B.S. IN COMPUTER ENGINEERING / M.S. IN INDUSTRIAL ENGINEERING

Overview

The College of Engineering offers a dual-degree program that culminates with students receiving a Bachelor of Science in Computer Engineering and a Master of Science in Industrial Engineering concurrently. This program is available only to qualified students enrolled in the undergraduate program in Computer Engineering at the University of Miami. This is a structured and integrated program totaling 153 credit hours.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level.
- Interested Computer Engineering Juniors with a cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Graduate School for admission into the M.S.I.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.I.E. degree could receive the B.S.C.E. degree after completing all its requirements, including the senior design project.
- To qualify for the M.S.I.E. degree, students must meet all the pertinent Graduate School requirements, including a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.I.E. degree.
- The student is awarded both the B.S.C.E. and the M.S.I.E. degrees after the requirements for both degrees are satisfied.
- Up to 6 credit hours of technical electives earned during the fourth year can be counted toward the 30 credit hours required for the M.S. degree. If their schedule allows, students may be able to complete an additional 6 credits of graduate classes during their fourth year.
- · Students must be registered for a minimum of 12 undergraduate credit hours per semester in their fourth year.
- · Students can register for a maximum of 6 graduate credit hours in each semester of their fourth year.

Admission Requirements

The dual B.S. CE/M.S. IE program is available only to qualified undergraduate students enrolled in the Department of Electrical and Computer Engineering. Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application.

Qualified students are strongly advised to apply to the dual degree program as early as possible in their junior year to facilitate academic advising and course selection in the second semester of their junior year. Students opting for an M.S. degree in a discipline different from their B.S. degree may need to take some prerequisite coursework. Before submitting an application, students should discuss the program and possibility of entering with an academic adviser.

This program is intended for exceptional students to acquire both a Bachelor of Science and a Master of Science degree simultaneously, in five years rather than the 4 plus 2 years (approximately) it normally requires.

Curriculum Requirements: B.S. Computer Engineering / M.S. Industrial Engineering

Code	Title	Credit Hours

Humanities and Arts (HA) Cognates and the People and Society (PS) Cognates can be selected from the appropriate University List.

See the department electives page for a detailed list of available options.

Graduate courses should be selected with the assistance of the Graduate Program Coordinator in Industrial and Systems Engineering
