In today's fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBEI program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the Music Business program (https://musicbusiness.frost.miami.edu/).

**Music Engineering Technology**

Since 1975, the Music Engineering Technology program at the University of Miami Frost School of Music has pioneered education in music and technology, setting the standard by which the National Association of Schools of Music (NASM) accredits other such programs around the United States. Alumni of the program have contributed significantly to the music and audio industries and upon graduation pursue careers ranging from recording engineer to software designer.

The Music Engineering Technology program offers a two-year Master of Science graduate degree for students who have completed an undergraduate degree in electrical engineering or computer science. These students study the software and hardware design of audio systems and perform independent research that culminates in a thesis project. Upon graduation, these students are widely placed in top corporations that span the audio industry. For more information, please visit the website for the Music Engineering program (https://musicengineering.frost.miami.edu/).

**Arts Presenting and Live Entertainment Management**

Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that’s distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors. AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program (https://artspresenting.frost.miami.edu/).
Media Writing and Production

In the Media Writing and Production program, we are dedicated to not only providing the foundational skills necessary for the student to pursue a career in the media industry, but also to stimulate and encourage student awareness of their unique gifts as a creative musician. We accomplish this by promoting critical analysis and creative problem-solving skills throughout the program. Courses are designed to provide students with a cohesive program of study that incorporates both current and foreseeable trends – from the manipulation of sound through a digital audio workstation (DAW), the hybrid use of acoustic and electronic instruments, to the implementation and use of sound libraries and synthesizers that will best prepare students for competition in today’s industry. For more information, please visit the website for the Media Writing and Production (https://mediawriting.frost.miami.edu/degrees/mm-in-media-writing-and-production/) Program (https://artspresenting.frost.miami.edu/).

Masters Programs in Music Media and Industry

- M.A. in Arts Presenting and Live Entertainment Management (p. 2808)
- M.A. in Arts Presenting and Live Entertainment Management (Online) (p. 2812)
- M.M. in Music Business and Entertainment Industries (p. 2819)
- M.M. in Music Business and Entertainment Industries (Online) (p. 2823)
- M.M. in Media Writing and Production (p. 2814)
- M.S. in Music Engineering Technology (p. 2825)

Certificate Programs

- Certificate in Arts Leadership (p. 2801)
- Certificate in Arts Management (p. 2801)
- Certificate in Arts Presenting Fundamentals (p. 2802)
- Certificates in Legal Aspects of Music Business (p. 2802)
- Certificate in Music Business Fundamentals (p. 2802)
- Certificate in Music Entrepreneurship (p. 2802)
- Certificate in Music Rights Administration and Licensing (p. 2803)
- Certificate in Tour and Live Entertainment Administration (p. 2803)

MMI 601. Transducer Theory. 3 Credit Hours.
