

B.S. IN INDUSTRIAL ENGINEERING

Overview

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students' four years of study.

- Starting with EGN 114 **Global Challenges in Engineering** and EGN 123 **Digital Solutions for the Future**, students are given a broad introduction to Engineering. In addition they are introduced to a wide variety of topics in the digital realm including Python, Engineering graphics, Auto CAD, Excel, Tableau, Solid Works and AI applications.
- The students then move on to take ISE 201 **Work Design Systems System** where they perform work measurement projects in industry and determine the impact of productivity. This is applied in a semester project in industry which includes writing a reports, and making oral presentations to management. In the Fall of their Junior year, the students take ISE 363 **Project Management for Engineers** and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take ISE 380 **Engineering Economic Analysis** where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- ISE 406 **Computer-Aided Manufacturing** introduces the students to product design in manufacturing and modern concepts of CAD/CAM/ Automation.
- ISE 441 **Deterministic Models in Operations Research** focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- ISE 442 **Stochastic Models in Operations Research** focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.
- ISE 465 **Inventory and Supply Chain Systems** provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management. ISE 568 **Facilities Planning and Logistics** focuses on the analysis and design of production and service facilities, warehousing, and logistics.
- **ISE 224 Python for Engineers** will introduce programming and coding as a tool for analysis of industry systems. Theory and applications of decision support systems in industrial engineering are covered in ISE 524 **Decision Support Systems in IE**. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In ISE 557 **Ergonomics and Human Factors Engineering** both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as ISE 512 **Quality Management Systems** and ISE 547 **Simulation Modeling and Systems Analysis**.
- ISE 494 **Senior Design Project** is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

Advanced Writing and Communication Skills: Industrial Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Industrial Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- EGN 114 Global Challenges in Engineering
- ISE 201 Work Design Systems
- ISE 351 Safety and Ethics in Engineering
- ISE 363 Project Management for Engineers
- ISE 380 Engineering Economic Analysis
- ISE 494 Senior Project

- ISE 512 Quality Management Systems
- ISE 547 Computer Simulation Systems
- ISE 557 Ergonomics and Human Factors Engineering
- ISE 568 Facilities Planning and Logistics

Industrial Engineering Concentrations

- Engineering Management Concentration
- Financial Engineering Concentration
- Manufacturing Engineering Concentration
- Pre-Medical Concentration

BSIE Curriculum Requirements

Code	Title	Credit Hours
Core Requirement Courses		
EGN 114	Global Challenges Addressed by Engineering and Technology (NEW COURSE: Global Challenges in Engineering)	3
EGN 123	Computing and Digital Solutions for the future (NEW COURSE: Digital Solutions for the Future)	3
ISE 201	Work Design Systems	3
ISE 224	Python for Engineers	3
ISE 312	Foundations of Data Analysis	3
ISE 351	Safety and Ethics in Engineering	3
ISE 363	Project Management for Engineers	3
ISE 380	Engineering Economic Analysis	3
ISE 406	Computer-Aided Manufacturing	3
ISE 441	Operations Research and Optimization Methods	3
ISE 442	Stochastic Modeling and Decision Making	3
ISE 465	Inventory and Supply Chain Management	3
ISE 494	Senior Design Project	3
ISE 512	Quality Management Systems	3
ISE 516	Introduction to Applied Data Analytics	3
ISE 524	Systems Intelligence with Software Applications	3
ISE 547	Simulation Modeling and Systems Analysis	3
ISE 557	Ergonomics and Human Factors Engineering	3
ISE 568	Facilities Planning and Logistics	3
ISE Elective Courses		6
Students must take at least 1 course in each group to satisfy ISE electives.		
Group 1		
ISE 570 Engineering Management		
ISE 571 Engineering Entrepreneurship		
ISE 572 Management of Technological Innovation		
Group 2		
ISE 505 Robotics		
ISE 507 Design of Manufacturing Systems		
ISE 513 Quality Management in Service Organizations		
ISE 548 Games and Decision Making		
Engineering and Technical Elective Courses		
Additional Engineering Credit Hours		3
Additional Technical Elective Credit Hours		3
Other Courses		
Math & Basic Sciences Credit Hours		
ISE 310	Introduction to Engineering Probability	3
CHM 151	Chemistry for Engineers	3

or CHM 121	Principles of Chemistry	
CHM 153	Chemistry Laboratory for Engineers	1
or CHM 113	Chemistry Laboratory I	
MTH 151	Calculus I for Engineers	5
MTH 162	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 311	Introduction to Ordinary Differential Equations	3
PHY 221	University Physics I	3
PHY 222	University Physics II	3
PHY 223	University Physics III	3
PHY 224	University Physics II Lab	1
PHY 225	University Physics III Lab	1
General Education Requirements		
Written Communication Skills:		
WRS 105	First-Year Writing I	3
WRS 107	First-Year Writing II: STEM	3
Quantitative Skills:		
MTH 151	Calculus I for Engineers (fulfilled through the major)	
Areas of Knowledge:		
Arts and Humanities Cognate		9
People and Society Cognate		9
STEM Cognate (9 credits) (fulfilled through the major)		
Other Credit Hours		3
Total Credit Hours		129

Spring		
BIL 151	General Biology Laboratory	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
CHM 222	Organic Reactions and Synthesis ²	4
CHM 205	Chemical Dynamics Laboratory	1
MTH 311	Introduction to Ordinary Differential Equations	3
PHY 225	University Physics III Lab	1
PS Cognate (PS Elective) ¹		3
Credit Hours		18
Junior Year		
Fall		
BMB 401	Biochemistry for the Biomedical Sciences ²	4
CHM 206	Organic Reactions and Synthesis Laboratory	2
ISE 310	Introduction to Engineering Probability	3
ISE 351	Safety and Ethics in Engineering	3
ISE 380	Engineering Economic Analysis	3
ISE 441	Operations Research and Optimization Methods	3
Credit Hours		18

Spring		
ISE 224	Python for Engineers	3
ISE 312	Foundations of Data Analysis	3
ISE 363	Project Management for Engineers	3
ISE 442	Stochastic Modeling and Decision Making	3
AH Cognate (AH elective) ¹		3
AH Cognate (AH elective) ¹		3
Credit Hours		18
Senior Year		
Fall		
ISE 465	Inventory and Supply Chain Management	3
ISE 512	Quality Management Systems	3
ISE 547	Simulation Modeling and Systems Analysis	3
ISE 557	Ergonomics and Human Factors Engineering	3
AH Cognate (Advanced AH Elective) ¹		3
PS Cognate (PS Elective) ¹		3
Credit Hours		18
Spring		
ISE 406	Computer-Aided Manufacturing	3
ISE 494	Senior Design Project	3
ISE 516	Introduction to Applied Data Analytics	3
ISE 524	Systems Intelligence with Software Applications	3
ISE 568	Facilities Planning and Logistics	3
PS Cognate (Advanced PS Elective) ¹		3
Credit Hours		18
Total Credit Hours		143

¹ To be selected from lists approved People and Society (PS)/Arts and Humanities (AH) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in AH cognate and 3 courses in PS cognate (9 credit hours).

² Can be replaced with an Advanced Bioscience Elective to be chosen from BIL 250 (<https://bulletin.miami.edu/search/?P=BIL%20250>), BIL 255 (<https://bulletin.miami.edu/search/?P=BIL%20255>), BIL 268 (<https://bulletin.miami.edu/search/?P=BIL%20268>), MIC 301 (<https://bulletin.miami.edu/search/?P=MIC%20301>), CHM 202 (<https://bulletin.miami.edu/search/?P=CHM%20202>), CHM 222BMB 401 (<https://bulletin.miami.edu/search/?P=BMB%20401>) or BMB 402. **Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.**

Note: Failure to follow the plan of study may result in a delay in your graduation.

Sample BSIE Plan of Study

Financial Engineering Concentration

Freshman Year		
Fall		
EGN 114	Global Challenges Addressed by Engineering and Technology	3
MTH 151	Calculus I for Engineers	5
PHY 221	University Physics I	3
WRS 105	First-Year Writing I	3
Credit Hours		14
Spring		
ECO 212	Principles of Macroeconomics	3
EGN 123	Computing and Digital Solutions for the future	3
MTH 162	Calculus II	4
PHY 222	University Physics II	3
PHY 224	University Physics II Lab	1

WRS 107	First-Year Writing II: STEM	3
Credit Hours		17
Sophomore Year		
Fall		
AH Cognate (AH Elective) ¹		3
ISE 201	Work Design Systems	3
MTH 210	Introduction to Linear Algebra	3
PHY 223	University Physics III	3
PHY 225	University Physics III Lab	1
PS Cognate (PS Elective) ¹		3
Credit Hours		16
Spring		
ISE 224	Python for Engineers	3
CAE 210, ECE 205, or MAE 303	Mechanics of Solids I or Principles of Electrical Engineering-I or Thermodynamics	3
MTH 311	Introduction to Ordinary Differential Equations	3
CHM 151 or 121	Chemistry for Engineers or Principles of Chemistry	3
CHM 153 or 113	Chemistry Laboratory for Engineers or Chemistry Laboratory I	1
ISE 280	Fundamentals of Financial Engineering	3
Credit Hours		16
Junior Year		
Fall		
AH Cognate (AH Elective) ¹		3
PS Cognate (PS Elective) ¹		3
ISE 310	Introduction to Engineering Probability	3
ISE 351	Safety and Ethics in Engineering	3
ISE 380	Engineering Economic Analysis	3
ISE 441	Operations Research and Optimization Methods	3
Credit Hours		18
Spring		
FIN 320	Investment and Security Markets	3
ISE 312	Foundations of Data Analysis	3
ISE 363	Project Management for Engineers	3
ISE 406	Computer-Aided Manufacturing	3
ISE 442	Stochastic Modeling and Decision Making	3
PS Cognate (PS Elective) ¹		3
Credit Hours		18
Senior Year		
Fall		
ISE 465	Inventory and Supply Chain Management	3
ISE 512	Quality Management Systems	3
ISE 547	Simulation Modeling and Systems Analysis	3
ISE 557	Ergonomics and Human Factors Engineering	3
FIN 422	Speculative Markets and Derivatives	3
Financial Engineering Elective		3
Credit Hours		18
Spring		
ISE 494	Senior Design Project	3
ISE 516	Introduction to Applied Data Analytics	3
ISE 524	Systems Intelligence with Software Applications	3

ISE 568	Facilities Planning and Logistics	3
ISE 570	Engineering Management	3
AH Cognate (AH Elective)		3
	Credit Hours	18
	Total Credit Hours	135

¹ To be selected from lists of approved People and Society (PS)/Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

Note: Failure to follow the plan of study may result in a delay of your graduation.

Mission

The Department of Industrial and Systems Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Goals

The major goal of the Industrial and Systems Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial and Systems Engineering program, graduates are expected to be:

- Working as professionals by adding value in any one of the following sectors:
 - Service
 - Government
 - Consulting
 - Retail
 - Manufacturing
- Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

Student Learning Outcomes

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- An ability to communicate effectively with a range of audiences.
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
