

EXECUTIVE MBA IN HEALTH MANAGEMENT AND POLICY

Overview

The University of Miami Herbert Business School Executive MBA in Health Management and Policy Program prepares graduates for positions of leadership in health care and health-related organizations. The program focuses on the post-graduate educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. Combining its strengths in graduate business education and its close relationships with the South Florida health care community, the program teaches practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the health care industry.
